VOLUME 10
JANUARY - DECEMBER
1970

ACCESSION NUMBERS A70-10001 to A70-46414

INTERNATIONAL AEROSPACE ABSTRACTS is prepared and published semimonthly (except June and December, which have three issues) by the Technical Information Service, American Institute of Aeronautics and Astronautics, Inc., for the Institute and the National Aeronautics and Space Administration under Contract No. NASW-1949. Editorial and Subscription Offices: 750 Third Avenue, New York, N. Y. 10017. Copyright © 1970 by the American Institute of Aeronautics and Astronautics, Inc. (The indexes, however, may be reproduced for any bibliographic purpose.)

Telephone: 212 TN-7-8300

TWX: 212 867-7265

SUBSCRIPTION INFORMATION. Semimonthly issues: United States and Possessions, 1 year, \$75 postpaid; Foreign Countries, 1 year, \$90 postpaid. Cumulated Index Volumes: United States and Possessions, 1 year, \$30 postpaid; Foreign Countries, 1 year, \$35 postpaid. Second-class postage paid at Phillipsburg, N. J.

INTRODUCTION

INTERNATIONAL AEROSPACE ABSTRACTS (IAA) is an abstracting and indexing service covering the world's published literature in the field of aeronautics and space science and technology. IAA is issued semimonthly, on the 1st and 15th of each month.

Coverage of Published Literature

The following types of publications are covered in IAA:

- Periodicals (including government-sponsored journals) and books.
- Meeting papers and conference proceedings issued by professional societies and academic organizations.
- Translations of journals and journal articles.

Coverage of Reports ("Unpublished" Literature)

Abstracts and indexes of report literature are issued in SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS (STAR), which is published by the Scientific and Technical Information Division, National Aeronautics and Space Administration.

By special arrangement between NASA and the American Institute of Aeronautics and Astronautics, IAA is issued in coordination with the twice-monthly schedule of STAR, which appears on the 8th and 23rd of each month.

IAA and STAR both utilize identical subject categories and indexes, which are described below.

Thus the two services provide comprehensive access to the national and international unclassified report and published literature of current significance to aerospace science and technology.

Arrangement of the Semimonthly Issues

IAA is arranged in two major sections:

- (1) Abstracts Section. This section contains complete bibliographic citations with informative abstracts, arranged by appropriate subject categories to facilitate scanning. The subject categories are numbered from 01 to 34, and the scope of each category is outlined in the Table of Contents and again at the beginning of each category in the Abstracts Section. Each abstract is prefixed by the IAA accession number.
- (2) Index Section. Five indexes are contained in this section: Subject, Personal Author, Contract Number, Meeting Paper and Report Number, and Accession Number. Each index is prefaced by explanatory notes to guide the user to the desired abstract.

Cumulated Indexes

The semi-annual cumulated index is issued promptly at the end of the first six months and the annual cumulated index is issued promptly at the end of the twelve-month period.

Each cumulated index contains the following sections: A—Subject Index, B—Personal Author Index, C—Contract Number Index, D—Meeting Paper and Report Number Index, and E—Accession Number Index.

Indexing Vocabulary

The Preliminary Edition of the NASA THESAURUS (December 1967) (NASA SP-7030) is the authority for the indexing vocabulary that appears in the subject indexes to STAR and IAA. The NASA Thesaurus should be consulted for a total picture of the current indexing vocabulary and associated cross-reference structure. Copies of the NASA Thesaurus may be obtained from the National Technical Information Service or the U. S. Government Printing Office at a price of \$8.50 for the three-volume set.

how to obtain publications abstracted

Address all inquiries and requests to:

Technical Information Service
American Institute of Aeronautics
and Astronautics, Inc.
750 Third Avenue, New York, N. Y. 10017

Telephone: 212 TN-7-8300
TWX: 212 867-7265

Documents abstracted are available from the AIAA Technical Information Service as follows:

- Paper copies of accessions announced in IAA and STAR and of other documents in the TIS library are available at \$5.00 per document up to a maximum of 20 pages. The charge for each additional page is \$0.25.
- Microfiche of documents announced in IAA are available at the rate of \$1.00 per microfiche on demand. Documents available in this manner are identified by the symbol # following the accession number in the Abstracts Section and in the Meeting Paper and Report Number and the Accession Number Indexes.
- Minimum air-mail postage to foreign countries is \$1.00.
- A number of publications, because of their special characteristics, are available only for reference in the library.

PLEASE REFER TO THE ACCESSION NUMBER WHEN REQUESTING PUBLICATIONS

CROSS REFERENCES

The subject index includes two types of cross references to aid the user of the index in locating the material being sought:

1. "USE" references (U) direct the user to alternate headings under which material on the subject will be found, for example

COLUMBIUM
U NIOBIUM

2. "NARROWER TERM" references (NT) refer the user to more specific headings in the same subject area for example

LUMINESCENCE
NT ELECTROLUMINESCENCE

A Notation of Content, rather than the title of the publication, appears under each subject heading; it is listed under several subject headings which provide multiple access to the subject content of each accession. The IAA accession number is located under and to the right of the Notation of Content. It is preceded by numbers identifying the issue and page of *International Aerospace Abstracts* where the abstract is located.

To illustrate:

Issue Number	Page Number	Accession Number
01	p0196	A70-10845

M

M WINGS

U VARIABLE SWEEP WINGS

MACH CONES

Mach effect on cylinders, tracking triple point of shock interaction using 25-spark camera
[SMPT PREPRINT 103] 22 p4032 A70-43032

MACH INERTIA PRINCIPLE

Finite rotating universe model construction not possessing Goedel cosmos pathological properties, discussing relation to Mach principle
01 p0191 A70-11358

MACH NUMBER

Oblique unsteady shock wave structure propagating at large Mach numbers in plasma cylinder under steady magnetic field, showing particle velocity profile discontinuity
01 p0064 A70-10999

Hypersonic flow over blunt bodies, discussing Mach number, specific heat and blast wave limits
04 p0613 A70-14454

Flow viscosity and heat conduction effects on shock wave propagation in bent channel with weak Mach reflection
04 p0671 A70-15013

Mixture Mach number defined for collisionless plasma flow about solid body by extending cold-ion theory
04 p0729 A70-15582
[AIAA PAPER 69-78]

Nozzle exit turbulence and excess fuel combustion as low and high speed jet noise source using Lighthill theory
05 p0834 A70-16782

Gas dynamic functions using critical velocity and Laval number
06 p1033 A70-17237

Pre-set Mach number control in supersonic wind tunnel, evaluating effects of nozzle installation, stagnation temperature drop and pressure errors
06 p1028 A70-17912

Ramjet engines combustion chamber and air intake design for velocities between Mach 2 to 7
06 p1130 A70-17932

Mach disk in underexpanded exhaust plume predicted by dividing flow field into subregions
[AIAA PAPER 70-231] 06 p0974 A70-18176

Helium injection Mach number effect on supersonic jet penetration into Mach 2 air stream from flat plate determined from concentration measurements
[AIAA PAPER 70-92] 06 p0975 A70-18200

Least squares method to determine shock thickness

at arbitrary Mach number from Boltzmann equation for rigid sphere rarefied gas
06 p1051 A70-18345

Airfoil research in S-10 French wind tunnel for two dimensional flow, noting Reynolds and Mach number ranges
[ONERA-TP-766] 08 p1433 A70-21843

Aerodynamic heating of blunt bodies, investigating dependence of hypersonic limit distribution on Mach number
09 p1603 A70-22419

Blast waves in low Mach number regime with assumption of power law density profile in rear, obtaining particle velocity and pressure distributions
09 p1661 A70-23214

Flow past yawed delta wing at supersonic flight velocities, obtaining real velocity near singular surface and replacing Mach number by perturbed parameter
10 p1799 A70-24126

Closed streamline low Mach number compressible fluid flow without temperature restrictions, noting incompressible flow behavior
10 p1869 A70-24547

Regional growth functions of turbulent wakes at small Mach numbers using regression equations
11 p1976 A70-25998

Shock ionized xenon electrical conductivity measurement at high temperatures as function of Mach number, noting equilibrium effects
12 p2281 A70-27807

Gaseous injection into supersonic flow, investigating secondary Mach number and injection angle effects on flowfield in supersonic wind tunnel
[AIAA PAPER 70-552] 13 p2339 A70-29017

Inert gas ionization behind shock wave at high Mach numbers, using electrical conductivity and continuum emission measurements
13 p2388 A70-29380

Compressible fluids steady state equations invariant transformation, establishing sound speed-Mach number relation
13 p2389 A70-29458

Plasma sheath boundary as closed Mach surface, demonstrating Bohm criterion application to ion velocity component normal to sheath edge
13 p2464 A70-29465

High Mach number viscous flow past cylinder with cylindrical shock wave
13 p2391 A70-29970

Graphical plotting of critical Preston tube diameter, allowing for Mach and Reynolds numbers effects and introducing limiting line
14 p2586 A70-30871

Critical Mach numbers for transverse resistive shock waves as function of fluid/magnetic pressure ratio compared with cold plasma theory
14 p2623 A70-31036

Linearized two dimensional double vortex sheet model of inviscid compressible jet instabilities over all Mach numbers
15 p2722 A70-32375

Temperature and Mach number distributions measurements on supersonic turbulent boundary layers for reanalyzing heat transport
[AIAA PAPER 70-744] 17 p3066 A70-34499

Mach disk structure in free low density expanding supersonic jet from static pressure probe measurements
17 p3068 A70-34696

Pressure distribution measurements on wedges in compressible flow at Mach 0.5-2.2, discussing wedge angle, Mach number and boundary layer thickness effects
17 p3013 A70-35923

Axial flow compressor cascades, predicting total pressure losses for inlet relative Mach number greater than unity
[ASME PAPER 70-GT-57] 18 p3209 A70-36872

Helium injection Mach number effect on supersonic jet penetration into Mach 2 air stream from flat plate determined from concentration measurements
20 p3558 A70-39690

Mach number effect on sound propagation in tuning acoustically lined rectangular duct with uniform flow
20 p3673 A70-39709

Heat fluxes from shock-heated gas to shock tube wall and wedge surface as function of Mach number, using platinum resistance thermometers
20 p3613 A70-40343

Pressure distribution on thin nonlifting airfoils in steady two dimensional flow with freestream Mach number at or near unity
23 p4134 A70-44583

MACH-ZEHNDER INTERFEROMETERS

CW laser light sources for Mach-Zehnder interferometer, obtaining results for carbon dioxide injected through porous bottom wall into air flow
03 p0484 A70-13397

Atmospherically induced phase fluctuations for various path lengths using near ground horizontal Mach-Zehnder, discussing turbulence effects
10 p1916 A70-24413

Stress analysis using transmitted light polariscope and Mach-Zehnder interferometer for frozen-stress slice
12 p2325 A70-27620

Gas laser iterative alignment of Mach-Zehnder interferometer for monochromatic and white light fringes 19 p3424 A70-37880

Mach-Zehnder interferometer for holographic investigation of inhomogeneities in transparent media, discussing photointerpretation error reduction 20 p3633 A70-39749

Optical image hologram production, investigating gas flows around body by means of Mach-Zehnder interferometer 20 p3633 A70-39761

Mach-Zehnder interferometer for plasma diagnostics measurements, discussing optical interference method, fringe shift determination and dispersion equations 21 p3856 A70-41150

Two dimensional turbine cascade air flow, examining boundary layer regime, thickness, velocity and pressure coefficient at any point by Mach-Zehnder interferometer 22 p4026 A70-42344

Pressure effects on burning rate of magnesium mixtures with solid oxygen containing organic compounds, determining charge density effect on mass velocity 01 p0218 A70-11021

Stress-strain effect on dislocation densities of cylindrical Mg single crystals deformed by torsion basal slip compared to tension test 01 p0122 A70-11236

Mg vapor and oxygen surface reactions in MgO deposits, using atomic absorption spectrophotometry 02 p0250 A70-12006

- Rocket-borne spectroheliograph for taking X ray and monochromatic pictures of sun in Mg II line
03 p0570 A70-13594
- Magnesium solubility in titanium from X ray analysis of Mg distribution in diffusion zones at high temperature and pressures
09 p1703 A70-22567
- Singly ionized Mg resonance lines electron impact broadening quantum mechanical calculation
09 p1732 A70-22827
- Mg ion metabolism in neuromuscular excitability maintenance, discussing quantity requirements, detection and electromyographic recording
12 p2172 A70-28045
- Preignition and combustion kinetics in airstream of Mg and Al suspensions in aviation kerosene and gasoline
14 p2664 A70-30395
- Chemical and electrochemical corrosion resisting primers for Mg surface coatings in machine parts
14 p2598 A70-31293
- Magnesium pulse arc welding, describing procedure, techniques testing and advantages
17 p3100 A70-34635
- Solar chromosphere resonance lines, observing H and K line profiles of Mg ions
17 p3161 A70-34893
- Fabry-Perot interferometry of solar Mg II resonance lines
17 p3162 A70-34897
- Lithium-like line spectra in Mg, Al and Si observed with grazing incidence spectrometer and low inductance microfarad spark source
17 p3138 A70-35720
- Combustion of decomposition products of Mg based pyrotechnic fuel in supersonic flow, obtaining heating device characteristics
20 p3736 A70-39266
- Mg high temperature creep mechanism in high and low stress regions, using isothermal tensile creep tests
23 p4204 A70-43885
- MgH molecular lines Zeeman splitting in sunspot spectra confirmed by photoelectric observations
24 p4400 A70-45308
- Mg addition effects on impact strength and micro structure of Al-Si-Cu alloys, using Charpy test and metallographic methods
24 p4363 A70-46196
- MAGNESIUM ALLOYS**
Galvanic cell using liquid Mg chloride or Mg chloride-Ca chloride mixtures as electrolyte used to determine activities in Mg-Al liquid alloys
03 p0507 A70-13138
- Ni addition effects on Mg-Nd and Mg-Nd-Mn alloys structure and heat resistance
04 p0706 A70-15189
- Electron momentum distributions from Compton profiles of Li-Mg polycrystalline samples, exhibiting discontinuity at free electron value of Fermi momentum
05 p0892 A70-16471
- Light Mg-Li alloys physical and mechanical properties, production and treatment
[DFVLR-SONDDR-18]
07 p1306 A70-19234
- Soviet papers on casting of aluminum, magnesium and titanium alloys
08 p1504 A70-21126
- Al-Mg alloys mechanical properties and corrosion resistance during aging, noting Zr and Mo additives effects
08 p1517 A70-21129
- Al-Mg oxidation resistance and kinetics, studying Zr, Ce and Be additives effects on oxide films mechanical properties
08 p1517 A70-21130
- Carbon-bearing materials for modification of Mg-Al-Zn-Mn alloys filtration processes
08 p1505 A70-21132
- Stress concentration effect on fatigue strength of Al- and Mg-base structural alloy specimens of different sizes analyzed statistically
09 p1703 A70-22617
- Fatigue limit and rupture stress distribution patterns of Al- and Mg-base structural alloys using accelerated Prot and Enomoto methods
09 p1703 A70-22621
- Soviet monograph on intermetallic compounds with Laves phases, covering crystallographic and thermodynamic characteristics of Mg-Zn, Mg-Cu and Mg-Ni systems
12 p2252 A70-26885
- Binary and ternary Mg alloys ductile fracture mechanism, studying coherent/noncoherent particles effects
12 p2256 A70-27612
- Particles shape and phase composition in combustion products of dispersed Al-Mg alloy powders by electron diffraction and X ray analysis
14 p2664 A70-30396
- Al-Mg alloy sheets work hardened plastic properties, tensile strength and elongation
14 p2597 A70-30962
- Work hardening and tempering effects on Al-Mg alloy stress corrosion and mechanical properties
14 p2597 A70-30963
- Al-Zn-Mg weldable alloy composition, mechanical properties, heat treatment, aging effects, etc
14 p2597 A70-30964
- Al-Zn-Mg alloys aging kinetics and rupture mechanism, discussing stress corrosion, welded structures stability, activation energy, etc
14 p2597 A70-30965
- Al-Mg-Zn alloy composition, mechanical properties and structure for various heat treatments, discussing welded structures stability, stress relief, corrosion resistance and tensile strength
14 p2597 A70-30966
- Al-Mg alloys creep characteristics dependence on Ag, Si and Zn additions during aging heat treatments, establishing activation energy and stress exponents
16 p2930 A70-33086
- Al-Mg alloys recrystallization, investigating heating rate and annealing time effects on sheet grain size
19 p3450 A70-37372
- Cooling rate effect on Al-Mg equilibrium state during heat treatment after annealing
20 p3644 A70-38959
- Stressed cast Mg-Nd-Zr alloys structural transformations kinetics over temperature range by electron microscopy
20 p3646 A70-39046
- Mg-Al alloy beta phase precipitation, using metallography, hardness tests and electron microscopy
20 p3652 A70-40447
- Magnesium Al and Ti alloys electron beam welding for aerospace industry, discussing material requirements, weld quality and optimum conditions
22 p4042 A70-42338
- Light rare earth metals improving Mg alloys, Al alloys, Cu alloys and superalloys
22 p4057 A70-43575
- Al and liquid Al-Mg alloys oxidation at high temperatures, noting Mg content effect
24 p4361 A70-46174
- Al-Zn-Mg alloy prolonged aging behavior, examining Gp and intermediate zones, equilibrium phases, maximum strength and serrated stress strain curve
24 p4362 A70-46189
- Grain growth abnormality in Al-Mg ingots with small amounts of Mn and Cr during secondary recrystallization
24 p4363 A70-46197
- Alloying elements effects on corrosion resistance of Mg ingot in NaCl aqueous solution
24 p4363 A70-46198
- MAGNESIUM CELLS**
Refuelable Mg-air battery anode, electrolyte and packaging materials selection from standpoint of cell voltage, metal consumption and sludge formation
02 p0253 A70-12721
- MAGNESIUM COMPOUNDS**
NT CHLOROPHYLLS
NT ENSTATITE
NT FORSTERITE
NT MAGNESIUM FLUORIDES
NT MAGNESIUM OXIDES
NT MAGNESIUM PERCHLORATES
NT MAGNESIUM TITANATES
Crystal-chemical and geophysical implications concerning earth mantle phase transitions from beta magnesium silicate crystal structure
11 p1994 A70-25333
- MAGNESIUM FLUORIDES**
Magnon energy theory for temperature dependence of ferrous and magnesium fluorides antiferromagnetic-resonance frequency, sublattice magnetization and magnetic specific heat
09 p1739 A70-22324
- MAGNESIUM ISOTOPES**
Production rates determination for Na 24 and Mg 28 isotopes in Ar exposed to cosmic rays
03 p0561 A70-14092
- Elastic and inelastic scattering of proton beams from magnesium and silicon isotopes, using optical model
04 p0723 A70-15637
- Dating method for stone meteorites feldspar phase based on time interval between sun nebula Al 26 production and decay into Mg 26
06 p1150 A70-18479
- Magnesium hydride absorption lines in sunspot spectrograms indicating heavy Mg enhancement in sun relative to earth
08 p1571 A70-20904
- Arcturus atmosphere Mg abundances from rotational lines noting terrestrial proportions
14 p2637 A70-30540
- MAGNESIUM OXIDES**
Mg vapor and oxygen surface reactions in MgO deposits, using atomic absorption spectrophotometry
02 p0250 A70-12006
- Light scattering from thermally stable magnesium oxide particles in premixed turbulent flames used for measuring mean and fluctuating temperature values
02 p0398 A70-12039
- Defect F centers formation in MgO, discussing optical absorption bands, oscillator strengths, luminescence band, impurity centers, etc
[ALAA PAPER 70-828]
16 p2940 A70-33938
- Transparent ceramic armor fabrication using dense polycrystalline magnesia
19 p3437 A70-38422
- Solid phase stabilization of zirconium dioxide by combined addition of yttrium and magnesium oxides
19 p3455 A70-38732
- Apollo 11 magnesium-rich opaque oxide almalcolite mineral from Tranquility Base noting relation to pseudobrookite series
21 p3895 A70-41503
- Impurity dependent critical resolved shear stress of magnesium oxide single crystals, using compression testing
21 p3862 A70-41910
- MAGNESIUM PERCHLORATES**
Ammonium and magnesium perchlorate mixture thermal stability study with differential scanning calorimetry, noting exothermic decomposition of AP
20 p3688 A70-40272
- MAGNESIUM TITANATES**
Excitation, reemission and absorption spectra of Cr activated powdery Mg titanate prepared, using MgO and Ti dioxide with LiCl as flux
02 p0350 A70-11848
- MAGNESYN (TRADEMARK)**
U SERVOMOTORS
- MAGNET COILS**
NT FIELD COILS
Cryogenically cooled superconducting electromagnets design, construction and properties for research in plasma and solid state physics, considering coil systems
01 p0143 A70-10970
- Magnetic scalar potential of circular loop represented by toroidal coordinate system, solving boundary value problems determining fields of coils and toroidal magnetic conductors
18 p3215 A70-36295
- MAGNETIC ABSORPTION**
U ELECTROMAGNETIC ABSORPTION
- MAGNETIC ANOMALIES**
NT GEOMAGNETIC HOLLOW
Gravity and vertical magnetic anomalies interpretation to infer magnetization direction
09 p1729 A70-23601
- Gravitational and magnetic anomaly interpretation by regression analysis including geological field discrimination, inverse gravimetry and magnetometry, etc
12 p2223 A70-27348
- Proton magnetometer measurements from satellite Cosmos 49, observing residual and broad magnetic anomalies
18 p3248 A70-36770
- Cylindrical body with gravitational and magnetic anomalies, selecting point coordinates for body parameters
19 p3407 A70-37298
- Atmospheric Coulomb interaction influence on longitude dependence of electron intensity in anomaly region
19 p3491 A70-37305
- Spherical harmonic analysis of geomagnetic field strength for global magnetic anomaly charts
19 p3408 A70-37317
- Autocorrelation functions of anomalous gravitational and magnetic fields for ocean lines, relating Mohorovičić boundary and Cune isotherm
19 p3408 A70-37318
- Gravity and magnetic geophysical prospecting methods, discussing data acquisition, reduction and analysis in terms of underground geologic anomalies
22 p4018 A70-43086
- Geomagnetic axial dipole deviation from true north associated with earth core asymmetric motion, discussing geomagnetic reversal
22 p4020 A70-43231
- VLF signal phase and amplitude changes associated with PCA events and South Atlantic Geomagnetic Anomaly
22 p4023 A70-43292
- F region equatorial anomaly formation, investigating vertical EM drift effect
23 p4187 A70-43857
- MAGNETIC CIRCUITS**
Magnetic components design, manufacturing and handling for use in space communication satellites, noting design group role in parts construction and quality control
02 p0267 A70-12057
- Time optimal control synthesis for electromechanical devices, considering acoustical vibrations elimination in magnetically controlled contacts
08 p1472 A70-21001
- Free-running parallel inverters limitations by critical characteristics of networks, transformers and switching elements
11 p1983 A70-26628
- Electric machines magnetic circuit and motor shape, evaluating current, flux, resistance and reluctance
19 p3357 A70-37362
- MAGNETIC COILS**
NT FIELD COILS

- Computer graphics method for determining total magnetic field magnitude for various coil configurations and spacing, indicating optimum field uniformity near Helmholtz spacing
02 p0271 A70-12745
- Plasma conductivity measuring device using phenomenon of change of coil induction in electromagnetic field
09 p1737 A70-23380
- Diode coil suppression effect on two coil magnetic latching relays, showing operating time increment due to transformer action
13 p2378 A70-29348
- Magnetoplasma interaction with axially slotted delay line, examining coil behavior physical mechanisms by cold plasma model
22 p4079 A70-42365
- Superconducting magnet system design, operation and module tests, noting large and small coil systems performance data relationship
23 p4218 A70-44354
- Force-reduced superconducting toroidal magnet coils built with Cu plated Nb-Zr wire, investigating current enhancement characteristics
23 p4230 A70-44356
- Metals flaw detection, using electronic balancing type eddy current detecting coil
24 p4336 A70-45701
- MAGNETIC CONTROL**
- Magnetic torquers consisting of permanent magnets or coils for attitude stabilization of earth satellites in geomagnetic field
[IEEE PAPER 27.1] 05 p0924 A70-17000
- Aeros satellite active magnetic position control system of axis and spin noting design and operation
[DGLR-69-056] 07 p1393 A70-19148
- Time optimal control synthesis for electromechanical devices, considering acoustical vibrations elimination in magnetically controlled contacts
08 p1472 A70-21001
- Satellite stabilization one-axis control system using earth magnetic torquer
13 p2500 A70-28405
- Spinning sun oriented satellite using magnetic coil around spin axis for attitude control, detailing design
13 p2502 A70-28439
- Magnetically constrained steady state plasma production by hot cathode DC arc discharge in He
13 p2465 A70-29819
- Japanese scientific satellite magnetic attitude and spin rate control system design and computer simulation
18 p3332 A70-36065
- Square cross section waveguide with cutoff frequency, calculating density wave propagation in helical electron beam trajectories directed by magnetic field
20 p3584 A70-39256
- Magnetic compensation for attitude control of gravity gradient stabilized satellite using environmental torques and moment gyro damping
[ALAA PAPER 70-993] 20 p3668 A70-39537
- Magnetic three degree of freedom attitude control system for axisymmetric spinning spacecraft, using Kalman filter
[ALAA PAPER 70-974] 20 p3668 A70-39555
- Magnetic pressure fast opening gas puff valve for hydrogen bursts in conical theta pinch plasma source
21 p3833 A70-41472
- Optimal control of magnetic torque for bias momentum removal from attitude controller, discussing applications to Skylab
23 p4258 A70-44503
- Celestial sphere scanning by spinning symmetric satellite with open loop magnetic control of precession
23 p4216 A70-44524
- Supersonic convective electric arcs with magnetic stabilization in sulfur hexafluoride, examining aerodynamic drag and plasma column slanting
23 p4227 A70-44554
- Magnetically stabilized satellites passive roll control, discussing resonance solutions by variational approach
23 p4262 A70-44690
- MAGNETIC CORES**
- MTRAC program for transient analysis of circuits with square loop magnetic cores based on linearization of nonlinear circuit elements and Kirchhoff current law
05 p0825 A70-16999
- Lamellar magnetic core stacking pressure influence on core magnetic characteristics in variable magnetic field, noting effects on magnetic permeability
07 p1246 A70-19537
- Composite materials in Co or Fe matrix for solid rotor core materials applications at high temperature and stress, discussing magnetic properties
08 p1524 A70-21908
- Numerical analysis of magnetic frequency divider operation
09 p1649 A70-23338
- Geomagnetic micropulsations recording by transistorized saturated core magnetometers noting sensitivity
13 p2416 A70-30055

- Satellite electronics production, discussing dielectric film capacitor, solar probe magnetic oxide memory core and thin film assemblies
17 p3053 A70-35268
- MAGNETIC DIFFUSION**
- Solar wind effects on galactic cosmic rays isotropic diffusion and density distribution in interplanetary space in presence of azimuthal asymmetry
07 p1366 A70-19429
- Solar wind effects on galactic cosmic rays isotropic diffusion and density distribution in interplanetary space in presence of azimuthal asymmetry
18 p3309 A70-36903
- MAGNETIC DIPOLES**
- Geomagnetic potential optimal representation in frame of reference of eccentric inclined dipole using conversion formulas to determine harmonic coefficients
01 p0081 A70-11230
- Dipole magnetosphere model with cylindrical or spherical forbidden band for studying plasma motion in quasi-hydrodynamic approximation
01 p0082 A70-11521
- Magnetosphere boundary configuration calculated with allowance for geomagnetic dipole inclination to geographic axis and nondipole section of geomagnetic field
01 p0082 A70-11522
- Boundary conditions for equilibrium diamagnetic plasma in magnetic dipole having constant and isotropic pressure in system
01 p0153 A70-11631
- Standing bow shock in plasma flow into dipole magnetic field, measuring particle density, electron temperature, magnetic field flux and oscillations
03 p0530 A70-13158
- Converging series solutions for conducting circular disk in radiation field of vertical and horizontal magnetic dipoles to determine reemitted field
03 p0448 A70-13432
- Plane model of magnetosphere shape and structure, considering rarefied plasma flow past two dimensional magnetic dipole with dynamic and static boundary pressure, using conformal mapping
04 p0675 A70-14435
- Circularly polarized synchrotron radiation from distribution of electrically charged particle in magnetic dipole calculated for estimating Jupiter magnetic field
04 p0746 A70-14511
- Geomagnetic field secular variations relation to variations of magnetic field of optimum dipoles, noting earth core role
05 p0842 A70-16747
- Geomagnetic center position determined by coordinate system referred to dipole approximating geomagnetic field
06 p1057 A70-17844
- Gaussian approximation of parameters of arbitrarily oriented magnetic dipole representing geomagnetic field
07 p1266 A70-19441
- Pulsar model assuming magnetic dipole radiation by spinning neutron star interacting with nearby plasma
09 p1756 A70-22517
- Radiation field of electric and magnetic dipole in double layer medium, solving Sommerfeld integrals
09 p1650 A70-23550
- Charged particle motion in steady and perturbed dipole fields using laboratory earth magnetosphere plasma model
11 p2104 A70-25546
- MHD disturbances in semiinfinite electrically conducting fluid, introducing magnetic dipole to act as source of disturbance
12 p2277 A70-27156
- Plane model of magnetosphere shape and structure, considering rarefied plasma flow past two dimensional magnetic dipole with dynamic and static boundary pressure, using conformal mapping
13 p2392 A70-28460
- Earth dipole field disk dynamo model, studying connection between polarity intervals and precession effects
14 p2638 A70-30619
- Magnetosphere topology in presence of time independent ring current symmetrical with respect to earth dipole field axis
14 p2578 A70-31242
- Plasma velocity and moment equations in magnetic dipole field as function of variations along coordinate directions
16 p2956 A70-32934
- Electric and magnetic dipole VLF radiation patterns in lossy two component magnetoplasma
16 p2860 A70-32944
- Pulsar observations based on magnetic dipole model, discussing turnoff time, emission characteristics, birth rate and scale height
17 p3153 A70-34531
- Infinitesimal electric and magnetic dipoles embedded in lossy media, investigating earth effect on electromagnetic field
17 p3045 A70-35075
- Spin stabilized satellite reorientation, using magnetic dipole interaction with geomagnetic field
17 p3179 A70-35287

- High latitude magnetosphere structure, using two dipole model
18 p3312 A70-36168
- Near earth motion equations for electrically charged dust particles in gravitating dipole magnetic fields, using zero-relative-velocity surfaces and energy integral
18 p3315 A70-36606
- Gaussian approximation of parameters of arbitrarily oriented magnetic dipole representing geomagnetic field
18 p3249 A70-36915
- Magnetic bubbles in miniaturized electronic circuits, discussing fabrication and uses in communication and computers
19 p3484 A70-37574
- Geomagnetic field configuration and magnetic drift envelopes of particles with various pitch angles at equator calculated from two-dipole model of magnetosphere
20 p3619 A70-39299
- Monopole trajectory in magnetic dipole field by numerical integration on computer and Liouville theorem, using resolved Stormer cone to investigate motion
20 p3672 A70-39301
- Charged particle motion in steady and perturbed dipole fields using laboratory earth magnetosphere plasma model
21 p3882 A70-41296
- Earth magnetic dipole represented by Rikitake two-disk MHD dynamo system
22 p4013 A70-42633
- Geomagnetic axial dipole deviation from true north associated with earth core asymmetric motion, discussing geomagnetic reversal
22 p4020 A70-43231
- Geomagnetic field behavior prediction based on extrapolation of magnetic data collected by observatories and dipole model approximation
23 p4189 A70-44068
- MAGNETIC DISPERSION**
- Numerical analysis of cyclotron amplification of geomagnetic micropulsations in magnetosphere based on dispersion relation for three component cold plasma beam system
05 p0838 A70-16284
- Radiative transfer and magnetic dispersion for three dimensional wave propagation in radiation magnetodynamics
24 p4387 A70-46148
- MAGNETIC DISTURBANCES**
- NT MAGNETIC STORMS**
- Polar magnetic disturbances during IQSY characterized by SP field superposed on Sq field generated by ionospheric dynamo
01 p0075 A70-10599
- Microbarographic oscillations associated with geomagnetic activity during observation of infrasonic waves on geomagnetically disturbed days
01 p0081 A70-11298
- Magnetospheric ring current model from ground stations data to interpret observed magnetic field disturbances
01 p0082 A70-11515
- Hourly N/h profiles of F region calculated from nomograms by normal integral method during magnetic disturbance, measuring region temperature
01 p0083 A70-11548
- Polar geomagnetic disturbances global current systems representation by prototypes of equivalent current systems
01 p0084 A70-11557
- Earth magnetosphere low energy plasmas measurements via McIlwain magnetic shell parameter, showing dependence on geomagnetic disturbances
03 p0557 A70-13284
- Explorer observations of large temporal variations of midlatitude outer zone energetic electron intensities interpreted as redistribution during geomagnetic disturbances
03 p0560 A70-13989
- Magnetospheric magnetic field disturbance due to abrupt solar wind parameters change, using Explorer 26 data
04 p0738 A70-14444
- Earth magnetosphere electric fields associated with magnetic disturbances, using satellite observations
04 p0676 A70-14459
- Prediction accuracies of atmospheric models investigated for medium altitude satellites during disturbed geomagnetic conditions, discussing solar flux and geomagnetic indices as input data
[AAS PAPER 69-617] 04 p0677 A70-14647
- Magnetic disturbances and corpuscular intrusions in auroral zone, discussing daytime and nighttime magnetic activity of electron fluxes
04 p0684 A70-15752
- Magnetic disturbance associated with E layer east-west electric current calculated in terms of ionization production and loss
05 p0838 A70-16282
- Fourier spectra of Pi 1 pulsations during magnetic field sudden disturbances derived from amplitude analysis
05 p0840 A70-16641

IQSY 27-day recurrence sequence for 1964 solar and terrestrial activity, considering geomagnetic, auroral and ionospheric disturbances correlation with phase
05 p0841 A70-16646
Tangential solar wind discontinuity observed by Vela 2A satellite, producing ground magnetic disturbances conjunctively with magnetospheric, ground and ionospheric currents
05 p0903 A70-16727
Radio waves propagation along polar auroras region, obtaining ionospheric parameters for magnetic disturbances based on penetration probability
05 p0842 A70-16744
Polar auroral region displacement ascribed to distant magnetic field disturbances, proposing calculation method
05 p0842 A70-16745
Sporadic electron flux contribution to high latitude geomagnetic disturbances at outer radiation belt boundary estimated from Elektron 1 and 2 observations
05 p0843 A70-16765
Magnetic activity in Antarctica during IQSY, plotting space-time characteristics of perturbations
07 p1268 A70-19462
Magnetospheric plasmapause-high latitude electron density through relations using satellite topside ionograms, noting local time and magnetic disturbance effects
07 p1270 A70-20074
Earth ionosphere and magnetosphere electrodynamical state as function of neutral gas small scale motions, considering magnetic disturbances and ionospheric discontinuities
07 p1276 A70-20426
Statistical correlation between polar magnetic disturbances and magnetospheric energetic electron flux increase from IMP-1 satellite observations
08 p1491 A70-21714
Magnetic spikes in polar cap region due to poleward shift of narrow westward electric current filament
08 p1491 A70-21716
Solar activity analysis emphasizing sunspots, magnetic disturbances and bursts data
09 p1752 A70-22199
Excessive absorption in night E layer with and without geomagnetic disturbances for almost complete solar cycle, discussing winter increases /anomalies/
09 p1669 A70-23170
International quiet and disturbed magnetic days classification and significance
10 p1873 A70-23833
Magnetic disturbances caused by magnetosphere-solar wind filamentary inhomogeneity interaction observed by Pioneer 6
10 p1931 A70-24320
F region magnetic disturbances due to low energy solar plasma penetration during proton bursts
11 p2104 A70-25535
Exospheric density from Echo 2 orbit, observing 27 day variations associated with sun rotation and correlation with geomagnetic disturbances
11 p2046 A70-26566
Magnetospheric magnetic field disturbance due to abrupt solar wind parameters change, using Explorer 26 data
13 p2475 A70-28469
Model current system for magnetospheric substorm accounting for distribution of geomagnetic disturbance field vectors on earth surface and auroral electrons and protons
13 p2481 A70-30062
Polar cap elementary magnetic disturbance relationship to auroral electrojet
14 p2570 A70-30215
Morphology of thermal and energetic particles in inner magnetosphere during geomagnetic disturbances and solar cycles
14 p2630 A70-30358
Magnetic disturbances and corpuscular intrusions in auroral zone, discussing daytime and nighttime magnetic activity of electron fluxes
14 p2576 A70-30836
Atmospheric density near 180 km /1968-1969/ from orbit of satellite 1967-31A /ATS 2/, noting weak dependence on solar activity and correlations to geomagnetic disturbances
15 p2724 A70-31680
Geomagnetic dipole field disturbances by trapped particles, calculating self consistent equilibrium configuration for ring current dipole moments
15 p2727 A70-31905
Electrostatic turbulence in bow shock magnetic structures observed byOGO 5, explaining turbulence as ion acoustic or Buneman mode due to two stream instability
18 p3311 A70-36006
Magnetic activity in Antarctica during IQSY, plotting space-time characteristics of perturbations
18 p3250 A70-36936
Lower E region electron concentration variations relationship with geomagnetic field disturbances
18 p3255 A70-37037
Solar wind fluxes observed onboard Venera 2 and 6 compared with earth electromagnetic field pulsations and short period disturbances
19 p3494 A70-37479
LF geomagnetic micropulsations recordings by two component induction magnetometer, relating diurnal frequency and occurrence variations to local K-index changes
19 p3412 A70-37995
HF geomagnetic micropulsations recordings by two component induction magnetometer, relating diurnal frequency and occurrence variations to local K-index
19 p3412 A70-37996
Cosmic noise absorption diurnal variations at auroral zone conjugate areas during geomagnetically disturbed periods
19 p3414 A70-38379
Geomagnetic field pulsations prior to polar magnetic disturbance onset, discussing solar wind role
19 p3416 A70-38588
Geomagnetic perturbation indices indicating different solar corpuscular streams and heliogeophysical properties
20 p3618 A70-39182
Plasmapause motion in equatorial plane under sudden dawn-dusk field with constant solar wind-magnetosphere interaction
20 p3620 A70-39341
Sideband frequency disturbances at analog data magnetic storage using frequency modulation
20 p3586 A70-39706
Sporadic E layer ionization correlated with geomagnetic disturbances in northern auroral and polar regions
21 p3812 A70-40592
F 2 region critical frequency cross correlation coefficients for magnetically conjugate stations, considering magnetic disturbances effects
21 p3816 A70-41069
Low energy solar protons penetration, examining geomagnetic cutoff latitude during magnetically disturbed period
21 p3881 A70-41077
Transverse magnetic disturbances in auroral oval, examining movement, intensity, particle fluxes and field magnitude
21 p3817 A70-41090
F region magnetic disturbances due to low energy solar plasma penetration during proton bursts
21 p3882 A70-41285
Worldwide geomagnetic fluctuations during disturbed conditions computed from spectrum analysis, considering long period oscillation caused by solar wind structure changes
22 p4019 A70-43114
Total electron content and equivalent slab thickness statistical data during magnetic disturbances from AT-3 satellite VHF transmission observations
22 p4020 A70-43162
Solar wind intensity and direction correlated with intensity of earth surface magnetic disturbances and geomagnetic pi-2 type pulsations
22 p4022 A70-43284
Dynamo role in magnetospheric disturbances and ionospheric inhomogeneities, allowing for charged particle concentration height dependence
23 p4237 A70-44059
Ionospheric HF Doppler frequency dispersion at low latitudes under various geomagnetic disturbance conditions
24 p4314 A70-46129
Polar cap elementary magnetic disturbance relationship to auroral electrojet
24 p4331 A70-46290
MAGNETIC DOMAINS
Tokamak-type magnetic configurations application to thermonuclear reactor, discussing equilibrium and stability parameters minimum values, operating pattern and heating method
02 p0349 A70-12756
Ferromagnetic domain wall-dislocations magnetoelastic interaction in Fe and Ni computed as function of relative separation, discussing effects on magnetic properties
09 p1705 A70-22811
Stable colloidal dispersions of subdomain magnetite particles correlated for magnetic properties in terms of size distribution and volumetric concentration by superparamagnetic theory
12 p2284 A70-27241
Magnetic bubbles in miniaturized electronic circuits, discussing fabrication and uses in communication and computers
19 p3484 A70-37574
Magnetic surface loading of Gunn oscillators domain state for use as logic gates, pulse function generator, etc
19 p3387 A70-37819
MAGNETIC EFFECTS
NT MAGNETIC RIGIDITY
Hypothetical magnetic configurations in presence of Coriolis forces from convective cell hydromagnetic activity in solar plasma, considering dynamos with increasing magnetic field
01 p0173 A70-10133
Solar structural periodicities in quiescent prominences and filaments, considering plasma instability and supporting magnetic field characteristics
01 p0176 A70-10248
Angular momentum conservations for solar gas confined by closed field lines or outflowing along open magnetic field lines
01 p0176 A70-10251
Geomagnetic field influence on extensive air shower radio emission, discussing frequency dependency and signal polarization
01 p0069 A70-10281
Bremsstrahlung radiation in intense magnetic fields rejected for pulsar radiation mechanism
01 p0169 A70-10344
Constant magnetic fields effects on blood coagulatory processes, describing microcalorimetric determination
01 p0015 A70-10372
Magnetic field effects on point Coulomb impurity charge static shielding by quantum electron plasma
01 p0151 A70-10449
MHD wave propagation through plasma in magnetic field of current filament, developing Hamilton-Jacobi equation by geometrical optics
01 p0151 A70-10466
Entrainment of electrically conducting liquid by moving wall in long duct with rectangular cross section and magnetic induction field
01 p0151 A70-10656
Anomalous temperature-time cooling data for surface material of Tycho, Copernicus and Aristarchus craters, suggesting relation to magnetic phase transitions during lunar nights
01 p0183 A70-10825
MHD wave propagation in electrically conducting fluid contained in finite length circular cylinder subject to axial magnetic field and nonelectromagnetic forces
01 p0152 A70-10944
MHD boundary layers in transverse magnetic field with low Reynolds number, investigating suppression of separation with emphasis on behavior near rear stagnation point
01 p0152 A70-11095
Exospheric temperature variations by Thompson scatter technique, considering solar and geomagnetic activity effects
01 p0078 A70-11209
Critical current density enhancement in Ta-rich Zr alloys in magnetic fields at low temperature after aging
01 p0122 A70-11238
Satellite attitude control, discussing passive, active and hybrid stabilization methods including spin, gravity gradient and magnetic stabilization
01 p0197 A70-11264
Radio waves scattering in ionosphere, analyzing dependence on latitude, altitude, azimuth and polarization angle, considering anisotropy due to geomagnetic field
01 p0046 A70-11452
Coupling coefficients for integral charged component of cosmic rays determined from measuring azimuthal geomagnetic effect on rays observed in crossed telescopes
01 p0172 A70-11545
Magnetically balanced arcs in supersonic external flows, indicating central core with differential Lorentz forces analogous to Grashof number in free convection phenomena
02 p0347 A70-12233
Steady axially symmetric MHD flow of inviscid incompressible fluid of small conductivity in strong magnetic field past fixed axisymmetric bodies
02 p0347 A70-12234
Critical magnetic fields, frequencies and spatial structure of ion-acoustic instability of HF induction discharge plasmas in hydrogen, Ar, He and Hg vapor
02 p0348 A70-12261
Geostrophic baroclinic flow with zonal magnetic field in beta plane channel, analyzing instability, phase velocities, Alfvén-Rossby waves and Eady problem
02 p0291 A70-12284
Magnetic flux trapping experiment with Al conductor, showing decay time constant connection with sunspot theory
02 p0299 A70-12393
Geomagnetic activity effect on ionospheric electron content from statistical analysis of data obtained during three year period
02 p0293 A70-12576
LF electromagnetic waves interaction propagating in stream-magnetized cold plasma, discussing waves temporal growth and instability
02 p0262 A70-12603
Transition probabilities computed for spectral lines due to magnetic quadrupole radiation, discussing deexcitation of excited atoms in solar corona
02 p0359 A70-12706
Variable magnetic field effect on stability of Langmuir waves propagating in plasma in constant magnetic field
03 p0530 A70-13064

Geomagnetic field influence on satellite motion for various angles between field vector and satellite angular velocity vector

03 p0563 A70-13180

Transverse magnetic field effects on electrode heat fluxes in heavy-current discharge, discussing anodic space thermal ionization

03 p0531 A70-13205

Magnetic cosmological nonuniformity hypothesis leading to galaxies and clusters isolation

03 p0564 A70-13224

Geomagnetic perturbation coincidences observed at conjugate Polar Cap observatories, suggesting magnetospheric tail field lines convergence with plasma neutral layer

03 p0565 A70-13232

Plasma stability in uniform magnetic and HF electric fields, observing magnetoacoustic wave generation at electron cyclotron frequency greater than HF field frequency

03 p0532 A70-13523

Sealed-off He-Cd laser construction, describing life test, noise, Cd transport characteristics and transverse magnetic field effect

03 p0501 A70-13582

MGD finite flow regions surrounded by nonconducting gas, considering wave behavior at boundary of conducting region and magnetic field influence

03 p0533 A70-13803

Interplanetary field influence on auroral radio absorption, considering sector structure of solar wind

03 p0476 A70-13915

Solar flare cosmic rays confinement to definite solar magnetic field sectors using Laplace transformation

03 p0560 A70-13977

Sidereal cosmic ray diurnal variations from underground muon telescopes in Northern and Southern Hemispheres, proposing model producing variations at earth vicinity

03 p0560 A70-13978

Cs plasma research, discussing Q-machines, plasma confinement, magnetic field experiments, LF and HF wave propagation, etc

03 p0533 A70-14015

MHD boundary layer separation near rear stagnation point with magnetic field normal to wall solved by series expansion, calculating skin friction by numerical quadratures

03 p0469 A70-14182

Radial velocity profiles measured in plasma jet thrusters with thermal and self magnetic acceleration, discussing disturbances due to discharge current-magnetic field interactions

03 p0553 A70-14374

Electric discharges in low pressure Ar in external magnetic fields, studying change in transport coefficients and drift due to MHD forces

04 p0724 A70-14529

Conducting fluid laminar flow between parallel planes in traveling magnetic field, integrating Maxwell and Navier-Stokes equations

04 p0726 A70-14542

Transverse magnetic fields effects on velocity perturbations and vortices behind circular cylinder in electrolyte flow at various Reynolds and Stewart numbers

04 p0726 A70-14543

Interstellar gas instability, discussing thermal, magnetic and cosmic ray effects

04 p0753 A70-15072

Polarization effects of helium-neon laser emission at 3.39 micron wavelength investigated in longitudinal and transverse magnetic fields

04 p0702 A70-15227

Solar wind as one dimensional flow analogous to Laval nozzle flow, discussing rotation and magnetic field effect on model with heat conduction

04 p0754 A70-15352

Magnetohypersonic boundary layer interactions, discussing boundary layer thickness relationship to Hartmann and Reynolds numbers

04 p0729 A70-15564

Dynamic I-V characteristics of hot cathode megawatt level nitrogen propellant pulsed MPD arc plasma source for various axial magnetic fields

04 p0729 A70-15642

Prescribed circulations within conducting spheres effect on initially prescribed magnetic fields, discussing magnetic field structure in uniformly rotating stars

04 p0758 A70-15694

Poleoidal magnetic field influence on compressible fluid convection in spherical shells, using variational method to obtain stability criteria

04 p0758 A70-15695

Scattering cone of hydromagnetic waves propagating along magnetic lines in magnetized plasma with oscillating electric dipole

04 p0683 A70-15738

Magnetic declination effect on F 2 layer behavior determined from critical frequencies at two magnetically conjugate points

04 p0683 A70-15742

Thermal conductivity and hysteresis measured in cylindrical In foil under magnetic fields at temperatures below 1 K

05 p0891 A70-15792

Magnetic activity effect on ionospheric drift speeds variation with latitude, observing correlation with electron density

05 p0837 A70-15922

Electrical conductivity calculation for plasma in spatially inhomogeneous magnetic field using small-gyroradius approximation to kinetic equation

05 p0889 A70-16491

Polarization transfer equations for electromagnetic waves propagating in inhomogeneous magnetized plasma solved analytically for homogeneous magnetized plasma

05 p0890 A70-16570

Magnetic damping of homogeneous cylindrical satellite rotation about transverse axis

05 p0924 A70-16751

Flares and fast processes interrelation with active region stationary filaments, filament field magnetic envelope explosion stimulation of surges, plasma stream ascents, etc

05 p0904 A70-16910

Relativistic plasma waves in uniform ambient magnetic field analyzed for growth rate to investigate plasma instabilities of streaming cosmic rays

05 p0904 A70-16931

Kinematic characteristics of annular-blank elements extruded by pulsed magnetic fields, noting proportionality to energy stored in capacitor bank

05 p0857 A70-17018

Electron bremsstrahlung in intense magnetic fields calculated for emission rate and absorption coefficient in large quantum number limits

06 p1104 A70-17182

Synchrotron radiation rate from deexcitation of electrons in magnetic orbits of low quantum numbers, stressing electrons radiation in intense magnetic fields

06 p1108 A70-17183

Laser signal modulation at RF by subjecting emitting atoms of Xe-He laser amplifier to simultaneous DC and RF magnetic fields

06 p1079 A70-17191

Cholesteryl chloride-cholesteryl myristate /CM/ mixture liquid crystal molecular and helical axes orientation from dielectric constant change measurements in magnetic fields

06 p1126 A70-17326

Load capacity of rotating field MHD hydrostatic thrust bearing increased by rotating axial magnetic field

06 p1076 A70-17527

Ionospheric storms north-south asymmetry, discussing effects of horizontal and vertical movements of ionization controlled by asymmetric geomagnetic field

06 p1055 A70-17594

Conducting cylindrical shell in constant magnetic field analyzed for magnetoelastic disturbances using Laplace transform

06 p1056 A70-17607

Dynamic I-V characteristics of megawatt pulsed MPD-ARC plasma thruster under various axial magnetic fields given for Ar and hydrogen propellants [ALAA PAPER 70-164]

06 p1131 A70-18092

Magnetic activity effect on magnetospheric plasmopause position, measuring ion concentrations as function of local time fromOGO 5 observations

06 p1058 A70-18530

Hall current effects on anisotropic plasma magnetogravitational instability under uniform magnetic field, considering electron inertia role and plasma perturbations

07 p1348 A70-19228

Height scale of loss coefficient in F 2 region under geomagnetic perturbation at midnight based on electron number profiles, estimating thermosphere temperature

07 p1265 A70-19433

Nonlinear characteristics of electromagnetic actuating mechanism induced by magnetic field of coil

07 p1281 A70-19529

Lamellar magnetic core stacking pressure influence on core magnetic characteristics in variable magnetic field, noting effects on magnetic permeability

07 p1246 A70-19537

Plasmatron generated rarefied helium plasma parameters in external magnetic field using hot-wire anemometer Langmuir probe

07 p1349 A70-19653

Electrical conductivity of collisionless magnetoplasma in weakly turbulent magnetic field, using quasi-linear approach for diffusion equation for distribution function describing test particles

07 p1352 A70-19987

Electromagnetic wave scattering from charged particle in hot electron plasma in magnetic field, considering relativistic corrections for scattered radiation spectra

07 p1352 A70-19992

Unsteady MHD flow at forward stagnation point analyzed for magnetic field effect on transient

phenomena, using difference-differential numerical method

07 p1354 A70-20235

Electrical conductivity of fully ionized plasma in strong magnetic field computed as application of method for plasma transport coefficients

07 p1354 A70-20246

Steady pressure driven flow of conducting fluid through insulating circular pipe in transverse magnetic field

08 p1549 A70-20502

Magnetic field effects on ruby absorption in R-line region

08 p1555 A70-20543

Cosmic ray intensity increase due to meteor showers magnetic field trapping effect

08 p1560 A70-20568

Near zero magnetic fields effect on biological systems studied to determine terrestrial magnetic field absence effect on astronauts

08 p1449 A70-20724

Hypothetical magnetic configurations in presence of Coriolis forces from convective cell hydromagnetic activity in solar plasma, considering dynamos with increasing magnetic field

08 p1576 A70-21409

Plasma sheath in quadrupole and hexapole geometries, investigating magnetic field variation, particle density and electrostatic potential in transition layer

08 p1552 A70-21530

Plasma containment by spherical multipole magnetic trap, discussing injection and trapping of gun-produced plasma

08 p1553 A70-21609

Geomagnetic perturbation coincidences observed at conjugate Polar Cap observatories, suggesting magnetospheric tail field lines convergence with plasma neutral layer

08 p1580 A70-21665

Magnetic display devices covering magneto-optical displays, magnetic-electrostatic technique combinations and ferromagnetography

08 p1499 A70-21685

Chapman-Vestine and Birkeland-Alfvén electric current systems equivalence in ground geomagnetic effect explained for polar magnetic storms

08 p1491 A70-21719

Neutron beta decay in strong quantizing magnetic field using Dirac wave function for electron, noting lifetime dependence on field strength

08 p1549 A70-21744

Thin metal plate surface impedance during excitation by HF electromagnetism field as function of magnetic field, calculating line shapes

08 p1557 A70-21754

Magnetic field and conducting walls effect on laminar steady MHD Couette flow of electrically conducting incompressible viscous rarefied gas in slip regime

08 p1553 A70-21764

Magnetothermal oscillations in pressure-annealed pyrolytic graphite, relating period with angle between magnetic field and crystal c axis

08 p1557 A70-21839

Low pressure plasma stability in cylindrical crimped magnetic field, considering convective perturbations and particle velocity distribution

08 p1555 A70-21981

Anodic electric layer in self sustaining discharge in transverse magnetic field with neutral gas burnout, studying neutral atom ionization probability

09 p1734 A70-22110

Feedback stabilization of surface instabilities of highly conducting plasma, discussing application to linear pinch with uniform axial static magnetic field

09 p1734 A70-22272

Synchrotron emission of relativistic particle in magnetic field with radiative reaction force comparable to Lorentz force, emphasizing pulsar cosmic ray electron acceleration

09 p1731 A70-22273

Strong magnetic field effects on squirrel monkeys electrical and mechanical cardiac functions determined from vectorcardiogram and aortic blood flow characteristics

09 p1617 A70-22524

Magnetic field and gas thermal conductivity effects in analysis of solar wind as one dimensional, steady and spherically symmetric flow

09 p1745 A70-22687

Evanothm alloy resistance wire for applications in magnetic field, illustrating percentage change at 4.2 K

09 p1679 A70-22998

Laboratory simulations of geomagnetic field suppression, studying biological effects on human, mice, plants and microorganisms

09 p1626 A70-23113

Fast neutral particles produced in electron-ion oscillation discharge as function of gas pressure and magnetic field

09 p1736 A70-23190

- Magnetic field effect on free convection in laminar boundary layer formed by laminar flow of viscous conducting fluid along vertical wall
09 p1737 A70-23308
- Geomagnetic field orientation effects on VLF nighttime propagation, checking computer program predictions
09 p1639 A70-23664
- Small loop impedance in magnetoplasma determined for magnetic field normal and parallel to loop plane
09 p1738 A70-23671
- Asymptotic behavior in cold plasma model of magnetopause, describing boundary layer between plasma stream and vacuum magnetic field
10 p1921 A70-23835
- Magnetic funneling model proposed for accretion of matter onto neutron star to study X ray production during motion through interstellar cloud
10 p1931 A70-23902
- MF signals sky wave propagation, studying roles of geomagnetic dip and propagation direction at various latitudes
10 p1832 A70-23997
- Magnetic disturbances caused by magnetosphere-solar wind filamentary inhomogeneity interaction observed by Pioneer 6
10 p1931 A70-24320
- Plasma instability in RF discharge in Ar in magnetic field
10 p1840 A70-24540
- MHD boundary layer on rotating body in viscous incompressible conducting fluid, studying magnetic field effects on time-to-separation
10 p1924 A70-24572
- MHD exact solutions class, observing conducting flow intensification by magnetic field application
10 p1924 A70-24573
- Navier-Stokes-Maxwell equations solutions for conducting fluid flow in azimuthal magnetic field, noting jet acceleration near symmetry axis
10 p1924 A70-24574
- MHD flow turbulence suppression at small magnetic Reynolds numbers, considering MHD interaction parameter role
10 p1924 A70-24575
- Longitudinal electrical conductivity of relativistic gas in intense magnetic field
10 p1924 A70-24634
- He-Ne laser amplifier in axial magnetic field, measuring Faraday rotation and gain for various input signal intensity values
10 p1901 A70-24945
- Slow HF waves propagation under magnetic field effect in plasma waveguide surrounded by dielectrics or metal
10 p1843 A70-25106
- Hydromagnetic flute and surface wave instabilities of current-carrying plasma filament in strong longitudinal field, showing radial density stabilization
10 p1926 A70-25117
- Rapid expansion of thin walled aluminum alloy cylinders under pulsed magnetic field pressure using high speed streak camera oscillography
10 p1964 A70-25120
- Surface wave reflection during propagation along transversely magnetized ferrite plate on metal backing, using perturbation theory to find cylindrical wave field
10 p1844 A70-25163
- Extraterrestrial electrical and magnetic fields effect on meteorological observations, noting relationship between atmospheric pressure distribution and ionospheric developments
10 p1913 A70-25269
- Magnetic field effect on burst emissions in plasma frequency range, observing radiation band widening and modes transmission in terms of Appleton-Hartree theory
10 p1949 A70-25273
- HF energy nonresonance dissipation in polycrystalline yttrium-garnet ferrites subjected to constant magnetizing field
11 p2097 A70-25384
- Solid body acceleration by ideally conducting gas in constant gravity field under magnetic field, considering rarefaction, reflected waves, motion equation, wall pressure, etc
11 p2082 A70-25389
- Linear theory of cyclotron resonance maser with TEM standing wave field, considering coherent emission for nonrelativistic electrons oscillating in magnetic field
11 p2061 A70-25392
- Ionospheric magnetic activity effects on cosmic radio noise absorption diurnal and seasonal variations in auroral zone, noting K index and lowest reflection frequency roles
11 p2043 A70-25536
- Auroral pulsations photometric observation data, noting magnetic activity effects
11 p2043 A70-25540
- Magneto-photoelasticity equations derived for photoelastic model in magnetic field, developing algorithm for optical phenomena for arbitrary stress distribution
11 p2131 A70-25588
- Energy balance of self sustaining thermonuclear reaction with nonuniform magnetic field in wall-contained dense plasma, allowing for radiation losses
11 p2088 A70-25709
- Hydrodynamic equations for ions and electrons of ionized collisional plasma in inhomogeneous magnetic field based on Boltzmann kinetic equations
11 p2088 A70-25710
- Vibration generators based on magnetic field electrodynamic effect, giving design, schematic diagram and exploitation properties
11 p2032 A70-26441
- Poloidal magnetic field effects on main sequence stars core convection
11 p2117 A70-26654
- Turbulence in incompressible electrically conducting fluid with uniform applied magnetic field, discussing nonlinear energy transfer mechanisms and magnetic effects
11 p2096 A70-26771
- Barium ionic cloud formation under action of sunlight and expansion in terrestrial magnetic field using plasma model
12 p2214 A70-26892
- Energetic electron layer near magnetopause attributed to geomagnetic activity from satellite observations of fluxes
12 p2292 A70-27180
- Inhomogeneous interatomic magnetic field effects on spectral line widening and shifts of emitting atoms in low temperature plasma
12 p2278 A70-27318
- Electroacoustic conversion in low resistivity GaAs crystal surface layer, applying external magnetic field to tune converter in wide frequency range
12 p2287 A70-27483
- Maser amplifier with nonoriented Fe-doped rutile powder as active material, observing broad absorption bands under magnetic field
12 p2249 A70-27649
- Broadband traveling wave masers bandwidth increased by staggering direct current magnetic field along active structure length
12 p2249 A70-27690
- Electromagnetic wave penetration in plasma under uniform DC magnetic field, considering wave propagational direction and electric field
12 p2279 A70-27781
- Density gradient drift waves stabilization in collisionless plasma by stellator type windings, observing oscillations amplitude reduction in shear magnetic field
12 p2280 A70-27785
- Coulomb interaction effect on diffusion of plasma produced by contact ionization in magnetic field, obtaining density profiles by iterative procedure
12 p2280 A70-27789
- Linearized dispersion relation for plane wave propagation in uniform unbounded cold plasma permeated by DC magnetic field, considering two stream instability
12 p2281 A70-27881
- Externally pressurized bearing with electrically-conducting gas lubricant under axial magnetic field, considering load capacity
12 p2244 A70-28018
- Carbon dioxide laser electrical discharge stabilization against transverse gas flow by cross magnetic field
12 p2250 A70-28099
- Computerized numerical integration of nonlinear partial differential equations describing blast wave in ionosphere with finite electric conductivity under uniform magnetic field
12 p2227 A70-28212
- Magnetic field effect on frequency spectrum of vertically propagating magnetoacoustic waves and reflection conditions in inhomogeneous isothermal atmosphere
12 p2227 A70-28226
- Penumbra and geomagnetic threshold effects on ionospheric electron production by primary cosmic rays
12 p2296 A70-28366
- Finite amplitude stability of plasma column in weakly ionized gases and in semiconductor plasmas in longitudinal magnetic field
13 p2458 A70-28566
- Cs atomic spectral line broadening under simultaneous electric and magnetic fields, observing Zeeman and Stark splitting
13 p2460 A70-28711
- Proton cosmic ray flare development and spatial structure, discussing magnetic field annihilation process for particle energy and photon ejection
13 p2476 A70-29046
- Midlatitude chorus frequency spectrum changes in relation to previous local magnetic conditions
13 p2365 A70-29187
- Visual aurora properties attributed to magnetic storm following solar flare, using multiple channel photometer measurements
13 p2478 A70-29231
- Ferromagnetic cubic sulfide of Fe easy axis by electron diffraction pattern, aligning sulfide particles along magnetic field
13 p2472 A70-29712
- Thermal boundary layer separation in conducting fluids by rotating magnetized blunt body
13 p2469 A70-30008
- Constant and alternating magnetic field characteristics effects on magnetometric measurements in space near to and far from earth
13 p2401 A70-30052
- Topside ionospheric plasma scale height, showing influence of magnetic activity level
14 p2569 A70-30207
- Geomagnetic short period oscillations occurrence frequency during IQSY, discussing dependence on magnetic activity and time of day
14 p2572 A70-30242
- Quartz floating component design, discussing magnetic sensitivity temperature dependence and microseismic noise rejection properties
14 p2582 A70-30245
- Magnetoaerodynamic boundary layer of incompressible conducting fluid over right circular cylinder under magnetic field, showing flow separation
14 p2621 A70-30550
- Vlasov interaction of magnetically coupled E layer with dissipative structures including injection, trapping and drag effects
14 p2623 A70-30698
- Scattering cone of hydromagnetic waves propagating along magnetic lines in magnetized plasma with oscillating electric dipole
14 p2575 A70-30822
- Magnetic declination effect on F 2 layer behavior determined from critical frequencies at two magnetically conjugate points
14 p2575 A70-30826
- M31 continuum radio emission produced by magnetic field aligned along arms, discussing field turbulence effects
14 p2642 A70-30891
- Thermal radiative transfer and magnetic field effects on hydromagnetic stability of hot electrically conducting fluid
14 p2623 A70-30996
- Electron distribution for transport coefficients in Lorentzian plasma under magnetic field, determining electrical conductivity, thermal diffusion and viscosity
14 p2623 A70-31033
- Low density collisionless plasma sheath in planar and cylindrical geometry under weak magnetic field, considering ion-electron pair generation
14 p2624 A70-31040
- Parametric oscillation instabilities in plasma under magnetic field perpendicular to circularly polarized or hybrid electric field
14 p2624 A70-31042
- Twelve year periodicities of Jupiter decametric radiation, noting correlation with Jupiter magnetic field rotation period
14 p2648 A70-31085
- Collisionless plasma confinement using spatially uniform time varying magnetic field
14 p2624 A70-31100
- Cosmic rays geomagnetic bending and effective angles of approach for various ground stations
14 p2633 A70-31313
- Nonstationary MHD Couette flow of viscous incompressible fluid between two parallel walls caused by instantaneous fluctuations of applied transverse magnetic field
15 p2777 A70-31479
- MHD turbulence suppression by magnetic field in tubes, using conduction anemometers
15 p2778 A70-31480
- Semiconductor laser emission at band-band transitions with free carriers participation under quantizing magnetic field, using kinetic equations
15 p2749 A70-31627
- Magnetospheric protons and electron energy spectra time and magnetic activity dependence during solar maximum
15 p2792 A70-31671
- Report to COSPAR on Hungarian space research including satellite observations, upper atmosphere, geomagnetic effect, geodesy, cosmic rays, etc
15 p2830 A70-31713
- Northern Hemisphere radar aurora latitude variation, considering magnetic activity effects
15 p2697 A70-31770
- Uniform electric and magnetic fields effects on flow of conducting compressible fluid in channel, using multiple scales method
15 p2779 A70-31914
- Conducting incompressible fluid laminar flow between rotating disks in transverse magnetic field with source at center
15 p2779 A70-31915

Book on nonthermal processes in galactic and extragalactic radio sources covering plasma behavior in magnetic field, energy redistribution in spectrum by electron scattering, etc

15 p2799 A70-31999

Magnetic field effect on critical flutter speed and frequency of elastic plate in ionized gas flow, deriving dispersion equation

15 p2818 A70-32173

LF oscillatory convection characteristics in polytropic atmosphere in strong magnetic field based on sunspot theory

15 p2802 A70-32487

Magnetic hysteresis dynamic model for digital simulation of stabilized satellite attitude motions

15 p2812 A70-32509

Sunspot electric current evaluation from analyzing transverse component of magnetic field, discussing difficulties and errors in data reduction

15 p2804 A70-32615

Cosmic ray intensity increase due to meteor showers magnetic field trapping effect

15 p2795 A70-32723

Two dimensional hydromagnetic turbulence model for maintained seed field amplification, noting applications to star formation, stellar convection and gas cloud motions

15 p2781 A70-32813

Transverse magnetic field effect on CW argon laser operation with linearly polarized radiation

15 p2754 A70-32866

Plasma helix equilibrium and stability in transverse magnetic field, considering oscillation damping by ohmic heating

15 p2781 A70-32910

High strength magnetic fields effect on early embryonic development of frogs, relating growth abnormalities and paramagnetic ferritin motions

16 p2848 A70-33099

Venus retrograde axial period contradiction between radar echoes and violet-UV photographic and interferometric spectroscopic methods explained by theory using strong magnetic dipole

16 p2973 A70-33116

Magnetic dislocations effect on domain structure of postcritical Permalloy films subjected to alternating magnetic field

16 p2930 A70-33206

Unsteady hydromagnetic flow of viscous electrically conducting incompressible fluid due to rotating disk under perpendicular magnetic field

16 p2958 A70-33297

Acoustic and magnetic surface waves technologies for radar signal processing

16 p2874 A70-33390

Magnetic phase diagram of hydrated cesium-copper carbide at 1.625 Neel temperature in external magnetic fields, giving equation for spin flop field temperature dependence

16 p2961 A70-33688

Heterogeneous conducting fluid stability between fixed rigid cylinders with radiant gravitational force and magnetic field

16 p2894 A70-33784

Drift velocity for bound electron orbital motion in static axisymmetric magnetic field

16 p2959 A70-34187

Transverse magnetic field effects on Ar cross flow arc temperature distribution, cross section shape and profile, discussing forced convection effects

17 p3138 A70-34477

Reflected shock waves generation by shock produced plasma flow interaction with strong magnetic fields, determining electron density and ionization relaxation times

17 p3139 A70-34490

Magnetic field effects on Compton scattering and radiative opacity, considering longitudinal and transverse propagation with circular polarization

17 p3154 A70-34538

Transverse magnetic field influence on Gunn effect characteristics of n-type GaAs

17 p3142 A70-34622

Magnetic fields effect on probe measurements in weakly ionized Ar plasma flow at atmospheric pressure

17 p3139 A70-34693

Electrical conductivity of partially ionized gas in magnetic field by Frost mixture rules extension

17 p3141 A70-34985

Magnetic perturbation effects on magnetoactive plasma, considering Boltzmann transport equation, plasma-electromagnetic interactions, heating, cooling, etc

17 p3142 A70-35592

Solar prominences thermal and dynamical stability in terms of optically thin plasma supported by magnetic field against gravity

17 p3174 A70-35867

Coronal magnetic bottle at ten solar radii from Faraday rotation measurements of occulted spacecraft radio source

17 p3174 A70-35871

Gas laser frequency stabilization using nonlinear effects of magnetic Lamb dip

17 p3109 A70-35911

Plasmon decay by neutrinos emission in strong magnetic field, examining parallel and perpendicular propagation

18 p3305 A70-35936

Plane nonconducting elastic plate with one side impinged upon by supersonic conducting gas flow, determining magnetic field effect on flutter vibrations

18 p3336 A70-36135

Dilatometric investigation of Fe alloys phase transformations, determining magnetic field effects and Curie temperatures

18 p3276 A70-36206

Nonlinear theory for surface waves propagating in bounded magnetoactive plasma

18 p3295 A70-36412

Magnetohydrodynamic flow of electrically conducting viscous incompressible fluid past nonconducting semiofinite flat plate under transverse magnetic field

18 p3295 A70-36431

External magnetic field effect on cavitation zone behind circular cylinder, proving existence of electric charges

18 p3242 A70-36645

MHD slider bearing load carrying capacity in tangential magnetic field, observing optimum profile in step form with riser location and step height ratio

18 p3295 A70-36672

Lunar magnetic monopole charge effects on nearby magnetic field configuration

18 p3316 A70-36898

Height scale of loss coefficient in F 2 region under geomagnetic perturbation at midnight based on electron number profiles, estimating thermosphere temperature

18 p3249 A70-36907

Local spiral arm H 2 regions distribution in Cygnus direction, discussing symmetry due to magnetic field

18 p3329 A70-37180

Galactic spiral structure, discussing gravitational theory, pattern origin, radio and optical structure and magnetic field effects

18 p3332 A70-37201

Quartz astatic galvanometer resistant to geomagnetic field variations, vibrations or microseismic noise

19 p3421 A70-37337

Excitation transfer by spontaneous emission in atomic gas, investigating static magnetic field effect on radioactive cascade

19 p3443 A70-37363

Electromagnetic propagation in flat waveguide with local gyrotropic filling and transverse magnetization, using Galerkin method

19 p3470 A70-37430

Ar arc discharge magnetically induced retrograde rotation dynamics, using high speed photography

19 p3475 A70-37533

Magnetic field and permeability effects on drag in steady axisymmetric MHD flow of incompressible fluid around full and hollow spheres

19 p3477 A70-37577

Current and resistance in Hg filled space between two circular electrodes under strong magnetic field, using boundary layer techniques

19 p3477 A70-37578

Guiding center theory for relativistic plasma embedded in strong magnetic field, discussing connection with pulsar emission dynamics

19 p3479 A70-37596

Single crystal ferrite thin film microwave parameters measurement, examining susceptibility in weak magnetic fields and ferromagnetic resonance

19 p3485 A70-37628

Lifetimes and fine structure of differentially metastable autoionizing states of negative He ion in axial magnetic field, using time of flight techniques

19 p3473 A70-37746

Rubidium-85 maser, discussing continuous oscillation in low magnetic field

19 p3446 A70-37769

Magnetic coupling in solid dielectric cylinder under axial magnetic and perpendicular electric fields, noting memory and magnetostrictive effects

19 p3471 A70-37785

Magnetic surface loading of Gunn oscillators domain state for use as logic gates, pulse function generator, etc

19 p3387 A70-37819

Magnetoelastic ferromagnet linear theory, considering spin-elastic microwaves propagation in ferrimagnetic crystal subjected to pulsed magnetic fields

19 p3487 A70-37947

Geomagnetic activity effect on potential gradient and air-earth conduction current density

19 p3413 A70-38000

Conical plasma gun with Z pinching restrained by axial magnetic field, describing operating characteristics

19 p3480 A70-38018

Magnetic perturbations effect neutralization for satellite attitude stabilization by real time simulation of satellite angular motion in magnetic field

19 p3399 A70-38286

Magnetic field effect on hydromagnetic Goertler instability in boundary layer flow of conducting fluid over concave wall

19 p3481 A70-38352

VLF radiation observation at conjugate points, discussing hisses, choruses and geomagnetic effects

19 p3416 A70-38587

Slow wave propagation in plasma moving along external magnetic field, generalizing refractive index formula

19 p3417 A70-38592

Transverse magnetic field effect on emission spectrum of He-Ne laser, using scanning interferometer

19 p3448 A70-38735

Two dimensional MHD couette flow in slip regime, considering constant suction on stationary plate to determine transverse magnetic effects

20 p3677 A70-39047

Neutrino production by synchrotron process /magnetic bremsstrahlung/ in relativistic electron gas under intense magnetic field

20 p3695 A70-39050

Rarefied plasma flute oscillation stabilization in magnetic field, using controlled electron beams

20 p3677 A70-39173

Cosmic ray 27 day variations during solar activity minimum, noting unipolar magnetic regions role

20 p3696 A70-39280

Cosmic ray neutron semidiurnal variations days and night components with respect to geomagnetic and solar activity

20 p3697 A70-39288

Seasonally biased electron density enhancements in nighttime response of topside ionosphere to magnetic storms

20 p3621 A70-39342

Magnetically focused two and four stage cascade picture amplifiers for astronomy and nuclear physics applications

20 p3630 A70-39426

Interactive hybrid simulation of TRIAD satellite motions, describing attitude control system with magnetic hysteresis damping

20 p3714 A70-39536

Current distribution and interband recombination emission in bipolar semiconductor crystal under pinch effect produced by external magnetic field

20 p3677 A70-39590

Cold electron plasma nonlinear oscillations in magnetic field, using mathematical model

20 p3678 A70-39591

Charged particle interaction with fluctuation fields in nonequilibrium magnetoactive plasma

20 p3678 A70-39596

Collisionless plasmas fluid dynamical equations in presence of strong magnetic field, discussing Larmor and electron plasma frequencies

20 p3678 A70-39609

MHD nonsteady Beltrami flow between two infinite parallel walls with transverse magnetic field, calculating velocity, skin friction and induced magnetic field

20 p3678 A70-39610

Electrically conducting gas flow past slender body of arbitrary cross section in presence of crossed magnetic field by MHD Stokes approximation

20 p3558 A70-39613

Cold nonuniform plasma slab model for afterglow echoes at upper hybrid resonance in uniform magnetic field

20 p3679 A70-39664

Auroral physics, discussing visibility, relations to geomagnetism and sunspots spectrum, morphology, optical emissions and particles in magnetosphere

20 p3623 A70-39929

Viscous conducting fluid slow motion past sphere in presence of toroidal magnetic field, calculating Stokes flow perturbations

20 p3682 A70-40113

Nonlinear resonance conditions for plasma three-wave interactions, considering wave propagation modes and constant magnetic field

20 p3682 A70-40137

Plane parallel viscous conducting fluid flows stability in transverse magnetic field, considering small perturbation spectrum, Hartmann and Reynolds numbers

20 p3684 A70-40397

Scintillation LF observations with synchronous satellite radio signals at low latitude station, noting magnetic activity effects on night and day scintillations

20 p3590 A70-40488

Low pressure Hg vapor arc with remote wall, investigating magnetic self striction by ambipolar diffusion in fields

20 p3685 A70-40503

Slightly rarefied and electrically conducting gas, calculating effects of applied magnetic field on steady laminar low speed plane Couette flow

20 p3685 A70-40504

Hydromagnetic flute and surface waves instabilities of current-carrying plasma filament in strong longitudinal field, showing radial density stabilization

20 p3685 A70-40510

Rapid expansion of thin walled aluminum alloy cylinders under pulsed magnetic field pressure using high speed streak camera oscillography
20 p3735 A70-40513

Nonrelativistic electron bremsstrahlung in dense plasma with strong magnetic field
21 p3855 A70-40721

Earth magnetic field effects on midlatitude F 2 layer deviative absorption
21 p3812 A70-40727

Magnetic damper motions in rapidly spinning satellite
21 p3927 A70-40833

Artificial earth satellite orbit perigee motion, calculating perturbation effect due to gravitational and magnetic fields on orientation and rotation
21 p3884 A70-40843

Solar flaring on 25 April 1968, examining radio H alpha and X ray emission, magnetic field configuration and temperatures
21 p3879 A70-40959

Wall heat transfer for partially ionized argon laminar flow within square channel conducting walls with and without transverse magnetic field
21 p3856 A70-41032

Liquid metal heat pipes in magnetic fields of controlled fusion reactors, considering geometry, compound wick structure and vapor flow
21 p3946 A70-41046

Cylindrical plasma inhomogeneities including meteor trains diffusion in presence of magnetic field, observing dependence on angle theta
21 p3886 A70-41060

Ionospheric magnetic activity effects on cosmic radio noise absorption diurnal and seasonal variations in auroral zone, noting K index and lowest reflection frequency roles
21 p3819 A70-41286

Auroral pulsations photometric observation data, noting magnetic activity effects
21 p3819 A70-41290

Axissymmetric jet plasma flow in magnetic nozzle, measuring electric potential, electron temperature and ion density and velocity
21 p3856 A70-41380

Plasma and neutral gas collisionless interactions in magnetic field based on Alfvén critical velocity hypothesis, discussing electron energy distribution
21 p3857 A70-41383

Transport coefficients of inhomogeneous magnetized bounded and unbounded plasmas based on quasi-linear approximation
21 p3857 A70-41385

Plasma turbulence statistical theory in magnetic field based on averaging operators, deriving nonlinear dispersion relation
21 p3857 A70-41386

Turbulent plasma heating by adiabatic magnetic compression with longitudinal ring current
21 p3857 A70-41387

High power pulsed relativistic annular electron beam production and focusing by injection gun using magnetic field control
21 p3827 A70-41461

Electrical and thermal characteristics of DC magnetic annular arc operating continuously at atmospheric pressure
21 p3805 A70-41758

Rotating cold plasma wave propagation modes including Coriolis effect in absence and presence of external magnetic field
21 p3860 A70-41924

Dynamic potentials equations of guided electromagnetic wave propagating in laterally bounded plasma along magnetic field axis
21 p3860 A70-42005

Inhomogeneous interatomic magnetic field effects on spectral line widening and shifts of emitting atoms in low temperature plasma
21 p3860 A70-42059

Liquid metal turbulent jet flow dependence on longitudinal magnetic field, measuring mean velocity profiles at various cross sections
21 p3861 A70-42230

Laminar-turbulent transition in magnetic field using Plexiglas model, observing inlet conditions effect on MHD flow stability
21 p3861 A70-42234

Superimposed external DC magnetic field effect on electrodeless HF plasma density, discussing electron cyclotron waves resonance excitation and plasma electron energy gain
22 p4079 A70-42364

Statistical theory of electron-positron-photon vacuum in external magnetic field, noting magnetic activation effect at low temperatures
22 p4076 A70-43000

Biological action of constant magnetic fields, discussing axons electrical properties, biomolecules spatial orientation, electrolytes and liquids
22 p3978 A70-43138

Homogeneous helium plasma column LF wave propagation in uniform magnetic field
22 p4082 A70-43216

Magnetoplasma density modulation from LF and amplitude magnetic perturbations, using collisionless Boltzmann transport equation
22 p4082 A70-43255

Soft solar X rays cyclic variation from satellite observation, noting relation to sunspot group magnetic field complexity
22 p4096 A70-43301

MHD instability due to strong magnetic field induced scattering of plasma oscillations, using one sided Q device
23 p4223 A70-43949

Electron loss by resonant interaction with whistlers in nonuniform magnetic field, taking Fokker-Planck equation as distribution function
23 p4237 A70-44052

Gravity waves produced in liquid electric conductor by piston subjected to sinusoidal pulsation, calculating magnetic field effect on amplitude and phase velocity
23 p4225 A70-44208

Electron distribution function in homogeneous ionized plasma under oscillating electric fields and steady magnetic fields, solving Boltzmann transport equation
23 p4226 A70-44248

Kinetic transport theory for mixed dilute gases consisting of linear rotating diamagnetic molecules in external homogeneous magnetic field
23 p4223 A70-44927

Low beta surface ionized rotating streaming plasma column, determining low magnetic field effects on density and stability
23 p4229 A70-44988

Optical permittivity and dielectric permeability of electron gas in magnetic field, considering application to ferromagnetic materials
23 p4221 A70-45051

He-Ne laser with absorbing cell in magnetic field, investigating nonlinear effect in frequency dependence of output power
23 p4203 A70-45070

Homogeneous magnetic fields effects on growth rate of *Saccharomyces cerevisiae* and *Micrococcus denitrificans*
24 p4306 A70-45102

Thermal fluctuations effect on Josephson tunnel contact binding energy and external magnetic field dependence
24 p4388 A70-45203

Chromospheric heating in magnetic field above supergranular cell boundaries, using geometric optics method for energy transport by hydromagnetic shock waves
24 p4400 A70-45304

Giant cell regular structures in solar atmosphere, using magnetic synoptic charts of solar activity
24 p4400 A70-45305

Nonspherical wave excitation in solar atmosphere in presence of toroidal magnetic field
24 p4400 A70-45312

Magnetostriuctive Ni-Mn-Co ferrites and Al-Fe alloys, measuring magnetic field effect on piezomagnetic coefficients at room temperature
24 p4389 A70-45400

Strong magnetic fields effect on field emission currents in Bi, Zn, Ta and W
24 p4379 A70-45621

Differentially rotating stellar interiors nonaxisymmetric perturbation stability in toroidal and poloidal magnetic fields
24 p4413 A70-46165

Topside ionospheric plasma scale height, showing influence of magnetic activity level
24 p4330 A70-46282

Geomagnetic short period oscillations occurrence frequency during IQSY, discussing dependence on magnetic activity and time of day
24 p4332 A70-46317

MAGNETIC EQUATOR

Rarefied plasma motion in geomagnetic dipole equatorial plane near magnetosphere symmetry axis deriving approximate solution to quasi-hydrodynamic equations
04 p0681 A70-15717

Satellite observations of equatorial erosion and defocusing of VLF waves propagating at low magnetic latitudes
06 p1058 A70-18532

Numerical modeling of electron and molecular ion continuity equations describing conditions in lower F region near magnetic equator using analog computer
07 p1265 A70-19434

Vertically moving disturbance discovered in ionospheric soundings close to magnetic equator, noting correlation with electrodynamic lift
07 p1269 A70-19631

Lower ionosphere electric fields and currents vertical profiles above geomagnetic equator under quiet geomagnetic conditions from rocket data
07 p1277 A70-20453

Magnetic equator ELF noise examined with OGO 3 magnetometer, indicating unique signals in plasmasphere
08 p1488 A70-21380

Critical sunspot dependence of F 2 region noon bite-out phenomenon at various equatorial latitudes, observing magnetic dip
08 p1492 A70-21837

Low energy protons omnidirectional intensity contours in outer radiation zone at magnetic equator
09 p1747 A70-23491

Seasonal variation of spread F near magnetic equator, showing relationship with solar cycle at different geographic locations
10 p1881 A70-24818

Cosmic ray intensity fluctuations at geomagnetic equator using power spectrum analysis on mu meson records, discussing solar photosphere and interplanetary magnetic field
12 p2291 A70-27176

Lunar tide in ionospheric D region absorption near magnetic equator, noting annual variation relationship to sunspots
14 p2574 A70-30747

Rarefied plasma motion in geomagnetic dipole equatorial plane near magnetosphere symmetry axis by deriving approximate solution to quasi-hydrodynamic equations
14 p2575 A70-30801

D region rocket sounding at geomagnetic equator, measuring electron density, collision frequency, current, temperature, etc
15 p2724 A70-31668

Electric fields in lower ionosphere during solar activity minimum above magnetic equator, using vertical profiles of ionospheric current magnetic fields and electron concentration
18 p3246 A70-36098

Numerical modeling of electron and molecular ion continuity equations describing conditions in lower F region near magnetic equator using analog computer
18 p3249 A70-36908

Upper limit to primary deuteron flux and path length in space, using emulsion stack exposed near geomagnetic equator during minimum solar activity
22 p4093 A70-42673

Nighttime equatorial E region small scale irregularities detected by rocket-borne Langmuir and plasma noise probes, discussing generation mechanism
22 p4018 A70-43108

Electromagnetic variational soundings of ocean floor earth crust upper mantle near magnetic equator
23 p4189 A70-44066

MAGNETIC FIELD COILS

U FIELD COILS

MAGNETIC FIELD INTENSITY

U MAGNETIC FLUX

MAGNETIC FIELDS

NT GEOMAGNETISM

NT INTERPLANETARY MAGNETIC FIELDS

NT INTERSTELLAR MAGNETIC FIELDS

NT LUNAR MAGNETIC FIELDS

NT MAGNETOSTATIC FIELDS

NT NONUNIFORM MAGNETIC FIELDS

NT PALEOMAGNETISM

NT PLANETARY MAGNETIC FIELDS

NT SOLAR MAGNETIC FIELD

NT STELLAR MAGNETIC FIELDS

NT TRAPPED MAGNETIC FIELDS

Two layer truncated harmonic model of Rossby wave dynamo for solar cycle, accounting for maintenance and reversal of magnetic fields
01 p0174 A70-10238

Oblique unsteady shock wave structure propagating at large Mach numbers in plasma cylinder under steady magnetic field, showing particle velocity profile discontinuity
01 p0064 A70-10999

Hall generator DC brushless motor operation and applications, obtaining motor action by rotor and stator magnetic fields interaction
02 p0228 A70-12053

Interstellar space flight ramjet physical model, describing magnetic field funnel, radiation effects, relativistic effects, etc
02 p0379 A70-12782

Optical echoes using model of spins precessing in magnetic field, presenting time dependent theory of perturbation
02 p0341 A70-12830

Atomic and electron densities measurements in shock wave interactions with magnetic fields, using interferometric and spectroscopic method
03 p0529 A70-12876

Coaxial ion beams moving in opposite directions in LF magnetic field noting sliding instability development
03 p0530 A70-13061

Star rotation and meridional circulation hydrodynamic theory, considering magnetic fields and internal friction
03 p0564 A70-13228

Cyclotron resonance maser (CRM) monotron with inclined electron flux and magnetic field, considering design for performance optimization
03 p0499 A70-13455

Ionizing shock wave propagation into magnetic field from Ar gas flow characteristics in electromagnetic shock tube

03 p0532 A70-13548

Magnetic field self induction in static fluid-submerged intersecting jet system, calculating required magnetic Reynolds numbers

04 p0726 A70-14541

Charge separation effects in boundary layer between cold streaming plasma and perpendicular magnetic field with relativistic electrons

04 p0727 A70-14997

Directional pattern of waveguide radiators using Kirchhoff boundary values of electric, magnetic or electric and magnetic fields, discussing aperture reflection coefficient

04 p0653 A70-15397

Coaxial electrodes with electric and magnetic fields to study instability in MPD arcs [ALAA PAPER 69-230]

04 p0737 A70-15542

Temperature measurements in magnetic beach of steady state deuterium plasma, confirming ion-cyclotron waves thermalization

05 p0884 A70-16167

Boltzmann-type kinetic equation for homogeneous electron plasma in uniform magnetic field, describing relaxation to thermal equilibrium by convergent collision integral

05 p0888 A70-16329

Two dimensional propagation of transverse waves in plasma with embedded curl-free magnetic field, discussing cosmic ray acceleration and magnetic neutral sheet formation

05 p0888 A70-16437

Small amplitude waves and collisionless shock waves within first order Chew-Goldberger-Low equations framework, presenting modes for propagation along applied magnetic field

05 p0889 A70-16534

Surface nucleation critical field for pure superconductors at temperatures outside Landau-Ginzburg region

06 p1125 A70-17218

Monograph on MHD waves covering theories for weak discontinuities, wave propagation in inhomogeneous media and behavior in magnetic fields

06 p1114 A70-17275

Numerical solution of nonlinear Vlasov equation for collisionless plasma problems, discussing initial value problems, external electric fields, magnetic fields, etc

06 p1108 A70-17419

Steady free convection over point and horizontal line heat sources in vertical magnetic field

06 p1120 A70-17519

Relativistic electron low beta plasma oscillations in external magnetic field using covariant dispersion relations

06 p1120 A70-17542

Band extremum loops depth in CdS in electric and magnetic fields determined from calculating linear and nonlinear conductivity

06 p1126 A70-17819

Kinetic theory of plasma waves in magnetic field, covering small amplitude waves in infinite homogeneous plasma, limiting cases, etc

06 p1121 A70-17902

Cathode emission from hollow cathode controlled by variable magnetic field to ensure proper I-V characteristics for efficient ion generation in thrusters

06 p1131 A70-18032

Electric and magnetic fields of waterpouts measured by instrumented U.S. Navy aircraft

06 p1101 A70-18582

He-Cd laser output improved by transverse magnetic field application

06 p1084 A70-18619

Hall voltage and electric conductivity measurements in alternating magnetic field and current by narrow band amplifier with synchronous detector

07 p1279 A70-18944

Magnetic field filtration into time-variable and constant parts, using signal to noise analogies

07 p1266 A70-19440

Electric and magnetic field perturbation at great distances behind body moving in collisionless magnetized plasma estimated from Fourier transform

07 p1385 A70-19447

High electrical conductivity effects on alignment between magnetic field and flow velocity vector in two dimensional plasma flow

07 p1349 A70-19568

Kaufman thruster performance dependence on transmission of ion extraction optics and magnetic field shape [ALAA PAPER 69-257]

07 p1365 A70-19705

Finite amplitude disturbance propagating across magnetic field within infinite plasma, solving Vlasov equation and ordering moment equations hierarchy

07 p1352 A70-19989

Plasma sheath transition structure surrounding cylindrical probe in weak axial magnetic field on basis of moment equations

07 p1353 A70-20230

Intense quasi-steady He plasma discharge stability in magnetic field measured by Langmuir and optical techniques

07 p1354 A70-20321

Rotating shaft vibrations on assembly designed to balance rotor in magnetic field, eliminating bearings effect on shaft to determine internal friction

08 p1584 A70-20697

Effective depths of formation of absorption lines in solar atmosphere used for magnetic field recording

08 p1570 A70-20842

Rarefied plasma flow past bodies, considering determination of aerodynamic coefficients, charged states, electric and magnetic fields and plasma parameters

08 p1432 A70-21087

Slot transmission line applicability to miniature ferrite phase shifter design exploiting elliptically polarized H field existence

08 p1475 A70-21283

Radio sources model brightness distribution and internal magnetic fields deduced from long baseline interferometer observation data

08 p1577 A70-21491

Electromagnetic wave instability propagating across static magnetic field in presence of thermal anisotropy, considering interplanetary plasma and plasma devices stability

08 p1553 A70-21610

Model for magnetic field-line reconnection in conducting incompressible fluid, determining maximum reconnection rate entirely by null point conditions

08 p1553 A70-21615

Star rotation and meridional circulation hydrodynamic theory, considering magnetic fields and internal friction

08 p1580 A70-21661

Tensor analysis of four photon interaction in rarefied plasma in magnetic field, determining cubic current of plasma wave self action

08 p1554 A70-21805

Transverse particle and energy fluxes in toroidal magnetic traps magnetic fields with ionized plasmas, discussing particle diffusion coefficient and thermal conductivity

08 p1554 A70-21807

Plane shock wave stability propagating in external magnetic field determined by temperature dependence of medium electrical conductivity

09 p1658 A70-22168

Scattering matrix for resonance lines with arbitrary level splitting in magnetic field

09 p1753 A70-22452

Broadband remote sensing magnetometer for measuring fast-rising pulsed magnetic fields

09 p1676 A70-22716

One dimensional flow field behind ionizing detonation wave in magnetic field using Chapman-Jouguet hypothesis, accounting for Alfvén speed

09 p1660 A70-22722

Photoemission analyzer with finite emitter in spherically symmetric retarding field with magnetic field present, analyzing energy resolution

09 p1679 A70-22988

Magnetophotoelastic model applied to plates bending stress analysis, deriving polarized light propagation equations

09 p1728 A70-23447

Earth magnetosphere and magnetosheath magnetic field measurements by Mariner 5

09 p1670 A70-23487

Cylindrical magnetrons steady state characteristics with thick and infinitely thin cathodes for full space charge and inclined magnetic field

09 p1651 A70-23641

Small loop impedance in magnetoplasma determined for magnetic field normal and parallel to loop plane

09 p1738 A70-23671

Unsteady MHD flow in circular pipe with nonconductive walls under transverse magnetic field

10 p1921 A70-23959

Alfvén flow of dissipative conducting incompressible fluids in presence of thin airfoil in magnetic field, considering flow turbulence calculation

10 p1922 A70-24143

Plasma magnetic field measurement by scattered light, analyzing electron spectrum modulation with gyration frequency

10 p1916 A70-24401

Spectrometer design for Helios solar probe using semiconductor detectors to identify particles separated by magnetic field

10 p1888 A70-24487

Directional particle flux dependence on probe orientation with respect to external magnetic field, determining pitch angle distribution from count rates

10 p1932 A70-24497

Shift in nuclear magnetic resonance, investigating transferred hyperfine coupling near Neel temperature for magnetic and nonmagnetic systems

10 p1928 A70-24827

Microfluctuations frequency and wavelength of electromagnetic, electric and magnetic field distributions in plasma shock wave front found consistent with ion-acoustic origin hypothesis

10 p1925 A70-25031

Helium ions diffusion perpendicular to magnetic field in He gas, measuring coefficients as function of field strength and for various gas pressures

10 p1925 A70-25108

Plasma column dynamic stability breakdown in quadrupole HF magnetic field in terms of violating stability criterion for long wave deformation

10 p1926 A70-25109

Superconducting ellipsoid of revolution in alternating magnetic field, computing disturbed field components using boundary value problem

10 p1917 A70-25201

Pressure anisotropies contribution to solar wind corotation, discussing angular momentum and magnetic field

10 p1935 A70-25285

Hall effect influence on HF traveling magnetic field penetration into solid cylinder plasma device compared to magnetically contained plasma

11 p2088 A70-25712

Parametric effect maser developed by maintaining self oscillations in static amplitude modulated magnetic field, noting application as magnetometer

11 p2063 A70-25947

Background pressure and magnetic field shape effect on MPD thruster performance, testing radiation cooled thrusters

11 p2102 A70-26122

Cylindrical shock wave two dimensional propagation in conducting plasma in magnetic field, assuming isentropic flow along streamline

11 p2091 A70-26174

Homogeneous turbulent velocity effect on magnetic field distribution in electrically conducting fluid with no external source, observing dynamo action

11 p2091 A70-26545

Spherical harmonic coefficients of eccentric dipole potential and coinciding magnetic and mass center, noting geophysical prospecting applicability

11 p2047 A70-26571

Inviscid incompressible conducting fluid flow past body in aligned magnetic field at low magnetic Reynolds number, discussing small perturbations evolution

11 p2041 A70-26623

Plasma turbulent diffusion across constant magnetic field, noting magnetic, kinetic energy and relaxation times ratio effects

11 p2094 A70-26755

Magnetic field equation for gyroscopic and anisotropic turbulence, observing large scale magnetic field generation

12 p2210 A70-27546

Two dimensional MHD turbulence under strong magnetic field in Zeta device, measuring density, temperature, electric/magnetic fluctuations and various statistical characteristics

13 p2457 A70-28553

Turbulence spectrum due to density fluctuations in plasma with strong magnetic field, using hydrodynamic theory and Poisson equations

13 p2457 A70-28559

LF electrostatic waves oblique to magnetic field in plasma, evaluating dispersion relation near ion cyclotron frequency

13 p2363 A70-28641

Eddy currents magnetic field structure over surface defects in conducting objects, noting NDT applications

13 p2404 A70-28661

Plane incompressible conducting fluid laminar jets analysis in magnetic field, using boundary layer equations for zero electric field

13 p2461 A70-28964

Stationary ring vortices in unbounded conducting fluid, investigating self excitation of magnetic field by vortices

13 p2461 A70-28965

Electric field in rectangular MHD channel with ideally conducting electrodes in uniform magnetic field, considering conditions for maximum channel effectiveness

13 p2461 A70-28966

Euler potentials for magnetic fields field-line structure representation, discussing cross products of gradients of scalars in plasma physics

13 p2451 A70-29123

Magnetopause model, discussing equilibrium layer between magnetic field and cold plasma field-free stream

13 p2396 A70-29181

Vector magnetic field and energetic particle flux profiles, indicating geomagnetically aligned currents associated with visible auroral arc

13 p2397 A70-29197

Parametric excitation of potential oscillations in plasma near cyclotron frequency subjected to UHF electric and constant magnetic fields

13 p2463 A70-29281

Radio wave transmission through magnetized plasma layer as function of electron concentration and collision frequency, using coaxial accelerator

13 p2366 A70-29377

Boltzmann equation in circular magnetic field solved by Fourier series and Legendre polynomials, correcting distribution function due to Fourier harmonics

13 p2464 A70-29485

Gas parameters determination near singular point of slow magnetosonic wave propagating in conducting medium in uniform magnetic field

13 p2464 A70-29507

Magnetic field simulator for investigating magnetic properties of satellites designed for magnetometric experiments

13 p2385 A70-29556

Alouette plasma resonance stimulated perpendicularly to magnetic field by planar dipole charge sheet and permeable grids

13 p2467 A70-29907

RF admittance and electric field of plane grid capacitor in hot collision free magnetoplasma in parallel magnetic field dominated by Bernstein modes

13 p2467 A70-29910

Lithium vapor fueled applied field MPD arc jet performance using open end heat pipe vaporizer and hollow cathode

[ALAA PAPER 69-241]

13 p2475 A70-29959

Rotating plasma disturbances onset in MPD arc, determining magnetic field dependence on mass flow, background pressure and propellant

[ALAA PAPER 69-232]

13 p2475 A70-29961

Weak magnetic fields in geo- and space physics - Conference, Paris, May 1969

13 p2413 A70-30026

Superconducting lead shell shielding properties in small ambient magnetic fields

13 p2454 A70-30030

Hydromagnetic fluid model of solar wind for interpreting discontinuities in plasma and magnetic field, interaction with atmosphere, heating mechanism and chemical composition

13 p2481 A70-30067

Satellite plasma diagnostics for electric and magnetic fields and fine structure of collisionless shocks in solar wind plasma flows and interplanetary shocks

13 p2481 A70-30069

Magnetospheric particles, fields, electromagnetic waves and data on collisionless bow shock structure

13 p2484 A70-30098

Two dimensional unsteady flow of weakly conducting fluid in perpendicular magnetic field using Green function

14 p2621 A70-30180

Magnetospheric tail neutral layer magnetic field distribution, comparing satellite data with theory

14 p2570 A70-30222

Coupled temperature and electric potential distribution in finite rotational symmetric hydrogen arc column in axial magnetic field

14 p2621 A70-30656

Langmuir probe characteristics and field response in low pressure nonstationary plasma diagnostics in weak magnetic field

14 p2623 A70-30785

Oscillations and stability of rotating masses for axisymmetric equilibrium configurations with toroidal magnetic field based on virial equations

14 p2642 A70-30886

Hall, polarization and Pedersen charged particle drift velocities in static magnetic and time dependent electric field

14 p2624 A70-31046

Superconducting resistive critical field H_c of bcc region of Ti-Nb-V ternary system

15 p2782 A70-31754

Conducting incompressible fluid flow past sphere, examining effect on magnetic field for small magnetic Reynolds number

15 p2778 A70-31913

Bounded hot plasmas with/without steady magnetic field, discussing ion-electron resonances

15 p2779 A70-31997

Radial distributions and escape of charged particles across magnetic field in hot cathode Penning discharge plasma with LF oscillations

15 p2780 A70-32191

Superconducting magnetic flux detector magnetic susceptibilities or field measurements

15 p2740 A70-32431

VLF radiation resistance of short filamentary electric dipole at arbitrary angle to magnetic field in cold uniform plasma, using full wave theory

16 p2859 A70-32935

Near cathode magnetic field effect on instability in linear Hall current accelerators, using geometry of field extending from anode to cathode region

[ALAA PAPER 69-381]

16 p2959 A70-33870

German monograph on temperature distribution and motion of free burning arcs in transversal magnetic fields and gas flows, covering aerodynamic model concept

16 p2959 A70-34077

Magnetic field lines reconnection in steady incompressible hydromagnetic two dimensional flow, formulating governing equations with cylindrical polar coordinates

17 p3140 A70-34926

Supersonic conductive gas recombination fronts for arbitrarily oriented magnetic field, allowing for dissipative coefficients

18 p3294 A70-36255

Equilibrium form shapes of fluid free surface in vessel under gravitational and magnetic field with tension

18 p3240 A70-36269

Magnetic scalar potential of circular loop represented by toroidal coordinate system, solving boundary value problems determining fields of coils and toroidal magnetic conductors

18 p3215 A70-36295

Two component warm plasma wave propagation along magnetic field, considering full pressure tensor equation with momentum and pressure relaxation mechanisms

18 p3294 A70-36405

Spatially periodic dynamos, analyzing homogeneous conducting fluid motions and magnetic field forms

18 p3291 A70-36407

Degenerate relativistic electrons in intense magnetic field, computing transverse electrical conductivity

18 p3296 A70-36896

Magnetic field filtration into time-variable and constant parts, using signal to noise analogies

18 p3249 A70-36914

Electric and magnetic field perturbation at great distances behind body moving in collisionless magnetized plasma estimated from Fourier transform

18 p3316 A70-36921

Synchrotron model limitation for nonthermal spectra, demonstrating restriction to small pitch angles and strong fields

18 p3318 A70-37024

Plasma tearing instabilities involving topological changes in magnetosphere field configuration

19 p3411 A70-37491

Syrovatkii mechanism of high energy particle production near neutral line of magnetic field, noting solar flares occurrence conditions

19 p3478 A70-37581

Rubidium-85 maser, discussing continuous oscillation in low magnetic field

19 p3446 A70-37769

Gravitationally induced /Machian/ magnetic field by rotating mass-shell with centrally located stationary charged sphere, using linearized relativity theory

19 p3471 A70-37815

High magnetic fields applications, emphasizing metal forming and superconducting rings levitation

19 p3471 A70-37948

Crab Nebula electromagnetic spectrum models, considering uniform magnetic field over whole volume and strong fields in small regions

19 p3505 A70-38114

Pc-1 pulsation production by Cerenkov emission of proton beam oscillating along magnetic field line

19 p3417 A70-38590

Gas discharge in longitudinal magnetic field, investigating instability of diffusion dominated positive column

20 p3677 A70-39112

Particulate matter interaction with ionized gas in external magnetic field and nonequilibrium state, examining free electron density

20 p3677 A70-39324

Electrostatic ion waves in uniform magnetic field, calculating phase and group velocities as function of propagation angle for comparison with dispersion measurements

20 p3678 A70-39659

Solar internal rotation, examining oblateness, velocity and magnetic fields, wind structure and Li and Be abundances

20 p3707 A70-39936

Electron bombardment Hg thruster with divergent magnetic fields, investigating performance dependence on configuration and propellant utilizations

[ALAA PAPER 70-1092]

20 p3692 A70-40243

Synoptic charts of polar magnetic fields plotted in polar coordinate system for consecutive solar rotations

20 p3711 A70-40408

Electric and magnetic field components of step function excited electric dipole immersed in dissipative homogeneous medium with specified conductivity and dielectric constant

20 p3589 A70-40464

Thermal plasma model along magnetic field lines outside plasmasphere with sharp density gradient in equatorial plane, using OGO-4 ion composition measurements

21 p3815 A70-41057

Deuterium plasma three dimensional flow in coaxial accelerators, examining magnetic structure of filaments /field lines bundles/

21 p3856 A70-41321

Plasma heating by ionizing shock waves reflected by transverse magnetic field barrier, discussing discontinuity resolution

21 p3857 A70-41381

Shock waves and solitons structure propagating oblique to magnetic field in warm plasma based on two-fluid equations

21 p3857 A70-41382

Plasma source design using stellarator type magnetic field, eliminating electron beam and electrode produced impurities

21 p3858 A70-41713

Magnetotail magnetic field perturbations associated with polar magnetic substorms, using IMP-A and B satellite observations

21 p3882 A70-41720

Harmonic generation and small signal mixing in thin magnetic films subjected to static and time varying fields, generating output voltage expressions

21 p3864 A70-42012

Turbulent flow velocity profile in constant transverse magnetic field, determining resistance coefficient

21 p3861 A70-42235

Homogeneous plasma in uniform magnetic field, deriving theory for instabilities and LF wave propagation modes

22 p4079 A70-42370

Gas discharge positive column finite length effect on wave dispersion and instability, indicating critical magnetic field

22 p4079 A70-42374

Arc welding, discussing use of magnetic fields for improving quality

22 p4042 A70-42375

Unsteady hydromagnetic boundary layer flow past semiinfinite flat plate under steady magnetic field and small free stream perturbation

22 p4080 A70-42631

Compressional sound waves electromagnetic generation in metals in static magnetic fields, examining acoustic amplitude variations

22 p4074 A70-42968

Pulsed multipole magnetic field shaping short plasma blobs

22 p4083 A70-43389

Ultrasound inductive absorption coefficient of metals in quantized magnetic field

22 p4075 A70-43474

Helicon /magnetoacoustic waves/ effect on plasma instabilities, examining HF field amplitudes and magnetic fields

22 p4084 A70-43475

High speed aerospace homopolar alternator, calculating end zone three dimensional magnetic flux distribution and leakage reactance

22 p3999 A70-43585

Concentrated pulsed electromagnetic fields penetration into conductor, assuming magnetic field along metal surface

22 p4041 A70-43621

Auroral electrojet, arcs, electric and magnetic fields relationship investigated by rocket-borne magnetometers and photometers

23 p4184 A70-43835

Electrically conducting fluid hydromagnetic spin-up between infinite flat insulating plates in uniform magnetic field normal to boundaries

23 p4223 A70-43972

FSRO satellites missions and payloads, emphasizing studies of earth magnetic and electric field environment and of polar region particle measurements

23 p4191 A70-44663

Cubic monocrystalline semiconductor under critical magnetic field, using correlation function method

23 p4231 A70-44926

Electric field radial distribution measured for stationary hydrogen arc with axial magnetic field

23 p4227 A70-44933

Electron runaway suppression in fully ionized Lorentz plasma by crossed magnetic and electric fields

24 p4382 A70-45105

Ion acoustic wave propagation in collisionless gravity-supported plasma in static magnetic field calculated from linearized Vlasov equation

24 p4382 A70-45109

Quasi-ambipolar diffusion in arc discharges in magnetic field, calculating ions and electrons density distributions between anode and cathode sheaths

24 p4384 A70-45148

Porous media MHD equations for general case, considering magnetized sphere surrounded by homogeneous envelope

24 p4384 A70-45367

Magnetic field measurement by laser light scattering intensity fine structure determination in plasma

24 p4353 A70-45567

Magnetized conducting sphere steady rotation in viscous conducting liquid, solving for fluid velocity and induced magnetic field

24 p4386 A70-45609

Plasma jet motion stability in axial magnetic field of stellarator divertor and solenoid

24 p4386 A70-45660

- Full and half journal bearings in axial magnetic field, discussing hydromagnetic noncyclic squeeze fluid films 24 p4349 A70-45995
- Conducting sphere MHD rotation in viscous conducting fluid under uniform magnetic field 24 p4387 A70-46028
- Magnetospheric tail neutral layer magnetic field distribution, comparing satellite data with theory 24 p4331 A70-46297
- ### MAGNETIC FILMS
- LF creep characteristics in Block-wall Permalloy films, using high resolution Bitter pattern technique [IEEE PAPER 5.7] 05 p0893 A70-16996
- Mn-Bi films Curie point switching with laser, measuring magnetization dependence via magneto-optic effect [IEEE PAPER 9.3] 05 p0893 A70-16997
- Epitaxial magnetic oxide films grown by chemical vapor deposition 11 p2099 A70-26626
- Magnetic surface loading of Gunn oscillators domain state for use as logic gates, pulse function generator, etc 19 p3387 A70-37819
- Magneto-optic rotation and hysteresis recording instrument for thin magnetic films as function of temperature and wavelength, using Faraday effect 21 p3826 A70-41452
- Computer storage technology, discussing magnetic films, semiconductor cells, content addressable and read-only memories, etc 21 p3795 A70-41693
- Harmonic generation and small signal mixing in thin magnetic films subjected to static and time varying fields, generating output voltage expressions 21 p3864 A70-42012
- Orthogonal susceptibility of uniaxial thin nonmagnetorestrictive Permalloy films 22 p4086 A70-43011
- ### MAGNETIC FLUX
- Ruby green U/V absorption band magnetic circular dichroism calculations in linear approximation, considering spin-orbital interaction constant and magnetic field strength 01 p0156 A70-10188
- Flowmeter errors caused by nuclear magnetic relaxation decreased with increasing magnetic field strength of NMR sensor 01 p0091 A70-10981
- Electron transverse and perpendicular drift velocities calculated at moderate and strong magnetic fields for hydrogen, using Maxwellian energy distribution and equivalent pressure concept 02 p0348 A70-12654
- Computer graphics method for determining total magnetic field magnitude for various coil configurations and spacing, indicating optimum field uniformity near Helmholtz spacing 02 p0271 A70-12745
- Longitudinal magnetic field effect on output power and emission polarization of CW Ar laser employing Brewster windows 03 p0500 A70-13529
- Solar magnetic discontinuity fluxes analyzed by studying 27-day cosmic ray and geomagnetic activity variations using linear filtration method 05 p0900 A70-15969
- Human susceptibility to weak fluctuations in geomagnetic field intensity, showing frequency range 05 p0809 A70-16861
- RF probe impedance variations with magnetic field strength in hot plasma for electron gyrofrequencies less than plasma frequency explained by model 06 p1117 A70-17371
- Photospheric magnetic flux quantization away from sunspots, studying nonsunspot field strength distribution 06 p1142 A70-17992
- Proton concentrations, magnetic field strength and temperatures distribution in interplanetary plasma flows as function of latitudinal distance from center of active region 07 p1391 A70-20420
- Near zero magnetic fields effect on biological systems studied to determine terrestrial magnetic field absence effect on astronauts 08 p1449 A70-20724
- Solar magnetic field strength determination from various absorption lines, considering Rowland intensity, line lower level excitation potential, optical depth, etc 08 p1569 A70-20836
- Neutron beta decay in strong quantizing magnetic field using Dirac wave function for electron, noting lifetime dependence on field strength 08 p1549 A70-21744
- Superconductor tubes experiment, observing flux jump initiation and propagation characteristics 09 p1738 A70-22293
- Penumbral magnetic field strength on basis of photoelectric spectra of undisturbed photosphere 09 p1757 A70-22730
- Laboratory simulations of geomagnetic field suppression, studying biological effects on human, mice, plants and microorganisms 09 p1626 A70-23113
- Solar corona magnetic field estimated from type II bursts correlated with photospheric, chromospheric and geophysical phenomenon 10 p1934 A70-25275
- Archeomagnetic measurements showing westward drift of geomagnetic intensity and correlation of magnetic earth moment with radiocarbon production 11 p2044 A70-25599
- Bremsstrahlung radiation in intense magnetic field proposed as emission mechanism from pulsars, discussing absorption coefficient 11 p2104 A70-25697
- Plasma stabilizing effect of shear and magnetic flux minimum in asymmetric conductors and currents in helical stellarator winding 11 p2088 A70-25711
- Photon nature, considering light-magnetic flux similarities 11 p2084 A70-26027
- Ni-Fe thin films flux reversal with transverse bias field from dynamic magnetization configuration photographs 12 p2284 A70-27242
- Solar plasma and energy and radiation fading during microwave bursts due to synchrotron radiation losses, determining magnetic field strength 12 p2294 A70-27593
- Superposed converter magnetic field intensity normal component distribution as function of polar coordinate 13 p2348 A70-28659
- Wire loop inductive probe with compensation spur as precision sensor for magnetic field intensity in EM fields 13 p2376 A70-28817
- Magnetospheric discrete VLF emission magnetic field intensity calculation by extending Helliwell theory to include electron density model and variable frequency waves 13 p2483 A70-30087
- Interplanetary magnetic field flux relationship to Kp index of magnetic activity 14 p2570 A70-30221
- Implantable EM blood flowmeter errors due to nonsymmetrical blood flow velocity distribution and nonuniform magnetic flux density 14 p2542 A70-30797
- Measurable VLF electromagnetic fluxes from Cerenkov effect in ionosphere produced by artificial electron beams 14 p2579 A70-31249
- Earth satellite motion about center of mass, examining effects of random variations in atmospheric density, geomagnetic intensity and solar radiation 15 p2809 A70-31650
- Superconducting magnetic flux detector magnetic susceptibilities or field measurements 15 p2740 A70-32431
- Magnetic monopole flux limits in primary cosmic radiation derived from muon-poor shower data and inverse Compton scattering 16 p2972 A70-33050
- Magnetic phase diagram of hydrated cesium-copper carbide at 1.625 Neel temperature in external magnetic fields, giving equation for spin flop field temperature dependence 16 p2961 A70-33688
- MHD flow velocity and magnetic flux profiles in rectangular ducts for secondary boundary layer 16 p2959 A70-34239
- Magnetic flux measurements in quiescent solar filaments and adjacent photosphere using magnetograph observations 17 p3157 A70-34837
- Semiannual oscillation and fine structure of earth magnetic field horizontal intensity during March and September 19 p3413 A70-38004
- Magnetic field lower limit in Crab Nebula from cosmic gamma ray studies using optical reflector to detect atmospheric Cerenkov radiation 21 p3875 A70-40684
- Transverse magnetic disturbances in auroral oval, examining movement, intensity, particle fluxes and field magnitude 21 p3817 A70-41090
- Energy release during flux jump in Nb-Ti single core wires and multifilament composite superconductors 21 p3863 A70-42011
- Optically pumped magnetometers for low intensity magnetic fields measurement, reviewing atomic hyperfine levels splitting, magnetic resonance, Zeeman sublevels, etc 22 p4026 A70-42575
- High speed aerospace homopolar alternator, calculating end zone three dimensional magnetic flux distribution and leakage reactance 22 p3999 A70-43585
- Magnetic vector potential of circular ring with current in Taylor series expansion for electromagnetic axisymmetric systems 23 p4189 A70-44069
- Air spark gap to switch stored charge in LC circuit, using auxiliary triggering circuit to clamp magnetic flux 23 p4177 A70-44471
- Magnetic flux dependent interference beats in spontaneous emission of gas discharge of He-Ne laser, estimating Hertzian coherence duration 23 p4202 A70-45052
- Primeval cosmic magnetic fields origin, discussing galactic fields and limits on present intergalactic field 24 p4403 A70-45396
- Stable ellipsoidal plasma configurations in alternating electrode annular system, considering longitudinal magnetic field strength, electrode voltage and gas discharge chamber pressure 24 p3485 A70-45456
- Interplanetary magnetic field flux relationship to Kp index of magnetic activity 24 p4331 A70-46296
- ### MAGNETIC FORMING
- Magnetomotive loading of cantilevers, beams and frames, studying dynamic loading of structures 19 p3541 A70-38045
- Stainless steel sheet-to-plate tee joint resistance welded by Magnetic Force Upset Welding process, testing performance 21 p3832 A70-40792
- ### MAGNETIC INDUCTION
- Spherical conducting body effect on induction coil impedance and EMF in nondestructive testing using eddy current probes 02 p0300 A70-12478
- Electromagnetic wave propagation in homogeneous plasma waveguide satisfying Appleton-Hartree approximation without collisions in presence of longitudinal magnetic induction 02 p0349 A70-12724
- Magnetic field self induction in static fluid-submerged intersecting jet system, calculating required magnetic Reynolds numbers 04 p0726 A70-14541
- Magnetized resonantly sustained HF plasma column wave properties, obtaining above-critical density as function of static magnetic induction 04 p0728 A70-14999
- Unipolar induction to calculate moon interior electric field profiles, noting magnetic back pressure as limb shock wave and interaction with solar wind 07 p1377 A70-18970
- Inductance distribution in magnetic systems of different configuration and air gaps 07 p1282 A70-19530
- MHD flow in rectangular duct with arbitrary conductivity via modified Fourier method, obtaining magnetic induction and current for various Hartmann numbers [ASME PAPER 69-WA/APM-17] 08 p1551 A70-21308
- Magnetic moment associated with Landau levels in magnetic induction in electron gas and magnetic fields of white dwarfs and neutron stars 09 p1752 A70-22306
- Algorithm for inversion of geomagnetic induction problem, determining earth radial conductivity distribution 09 p1669 A70-23305
- Plasma conductivity measuring device using phenomenon of change of coil induction in electromagnetic field 09 p1737 A70-23380
- Linearized steady plane axisymmetric flows of inviscid finitely conducting incompressible fluid past insulator under magnetic induction with zero components 13 p2464 A70-29541
- Contactless electromagnetic level sensor for liquid metal using eddy currents 14 p2587 A70-31011
- Thermal electrodeless plasmas generation at audio frequencies with closed magnetic circuit model [AIAA PAPER 70-776] 17 p1319 A70-34478
- Electromagnetic induction in plate with two dimensional conductivity distribution for case of E polarization, representing field by Green functions 19 p3408 A70-37314
- Induction flowmeters operation, emphasizing various factors effects on induced voltage 19 p3426 A70-37936
- Energy distribution of ions transversal to magnetic field in argon plasma source with oscillating electrons, showing dependence on induction and discharge current 19 p3482 A70-38956
- Superradiation signal stationary pulse excitation, describing quantum statistical theory of condensed media and gases, forced induction, signals and echoes 20 p3642 A70-39756
- Multiphase relaxation oscillator with inductive coupling and common base resistor in feedback loop, determining circuit parameters effect on pulse length 20 p3598 A70-39791

- One wavelength MHD induction generator, discussing field pressure gradients, fluid velocities, excitation and electrical output power
20 p3566 A70-40015
- Apollo 11 rocks natural remanence and induced magnetism by triaxial magnetic gradiometer at Lunar Receiving Laboratory
21 p3914 A70-41650
- Relative pressure and excitation induction transverse distribution relationship for MHD machine model, assessing dimensionless criteria effect on pressure peaks position
21 p3760 A70-42232
- EM induction in flat plates with two dimensional conductivity distribution, describing approximation method
23 p4217 A70-44054
- MAGNETIC INDUCTION PROBES**
U MAGNETIC PROBES
- MAGNETIC MATERIALS**
NT FERRIMAGNETIC MATERIALS
NT FERROMAGNETIC FILMS
NT FERROMAGNETIC MATERIALS
NT MAGNETITE
NT PERMALLOYS [TRADEMARK]
- Co role in magnetic materials, discussing high magnetic moments in iron combinations, orbital angular momentum, quantum mechanics explanations, etc
07 p1306 A70-19074
- Superconductive materials and magnet design, discussing stabilization methods
11 p2097 A70-25613
- Magnetism and magnetic materials - Conference, Philadelphia, November 1969
12 p2283 A70-27238
- Ni-Mo-Fe magnetic alloy for EM pulse shielding, verifying saturated regions diffusion theory
12 p2201 A70-28128
- Microwave properties of infinite lossless rectangular waveguide semiinfinitely filled with magnetic material operating in specific modes
17 p3050 A70-34585
- Magnetic and nonmagnetic metals flaw detection, using orthogonal eddy current probe to reduce permeability and conductivity variations effects
24 p4344 A70-45700
- Fluorescent penetrants vs magnetic powder test for individual and continuous material inspection, discussing sensitivity and surface finish influence
24 p4338 A70-45741
- MAGNETIC MEASUREMENT**
Solar corona magnetic field determination from photospheric magnetic field line-of-sight component observations, describing various mathematical methods
01 p0176 A70-10250
- Solar magnetic field investigated with parallel beam from coelostat mounting falling on magnetograph slit of solar telescope, noting field polarity change periodicity
01 p0177 A70-10347
- Steel objects microstructure and hardness tested by continuous magnetic technique, describing experimental apparatus model
02 p0300 A70-12479
- Absorption line identification in sunspot spectra by calculating Zeeman patterns, using Zeeman splitting for magnetic field measurement
03 p0574 A70-13934
- Interplanetary magnetic field measurements from Mariner and OGO satellites at various paths, regions and intervals, finding dominant polarity effect dependent on sun latitude
03 p0575 A70-13980
- Magnetic fields neutral lines length as indicator of solar flare productivity
03 p0561 A70-14001
- Superconducting magnetic system in magnetic analyzer of positrons and electrons in primary cosmic radiation tested on board Cosmos 213
04 p0685 A70-14443
- High altitude observatory solar magnetograph installation modifications including computer control, improved Zeeman effect observation instrument, etc
04 p0691 A70-15037
- Magnetic vector directions over sunspot near central meridian passage measured, showing axisymmetric arrangement
04 p0758 A70-15697
- Miniature fluxgate magnetometer for sounding rocket measurements of two orthogonal components of external magnetic field, predicting performance by linear mathematical model
05 p0851 A70-16690
- Magnetosensitive quartz element with suspended magnet and two mirrors for recording magnetic variations
05 p0851 A70-16770
- Geomagnetic field total vector modulus secular variations from airborne measurements
07 p1278 A70-20461
- Longitudinal magnetic field measurement along H-alpha line of solar prominence
08 p1560 A70-20838
- Magnetic field measurements in geomagnetic tail from Explorers 33 and 35 indicating depressed field region centered on neutral sheet
08 p1488 A70-21379
- Mapping of normal distribution of geomagnetic elements in Bulgaria
08 p1490 A70-21433
- Broadband remote sensing magnetometer for measuring fast-rising pulsed magnetic fields
09 p1676 A70-22716
- Earth magnetosphere and magnetosheath magnetic field measurements by Mariner 5
09 p1670 A70-23487
- Solar magnetic field measurement emphasizing circular and total polarization characteristics
10 p1939 A70-24275
- Plasma magnetic field measurement by scattered light, analyzing electron spectrum modulation with gyration frequency
10 p1916 A70-24401
- Solar flare relation to local magnetic field in active regions, discussing sunspot and weak field measures
12 p2297 A70-26986
- Spectral line width and shift measured by spectrograph crossed with Fabry-Perot interferometer in pressure chamber, measuring magnetic field in sodium
12 p2238 A70-28178
- Superconducting magnetic system in magnetic analyzer of positrons and electrons in primary cosmic radiation tested on board Cosmos 213
13 p2403 A70-28468
- Wire loop inductive probe with compensation spur as precision sensor for magnetic field intensity in EM fields
13 p2376 A70-28817
- Photosphere model and magnetic field gradient effects on line contours and magnetographic calibration curves, using nonlinear source function
13 p2496 A70-29845
- Reliability and environmental testing of residual magnetic field measurements of satellite HEOS-A1 electronic equipment, using Rb vapor magnetometers
13 p2380 A70-30031
- Magnetic moment measurement of satellite in near earth orbit, using data transmitted by rectangular magnetic sensors
13 p2454 A70-30032
- Parametric resonances at zero field crossing levels of optically pumped atoms on alkali vapors, noting applications to weak magnetic measurements
13 p2456 A70-30034
- Thin ferromagnetic film sensitive elements for detection of weak magnetic fields
13 p2415 A70-30041
- Pioneer 6-9 low magnetism spacecraft for interplanetary magnetic field observation
13 p2507 A70-30046
- Stability requirements for precision magnetic field measurements on ground and in space, discussing magnetic balances and fluxgate magnetometers for geomagnetic variations and spacecraft attitude
13 p2415 A70-30050
- Magnetic field measurement of VLF wave propagating in whistler mode in magnetosphere by satellite FR-1
13 p2401 A70-30054
- Geomagnetic noise constraints on weak field measurements in upper magnetosphere
13 p2401 A70-30056
- Geomagnetic tail structure and shape from Explorer 33 and 35 and Pioneer 8 observation data, examining field lines divergence with distance from earth
13 p2402 A70-30075
- Geomagnetic field distortion in high beta magnetospheric regions from OGO observations for quiet and slightly disturbed conditions
13 p2402 A70-30076
- Geomagnetic field distant fluctuations during substorm from ATS 1 magnetometer data on abrupt recoveries of H component
13 p2482 A70-30077
- Free nuclear precession sensor with rotating sample for performing measurements in nonuniform magnetic field
14 p2582 A70-30218
- Errors magnitude in quartz variometer readings resulting from variations of geomagnetic field perpendicular component
14 p2582 A70-30244
- Magnetic fields of DA dwarfs observed with photoelectric polarimeter, noting no fields observable
17 p3154 A70-34537
- Magnetic methods of flaw detection, discussing theory and application to welded butt joints
18 p3263 A70-36521
- Interplanetary magnetic field measurements by Pioneer 8 during 25 February 1969 solar activity, discussing geomagnetic storms, cosmic rays, shock fronts and ionospheric disturbances
19 p3513 A70-37501
- Permalloy tapes uncertainty in magnetization process, discussing Barkhausen discontinuities measurement method
20 p3673 A70-40058
- Helios solar probe magnetic field measurements, discussing magnetometer systems, interplanetary magnetic field implications, shock waves, magnetic storms, etc
21 p3923 A70-42172
- Dual satellite magnetic field and plasma measurements of earth bow thick pulsation shock by Vela 3A and Explorer 33
22 p4013 A70-42470
- Magnetism in austenitic stainless steels, discussing Mossbauer measurements of temperature dependence of hyperfine field and single line width
22 p4055 A70-43012
- Global geomagnetic field fluctuations of internal and external origins, analyzing HF spectrum based on monthly mean plots
23 p4187 A70-43861
- Quartz Z-variometer for autonomous variation stations, describing construction and operation
23 p4194 A70-44089
- Beryllium orbital diamagnetic susceptibility calculated by pseudopotential method compared to experimental data
23 p4208 A70-44886
- Magnetostrictive Ni-Mn-Co ferrites and Al-Fe alloys, measuring magnetic field effect on piezomagnetic coefficients at room temperature
24 p389 A70-45400
- Magnetic field measurement by laser light scattering intensity fine structure determination in plasma
24 p4353 A70-45567
- Remanence and saturation methods for magnetic-particle flaw detection
24 p4346 A70-45726
- Defect detection by measurement of magnetic field leakage around flaw
24 p4346 A70-45727
- Free nuclear precession sensor with rotating sample for performing measurements in nonuniform magnetic field
24 p4339 A70-46293
- Errors magnitude in quartz variometer readings resulting from variations of geomagnetic field perpendicular component
24 p4339 A70-46319
- MAGNETIC MEMORIES**
U MAGNETIC STORAGE
- MAGNETIC METALS**
U MAGNETIC MATERIALS
U METALS
- MAGNETIC MIRRORS**
Plasma accumulation between mixed field accelerator and pulsed magnetic mirror, noting duration and stability
02 p0346 A70-12104
- Time resolved cavity perturbation technique to measure high plasma density in magnetic mirror compression experiment, obtaining total electron number
02 p0347 A70-12236
- Accumulated plasma density and lifetime measurement of trapped ions between accelerator and periodic magnetic mirror, showing limitation by collisions and charge exchange
03 p0532 A70-13683
- Soviet collection of papers on magnetic traps covering chamber walls effect on plasma heating, plasma in mirror trap and self sustained fusions
07 p1350 A70-19844
- Plasma properties produced in mirror magnetic trap by electron beam determined during transition from hot electron dense plasma into cold electron low density plasma
07 p1350 A70-19846
- Electromagnetic instability measurements in electron cyclotron resonance plasma produced in magnetic mirror field
10 p1921 A70-23963
- Electron diffusion in trap with magnetic mirrors under pulsed field perturbations, determining coefficients by numerical integration of drift equation
10 p1931 A70-24311
- Magnetic mirror confined plasmas, solving Fokker-Planck equation
18 p3296 A70-36795
- Ion heating during plasma instability due to interaction with electron beam in mirror magnetic trap
20 p3678 A70-39598
- Superconductive magnets with different windings and modular construction for magnetic mirror apparatus, discussing performance tests
23 p4218 A70-44355
- Plasma confinement in min-B configuration of linear multiple with mirrors, attaining additional stabilization via linear rods carrying unidirectional current
24 p4386 A70-45612
- MAGNETIC MOMENTS**
Transient magnetic resonance technique for non-destructive testing of elements with nuclei having magnetic moment, considering cereal grains, propellants, metal powder and plastics
01 p0097 A70-10014
- Disordered ferromagnetic binary alloys of transition metals magnetic moment distributions based on thermal neutron scattering experiments
05 p0893 A70-16950

Co role in magnetic materials, discussing high magnetic moments in iron combinations, orbital angular momentum, quantum mechanics explanations, etc
07 p1306 A70-19074

Magnetic moment associated with Landau levels in magnetic induction in electron gas and magnetic fields of white dwarfs and neutron stars
09 p1752 A70-22306

Archaeomagnetic measurements showing westward drift of geomagnetic intensity and correlation of magnetic earth moment with radiocarbon production
11 p2044 A70-25599

Magnetic moment measurement of satellite in near earth orbit, using data transmitted by rectangular magnetic sensors
13 p2454 A70-30032

Magnetic moment fluctuations of arbitrary solid body by fluctuation-dissipation theorem for thermal equilibrium
13 p2454 A70-30033

Isomer shift, Mossbauer recoil free fraction and nuclear quadrupole splitting for Fe57 in iron fluoride measured for lattice dynamics, fine and hyperfine structure
14 p2626 A70-30484

Ion magnetic moments in crystallographically nonequivalent lattice regions in ferrites
19 p3484 A70-37622

Optimal control of magnetic torque for bias momentum removal from attitude controller, discussing applications to Skylab
23 p4258 A70-44503

MAGNETIC PERMEABILITY

Premature saturation in strongly magnetic systems explained by model with nonuniform magnon modes, applying time dependent Green functions
02 p0338 A70-11886

Temperature dependence of magnetic susceptibility in liquid and solid states of binary Al-Mn alloys with additions of Cr, V and Ti
02 p0316 A70-12300

Magnetic susceptibility of synthetic australite and philippinite-like tektites measured in 77-560 K range, discussing origin
05 p0916 A70-16836

Normal and bottle-green microtektite glass measured for magnetic susceptibility, magnetization and Curie constants
05 p0916 A70-16839

Lamellar magnetic core stacking pressure influence on core magnetic characteristics in variable magnetic field, noting effects on magnetic permeability
07 p1246 A70-19537

Electromagnetic wave scattering from atmospheric ellipsoidal plasma formations, using arbitrary permittivity and magnetic permeability tensors
13 p2366 A70-29376

Superconducting magnetic flux detector magnetic susceptibilities or field measurements
15 p2740 A70-32431

Anisotropic temperature plasma susceptibility calculation based on velocity moment equations and circular polarized coordinates, compared to Vlasov equation solution
17 p3140 A70-34929

Thermal variation of diamagnetism and susceptibility of rhombohedral graphite
21 p3845 A70-42268

Orthogonal susceptibility of uniaxial thin nonmagnetorestrictive Permalloy films
22 p4086 A70-43011

Valent state of chromium doped barium titanate from EPR spectra and magnetic susceptibility measurements
22 p4086 A70-43133

Beryllium orbital diamagnetic susceptibility calculated by pseudopotential method compared to experimental data
23 p4208 A70-44886

Superconductive memory type chalcogenide tellurium germanium arsenide, measuring AC magnetic susceptibility and DC electrical resistivity
23 p4231 A70-44892

Ferromagnetic cylindrical specimens eddy current density distribution under influence of field strength dependent permeability corresponding to Rayleigh law
24 p4344 A70-45695

Metallic rods and tubes permeability and resistivity nondestructive measurement by AC apparatus with self balancing sensing coil, using computer program for data reduction
24 p4345 A70-45704

MAGNETIC PISTONS

Forbush decreases of cosmic rays calculated assuming semitransparent magnetic piston action with free particle exchange
07 p1372 A70-20340

Current diffusion from magnetic piston into postshock gas upstream observed in electromagnetic shock tube
09 p1736 A70-23185

MAGNETIC POLES

Polooidal magnetic field influence on compressible fluid convection in spherical shells, using variational method to obtain stability criteria
04 p0758 A70-15695

Variational and Z-expansion calculations for magnetic quadrupole transitions decay rates of He sequence
05 p0920 A70-16942

Relativistic magnetic monopoles detection in corpuscular primary cosmic rays, describing equipment and results
07 p1371 A70-20333

Altitude asymmetry of instantaneous auroral oval plotted for geomagnetic pole and earth surface
07 p1277 A70-20456

Synoptic charts of polar magnetic fields plotted in polar coordinate system for consecutive solar rotations
20 p3711 A70-40408

Magnetic monopoles electromagnetic search in Apollo 11 rock samples
21 p3912 A70-41639

Paleomagnetic reversal in 1350 year increments, measuring declination of deep sea sediment cores
21 p3820 A70-41885

MAGNETIC PROBES

Ferroprobe coercimeter with attached electromagnets for nondestructive hardness testing, describing components and mounting
02 p0301 A70-12489

Magnetovariational sounding procedure for determining vertical distribution of earth mean electrical conductivity using geomagnetic field spatial derivatives for spherical earth
05 p0843 A70-16767

Wire loop inductive probe with compensation spur as precision sensor for magnetic field intensity in EM fields
13 p2376 A70-28817

Magnetic induction sensors sensitivity for magnetotelluric surveying in geophysics
13 p2415 A70-30048

Magnetic probes effectiveness study of electron heating behind shock wave front in plasma, measuring electron temperature
18 p3294 A70-36149

Current distribution of accelerating electrodes of coaxial injector, using differential magnetic probe
22 p3965 A70-42805

Finite thickness metal plate eddy current response to pulsed field from aperture probe
24 p4344 A70-45696

Eddy current magnetic probe with frequency scanning for signal-noise discrimination in nondestructive testing of tubes
24 p4336 A70-45698

Magnetic and nonmagnetic metals flaw detection, using orthogonal eddy current probe to reduce permeability and conductivity variations effects
24 p4344 A70-45700

Thickness measurement of nonmagnetic coatings on magnetic substrates taking into account surface roughness effect
02 p0302 A70-12672

Magnetic boundary layer equations applied to flow past stationary circular cylinder and sphere, showing graphical variation of slip velocity with angle
03 p0471 A70-14334

Magnetics - IEEE Conference, Amsterdam, April 1969
05 p0893 A70-16995

Ti additions influence on steel work hardening, specific weight, magnetic properties and structure
08 p1515 A70-20924

Magnetic spherules extracted from manganese nodules classified by X ray diffraction and electron

microprobe data, suggesting volcanic, stony and iron meteoritic origins
08 p1578 A70-21560

Composite materials in Co or Fe matrix for solid rotor core materials applications at high temperature and stress, discussing magnetic properties
08 p1524 A70-21908

Ferromagnetic domain wall-dislocations magnetoelastic interaction in Fe and Ni computed as function of relative separation, discussing effects on magnetic properties
09 p1705 A70-22811

Magnetism and magnetic materials - Conference, Philadelphia, November 1969
12 p2283 A70-27238

Magnesium arsenide phosphide crystal and magnetic structure using X ray and neutron diffraction
12 p2283 A70-27240

Stable colloidal dispersions of subdomain magnetite particles correlated for magnetic properties in terms of size distribution and volumetric concentration by superparamagnetic theory
12 p2284 A70-27241

Isostructural crystals of Dy compounds investigated for magnetic behavior using high resolution photoelectric optical spectroscopy
12 p2261 A70-27243

Quenched MnBi thin films measured for magnetic, magneto-optical and optical properties, noting Faraday rotation
12 p2284 A70-27246

Ni-Fe alloy sheets magnetic shielding effectiveness correlated with DC magnetic properties at various frequencies
12 p2201 A70-28127

Magnetic field simulator for investigating magnetic properties of satellites designed for magnetometric experiments
13 p2385 A70-29556

Lamellae stresses and magnetostrictive effects on magnetic properties of titanomagnetite and ilmenohematite series minerals
15 p2728 A70-31993

MAGFET devices for integrated circuits, calculating magnetic sensitivity as function of channel aspect ratio and Hall electrode position
15 p2710 A70-32572

French monograph on microwave ferrite devices, discussing paramagnetism, ferromagnetism, ferrimagnetism, gyromagnetic resonance and nonreciprocal effects, isolators, attenuators, phase shifters, etc
16 p2873 A70-33267

Spinel lithium ferrite magnetic and crystallographic properties, considering effects of Li and oxygen losses, sintering temperature and cooling rate
16 p2961 A70-33272

Magnetometric, dilatometric, pyrometric and X ray studies of phase transformations in Fe-Ni alloys, considering magnetic characteristics and formation of superstructures
18 p3276 A70-36207

Mechanical stresses effect on Vicalloy rotor packets magnetic properties
19 p3357 A70-37265

Microstructure effects on magnetic properties of polycrystalline MnZn ferrites with high permeability
19 p3484 A70-37565

Crystal dislocations and microstructure effects on magnetic properties of polycrystalline MnZn ferrites with high permeability, noting eddy currents role
19 p3484 A70-37566

Iron phosphate semiconducting glasses, determining electrical and magnetic properties dependence on thermal treatment
19 p3487 A70-37861

Azur satellite magnetic parameters simulation, noting spacecraft structure effect
19 p3400 A70-38295

Magnetoionic component of entire N/z profile on incomplete ionospheric traces, including invisible part of ionogram
19 p3419 A70-38957

Apollo 11 lunar rock pyroxenes, examining band structure and magnetic ordering by high voltage electron microscopy and electron diffraction
21 p3898 A70-41523

Apollo 11 lunar rock and dust samples thermomagnetic properties, Curie points, magnetization and demagnetization characteristics
21 p3915 A70-41661

Magnetic properties of Apollo 11 lunar breccia samples, determining natural remanent magnetization and susceptibility via paleomagnetism instruments and methods
21 p3916 A70-41668

Lunar rocks magnetic properties and natural remanent magnetization, examining pyroxene paramagnetism, ferrosilite and ilmenite antiferromagnetism and native iron ferromagnetism
21 p3917 A70-41671

Apollo 11 lunar rock and fines magnetic properties, associating remanent magnetization with lunar magnetic field
21 p3917 A70-41675

Apollo 11 lunar breccia and fines magnetic properties, examining remanence, composition, oxidation, volcanic activity and stoichiometry
21 p3918 A70-41680

Apollo 11 lunar fines glass spherules magnetic properties, considering soft and hard ferromagnetic components
21 p3918 A70-41681

Antiferro-, ferri- and ferromagnetic semiconductors properties, discussing narrow band electron correlation, electrostatic and magnetic polarons formation, etc
21 p3864 A70-42254

Magnetic and structural characteristics of ternary intermetallic systems with lanthanides, considering Ln substitution by other rare earth elements
22 p4085 A70-42481

Lanthanide zinc intermetallic compounds magnetic characteristics in 4-300 K range, observing Curie-Weiss behavior
22 p4085 A70-42482

Magnetic desaturation of inertia flywheels of satellite in equatorial or slightly inclined orbit, discussing satellite stabilization
22 p4110 A70-42488

Perovskite type oxide lanthanum manganate magnetic properties, explaining ferromagnetism by spin Hamiltonian formalism
24 p4389 A70-45601

Magnetic properties of lanthanum calcium manganate, making stoichiometric specimens by controlling oxygen partial pressure
24 p4390 A70-45602

MAGNETIC RECORDING
Recording technique for measuring short period variations of radio signal reflections altitudes from ionosphere applicable to fast ionospheric processes
07 p1277 A70-20454

Hydromagnetic emissions recordings at two Australian stations indicating simultaneous occurrence
10 p1875 A70-24441

Solar radio bursts dynamic spectra by magnetic tape recording of digital signal, obtaining frequency and time profiles and intensity layers
10 p1934 A70-25276

Solar image spectrum magnetic recording for computer, using photomultipliers with coding devices
18 p3256 A70-36107

Magnetic tape recorder for panoramic vertical ionospheric sounding data acquisition in digital form
18 p3261 A70-37041

Instrumentation magnetic recorders in aerospace industry in relation to new components and techniques development, investigating airborne recorder as flight test tool
19 p3429 A70-38516

Airborne magnetic recording flight test instrumentation of Anglo-French Jaguar aircraft
19 p3431 A70-38535

Emmanuel magnetic recording system used with airborne digital computers for aircraft in-flight tests
19 p3432 A70-38547

Magnetic recording in airborne systems, discussing printed motor-optical tachometer design for transport accuracy and ferrite spin-alloy heads
21 p3829 A70-41921

High speed three-frame electronic camera with storage tube, slow scanning and magnetic recording [SMPT PREPRINT 55]
22 p4033 A70-43038

MAGNETIC RELAXATION
NT SPIN-LATTICE RELAXATION
Flowmeter errors caused by nuclear magnetic relaxation decreased with increasing magnetic field strength of NMR sensor
01 p0091 A70-10981

MAGNETIC RESONANCE
NT ELECTRON PARAMAGNETIC RESONANCE
NT FERROMAGNETIC RESONANCE
NT NUCLEAR MAGNETIC RESONANCE
NT PARAMAGNETIC RESONANCE
NT PROTON MAGNETIC RESONANCE
NT PROTON RESONANCE
Ultra low frequency waves features in magnetosphere, considering geomagnetic pulsations, magnetic data from Explorer 33 and bounce resonance
12 p2223 A70-27573

Optically pumped He 4 magnetometers, investigating magnetic resonance signal dependence on orientation for nonresonance technique construction
13 p2414 A70-30036

Spin-spin correlation in Heisenberg magnet linear chain at infinite temperature, discussing non-monotonic frequency dependence
14 p2619 A70-30486

Apollo 11 rock and fines magnetic resonance, examining line shapes, temperature dependences and electron spin
21 p3917 A70-41670

Antiferromagnetic resonance measurement in manganese difluoride as function of microwave frequency, sample size and shape
21 p3850 A70-41908

MAGNETIC RIGIDITY

Geomagnetic latitude survey by neutron multiplicity monitor covering threshold rigidity ranges at various elevations, relating data to primary cosmic ray rigidity spectrum
04 p0741 A70-15125

Polar cap absorption midday recovery phenomenon analysis in northern and southern polar auroral regions showing increase in ionizing flux rigidity
04 p0682 A70-15729

Local time dependence of geomagnetic cut-offs for solar protons in 0.52-4.0 Mev range from satellite observations
06 p1136 A70-18529

Solar flare cosmic ray rigidity spectrum determination based on ratio of relative enhancements, assuming isotropical arrival of particles at earth
09 p1744 A70-22489

Polar cap absorption midday recovery phenomenon analysis in northern and southern polar auroral regions showing increase in ionizing flux rigidity
14 p2575 A70-30813

Secular variations calculation in cosmic ray cutoff rigidities by trajectory tracing process with geomagnetic field models
18 p3306 A70-36023

High energy charged particle observations on OSO 3 at various rigidities
19 p3505 A70-38117

Primary cosmic ray He nuclei rigidity measurement with magnetic spectrograph
19 p3505 A70-38119

Cosmic ray neutron component differential and integral barometric coefficients, showing dependence on geomagnetic cutoff rigidity and atmospheric depth
20 p3697 A70-39290

Cosmic rays cutoff rigidity variations during magnetic storms, investigating flux increase due to current flow along parallel lines on magnetic shell surface
20 p3698 A70-39300

Low energy solar protons penetration, examining geomagnetic cutoff latitude during magnetically disturbed period
21 p3881 A70-41077

Geomagnetic axial dipole deviation from true north associated with earth core asymmetric motion, discussing geomagnetic reversal
22 p4020 A70-43231

Threshold rigidity decrease during 23-24 March 1969 magnetic storm, analyzing neutron multiplicity spectrum
23 p4186 A70-43846

MAGNETIC SHIELDING
Ni-Fe alloy sheets magnetic shielding effectiveness correlated with DC magnetic properties at various frequencies
12 p2201 A70-28127

Superconducting lead shell shielding properties in small ambient magnetic fields
13 p2454 A70-30030

Spacecraft magnetic radiation shield optimization based on thickness criterion and system mass consideration
22 p3979 A70-43390

MAGNETIC SIGNALS
Superradiation signal stationary pulse excitation, describing quantum statistical theory of condensed media and gases, forced induction, signals and echoes
20 p3642 A70-39756

MAGNETIC SIGNATURES
Magnetograms by Venera 4 and Mariner 5 compared to determine interplanetary magnetic field nature in Venus proximity
04 p0744 A70-14438

Vertical incidence /VI/ F layer ionograms, magnetograms and signal amplitude data obtained during annular eclipse of 23 November 1965
09 p1671 A70-23494

Magnetospheric substorms magnetograms taken at various stations, showing preceding ring storm particles deflection into magnetic tail
10 p1876 A70-24496

Magnetograms by Venera 4 and Mariner 5 compared to determine interplanetary magnetic field nature in Venus proximity
13 p2485 A70-28463

Chromospheric photoelectric magnetograms with high resolution H alpha pictures for deriving magnetic field directly from filtergrams
17 p3096 A70-35864

MAGNETIC SPECTROSCOPY
Zeeman interaction for super 8S term in ESR Hamiltonian determined, using trivalent Gd magnetic spectrum at eightfold coordinated cubic sites of thoria
02 p0340 A70-12718

Sea level testing of magnetic spectrograph and calorimeter apparatus for studying cosmic ray spectra at different atmospheric depths
08 p1560 A70-20474

Primary cosmic ray He nuclei rigidity measurement with magnetic spectrograph
19 p3505 A70-38119

MAGNETIC STARS

Electric fields in rotating magnetic relativistic neutron stars, analyzing static fields in corotating frame and pulsar emission
02 p0379 A70-12726

Anisotropic plasma turbulence produced by two stream instability onset near light cylinder of rotating magnetic star for pulsar model
14 p2640 A70-30788

Coherent radio emission mechanisms of white dwarfs and neutron stars as magnetic pulsar models, discussing polarization
15 p2804 A70-32698

Stellar evolution covering formation, structure and time-varying properties of single spherical, nonspherical, magnetic and binary stars
19 p3531 A70-38950

Rotating magnetic star thermal behavior, discussing central nuclear burning stability, homologous changes, cooling, degeneracy and helium flash
22 p4100 A70-42855

Surface field model of rotating magnetic stars involving uniformity and Eddington-Sweet circulation suppression
23 p4251 A70-44826

Rotating magnetic star dynamic evolution, discussing magnetic and rotation axes inclinations for oblique rotator model
23 p4252 A70-44827

Heavy elements diffusive separation as explanation of metallic and magnetic A stars abundance anomalies at outer convective envelope bases
24 p4410 A70-45775

White dwarf stars continuum circular polarization as function of time and wavelength, emphasizing magnetic star search
24 p4410 A70-45776

MAGNETIC STORAGE
Multichannel ionization calorimeter data readout into electronic computer using short circuit coil magnetic storage
05 p0816 A70-15947

Sideband frequency disturbances at analog data magnetic storage using frequency modulation
20 p3586 A70-39706

Magnetic holography, considering Faraday and polar Kerr effect reconstructions and potential as computer storage
22 p3994 A70-43608

MAGNETIC STORMS
Two station simultaneous observations of auroral infrasonic wave substorms morphologies
01 p0071 A70-10411

Ionospheric auroral oval, proton aurora and midlatitude trough relationship to magnetospheric structure, trapping outer boundary, storm time belt and plasmopause
01 p0073 A70-10586

Magnetic lines of force penetration into magnetosphere accompanied by plasma insertion generating ring current responsible for main phase of magnetic storm
01 p0083 A70-11543

Midlatitude ionospheric disturbances accompanied by auroral type radio absorption observed by radio astronomy and probes during 26 May 1967 storm
01 p0084 A70-11555

Harmonic analysis of magnetic storms initial phases having steep leading edges and distinct steady portions, showing homogeneity in first approximation
01 p0084 A70-11558

Seasonal effect on F region midlatitude slab thickness diurnal variations during magnetic disturbances using monitoring VHF signals from geostationary satellites
02 p0290 A70-12160

Equatorial magnetosphere particle and field data from 18 April 1965 geomagnetic storm reanalyzed in context of drift mirror instability theory
03 p0560 A70-13976

Forbush decrease recorded on 26-27 January 1968 showing large anisotropies in cosmic ray flux after SC magnetic storm
03 p0560 A70-13979

Relationship between 6300 A monochromatic auroral arc and visible aurora during magnetic storm, determining directional speeds
03 p0478 A70-14000

Solar flare duration effect on propagation and modification of forward-reverse shock pair between sun and 1 AU, using equations of motion for spherically symmetric flow
04 p0740 A70-15104

Magnetic storms frequency and levels coincidence with solar activity variations
04 p0682 A70-15734

Cosmic ray intensity decreases in relation to geomagnetic and F 2 region disturbances characterized by Forbush decreases from vertical sounding data
05 p0898 A70-15940

Time dependent variation of first and second harmonics amplitudes of diurnal cosmic ray variations during SC magnetic storms
05 p0898 A70-15942

F 2 layer electron density changes during geomagnetic storms linked to DS current and electromagnetic disturbances

05 p0838 A70-16280

Topside ionosphere ionization compared during magnetic storms with steep onset, smooth variation and sudden commencement

05 p0838 A70-16283

Ionospheric effect sudden commencement parameters of magnetic storm related to distance from origin in polar regions

05 p0841 A70-16737

Oscillations intervals with diminishing period during magnetic storms, noting relationship to midlatitude disturbances in F region

05 p0842 A70-16746

Magnetic storm /14 September 1966/ observation by Explorer 33 in geomagnetic tail and by polar stations, studying relation in magnetosphere and on earth

05 p0843 A70-16764

Solar asymmetries associated with sun motion toward apex related to formation of N-S asymmetries of geomagnetic storms

06 p1144 A70-18011

Three dimensional model current system with magnetospheric and ionospheric sections connected by currents flowing along geomagnetic field lines proposed for polar magnetic substorms

06 p1059 A70-18535

Temporal behavior of energetic particle precipitation during auroral substorm, discussing electron energy spectra and pitch angle distributions

06 p1059 A70-18536

Geomagnetic tail natural oscillations, studying magnetospheric substorms role

07 p1268 A70-19499

Ionospheric radio wave /auroral/ absorption during substorm investigated for longitudinal and latitudinal variations by multistation riometer measurements, inferring electron precipitation characteristics

07 p1269 A70-20030

Magnetic storms effect on cosmic ray neutron component diurnal variation, determining amplitudes and phases of harmonics by harmonic analysis

07 p1372 A70-20341

Geomagnetic storms data compilation /1957-1964/, showing solar activity effect on solar corpuscular stream velocity

07 p1373 A70-20436

Magnetic field variation rates characteristics during magnetic storms investigated for longitudinal dependence and influence of equatorial electric current

07 p1276 A70-20437

Gokhberg magnetovariational sounding method for single location analysis of magnetic storms early phases, comparing ground station network observations

07 p1277 A70-20440

Low energy proton distributions in interplanetary medium, correlating intensities with main-phase geomagnetic storm development

08 p1562 A70-21376

Hydromagnetic emissions in high latitudes relationship to storm sudden commencements

08 p1491 A70-21715

Chapman-Vestine and Birkeland-Alfven electric current systems equivalence in ground geomagnetic effect explained for polar magnetic storms

08 p1491 A70-21719

Extraterrestrial ring current proton intensities asymmetric increases in outer radiation belt during magnetic storms

09 p1747 A70-23490

Neutral and ionized atmosphere parameter variations and circulation during magnetic storms observed at various heights

10 p1873 A70-24310

Two phase process for electron precipitation during polar substorm observed from balloon measurements of X rays produced by precipitated electrons in atmosphere

10 p1932 A70-24490

Magnetospheric substorms magnetograms taken at various stations, showing preceding ring storm particles deflection into magnetic tail

10 p1876 A70-24496

Aurorae and magnetic storms theory, considering ion production, motions and interactions

11 p2044 A70-25621

Geomagnetic damped type pulsations associated with storms interpreted as interaction between hydromagnetic oscillations and magnetospheric motions caused by solar wind

11 p2047 A70-26567

Corpuscular radiation intensity measurements in upper atmosphere at midlatitudes by meteorological probe during geomagnetic storm, noting radio wave absorption

11 p2106 A70-26797

Quasi-sinusoidal fluctuations of magnetic field during geomagnetic storms measured by ATS 1 in synchronous equatorial orbit

12 p2223 A70-27192

Adiabatic drawing of quasi-captured charged particles by geomagnetic trap field during phase recovery period of magnetic storm

12 p2295 A70-28258

Delayed ionization effects in midlatitude nighttime ionosphere after geomagnetic storms, noting time lag vertical distribution

12 p2277 A70-28365

Simultaneous magnetic, photometric and backscatter radio measurement of auroral and ionospheric echoes during geomagnetic storm, confirming electrojet theory

13 p2392 A70-28575

Plasmapause and polar wind, considering density discontinuity due to outer magnetosphere heating during magnetic storms

13 p2491 A70-29059

Visual aurora properties attributed to magnetic storm following solar flare, using multiple channel photometer measurements

13 p2478 A70-29231

Auroral electron precipitation and ground based magnetic field pulsations correlation for magnetic storms inception

13 p2401 A70-30053

Magnetotail plasma sheet temporal variations during substorms and plasma pressure as related to dynamic pressure of solar wind from Vela satellites observation

13 p2480 A70-30061

Trapped and polar proton and electron flux observations during 9 June 1968 magnetic storm

13 p2482 A70-30072

Geomagnetic field distant fluctuations during substorm from ATS 1 magnetometer data on abrupt recoveries of H component

13 p2482 A70-30077

Van Allen radiation belts energetic electrons injection and distribution due to magnetic storms, using satellite-borne spectrometers

13 p2483 A70-30090

High energy proton flux variations in inner belt during solar cycle and magnetic storm, using satellite and balloon measurements

13 p2483 A70-30091

Polar storm simultaneous onset and development, using observational data for geomagnetic field and aurorae

14 p2570 A70-30214

Geomagnetic storm intensity nonuniform relationship to 27 day and 11 year cycles

14 p2571 A70-30240

Aurora band theory based on three dimensional current system during magnetic substorms, discussing field aligned sheet current instability

14 p2573 A70-30671

Magnetic storms frequency and levels coincidence with solar activity variations

14 p2575 A70-30818

Nightglow OI lambda 6300 line width measurements during magnetic storm, discussing temperatures and intensity variations

14 p2579 A70-31250

Upper atmospheric short lived disturbances connected with geomagnetic storms characterized by determining equivalent duration (D) value

15 p2723 A70-31651

Polar substorm activity associated with magnetopause position variation, using Imp 2 satellite observations

15 p2728 A70-31911

Terrestrial magnetosphere dynamics in magnetospheric disturbances, analyzing solar wind-geomagnetic field interaction and storm development

15 p2729 A70-32080

Equatorial atmospheric density during geomagnetic storm and quiet days by satellite observation

15 p2811 A70-32284

Magnetosphere survey, including solar wind flow theory, observational techniques, radiation belt theory, magnetic storms, etc

15 p2732 A70-32544

Geomagnetic tail natural oscillations, studying magnetospheric substorms role

15 p2732 A70-32744

Pi 2 pulsation power spectra change with magnetospheric substorm development, relating pulsations and electron precipitation

17 p3080 A70-35641

F2 region disturbance development during magnetic storm, discussing layer height increases

17 p3080 A70-35772

Magnetic storms development via initial asymmetric inflation of evening magnetosphere, using Explorer 26 and ground observatory data

18 p3311 A70-36008

Magnetospheric plasmapause duskside bulge dynamic behavior during substorms, using whistler data

18 p3312 A70-36013

Large amplitude irregular magnetic fluctuations during expansion phase of magnetic substorms, using ATS 1 observations

18 p3312 A70-36025

Auroral protons and resonant concept of substorm, eliminating discrepancy between hydrogen emission spectroscopic and direct measurements

18 p3307 A70-36177

Electron concentration disturbances in outer ionosphere and F 2 maximum on daylight side during magnetic storm

19 p3408 A70-37307

Geomagnetic storms at ATS 1 in 1967, discussing storm-time disturbance field and associated pulsations

19 p3410 A70-37488

Interplanetary plasma observations by Vela satellites in solar wind and plasma sheet of magnetotail during magnetic storm

19 p3410 A70-37490

Polar cap absorption correlation with solar protons flux into magnetosphere, discussing diurnal and spatial variations and magnetic storm effects

19 p3411 A70-37492

Auroral substorm temporal relationship to particle kinetic energy increases within trapping region, observing geomagnetic field distortions at higher latitudes during disturbed epochs

19 p3411 A70-37494

Van Allen electrons acceleration and precipitation during magnetospheric substorms in relation to auroral processes, discussing energy and pitch angle diffusion processes

19 p3411 A70-37495

Polar electrojet and VHF auroral radio wave backscattering correlation, discussing geomagnetic disturbances effect

19 p3376 A70-37498

Traveling horizontal ionospheric waves relationship to magnetic storm onset, showing ionization displacement occurrence

19 p3413 A70-38029

Earth EM field short period pulsations distribution within magnetic storms

19 p3416 A70-38585

Auroral photographic and visual observations, discussing satellite results and substorm development

19 p3417 A70-38730

Cosmic rays cutoff rigidity variations during magnetic storms, investigating flux increase due to current flow along parallel lines on magnetic shell surface

20 p3698 A70-39300

Geomagnetic fluctuations relationship to magnetospheric ring current and plasmapause during magnetic storm

20 p3619 A70-39328

Whistler VLF radio observations of sudden magnetic impulses in plasmasphere during storms, using ground based magnetometers

20 p3620 A70-39330

Seasonally biased electron density enhancements in nighttime response of topside ionosphere to magnetic storms

20 p3621 A70-39342

Soviet book on geomagnetic storms 27-day recurrence as function of intensity and onset characteristics, establishing forecasting indices

20 p3623 A70-39897

Ionospheric electron density response to geomagnetic storms at midlatitudes, noting diurnal variations detected by ATS 3 VHF signals

20 p3623 A70-40479

High latitude F region irregularity structure during magnetic storm from multistation scintillation observations of ATS 3 transmission

20 p3624 A70-40490

Electron precipitation at geomagnetic storm sudden commencement in auroral zone from X ray balloon observations

21 p3814 A70-40937

Midlatitude F region electron and ion temperatures during magnetic storms, examining Thomson scattering, density and time dependence

21 p3817 A70-41094

F region heating by magnetic storms, discussing electron temperature, ring current conduction and red arcs

21 p3817 A70-41095

Magnetotail magnetic field perturbations associated with polar magnetic substorms, using IMP-A and B satellite observations

21 p3882 A70-41720

Substorm aspects of magnetic pulsations, discussing classification, micropulsations, generation and propagation effects

22 p4019 A70-43145

F region electron density measurement during magnetic storm by incoherent scatter technique

22 p4019 A70-43157

Magnetospheric and magnetic storms correlated to solar wind energy penetration, noting roles of energetic plasma and magnetospheric low energy plasma convection

22 p4022 A70-43287

Magnetosphere storm diagnostics from geomagnetic, auroral and airglow parameters, discussing calibration via satellite observations

22 p4022 A70-43289

Solar and geomagnetic events for maximum solar activity year 1968, correlating magnetic storms
22 p4022 A70-43290

Lower ionosphere ionization anomalies, discussing sunrise seasonal change effects in VLF-LF propagation, winter radio wave absorption and geomagnetic storm after-effects
22 p4024 A70-43311

Outer zone electrons radial diffusion coefficients and lifetimes determined as functions of magnetic shell parameter, based on satellite measurement following geomagnetic storm
23 p4236 A70-43831

Threshold rigidity decrease during 23-24 March 1969 magnetic storm, analyzing neutron multiplicity spectrum
23 p4186 A70-43846

Electron precipitation latitude extent and drift rate magnetospheric substorms from ESSA riometer data
23 p4186 A70-43850

Magnetospheric substorms model modification for growth phase inclusion prior to explosive expansion phase
23 p4186 A70-43853

Solar wind electric field relation to ground magnetic disturbances during magnetic storm from Explorer 28 and ground data
23 p4188 A70-44062

Solar flare effects in ionosphere observed at Lindau, collating with heavy geomagnetic storm
23 p4237 A70-44876

Polar storm simultaneous onset and development, using observational data for geomagnetic field and aurorae
24 p4331 A70-46289

Geomagnetic storm intensity nonuniform relationship to 27 day and 11 year cycles
24 p4332 A70-46315

MAGNETIC SURVEYS

Earth satellites magnetic survey contributions to World Magnetic Survey project (WMS/), discussing international reference standards and magnetic mapping
01 p0075 A70-10595

Secular variations distribution on earth surface, plotting isopore charts from mean annual values of magnetic elements /1960-1965/
01 p0083 A70-11540

Earth magnetic field transition recorded in basaltic lavas in southeastern Oregon
07 p1276 A70-20351

Geomagnetic variations dominant polarization direction seasonal dependence based on magnetotelluric field observations, discussing micropulsations and LF cases
11 p2044 A70-25557

Magnetic induction sensors sensitivity for magnetotelluric surveying in geophysics
13 p2415 A70-30048

Energetic particles measurements in geomagnetic tail by Explorer 33/35 for determining gross magnetic topology of distant tail and electric fields
13 p2481 A70-30070

Geomagnetic variations dominant polarization direction seasonal dependence based on magnetotelluric field observations, discussing micropulsations and LF cases
21 p3820 A70-41307

Geomagnetic field behavior prediction based on extrapolation of magnetic data collected by observatories and dipole model approximation
23 p4189 A70-44068

MAGNETIC SUSCEPTIBILITY

U MAGNETIC PERMEABILITY

MAGNETIC SUSPENSION

Liquid metal MHD, discussing conduction/induction MHD devices, measurement gages and devices for suspending liquid metal by magnetic force
04 p0724 A70-14527

Magnetic suspension and guidance of high speed vehicles realized via magnetic field interaction of vehicle-mounted superconducting magnets with eddy currents
08 p1543 A70-20576

Rotating shaft vibrations on assembly designed to balance rotor in magnetic field, eliminating bearings effect on shaft to determine internal friction
08 p1584 A70-20697

Electromagnetically suspended bearing equivalent to elastic vinculum with limit on linear displacement, relating weight, power consumption, maximum force, etc
09 p1690 A70-22421

Electromagnetic single-coil suspension for cryogenic gyroscope with superconducting sphere rotor, calculating suspension force characteristics
12 p2234 A70-27565

Materials and noncontacting design for 50,000 hour lifetime electromechanical components, noting magnetically suspended motor
17 p3100 A70-34754

MAGNETIC SWITCHING

Mn-Bi films Curie point switching with laser, measuring magnetization dependence via magneto-optic effect
[IEEE PAPER 9.3]
05 p0893 A70-16997

MAGNETIC TAPE RECORDERS

U MAGNETIC RECORDING

U TAPE RECORDERS

MAGNETIC TAPES

Linear superposition /LSP/ of isolated pulses in tape recording, discussing validity for multibit waveform synthesis
11 p2057 A70-26627

Flight loads data extraction and analysis from damaged magnetic tapes after aircraft crash
17 p3094 A70-35518

Digital computer magnetic tape recording system for flight tests of Jaguar aircraft, discussing data treatment
19 p3384 A70-38537

Magnetic tape instrumentation system installed aboard Hawker Siddeley Harrier for flight development, discussing digital format recording system
19 p3384 A70-38549

Signal modulation by pulse ratio variation in magnetic tape channel, discussing SNR characteristics
20 p3586 A70-39707

Pulse ratio modulation analysis based on information theory, emphasizing magnetic tape channel capacity optimal utilization in signal transmission
20 p3586 A70-39708

Permalloy tapes uncertainty in magnetization process, discussing Barkhausen discontinuities measurement method
20 p3673 A70-40058

MAGNETIC TRAPS

U PLASMA CONTROL

MAGNETIC VARIATIONS

NT GEOMAGNETIC MICROPULSATIONS

NT GEOMAGNETIC PULSATIONS

NT NOCTURNAL VARIATIONS

Lunar diurnal variation parameters at Irkutsk determined from IGY data concerning geometric field components
01 p0083 A70-11538

Secular variations distribution on earth surface, plotting isopore charts from mean annual values of magnetic elements /1960-1965/
01 p0083 A70-11540

Multipole analysis for earth magnetic field allowing secular variation to be illustrated by time trends in multipole parameters
02 p0288 A70-11742

Cosmic ray flux modulation in earth atmosphere produced by solar wind and geomagnetic variations, considering effects on atmospheric carbon 14 variations
04 p0680 A70-15114

Interplanetary magnetic field fluctuations stimulated by lunar wake, using Explorer 35 satellite measurements
04 p0753 A70-15122

Variational analysis of low latitude magnetic sounding data to determine structural differences between various earth mantle regions, noting additional observations required
04 p0682 A70-15735

Evening time latitudinal distribution of polar magnetic field perturbations compared with nighttime distribution, indicating evening electrojets
04 p0684 A70-15751

Magnetic field fluctuations of interplanetary plasma, considering anisotropic temperature instabilities
05 p0915 A70-16750

Magnetsensitive quartz element with suspended magnet and two mirrors for recording magnetic variations
05 p0851 A70-16770

Human susceptibility to weak fluctuations in geomagnetic field intensity, showing frequency range
05 p0809 A70-16861

Geomagnetic field variations represented by optimal electric current loops or dipoles, noting advantages over spherical polynomials
07 p1266 A70-19442

Radar measurements of magnetic dip in E region compared with surface values and spherical harmonic models for dip angles
07 p1271 A70-20163

Magnetic field variation rates characteristics during magnetic storms investigated for longitudinal dependence and influence of equatorial electric current
07 p1276 A70-20437

Geomagnetic field total vector modulus secular variations from airborne measurements
07 p1278 A70-20461

Vertical gradient of total geomagnetic field using curves based on continuous records of magnetic variations
10 p1876 A70-24589

Geomagnetic variations dominant polarization direction seasonal dependence based on magnetotelluric field observations, discussing micropulsations and LF cases
11 p2044 A70-25557

Semiannual variation of geomagnetic activity related to incident solar wind, considering Mariner 2 measurements
13 p2475 A70-28573

Geomagnetic tail structure and magnetic field fluctuations from IMP 3 satellite measurements, showing enhancement during/after SSC and sudden impulses /SI/
13 p2396 A70-29182

Sunspot electric current density accounting for magnetic field abrupt reversal
13 p2496 A70-29848

Magnetic moment fluctuations of arbitrary solid body by fluctuation-dissipation theorem for thermal equilibrium
13 p2454 A70-30033

Digital recording of geomagnetic field variations, using IBM or international telex code for radio transmission
13 p2415 A70-30043

Stability requirements for precision magnetic field measurements on ground and in space, discussing magnetic balances and fluxgate magnetometers for geomagnetic variations and spacecraft attitude
13 p2415 A70-30050

Horizontal geomagnetic force variations, considering ionospheric wind effects on ions in transition layer
13 p2402 A70-30057

Plasmapause position and density profile from ion concentration measurements byOGO-5, determining reaction to magnetic variations
13 p2482 A70-30074

Geomagnetic field distortion in high beta magnetospheric regions fromOGO observations for quiet and slightly disturbed conditions
13 p2402 A70-30076

Geomagnetic field distant fluctuations during substorm from ATS 1 magnetometer data on abrupt recoveries of H component
13 p2482 A70-30077

Magnetic fluctuations observed by ground observatories, suggesting large amplitude waves as field line resonances driven by magnetopause motion
13 p2402 A70-30078

Interplanetary magnetic field flux relationship to Kp index of magnetic activity
14 p2570 A70-30221

Geomagnetic short period oscillations occurrence frequency during IQSY, discussing dependence on magnetic activity and time of day
14 p2572 A70-30242

Errors magnitude in quartz variometer readings resulting from variations of geomagnetic field perpendicular component
14 p2582 A70-30244

Variational analysis of low latitude magnetic sounding data to determine structural differences between various earth mantle regions, noting additional observations required
14 p2575 A70-30819

Evening time latitudinal distribution of polar magnetic field perturbations compared with nighttime distribution, indicating evening electrojets
14 p2576 A70-30835

M31 continuum radio emission produced by magnetic field aligned along arms, discussing field turbulence effects
14 p2642 A70-30891

Magnetic activity intensity comparison in Northern and Southern hemispheres, noting correlation with solstices and equinoxes
14 p2580 A70-31260

Polar ionospheric electron/ion density measurements by ESRO 1 satellite, observing dependence on Kp index
15 p2724 A70-31669

Geomagnetic conjugacy variations observed via riometry in Northern and Southern Hemispheres
16 p2897 A70-33792

Magnetic perturbation effects on magnetosheath plasma, considering Boltzmann transport equation, plasma-electromagnetic interactions, heating, cooling, etc
17 p3142 A70-35592

Large amplitude irregular magnetic fluctuations during expansion phase of magnetic substorms, using ATS 1 observations
18 p3312 A70-36025

Geomagnetic latitudinal variations in Sq/H/ and Sq/Z/ in equatorial region, using electric simulation
18 p3246 A70-36099

Geomagnetic field variations represented by optimal electric current loops or dipoles, noting advantages over spherical polynomials
18 p3249 A70-36916

Geomagnetic activity relation to large scale variations in interplanetary magnetic field and solar wind deformation velocity, using satellite and space probe observations
19 p3491 A70-37304

Geomagnetic field variations recording by two variometers, correcting for variation components effects by instruments orientation
19 p3420 A70-37335

Quartz magnetic variometer allowing simultaneous recording of magnetic field variations and suspension axis inclination changes
19 p3420 A70-37336

- Magnetic field variations and structures in interplanetary space relationship to sun, discussing photospheric field lines random walk transport
19 p3494 A70-37480
- Magnetic and electric field changes across earth bow shock and magnetosheath, discussing Pioneer 8 and OGO-5 data
19 p3494 A70-37483
- Semiannual oscillation and fine structure of earth magnetic field horizontal intensity during March and September
19 p3413 A70-38004
- H sub 500 field features during natural synoptic seasons in Northern Hemisphere, including circulation characteristics
20 p3663 A70-39271
- Geomagnetic variations dominant polarization direction seasonal dependence based on magnetotelluric field observations, discussing micropulsations and LF cases
21 p3820 A70-41307
- Spherical harmonic analysis of declination and secular geomagnetic variation
21 p3820 A70-41884
- Magnetoplasma density modulation from LF and amplitude magnetic perturbations, using collisionless Boltzmann transport equation
22 p4082 A70-43255
- Geomagnetic daily variations analysis in terms of universal time components, considering solar wind-magnetosphere interactions, auroral zone effects, etc.
22 p4021 A70-43278
- Interplanetary magnetic field directional variation effect on polar caps geomagnetic field, discussing polarity reversals
22 p4022 A70-43285
- Geomagnetic variations origin from satellite space probe data, correlating DP 1 activities to interplanetary magnetic field variations
22 p4022 A70-43286
- Electromagnetic variational soundings of ocean floor earth crust upper mantle near magnetic equator
23 p4189 A70-44066
- High latitude geomagnetic secular variations determination by running 12-month means method, recommending data acquisition free of external sources effect
23 p4190 A70-44087
- Auroral electrojet return current spatial extent from model ionospheric current distribution and geomagnetic variations
23 p4192 A70-44922
- Geomagnetic activity dependence on angle between earth-sun and hourly averaged vectors of interplanetary magnetic field
24 p4405 A70-45523
- Interplanetary magnetic field flux relationship to Kp index of magnetic activity
24 p4331 A70-46296
- Geomagnetic short period oscillations occurrence frequency during IQSY, discussing dependence on magnetic activity and time of day
24 p4332 A70-46317
- Errors magnitude in quartz variometer readings resulting from variations of geomagnetic field perpendicular component
24 p4339 A70-46319
- MAGNETICALLY TRAPPED PARTICLES**
NT ARTIFICIAL RADIATION BELTS
NT INNER RADIATION BELT
NT OUTER RADIATION BELT
NT PROTON BELTS
NT RADIATION BELTS
- Energy spectrum time dependence of solar cosmic ray event of 28 January 1967 measured in Northern Hemisphere, discussing particle diffusion and magnetic trap
05 p0902 A70-16459
- Corpuscular radiation distribution function with trapped particles maximum density fixed in equatorial plane and reflection points vicinity of magnetic force line
06 p1135 A70-17894
- Transverse particle and energy fluxes in toroidal magnetic traps magnetic fields with ionized plasmas, discussing particle diffusion coefficient and thermal conductivity
08 p1554 A70-21807
- Proton injection into radiation belt, comparing solar neutron decay (SND) and cosmic ray albedo neutron decay (CRAND) as proton sources
09 p1746 A70-23489
- Gyrosynchrotron emission from nonthermal electrons trapped in magnetic dipole field to interpret center-to-limb spectrum and polarization variations of microwave impulsive bursts
12 p2294 A70-27709
- Adiabatic drawing of quasi-captured charged particles by geomagnetic trap field during phase recovery period of magnetic storm
12 p2295 A70-28258
- Energy spectrum and equatorial pitch angle distribution of charged particles trapped in magnetosphere resulting from inward diffusion due to third adiabatic invariant violation
13 p2476 A70-28942
- Satellite observation of alpha particles trapped geomagnetically in radiation belts, including Injun 5 results
13 p2484 A70-30092
- Book on geomagnetic micropulsations covering dynamic processes of magnetically trapped particles and micropulsations usability in remote sensing of magnetosphere
14 p2581 A70-31325
- Plasma containment in adiabatic magnetic traps, discussing particles, Coulomb collisions, instabilities, cyclotron resonance masers, Van Allen belts, etc.
16 p2958 A70-33232
- LF oscillations of bounded low pressure plasma under magnetic field in discharge chamber, determining spatial distribution by Langmuir sliding probes
16 p2958 A70-33254
- Auroral substorm temporal relationship to particle kinetic energy increases within trapping region, observing geomagnetic field distortions at higher latitudes during disturbed epochs
19 p3411 A70-37494
- LF oscillations of bounded low pressure plasma under magnetic field in discharge chamber, determining spatial distribution by Langmuir sliding probes
23 p4226 A70-44283
- MAGNETITE**
Metal-semiconductor transition in magnetite described on band model with electrons breaking symmetry by ordering in self induced Coulomb potential
12 p2283 A70-27239
- Stable colloidal dispersions of subdomain magnetite particles correlated for magnetic properties in terms of size distribution and volumetric concentration by superparamagnetic theory
12 p2284 A70-27241
- Lamellae stresses and magnetostrictive effects on magnetic properties of titanomagnetite and ilmenohematite series minerals
15 p2728 A70-31993
- Magnetite and ferrite spinels Hall effect, magnetoresistance and electrical conductivity over wide temperature range
19 p3485 A70-37627
- MAGNETIZATION**
Surface interactions in incompressible dynamics and stability of ferrofluid with nonlinear magnetization properties
04 p0665 A70-14451
- Generalized Watson sums evaluation without series expansions or extensive computer summations, calculating magnetization of anisotropic Heisenberg ferromagnet for cubic, bcc and fcc lattices
04 p0730 A70-14689
- Normal and bottle-green microtektite glass measured for magnetic susceptibility, magnetization and Curie constants
05 p0916 A70-16839
- Mn-Bi films Curie point switching with laser, measuring magnetization dependence via magneto-optic effect
05 p0893 A70-16997
- Forward angle microwave scattering by plasma covered magnetized metallic sphere, calculating radial electron density distribution
06 p1008 A70-17576
- Magnon energy theory for temperature dependence of ferrous and magnesium fluorides antiferromagnetic resonance frequency, sublattice magnetization and magnetic specific heat
09 p1739 A70-22324
- Gravity and vertical magnetic anomalies interpretation to infer magnetization direction
09 p1729 A70-23601
- Nonlinear spin wave theory for anisotropic antiferromagnetism, solving sublattice magnetization by thermodynamic Green function for temperature dependence
11 p2097 A70-25617
- Narrow Curie point switching transfer in Mn-Bi films by controlling magnetization direction within preselected areas
11 p2098 A70-26069
- Ni-Fe thin films flux reversal with transverse bias field from dynamic magnetization configuration photographs
12 p2284 A70-27242
- Ferrites as harmonic generators, discussing physical reasons for generation of double frequency magnetization
14 p2549 A70-30439
- Uniform bulk magnetization concept in superparamagnets related to physical statistics of magnetic first order phase transitions
15 p2785 A70-32400
- Microwave properties of uniformly magnetized slabs filling cross section of rectangular lossless waveguide operating in specific modes
17 p3050 A70-34584
- Magnetization oscillation in single crystal yttrium-iron garnet under fluctuating SHF magnetic field
19 p3484 A70-37625
- Micromagnetic theory of ferromagnets based on vector magnetization as continuous function of position, discussing free energy
19 p3471 A70-37953
- Permalloy tapes uncertainty in magnetization process, discussing Barkhausen discontinuities measurement method
20 p3673 A70-40058
- Lunar rocks magnetic properties and natural remanent magnetization, examining pyroxene paramagnetism, ferrosilite and ilmenite antiferromagnetism and native iron ferromagnetism
21 p3917 A70-41671
- MAGNETO-OPTICS**
Faraday modulator for polarized laser radiation, eliminating analyzer by oblique magneto-optical active element, converting angular modulation into amplitude modulation
05 p0858 A70-16251
- Mn-Bi films Curie point switching with laser, measuring magnetization dependence via magneto-optic effect
05 p0893 A70-16997
- Free current carriers activity in indirect magneto-optical junctions in quantized magnetic field
06 p1126 A70-17817
- Magnetic display devices covering magneto-optical displays, magnetic-electrostatic technique combinations and ferromagnetography
08 p1499 A70-21685
- Coulomb interaction during optical transitions between Landau subbands of Ge semiconductor valence and conduction bands in magnetic field, observing diamagnetic excitons
10 p1928 A70-25029
- Magneto-optical birefringence anisotropy and light propagation in terbium ferrite garnet in presence of Faraday and Cotton-Mouton effects
11 p2097 A70-25377
- Quenched MnBi thin films measured for magnetic, magneto-optical and optical properties, noting Faraday rotation
12 p2284 A70-27246
- Magneto-optics of semiconductors, taking into account intraband and interband effects with Faraday and Voigt field configurations
18 p3297 A70-35951
- Magneto-optic rotation and hysteresis recording instrument for thin magnetic films as function of temperature and wavelength, using Faraday effect
21 p3826 A70-41452
- MAGNETOACOUSTIC WAVES**
Plasma stability in uniform magnetic and HF electric fields, observing magnetoacoustic wave generation at electron cyclotron frequency greater than HF field frequency
03 p0532 A70-13523
- Thermal radiation effects on plane magnetoacoustic waves in semiinfinite expanse of radiating gas of perfect electrical conductivity

- Umbral flash as magnetoacoustic wave, examining Ca II K line variations formation during adiabatic compression
21 p3885 A70-40958
- Earth magnetosphere LF wave annular trap, examining high energy particle interaction with magnetosonic waves
22 p4013 A70-42300

Magnetoacoustic waves in MHD channels, investigating excitation, damping and effects on mean current density and Hall field strength 22 p4081 A70-42822

Helicon /magnetoacoustic waves/ effect on plasma instabilities, examining HF field amplitudes and magnetic fields 22 p4084 A70-43475

MAGNETOACOUSTICS

Ion-acoustic instability effect on HF EM field penetration into plasma taking into account nonlinear Ohm law 11 p2089 A70-25715

MAGNETOACTIVITY

NT MAGNETORESISTIVITY

Fourier and perturbation methods applied to radiation from uniformly moving charge in inhomogeneous magnetoactive medium, deriving expressions for radiation spectrum and energy losses 03 p0531 A70-13285

Electromagnetic finite amplitude wave beams self action in magnetoactive plasma, noting nonlinear characteristics 03 p0448 A70-13411

Thermal radiative transfer in nonuniform anisotropic magnetoactive plasma, correcting term of Zheleznyakov equation 09 p1734 A70-22514

Hydrodynamic equations to obtain transformation coefficient for HF weakly damped waves in magnetoactive plasma, applying to solar corona 13 p2463 A70-29227

Magnetomotive tools and power systems for maintenance, repair and assembly in space weightless environment 19 p3436 A70-37949

Permittivity tensor of weakly turbulent magnetoactive cold electron plasma, calculating nonlinear currents 20 p3677 A70-39296

MAGNETOELASTIC VIBRATIONS

U MAGNETOELASTIC WAVES

MAGNETOELASTIC WAVES

NT MAGNETOACOUSTIC WAVES

Magnetoelastic surface wave propagation properties in ferrites at UHF wavelengths, using numerical calculations for gallium-YIG 03 p0540 A70-13700

Solid state microwave acoustic variable delay devices for radar, fuses, repeaters, altimeters, etc, emphasizing magnetoelastic wave method 06 p1018 A70-17356

Microwave variable delay devices, discussing solid state microwave acoustic interactions 06 p1019 A70-17483

Magnetoelastic ferromagnet linear theory, considering spin-electric microwaves propagation in ferrimagnetic crystal subjected to pulsed magnetic fields 19 p3487 A70-37947

MAGNETOELASTICITY

U MAGNETOSTRICTION

MAGNETOELECTRIC MEDIA

Rectangular coaxial waveguide with internal conductor contained between inhomogeneous magneto-dielectric bars, deriving computer algorithm for natural mode fields 09 p1638 A70-23645

Magnetolectric electromotive force in media of ions and neutral molecules, using Boltzmann transport equation 21 p3855 A70-40909

MAGNETOHYDRODYNAMIC FLOW

Entrainment of electrically conducting liquid by moving wall in long duct with rectangular cross section and magnetic induction field 01 p0151 A70-10656

Three dimensional instability of perturbed conducting fluid laminar boundary layer flow on concave walls in transverse magnetic field, analyzing various Hartmann numbers 01 p0152 A70-10934

Power output, Joule dissociation and generator efficiency determined for rectangular MHD channel, considering transverse and longitudinal edge effects 01 p0152 A70-10992

MHD boundary layers in transverse magnetic field with low Reynolds number, investigating suppression of separation with emphasis on behavior near rear stagnation point 01 p0152 A70-11095

MHD entrance region compressible flow characteristics, determining velocity pressure and temperature distributions, friction and heat transfer coefficients, etc 01 p0067 A70-11136

Incompressible viscous fluid flow in contact with infinite plate and rotating in perpendicular magnetic field, obtaining flow characteristics by Laplace transform 01 p0067 A70-11138

Interplanetary plasma flow simulation around earth magnetosphere and planets not considering initial conditions influence 01 p0172 A70-11488

Dipole magnetosphere model with cylindrical or spherical forbidden band for studying plasma motion in quasi-hydrodynamic approximation 01 p0082 A70-11521

Planetary atmospheres dynamics, discussing rotational and MHD effects, energy sources, etc 02 p0366 A70-11806

Mesothermal flow of collisionless plasma around conducting cylinder, calculating densities, velocities, temperatures and electrical potential [ONERA-TP-769] 02 p0346 A70-12102

Inertia effects on pressure distribution, load capacity and frictional torque in MHD hydrostatic thrust bearing lubrication flow 02 p0307 A70-12162

Steady axially symmetric MHD flow of inviscid incompressible fluid of small conductivity in strong magnetic field past fixed axisymmetric bodies 02 p0347 A70-12234

Cylindrical axial plasma flow fields velocity radial dependence measurement by double-wedge spectroscopy using Abel unfolding of Doppler shifts 02 p0349 A70-12657

Plasma velocity, electron temperature and density and ion density determined by two mutually perpendicular probes 03 p0529 A70-12940

Standing bow shock in plasma flow into dipole magnetic field, measuring particle density, electron temperature, magnetic field flux and oscillations 03 p0530 A70-13158

Nuclear fusion reactions by focused Q switched Nd doped laser beam on deuterium target, discussing neutrons from flowing plasma, electron temperature and counter experiments 03 p0501 A70-13684

Graphite sphere mass erosion in low temperature hypersonic air plasma shock flow, determining breakdown temperature and mass entrainment rates 03 p0517 A70-13741

MGD finite flow regions surrounded by nonconducting gas, considering wave behavior at boundary of conducting region and magnetic field influence 03 p0533 A70-13803

Carrying capacity and moment of friction calculated for cylindrical MHD bearing for small magnitude of radial clearance 03 p0497 A70-13877

Equilibrium model of laminar arc constrictor plasma generator, correlating heat transfer, wall shear stress, friction factor and development length 03 p0533 A70-13952

MHD laminar flow between parallel porous disks for large suction Reynolds number, solving equations of motion with singular perturbation technique 03 p0469 A70-14181

MHD boundary layer separation near rear stagnation point with magnetic field normal to wall solved by series expansion, calculating skin friction by numerical quadratures 03 p0469 A70-14182

Hall current effect on steady boundary layer flow of incompressible viscous electrically conducting fluid past semiinfinite flat plate in transverse magnetic field 03 p0469 A70-14183

Martin method for reducing determination of steady plane MHD flow to Bernoulli and direct functions satisfying quasi-linear partial differential equations 03 p0533 A70-14200

Unsteady MHD flow of viscous incompressible electrically conducting fluid through rectangular duct under transverse magnetic field 03 p0471 A70-14333

Heat transfer in steady state flow of electrically conducting incompressible viscous fluid in annular channel between coaxial circular cylinders under magnetic field 03 p0608 A70-14335

Faraday type open circuit MPD generator model obtained with allowance for temperature and pressure losses and gas transport properties dependence on static parameters 04 p0725 A70-14530

MHD flow velocity and current density distributions in annular duct with radial magnetic field 04 p0725 A70-14531

Electron temperature and particle density measurements in annular MHD duct, demonstrating Hall effect existence 04 p0725 A70-14532

Striated plasma flow in MHD duct of conducting rings using Ar with K vapor detected by high speed camera 04 p0725 A70-14533

Plasma unsteady one dimensional flow behind shock wave front in shock tube MGD channel, deriving differential gas dynamics equations 04 p0726 A70-14540

Conducting fluid laminar flow between parallel planes in traveling magnetic field, integrating Maxwell and Navier-Stokes equations 04 p0726 A70-14542

Transverse magnetic fields effects on velocity perturbations and vortices behind circular cylinder in electrolyte flow at various Reynolds and Stewart numbers 04 p0726 A70-14543

Conducting fluid as MHD lubricant for cylindrical bearings, deriving equations for ideally conducting shaft and bearing and arbitrary Reynolds numbers 04 p0697 A70-14544

Incompressible electrically conducting fluid flow along rectangular duct under transverse magnetic field, noting equivalency of Hunt solutions and thin wall restriction 04 p0726 A70-14614

MHD Stokes flow for magnetized bodies of revolution, rotating with steady motion in viscous conducting fluid at rest at infinity 04 p0726 A70-14615

Finite difference theory applied to numerical analysis of laminar equilibrium MHD flow in circular tube [ASME PAPER 69-WA/HT-55] 04 p0727 A70-14794

Heat transfer in partially ionized argon plasma flowing in water cooled circular tube as function of temperature, Reynolds number and tube entrance diameters [ASME PAPER 69-WA/HT-54] 04 p0780 A70-14795

Heat transfer rates to stagnation point of hemisphere in supersonic high enthalpy low density nitrogen plasma flow [ASME PAPER 69-WA/HT-49] 04 p0614 A70-14799

Inertia effects due to circumferential and radial velocity in MHD hydrostatic thrust bearing in axial magnetic field [ASME PAPER 69-LUB-F] 04 p0698 A70-14871

Aligned electric current effect on drag of sphere with arbitrary conductivity moving in current carrying fluid 04 p0671 A70-14993

Static pressure distributions and velocity profiles for Hg flow through circular pipes in transverse magnetic field, studying laminar and turbulent flows 04 p0728 A70-15001

Hydromagnetic flow of viscous incompressible electrically conducting fluid near accelerated infinite porous flat plate with variable suction or injection 04 p0672 A70-15095

Steady, ambipolar, low and high speed plasma transport equations developed for terrestrial ionosphere, discussing boundary conditions for supersonic and subsonic flows 04 p0679 A70-15112

Rarefied ionospheric plasma flow around rockets and satellites, studying electric field effect on ion motion by kinetic equation and similarity law 04 p0680 A70-15188

Mixture Mach number defined for collisionless plasma flow about solid body by extending cold-ion theory [AIAA PAPER 69-78] 04 p0729 A70-15582

Suction influence on skin friction fluctuations of MHD flow along infinite flat wall using Navier-Stokes equations 05 p0886 A70-15787

Heat transfer in MHD Couette flow influenced by wall electrical conductances with suction 05 p0886 A70-15823

Steady MHD shear layer velocity profiles using hot film anemometry 05 p0887 A70-15924

Entrance length and pressure drop in MHD parallel plate channel flow using one parameter Pohlhausen method 05 p0887 A70-15978

Spin-up of electrically conducting fluid between infinite flat plates under axial magnetic field, considering Ekman-Hartmann boundary layer on single plate 05 p0832 A70-16017

Mercury plasma flow rate change effect on electron temperature and density in thermoelectric converter determined by spectroscopy 05 p0887 A70-16028

Incompressible boundary layer flow of conducting fluid on solid two dimensional and axisymmetric bodies under transverse magnetic field approximated by momentum method 06 p1031 A70-17199

Multiple electrode probe characteristics in rarefied plasma flow created by ion source, noting electrode potential role 06 p1064 A70-17886

Velocity, magnetic field and drag equations for steady incompressible viscous conducting fluid flow around spherical hollow shell 06 p1122 A70-17917

Single and double cylindrical Langmuir probe responses in highly expanded low density flowing Ar plasma [ALAA PAPER 70-85] 06 p1066 A70-18207

Interplanetary plasma flow past earth and planets simulation using kinetic equations 06 p1147 A70-18292

Collisionless ions trajectories in plasma flowing about cylindrical probe calculated to determine probe ion current, ion density distribution in field and potential distribution 06 p1122 A70-18294

Numerical analysis of rarefied plasma flow interaction with charged conducting bodies of various forms and dimensions 06 p1123 A70-18298

Current collected by cylindrical Langmuir probe immersed in rarefied collisionless plasma streaming with high velocity 06 p1124 A70-18307

Earth magnetosphere physics, considering solar plasma flow, ring currents, charged particles during magnetic storms, solar wind energy transfer, etc 06 p1060 A70-18552

Steady spherical plasma flow from sun analyzed by equations of solar corona hydrodynamic model 07 p1378 A70-19033

MHD free convection of electrically conducting fluid in strong cross field using perturbation technique, considering liquid metals and ionized gases 07 p1348 A70-19208

High electrical conductivity effects on alignment between magnetic field and flow velocity vector in two dimensional plasma flow 07 p1349 A70-19568

Molybdenum single crystals orientation effect on thermal resistance to argon plasma flow 07 p1309 A70-19614

Monograph on research by Japanese Institute of Plasma Physics covering theta pinch, plasma heating, flow, diagnostics, etc 07 p1350 A70-19843

Freezing-mixing model for predicting plasma jet flow reactor yield development from analyses of thermochemical equilibrium, chemical reaction freezing and turbulent mixing 07 p1351 A70-19893

Electrical conductivity variations effects in subsonic Hartmann plasma flow under transverse magnetic field in channel with cooled walls 07 p1352 A70-19986

Unsteady MHD flow at forward stagnation point analyzed for magnetic field effect on transient phenomena, using difference-differential numerical method 07 p1354 A70-20235

Incompressible conducting fluid MHD flow at infinite plane wall forward stagnation point, considering suction or injection effects 07 p1354 A70-20237

Plasma flow structure near frontal point in earth magnetosphere, using quasi-hydrodynamic two dimensional model to obtain power series solution 07 p1391 A70-20419

Proton concentrations, magnetic field strength and temperatures distribution in interplanetary plasma flows as function of latitudinal distance from center of active region 07 p1391 A70-20420

Steady pressure driven flow of conducting fluid through insulating circular pipe in transverse magnetic field 08 p1549 A70-20502

Electron density calculation for collisionless plasma flow around conducting cylindrical body, accounting for surface absorption and mean electron velocity [ONERA-TP-792] 08 p1550 A70-20595

Rarefied plasma flow past bodies, considering determination of aerodynamic coefficients, charged states, electric and magnetic fields and plasma parameters 08 p1432 A70-21087

MHD flow in rectangular duct with arbitrary conductivity via modified Fourier method, obtaining magnetic induction and current for various Hartmann numbers [ASME PAPER 69-WA/APM-17] 08 p1551 A70-21308

Thermal sheaths effect on cooled probes for stationary and flowing plasmas measurements at high pressure 08 p1497 A70-21528

Single fluid theory for plasma laminar flow in field-free region of circular tube, obtaining friction factor and Nusselt number correlations 08 p1552 A70-21585

Magnetic field and conducting walls effect on laminar steady MHD Couette flow of electrically conducting incompressible viscous rarefied gas in slip regime 08 p1553 A70-21764

Heat transfer in MHD channel flow of viscous incompressible rarefied gas with slip flow and temperature jump boundary conditions 08 p1554 A70-21769

Tensor conductivity, magnetic field and electric field effect on heat transfer in MHD channel flow, solving for temperature and Nusselt number 08 p1554 A70-21773

MHD flow between two parallel plates, noting pressure gradient and skin friction coefficient 08 p1554 A70-21774

Turbulent MHD channel flow velocity profiles and hydraulic resistance relations for various Reynolds numbers, using two layer model 09 p1658 A70-22175

Two dimensional radial flow of inviscid infinitely conducting compressible fluid under influence of magnetic field 09 p1735 A70-22757

Thermal properties associated with temperature gradients in He-K plasma, studying mass motions initiated by cold wall contact 09 p1735 A70-22844

Hall effect on MGD flow past axisymmetric body by studying incompressible inviscid flow past body of revolution at zero incidence 09 p1661 A70-23074

Magnetic field effect on free convection in laminar boundary layer formed by laminar flow of viscous conducting fluid along vertical wall 09 p1737 A70-23308

Argon plasma interaction with RF electromagnetic field using MGD model, noting plasma-field coupling and plasma temperature exhibition of skin effect 09 p1737 A70-23433

Boundary layer of MGD flow past axisymmetric insulator body analyzed to determine torque due to Hall effect 09 p1663 A70-23579

Sandwich plates stability in conducting compressible fluid flow under magnetic field 09 p1785 A70-23621

Asymptotic behavior in cold plasma model of magnetopause, describing boundary layer between plasma stream and vacuum magnetic field 10 p1921 A70-23835

Unsteady MHD flow in circular pipe with nonconductive walls under transverse magnetic field 10 p1921 A70-23959

Two dimensional MHD flow past solid body at large Reynolds numbers, treating boundary layer transition 10 p1922 A70-24011

Unsteady MHD flows of viscous, incompressible and electrically conducting fluid, proving boundary value problem solutions existence and uniqueness 10 p1922 A70-24095

Asymptotic method for aeromagnetic flutter of plane MGD nozzle, discussing conditions of MGD nozzle stability 10 p1800 A70-24129

Alfven flow of dissipative conducting incompressible fluids in presence of thin airfoil in magnetic field, considering flow turbulence calculation 10 p1922 A70-24143

MGD model of plasma with dissipation due to finite electrical conductivity described by differential equations 10 p1922 A70-24144

MHD boundary layer flow equations solution by initial value method to eliminate iteration process 10 p1924 A70-24563

MHD boundary layer on rotating body in viscous incompressible conducting fluid, studying magnetic field effects on time-to-separation 10 p1924 A70-24572

MHD exact solutions class, observing conducting flow intensification by magnetic field application 10 p1924 A70-24573

Navier-Stokes-Maxwell equations solutions for conducting fluid flow in azimuthal magnetic field, noting jet acceleration near symmetry axis 10 p1924 A70-24574

Rotating plasma in nonuniform magnetic field analyzed for interchange instability based on MHD fluid and charged particle treatments 10 p1924 A70-24800

Book on engineering aspects of MHD power generation, discussing working gas ionization and electrical conductivity, incompressible conducting fluid motion in magnetic field, etc 11 p1982 A70-25525

Inviscid incompressible conducting fluid flow past body in aligned magnetic field at low magnetic Reynolds number, discussing small perturbations evolution 11 p2041 A70-26623

Turbulent flowing plasma, analyzing wavenumber frequency dependent spectral function and space-time correlation function 11 p2096 A70-26768

Plasmopause form in equatorial plane in presence of magnetospheric tail subsonic potential convective flow 11 p2047 A70-26796

Velocity fluctuations measurements in conducting fluids flowing through tubes 12 p2230 A70-27091

Two dimensional viscous incompressible conducting fluid flow between parallel porous walls in magnetic field, studying skin friction fluctuations 12 p2209 A70-27157

Electromagnetic effects on separation of turbulent MHD boundary layers allowing for heat transfer 12 p2278 A70-27324

Lunar limb shock wave observed by Explorer 35 satellite defined with respect to solar wind flow direction, discussing formation mechanism 12 p302 A70-27594

Flow stability of electrically conducting inviscid fluid in coaxial cylindrical annular space under influence of axial magnetic field 12 p2210 A70-27799

Turbulence energy balance equations for conducting fluid flow in longitudinal magnetic field with Joule dissipation 12 p2282 A70-28227

Current density distributions in Ar-K plasma streams through channel with segmented electrode array, measuring electron temperatures 13 p2461 A70-28732

MHD boundary layer flow past yawed flat plate in presence of pressure gradient, determining skin friction expansion terms 13 p2461 A70-28804

Electric field in rectangular MHD channel with ideally conducting electrodes in uniform magnetic field, considering conditions for maximum channel effectiveness 13 p2461 A70-28966

Laminar MHD boundary layer equations at nonconducting surface, determining flow core parameters influence on boundary characteristics 13 p2462 A70-28967

Plane electromagnetic wave interaction with compressible plasma fluid moving with uniform velocity in vacuum, calculating reflection and transmission coefficients 13 p2462 A70-29101

Collisionless electrostatic shock generation conditions, simulating homogeneous counterstreaming plasmas by computer 13 p2462 A70-29110

Magnetopause model, discussing equilibrium layer between magnetic field and cold plasma field-free stream 13 p2396 A70-29181

Wind tunnel interference for inviscid compressible conducting fluid on slender body of revolution, discussing disturbance potential 13 p2464 A70-29449

Linearized steady plane axisymmetric flows of inviscid finitely conducting incompressible fluid past insulator under magnetic induction with zero components 13 p2464 A70-29541

Incompressible, viscous and electrically conducting fluid flow due to rotating disk in uniform magnetic field, discussing hydromagnetic interaction effect on velocity and friction 13 p2465 A70-29544

MHD pressure head variations in Hg flow in square channel with conducting and insulating walls under transverse magnetic field 13 p2465 A70-29838

Steady laminar heat transfer in open circuit aligned field MHD flow past flat plate, using parametric differentiation 14 p2664 A70-30272

Solar wind interaction with earth, moon, planets and comets, using hypersonic fluid analog involving shock wave interactions 14 p2631 A70-30360

Nonsteady coupled MHD Couette flow, presenting solution by Fourier series expansion method 14 p2621 A70-30549

Magnetoaerodynamic boundary layer of incompressible conducting fluid over right circular cylinder under magnetic field, showing flow separation 14 p2621 A70-30550

Streaming thermal plasma chemistry, reviewing diagnostic techniques and product oriented research 14 p2545 A70-30905

Velocity difference across viscous tail in MHD flow, demonstrating exponential decay 14 p2623 A70-30992

Nonstationary MHD Couette flow of viscous incompressible fluid between two parallel walls caused by instantaneous fluctuations of applied transverse magnetic field 15 p2777 A70-31479

Conducting incompressible fluid flow past sphere, examining effect on magnetic field for small magnetic Reynolds number 15 p2778 A70-31913

Uniform electric and magnetic fields effects on flow of conducting compressible fluid in channel, using multiple scales method 15 p2779 A70-31914

Conducting incompressible fluid laminar flow between rotating disks in transverse magnetic field with source at center 15 p2779 A70-31915

Hydromagnetic viscous flow of incompressible conducting fluid due to electric current radial divergence from point source

15 p2780 A70-32426

Baecklund transformations applications to hodograph equations for steady two dimensional nondissipative MGD flows with aligned velocity and magnetic fields

15 p2781 A70-32453

MHD experiments showing effects of local water supply electrical conductivity from measurements of voltage distribution, pressure gradients and extracted power

16 p2957 A70-32998

Unsteady hydromagnetic flow of viscous electrically conducting incompressible fluid due to rotating disk under perpendicular magnetic field

16 p2958 A70-33297

Baecklund type matrix transformations application to hodograph equations system for aligned nondissipative MGD flows

16 p2958 A70-33747

Supersonic plasma flows charge density levels and spatial and temporal variation, discussing theory and use of electrostatic probes

16 p2912 A70-33862

MHD flow velocity and magnetic flux profiles in rectangular ducts for secondary boundary layer

16 p2959 A70-34239

Transverse magnetic field effects on Ar cross flow arc temperature distribution, cross section shape and profile, discussing forced convection effects [AIAA PAPER 70-777]

17 p1338 A70-34477

Reflected shock waves generation by shock produced plasma flow interaction with strong magnetic fields, determining electron density and ionization relaxation times [AIAA PAPER 70-761]

17 p1339 A70-34490

Hypersonic flow of shock heated plasma past axisymmetric blunt body and onboard magnetic source, using numerical method

17 p3008 A70-34491

Steady two dimensional MHD boundary layer flow with uniform suction or injection past semiinfinite flat plate in cross fields

17 p3067 A70-34618

Magnetic fields effect on probe measurements in weakly ionized Ar plasma flow at atmospheric pressure

17 p1339 A70-34693

Magnetic field lines reconnection in steady incompressible hydromagnetic two dimensional flow, formulating governing equations with cylindrical polar coordinates

17 p1340 A70-34926

Current sheet structure of hydromagnetic boundary layer formed by mixing two conducting fluid streams containing oppositely directed magnetic fields

17 p1340 A70-34930

Collisionless plasma theory modification to include effects of finite Larmor radius of ion and electron on perturbation flow mixing

17 p1341 A70-34935

Continuum plasma dynamics with electromagnetic forces of same order of magnitude as gas dynamic forces, discussing various flow problems

17 p1341 A70-35040

Turbulent gas flows shear turbulence structure at various Reynolds numbers in nonconducting channels with and without heat transfer under transverse magnetic field

17 p1341 A70-35245

Supersonic electrically conducting gas flow in flat channel with dielectric walls in inhomogeneous magnetic field

17 p1341 A70-35334

Nonlinear electrostatic vibrations in colliding antiparallel flows of rarefied plasma

17 p1341 A70-35335

Low temperature plasma flow velocity measurements using transit-time technique and high speed filming

17 p1341 A70-35345

Energy transfer processes of electron gas for pipe flow of weakly ionized nonequilibrium plasmas, noting electron temperature decrease exponentially along tube axis

17 p1342 A70-35438

MHD and thermal boundary layer, considering difference scheme for conducting medium flow past body in crossed electric and magnetic fields

18 p3293 A70-36116

Plane nonconducting elastic plate with one side impinged upon by supersonic conducting gas flow, determining magnetic field effect on flutter vibrations

18 p3336 A70-36135

Magnetohydrodynamic flow of electrically conducting viscous incompressible fluid past nonconducting semiinfinite flat plate under transverse magnetic field

18 p3293 A70-36431

Supersonic flow of rarefied plasma around plane bodies, allowing for electric field effect on ion motion

19 p3351 A70-37302

Magnetic field and permeability effects on drag in steady axisymmetric MHD flow of incompressible fluid around full and hollow spheres

19 p3477 A70-37577

Liquid with small electrical conductivity and kinematic viscosity in intense transverse magnetic field, examining plane and three dimensional duct flow

19 p3478 A70-37589

Electrically conducting perfect compressible fluid flow in semiinfinite channel under electromagnetic field, using multiple scales method

19 p3479 A70-37595

Thin airfoil theory in magnetoaerodynamics, considering steady two dimensional flow of compressible perfectly conducting inviscid fluid in presence of uniform magnetic field

19 p3351 A70-37597

Conducting gas channel and jet flow in electric and magnetic fields, using linearizing equations of motion under assumption of small magnetic Reynolds number

19 p3479 A70-37598

Compressible fluids flow with conductivity tensor in presence of thin wing under orthogonal fields, reducing integral equation to Fredholm equation

19 p3351 A70-37599

Ionization relaxation behind reflected luminous shock front in argon plasma flow interaction with magnetic fields, using spectroscopic and streak interferometric observations

19 p3479 A70-37814

Heat transfer in plasma flow incident normally on cylinder, examining laminar boundary layers in presence of turbulence

19 p3552 A70-38187

Coulombian drag on body from hybrid calculus of collisionless plasma flow around cylinder [ONERA-TP-819]

19 p3481 A70-38382

Viscous incompressible electrically conducting fluid steady flow between parallel coaxial rotating disks with transverse magnetic field

19 p3481 A70-38446

Slow wave propagation in plasma moving along external magnetic field, generalizing refractive index formula

19 p3417 A70-38592

Hydromagnetic flow past infinite impulsive motion plate, determining velocity and temperature fields distribution

19 p3482 A70-38934

Two dimensional MHD couette flow in slip regime, considering constant suction on stationary plate to determine transverse magnetic effects

20 p3677 A70-39047

MHD flow in channel of arbitrary cross section, deriving velocity and electric potential distribution by variational principle

20 p3677 A70-39360

MHD nonsteady Beltrami flow between two infinite parallel walls with transverse magnetic field, calculating velocity, skin friction and induced magnetic field

20 p3678 A70-39610

Electrically conducting gas flow past slender body of arbitrary cross section in presence of crossed magnetic field by MHD Stokes approximation

20 p3558 A70-39613

Spectral lines self rotation effects on plasma temperature and density measurement in MHD duct boundary layer

20 p3678 A70-39632

Plasma accelerator compressible turbulent boundary layers numerical calculation taking into account MHD effects, electron thermal nonequilibrium and finite rate ionization

20 p3682 A70-40017

Viscous conducting fluid slow motion past sphere in presence of toroidal magnetic field, calculating Stokes flow perturbations

20 p3682 A70-40113

Compressible plasma axisymmetric channel flow under electromagnetic forces and ohmic heating, noting velocity profiles and current density

20 p3683 A70-40239

Gas core nuclear rocket engine light and heavy species centrifugal separation by MHD-driven rotating flow, discussing fluid dynamic simulation results

20 p3671 A70-40256

Local variables in boundary layer of high temperature ionized gas flowing in magnetic field, using X ray absorption

20 p3613 A70-40344

Steady plane conducting gas flow across magnetic field in channel, calculating flow rate effect on current density distribution

20 p3684 A70-40386

Plane parallel viscous conducting fluid flows stability in transverse magnetic field, considering small perturbation spectrum, Hartmann and Reynolds numbers

20 p3684 A70-40397

Solar wind flow behind shock fronts from Mariner 5 and Explorer 34 spacecraft

20 p3701 A70-40422

Slightly rarefied and electrically conducting gas, calculating effects of applied magnetic field on steady laminar low speed plane Couette flow

20 p3685 A70-40504

Elastoviscous incompressible electrically conducting oscillating free stream flow along infinite porous plate with suction in transverse magnetic field

20 p3685 A70-40508

Electron temperature measurements in flowing high density plasma by cooled Langmuir probe, considering probe temperature variations effects in boundary layer

21 p3854 A70-40557

Viscous magnetofluidynamic one dimensional annular flow, reducing three dimensional field equation to coupled linear partial differential equations

21 p3855 A70-40889

Incompressible MHD flow in entrance region of channel with electrically conducting walls, calculating interacted laminar heat transfer by integral method

21 p3856 A70-41038

Two dimensional compressible laminar MHD boundary layer flow across flat plate with heat transfer, considering continuity, momentum and energy equations

21 p3856 A70-41039

Ionospheric conductivity effects on plasma convective flow in determining magnetospheric electric fields distribution

21 p3816 A70-41084

Rarefied ionospheric plasma flow around rockets and satellites, studying electric field effect on ion motion by kinetic equation and similarity law

21 p3819 A70-41169

Deuterium plasma three dimensional flow in coaxial accelerators, examining magnetic structure of filaments/field lines bundles/

21 p3856 A70-41321

Axisymmetric jet plasma flow in magnetic nozzle, measuring electric potential, electron temperature and ion density and velocity

21 p3856 A70-41380

Aerodynamic parameters of ionized Ar supersonic steady one dimensional nonviscous flow in thermodynamic equilibrium and subjected to Laplace accelerating forces

21 p3858 A70-41444

Two dimensional unsteady viscous incompressible MHD flow past infinite flat plate with uniform suction, considering Hartmann and Reynolds numbers

21 p3858 A70-41450

Electromagnetic effects on separation of turbulent MHD boundary layers allowing for heat transfer

21 p3860 A70-42065

Turbulent incompressible conducting fluid jets velocity and temperature characteristics in presence of longitudinal and transverse magnetic fields

21 p3860 A70-42226

One dimensional supersonic flow of ideal conducting gas in linear channel under transverse magnetic field

21 p3861 A70-42228

Thermoanemometric velocity measurements in nonstationary MHD Hg flows by insulated Pt sensors

21 p3831 A70-42229

Liquid metal turbulent jet flow dependence on longitudinal magnetic field, measuring mean velocity profiles at various cross sections

21 p3861 A70-42230

Heat and mass transfer in plane inductionless and dissipationless incompressible MHD boundary layer with longitudinal pressure gradient

21 p3861 A70-42231

High power plasma flow generation at variable pressure and rates, describing device characteristics and performance

22 p4079 A70-42367

Reverse hydromagnetic shock in solar wind as discontinuity of plasma density, proton temperature and magnetic field density, using spacecraft data

22 p4093 A70-42474

Unsteady hydromagnetic boundary layer flow past semiinfinite flat plate under steady magnetic field and small free stream perturbation

22 p4080 A70-42631

Conducting fluid supersonic flow past slender body of revolution in circular wind tunnel under inclined magnetic field, investigating MHD interference problem

22 p3958 A70-42669

MHD channel flow of suspension for prescribed wall heat flux and temperature, determining flow and heat transfer characteristics

22 p4080 A70-42670

Magnetoacoustic waves in MHD channels, investigating excitation, damping and effects on mean current density and Hall field strength

22 p4081 A70-42822

Ionization waves excitation and damping in MHD channels, investigating effects on electric conductivity, Hall parameter and electron temperature

22 p4081 A70-42823

Planar resonance probe in free molecular arc heated flowing plasma, examining shift nature in measured frequency position of minimum drawn current

22 p4081 A70-43013

Hydromagnetic theory of solar wind flow past earth extended to nonmagnetic planets Venus and Mars

22 p4095 A70-43106

- Nonequilibrium ionization during plasma flow into magnetic field, examining electrons selective heating 22 p4083 A70-43384
- MHD flow universal stability, investigating nonlinear system by energy methods 23 p4223 A70-43967
- Electrically conducting fluid hydromagnetic spin-up between infinite flat insulating plates in uniform magnetic field normal to boundaries 23 p4223 A70-43972
- Magnetic fields and electrically conducting fluids interaction with emphasis on magnetodynamics equations, investigating rectilinear flows in pipes and nozzles, shock waves, etc 23 p4223 A70-44098
- MHD incompressible viscous flow in nonconducting circular tube, determining pressure, flow rate and magnetic field level by continuum theory concepts 23 p4224 A70-44161
- MHD laminar isothermal flow in closed cylindrical tube in rotating magnetic field, determining azimuthal velocity distribution 23 p4224 A70-44162
- Gravity waves produced in liquid electric conductor by piston subjected to sinusoidal pulsation, calculating magnetic field effect on amplitude and phase velocity 23 p4225 A70-44208
- MHD equations for one dimensional plane steady flow, considering conservative difference schemes for approximation 23 p4226 A70-44307
- Conducting viscoelastic fluid flow near harmonically oscillating nonconducting flat plate under uniform transverse magnetic field, considering stress-strain rate relationship 23 p4226 A70-44375
- MHD nonstationary three dimensional problems, describing difference method 23 p4227 A70-44738
- Compressible plasma flow in axisymmetric channels under EM body forces and Joule heating 23 p4228 A70-44934
- Upstream gas photoionization caused precursor ionization effects on MHD switch-on shock structure 24 p4382 A70-45106
- Viscous conducting liquid forced vortex motion, considering radial velocity distribution and rotation effect on free surface shape 24 p4383 A70-45140
- Oscillating viscous conducting fluid laminar flow between parallel nonconducting infinite porous flat plates under suction in transverse magnetic field 24 p4383 A70-45146
- Perturbation of steady MHD Stokes flow past hollow sphere assuming small Hartmann and Reynolds numbers 24 p4384 A70-45262
- Magnetized conducting sphere steady rotation in viscous conducting liquid, solving for fluid velocity and induced magnetic field 24 p4386 A70-45609
- Conducting sphere MHD rotation in viscous conducting fluid under uniform magnetic field 24 p4387 A70-46028
- MAGNETOHYDRODYNAMIC GENERATORS**
- Power output, Joule dissociation and generator efficiency determined for rectangular MHD channel, considering transverse and longitudinal edge effects 01 p0152 A70-10992
- MHD high temperature heating equipment, describing power generation and conversion and magnetic field-working fluid interactions 02 p0348 A70-12418
- Liquid metal MHD, discussing conduction/induction MHD devices, measurement gages and devices for suspending liquid metal by magnetic force 04 p0724 A70-14527
- Faraday type open circuit MPD generator model obtained with allowance for temperature and pressure losses and gas transport properties dependence on static parameters 04 p0725 A70-14530
- MHD generators physical phenomena, discussing thermal efficiency, inlet parameters, operating principles, etc 04 p0625 A70-14716
- MHD generators developments, considering open and closed cycle systems and commercial power networks applications [ASME PAPER 69-WA/PWR-12] 04 p0625 A70-14754
- MHD generator cathode current-sheath voltage characteristics for thermionic arc spot emission mode, noting role of cathode temperature [ASME PAPER 69-WA/HT-51] 04 p0625 A70-14797
- Mechanical electromagnet model of MHD dynamo achieving direct conversion of mechanical to magnetic field energy 06 p1121 A70-17803
- Critical Hall parameter indicating instability in alkali-seeded noble gases in nonequilibrium MHD generators [AIAA PAPER 70-40] 06 p1122 A70-18107
- Electronic-vibrational coupling in nonequilibrium MHD generator with molecular gas to suppress electrode layer shorting and recombination in supersonic nozzles [AIAA PAPER 70-41] 06 p0988 A70-18222
- Electrical effects of boundary layers on insulator wall of MHD generator, considering equilibrium and nonequilibrium ionization generators performance 07 p1196 A70-19321
- Doppler shift measurements of axial and rotational velocities in MPD arc, using references from iron arc [AIAA PAPER 69-110] 07 p1364 A70-19324
- MHD generators optimum load selection by method of stepwise approach, noting agreement with pressure and density distributions to yield maximum power 10 p1923 A70-24156
- Optimal MHD generator with constant channel area, assuming small Reynolds numbers and ideal inviscid gas with arbitrary electrical conductivity 10 p1807 A70-24570
- MHD generator with generator channel consisting of two coaxial cylinders with smooth annular space, discussing internal impedance sensitivity 10 p1807 A70-24855
- Nonequilibrium plasma MHD generator critical pressures determination, applying electron energy balance equation and relation between plasma conductivity and Hall parameters 10 p1809 A70-25142
- Book on engineering aspects of MHD power generation, discussing working gas ionization and electrical conductivity, incompressible conducting fluid motion in magnetic field, etc 11 p1982 A70-25525
- NASA-Lewis closed loop MHD low temperature power generator, describing systems performances during subsonic tests 11 p1982 A70-25614
- Conducting fluid incompressible flow in entrance of MHD channel by momentum integral method, permitting edge stress existence at boundary layer free stream interface [AIAA PAPER 69-724] 11 p2035 A70-25977
- Remote controlled diaphragm exploding device associated with shock tube for MHD generator 11 p2090 A70-26170
- Insulator wall temperature effect on supersonic two temperature MHD generator channel flow at open and short circuit conditions 12 p2163 A70-27067
- Hall MHD generator with supersonic flow instability to magnetoacoustic waves propagating antiparallel to steady electric current in dense weakly ionized gas 12 p2281 A70-27805
- Mechanical electromagnet model of MHD dynamo achieving direct conversion of mechanical to magnetic field energy 13 p2460 A70-28654
- Asynchronous liquid metal MHD generator parameters, assuming constant vertical distribution of working fluid velocity 13 p2349 A70-28968
- Ohmic dissipation in MHD plasma acceleration, demonstrating interaction with electric field and magnetic induction 14 p2621 A70-30296
- MHD induction generator efficiency, investigating winding slot finite spacing and width effects 14 p2533 A70-30531
- Closed loop MHD test facility ARGAS I, describing engineering performance and test measurements 14 p2533 A70-30532
- Open cycle MHD generator operation, comparing below stoichiometric air-fuel ratios to excess air level 14 p2533 A70-30534
- MHD power generation, investigating replenishment of zirconia electrodes from plasma in open flame and duct configurations 14 p2534 A70-30535
- Faraday type MHD generators, investigating gas velocity and temperature profiles effect on electrical performance by equivalent circuits simulation 14 p2534 A70-30537
- High temperature energy systems with plasma reactors and inductive MPD converters, discussing spacecraft propulsion and ground based pollution-free power generation 15 p2791 A70-32278
- MHD power sources for onboard military aircraft electrical application 16 p2964 A70-33474
- MHD electric power generators characterized by high power level and duration for future application in space 16 p2844 A70-33711
- Nonuniform one dimensional flow of slightly ionized gas in infinitely segmented MHD generator with imperfect walls 19 p3478 A70-37588
- Liquid metal MHD conservation cycles, discussing evolution and status of power generation at various temperatures 20 p3563 A70-39325
- Plasma inhomogeneities effects on MHD generators I-V characteristics, energy conversion efficiency and optimum duct geometry 20 p3564 A70-39636
- Boundary layer separation in MHD generators, discussing differences between insulating and electrode wall boundary layers 20 p3680 A70-39985
- Liquid metal MHD power conversion system with Cs and Li as working fluids, describing hydraulic, electrical and high temperature tests results 20 p3680 A70-39986
- MHD induction generator efficiency reduction due to finite winding slots spacing and width 20 p3565 A70-39987
- MHD induction generator design, considering electrical and friction loss measurement and control 20 p3565 A70-39988
- Preionization in Cs seeded Ar nonequilibrium plasma for MHD generators, examining discharge characteristics, recombination reactions, etc 20 p3680 A70-39991
- Large scale nonequilibrium linear MHD generator performance with rare gases under strong EM-gas dynamic interactions 20 p3681 A70-39993
- Insulator wall temperature effect on supersonic nonequilibrium MHD generator channel under open and short circuit conditions 20 p3681 A70-39994
- Large MHD generator channel aerodynamics, discussing pressure distributions to stall and stagnation pressure loss 20 p3612 A70-40002
- Combustion driven Hall configuration MHD generator, discussing boundary layer analysis, gas density nonuniformity and electrode drop 20 p3566 A70-40003
- Performance comparison of diagonal conducting wall MHD generator and Hall generator of equal dimensions, investigating wall temperature effect 20 p3566 A70-40004
- Electrode size effects on combustion driven MHD generator performance, examining voltage losses, gas boundary layer temperature and surface conditions 20 p3566 A70-40005
- Projected nuclear MHD system conditions, examining electrical measurements in K vapor with diode at atmosphere pressure and high temperatures 20 p3681 A70-40006
- NASA Lewis closed loop MHD generator subsonic tests, discussing ducts, purge and Cs injection systems, electrode coating, etc 20 p3566 A70-40011
- Noble gas mixture large shock tunnel driven linear MHD generator, examining electron density, operating characteristics and electrical properties 20 p3682 A70-40012
- Conducting wall MHD generator channel current distribution, examining computer program for anode and cathode currents 20 p3566 A70-40013
- Liquid-gas separator design with reduced friction loss for MHD generators using two phase convergent-divergent nozzles 20 p3612 A70-40014
- One wavelength MHD induction generator, discussing field pressure gradients, fluid velocities, excitation and electrical output power 20 p3566 A70-40015
- Unmanned nuclear electric propelled spacecraft using reactor with liquid metal MHD power conversion system 20 p3566 A70-40016
- Continuous electrode MHD generator ionization instabilities, measuring current distribution and transverse electric field 20 p3567 A70-40018
- Effective dissociation potential measurement for alkali compound seed in MHD generator working fluid 20 p3682 A70-40159
- MHD generators nonequilibrium ionization improvement by blowing low work function particles into cold working gas to obtain required conductivity 21 p3855 A70-40794
- Electron and ion transport in cesium plasma for thermionic and MHD energy converters 21 p3859 A70-41912
- Optimal load circuits number for maximum power extraction from Hall MHD generator with nonuniform gas flow along channel 23 p4143 A70-44900
- NERVA reactor technology applied to closed Brayton cycle MHD power system [AIAA PAPER 70-1225] 24 p4377 A70-45956
- MAGNETOHYDRODYNAMIC STABILITY**
- Nonpotential waves propagating at slow phase velocity in inhomogeneous plasma, determining flute instability oscillation frequency 01 p0149 A70-10163
- Langmuir oscillations excited by electron beam in plasma during instability development investigated for temporal and spatial structure, using visualization 01 p0150 A70-10174

Particle distribution and plasma nonequilibrium field evolution with turbulence generation by microwave field, considering plasma kinetic instability 01 p0150 A70-10212

Solar structural periodicities in quiescent prominences and filaments, considering plasma instability and supporting magnetic field characteristics 01 p0176 A70-10248

Electrothermal instability and critical Hall parameter growth rates in closed cycle linear plasma generators with variable electron mobility, discussing perturbation effects 01 p0151 A70-10655

Electron trapping effect on ion-wave instability in plasma, deriving expression for saturation energy spectrum 01 p0152 A70-11361

One dimensional nonlinear model of anisotropic plasma instability with respect to Alfvén waves growth, noting applicability to solar wind processes 01 p0153 A70-11597

Ionization instability in low temperature magnetized plasma, analyzing electron concentration perturbation caused by Joule heating during electron-ion collisions 01 p0153 A70-11598

Boundary conditions for equilibrium diamagnetic plasma in magnetic dipole having constant and isotropic pressure in system 01 p0153 A70-11631

Plasma accumulation between mixed field accelerator and pulsed magnetic mirror, noting duration and stability 02 p0346 A70-12104

Unstable electron plasma initial value problem solved by numerically integrating Vlasov equation in one dimension 02 p0347 A70-12235

Warm Maxwellian plasma stabilization of velocity-space instabilities, evaluating densities and temperatures for stabilizing resonant loss-cone modes 02 p0347 A70-12237

Recombination instabilities in plasmas and gases undergoing density changes through volumetric processes, solving linearized and nonlinear cases by simplified fluid mechanics equations 02 p0348 A70-12238

Transverse Kelvin-Helmholtz instability in rotating thermally ionized alkali metal plasmas (Q machines), analyzing LF drift wave edge oscillation using dispersion equation 02 p0348 A70-12239

Critical magnetic fields, frequencies and spatial structure of ion-acoustic instability of HF induction discharge plasmas in hydrogen, Ar, He and Hg vapor 02 p0348 A70-12261

Saturation of linear or nonlinearly /explosively/ unstable HF electrostatic flute modes in mirror confined plasma 03 p0529 A70-13005

Coaxial ion beams moving in opposite directions in LF magnetic field noting sliding instability development 03 p0530 A70-13061

Variable magnetic field effect on stability of Langmuir waves propagating in plasma in constant magnetic field 03 p0530 A70-13064

Rotary equilibrium of plasma ellipsoid in external HF fields in constant magnetic field, calculating revolution frequency and effective energy potential 03 p0530 A70-13085

Van der Pol equation for finite amplitude ion-acoustic waves in unstable plasma propagating across weak magnetic field 03 p0531 A70-13404

Plasma stability in uniform magnetic and HF electric fields, observing magnetoacoustic wave generation at electron cyclotron frequency greater than HF field frequency 03 p0532 A70-13523

Electrostatic instability criterion for plasma with distribution function having discontinuities and sharp bend at minima 03 p0532 A70-13526

Thermochemical relaxation influence on shock heated plasma gases via heat transfer experiments on ionized Ar, molecular nitrogen and carbon dioxide 03 p0536 A70-14366

Plasma instabilities of Ce filled auxiliary discharge thermionic energy converter compared with Langmuir theory 03 p0415 A70-14367

Whistler mode instability due to anisotropic charged particle velocity distribution, establishing general onset conditions for variable density cold plasma containing hot electrons 03 p0537 A70-14378

Heat transfer to insulator wall of linear MGD accelerator attached to shock tube, comparing measurements with Hartmann boundary layer analysis [ASME PAPER 69-WA/HT-53] 04 p0781 A70-14796

High density nonlinear and linear growth rates of flute modes instabilities in cold plasma coexisting with low density of energetic electrons 04 p0728 A70-14998

Coaxial electrodes with electric and magnetic fields to study instability in MPD arcs 04 p0737 A70-15542

Stability and shape of magnetically balanced atmospheric cross-flow arcs in Ar noting balanced modes 04 p0729 A70-15549

Unsteady state and transit time analysis of geoeffective interplanetary plasma flux observed near earth causing magnetospheric storm of 17-19 April 1965 04 p0683 A70-15736

Steady state plasma generation in metallic waveguide without dielectric container by cold cathode discharge in He 05 p0819 A70-15803

Neutral sheet instabilities in magnetotail from collisionless plasma instabilities from shear magnetic field 05 p0887 A70-15911

Gravitational instability of finitely conducting incompressible fluid layer of finite thickness surrounded by nonconducting medium 05 p0915 A70-16696

Equatorial jet stream excitation of longitudinal waves, analyzing plasma beam instability and spectrum of short wave inhomogeneities by quasi-hydrodynamic equations 05 p0842 A70-16759

Electron ejections from nuclei of radio galaxies and quasars on basis of plasma stability, discussing role of relativistic electrons and resulting unstable pinch 05 p0917 A70-16901

Relativistic plasma waves in uniform ambient magnetic field analyzed for growth rate to investigate plasma instabilities of streaming cosmic rays 05 p0904 A70-16931

Plasma wave theory and experiments, emphasizing stable Maxwellian plasmas and transverse and longitudinal wave modes in zero and nonzero magnetic fields 06 p1116 A70-17366

Plasma waves and instabilities, detailing linearized Vlasov-Maxwell equations solution appropriate to Landau problem 06 p1118 A70-17378

Nonuniform plasma analyzed for parameters inhomogeneity effect on VLF propagation mode and instability 06 p1119 A70-17381

Anisotropic plasma instability in nonlinear stage, studying turbulent relaxation of ion distribution by quasi-linear theory 06 p1119 A70-17501

HF drift instabilities of plasma with nonuniform magnetic field, studying anomalous ion heating and resistance in Zeta installations 06 p1119 A70-17502

Heat transfer in dense high temperature plasma due to drift waves instability at trapped electrons 06 p1121 A70-17802

Remote feedback suppression method for plasma collisional drift instability using modulated microwave irradiation, describing linear heating mechanism theory 06 p1122 A70-18014

Critical Hall parameter indicating instability in alkali-seeded noble gases in nonequilibrium MHD generators 06 p1122 A70-18107

Homogeneous monoenergetic cylindrical electron beam interaction with homogeneous cold plasma, investigating system stability 06 p1125 A70-18615

Weak discontinuities propagation in quasi-linear systems for MGD, obtaining transport equations 07 p1347 A70-18676

Bogoliubov approach generalized and applied to unstable and inhomogeneous plasmas 07 p1347 A70-19108

LF ion-acoustic waves in ionosphere, considering electric and magnetic field variations, instability, etc 07 p1347 A70-19187

Hall current effects on anisotropic plasma magnetogravitational instability under uniform magnetic field, considering electron inertia role and plasma perturbations 07 p1348 A70-19228

Circumsolar plasma structural inhomogeneity origin 07 p1384 A70-19418

Quasi-linear feedback effect of enhanced ion-wave fluctuations on average electron distribution in current-carrying plasma 07 p1338 A70-19822

Ion resonance instability in nonneutral plasmas, considering ions addition to low density electron cloud with low kinetic energy 07 p1352 A70-19991

Electron clouds injection and containment by magnetic field in toroidal vacuum chamber, studying causes of cloud instability 07 p1353 A70-19994

Hydromagnetic self gravitating galactic slab embedded in halo, deriving stability criteria using models of magnetic field 07 p1390 A70-20293

Cyclotron frequency harmonics emission of PIG discharges linked to nonthermal electron plasma instability 07 p1354 A70-20316

Collective interactions and low density plasma instability in high current gas discharge showing influence on neutral gas breakdown in interelectrode space 07 p1354 A70-20317

Plasma ion-cyclotron oscillations resonance excitation in crossed electric and magnetic fields, describing instability development 07 p1354 A70-20319

Intense quasi-steady He plasma discharge stability in magnetic field measured by Langmuir and optical techniques 07 p1354 A70-20321

Diffusion coefficient of charged particles in HF stabilization of current-convective instability measured in Ge semiconductor electron hole plasma 07 p1355 A70-20365

Solar wind velocity cycles from fluid MHD viewpoint, applying Kelvin theorem on circulation stability in closed fluid system 07 p1373 A70-20441

Finite amplitude effects on MHD thermal convection in rotating layer of conducting fluid, discussing subcritical instability 08 p1563 A70-20472

Plasma-electron beam system LF dispersion characteristics noting ion instability 08 p1549 A70-20505

Inhomogeneities in interplanetary plasma formation due to instability of electron flows moving along interplanetary magnetic field lines of force 08 p1570 A70-20845

Plasma instabilities in solar wind for frequencies near proton gyrofrequency, driving instabilities by electron and proton thermal anisotropies 08 p1561 A70-21261

Plasma monochromatic wave propagation equilibrium state instability mechanisms, discussing stimulated scattering by thermal plasma particles and particle capture in wave potential well 08 p1551 A70-21422

Flute instabilities of cold magnetoactive plasma with radially dependent density and strong azimuthal particle streams, discussing nonzero perpendicular temperature effects on oscillations 08 p1552 A70-21504

Optical parametric backward-wave instabilities in unbounded medium with stopband dispersion using Fourier-Laplace integral 08 p1552 A70-21595

Electromagnetic wave instability propagating across static magnetic field in presence of thermal anisotropy, considering interplanetary plasma and plasma devices stability 08 p1553 A70-21610

Convective-current instability in finite length plasma column, analyzing spectrum of unstable harmonics 08 p1554 A70-21802

Langmuir HF turbulence effect on anisotropic plasma oscillation spectra, determining instability conditions 08 p1554 A70-21809

Axisymmetric instabilities by Z-pinch and reverse axial current discharges in plasmas of arbitrary conductivity 08 p1554 A70-21810

Turbulent diffusion and ion heating in plasmas in presence of current instability 08 p1554 A70-21813

Radial self focusing of low density electron beam by interaction with plasma in presence of beam plasma instability 08 p1554 A70-21818

Nonlinear wave scattering at plasma particles and weak plasma inhomogeneity effects on plasma current instability 08 p1554 A70-21819

Low pressure plasma stability in cylindrical crimped magnetic field, considering convective perturbations and particle velocity distribution 08 p1555 A70-21981

Trapped particle vibrations stability during quasi-neutral plasma disturbance due to centrifugal drift in stellarator electric field 08 p1555 A70-21982

Feedback stabilization of surface instabilities of highly conducting plasma, discussing application to linear pinch with uniform axial static magnetic field 09 p1734 A70-22272

Ion-acoustic wave oscillations of weak collision plasma in strong electromagnetic field, discussing instability 09 p1736 A70-23198

Plasma charge transfer in unstable beam plasma in magnetic fields system allowing for electron discharge pump operation 09 p1737 A70-23334

Beam plasma system instability, studying anomalous diffusion toward vessel walls as function of generated oscillations

09 p1737 A70-23335

Electromagnetic instability measurements in electron cyclotron resonance plasma produced in magnetic mirror field

10 p1921 A70-23963

Two-stream and cross-stream effects on nonlinear wave stability with shock in collisionless plasma

10 p1921 A70-23967

Electron-ion beam plasma system, using one dimensional quasi-linear equations for describing electron heating and stabilization

10 p1923 A70-24403

Drift dissipative instability of weakly ionized plasma, considering ion motion along magnetic lines in dispersion equation

10 p1923 A70-24407

Plasma instability in RF discharge in Ar in magnetic field

10 p1840 A70-24540

Rotating plasma in nonuniform magnetic field analyzed for interchange instability based on MHD fluid and charged particle treatments

10 p1924 A70-24800

Nonpotential waves propagating at slow phase velocity in inhomogeneous plasma, determining flute instability oscillation frequency

10 p1925 A70-25011

Langmuir oscillations excited by electron beam in plasma during instability development, investigating temporal and spatial structure using visualization

10 p1925 A70-25019

Plasma column dynamic stability breakdown in quadrupole HF magnetic field in terms of violating stability criterion for long wave deformation

10 p1926 A70-25109

Hydromagnetic flute and surface wave instabilities of current-carrying plasma filament in strong longitudinal field, showing radial density stabilization

10 p1926 A70-25117

Excitation of plasma ion-cyclotron oscillations by ion beam passing through neutral gas along magnetic field, noting radial stabilization

10 p1926 A70-25118

Two fluid hydrodynamic model of heat conductivity and viscosity effects on drift laminar flow stability of dense inhomogeneous plasma

10 p1926 A70-25125

Guiding center plasma theory, obtaining stability criteria from charged particle motion equations considerations

10 p1926 A70-25250

Statistical analysis of aurora backscatter VHF measurements, discussing related stream plasma instability theory and diurnal variation

10 p1885 A70-25263

Ultrarelativistic electrons cone instability in Van Allen radiation belts, discussing distribution function, relativistic effects and electron lifetimes

11 p2104 A70-25529

Unsteady plasma oscillation stabilization by envelope controller with spatial and temporal dispersion

11 p2087 A70-25604

Plasma stabilizing effect of shear and magnetic flux minimum in asymmetric conductors and currents in helical stellarator winding

11 p2088 A70-25711

Ion-acoustic instability effect on HF EM field penetration into plasma taking into account nonlinear Ohm law

11 p2089 A70-25715

Surface waves stability in cold bounded plasma against background of steady state electron oscillations, using nonlinear approximation

11 p2089 A70-25716

Linear theory of density gradient drift waves in stable collision dominated plasma using external excitation method

11 p2090 A70-26019

Stability of realistic inhomogeneous plasmas with sheaths, examining electron beam-stable Maxwellian plasma interaction

11 p2090 A70-26021

Trans-Alfvenic ionizing shock waves stability in absorption of rotational Alfven disturbances

11 p2090 A70-26023

Modulation coupling between electron and ion resonances in magnetoactive plasmas, discussing probeless feedback stabilization scheme

11 p2091 A70-26403

Plasma turbulence theory application to experimental phenomena using two stream instability example

11 p2096 A70-26769

Diluted plasma microinstabilities allowing for Langmuir waves propagation without magnetic field and Landau effects

12 p2277 A70-27057

Ionization instability of finite bounded plasma, investigating electrothermal waves in large disturbance domain by numerical simulation

12 p2163 A70-27065

MHD disturbances in semiinfinite electrically conducting fluid, introducing magnetic dipole to act as source of disturbance

12 p2277 A70-27156

Drift instability of Alfven waves at electron plasma sheet edge as source of auroral micropulsation instability

12 p2222 A70-27184

Stability of MHD dissipative circular flow of viscous electrically conducting fluid between concentric stationary cylinders impressed with axial magnetic and radial electric fields

12 p2277 A70-27195

Trumpet-type plane waves instability thresholds in plasma drifted by electric field, including calculation of thermodynamic equilibrium

12 p2184 A70-27236

Plasma equilibrium in stellarator type magnetic trap /vintatron/ with magnetic configuration created by strong longitudinal field

12 p2277 A70-27313

Hot-electron cold-ion plasma with anisotropic electron velocity distribution function, discussing stability under finite pressure and unstable oscillation forms

12 p2277 A70-27314

Frequency spectrum determination of hydrodynamic instability excited in fast large amplitude magnetosonic wave

12 p2278 A70-27542

Collisional drift-wave turbulence in Li Q-machine plasma far unstable regime, discussing power spectra variations of density fluctuations

12 p2280 A70-27784

Density gradient drift waves stabilization in collisionless plasma by stellarator type windings, observing oscillations amplitude reduction in shear magnetic field

12 p2280 A70-27785

Drift wave instabilities nonlinearities, discussing plasma growth rate and saturation coefficients, damping rate as function of amplitude and lower mode modification

12 p2280 A70-27786

Feedback stabilization and mode coupling of ionization waves in positive column discharges, noting dynamic stabilization of unstable bounded plasma systems

12 p2280 A70-27787

Hall MHD generator with supersonic flow instability to magnetoacoustic waves propagating antiparallel to steady electric current in dense weakly ionized gas

12 p2281 A70-27805

Impurities and electrothermal instabilities effect on conductivity of two temperature nonequilibrium plasma

12 p2281 A70-27846

Linearized dispersion relation for plane wave propagation in uniform unbounded cold plasma permeated by DC magnetic field, considering two stream instability

12 p2281 A70-27881

Nonequilibrium solid state electronic plasma instabilities due to interactions with strong electric and magnetic fields

12 p2289 A70-28363

Parametric and Raman instabilities predicted by linear theory for plasma in electromagnetic field

13 p2458 A70-28563

Finite amplitude stability of plasma column in weakly ionized gases and in semiconductor plasmas in longitudinal magnetic field

13 p2458 A70-28566

Magnetoplasmas nonlinear dielectric response function and parametric instabilities, discussing homogeneous pumping waves

13 p2459 A70-28568

Electron beam interaction with plasma in absence of magnetic field, discussing microwave radiation emission and incoherent scattering and instability spatial growth

13 p2459 A70-28569

Electron beam interaction with Maxwellian plasma, investigating temperature effects on instabilities

13 p2460 A70-28639

Propagation characteristics of instabilities represented by multidimensional Fourier integrals

13 p2454 A70-28640

Heat transfer in dense high temperature plasma due to drift waves instability at trapped electrons

13 p2460 A70-28653

Gas discharge gap preionization by thin preheated tungsten wire ignition without explosion, resulting in plasma turbulence prevention and radiation density increase

13 p2462 A70-28986

Plasma instability in TEM wave field, considering nonpotential HF oscillations buildup with frequency near external wave frequency

13 p2463 A70-29283

Drift instability and ion heating by high amplitude magnetosonic wave in plasma waveguide in constant magnetic field

13 p2463 A70-29381

Rotating plasma disturbances onset in MPD arc, determining magnetic field dependence on mass flow, background pressure and propellant

[AIAA PAPER 69-232] 13 p2475 A70-29961

Reverse flow in plasma generated in conical electromagnetic shock tube and reflected from downstream bulkhead, noting stabilization effects

13 p2469 A70-29974

HF electrostatic waves generation by electrons in magnetosphere

13 p2482 A70-30083

Hydromagnetic wave velocity and space anisotropy instabilities in magnetosphere, using dispersion relation

13 p2483 A70-30086

Two dimensional unsteady flow of weakly conducting fluid in perpendicular magnetic field using Green function

14 p2621 A70-30180

Charged particle acceleration in outer space plasma, deriving ion-acoustic instability equations

14 p2630 A70-30220

Wall stabilized arc source for spectroscopic measurements of isothermal plasma at various pressures

14 p2584 A70-30505

Convective or absolute electrostatic instability in weakly inhomogeneous hot magnetoplasma, determining density and frequency for onset

14 p2622 A70-30695

Computer models simulating plasma motion applied to sheet pinch stability, investigating relativistic and nonrelativistic regimes

14 p2623 A70-30696

Anisotropic plasma turbulence produced by two stream instability onset near light cylinder of rotating magnetic star for pulsar model

14 p2640 A70-30788

Unsteady state and transit time analysis of geoeffective interplanetary plasma flux near earth causing magnetospheric storm of 17-19 April 1965

14 p2575 A70-30820

Thermal radiative transfer and magnetic field effects on hydromagnetic stability of hot electrically conducting fluid

14 p2623 A70-30996

Sideband instability and trapped particle charge density response of large periodic Bernstein-Greene-Kruskal waves in collisionless plasma

14 p2623 A70-31039

Parametric oscillation instabilities in plasma under magnetic field perpendicular to circularly polarized or hybrid electric field

14 p2624 A70-31042

Ordinary mode electromagnetic wave propagation instability in high beta plasma, determining lower bound on growth rate

14 p2624 A70-31048

Compressible plasma gravitational instability taking into account Hall effect

14 p2624 A70-31225

Weak discontinuities propagation in quasi-linear systems for MGD, obtaining transport equations

15 p2777 A70-31470

Ellipsoidal plasmod equilibrium in external HF field, calculating rotation rate and potential energy

15 p2779 A70-32113

Dissipating instability in plasma by variational method, using relation between energy balance of wave and medium

15 p2779 A70-32115

Inhomogeneous ion beam plasma LF instability, showing oscillations amplitude maxima in radial density gradient regions

15 p2780 A70-32193

Partially ionized plasma stability with allowance for ionization and recombination processes, discussing ion-acoustic oscillations

15 p2781 A70-32823

Collisionless shock waves model in solar wind plasma, discussing instability and energy dissipation

15 p2795 A70-32825

Plasma helix equilibrium and stability in transverse magnetic field, considering oscillation damping by ohmic heating

15 p2781 A70-32910

Beam current instability and plasma heating by electron beam generated in linear discharge, discussing electron beam-cold plasma interactions

16 p2957 A70-33191

Plasma containment in adiabatic magnetic traps, discussing particles, Coulomb collisions, instabilities, cyclotron resonance masers, Van Allen belts, etc

16 p2958 A70-33232

Resonant interaction and instability produced by nonlinear coupling of modulated wave and LF mode, stimulating self focusing of plasma waves

16 p2958 A70-33285

Heterogeneous conducting fluid stability between fixed rigid cylinders with radiant gravitational force and magnetic field

16 p2894 A70-33784

Near cathode magnetic field effect on instability in linear Hall current accelerators, using geometry of field extending from anode to cathode region

[AIAA PAPER 69-381] 16 p2959 A70-33870

Electrothermal instability in nonequilibrium plasma interpreted in terms of generalized instability in gas discharge

17 p3139 A70-34550

Correlation functions of weak quasi-steady plasma turbulence determined by plasmon interactions, using computerized integral equation

17 p3139 A70-34643

Warm homogeneous magnetoplasma longitudinal cyclotron harmonic wave propagation perpendicular to static magnetic field, noting instabilities

17 p3140 A70-34927

Ring current belt stability against LF electrostatic perturbations, including effects of finite electric field along magnetic lines of force

18 p3306 A70-36009

Regular and stochastic oscillations in plasma beam discharge produced by beam instability from observing time dependent variations in spectral line luminescence intensities

18 p3294 A70-36147

Nonlinear interactions of plasma waves with positive and negative energies producing explosive instability

18 p3295 A70-36420

Electron beam interaction with ionized K plasma, considering Langmuir waves instability, turbulence and electron heating

18 p3295 A70-36614

Plasma tearing instabilities involving topological changes in magnetosphere field configuration

19 p3411 A70-37491

Finite electron beam plasma system, investigating relationship between linear fluctuations temporal growth and resulting stationary oscillations spatial growth

19 p3475 A70-37540

Inhomogeneous plasma ellipsoid equilibrium in external HF field, assuming parabolic density distribution

19 p3479 A70-37739

MHD instability of homogeneous inviscid plasma with finite electrical conductivity and anisotropic pressure, obtaining dispersion equation for model

20 p3677 A70-39048

Gas discharge in longitudinal magnetic field, investigating instability of diffusion dominated positive column

20 p3677 A70-39112

Rarefied plasma flute oscillation stabilization in magnetic field, using controlled electron beams

20 p3677 A70-39173

Steady electric field effect on dense plasma cyclotron instability

20 p3678 A70-39595

Ion heating during plasma instability due to interaction with electron beam in mirror magnetic trap

20 p3678 A70-39598

Nonuniform finite amplitude plasma waves non-linear decay and instability, discussing initial damping /or growth/ effect

20 p3678 A70-39660

Ionization stability in low temperature magnetized plasma, using physical plasma model and numerical solution

20 p3679 A70-39983

Continuous electrode MHD generator ionization instabilities, measuring current distribution and transverse electric field

20 p3567 A70-40018

Nonequilibrium plasma stability, conductivity and Hall parameter influenced by current flow parallel to magnetic field, discussing Ar-Cs and He-Cs plasma data

20 p3682 A70-40019

Potential fluctuations in intersecting plasma jet streams attributed to ion-electron instability, using external probe

20 p3682 A70-40136

Dense plasma jet kinetic instabilities and heating in strong magnetic field

20 p3682 A70-40138

Plasma nonequilibrium state formation and light absorptivity variation under high power laser pulsed radiation

20 p3684 A70-40387

Hydromagnetic flute and surface waves instabilities of current-carrying plasma filament in strong longitudinal field, showing radial density stabilization

20 p3685 A70-40510

Excitation of plasma ion-cyclotron oscillations by ion beam passing through neutral gas along magnetic field, noting radial stabilization

20 p3685 A70-40511

Two fluid hydrodynamic model of heat conductivity and viscosity effects on drift laminar flow stability of dense inhomogeneous plasma

20 p3685 A70-40518

HF electromagnetic field effect on nonhomogeneous collisionless magnetized plasma stability, deriving dispersion equation for drift cyclotron oscillations

21 p3854 A70-40622

Anomalous electromagnetic wave absorption in collisionless plasma attributed to instability excitation causing ion density fluctuations

21 p3855 A70-40754

Ultrarelativistic electrons cone instability in Van Allen radiation belts, discussing distribution function, relativistic effects and electron lifetimes

21 p3882 A70-41279

Viscous fluid cylinders electromagnetodynamic stability, discussing viscous forces effects

21 p3858 A70-41699

Laminar-turbulent transition in magnetic field using Plexiglas model, observing inlet conditions effect on MHD flow stability

21 p3861 A70-42234

Collisionless plasma shock wave instability, discussing resonance and energy dissipation through ion Landau damping

22 p4077 A70-42292

Homogeneous plasma in uniform magnetic field, deriving theory for instabilities and LF wave propagation modes

22 p4079 A70-42370

LF self excited oscillations in inhomogeneous afterglow magnetoplasma measured by Langmuir probe, noting dissipative drift instabilities

22 p4079 A70-42372

Gas discharge positive column finite length effect on wave dispersion and instability, indicating critical magnetic field

22 p4079 A70-42374

Plasma inhomogeneity and drift effects on synchrotron radiation from relativistic charged particles in magnetoplasma

22 p4082 A70-43254

Potassium plasma-electron beam interaction, studying LF instability due to electron and ion heating

22 p4083 A70-43385

Monograph on MHD, covering fluid layer stability under adverse temperature gradient, geomagnetic field origin, vector relations, etc

22 p4084 A70-43448

Current oscillations produced in finite-length electron hole semiconductors by strong electric and magnetic fields, discussing HF stabilization

22 p4084 A70-43469

Helicon /magnetoacoustic waves/ effect on plasma instabilities, examining HF field amplitudes and magnetic fields

22 p4084 A70-43475

Solar wind instability from TEM waves propagating parallel to magnetic field in electron-proton plasma

23 p4235 A70-43826

Geomagnetic tail and plasma sheet hydromagnetic oscillations, deriving dispersion equations and stability conditions

23 p4184 A70-43829

MHD instability due to strong magnetic field induced scattering of plasma oscillations, using one sided Q device

23 p4223 A70-43949

Interplanetary plasma electron density inhomogeneities formation explained by instability due to electron stream curvilinearity obtained from spacecraft data

23 p4240 A70-44070

Plasmas kinetic theory, considering crossing from instability to stability, waves decay by collisional damping and emission by bremsstrahlung

23 p4224 A70-44178

Plasma macroscopic and microscopic instabilities derivation from MHD and Vlasov equations

23 p4224 A70-44180

Plasma physics computational problems concerning controlled thermonuclear reactions, considering instability and equilibrium numerical calculations

23 p4224 A70-44181

Critical Hall parameter for linear development of MHD electrothermal instability in bounded nonequilibrium plasma

23 p4227 A70-44555

Low beta surface ionized rotating streaming plasma column, determining low magnetic field effects on density and stability

23 p4229 A70-44988

Collisionless plasma, calculating effects of energy dissipation due to weak firehose instability on steady planar flow, based on quasi-linear fluid equations

24 p4382 A70-45110

Inertia effect on low density plasma losses in toroidal MHD equilibrium in model stellarator field

24 p4383 A70-45115

Uniform HF electric field effect on ion-acoustic oscillation instability in nonisothermal magnetized current-carrying plasma

24 p4383 A70-45118

LF drift-dissipative instabilities of HF skin layer in nonuniform plasma

24 p4383 A70-45119

Acoustic plasma wave excitation by transverse electromagnetic wave beam, calculating LF instabilities and energy losses

24 p4384 A70-45149

Velocity-space homogeneous plasma instabilities due to self interaction of single species

24 p4384 A70-45253

Electrical conductivity in inhomogeneous photosphere and sunspots, suggesting sunspot plasma instabilities

24 p4400 A70-45311

MAGNETOHYDRODYNAMIC WAVES

MHD stability of tangential discontinuities in solar wind flow

24 p4396 A70-45325

Discontinuity in solar wind energy and angular distribution from 2 January 1970 ESRO satellite HEOS-1 observation

24 p4396 A70-45326

Plasma-electron beam interaction instability transition from absolute to convective in hydrogen tube system at various pressures, considering electron collision effects

24 p4385 A70-45452

Plasma heated by cyclotron resonance using waveguide method, considering properties, confinement conditions and instabilities

24 p4385 A70-45453

Stable ellipsoidal plasma configurations in alternating electrode annular system, considering longitudinal magnetic field strength, electrode voltage and gas discharge chamber pressure

24 p4385 A70-45456

Theta pinch He plasma stability using cusp coils added to mirror coil ends

24 p4386 A70-45611

Plasma confinement in min-B configuration of linear multiple with mirrors, attaining additional stabilization via linear rods carrying unidirectional current

24 p4386 A70-45612

LF instability in plasma produced by electron cyclotron resonance in nonuniform magnetic and electromagnetic fields

24 p4386 A70-45613

Plasma jet motion stability in axial magnetic field of stellarator diverter and solenoid

24 p4386 A70-45660

Large amplitude high phase velocity oscillations anomalous damping in electron-ion plasma resulting from MHD instability

24 p4387 A70-46091

Ionized matter stability in intense radiation field opposed to gravitation, explaining quasar properties

24 p4398 A70-46162

Charged particle acceleration in outer space plasma, deriving ion-acoustic instability equations

24 p4399 A70-46295

MAGNETOHYDRODYNAMIC TURBULENCE

NT PLASMA TURBULENCE

MHD flow turbulence suppression at small magnetic Reynolds numbers, considering MHD interaction parameter role

10 p1924 A70-24575

Two dimensional MHD turbulence under strong magnetic field in Zeta device, measuring density, temperature, electric/magnetic fluctuations and various statistical characteristics

13 p2457 A70-28553

Mathematical background for strong turbulence analysis in liquids and MHD

13 p2457 A70-28554

MHD turbulence suppression by magnetic field in tubes, using conduction anemometers

15 p2778 A70-31480

Two dimensional hydromagnetic turbulence model for maintained seed field amplification, noting applications to star formation, stellar convection and gas cloud motions

15 p2781 A70-32813

Steady state frequency spectra for Alfvén waves and MHD turbulence in collisionless plasma with non-linear interaction by particle scattering

24 p4383 A70-45114

MAGNETOHYDRODYNAMIC WAVES

NT ELECTROSTATIC WAVES

NT PLASMA WAVES

MHD model for microwave solar circular polarization bursts interpretation, suggesting Alfvén wave disturbances in solar atmosphere

01 p0168 A70-10254

MHD wave propagation through plasma in magnetic field of current filament, developing Hamilton-Jacobi equation by geometrical optics

01 p0151 A70-10466

MHD wave propagation in electrically conducting fluid contained in finite length circular cylinder subject to axial magnetic field and nonelectromagnetic forces

01 p0152 A70-10944

Geomagnetic field directed hydromagnetic waves propagation in lower ionosphere noting inhomogeneous conductivity, Hall effect and lines of forces role

01 p0083 A70-11546

Plasma concentration diagnostics in magnetosphere based on hydromagnetic whistlers/pearls/ dispersion

01 p0084 A70-11554

Pc 1 range geomagnetic pulsation sweepers /MHD waves/ event in evening sector, considering delay time between sweepers appearance and polar magnetic substorms onset

02 p0290 A70-12121

Geostrophic baroclinic flow with zonal magnetic field in beta plane channel, analyzing instability, phase velocities, Alfvén-Rossby waves and Eady problem

02 p0291 A70-12284

Dispersion relation governing hydromagnetic gravity waves propagation in rotating nonisotropic medium, discussing effects of constant entropy gradient

04 p0745 A70-14473

Magnetized resonantly sustained HF plasma column wave properties, obtaining above-critical density as function of static magnetic induction

04 p0728 A70-14999

Transient plane disturbance of stream angular to applied magnetic field, discussing relationship to airfoil and Alfvén waves

04 p0615 A70-15093

Geomagnetic field lines inclination effect on hydromagnetic waves propagation in lower ionosphere, using atmospheric model in plane form with integral conductivity tensor

04 p0683 A70-15737

Monograph on MHD waves covering theories for weak discontinuities, wave propagation in inhomogeneous media and behavior in magnetic fields

06 p1114 A70-17275

Self similar flow patterns arising during cylindrical shock and detonation waves propagation in gas at rest, considering MGD shock waves

06 p1119 A70-17516

Wave focusing along static magnetic field from radiating VLF source immersed in cold magnetoplasma

06 p1120 A70-17577

MHD equations including energy dissipation terms applied to irreversible processes occurring in fast hydromagnetic shock waves in solar chromosphere

06 p1143 A70-17999

Redistribution of geomagnetically trapped 55 Mev protons by Starfish nuclear explosion, discussing hydromagnetic wave interactions and multiple reflections from magnetic field inhomogeneity

06 p1137 A70-18531

Weak discontinuities propagation in quasi-linear systems for MGD, obtaining transport equations

07 p1347 A70-18678

Outer ionosphere magnetoionic and MHD waves, combining electromagnetic and plasma kinetic theory with reference to satellite observations

07 p1264 A70-19188

Hydromagnetic ionizing shock wave structure in electromagnetic fields, using model composed of strong adiabatic shock to translational equilibrium followed by ionization ionization

07 p1351 A70-19985

Ionospheric absorption of hydromagnetic waves propagated normal to magnetic field, comparing daytime to nighttime absorption

[AFCR-70-0133] 07 p1270 A70-20031

Hydromagnetic wave interaction with magnetopause and bow shock, considering solar wind turbulence and magnetopause tail stability

07 p1270 A70-20070

Alfvén wave structure mechanism of geomagnetic micropulsation type in cometary tails, assuming Kelvin-Helmholtz instability at comet plasma-solar wind interface

08 p1565 A70-20567

Hydromagnetic emissions in high latitudes relationship to storm sudden commencements

08 p1491 A70-21715

Alfvén shear waves collisionless damping from finite Larmor radius coupling to ion acoustic mode, observing longitudinal electric field existence

10 p1921 A70-23966

Hydromagnetic emissions recordings at two Australian stations indicating simultaneous occurrence

10 p1875 A70-24441

Group velocity and propagation of hydromagnetic waves in ionospheric duct, comparing calculations and measured values

10 p1875 A70-24442

Ionosphere effect on toroidal magnetodynamic waves in idealized representation, analyzing oscillations correlation between adjacent magnetospheric shells

10 p1875 A70-24444

Dynamic equations for amplitudes of interacting MHD waves bounded plasma, discussing three-plasmon interactions

11 p2088 A70-25708

Alfvén and cylindrical magnetoacoustic waves in homogeneous unbounded conducting plasma in nonhomogeneous magnetic field, applying Weinberg method to propagation analysis

11 p2089 A70-25850

Evolutionary hydromagnetic shock perturbation by incident small amplitude hydromagnetic wave calculated for diverging wave amplitudes and directions

11 p2036 A70-26017

Trans-Alfvénic ionizing shock waves stability in absorption of rotational Alfvén disturbances

11 p2090 A70-26023

Drift instability of Alfvén waves at electron plasma sheet edge as source of auroral micropulsation instability

12 p2222 A70-27184

Alfvén waves wavelengths dependence on inhomogeneous magnetic field geometry in stationary plasma, using conformal transformations

13 p2462 A70-28984

LF MHD waves propagation model through earth magnetic tail, considering analogy with hydromagnetic plasma wave duct

13 p2398 A70-29210

Compressible fluids Alfvén flow with Hall effect presence of thin foils, reducing problem to Fourier integral equation

13 p2442 A70-29484

HF instabilities effect on magnetospheric drift waves, considering Alfvén mode in auroral plasma

13 p2482 A70-30084

Earth hydromagnetic dynamo spectrum fluctuation related to secular geomagnetic field variations, using unsteady kinematic models

14 p2568 A70-30202

One dimensional Alfvén fluctuation spectrum of magnetosphere in toroidal, crimping and twisting modes, using numerical integration

14 p2569 A70-30203

Bow shock associated hydromagnetic waves generation in upstream interplanetary medium, constructing model in terms of ion cyclotron resonance

14 p2631 A70-30359

Geomagnetic field lines inclination effect on hydrodynamic waves propagation in lower ionosphere, using atmospheric model in plane form with integral conductivity tensor

14 p2575 A70-30821

Elastohydrodynamic monochromatic wave coupling in liquid filled container as model for Alfvén and magnetoacoustic waves transmission in plasma

14 p2625 A70-31356

Geomagnetic pulsations and hydromagnetic wave propagation in magnetosphere, using geometric optics approximation

15 p2722 A70-31452

Weak discontinuities propagation in quasi-linear systems for MGD, obtaining transport equations

15 p2777 A70-31470

Alfvén wave structure mechanism of geomagnetic micropulsation type in cometary tails, assuming Kelvin-Helmholtz instability at comet plasma-solar wind interface

15 p2805 A70-32722

Approximate dispersion relation for MHD waves from macroscopic plasma equations including particle collision terms

16 p2859 A70-32941

Hydromagnetic shock waves structure, investigating resistive, viscous and thermal conduction dissipation effects on discontinuities

17 p3140 A70-34928

Hydromagnetic wave propagation compared in magnetospheres of plane and cylindrical geometries

18 p3311 A70-36011

Polarization splitting of EW and NS Alfvén oscillations in axisymmetric magnetosphere

19 p3409 A70-37319

Existence theorem for piecewise-continuous solutions of waves and shocks in relativistic MHD, using Riemann manifold

19 p3477 A70-37579

Thermodynamics and velocity of MHD shock waves in perfect conducting fluid, using compressibility conditions and relativistic Hugoniot equation

19 p3477 A70-37580

Relativistic effects for MHD Riemann waves in electrically conducting fluid

19 p3478 A70-37583

Ricci curvature tensor perturbations of space-time on Alfvén wave fronts

19 p3472 A70-38935

Cosmic ray electron and proton interaction, discussing hydromagnetic waves, synchrotron radiation, magnetic field effects and wave propagation

20 p3695 A70-39012

Alfvén magnetoacoustic waves interaction, deriving kinetic equation for distribution function and relaxation time

20 p3678 A70-39597

Perturbation method for nonlinear wave propagation in inhomogeneous media, considering sound propagation in ducts and hydromagnetic waves across nonuniform magnetic field

20 p3672 A70-39611

Alfvén waves amplification propagating along sinusoidally perturbed magnetic field in argon plasma, noting parametric excitation

21 p3855 A70-40947

Magnetosheath turbulence generation by hydromagnetic waves amplification carried by solar wind through earth bowshock, computing refracted and incident energy fluxes ratio

21 p3815 A70-41059

Inner magnetosheath large amplitude hydromagnetic waves, discussing power spectrum, earth bow shock and solar wind

21 p3816 A70-41083

Radioheliograph observations of solar outbursts involving MHD waves propagation along curved paths in corona at 80 MHz

21 p3891 A70-41178

Jump relations for shocks in anisotropic collisionless magnetized plasma

21 p3856 A70-41267

Alfvén waves synchrotron emission in incompressible medium, investigating generation by rotating DC current carrying circuit

21 p3861 A70-42227

Slow and fast ionization waves in inert gas or molecular gas plasma columns, describing striation formation in neon discharge by hydrodynamic equations

22 p4079 A70-42371

Large scale magnetic field and spiral shock pattern of Galaxy, using density-wave theory

22 p4103 A70-42981

Substorm aspects of magnetic pulsations, discussing classification, micropulsations, generation and propagation effects

22 p4019 A70-43145

Magnetosphere Alfvén velocity profile relation to ELF chorus and hiss, indicating unstable wave generation by cyclotron resonance

23 p4186 A70-43851

Cyclotron instability of high energy protons in magnetosphere with refraction of growing Alfvén waves

23 p4237 A70-44073

Steady state frequency spectra for Alfvén waves and MHD turbulence in collisionless plasma with nonlinear interaction by particle scattering

24 p4383 A70-45114

Chromospheric heating in magnetic field above supergranular cell boundaries, using geometric optics method for energy transport by hydromagnetic shock waves

24 p4400 A70-45304

Earth hydromagnetic dynamo spectrum fluctuation related to secular geomagnetic field variations, using unsteady kinematic models

24 p4330 A70-46277

One dimensional Alfvén fluctuation spectrum of magnetosphere in toroidal crimping and twisting modes, using numerical integration

24 p4330 A70-46278

MAGNETOHYDRODYNAMICS

Hypothetical magnetic configurations in presence of Coriolis forces from convective cell hydromagnetic activity in solar plasma, considering dynamos with increasing magnetic field

01 p0173 A70-10133

Spatial characteristics of magnetosheath magnetic field observed simultaneously by Explorer satellites, showing zero order agreement with prediction of MGD theory

01 p0071 A70-10410

Inertia effect of electrically conducting lubricant on load capacity of hydromagnetic inclined slider bearing under magnetic field

01 p0104 A70-11389

Pulsed MHD accelerator for MHD wind tunnel application, discussing accelerator gas source, magnetic field and operation

[AIAA PAPER 68-370] 03 p0462 A70-12907

Thin airfoil magnetoaerodynamics problem revised solution to avoid divergent integrals expressing kernels of integral equations

03 p0405 A70-12933

Hydrostatic thrust bearing with electrically conducting gas lubricant under axial current induced MGD pinch

03 p0497 A70-13780

Hydromagnetic forces effects on tidal period hydrodynamic waves, explaining ionospheric tidal motion behavior

03 p0478 A70-13995

Hydromagnetic normal ionizing shock wave properties in H and D mixtures and pure gases in SUPPER 2 shock wave tube

03 p0536 A70-14365

Applied MHD and high temperature gas dynamics - Conference, Prague, May 1968

04 p0724 A70-14526

Calculus of variations used for determining optimum one dimensional MHD slider bearing with bounded control variables

[ASME PAPER 69-WA/LUB-2] 04 p0698 A70-14771

Equations governing electrofluid dynamic energy conversion processes and indicating differences between EFD and magneto fluid dynamic processes presented for mechanical engineering problems

[ASME PAPER 69-WA/ENER-9] 04 p0627 A70-14899

Hydromagnetodynamic equations of two dimensional unsteady geostrophic wind field in turbulent ionosphere

04 p0680 A70-15254

Magnetohypersonic boundary layer interactions, discussing boundary layer thickness relationship to Hartmann and Reynolds numbers

04 p0729 A70-15564

Neutral H study of binary galaxies showing departures from circular symmetry, suggesting model involving hydromagnetic interaction 04 p0759 A70-15709

Magnetized solar wind steady state inviscid single fluid model developed using MHD, including heat equation with thermal conduction 05 p0902 A70-16445

Ohms law of electromagnetohydrodynamics derived on basis of Lorentz hydrodynamic plasma model, considering plasma conductivity 05 p0890 A70-16852

Load capacity of rotating field MHD hydrostatic thrust bearing increased by rotating axial magnetic field 06 p1076 A70-17527

Hypothetical magnetic configurations in presence of Coriolis forces from convective cell hydromagnetic activity in solar plasma, considering dynamos with increasing magnetic field 08 p1576 A70-21409

Artificial satellites MHD drag, noting altitude and temperature effects 10 p1921 A70-23834

Conducting gas unsteady efflux from plane tube into vacuum, determining time dependent position of expanding rarefaction wave fronts 10 p1924 A70-24569

Electrode erosion or entrainment in MPD arcs due to excess current density, considering inner cathode and outer ring anode with axial magnetic field 10 p1925 A70-25040

Magnetopause representation by mixing region of plasma streams with different velocities and magnetic fields, assuming hydromagnetic viscosity caused by wave-particle interactions 11 p2114 A70-26563

Working body properties effects on one component liquid-metal MHD system efficiency with vapor condensation cycle 12 p2164 A70-27329

Bounds in magnetofluidynamics for angular velocity of rotating fluid mass in relative equilibrium noting generalization of Poincare theorem 13 p2463 A70-29153

Hydromagnetic coupling between neutral and ionized atmosphere perturbations, noting role of gravity waves 13 p2397 A70-29191

Earth core flow velocity field to construct kinematic model of hydromagnetic dynamo, discussing magnetic field development 13 p2398 A70-29209

Axisymmetric bodies slow rotation or rotary oscillation in hydrodynamics and MHD using boundary value problems solutions 14 p2527 A70-30276

Solar wind interaction with moon, constructing mathematical model based on MHD equations and Explorer 35 data 14 p2630 A70-30356

Critical Mach numbers for transverse resistive shock waves as function of fluid/magnetic pressure ratio compared with cold plasma theory 14 p2623 A70-31036

MHD slider bearing load carrying capacity in tangential magnetic field, observing optimum profile in step form with riser location and step height ratio 18 p3263 A70-36672

Magnetohydrodynamic calculations, discussing various models, difference methods, codes, boundary conditions, etc 18 p3296 A70-36794

Galactic spiral arm helical magnetic fields related to interstellar gas flow, using magnetohydrodynamic models 18 p3331 A70-37200

Earth magnetic field, discussing origin, field absence on planets and moon and MHD theory 19 p3410 A70-37399

Classical and relativistic MHD - Conference, Lille, France, June 1969 19 p3476 A70-37576

Relativistic and nonrelativistic fluid dynamic equations, deriving limiting procedure leading to fluid magnetodynamic Lundquist equations 19 p3478 A70-37590

Variational principle application to relativistic MHD, deriving Einstein field equations, Maxwell equations and equations of motion for self gravitating charged fluid 19 p3478 A70-37591

Boundary value problems in MHD, considering viscous and nonviscous fluids 19 p3479 A70-37592

Calculus of variations used for determining optimum one dimensional MHD slider bearing with bounded control variables [ASME PAPER 69-WA/LUB-2] 19 p3436 A70-37620

Artificial ion clouds motion in magnetosphere, using MHD model 19 p3414 A70-38378

Suction velocity effects on Rayleigh problem in MHD of flat nonmagnetic nonconducting plate, solving for velocity distribution and skin friction 19 p3481 A70-38448

Solar magnetic field origin and behavior, discussing hydromagnetic dynamos, cyclonic convection and generation times 20 p3706 A70-39927

Magnetohydrodynamics - MIT Conference, Cambridge, Mass., March 1969 20 p3679 A70-39982

Magnetohydrodynamics - JPL Conference, Padasena, March 1970 20 p3565 A70-40001

MHD measurements of gas flow velocity and boundary layer in oxyhydrogen explosions in detonation tube 21 p3942 A70-40876

Spread electron beam excitation of magnetoactive plasma waves in quasi-linear relaxation 21 p3855 A70-40948

Working body properties effects on one component liquid-metal MHD system efficiency with vapor condensation cycle 21 p3760 A70-42070

Relative pressure and excitation induction transverse distribution relationship for MHD machine model, assessing dimensionless criteria effect on pressure peaks position 21 p3760 A70-42232

Conduction liquid metal MHD machine channels design with baffles installed to decrease shunting effect of end zones, calculating segments by circuit theory methods 21 p3760 A70-42233

Earth magnetic dipole represented by Rikitake two-disk MHD dynamo system 22 p4013 A70-42633

Plasma physics and MHD in astrophysics of sun and stars, discussing stellar magnetism origin and evolution, solar and stellar atmospheres, pulsars, etc 23 p4256 A70-45042

Porous media MHD equations for general case, considering magnetized sphere surrounded by homogeneous envelope 24 p4384 A70-45367

Pre-Maxwellian electromagnetic equations application to MHD, investigating existence theorems generalization from system at rest to system with motion 24 p4386 A70-45593

Relativistic gas bulk motion nonrelativistic equations, demonstrating spatially random fluctuations damp suprathermal hydromagnetic perpendicular propagation mode to interstellar magnetic field 24 p4397 A70-45761

MPD experiments in inductive hydrodynamic shock tube with round cross section and radial magnetic field 24 p0000 A70-45798

Full and half journal bearings in axial magnetic field, discussing hydromagnetic noncyclic squeeze fluid films 24 p4349 A70-45995

Radiative transfer and magnetic dispersion for three dimensional wave propagation in radiation magnetogasdynamics 24 p4387 A70-46148

MAGNETOIONIC PLASMA
U PLASMAS (PHYSICS)
MAGNETOIONICS

Magnetoionic mode coupling in satellite transmissions through ionosphere near transverse region, showing diurnal variations and error of electron content 02 p0259 A70-12563

Magnetoionic mode coupling in satellite transmissions through ionosphere near transverse region, using electron concentration profiles for night and daytime estimates 04 p0650 A70-15131

Outer ionosphere magnetoionic and MHD waves, combining electromagnetic and plasma kinetic theory with reference to satellite observations 07 p1264 A70-19188

Radio wave reflection from ionosphere, discussing suppression of magnetoionic component with fluctuating elliptical polarization 11 p2003 A70-25534

D region electron density profiles, using magnetoionic differential-phase partial-reflection technique 21 p3818 A70-41100

Radio wave reflection from ionosphere, discussing suppression of magnetoionic component with fluctuating elliptical polarization 21 p3786 A70-41284

Zi and Ze smallness effect on complex refractive index of ionosphere for VLF propagation 23 p4164 A70-44373

MAGNETOMETERS
NT VARIOMETERS

Airborne aeromagnetic gradiometer theory and design, using superconducting thin film tunneling junctions 01 p0085 A70-10289

Solar magnetic field investigated with parallel beam from coelostat mounting falling on magnetograph slit of solar telescope, noting field polarity change periodicity 01 p0177 A70-10347

Elastic couplings applied as sliding contact-free continuous junction between permanently rotating and fixed parts in rotating coil magnetometer 02 p0298 A70-12214

High altitude observatory solar magnetograph installation modifications including computer control, improved Zeeman effect observation instrument, etc 04 p0691 A70-15037

Miniature fluxgate magnetometer for sounding rocket measurements of two orthogonal components of external magnetic field, predicting performance by linear mathematical model 05 p0851 A70-16690

Deep freezing of nuclear precession magnetometer elements for improving instrument characteristics accuracy 05 p0851 A70-16769

Multichannel magnetograph display for pattern recognition of solar feature morphology compared with spectroheliograms 06 p1142 A70-17993

Lunar surface magnetometer data interpretation by analysis of moon motion relative to interplanetary magnetic field spatial irregularities, using lunar electrical conductivity models 07 p1378 A70-18974

Error estimation of gondola encased tugged undersea magnetometer as function of turbulence parameters 07 p1281 A70-19466

Quartz magnetometer design to measure horizontal component of geomagnetic field, observing stability of H/zero/ constant 07 p1281 A70-19467

Broadband remote sensing magnetometer for measuring fast-rising pulsed magnetic fields 09 p1676 A70-22716

Solar magnetograph modified to simplify calibration, using polarimeter with special exit slit geometry 11 p2057 A70-26650

Moving object angles of rotation averaging during single measurement of geomagnetic field vector components by quantum magnetometer 12 p2234 A70-27566

Superconducting magnetometers and cryogenic refrigeration techniques, discussing liquid helium refill systems, Joule-Thompson expansion, etc 13 p2414 A70-30027

Superconducting analog and digital magnetometers, discussing instrument principles and operational limitations 13 p2414 A70-30028

Magnetometers based on flux entry into superconducting rings, discussing sensitivity and noise sources 13 p2414 A70-30029

Crossing level resonances of magnetometer in optically pumped Rb87 atoms applied to weak field measurement 13 p2454 A70-30035

Optically pumped He 4 magnetometers, investigating magnetic resonance signal dependence on orientation for nonresonance technique construction 13 p2414 A70-30036

Magnetometer design based on Hg isotopes optical pumping, discussing sensitivity improvement 13 p2414 A70-30037

Servo type Cs vapor magnetometer performance including sensitivity, orientation effect, dynamic characteristics and operational temperature range 13 p2414 A70-30038

High sensitivity magnetometers based on magnetic nuclear resonance with electronic pumping 13 p2414 A70-30039

Nuclear magnetic resonance magnetometers performance using dynamic polarization by electronic pumping 13 p2414 A70-30040

Magnetometer for geomagnetic field declination measurement, eliminating thermal drift by light modulation method 13 p2415 A70-30042

Fluxgate and Ru vapor magnetometers for space measurements over wide field intensities, reducing electronic phase shift and experiment weight 13 p2415 A70-30045

Low and high apogee satellite and rocket magnetometers for space measurements, discussing self oriented fluxgate, proton, quantum cesium and three component types 13 p2415 A70-30047

High sensitivity conditions for rapid electronic spin resonance magnetometer 13 p2415 A70-30049

Stability requirements for precision magnetic field measurements on ground and in space, discussing magnetic balances and fluxgate magnetometers for geomagnetic variations and spacecraft attitude 13 p2415 A70-30050

MAGNETOMETRY

Constant and alternating magnetic field characteristics effects on magnetometric measurements in space near to and far from earth

13 p2401 A70-30052

Geomagnetic micropulsations recording by transistorized saturated core magnetometers noting sensitivity

13 p2416 A70-30055

Superconducting magnetic flux detector magnetic susceptibilities or field measurements

15 p2740 A70-32431

Nonmagnetic explosive actuated indexing device permitting precise 180 deg rotation of magnetometer sensor on Pioneer 6 spacecraft

16 p2914 A70-34124

Nonmagnetic lightweight oscillating actuator for multiple indexing of spacecraft magnetometer

16 p2845 A70-34128

ALSEP magnetometer mission and environmental requirements and mechanical design

16 p2914 A70-34152

Active RC bandpass filter for space fluxgate magnetometer, using state variable synthesis

17 p3054 A70-35526

Fabry-Perot interferometer series as tunable optical narrow passband filter with high spectral and angular resolution, discussing performance in solar magnetograph

17 p3097 A70-35872

Error estimation of gondola encased tugged undersea magnetometer as function of turbulence parameters

18 p3260 A70-36940

Quartz magnetometer design to measure horizontal component of geomagnetic field, observing stability of H/zero/constant

18 p3260 A70-36941

LF geomagnetic micropulsations recordings by two component induction magnetometer, relating diurnal frequency and occurrence variations to local K-index changes

19 p3412 A70-37995

Lunar surface local magnetic field measurement, describing Apollo 12 magnetometer

20 p3709 A70-40087

Low noise FET amplifier for satellite magnetometer, measuring interplanetary fields

21 p3799 A70-41923

Helios solar probe magnetic field measurements, discussing magnetometer systems, interplanetary magnetic field implications, shock waves, magnetic storms, etc

21 p3923 A70-42172

Optically pumped magnetometers for low intensity magnetic fields measurement, reviewing atomic hyperfine levels splitting, magnetic resonance, Zeeman sublevels, etc

22 p4026 A70-42575

Solar activity research, discussing optical facilities, photoelectric magnetographs, magnetic field measurement, solar cycles and flares, etc

23 p4256 A70-45034

Vertical supergranular motions in solar atmosphere from multichannel magnetograph observations

24 p4400 A70-45306

MAGNETOMETRY

U MAGNETIC MEASUREMENT

MAGNETOPOUSE

Magnetopause shape determination model allowing for solar wind direction obliquely toward geomagnetic dipole axis

03 p0560 A70-13984

Plane magnetopause models assuming ionospheric electrons ability to short circuit electric fields, constructing distribution functions by Vlasov theory

05 p0840 A70-16568

Hydromagnetic wave interaction with magnetopause and bow shock, considering solar wind turbulence and magnetopause tail stability

07 p1270 A70-20070

Asymptotic behavior in cold plasma model of magnetopause, describing boundary layer between plasma stream and vacuum magnetic field

10 p1921 A70-23835

Magnetopause boundary between shocked streaming solar plasma and geomagnetic tail observed at lunar orbit by magnetometer on Explorer 35

10 p1941 A70-24436

Magnetopause representation by mixing region of plasma streams with different velocities and magnetic fields, assuming hydromagnetic viscosity caused by wave-particle interactions

11 p2114 A70-26563

Magnetopause model, discussing equilibrium layer between magnetic field and cold plasma field-free stream

13 p2396 A70-29181

Magnetic fluctuations observed by ground observatories, suggesting large amplitude waves as field line resonances driven by magnetopause motion

13 p2402 A70-30078

Electrostatic discharge at magnetopause by idealized circuit analog, discussing transmission lines and terminal impedances

14 p2579 A70-31247

Polar substorm activity associated with magnetopause position variation, using Imp 2 satellite observations

15 p2728 A70-31911

Plasma properties across bow shock and in magnetosheath as function of supersonic solar wind

19 p3494 A70-37481

Solar energetic charged particles interaction with earth bow shock and magnetopause

19 p3494 A70-37482

Earth surface magnetic field variations due to magnetopause current system

24 p4329 A70-45355

MAGNETOPLASMAS

U PLASMAS [PHYSICS]

MAGNETORESISTANCE

U MAGNETORESISTIVITY

Magnetoresistance effects in impurity conduction mode of n-type GaAs crystals below 6 K, giving electron concentration

07 p1356 A70-19796

Parallel and perpendicular negative magnetoresistance measurements as function of magnetic field in p-type GaAs at 77 K

13 p2471 A70-29374

Magnetite and ferrite spinels Hall effect, magnetoresistance and electrical conductivity over wide temperature range

19 p3485 A70-37627

Carbon resistors negative magnetoresistance measurement near absolute zero temperature by helium cryostat, noting anisotropy

20 p3687 A70-40168

Magnetoresistance nonlinearity and Hall effect in graphite in magnetic field, observing temperature dependence below 4.2 K

21 p3862 A70-40945

MAGNETOSONIC RESONANCE

Drift instability and ion heating by high amplitude magnetosonic wave in plasma waveguide in constant magnetic field

13 p2463 A70-29381

Gas parameters determination near singular point of slow magnetosonic wave propagating in conducting medium in uniform magnetic field

13 p2464 A70-29507

Magnetosonic resonance excitation in waveguide winding wrapped around plasma cylinder

22 p4082 A70-43380

MAGNETOSPHERE

NT GEOMAGNETIC TAIL

NT MAGNETOPOUSE

Solar wind-induced drag resulting from collisionless plasma shock on sunward-side of large magnetic comet, using similarity with earth magnetosphere

01 p0168 A70-10258

Spatial characteristics of magnetosheath magnetic field observed simultaneously by Explorer satellites, showing zero order agreement with prediction of MGD theory

01 p0071 A70-10410

Geomagnetic micropulsations relation to magnetospheric boundary location on sun-earth line, noting influence of solar wind pressure variations

01 p0071 A70-10412

Ionospheric auroral oval, proton aurora and midlatitude trough relationship to magnetospheric structure, trapping outer boundary, storm time belt and plasmopause

01 p0073 A70-10586

Physical processes responsible for conjugate point phenomena involving particles and waves in magnetosphere and IQSY observations

01 p0075 A70-10598

Cerenkov radiation from electrons in magnetosphere and ionosphere, analyzing radiated power relationship with frequencies and latitudes

01 p0080 A70-11226

Normal and anomalous Doppler shifted cyclotron power radiated by energetic electrons spiralling along geomagnetic line considered as VLF source from magnetosphere

01 p0080 A70-11227

Interplanetary plasma flow simulation around earth magnetosphere and planets not considering initial conditions influence

01 p0172 A70-11488

Magnetospheric ring current model from ground stations data to interpret observed magnetic field disturbances

01 p0082 A70-11515

Mariner 2 measurements of geomagnetic field and interplanetary plasma parameters, analyzing interaction between interplanetary medium and magnetosphere during decreased solar activity

01 p0192 A70-11520

Dipole magnetosphere model with cylindrical or spherical forbidden band for studying plasma motion in quasi-hydrodynamic approximation

01 p0082 A70-11521

Magnetosphere boundary configuration calculated with allowance for geomagnetic dipole inclination to geographic axis and nondipole section of geomagnetic field

01 p0082 A70-11522

Magnetic lines of force penetration into magnetosphere accompanied by plasma insertion generating ring current responsible for main phase of magnetic storm

01 p0083 A70-11543

Plasma concentration diagnostics in magnetosphere based on hydromagnetic whistlers/pearls/dispersion

01 p0084 A70-11554

Earth daily rotation effects on magnetosphere electric currents, discussing Pederson currents in dynamo region and E region ionization

02 p0293 A70-12775

Geomagnetic perturbation coincidences observed at conjugate Polar Cap observatories, suggesting magnetospheric tail field lines convergence with plasma neutral layer

03 p0565 A70-13232

Earth magnetosphere low energy plasmas measurements via McIlwain magnetic shell parameter, showing dependence on geomagnetic disturbances

03 p0557 A70-13284

Ground observations synoptic distribution importance in studying magnetosphere, emphasizing polar caps

03 p0475 A70-13849

Magnetosphere dynamic morphology model, including qualitative phenomena

03 p0475 A70-13850

Plane model of magnetosphere shape and structure, considering rarefied plasma flow past two dimensional magnetic dipole with dynamic and static boundary pressure, using conformal mapping

04 p0675 A70-14435

Magnetospheric magnetic field disturbance due to abrupt solar wind parameters change, using Explorer 26 data

04 p0738 A70-14444

Earth magnetosphere electric fields associated with magnetic disturbances, using satellite observations

04 p0676 A70-14459

Magnetospheric observations of whistler mode emissions byOGO 1 satellite over VLF and LF ranges

04 p0649 A70-15117

Rarefied plasma motion in geomagnetic dipole equatorial plane near magnetosphere symmetry axis deriving approximate solution to quasi-hydrodynamic equations

04 p0681 A70-15717

Inhomogeneous fast electron clouds stability and perturbation dynamics captured in magnetosphere geomagnetic field described by hydrodynamic equations

04 p0743 A70-15721

Neutral sheet instabilities in magnetotail from collisionless plasma instabilities from shear magnetic field

05 p0887 A70-15911

Numerical analysis of cyclotron amplification of geomagnetic micropulsations in magnetosphere based on dispersion relation for three component cold plasma beam system

05 p0838 A70-16284

Stably trapped magnetospheric plasma distribution determined from P12 micropulsations and auroral electrojet index AE

05 p0839 A70-16285

Earth bow shock and magnetopause oscillatory motions with respect to positions assumed under quiet solar wind conditions, discussing satellite observations

05 p0840 A70-16586

Low energy charged particle motion parallel with magnetic force lines analyzed in magnetosphere model with constant electric field

05 p0903 A70-16726

Pc 2-4 geomagnetic pulsations abrupt disappearance on global scale ascribed to magnetosphere boundary stabilization, noting interplanetary magnetic field role

05 p0843 A70-16766

Magnetospheric VLF emissions properties at frequencies below electron gyrofrequency

06 p1117 A70-17374

VLF and ULF whistler modes propagating along geomagnetic field-line paths in magnetosphere, studying cyclotron resonance amplification

06 p1118 A70-17379

Dynamic behavior of earth magnetosphere, discussing geophysical micropulsations, geomagnetic field diagnostics, cold plasma density, etc

06 p1139 A70-17535

Large scale artificial plasma cloud experiments for magnetosphere, solar wind and cometary physics, discussing Ba ion and ice clouds released by satellites [AJAA PAPER 70-33]

06 p1145 A70-18183

Whistler amplification in magnetosphere for electron interaction with background plasma to produce wave growth, discussing stability of various anisotropic velocity distributions

06 p1059 A70-18533

Three dimensional model current system with magnetospheric and ionospheric sections connected by currents flowing along geomagnetic field lines proposed for polar magnetic substorms

06 p1059 A70-18535

Plasmopause observations by ion spectrometer aboardOGO-5 vehicle for early orbits, obtaining O,

He and H ion concentration profiles for geomagnetic parameter

06 p1059 A70-18546

Earth magnetosphere physics, considering solar plasma flow, ring currents, charged particles during magnetic storms, solar wind energy transfer, etc

06 p1060 A70-18552

Magnetosphere and interplanetary space diagnostics by micropulsations analysis, discussing geomagnetic cavity boundary, cold plasma density, energetic particles, etc

07 p1264 A70-19191

Cerenkov generation of VLF waves in inner magnetosphere at low latitudes

07 p1265 A70-19281

Solar proton flares radiometric measurement on-board Molniya 1 satellite, detecting intensities in outer regions of magnetosphere

07 p1366 A70-19428

Electron diffusion in magnetosphere, describing experimental model

07 p1367 A70-19494

Lunar periodicity detected from radio aurora data as possible cause of lunar interaction with magnetosphere

07 p1389 A70-20164

Plasma flow structure near frontal point in earth magnetosphere, using quasi-hydrodynamic two dimensional model to obtain power series solution

07 p1391 A70-20419

Earth ionosphere and magnetosphere electrodynamic state as function of neutral gas small scale motions, considering magnetic disturbances and ionospheric discontinuities

07 p1276 A70-20426

Plasma concentration in nondipole magnetosphere model from Pc 5 pulsations periods for high geomagnetic latitudes, noting solar winds effect

07 p1277 A70-20443

Faculae and flocculi intensity relationship to orientation of magnetic fields in solar photosphere and magnetosphere

08 p1560 A70-20837

Space research in terms of earth environment in space, discussing near-earth spacecraft role in solar, magnetospheric and ionospheric studies

08 p1488 A70-21344

Magnetic equator ELF noise examined with OGO 3 magnetometer, indicating unique signals in plasmasphere

08 p1488 A70-21380

Plasma temperatures in magnetosphere, investigating ion energy balance, electron heating and agreement with rocket measurements

08 p1489 A70-21381

Magnetosphere model for quasi-circular precipitation zones of energetic particles based on geomagnetic activity distribution patterns

08 p1489 A70-21385

Geomagnetic perturbation coincidences observed at conjugate Polar Cap observatories, suggesting magnetospheric tail field lines convergence with plasma neutral layer

08 p1580 A70-21665

Energy distribution of solar wind alpha particles in magnetosheath observed by Heos A satellite

09 p1744 A70-22305

Earth magnetosphere and magnetosheath magnetic field measurements by Mariner 5

09 p1670 A70-23487

Magnetic disturbances caused by magnetosphere-solar wind filamentary inhomogeneity interaction observed by Pioneer 6

10 p1931 A70-24320

Plasmaspheric columnar electron content determination up to plasmapause by ATS-3 beacon transmitter and combining differential Doppler frequency and Faraday rotation angle methods

10 p1874 A70-24430

Ionosphere effect on toroidal magnetodynamic waves in idealized representation, analyzing oscillations correlation between adjacent magnetospheric shells

10 p1875 A70-24444

Geomagnetic pulsations /pc 4/ characteristics from analyzing magnetosphere model yielding plasma densities consistent with experimental data

10 p1875 A70-24483

Magnetospheric substorms magnetograms taken at various stations, showing preceding ring storm particles deflection into magnetic tail

10 p1876 A70-24496

Magnetosphere large-scale motions dependence on earth magnetic axis inclination against rotational axis

10 p1885 A70-25279

Charged particle motion in steady and perturbed dipole fields using laboratory earth magnetosphere plasma model

11 p2104 A70-25546

Plasma density and velocity required for simulating solar wind flow over magnetosphere /bow shock/ in plasma wind tunnel

11 p2032 A70-26372

Geomagnetic damped type pulsations associated with storms interpreted as interaction between hydromagnetic oscillations and magnetospheric motions caused by solar wind

11 p2047 A70-26567

Monograph on ambipolar diffusion and motion in stability of satellite produced artificial barium ion clouds in ionosphere and magnetosphere

11 p2048 A70-26825

Interplanetary and magnetospheric plasma structures experiments and theory

12 p2298 A70-27060

Energetic electron layer near magnetopause attributed to geomagnetic activity from satellite observations of fluxes

12 p2292 A70-27180

Ultra low frequency waves features in magnetosphere, considering geomagnetic pulsations, magnetic data from Explorer 33 and bounce resonance

12 p2223 A70-27573

Very low frequency radio noise in ionosphere, magnetosphere and solar wind, using multiple receivers to measure mathematical relations between direction magnitude and polarization characteristics

12 p2184 A70-27574

Ionospheric lowest regions and magnetosphere probing based on atmospheric observations, detecting disturbed conditions

12 p2224 A70-27734

Soft electron fluxes spatial distribution and temporal variations in magnetosphere based on Elektron 2 charged particle trap data

12 p2295 A70-28259

Plasmasphere ion concentration measurements on-board Elektron 2 and 4 satellites, observing dependence on geomagnetic activity

12 p2295 A70-28260

Plane model of magnetosphere shape and structure, considering rarefied plasma flow past two dimensional magnetic dipole with dynamic and static boundary pressure, using conformal mapping

13 p2392 A70-28460

Magnetospheric magnetic field disturbance due to abrupt solar wind parameters change, using Explorer 26 data

13 p2475 A70-28469

Cosmic rays emission by dipole magnetosphere, applying model to neutron star particle belts

13 p2476 A70-28893

Energy spectrum and equatorial pitch angle distribution of charged particles trapped in magnetosphere resulting from inward diffusion due to third adiabatic invariant violation

13 p2476 A70-28942

Plasmapause and polar wind, considering density discontinuity due to outer magnetosphere heating during magnetic storms

13 p2491 A70-29059

Magnetosheath plasma measurements by Pioneer 6 during outbound passage in dusk meridian, comparing results with various predictions

13 p2396 A70-29180

Plasmapause irregular structure and position indicated by measured distributions of hydrogen and helium thermal positive ions in duskside magnetosphere

13 p2397 A70-29185

Radio sounding of Van Allen inner belt from Antarctica, comparing American and Soviet deductions about magnetosphere structure

13 p2399 A70-29273

Perpendicular propagation of VLF waves from wave/particle interaction in vicinity of lower hybrid resonance frequency in magnetosphere

13 p2468 A70-29934

Solar wind effect on structure of magnetic field in magnetosphere and interplanetary space, noting interaction with moon

13 p2498 A70-30051

Magnetic field measurement of VLF wave propagating in whistler mode in magnetosphere by satellite FR-1

13 p2401 A70-30054

Particles and fields in magnetosphere - Conference, Santa Barbara, August 1969

13 p2479 A70-30058

Solar cosmic rays entry into magnetosphere, showing entrance on smoothly connected field lines

13 p2480 A70-30059

Model current system for magnetospheric substorm accounting for distribution of geomagnetic disturbance field vectors on earth surface and auroral electrons and protons

13 p2481 A70-30062

Magnetospheric convection models and effects on charged particle populations

13 p2402 A70-30064

Plasmapause position and density profile from ion concentration measurements by OGO-5, determining reaction to magnetic variations

13 p2482 A70-30074

Geomagnetic field distortion in high beta magnetospheric regions from OGO observations for quiet and slightly disturbed conditions

13 p2402 A70-30076

HF electrostatic waves generation by electrons in magnetosphere

13 p2482 A70-30083

Plasma wave particle interactions in outer magnetosphere, magnetosheath and solar wind, noting role of AC electric fields

13 p2483 A70-30085

Hydromagnetic wave velocity and space anisotropy instabilities in magnetosphere, using dispersion relation

13 p2483 A70-30086

Low energy charged particle distribution within earth magnetosphere and environs, suggesting solar origin for storm time ring current protons

13 p2483 A70-30089

Trapped alpha particle and proton spectra from satellite measurements, considering magnetosphere injection

13 p2484 A70-30093

Magnetospheric particles, fields, electromagnetic waves and data on collisionless bow shock structure

13 p2484 A70-30098

One dimensional Alfvén fluctuation spectrum of magnetosphere in toroidal, crimping and twisting modes, using numerical integration

14 p2569 A70-30203

Magnetosphere boundary altitude dependence on longitude, considering role of electric current density along geomagnetic lines of force

14 p2570 A70-30217

Magnetospheric tail neutral layer magnetic field distribution, comparing satellite data with theory

14 p2570 A70-30222

Morphology of thermal and energetic particles in inner magnetosphere during geomagnetic disturbances and solar cycles

14 p2630 A70-30358

Mathematical model for interaction of solar wind with geomagnetic field, predicting magnetosphere shape

14 p2574 A70-30736

Rarefied plasma motion in geomagnetic dipole equatorial plane near magnetosphere symmetry axis by deriving approximate solution to quasi-hydrodynamic equations

14 p2575 A70-30801

Inhomogeneous fast electron clouds stability and perturbation dynamics captured in magnetosphere geomagnetic field described by hydrodynamic equations

14 p2632 A70-30805

Magnetosphere topology in presence of time independent ring current symmetrical with respect to earth dipole field axis

14 p2578 A70-31242

Magnetospheric dynamic processes leading to energetic and thermal auroras in middle latitudes

14 p2581 A70-31267

Book on geomagnetic micropulsations covering dynamic processes of magnetically trapped particles and micropulsations usability in remote sensing of magnetosphere

14 p2581 A70-31325

Geomagnetic pulsations and hydromagnetic wave propagation in magnetosphere, using geometric optics approximation

15 p2722 A70-31452

VLF wave propagation direction observation by satellite after passage through magnetosphere at low and mid latitudes

15 p2697 A70-31659

Report to COSPAR on Japanese space research including satellite, rocket and balloon observations of ionosphere, magnetosphere, interplanetary space, moon, planets, cosmic rays, etc

15 p2830 A70-31720

Longitudinal electric field effect on trapped particle motion in asymmetrical magnetosphere, considering electron precipitation

15 p2728 A70-31990

Terrestrial magnetosphere dynamics in magnetospheric disturbances, analyzing solar wind-geomagnetic field interaction and storm development

15 p2729 A70-32080

Magnetosphere survey, including solar wind flow theory, observational techniques, radiation belt theory, magnetic storms, etc

15 p2732 A70-32544

Electron diffusion in magnetosphere, describing experimental model

15 p2795 A70-32739

Longitudinal and transverse electric field effects in magnetospheric electron precipitation, discussing trapped particle drift

16 p2972 A70-34188

Solstitial solar quiet currents along magnetic lines of force in magnetosphere, discussing ionospheric wind asymmetry effects

17 p3077 A70-34949

Pi 2 pulsation power spectra change with magnetospheric substorm development, relating pulsations and electron precipitation

17 p3080 A70-35641

Solar protons penetration into magnetosphere and magnetotail

18 p3306 A70-36004

Magnetic storms development via initial asymmetric inflation of evening magnetosphere, using Explorer 26 and ground observatory data

18 p3311 A70-36008

Hydromagnetic wave propagation compared in magnetospheres of plane and cylindrical geometries

18 p3311 A70-36011

Magnetospheric plasmapause duskside bulge dynamic behavior during substorms, using whistler data

18 p3312 A70-36013

Magnetospheric electric field configuration from trapped particle flux asymmetries, using Explorer 14 electron data

18 p3306 A70-36024

High latitude magnetosphere structure, using two dipole model

18 p3312 A70-36168

Solar proton flares radiometric measurement on-board Molniya 1 satellite, detecting intensities in outer regions of magnetosphere

18 p3309 A70-36902

Magnetosphere dynamics relationship with inhomogeneous electron density formation in F region, discussing scattering diurnal variations and intensity in magnetically conjugate points

18 p3255 A70-37035

Magnetospheric plasma concentration from geomagnetic pulsations periods

19 p3409 A70-37320

Nondipole geomagnetic field effect on magnetosphere boundary, presenting graphs for distance dependence on polar angle

19 p3409 A70-37321

Temporal and spectral changes in solar protons and alpha particles access to synchronous altitude in magnetosphere

19 p3494 A70-37485

Low energy solar protons temporal and spatial variations in magnetosphere by data comparison from polar orbiting satellite and Explorers 33 and 34

19 p3494 A70-37486

Trapped particle population changes associated with solar events, discussing solar wind discontinuity effects on magnetosphere

19 p3495 A70-37487

High latitudes magnetospheric electric field structure, using electrostatic probes and artificial clouds

19 p3410 A70-37489

Plasma tearing instabilities involving topological changes in magnetosphere field configuration

19 p3411 A70-37491

Polar cap absorption correlation with solar protons flux into magnetosphere, discussing diurnal and spatial variations and magnetic storm effects

19 p3411 A70-37492

Van Allen electrons acceleration and precipitation during magnetospheric substorms in relation to auroral processes, discussing energy and pitch angle diffusion processes

19 p3411 A70-37495

Artificial ion clouds motion in magnetosphere, using MHD model

19 p3414 A70-38378

Geomagnetic field configuration and magnetic drift envelopes of particles with various pitch angles at equator calculated from two-dipole model of magnetosphere

20 p3619 A70-39299

Plasmapause motion in equatorial plane under sudden dawn-dusk field with constant solar wind-magnetosphere interaction

20 p3620 A70-39341

Inner magnetosphere magnetic field mapping, deriving Pogo model

20 p3621 A70-39349

Solar wind static and dynamic pressures on earth magnetosphere, using geomagnetic parameters

21 p3878 A70-40845

Magnetosheath turbulence generation by hydromagnetic waves amplification carried by solar wind through earth bowshock, computing refracted and incident energy fluxes ratio

21 p3815 A70-41059

Steady state magnetic and electric fields in magnetosheath by linear superposition of field vectors, using axisymmetric velocity function from gas dynamics

21 p3815 A70-41063

Inner magnetosheath large amplitude hydromagnetic waves, discussing power spectrum, earth bow shock and solar wind

21 p3816 A70-41083

Ionsospheric conductivity effects on plasma convective flow in determining magnetospheric electric fields distribution

21 p3816 A70-41084

Auroral arcs formation model based on dynamic magnetosphere-ionsosphere interaction

21 p3817 A70-41089

Charged particle motion in steady and perturbed dipole fields using laboratory earth magnetosphere plasma model

21 p3882 A70-41296

Earth magnetosphere LF wave annular trap, examining high energy particle interaction with magnetosonic waves

22 p4013 A70-42300

Solar-magnetospheric neutral sheet reconnection and noise in geomagnetic tail from Explorer 33 Ames magnetometer

22 p4013 A70-42471

Large scale electric fields in ionosphere, magnetosphere and interplanetary space, considering further needs for theoretical and observational investigations

22 p4099 A70-42782

Collisionless magnetospheric plasma turbulent conductivities for weak and strong electric fields parallel to magnetic field

22 p4016 A70-42787

Magnetospheric tail magnetic field and particle motion calculation, assuming constant radius cylinder with current sheet bisecting center

22 p4019 A70-43111

Pulsar emission mechanisms, discussing possible magnetospheric physics role and optical pulse generation

22 p4105 A70-43217

Plasma-TEM wave nonlinear interactions in magnetosphere, discussing atmospheric occurrence

22 p4021 A70-43276

Magnetosphere radio propagation from ground based measurements for HF, ULF and VLF

22 p4021 A70-43280

Magnetospheric thermal plasma studies via ground based whistler method, identifying radial and longitudinal irregularities in electron density, bulk motion and plasmapause position and displacements

22 p4021 A70-43281

Micropulsations as diagnostic tool for magnetospheric research, explaining ULF and VLF results variances

22 p4021 A70-43282

Magnetospheric plasma parameters from ground observation data of Pc-1 type micropulsations, assuming radiation belt plasma cyclotron instability

22 p4022 A70-43283

Magnetospheric and magnetic storms correlated to solar wind energy penetration, noting roles of energetic plasma and magnetospheric low energy plasma convection

22 p4022 A70-43287

Magnetosphere storm diagnostics from geomagnetic, auroral and airglow parameters, discussing calibration via satellite observations

22 p4022 A70-43289

Geostationary satellites for magnetosphere and ionosphere sounding, discussing specific observational capabilities

22 p4024 A70-43397

Virial theorem for magnetospheric dynamics, discussing boundary and ring currents and densities and geomagnetic sudden impulses and commencement

23 p4184 A70-43830

Electron densities between inner edge plasma sheet and plasmasphere as function of geocentric radial distance from OGO-3 electrostatic measurements

23 p4236 A70-43834

ELF emissions dependence on plasmapause location in magnetosphere indicated from OV-3 observations

23 p4186 A70-43847

Electron precipitation latitude extent and drift rate magnetospheric substorms from ESSA riometer data

23 p4186 A70-43850

Magnetosphere Alfvén velocity profile relation to ELF chorus and hiss, indicating unstable wave generation by cyclotron resonance

23 p4186 A70-43851

Magnetospheric substorms model modification for growth phase inclusion prior to explosive expansion phase

23 p4186 A70-43853

Nonlinear frequency shift for electronic and ionic cyclotron modes in magnetospheric whistler and hydrodynamic propagation, using Vlasov equation

23 p4187 A70-43880

Geomagnetic perturbation effects on conduction along field lines and short period fluctuations associated with plasma turbulence in magnetosphere

23 p4189 A70-44065

Magnetic field and electron flux observations near magnetopause via magnetometer and triaxial electron spectrometer on OGO-E

24 p4328 A70-45350

Diurnal variations of photoelectron heat fluxes and energy production by thermal coupling between upper F2 region and magnetosphere

24 p4328 A70-45354

One dimensional Alfvén fluctuation spectrum of magnetosphere in toroidal crimping and twisting modes, using numerical integration

24 p4330 A70-46278

Magnetosphere boundary altitude dependence on longitude, considering role of electric current density along geomagnetic lines of force

24 p4331 A70-46292

Magnetospheric tail neutral layer magnetic field distribution, comparing satellite data with theory

24 p4331 A70-46297

MAGNETOSPHERIC ELECTRON DENSITY

Spacecraft surface secondary electron emission effects on electron trap measurements in magnetosphere and solar wind, noting agreement with positive ion densities

03 p0561 A70-13994

Whistlers role in ionospheric temperature, magnetospheric electron density and ionospheric composition determination

07 p1347 A70-19189

Magnetospheric plasmapause-high latitude electron density trough relations using satellite topside ionograms, noting local time and magnetic disturbance effects

07 p1270 A70-20074

Statistical correlation between polar magnetic disturbances and magnetospheric energetic electron flux increase from IMP-1 satellite observations

08 p1491 A70-21714

Magnetospheric discrete VLF emission magnetic field intensity calculation by extending Helliwell theory to include electron density model and variable frequency waves

13 p2483 A70-30087

Magnetospheric charged particle distributions in plasma sheet, pseudo- and stable-trapping regions by satellite observation

13 p2483 A70-30088

Magnetospheric protons and electron energy spectra time and magnetic activity dependence during solar maximum

15 p2792 A70-31671

Electron density large scale structure in plasmasphere identified from whistlers recorded at Antarctica near sunspot minimum

18 p3311 A70-36012

Magnetospheric thermal plasma electron density measurement during solar flare by OGO-5 satellite

19 p3411 A70-37513

Ionized magnetospheric tubes electron content, determining ionization interchange between F region and protonosphere by whistler observations

20 p3584 A70-39332

Ionosphere and magnetosphere total electron content from beacon method of measuring difference-differential-doppler (DDD) and Faraday effects via synchronous satellite signal frequencies

20 p3590 A70-40484

MAGNETOSPHERIC INSTABILITY

Regular/irregular micropulsations variations during solar cycle, noting possible magnetospheric contraction and solar wind velocity influence

01 p0075 A70-10600

Short irregular geomagnetic pulsations repetitive characteristics relationship with magnetospheric cavity dimensions

01 p0081 A70-11229

Real configuration effect of magnetic field in moderately perturbed magnetosphere on whistlers dynamic spectra, stressing geomagnetic perturbation detection

01 p0082 A70-11486

Tropospheric circulation transformation from meridional to zonal forms due to macrostructure activity of solar wind, considering magnetosphere perturbations

03 p0559 A70-13757

Equatorial magnetosphere particle and field data from 18 April 1965 geomagnetic storm reanalyzed in context of drift mirror instability theory

03 p0560 A70-13976

Ionogram conjugate echoes observed at Singapore longitudes by Alouette 2 topside sounder, attributing sequential occurrence to field-aligned irregularities in magnetosphere

03 p0477 A70-13986

Chapman-Ferraro two dimensional problem with neutral sheet, investigating magnetospheric flows and time dependence

04 p0679 A70-15109

Unsteady state and transit time analysis of geoeffective interplanetary plasma flux observed near earth causing magnetospheric storm of 17-19 April 1965

04 p0683 A70-15736

Geomagnetic tail natural oscillations, studying magnetospheric substorms role

07 p1268 A70-19499

Hydromagnetic wave interaction with magnetopause and bow shock, considering solar wind turbulence and magnetopause tail stability

07 p1270 A70-20070

Broadband and highpass LF noise in distant magnetosphere detected by VLF/LF experiment on OGO 1 satellite

12 p2222 A70-27183

Finite Larmor radius interchange and LF drift oscillations due to magnetospheric temperature and density gradient stresses in trapped plasma

13 p2401 A70-29936

HF instabilities effect on magnetospheric drift waves, considering Alfvén mode in auroral plasma

13 p2482 A70-30084

- Aurora band theory based on three dimensional current system during magnetic substorms, discussing field aligned sheet current instability
14 p2573 A70-30671
- Unsteady state and transit time analysis of geoeffective interplanetary plasma flux near earth causing magnetospheric storm of 17-19 April 1965
14 p2575 A70-30820
- Polar substorm activity associated with magnetopause position variation, using Imp 2 satellite observations
15 p2728 A70-31911
- Geomagnetic tail natural oscillations, studying magnetospheric substorms role
15 p2732 A70-32744
- Electric field strength in earth ionosphere and magnetosphere during irregular motion of fast ions and electrons
19 p3407 A70-37303
- Polarization splitting of EW and NS Alfvén oscillations in axisymmetric magnetosphere
19 p3409 A70-37319
- LF electrostatic instability of Van Allen belt in outer trapping zone causing electric field in plasmopause
22 p4099 A70-42786
- Substorm aspects of magnetic pulsations, discussing classification, micropulsations, generation and propagation effects
22 p4019 A70-43145
- Geomagnetic daily variations analysis in terms of universal time components, considering solar wind-magnetosphere interactions, auroral zone effects, etc
22 p4021 A70-43278
- Dynamo region electrostatic fields effects on magnetospheric drift, taking electrical conductivities and solar and lunar tidal modes into account
23 p4185 A70-43836
- Solar wind flux correlation with earth EM field pulsations, noting flare-generated shock front effects on magnetosphere
23 p4236 A70-44051
- Dynamo role in magnetospheric disturbances and ionospheric inhomogeneities, allowing for charged particle concentration height dependence
23 p4237 A70-44059
- Cyclotron instability of high energy protons in magnetosphere with refraction of growing Alfvén waves
23 p4237 A70-44073
- MAGNETOSPHERIC ION DENSITY**
NT MAGNETOSPHERIC PROTON DENSITY
Magnetic activity effect on magnetospheric plasmopause position, measuring ion concentrations as function of local time fromOGO 5 observations
06 p1058 A70-18530
- Magnetospheric plasma density effects on impedance of VLF electric field spacecraft antenna
13 p2397 A70-29186
- Plasmasphere bulge region morphology from hydrogen ion concentration measurement by mass spectrometer onOGO 5 satellite
18 p3312 A70-36014
- Simultaneous hydrogen ion composition measurements by upper ionospheric polar orbitingOGO 4 and eccentric orbiting magnetosphericOGO 3 at midlatitude
19 p3520 A70-38377
- Short period Pc-1 pulsations frequency spectra relationship to magnetospheric He ion concentration
19 p3417 A70-38591
- Geomagnetic fluctuations relationship to magnetospheric ring current and plasmopause during magnetic storm
20 p3619 A70-39328
- Ring current protons turbulent diffusion in magnetospheric plasmopause, considering ion cyclotron wave lifetime and geomagnetic storms
21 p3881 A70-41085
- Ionospheric electron trough and magnetospheric plasmopause movements from satellite observations, showing statistical correlation with geomagnetic field
23 p4186 A70-43854
- MAGNETOSPHERIC PROTON DENSITY**
Low energy protons penetration into magnetosphere between forbidden regions, using model of constant electric field with charge exchange as loss mechanism
13 p2477 A70-29183
- Magnetospheric charged particle distributions in plasma sheet, pseudo- and stable-trapping regions by satellite observation
13 p2483 A70-30088
- Low energy protons in outer trapping region, discussing time variations and source and transport mechanisms
13 p2484 A70-30095
- Magnetospheric protons and electron energy spectra time and magnetic activity dependence during solar maximum
15 p2792 A70-31671
- MAGNETOSTATIC FIELDS**
Nonresonant electromagnetism absorption in high density plasma used for RF heating in magnetostatic field
09 p1735 A70-22923
- Gyrotron efficiency increment at fundamental gyroresonance by applying magnetostatic field variable along length of interaction space
12 p2233 A70-27535
- MAGNETOSTATICS**
Electromagnetic to magnetostatic wave conversion loss reduction at L band by coiled transducer
16 p2913 A70-34038
- MAGNETOSTRICTION**
Semistatic acceleration sensor, using ferrite rod magnetostriction effects to convert acceleration stress to microwave resonant frequency shift
03 p0495 A70-14191
- Conducting cylindrical shell in constant magnetic field analyzed for magnetoelastic disturbances using Laplace transform
06 p1056 A70-17607
- Magnetoelastic spin Hamiltonians applied to magnetostriction of Yb in YIG
06 p1128 A70-18642
- Oscillatory transverse and longitudinal magnetostriction in single crystal Bi, obtaining deformation potentials
08 p1557 A70-21838
- Acoustic noise control on Boeing aircraft electromagnetic components, noting iron-core magnetostriction demanding transformer redesign
09 p1647 A70-22764
- Ferromagnetic domain wall-dislocations magnetoelastic interaction in Fe and Ni computed as function of relative separation, discussing effects on magnetic properties
09 p1705 A70-22811
- Co-Fe core ability to adjust roll spacing in model rolling mill determined from magnetostrictive properties
10 p1905 A70-25175
- Oscillations of longitudinal magnetostriction in silver and copper single crystals at low temperature
11 p2098 A70-25619
- Normal and unconstrained vacuum-deposited Permalloy films composition dependence of magnetization-induced uniaxial anisotropy, noting agreement with magnetostrictive constraint theory
12 p2284 A70-27244
- Ni and Ni alloys elastic properties relationship with ferromagnetic and magnetostriction effects, determining modulus of elasticity for wide temperatures and heat treatment
13 p2432 A70-28760
- Stress, strain, temperature, electric and magnetic field distributions resulting from magneto-thermoelastic interactions in infinite elastic solid subjected to transient heat source
14 p2661 A70-31229
- Magnetoelastic sensors for small force measurement, describing instrument error reduction
15 p2733 A70-31577
- Lamellae stresses and magnetostrictive effects on magnetic properties of titanomagnetite and ilmenohematite series minerals
15 p2728 A70-31993
- Magnetostrictive measurements of torque from high speed rotating shafts
17 p3093 A70-35501
- One dimensional magnetostrictive bar electromagnetically forced vibration, using Lagrange equations and normal mode analysis
19 p3472 A70-37959
- Uniaxial magnetic anisotropy in electrodeposited Permalloy films in terms of magnetostrictive mechanism
20 p3687 A70-40160
- Magnetostrictive Ni-Mn-Co ferrites and Al-Fe alloys, measuring magnetic field effect on piezomagnetic coefficients at room temperature
24 p4389 A70-45400
- MAGNETOTELLURIC PROFILING**
U GEOMAGNETISM
U MAGNETIC SURVEYS
MAGNETOVARIographs
U VARIOMETERS
MAGNETRONS
Book on negative ions and magnetron covering electron affinities determination, gases adsorption, rate processes, stability problems, etc
03 p0526 A70-12901
- Lightweight Ka band magnetron for radar system use in missile fusing and airborne applications, discussing fixed frequency operation, anode and cathode, etc
04 p0655 A70-14622
- Magnetron electron beam amplifier large signal operation analysis using model with thin beam to calculate space charge
05 p0823 A70-16884
- Electron trajectories in M-type backward wave tube, TWT and magnetron, giving output power expressions
05 p0823 A70-16885
- Magnetron amplifiers with ferrite circulators for synchronizing natural frequency, obtaining I-V characteristics and gain vs bandwidth curves
05 p0823 A70-16886
- Cylindrical magnetrons steady state characteristics with thick and infinitely thin cathodes for full space charge and inclined magnetic field
09 p1651 A70-23641
- Magnetron-type electron gun structure with high design permeance for TWT applications
09 p1651 A70-23642
- Resonator system frequency spectrum in coaxial inverted magnetron with stepped interaction space
09 p1651 A70-23643
- Magnetron diode current fluctuations in interelectrode space, considering cathode emission current amplification by various modes
10 p1853 A70-25164
- Spurious output from C band radar magnetrons, discussing measurement procedures and noise reduction by waffle-iron waveguide filters
12 p2201 A70-28141
- Tunable and fixed frequency high power magnetrons parallel operation to achieve stable output
13 p2379 A70-29667
- Coaxial, inside-out and rising-sun magnetrons for millimeter waves generation under pulsed conditions, discussing tunability, frequency stability and weight
14 p2555 A70-30429
- Transverse kinetic energy of electrons at outlet of magnetron-injection gun as function of cathode inclination and magnetic induction
15 p2707 A70-31504
- Ionization measurements by OV-3-6 satellite cold cathode ionization gage of Redhead inverted magnetron type in near circular polar orbit
15 p2723 A70-31660
- Hot cathode magnetron ionization gauge design, discussing performance and sensitivity
19 p3421 A70-37467
- Slot type oscillations electrodynamic suppression in coaxial magnetrons resonator systems, calculating long wave oscillation frequencies
19 p3387 A70-37738
- Magnetron type backward wave tube with negatively charged slow wave structure, analyzing electron beam wave interaction for starting conditions
20 p3596 A70-39251
- MAGNETS**
NT CRYOGENIC MAGNETS
NT ELECTROMAGNETS
NT HIGH FIELD MAGNETS
NT SUPERCONDUCTING MAGNETS
Optimal coercive force selection of residual inductance and energy of magnets for generators with star shaped rotors
01 p0008 A70-10192
- Iris coupled YIG tuned filters for 12-4 GHz region, including high field magnets from vanadium permendur
12 p2202 A70-28165
- Brushless DC motor consisting of permanent magnet rotor, wound stator and optical rotor position sensing
16 p2843 A70-33000
- MAGNIFICATION**
Zoom effect in magnification of reconstructed image in incoherent holography achieved by varying fringe scale via rotation of interferometer components
07 p1288 A70-20099
- Electronic zoom for low light level TV sensor employing electrostatic image intensifier coupled optically to SEC camera tube
16 p2903 A70-33128
- Autofocus for variable magnification systems, discussing conjugate concepts and linkage and cam methods for enlargers and projectors
16 p2907 A70-33182
- MAGNIFIERS**
U MAGNIFICATION
MAGNITUDE
Quasar sky distribution as function of apparent magnitude for identification with galaxies of origin
09 p1759 A70-22909
- Delta Scuti stars, determining consistent absolute magnitudes by Stromgren intermediate band colors and Crawford photoelectric H beta indices
17 p3171 A70-35443
- Supernovae frequency in Sb and Sc spiral galaxies, considering luminosity class, absolute magnitude and mass of parent galaxy
24 p4413 A70-46164
- MAGNONS**
Premature saturation in strongly magnetic systems explained by model with nonuniform magnon modes, applying time dependent Green functions
02 p0338 A70-11886
- Magnon energy theory for temperature dependence of ferrous and magnesium fluorides antiferromagnetic-resonance frequency, sublattice magnetization and magnetic specific heat
09 p1739 A70-22324
- Nonlinear spin wave theory for anisotropic antiferromagnetism, solving sublattice magnetization by thermodynamic Green function for temperature dependence
11 p2097 A70-25617

MAGNUS EFFECT

- Temperature dependence of short wavelength magnon energies correlated with heat capacity
14 p2619 A70-30487
- Bilinear scalar spin Hamiltonian inadequacy to describe electron exchange in systems containing orbitally degenerate ions, considering cobalt magnon spectra
15 p2777 A70-32399
- Antiferromagnetic and ferrimagnetic resonance frequencies, determining temperature dependence by spin wave theory
24 p4388 A70-45132
- Spin waves amplification in ferromagnetic conductor crystals, taking into account arbitrary external electric field and propagation vector orientations and space charge
24 p4392 A70-46363
- MAGNUS EFFECT**
Magnus effects on Apache sounding rocket at supersonic speeds, discussing spinning model and static tests
[AIAA PAPER 70-207] 06 p1157 A70-18103
- Aircraft development for subsonic and transonic flight dependent on methods using blowing and boundary layer control and Coanda and Magnus effect
09 p1610 A70-22220
- Freely spinning finned stabilizer static wind tunnel tests on free fall research store, determining Magnus effect, body flow interference and static stability
[AIAA PAPER 70-559] 13 p2340 A70-29024
- MAIN SEQUENCE STARS**
M dwarf stars spectroscopic, spectral and photometric parallaxes calibration based on trigonometric measurements
01 p0188 A70-11333
- M dwarf stars model atmosphere construction taking into account molecular opacities in cool stellar atmospheres
01 p0190 A70-11348
- S Doradus spectroscopic behavior study during minimum and maximum phases suggesting ejected-shell mechanism and premain sequence star classification
04 p0759 A70-15712
- Bolometric albedo of main sequence stars with deep convective envelopes in close binary systems derived as function of photometric proximity using entropy invariance
05 p0914 A70-16694
- Stellar mass loss in gravitational contraction and variation of rotation law during transition to main sequence
05 p0917 A70-16909
- Neutrino emission, mass loss and giant branch termination in young clusters with giants originating from intermediate mass main sequence stars
06 p1138 A70-17277
- Metal-poor stars evolution during hydrogen and helium burning from main sequence to giant branch, estimating relative cluster ages
09 p1755 A70-22507
- G and K stars classification /spectral type and luminosity class/ by narrow band photometry
10 p1937 A70-23945
- Polaroid magnetic field effects on main sequence stars core convection
11 p2117 A70-26654
- Vibrationally unstable high mass main sequence star, reinvestigating destruction by radial oscillations
12 p2302 A70-27587
- Neutrino astronomy for processes in stellar interiors, emphasizing thermonuclear reactions in sun and main sequence stars
13 p2490 A70-28947
- Globular cluster stars, discussing cosmological importance, stellar development models, main sequence stars, red giant models, He content, age computation, etc
17 p3171 A70-35447
- Helium abundance in unevolved main sequence eclipsing binaries by comparing to homogeneous models in mass luminosity plane
18 p3318 A70-37023
- Galactic spiral structure relation to local stellar distribution, discussing OB associations, galactic cluster, WR stars, cepheids, and common stars in sun neighborhood
18 p3329 A70-37176
- Main sequence stars faint end IR observations for luminosities and temperatures
20 p3702 A70-39014
- Main sequence II stars rapid uniform rotation effect on structure
22 p4101 A70-42859
- Polytropic premain-sequence evolutionary tracks and main sequence models of solar composition low mass stars
22 p4104 A70-42993
- UBVr colors of A0-K0 main sequence stars, deriving B-V relation to effective temperature
23 p4246 A70-44757
- Single normal main sequence stars rotational velocities compared with giant, supergiant, Be, A and metallic line stars and Population II objects
23 p4248 A70-44802

- Stellar rotation effect on internal structures, discussing angular momentum steady state distribution for main sequence stars
23 p4249 A70-44803
- Rotational velocities for main sequence stars from spectral type A5 to F9, supporting solid body rotation hypothesis
23 p4249 A70-44806
- Be stars rotation, considering emission properties and evolutionary state of main sequence
23 p4249 A70-44807
- Stellar rotation angular momentum loss in premain sequence convective phase, discussing polytropic structure, formation time and velocity changes
23 p4249 A70-44809
- Stellar rotation effects on atmospheres of early type main sequence stars, using models for surface gravity and temperature variations
23 p4249 A70-44810
- Upper main sequence and close early type binaries evolution by fission of rapidly rotating protostars
23 p4250 A70-44815
- Algol type semidetached eclipsing binaries main sequence components rotational velocities, determining deviations from synchronism
23 p4251 A70-44818
- Spectral line width distributions in main sequence stars, emphasizing B2 to A2 range rotational velocities with Maxwellian distribution
23 p4251 A70-44821
- Be star rotation dynamics phenomenon, discussing time variations on main sequence scale
23 p4252 A70-44828
- Solar rotation, discussing oblateness, solar wind torque, main sequence stars rotating core, gravitational quadrupole moments and Li and Be depletion
23 p4252 A70-44829
- Main sequence and giant stars atmospheric structure models, noting metal deficiency effects
24 p4413 A70-46159
- G8, IV subdwarf 31 Aql spectrum at 4000-6600 Å, discussing Ba II 4554 Å, G and CN bands and spectral lines
24 p4414 A70-46329

MAINTAINABILITY

- Cost model based on initial and support costs for studying availability variations effect on system total cost and maintainability and reliability interrelationship
02 p0401 A70-11674
- Automatic support systems for advanced maintainability - IEEE Conference, St. Louis, November 1969
08 p1468 A70-20651
- Avionics maintainability concepts, discussing built-in test equipment, test connectors, automatic test equipment, fault detection and fault isolation
08 p1470 A70-20664
- Apportionment optimization of reliability and maintainability by Lagrange multipliers and dynamic programming, discussing maintainability cost model and computerized simulation
09 p1792 A70-22211
- Harrier maintainability for reliability with minimum down-time and man hours, discussing servicing, turnaround, role change, inspection and engine changes
10 p1806 A70-24850
- Maintainable electronic equipment requirements for long duration manned space missions
10 p1852 A70-24895
- Three spool turbofan engine design regarding maintainability, noting on-condition module removal and overhaul
[SAE PAPER 700204] 11 p2101 A70-25877
- Systems effectiveness equated to function of performance, availability, reliability, maintainability, quality control and manufacturing, emphasizing optimization
14 p2592 A70-31112
- Project acquisition based on consideration of logistic effects /ABLE/ for tool measuring logistic consequences of reliability and maintainability
15 p2832 A70-32634
- Computer system maintainability demonstration test in accordance with MIL-STD-471, discussing techniques for failure indication and repair crew qualifications and training
15 p2706 A70-32657
- System maintainability stochastic modeling using probability density functions
15 p2748 A70-32670
- Electronic equipment maintainability in military environment, discussing myths for hardware and human performance conditions
16 p2852 A70-33664
- Field maintenance interface between human engineering and maintainability, discussing air defense system malfunction and troubleshooting deficiencies
16 p2852 A70-33665
- Maintainability assessment techniques, discussing models in terms of utility, application, validity and human engineering data
16 p2853 A70-33667
- Systems subject to failure and repair cycles, describing performance and reliability by stochastic processes in terms of excess time
17 p3099 A70-34580

- Reliability and maintainability - Conference, Detroit, July 1970, Volume 9, Assurance technology spinoffs
19 p3440 A70-38815
- Gaseous radioactive penetrant inspections for early low cycle fatigue in aircraft engine materials, discussing impact on maintainability
19 p3441 A70-38828
- TSCP700 aircraft auxiliary power unit design, fuel consumption and maintainability
[SAE PAPER 700815] 24 p4395 A70-45902
- MAINTENANCE**
NT AIRCRAFT MAINTENANCE
NT SPACE MAINTENANCE
Computerized generation of cost optimal decision logic for malfunction analysis
08 p1470 A70-20659
- Integrated man machine shipboard maintenance systems design, describing computerized model based on information flow network
08 p1465 A70-20665
- Maintenance trends for transport aircraft jet engine, considering engine and component pooling, inspection accessibility, monitoring, etc
[SAE PAPER 700316] 12 p2290 A70-27455
- Automatic engine maintenance recording system on air transport aircraft noting data reduction
[SAE PAPER 700317] 12 p2335 A70-27456
- Telecommunication satellite system operation reliability taking into account maintenance and economics, discussing spacecraft acceptance and performance tests
12 p2313 A70-27470
- On-line optimization of maintenance and verification schedules for complex system safety insurance
12 p2444 A70-28013
- Computerized Monte Carlo prediction of maintenance time distribution of complex system, concerning man hours, elapsed time and schedule meeting
13 p2524 A70-29566
- Reliability relation to mean time between failures /MTBF/ relation for long life repairable equipment with limited life components
13 p2421 A70-29567
- Multistation automatic test equipment assembly management or maintenance organization, using digital computer control
13 p2385 A70-29691
- Configuration management of software concerning automatic test systems in large maintenance depot
13 p2422 A70-29692
- Failure prediction testing and elements replacement at field maintenance level for increasing equipment reliability
13 p2423 A70-29697
- Coding procedure for Air Force maintenance technicians to record and describe equipment malfunctions compared to experimental codes
16 p2853 A70-33666
- Aircraft, helicopters and rockets aviation systems design and components service life problems, emphasizing maintenance intervals
17 p3100 A70-34686
- Management program for digital data systems maintenance and repair
17 p3200 A70-35487
- Book on optimization and probability in systems engineering covering mathematical models for reliability, repair, availability, Markov techniques and queueing
19 p3553 A70-37928
- Preventive maintenance of stationary automatic mass spectrometers
19 p3432 A70-38584
- Hazard functions, renewal and peril rates for reliability models of nonrepairable parts, sockets and repairable systems
19 p3442 A70-38839
- Reliability of redundant repairable systems with preventive maintenance, determining mean time between failures
20 p3638 A70-40181
- Optimum calibration intervals determination for obtaining instrument maintenance quality level at low cost
20 p3634 A70-40452
- Versatile Avionic Shop Test maintenance system supporting avionic equipment aboard aircraft carriers
21 p3804 A70-40772
- MAJORITY CARRIERS**
HF admittance and noise in forward-biased majority carrier Ge-Si n-n heterojunctions and Schottky barrier
03 p0539 A70-13159
- Thermoelectric power and Hall effect quantum resonances in graphite for locating majority carrier electron and hole Fermi Surfaces in Brillouin zone
24 p4389 A70-45597
- MALES**
Orthostatic tilt tolerances in young men and women noting heart rates and blood pressure
09 p1627 A70-23454
- MALFUNCTIONS**
Optimal selection of subsystems, minimizing mathematical expectation of output losses considering malfunctions
03 p0460 A70-13429

Automatic control algorithms for subsystem malfunction identification in multisubsystem plants, analyzing conditions for diagnostic tests existence
04 p0661 A70-14554

Automatic Malfunction Analysis /AMA/ digital computer software system supporting checkout and testing, defining normal system status by computer simulation
[AIAA PAPER 70-383] 10 p1861 A70-24922

Pulmonary functions disturbances producing hypoxia, discussing alveolar hypoventilation, arteriovenous admixing, blood distribution and oxygen diffusion disturbances
10 p1821 A70-25078

Coding procedure for Air Force maintenance technicians to record and describe equipment malfunctions compared to experimental codes
16 p2853 A70-33666

Test selecting and sequencing for adaptive checkout processes, determining malfunctions
20 p3659 A70-40106

MALKUS THEORY

Variational principle for turbulent shear flow between parallel plates, taking into account isothermal flow and Malkus theory
17 p3073 A70-35595

MAMMALS

NT CATS
NT CATTLE
NT CHIMPANZEES
NT DOGS
NT GOATS
NT GROUND SQUIRRELS
NT GUINEA PIGS
NT HAMSTERS
NT HUMAN BEINGS
NT MICE
NT MONKEYS
NT PRIMATES
NT RABBITS
NT RATS
NT RODENTS
NT SHEEP
NT SWINE
NT TURTLES

Brown fat thermoregulatory function and physiological control in mammals, discussing heat production and biochemical stimulation
02 p0230 A70-11683

Histochemical detection of L-glulonolactone-phenazine methosulfate oxidoreductase activity in mammals with emphasis on vitamin C synthesis in primates
04 p0647 A70-15753

Broad spectrum light sources effects on mammalian endocrine apparatus development and function determined in rats
09 p1617 A70-22335

Gamma radiation effects on higher mammals nerve activity after chronic total body exposure
09 p1619 A70-22790

Mammalian pineal organ control experiments involving light and sympathetic nerve stimulation
10 p1812 A70-24396

Mammalian ultricular macula design, considering microelectrode data and information from light and electron microscopy, behavioral experiments and computer simulation
11 p1988 A70-26231

Neurological differences in spinal projections of animals subjected to cordotomies compared with human material, using selective silver impregnation technique
13 p2350 A70-28998

Mammalian cells after X ray irradiation, showing two forms of DNA repair process
21 p3765 A70-42024

02 p0244 A70-12136

Man machine systems - IEEE/ERS Conference, Cambridge, England, September 1969, Volume 3, Decision making and mental work load
02 p0244 A70-12137

Human decision making via man-computer interaction, noting skill role in nonoptimal performance handling of simultaneous factors
02 p0245 A70-12140

Supervisor sampling frequency maximizing given value or payoff function, discussing applications to controlling vehicle, information system or institutions
02 p0307 A70-12141

Information storage and retrieval system development and operation for diversified crew/equipment task data, using general purpose digital computer
02 p0265 A70-12143

Man machine system consisting of manned station controlling distant spacecraft via wideband radio link
02 p0229 A70-12145

Adaptive man machine systems, display design - IEEE/ERS Conference, Cambridge, England September 1969, Volume 4
02 p0245 A70-12147

Adaptive man machine system for automated training of pilot dynamic control skills /decision and motion/, describing synthesis procedure
02 p0246 A70-12148

Multidimensional data efficient decomposition for communication interface between man machine system, considering decision making and pattern recognition on digital computers with orthogonal transformations
02 p0265 A70-12149

Man machine digital display low cost system for displaying black and white image data with gray levels, color image data and dot patterns
02 p0265 A70-12152

Remote sensing system for earth resources surveys temporal information employing human interpreter and machine for spatial and spectral data processings
03 p0491 A70-13668

Man machine interface in VTOL aircraft control and stabilization systems adaptation during manually controlled hovering flight
03 p0414 A70-14094

Cockpit display system to reduce aircraft pilot workload and aid judgment making during critical operations
[ASME PAPER 69-WA/BHF-12] 04 p0642 A70-14854

Tactile control in man machine systems using feed-forward loops to provide rate information, noting unmanned aircraft and machine-tool applications
[ASME PAPER 69-WA/BHF-14] 04 p0642 A70-14855

Man-machine systems design emphasizing impedance matching exemplified by visual approach landing
[ASME PAPER 69-WA/GT-15] 04 p0642 A70-14856

Human controller decision in air traffic control, discussing manpower, on-line computer use and maximized systems
[ASME PAPER 69-WA/AV-1] 04 p0643 A70-14903

Time constant of man machine system as adaptive variable in training devices derived from combined vehicle properties and human control characteristics
05 p0805 A70-16005

Computer-aided design using third generation computers and interactive graphic systems applied to transonic aerodynamics problems
05 p0816 A70-16122

Command control systems characterized as problem solving information processing systems, discussing information requirements specification prior to man-display design
05 p0806 A70-16177

MAN

U HUMAN BEINGS

MAN MACHINE SYSTEMS

Man-computer graphic systems utilization for wing/body aerodynamic design and analysis concept for subsonic vehicles
[AIAA PAPER 69-1130] 01 p0002 A70-10610

Tradeoff criteria between man machine and automated space systems applied to lunar and cosmic ray explorations
[AIAA PAPER 69-1045] 01 p0034 A70-10644

Psychological aspects of unreliability sources in man machine systems for selection and training criteria of photooptical instruments users
01 p0036 A70-10821

Automatic landing systems mission and design, discussing pilot-system task coordination, equipment characteristics and reliability, etc
01 p0138 A70-11257

Aircraft pilot-autopilot task division during automatic landing, analyzing man machine interaction in aircraft approach guidance
01 p0139 A70-11258

Electronic displays role in pilot-traffic interaction, considering flight safety, cost effectiveness, onboard data input, etc
01 p0039 A70-11260

Digital computer display techniques relationship with man in modern environment, considering human engineering and educational problems and future impact on intellectual qualities
01 p0221 A70-11281

System analysis and synthesis processes applied to educational requirements identification and programs implementation, emphasizing use of functional model with man machine interface
01 p0221 A70-11283

Dynamic structural analysis using computer graphics display, emphasizing applicability to man machine interaction at key decision making points
02 p0386 A70-11943

Man machine systems - IEEE/ERS Conference, Cambridge, England, September 1969, Volume 1, Man-computer interaction
02 p0264 A70-12126

Man machine systems - IEEE/ERS Conference, Cambridge, England, September 1969, Volume 2, Transport systems and vehicle control
02 p0334 A70-12130

Helicopter avionic systems man machine capability estimation based on pilot workload, applying results to design evolution
02 p0244 A70-12136

Man machine systems - IEEE/ERS Conference, Cambridge, England, September 1969, Volume 3, Decision making and mental work load
02 p0244 A70-12137

Human decision making via man-computer interaction, noting skill role in nonoptimal performance handling of simultaneous factors
02 p0245 A70-12140

Supervisor sampling frequency maximizing given value or payoff function, discussing applications to controlling vehicle, information system or institutions
02 p0307 A70-12141

Information storage and retrieval system development and operation for diversified crew/equipment task data, using general purpose digital computer
02 p0265 A70-12143

Man machine system consisting of manned station controlling distant spacecraft via wideband radio link
02 p0229 A70-12145

Adaptive man machine systems, display design - IEEE/ERS Conference, Cambridge, England September 1969, Volume 4
02 p0245 A70-12147

Adaptive man machine system for automated training of pilot dynamic control skills /decision and motion/, describing synthesis procedure
02 p0246 A70-12148

Multidimensional data efficient decomposition for communication interface between man machine system, considering decision making and pattern recognition on digital computers with orthogonal transformations
02 p0265 A70-12149

Man machine digital display low cost system for displaying black and white image data with gray levels, color image data and dot patterns
02 p0265 A70-12152

Remote sensing system for earth resources surveys temporal information employing human interpreter and machine for spatial and spectral data processings
03 p0491 A70-13668

Man machine interface in VTOL aircraft control and stabilization systems adaptation during manually controlled hovering flight
03 p0414 A70-14094

Cockpit display system to reduce aircraft pilot workload and aid judgment making during critical operations
[ASME PAPER 69-WA/BHF-12] 04 p0642 A70-14854

Tactile control in man machine systems using feed-forward loops to provide rate information, noting unmanned aircraft and machine-tool applications
[ASME PAPER 69-WA/BHF-14] 04 p0642 A70-14855

Man-machine systems design emphasizing impedance matching exemplified by visual approach landing
[ASME PAPER 69-WA/GT-15] 04 p0642 A70-14856

Human controller decision in air traffic control, discussing manpower, on-line computer use and maximized systems
[ASME PAPER 69-WA/AV-1] 04 p0643 A70-14903

Time constant of man machine system as adaptive variable in training devices derived from combined vehicle properties and human control characteristics
05 p0805 A70-16005

Computer-aided design using third generation computers and interactive graphic systems applied to transonic aerodynamics problems
05 p0816 A70-16122

Command control systems characterized as problem solving information processing systems, discussing information requirements specification prior to man-display design
05 p0806 A70-16177

Human controller in psychology and control engineering, discussing linear and nonlinear modeling of human behavior
05 p0807 A70-16487

Information display devices, discussing interactive graphic consoles, reusable film, magneto-optics, broadband laser, etc
05 p0851 A70-16725

VTOL aircraft control and stability with emphasis on flight characteristics and man machine interaction
05 p0809 A70-17089

Airborne computer system program for anti-submarine warfare enhancing human element in man machine system
06 p1185 A70-17974

On-line computer programs allowing for man machine interactions in linear circuits design
06 p1015 A70-18417

Concorde simulator for determining aircraft control responses and integrating pilot function into problem
07 p1249 A70-19743

Man-computer interactions in experiment design analysis, discussing applications to computer simulation
08 p1464 A70-20606

Integrated man machine shipboard maintenance systems design, describing computerized model based on information flow network
08 p1465 A70-20665

Human operator dynamic properties working to maintain given process parameters, obtaining differential equations for closed machine operator system
08 p1449 A70-20696

Control display requirements for manned spacecraft, integrating human operator with vehicle control system and determining man machine relations in stabilization, control and guidance
08 p1498 A70-21678

Human factors data standardization in NASA Apollo Applications Program for computer data processing
09 p1623 A70-22295

SIMCON digital simulation control system optimizing man machine interaction, noting capability to generate solutions with minimum computer memory
10 p1860 A70-24654

Computer aided on-line test generation for prelaunch checkout, describing interpretive test language for rapid man machine information transfer
[AIAA PAPER 70-384] 10 p1846 A70-24921

State space models of remote manipulation problem applied to human supervised or autonomous computer manipulators
10 p1828 A70-25230

Human controllers nonlinear time domain mathematical model for analyzing compensatory tracking task data
11 p1992 A70-26396

Computers graphical display devices for rapid designer-computer communication
12 p2191 A70-27013

Applied psychology role regarding human factors in man machine systems, considering boredom, skills application, age and experience, etc
12 p1716 A70-27035

Human performance as controller evaluated in man machine control system, considering pursuit or compensatory tracking tasks
12 p1717 A70-27039

Pursuit tracking during disturbance signal as function of human performance in man machine system
12 p2266 A70-27198

Apollo man-machine control design, discussing communication, integration, lunar landing, attitude control, CMC and LGC programs
13 p2357 A70-28379

Man machine function distribution optimization in spacecraft closed-loop automatic control system
13 p2380 A70-28381

Man machine eye-integration coupling in tracking task applied to helicopters, ocean-going craft and propeller aircraft
13 p2357 A70-28386

Longitudinal short-period flying qualities as closed-loop pilot-airplane system, noting acceptance values
[AIAA PAPER 70-569] 13 p2346 A70-29034

Man machine interface between operator and automatic testing equipment based on ergonomic design cost
13 p2360 A70-29687

Mathematical models for human adaptive and optimizing characteristics in manual control systems regarding behavior phase
13 p2360 A70-29780

Flight control and human role in avionics system, discussing stabilization, autopilot and ILS systems
13 p2450 A70-29997

Human temporal motor response models relating reaction, movement and manipulation time to stimulus, movement and manipulation information
14 p2540 A70-30248

Real time sonic information input/output computer system for acoustic signals and speech synthesis, concerning man machine communication
14 p2553 A70-30425

Electronic systems automatic design problems including man machine communication and data organization

14 p2554 A70-30663

Integrated circuits design by combined automatic and manual system

14 p2554 A70-30670

Workmen as environmental variables in design, introducing Human Factors Report during spacecraft components manufacture and testing

15 p2693 A70-32636

Personnel subsystem reliability through empirical approach, determining relations of man-hardware-procedure systems

15 p2804 A70-32665

Dynamic systems control and guidance by man in light of anthropotechnics, treating approaches to man machine systems optimization

16 p2850 A70-33263

Field maintenance interface between human engineering and maintainability, discussing air defense system malfunction and troubleshooting deficiencies

16 p2852 A70-33665

Interactive computer graphics in six degree of freedom control, lunar roving vehicle navigation, orbital elements calculations, drop test simulation, etc

16 p2869 A70-33726

Concorde aircraft man machine simulation and handling using fixed cabin, variable stability and ground based simulators

[AIAA PAPER 70-923]

17 p3064 A70-35834

Commercial aircraft flight deck systems controls and time sharing displays, emphasizing crew management

[AIAA PAPER 70-938]

17 p3021 A70-35847

Computer users functions to determine preparation level for effective dialog with computer, discussing teaching stages

18 p3223 A70-36077

Human operator and computer interrelations, noting sources of error

18 p3223 A70-36079

Adaptation to extreme stimulation in machine-organism system

18 p3224 A70-36529

Soviet book on man in aircraft control system covering engineering psychology, complex flight problems, human factors and instrument panels

19 p3367 A70-37236

Display/control technology for high performance input/output between man and machine, describing man-in-loop simulation

19 p3369 A70-37875

Soviet book on computer design and construction covering man machine interfaces, internal languages, interpretation systems, memory distribution, solution processes, etc

19 p3385 A70-38794

TV display simulation of instrument and visual aircraft landing approaches, investigating color, collimation and resolution effects on pilot evaluations

20 p3578 A70-39172

Aerospace digital computer and avionics systems man machine relationship optimization, considering human information and control response requirements

21 p3794 A70-41688

Computerized aerospace systems man machine interface mechanization for performance optimization, emphasizing integrated approach to avionic displays

21 p3795 A70-41689

Graphical link between operator and digital computer using CRT display and light-pen input system during automatic electronic circuit design

23 p4150 A70-43952

Electronic equipment automated testing objectives and requirements, considering man machine interaction, system controls, on-line reporting, and software/hardware availability

23 p4174 A70-44541

Integrated regenerative life support manned tests for space laboratory design and development

23 p4154 A70-44632

Manned spacecraft onboard data management systems, discussing information transfer, processing, control, display and man machine interface

23 p4167 A70-44647

Interactive man computer systems evaluation considering speech communication, SKETCHPAD and graphics capabilities, FORTRAN and programming languages and future manned space missions

[AIAA PAPER 70-1292]

24 p4317 A70-45928

Pilot interface with area navigation system, describing control and display unit for navigation situation, flight plan and system status

[AIAA PAPER 70-1335]

24 p4373 A70-45933

Computer optimization program for solid state components and integrated circuits design with conversational system for man machine dialogues

24 p4317 A70-46321

MAN OPERATED PROPULSION SYSTEMS

Man powered aircraft /MPA/ designs, considering bird flight aerodynamic characteristics

14 p2531 A70-30859

Extravehicular activity maneuvering devices, describing design and performance of Gemini project unit

21 p3929 A70-41075

MANAGEMENT

NT CONFIGURATION MANAGEMENT

NT CONTRACT MANAGEMENT

NT FINANCIAL MANAGEMENT

NT INDUSTRIAL MANAGEMENT

NT PERSONNEL MANAGEMENT

NT WATER MANAGEMENT

Management systems growth in relation to computer applications development, noting second industrial revolution

10 p1971 A70-24661

Criticism of public administration aspect of Edwards Report, noting parliamentary and constitutional difficulties in some proposals

11 p2153 A70-25857

MANAGEMENT INFORMATION SYSTEMS

Cost reduction and products reliability and quality maintenance by combining accurate cost reporting system with proper quality level control

14 p2669 A70-31108

ELDO project planning and progress monitoring system for management provided by Central Planning and Progress Monitoring Service

21 p3956 A70-41497

MANAGEMENT PLANNING

NT PRODUCTION PLANNING

Soviet book on operational maintenance of flight vehicles /civilian/, emphasizing maintenance under various climatic conditions

01 p0004 A70-10502

Mission simulation mathematical modeling technology developed for optimization of experiment program management and operational planning for manned space station missions

[AIAA PAPER 69-1065]

01 p0181 A70-10634

Operational planning system for Strategic Air Command for data accessing, generating, displaying and editing using computer complex

01 p0048 A70-11282

Book on technological forecasting covering philosophical basis, Federal Government activity, R and D management resource allocation, correlation and regression analysis, etc

01 p0221 A70-11307

Integrated materiel management for systems or product costs reduction applied to high cost spares management

02 p0401 A70-11671

Spares management of large aircraft contract in relationship to total integrated logistics support systems management

02 p0401 A70-11672

Operations research in fleet planning, discussing forecasting, frequency planning, operation simulation, traffic and revenue forecasting, etc

02 p0401 A70-11745

Technology transfer techniques within business firm, including specific examples used by successful companies

02 p0403 A70-12635

Optimum balance between program and functional organizations to promote technology transfer

02 p0403 A70-12637

Technology transfer experience in terms of aerospace company policies and technical management mechanics

02 p0389 A70-12638

Surveyor project as basis for technology transfer management exemplified by planning and organization problems

02 p0403 A70-12639

Computerized airline fleet planning methods for aircraft economics and airline operations

[SAE PAPER 690415]

03 p0609 A70-12898

European application satellite systems operation by administrative organizations dealing with communications, earth resources determination and industry participation

03 p0609 A70-13839

AMPROD /Automated Mission Profile Design/ generating schedules for long duration missions with real cost and time savings

03 p0581 A70-14023

Managerial practices of problem identification, discussing research study in operating division of large corporation

03 p0610 A70-14051

Management role in air traffic controllers stress reduction, considering human factors affecting ATC system capacity

03 p0439 A70-14316

Computer display graphic technique for business decision making, noting electronic aids

05 p0959 A70-16451

DOD systems acquisition management tools and policies, emphasizing role of development concept paper and outside personnel dialogue in DOD decision making

05 p0959 A70-16460

Cost/schedule planning and control system /C/SPCS/ providing early exposure of inadequacies in work execution and initial planning

05 p0959 A70-16461

Systems engineering management process for satisfying MIL-STD-499 requirements, detailing functional analysis, tradeoffs and resulting design analysis data

05 p0959 A70-16462

Integrated USAF acquisition management systems approach engaging top management abilities available in government and industry

05 p0959 A70-16463

R and D laboratories quality and performance evaluation techniques, describing Apstein- modified Pelz technique

06 p1185 A70-17603

Aerospace scientific and engineering work force movement between geographical areas and resource location

07 p1426 A70-18799

Decision trees application to research projects selection, cost stages, probable return on investment and control device

07 p1427 A70-19001

Team hiring of research scientists by industrial and academic organizations, discussing causes and influence on R and D organizations management and design

07 p1427 A70-19002

Isochronal maintenance inspection management of Military Airlift Command /MAC/, noting C-141 utilization rate

07 p1428 A70-19673

Ground and onboard electronics systems for space shuttle vehicles, discussing role in equipment reliability and maintainability, life cycle costs, management control, etc

[AIAA PAPER 70-261]

07 p1398 A70-20391

Automatic test equipment programming for cost reduction by eliminating duplicated effort between manufacturers of test equipment and unit to be tested

08 p1464 A70-20658

Coupling relations in product and systems development linking ideas to finished products

08 p1601 A70-20824

Machinery for management of Sea Dart missile development using managerial concepts of planning, organizing, commanding, coordinating and controlling

08 p1601 A70-21036

Management planning for French-British Martel /Missile Antiradar et Television/ project, emphasizing tasks of government agencies and contractors

08 p1601 A70-21038

International aircraft engine industry management in Europe, discussing cooperation, corporations, U.S. competition and structural changes

09 p1792 A70-22339

Government environment challenges to government sponsored big technology management illustrated by space nuclear engine research program

09 p1792 A70-22494

Quality planning for Japanese solid propellant sounding rocket motor production, discussing documentation, design, development and process controls, inspection and tests, etc

09 p1691 A70-22570

User information traffic forecasting method for operational Earth Resource Satellite System, discussing user expectations

[AIAA PAPER 70-293]

09 p1793 A70-22890

Federal contract research centers objectives, characteristics, crucial issues and future

09 p1793 A70-22971

Technology transfer or coupling from corporate viewpoint, discussing organizational responses to literature mushrooming, time compression of technological advance, etc

09 p1794 A70-23411

Technological forecasting for management planning, discussing structuring, prediction techniques, personnel selection, quantification, etc

09 p1794 A70-23413

Technological forecasting for R and D planning including project selection and resource allocation decision making

09 p1794 A70-23416

Technology or Research Quantitative Utility Evaluation /TORQUE/ system genesis and operation, with implications affecting R and D

09 p1795 A70-23418

Management planning for global atmospheric research program /GARP/ applied to climatology and weather forecasting

09 p1795 A70-23545

Models survey for evaluation and selection of research projects, discussing reasons for long range company

10 p1970 A70-24070

Integral systems management, discussing application and organizational prerequisites

10 p1970 A70-24595

Aerial photography applications to timber management programs of forest industries

10 p1879 A70-24746

- Integrated planning and testing for systems reliability improvement
[AIAA PAPER 70-391] 10 p1896 A70-24914
Apollo Lunar Module Test Program Management, discussing test requirements optimization, control, planning, etc.
[AIAA PAPER 70-368] 10 p1952 A70-24932
Personnel and organizational policies for university research management 12 p2336 A70-27750
Management science concepts tested for feasibility in large organization top management positions using questionnaire technique 13 p2524 A70-28825
Project cost estimate growth pressures on decision making by U.S. Air Force System Program Office director 14 p2667 A70-30521
Government defense contract warranties in terms of consumer interests protection and economics 14 p2667 A70-30522
Incentive earnings and payments in CPIF /cost plus incentive fee/ contracts, considering legal principles 14 p2668 A70-30523
Price estimate elements interrelationship using three dimensional matrix for computerized cost data extraction 14 p2668 A70-30524
Contractor all risk incentive contract /CARIC/, discussing innovative features and negotiation elements 14 p2668 A70-30525
Military aviation economics in UK emphasizing aircraft industry and government cooperation in meeting RAF requirements 14 p2668 A70-30938
Corrective Action systems for identification, control and resolution of manufacturing, engineering and vendor problems 14 p2669 A70-31102
Apollo project overview and quality-cost effectiveness assurance requirements for future space programs 14 p2654 A70-31103
Quality control role in configuration management, considering quality assurance organization of aircraft manufacturer 14 p2669 A70-31104
Quality control variables optimization for maximum net revenue, using computerized simulation 14 p2592 A70-31105
Quality evaluation surveys performance by contractors 14 p2669 A70-31106
Project authority relationship concerning manager authority and influence in five organization models 15 p2828 A70-31571
Decision making role in management contribution towards success of research and development based on statistical decision theory 15 p2828 A70-31573
Forecasting necessity and limitations in management decision making process 15 p2829 A70-31574
SST system safety program, discussing federal office structure, planning and control, design support, integration and evaluation, requirement analysis and failure recurrence control 15 p2675 A70-32214
Management role in flight operations safety, stressing need for confidence and discipline 15 p2831 A70-32218
Reliability program planning and organization as part of integrated Development Risk Management System, considering task identification, assignment and accomplishment 15 p2747 A70-32628
Effective R and D management working principles, discussing changing goals, policy and technology changes, environment, adequate reporting, etc. 16 p3004 A70-33663
Technological forecasting as management concept in decision making process 17 p3199 A70-34679
Management program for digital data systems maintenance and repair 17 p3200 A70-35487
Successful application development and implementation of data processing system, noting sequence, magnitude, manpower and time required 17 p3200 A70-35507
Airline maintenance department assurance of air service regularity, stressing management role 17 p3065 A70-35855
Management information systems based on Apollo program experience, considering improvements in data accuracy, display, feedback, etc. 19 p3553 A70-37862
Multi-aircraft flight test program time compression by management techniques, discussing program length and costs 19 p3355 A70-38530
Value engineering for British aerospace industry management planning 19 p3555 A70-38619
- Cost and time optimization for complex aircraft development projects via network planning 20 p3740 A70-39644
Optimal R and D planning from estimated efficiency of research projects or national programs 20 p3740 A70-39646
Predictive model for potential variance from planned schedule of R and D tasks to minimize risk in management 21 p3955 A70-41172
Military program cost effectiveness and control, considering resources and products 21 p3955 A70-41173
R and D programs engineering talent assignment case histories 21 p3955 A70-41174
Inlet data for engine stability analyses, developing technical management procedure patterns for pretest test and posttest results [AIAA PAPER 70-1214] 21 p3745 A70-41320
U.S. and Soviet space program administration and management 21 p3956 A70-41893
Lunar launch vehicles quality control and reliability, describing management procedures for test facilities, preproduction and purchased materials quality 22 p4126 A70-42384
Air cargo management problems, discussing economics, ground handling, Jumbo jets, terminal facilities, mechanization, document handling, information flow, data systems, etc. 22 p4006 A70-43269
Technology relevance to organizational structure, discussing planning models based on problem solving and performance 23 p4284 A70-43995
Space shuttle economic risk analysis, using computer program as design and management tool 23 p4261 A70-44674
International earth orbital space laboratory program, discussing objectives, management, stations, shuttles, tugs, tracking, communication, data distribution network, etc. 23 p4262 A70-44687
International Space Research Organization /ISRO/ for space operations, considering political, economic, technical and scientific requirements 23 p4286 A70-44688
Aktion X program for production efficiency, mobilizing personnel in weak points monitoring 24 p4430 A70-45624
Cost/design performance management system, noting cost reduction and avoidance needs during design definition 24 p4430 A70-45866
[SAE PAPER 700772] Financing methods for airport redevelopment and expansion, discussing economic and political framework of operations 24 p4430 A70-45920
[AIAA PAPER 70-1267] MANDELSTAM REPRESENTATION
Stimulated Mandelstam-Brillouin scattering and fracture of molten quartz and silicate glasses produced by laser giant pulse 11 p2061 A70-25380
Stimulated Mandelstam-Brillouin and entropy backscattering of light pulses, determining intensity and spectral distribution allowing for fluctuations in medium 12 p2248 A70-27550
- MANDRELS
Mandrel adhesion and cure shrinkage impact on structural integrity of solid propellant grain 09 p1742 A70-23263
- MANEUVERABILITY
Electrical signaling civil aircraft systems, discussing design and integrated maneuver demand controls 02 p0224 A70-11835
VTOL transport aircraft stability and maneuverability compared with conventional aircraft 02 p0228 A70-12759
Tactical fighter requirements and designs, considering operational environment and weapon characteristics with emphasis on turning performance [AIAA PAPER 70-516] 13 p2346 A70-29035
AH-1G Hueycobra helicopter stability, control, performance, vibration and structural loads characteristics during controlled steady state maneuvers 17 p3014 A70-34716
Maneuver load alleviation /MLA/ configurations for wing bending load relief on transport aircraft, showing improved payload and span performance [AIAA PAPER 70-877] 17 p3016 A70-34813
Single and coaxial dual rotor helicopter piloting characteristics during turning flight, discussing operational problems in snow 22 p3962 A70-43530
Lifting reentry flight test vehicle aerodynamic configuration development, emphasizing lateral stability and maneuverability [ICAS PAPER 70-02] 23 p4257 A70-44118
Maneuver demand control using electric signalling feedback technique in Avro 707C and Hunter Mk 12 aircraft 24 p4374 A70-46203
- MANEUVERABLE SATELLITES
U MANEUVERABLE SPACECRAFT
U SATELLITES
MANEUVERABLE SPACECRAFT
NT APOLLO SPACECRAFT
NT FERRY SPACECRAFT
NT LIFTING REENTRY VEHICLES
NT RENDEZVOUS SPACECRAFT
Thermal protection systems /TPS/ design criteria for maneuverable reentry spacecraft, comparing weight and cost for various alloy systems 02 p0392 A70-11940
Optimal control program using multiple maxima method for maneuvering spacecraft in earth atmosphere with aim of changing orbital plane 07 p1331 A70-19483
Optimal control program using multiple maxima method for maneuvering spacecraft in earth atmosphere with aim of changing orbital plane 15 p2813 A70-32728
Space shuttle atmospheric maneuvers, examining booster and orbiter entry, flyback and abort [AAS PAPER 70-047] 17 p1375 A70-34787
- MANEUVERS
NT EARTH ORBITAL RENDEZVOUS
NT LUNAR ORBITAL RENDEZVOUS
NT ORBITAL RENDEZVOUS
NT SPACECRAFT DOCKING
NT SPACECRAFT MANEUVERS
Loading conditions measured during aerobatic maneuvers in flight test to determine structural design requirements for aerobatic-type aircraft [SAE PAPER 700222] 11 p1980 A70-25894
Helicopter rotor blade differential pressure and structural load characteristics in transient and steady state maneuvers 17 p3016 A70-34739
- MANGANESE
NT MANGANESE ISOTOPES
Manganese and sulfur content effects on martensitic stainless steels machinability, describing effects on mechanical properties, cold formability and corrosion resistance 03 p0507 A70-13135
Pelagic sediment natural spherules identification based on formation process and manganese nodules abundance 13 p2400 A70-29859
Manganese deficiency effect on chlorophyll fluorescence in algae adapted to hydrogen, determining electron transport mechanism 16 p2848 A70-33291
Mn and Ti effects on hardening of Fe-Ni-Mn-Ti and Fe-Ni-Mn maraging martensitic steels 17 p3125 A70-35145
- MANGANESE ALLOYS
NT MANGANIN [TRADEMARK]
Temperature dependence of magnetic susceptibility in liquid and solid states of binary Al-Mn alloys with additions of Cr, V and Ti 02 p0316 A70-12300
Fe-Cr-Mn-Ni system studied to obtain high Mn austenite and establish boundaries in quaternary system 03 p0509 A70-13278
Ternary Al-Mn alloys precipitation hardening with Cr, V and Ti, investigating ferro and ferrimagnetic phases 07 p1307 A70-19390
Phase diagram of rapidly crystallized Al-Cu-Mn alloys, observing ternary solid solutions formation during high cooling rate of melt 09 p1709 A70-23786
Quenched MnBi thin films measured for magnetic, magneto-optical and optical properties, noting Faraday rotation 12 p2284 A70-27246
Internal friction in hydrogenated Ti-Mn alloys, observing relaxation peak formation under stress induced hydrogen diffusion in beta phase 16 p2930 A70-33082
Physical properties and structure of Cr-Ni austenitic stainless steels with high Mn and N content as function of temperature 17 p3125 A70-35143
Ti-Mo and Ti-Mn alloys omega transition phase, describing shape and crystallographic characteristics 24 p4361 A70-46178
- MANGANESE COMPOUNDS
NT MANGANESE PHOSPHIDES
NT PERMANGANATES
Phase equilibria in Mn-S, Mn-Se and MnS-MnSe systems by X ray diffraction after preparation by annealing 02 p0249 A70-11652
Iodine concentrations, temperature gradients and transport ampules etching effects on mass transport rate and crystal growth of MnS-MnSe-iodine system 16 p2960 A70-33088
Knudsen effusion measurements of stoichiometric MnTe sublimation at high temperature and low pressure 21 p3773 A70-41273

MANGANESE IONS

- Antiferromagnetic resonance measurement in manganese difluoride as function of microwave frequency, sample size and shape 21 p3850 A70-41908
- Magnetic properties of lanthanum calcium manganate, making stoichiometric specimens by controlling oxygen partial pressure 24 p4390 A70-45602
- ### MANGANESE IONS
- Electron paramagnetic resonance of Mn ions in single crystal and powder forsterite, testing heat treatment and proton irradiation effect on ordering 16 p2960 A70-33008
- Calcium ion role in myocardial cell electrical and mechanical trace processes under normal content and manganese blocking 18 p3221 A70-36640
- Neel temperature of thermally stable garnet orthoerites of YFeAlMn composition 19 p3484 A70-37623

MANGANESE ISOTOPES

- Half life of Mn53 calculated from measured activity in sample from Fe meteorite and isotopic ratio Mn53/Mn55 07 p1337 A70-19226

- Underwater saturation habitats application as behavioral workshops for mission planning and human engineering of manned space flight, discussing Project Tektite [AIAA PAPER 69-1120] 01 p0034 A70-10611
- Manned vehicles rendezvous missions in space and hydrospace, proposing functional structure involving concurrent ship control, navigation, perception, communication and prehension [AIAA PAPER 69-1102] 01 p0034 A70-10615

- Mission simulation mathematical modeling technology developed for optimization of experiment program management and operational planning for manned space station missions [AIAA PAPER 69-1065] 01 p0181 A70-10634
- Langley integrated life support system design, discussing manned test results including system engineering, atmospheric and water chemical analyses and microbial measurements 01 p0038 A70-10973
- Manned space station system design requirements, discussing logistics interaction and station autonomy [AIAA PAPER 69-1063] 02 p0382 A70-12528
- Radiation level recordings during Soyuz manned orbital flights indicating safety standards maintenance 03 p0580 A70-13704
- Respiratory and cardiac activities, body weight variations, blood and urine electrolytic composition of astronauts during Soyuz orbital flights from medical tests 03 p0423 A70-13709
- Pharmacology for long term manned space 04 p0629 A70-14566
- Circadian rhythms characteristics in humans, animals and plants, noting possible effects of rhythm disturbances on astronauts 04 p0629 A70-14567
- Sweet potatoes productivity and nutritive value as carbohydrates source in manned space flights 04 p0641 A70-14572
- Space flight emergencies causes and consequences, underlying life threats and crew survival times, considering equipment failures, personnel errors, etc 04 p0761 A70-14926
- Parametric performance and cost comparison of separate and integral vehicle concepts for manned space activity using payload criterion 04 p0763 A70-15420
- Regenerative life support system development for multiman crews on extended space missions, considering maintainability, reliability and automation [SAE PAPER 690637] 05 p0804 A70-15845
- Command and control functions of DOD Manager for Manned Space Flight Support Operations in spacecraft recovery 05 p0827 A70-16180
- Display/control system and key technical decisions at Manned Space Mission Control Center, discussing command consoles 05 p0829 A70-16194
- Soviet book on piloted flights in near space with lunar landing, discussing flight mechanics of orbital aircraft, launching into space, maneuvering, etc 05 p0923 A70-16554
- Manned space flight requirements connected with cabin atmosphere, food/water supplies and waste disposal and environmental conditioning 05 p0807 A70-16632
- Spacecraft design for manned interplanetary missions, considering structural materials and weights, cryogenic insulation, meteoroid protection, landing gear, etc 05 p0924 A70-16720
- Electric propulsion system and initial gross weights estimation for manned Mars missions 05 p0924 A70-17093
- Dosimetry data and personal radiation sensors from Apollo and Gemini flights, noting spacecraft geometry shielding effects 06 p1134 A70-17268
- Soviet manned space flight radiation dosimetry evaluation, comparing U.S. and Soviet techniques for astronaut protection 06 p0990 A70-17271
- Systems engineering aspects of Apollo Telescope Mount spacecraft, considering design and manned space flight role 06 p1061 A70-17312
- Short duration manned Mars and Venus exploration mission planning with chemical propulsion and Saturn 5 boosters [AIAA PAPER 70-59] 06 p1147 A70-18238
- Artificial effects on atmosphere and near-earth space caused by human activity, discussing occurrence altitude, means of action and consequences 07 p1262 A70-18778
- Spacecraft incorporated emergency rescue systems, discussing design of nonseparable crew escape compartment and separable capsule 07 p1218 A70-19010
- Physiological and hygienic data on oxygen partial pressure in space cabin atmosphere analyzed for manned space flights 07 p1220 A70-19502
- Automatic control of continuous medical monitoring in manned space flight 07 p1220 A70-19512
- Astronauts visual performance during space flight, studying reduction of visual disturbances from various physiological flight factors 08 p1444 A70-20741
- Premission planning and operational radiation dose limits for manned lunar and low earth orbit missions 08 p1454 A70-21940

National Space Program relevance to human society, discussing solar system exploration, applications in meteorology, communication, etc
09 p1792 A70-22041

Manned Mars mission planning, discussing technologies and costs for planetary landing
09 p1757 A70-22676

Earth resources program function of early orbital manned space station in remote sensing
09 p1687 A70-23760

Interstellar flights, discussing human limitations, star systems with habitable planets and possible galactic communities
10 p1943 A70-24759

Maintainable electronic equipment requirements for long duration manned space missions
10 p1852 A70-24895

Radiation level recordings during Soyuz manned orbital flights indicating safety standards maintenance
11 p2121 A70-25504

Respiratory and cardiac activities, body weight variations, blood and urine electrolytic composition of astronauts during Soyuz orbital flights from medical tests
11 p1985 A70-25509

Asteroid vs planet for manned landing site, considering Martian moons mission
11 p2108 A70-25660

Physiological and hygienic data on oxygen partial pressure in space cabin atmosphere analyzed for manned space flights
11 p1991 A70-26101

Automatic control of continuous medical monitoring in manned space flight
11 p1991 A70-26111

Manned space flight role in earth orbital space astronomy, examining long range program
12 p2297 A70-26997

Manned laboratories in space - Conference, New York, October 1968
12 p2313 A70-27741

Manned Mars flyby/orbiter mission, discussing cost, scientific returns, technology advances, popular support, etc
12 p2304 A70-27749

Earth orbital parameters estimation in manned flight by manual space navigation sensors and computer
13 p2446 A70-28406

Spaceborne information processing for manned missions, describing layered system with fault tolerance and onboard checkout
13 p2372 A70-28415

Permissible radiation exposure levels during prolonged space flights based on clinical data
13 p2351 A70-29336

Stomatologic diseases during prolonged space flights simulation, discussing gingivitis, stomatitis, dental caries, parodontitis and odontogenous inflammations
13 p2352 A70-29338

Ground support real time operating system 360 for manned spaceflight, discussing system features and performance
13 p2375 A70-29937

Extraterrestrial resources for space flight maintenance and human life support in space and on extraterrestrial bodies
14 p2634 A70-30199

Weather forecasting for manned space flights, emphasizing Apollo flights and operational decisions due to forecasts
14 p2606 A70-30557

Infection resistance during extended space flights, discussing microfloral exchange, defense mechanisms, waste, etc
15 p2688 A70-31677

Lunar exploration by manned and unmanned space flights, discussing seismology, composition, surface features, etc
15 p2798 A70-31678

Astronomical observations, discussing advantages of human operators on interplanetary spacecraft or Mars
15 p2810 A70-31853

Radiation planning nomogram to display radiobiological effects of dose, onset time and shielding factors for manned space vehicles
15 p2690 A70-31894

Soyuz-9 manned space mission, outlining craft occupants personal background and statements
15 p2813 A70-32792

Spacecrew candidates leisure time preferences, discussing off-duty concepts for long space missions
16 p2853 A70-33709

Manned planetary flight systems engineering, discussing feasibility, objectives, propulsion, trans-planet injection via geospace shuttle station, energy requirements for various synodic modes
17 p3155 A70-34778

Multi-orbit injection earth departure technique for optimal thrust-weight ratio in manned interplanetary missions using NERVA engine
17 p3175 A70-34780

[AAS PAPER 70-039]

Future manned planetary missions with reusable nuclear shuttles, comparing operating modes in terms of propellant requirement, costs, complexity, etc
17 p3155 A70-34781

Manned planetary spacecraft and space stations as ecological systems, considering common features
17 p3176 A70-34799

Expandable and modular structures technology for manned and unmanned space missions, discussing expandable air lock experiment
17 p3177 A70-35230

Systems design experience derived from Mercury Gemini and Apollo projects, discussing thermal protection, launch propulsion, life support, etc
17 p3180 A70-35644

Medicobiological approach to living conditions for sustained residence and human activity during prolonged space flights, describing sealed chamber experiment
19 p3367 A70-37525

Microwave feeding system for heating and cooking prepackaged meals during extended space missions
19 p3368 A70-37747

Manned space station design, discussing durations of scientific experiments and crew operation
19 p3532 A70-37752

Space maintenance tools necessity on long duration manned space missions 1972-1980
19 p3442 A70-38836

Manned Mars lander launch-to- rendezvous analysis, using subsequent Venus swingby for mission velocity requirement reduction
19 p3530 A70-38887

Astronaut weight loss relation to flight duration during manned space missions
20 p3574 A70-40125

Medical support for long space missions based on space crews morbidity prediction, discussing onboard equipment and astronaut training
20 p3575 A70-40194

Environmental control-life support systems /ECLSS/ waste methane gas utilization in low thrust resistojet for manned space applications
20 p3568 A70-40214

Shock tube facility with high explosive driver for reentry flow conditions simulation of manned planetary flights
21 p3804 A70-40849

Gravitational experiments in manned spaceflight employing Eotvos balance in orbit and direct force technique
21 p3929 A70-41002

Book on decision making in U.S. manned lunar landing commitment covering space policy, technical planning, national interests, Apollo experience, etc
22 p4126 A70-42314

Combined space and nuclear radiation effects in manned space flight
22 p3978 A70-43184

Manned space program goals, discussing orbiting observatories, lunar bases, biological and earth resources satellites
22 p4128 A70-43627

Decompression sickness prevention in space flight, discussing suit and capsule pressure, extravehicular activity and alleviation of conditions
22 p3980 A70-43640

Biological compatibility problem in long duration space operation crew change, discussing human metabolic processes and difference effects
22 p3980 A70-43641

Space station program information management system involving data acquisition and extended manned flight operation with minimum ground support (IBM-70-U60-0015)
23 p4164 A70-44637

Manned space flight programs management, discussing organizational aspects of projects including Apollo, space shuttle and space station
23 p4286 A70-44696

Manned space flight regenerative life support systems requirements, considering weight, volume, power, cost effectiveness and integration problems
23 p4156 A70-45023

Free-flying modules interface and operation in conjunction with space station for orbital research into manned space program
24 p4417 A70-45950

Manned reusable space transportation system technology requirements and vehicle types
[AIAA PAPER 69-1116] 01 p0194 A70-10613

Manned space station power systems design and selection problems, discussing requirements based on impacts on space station design and operations
[AIAA PAPER 69-1081] 01 p0008 A70-10625

Tradeoff criteria between man machine and automated space systems applied to lunar and cosmic ray explorations
[AIAA PAPER 69-1045] 01 p0034 A70-10644

Minimum fuel consumption criteria applied to design of manned spacecraft attitude control system, using reaction jets for lateral and directional controls
01 p0196 A70-10950

Man machine system consisting of manned station controlling distant spacecraft via wideband radio link
02 p0229 A70-12145

Artificial gravitation parameters for manned compartments of spacecraft, analyzing permissible angular velocity and rotation radius regarding vestibular-vegetative disorders
04 p0760 A70-14446

Nuclear propulsion requirements for manned landing mission to Mars assuming Saturn 5-based operation
07 p1375 A70-18874

Unmanned and manned interorbital shuttle systems for satellite placement and repair and planetary spacecraft insertion, emphasizing cost analysis
[AIAA PAPER 70-267] 07 p1398 A70-20396

Control display requirements for manned spacecraft, integrating human operator with vehicle control system and determining man machine relations in stabilization, control and guidance
08 p1498 A70-21678

Manned and unmanned earth resources observation satellite program, noting international cooperation
10 p1971 A70-24636

Manned and unmanned earth observation satellite programs technology gains, discussing atmospheric temperature, pressure, winds, clouds and moisture
10 p1876 A70-24637

Nuclear pulse propulsion system for manned missions to outer planets of solar system, discussing energy and travel time requirements
11 p2082 A70-26059

Manned space stations size, crew, orbit, lifetime, resupply requirements, etc
12 p2313 A70-27742

Artificial gravitation parameters for manned compartments of spacecraft, analyzing permissible angular velocity and rotation radius regarding vestibular-vegetative disorders
13 p2503 A70-28471

Statistical error analysis of autonomous manned spacecraft navigation in long duration eccentric Mars orbits
[AIAA PAPER 69-880] 15 p2773 A70-32503

Space based reusable manned/unmanned tug, discussing potential missions, system requirements and auxiliary hydrogen oxygen propulsion system
[AIAA PAPER 70-719] 16 p2964 A70-33533

Onboard automatic checkout systems for manned space vehicles, investigating data management development costs for thorough tradeoff studies
16 p2889 A70-33803

Unmanned and manned interorbital shuttle systems for satellites placement and repair and planetary spacecraft insertion, emphasizing cost analysis
[AIAA PAPER 70-267] 17 p3172 A70-35650

Earth resources data from man operated airborne/spaceborne sensors and data handling systems, examining Apollo Applications Program
20 p3616 A70-39056

Human mass exchange parameters permissible errors for manned space vehicles life support systems design
20 p3581 A70-40200

Flame resistant nonmetallic materials for manned spacecraft and aircraft interiors, considering fibers, polymers, paper and composites
22 p4058 A70-42295

Planetary probes, orbiting space stations and manned spacecraft in interplanetary flights, discussing Mariner, Gemini and Apollo reentry and Venus landing
22 p4109 A70-42313

Decompression hazards in manned orbiting systems, considering consciousness time, survival, pathological response, water vapor and denitrogenation effects and recompression rates
22 p3973 A70-43638

Rapid decompression due to pressure loss in space vehicle or suit, discussing fulminating hypoxia, mechanical trauma and ebullism
22 p3973 A70-43639

Man-rated chamber facilities at Manned Spacecraft Center /MSC/, discussing safety requirements and criteria, environmental test chamber design and test results
23 p4152 A70-44458

- Manned spacecraft nonmetallic construction materials selection criteria, testing and configuration control, considering flammability hazard 23 p4152 A70-44462
- Manned spacecraft onboard data management systems, discussing information transfer, processing, control, display and man machine interface 23 p4167 A70-44647
- Automated and manned spacecraft design, discussing mission objectives and present and potential applications 23 p4264 A70-45003
- Manned spacecraft abort guidance and control problems, discussing various modes and emergency conditions 24 p4374 A70-46210

- Manpowered aircraft, considering possibility as future flying sport vehicles [AIAA PAPER 70-879] 17 p3016 A70-34809
- Air cargo terminal operations analysis, discussing manpower cost reduction 20 p3607 A70-40127
- MANTLE [EARTH STRUCTURE]
U EARTH MANTLE
MANUAL CONTROL**
- Task interference model for interference among two or more continuous manual control tasks, suggesting metric for pilot mental workload 02 p0244 A70-12139
- Supervisor sampling frequency maximizing given value or payoff function, discussing applications to controlling vehicle, information system or institutions 02 p0307 A70-12141
- Speed and accuracy of foot operation of controls tested by circular targets in rows within reach of right foot 02 p0245 A70-12144
- Man machine interface in VTOL aircraft control and stabilization systems adaptation during manually controlled hovering flight 03 p0414 A70-14094
- Tactile control in man machine systems using feed-forward loops to provide rate information, noting un-manned aircraft and machine-tool applications [ASME PAPER 69-WA/BHF-14] 04 p0642 A70-14855
- Horizontal transverse vibration effects on manual tracking performance, relating tracking errors to frequency rather than acceleration 04 p0643 A70-14981
- Human controller in psychology and control engineering, discussing linear and nonlinear modeling of human behavior 05 p0807 A70-16487
- Biological model describing spacecraft operator sensorimotor activity in response to various spacecraft control stimuli, outlining computer algorithm 05 p0810 A70-17118
- Manual onboard orbit determination assuming electronic equipment failure, discussing geometric in-plane orbital parameters and safe orbit check [AIAA PAPER 70-159] 06 p1144 A70-18033
- Decision algorithms simulating human controller adaptive behavior in controlling VTOL aircraft in hover following stability augmentation system failure 07 p1216 A70-18860
- Simulator servo drive system dynamic requirements for single-axis manual control task using pilot models and computer [AIAA PAPER 70-355] 10 p1858 A70-24208
- Remote signal measurement and analysis in hazardous environment by command terminal utilizing manual or computerized control 12 p2201 A70-28134
- Manual spacecraft rendezvous system based on handheld instruments and manual computations, considering error analysis and simulation 13 p2357 A70-28392
- Manual control systems for spacecraft stabilization involved in rendezvous, midcourse correction, landing, etc 13 p2357 A70-28394

- Hypokinesia effects on working capacity of sub-jects performing manual aircraft control assignments during bed rest 13 p2352 A70-29340
- Relative cost benefits estimation of manual and automatic test systems for avionics in maintenance organization, proposing integrated maintenance and ATC data system 13 p2525 A70-29679
- Radio and electronic equipments production testing by automatic equipment combined with semiautomatic manual controller 13 p2379 A70-29680
- Mathematical models for human adaptive and optimizing characteristics in manual control systems regarding behavior phase 13 p2360 A70-29780
- Motion cue requirements in one and two axis closed loop compensatory control tracking tasks, discussing error rates 14 p2540 A70-30247
- Optimal manual control model of human compensatory tracking response 14 p2543 A70-31408
- Model for pilots optimal manual control of hovering VTOL aircraft longitudinal position 14 p2543 A70-31409
- Laser ranging and tracking system consisting of mirror tracking pedestal, instrumentation bay and control van featuring manual/automatic tracking capability 16 p2862 A70-33164
- Display-control relationships in visual display information processing, considering spatial incompatibility effects on reaction time 16 p2852 A70-33661
- Feedback delay effects on eye-hand synchronism in stimulus tracking and steering using self generated body movements 16 p2852 A70-33662
- Head up display /HUD/ flight tests, examining effects decreasing quality of manually handled instrument approach, discussing space myopia and disorientation 16 p2912 A70-33819
- Mechanical and acoustic vibrations signals analyzer, noting automatic or manual operation 17 p3054 A70-35417
- Manual attitude control for Lunar Module employing directional stability, coordinated turn and attitude command 20 p3716 A70-39683
- Longitudinal vibration effects on human reaction time and motor performance involving toggle switch and manual knob control in different working positions 22 p3977 A70-42871
- Pilot hand-held and leg-mounted controllers for precision tracking from aircraft under buffeting tested in static and dynamic motion simulator 24 p4308 A70-45513
- MANUFACTURING**
- Magnetic components design, manufacturing and handling for use in space communication satellites, noting design group role in parts construction and quality control 02 p0267 A70-12057
- Carbon materials manufacture, properties and applications in space technology, discussing carbon fibers, textiles, graphite, pyrolytic carbon, composites and vitreous carbon 03 p0516 A70-13618
- Soviet aerospace manufacturing technologies development, considering forging, extrusion, metal working and joining, etc [SAE PAPER 69-0701] 05 p0853 A70-15826
- Process specifications to control manufacturing operations, describing contents, purposes and preparation, emphasizing three levels of control 06 p1184 A70-17601
- Processing methods for manufacturing composite solid propellants, describing oxidizer, binder and fuel preparation, propellant mixing and chamber insulation and lining and instrumental analysis 07 p1361 A70-19912
- Hazards in manufacturing solid propellants evaluated to design tests and suggest process conditions 07 p1361 A70-19915
- Solid propellant technology, discussing manufacturing processes, sample testing, inspection, etc 08 p1557 A70-20690
- Composite and double base solid rocket propellants manufactured by French factory for ballistic missiles, discussing plant installations 11 p2030 A70-25520
- Manufacturing error rate and inspection efficiency relevance to hardware product reliability 12 p2244 A70-28014
- Titanium alloys powder metallurgy, considering manufacturing methods and physical, chemical and mechanical properties 13 p2435 A70-29214
- Barium fluoride film hygrometer elements for radiosondes, discussing manufacturing and testing methods 13 p2408 A70-29470

- Corrective Action systems for identification, control and resolution of manufacturing, engineering and vendor problems 14 p2669 A70-31102
- Solid state diffusion bonding applied to rocket engine injectors manufacture [AIAA PAPER 70-639] 16 p2968 A70-33597
- Space manufacturing in weightless environment, discussing unique processes, potential materials, product groups, planned experiments for Skylab Orbital Workshop mission, etc 16 p2888 A70-33716
- Orbital zero and low g environment utilization for space manufacturing processes and related operational and tooling requirements 16 p2919 A70-33718
- Systems design and instrumentation for chemical/biochemical space manufacturing at zero g, developing scaling laws for transition to larger production units 16 p2919 A70-33719
- Candidate products for manufacturing on space station, emphasizing liquid solid transformations, bubbles and droplets, polymerization, and cost effectiveness [AAS PAPER 70-036] 17 p3041 A70-34791
- Holographic projection for electronic microcircuit manufacture 17 p3088 A70-35028
- Polyimide prepreps reinforced with glass, carbon and graphite, describing processing characteristics, properties and applications 17 p3127 A70-35419
- Conical expansion nozzles manufacturing errors effect on flow expansion considered for large Mach numbers 17 p3011 A70-35662
- Soviet book on aircraft electrical and radio systems manufacturing, assembling and testing methods, considering effectiveness and standardization 19 p3357 A70-37405
- Space processing under zero gravity conditions, discussing crystal growth, metal glass and ceramic melting and casting and biological product centrifugation and electrophoresis 19 p3436 A70-37926
- Adhesive bonded aircraft structures, discussing methods and requirements for establishment and control of manufacturing procedures 19 p3438 A70-38594
- Translation gap between R and D and production occurring at design transmission to manufacturing 21 p3955 A70-40913
- Parabolic solar furnace for chemical manufacture of impurity sensitive materials in orbiting spacecraft 21 p3804 A70-41001
- Skylab Orbital Workshop fabrication experiments under space environment conditions, discussing weightlessness and vacuum effects on various manufacturing techniques 22 p4046 A70-43075
- Aircraft engine manufacturing technology, discussing metal cutting and forming, bonding, electrochemical machining and electron beam welding 24 p4341 A70-45298
- Computer-aided production engineering involving numerically controlled machines for Rolls-Royce aircraft engines manufacture 24 p4341 A70-45299
- MANY BODY PROBLEM**
- PostNewtonian equations of Brans-Dicke scalar-tensor theory for n gravitating point masses, using obtained equations of motion for radar tracking 02 p0337 A70-11777
- Singularities arising during collisions in restricted n-body problem elimination, discussing Jacobi integral and finite-mass body configuration 04 p0714 A70-15354
- State transition matrix computation method with efficient algorithm for orbit prediction in n-body gravitational field 06 p1095 A70-18497
- Thermoelasticity equations derived for regular systems of M bodies in dynamic and thermal interaction using nonlocal continuous model 07 p1407 A70-19381
- Laser-induced electron emission from metals and insulators in form of evaporated films and single crystals, discussing many-photon photoelectric effects and thermionic emission 08 p1556 A70-21509
- Molecular hydrogen parallel and perpendicular dynamic polarizabilities calculated for frequency dependence, using many body perturbation theory 09 p1731 A70-22780
- BBGKY hierarchy state functional formalism in nonequilibrium statistical mechanics for many particle system using Fourier transformation 11 p2087 A70-26548
- Bipolar moment integral in celestial mechanics formed by product of particle kinetic moments for n body problem order reduction 13 p2494 A70-29399

- Quantum-electrodynamical renormalization for electron charge in metal environment, using solid state many-body techniques 14 p2619 A70-30476
- Stable equilibrium positions for satellite consisting of many rigid bodies in circular orbit about center of gravity, using numerical method 18 p3332 A70-35963
- Many body gravitational problem, computing evolution of two groups by numerical integration with two different computers 19 p3523 A70-38692
- N body numerical integrator using virtual mass technique for computing trajectories with speed and accuracy suitable for spacecraft onboard computer applications [AIAA PAPER 70-1057] 19 p3528 A70-38872
- Coherent behavior associated with thermodynamic description projected from dynamical behavior of many body system, using relation between asymptotic operators 22 p4062 A70-42547
- Satellites with many flexibly coupled rigid bodies, calculating libration upper bounds for predicting perturbation and stability 23 p4262 A70-44682
- MANY PARTICLE THEORY**

- Aircraft manufacturing market research including cost compatibility with resources and capabilities 14 p2668 A70-30937
- Corrective Action systems for identification, control and resolution of manufacturing, engineering and vendor problems 14 p2669 A70-31102

Material data file and retrieval system for designers in automotive, equipment and appliance industries, discussing applications to other FRP markets
16 p2935 A70-33352

Export market research for military aircraft
19 p3555 A70-38618

Project economic evaluation, discussing value analysis from market research recommendations
19 p3555 A70-38620

European airbuses designs, considering commercial market and financial problems
19 p3357 A70-38952

Glass drainline development and marketing, describing technology transfer role
20 p3740 A70-39100

MARKING

NT ISOTOPIC LABELING

Cross hatching on various body surfaces due to periodic surface pressure fluctuations, discussing in boundary layer
[AIAA PAPER 69-11] 09 p1662 A70-23223

MARKOV CHAINS

Communication channel average binary error and stationary Markov chain state probabilities relationship, using mathematical model and HF ionospheric FSK error sequence measurement
08 p1458 A70-20793

Viterbi decoding error probability for convolutional codes using finite Markov chain modeling
08 p1458 A70-20794

Transition matrix of Markov chain with finite states from noisy measurements of state, discussing algorithms convergence rates and computations
12 p2261 A70-27421

Limiting distributions of sums of random variables coupled in homogeneous Markov chain with finite number of states
12 p2261 A70-27551

Optimal control of systems with time transitions described by finite state stationary Markov chain, noting resetting control
13 p2382 A70-29065

Transition probabilities for Markov chain describing bond breaking and molecular energy transfer in vibrational relaxation and dissociation
16 p2953 A70-33009

Convolutional code decoder modeled as autonomous stochastic sequential machine, considering finite Markov chain theory for error probability
17 p3049 A70-34854

Limiting theorems for sums of random variables limited in Markovian chain, applying probabilistic and analytical methods
19 p3456 A70-37235

Weather regimes in statistical meteorology constructed in stochastic models representing randomly transformed Markov chain
24 p4371 A70-46035

MARKOV PROCESSES

NT MARKOV CHAINS

Tracking systems synthesis and performance analysis based on continuous Markov processes theory, particularly Fokker-Planck equation
01 p0043 A70-10776

Atomic variables elimination technique applied to Markovian laser master equation, resulting in integrodifferential equations for field statistical operator
01 p0112 A70-10884

Self excited oscillators zero crossing times distribution for Markov process formulated as boundary value problem involving Kolmogoroff backward equation
01 p0143 A70-10891

Optimal control synthesis in Markov and determinate systems using solution reduced from second order nonlinear partial differential equation
02 p0272 A70-12411

Public health services problems analyzed by statistical simulation method, using Markov process
04 p0644 A70-15356

Optimum compression ratio defined for Markov sources for compression algorithm efficiency and data compression schemes
06 p1013 A70-18624

Decision rules for incomplete a priori data, deriving informational risk estimates for Markov processes and optimal control problems
09 p1653 A70-22144

Reliability engineering for complex systems of multiple repairable parts based on analysis involving signal flow graphs and Markov renewal processes
09 p1691 A70-22574

Spherically symmetric galaxies dynamic evolution analysis, emphasizing irregular motions description using fluctuating gravitational field hypothesis to construct Markov process
09 p1758 A70-22747

Soviet book on control and search for defects in complex systems, presenting statistical optimization methods, programmings for assumed Markov processes, etc
09 p1693 A70-23540

Markov renewal processes sums convergence to multidimensional Poisson process, discussing convergence conditions
12 p2260 A70-26884

State estimation in linear discrete time systems operating in Markov dependent switching environments, using Bayes theorem for filtering
13 p2381 A70-29062

Turbulent diffusion random model of foreign substance, investigating latent parameters existence
13 p2387 A70-29211

Nonlinear optimal filtration and adaptive quasi-coherent reception of Markov signals on white noise background
13 p2369 A70-29731

Molecular Markov processes application to vibrational relaxation and dissociation, small system kinetics, nucleation and droplet growth, thermalization kinetics and diffusion processes
14 p2619 A70-30615

Phase locked automatic frequency control system, estimating duration of stabilization by theory Markov processes
18 p3228 A70-36625

Limiting distribution of additive nonnegative continuous functional of homogeneous Markovian process with conditional transfer function
23 p4212 A70-44346

MARROW

Marrow granulocyte reserve restoration in dogs exposed to chronic gamma radiation, discussing leukocyte reaction to pyrogenic agent
13 p2351 A70-29326

MARS [MANNED REUSABLE SPACECRAFT]

Reusable nuclear shuttles /RNS/ for interorbital and escape missions, discussing alternate stage configurations, radiation shielding, subsystem options, etc
[AIAA PAPER 70-678] 16 p2950 A70-33579

MARS [PLANET]

Atlas of near IR spectra of Venus, Mars, Jupiter and Saturn obtained by Fourier spectroscopy, discussing observational procedures, data recording and processing
01 p0173 A70-10078

Internal structure models of Mercury, Mars and Venus based on radar measurements of radius and mass, discussing two and three zone models
[JPL-TR-32-1439] 01 p0176 A70-10315

IR spectrometer on Mariner 7 Mars flyby recording sharp absorption near 3 microns at Martian southern polar cap
01 p0182 A70-10823

Entry and terminal deceleration systems for unmanned Martian landers, discussing parachute landing and lifting entry vehicles
[AIAA PAPER 68-1147] 01 p0195 A70-10828

Communications of lunar and planetary laboratory, Volume 6, covering Venus atmosphere and photography, Jupiter IR spectrum and Mars multicolor photometry
02 p0377 A70-12553

Mars multicolor filter photometry showing variation in whole-disk reflectivity
02 p0378 A70-12560

Martian hypothetical organisms biological model, describing nonchlorophyllous photosynthesis, epithelial hydrochrome pigments, scale insect morphology, etc
03 p0422 A70-13702

Data transmission from automatic space stations on Mars and Venus, considering relaying via artificial planet satellite or direct transmission to ground station
04 p0648 A70-14931

Orbit determination simultaneous optimal strategy and useful information set selection, discussing Mars transfer trajectory
04 p0750 A70-14940

Automated mars surface sample return /AMSSR/ mission, discussing Saturn 5 chemical and nuclear approach
[AIAA PAPER 69-1066] 04 p0764 A70-15626

Electronic packaging and cabling on Capsule System Advanced Development Lander for Mars rough landing
06 p1016 A70-17335

Short duration manned Mars and Venus exploration mission planning with chemical propulsion and Saturn 5 boosters
[AIAA PAPER 70-59] 06 p1147 A70-18238

Mariners 6 and 7 range and Doppler tracking data for studying Martian mass and earth-moon mass ratio
06 p1151 A70-18486

Qualitative analysis and comparison of hypothesis versions of Martian point flare observed by Maeda, considering solar ray reflection from ice cloud or vertical surface object
07 p1385 A70-19420

Fluid controlled solid rocket motors design for Mars mission with acceleration level as parameter, discussing mission specifications, system design and component considerations
[AIAA PAPER 69-446] 07 p1365 A70-19707

Mars planet smoothing factor determined from phase curve of integrated brightness distribution on disk
08 p1564 A70-20557

Manned Mars mission planning, discussing technologies and costs for planetary landing
09 p1757 A70-22676

Microorganisms survivability in soils near spacecraft assembly areas during simulated Martian freeze-thaw cycles
09 p1619 A70-22768

Mars biological activity suggested from metabolic energy cycle based on oxidation of carbon monoxide
[NGL-07-004-043] 09 p1765 A70-23798

Martian hypothetical organisms biological model, describing nonchlorophyllous photosynthesis, epithelial hydrochrome pigments, scale insect morphology, etc
11 p1985 A70-25502

Asteroid vs planet for manned landing site, considering Martian moons mission
11 p2108 A70-25660

Mars landing analysis and simulation for unmanned lander prototype, discussing digital simulation by Monte Carlo techniques and physical tests
11 p2032 A70-26291

Manned Mars flyby/orbiter mission, discussing cost, scientific returns, technology advances, popular support, etc
12 p2304 A70-27749

Mars and Venus radio temperature measurements by 210 ft telescope, obtaining effective brightness
12 p2309 A70-27896

Phobos image analysis on Mariner 7 frame 7F91, discussing surface darkness, limb profile and geometric albedo
13 p2492 A70-29266

Earth/moon mass ratio and Mars mass and ephemeris from Mariners range and Doppler tracking data, noting relativistic time delay measurement possibility
15 p2798 A70-31652

Astronomical observations, discussing advantages of human operators on interplanetary spacecraft or Mars
15 p2810 A70-31853

Statistical error analysis of autonomous manned spacecraft navigation in long duration eccentric Mars orbits
[AIAA PAPER 69-880] 15 p2773 A70-32503

Mars planet smoothing factor determined from phase curve of integrated brightness distribution
15 p2805 A70-32712

Mars visual observations with colored glass filters during opposition, noting southern polar cap shape irregularity and Martian atmospheric transmittance
16 p2974 A70-33658

Near equilibrium shock layers nonequilibrium radiant emission calculation, noting application to Mars entry conditions
[AIAA PAPER 70-773] 17 p3007 A70-34481

Planetary surface smoothness factor by disk brightness, Mars red light and phase curves methods, indicating superiority of visual observation
18 p3315 A70-36602

Soviet monograph on Venus atmosphere and Mars research covering Venera, Mariner and ground observations
18 p3332 A70-37230

Uranus and Mars satellite relative measures, tabulating observations
19 p3516 A70-37932

Martian photographic map during 1967 opposition in red and near IR range
19 p3516 A70-37935

Hydromagnetic theory of solar wind flow past earth extended to nonmagnetic planets Venus and Mars
22 p4095 A70-43106

Extraterrestrial life development and evolution in solar system, describing Mars suitability
22 p3975 A70-43692

International photographic planetary patrol network, discussing filmstrips of Mars and Jupiter using blue, green and red filters
23 p4242 A70-44262

MARS ATMOSPHERE

Carbon dioxide refractivity measured under simulated Martian conditions and standard temperature and pressure, comparing results with radio occultation methods
01 p0186 A70-11085

Polymers development for ablative heat shields, aeroshell structures, antennas, insulators, electronic packaging, etc, to meet Mars and Venus atmospheric entry requirements
02 p0382 A70-12525

Molecular hydrogen destruction by reaction with carbon dioxide ion in Martian ionosphere, discussing conversion into atomic hydrogen
03 p0575 A70-13997

Mars and Venus ionospheres from Mariner profiles, discussing radiative equilibrium thermal calculations and F1 layer hypothesis
04 p0753 A70-15069

Dynamic model for Martian ionosphere modification by solar wind, assuming negligible Mars magnetic moment and neutral atmosphere
04 p0753 A70-15103

Two level model for planetary atmospheres adapted to simulate atmospheric circulation and climate of Mars

04 p0756 A70-15515

Mars atmosphere refractivity, carbon dioxide condensation, temperature and surface pressure from Mariners 6 and 7 radio occultation measurements

05 p0908 A70-16301

High resolution photometry near planetary limb yielding scale height and optical depth applied to Mariner 4 Mars observations

05 p0909 A70-16387

Earth, Venus and Mars atmospheric structure, discussing gases escape, temperature, density, IR radiation and solar radiation absorption

05 p0914 A70-16628

Mayeda flare observed on Mars 4 June 1937/, suggesting oriented reflection of solar rays from ice crystals cloud or Martian surface feature

05 p0918 A70-16916

Mariner 6 and 7 missions IR spectrometric records showing evidence of solid carbon dioxide in Martian upper atmosphere

06 p1137 A70-17194

Atmospheric pressure, optical thickness and Young particle size distribution of Mars atmosphere determined from polarization observations

07 p1385 A70-19421

Vertical temperature profile diurnal variations of Mars atmosphere using models, noting aerosol influence

07 p1385 A70-19422

Mariner 4 and 5 and Venera 4 data used for comparing terrestrial planets ionospheres

07 p1386 A70-19488

Ice crystal density in Martian atmosphere from brightness of Martian parhelic halo

08 p1564 A70-20547

Meteorological observations of Mars polar regions, surface activity and atmosphere with astronomical telescopes during Mariner 6 and 7 flyby

09 p1754 A70-22500

Wind and atmospheric temperature variations on Mars, Venus and Mercury interpreted from observational data in terms of earth atmospheric processes

09 p1762 A70-23127

Mars primitive atmosphere analyzed from statistics of craters quantity as function of diameter, using Mariner 6 and 7 probe photographs

09 p1763 A70-23318

Carbon dioxide photochemistry of Mars atmosphere, noting complications due to hydrogen compounds

09 p1763 A70-23483

Mariner 6 spectra establishing Fox-Duffendack-Barker bands and ionized carbon dioxide UV doublet bands as important components of Martian dayglow

10 p1938 A70-24073

Similarity and dimensionality theory applied to large scale motions in atmospheric circulation of Mars and Venus

10 p1939 A70-24269

Blue haze hypothesis of Martian atmosphere using Mariner 6 and 7 blue filter photographs, reviewing topographic observations

10 p1943 A70-24841

Mars upper atmosphere semiempirical model, reducing density uncertainties by allowing for solar cyclic variations

11 p2111 A70-26031

Martian atmospheric models for lander and simulator design, obtaining effective sky temperatures, surface pressures and temperatures, atmospheric compositions, etc

11 p2112 A70-26141

On-line parameter updating for relationship between Martian atmospheric density and height above surface during spacecraft descent based on least squares approach

11 p2113 A70-26318

Halo rings at hexagonal ice crystals in Martian atmosphere, analyzing via bright formations with respect to planetary phase angles

13 p2493 A70-29397

Martian terrain features and atmospheric activity observation by Mariner 6 and 7

13 p2494 A70-29526

Martian atmosphere modeling for obtaining Viking lander spacecraft design margins by Monte Carlo method

14 p2637 A70-30564

Quartz crystal particulate sensor instrument for terrestrial and Mars atmospheres

14 p2585 A70-30575

Spacecraft measurements revealing hot dense Venusian and cold thin Martian carbon dioxide atmospheres

14 p2646 A70-31066

Mariner 6 radio signals frequency changes analysis during occultation measurement for determining Mars surface pressure and temperature

14 p2646 A70-31071

Mars upper atmosphere refractivity, free electron number density and plasma temperature altitude

profiles from Mariner 1969 radio occultation measurements

14 p2646 A70-31072

Mars surface, environment and electrical, thermal and mechanical properties

14 p2647 A70-31080

Water vapor abundance in Mars atmosphere from high resolution spectroscopy

14 p2649 A70-31211

Mars carbon dioxide abundance and surface pressure from growth curve based on high resolution spectra

14 p2650 A70-31218

Ice crystal density in Martian atmosphere from brightness of Martian parhelic halo

15 p2796 A70-31456

Mariner 6/7 S band radio occultation probe of Mars atmosphere concerning surface pressure, temperature and existence of ionosphere

15 p2798 A70-31681

Terrestrial planetary ionospheres, discussing charged particle density distribution of Mars daytime ionosphere and Venus day and dark sides

15 p2799 A70-31748

Martian brightness increase at 1 deg phase angle, explaining by transparent cubic crystals presence in clouds

15 p2803 A70-32499

Mariner 4 and 5 and Venera 4 data used for comparing terrestrial planets ionospheres

15 p2805 A70-32733

Spectral line formation in Mars and Venus atmospheres, discussing Lorentz and Doppler broadening

16 p2976 A70-33793

IR Michelson interferometer for Mariner Mars 1971 mission, investigating atmospheric and surface temperatures and atmospheric water vapor content

16 p2978 A70-34029

Scanning UV spectrometer for Mariner Mars 1971 orbital mission, investigating atmospheric composition for biological activity

16 p2978 A70-34030

S band occultation experiment for Mariner Mars 1971 orbiters, measuring atmospheric density and ionospheric electron density profiles

16 p2978 A70-34032

Martian blue clearing during 1967 apparition photographic observational patrol tabulated and summarized

16 p2979 A70-34035

Model calculations of Martian upper atmosphere expanding above mesopause, taking into account effects of molecular and eddy diffusion and chemical reactions

17 p3172 A70-35643

Mars UV reflectivity, examining spectrum, absorption features, planet albedo and ozone content by rocket-borne instruments and atmospheric models

18 p3317 A70-37011

Terrestrial atmospheric tidal theory applicability to Venus and Mars, considering dependence on parameters variation among planets

19 p3519 A70-38253

Mars lower atmosphere vertical temperature distributions from Mariner 6 and 7 radio occultation data, using improved trajectory estimates

21 p3884 A70-40908

Forced convection heat transfer from flat plate and cylinder in cross flow to simulated Mars atmosphere

21 p3945 A70-41026

Carbon dioxide-atomic oxygen reaction rate constant to investigate Martian ionosphere, discussing reactions involving oxygen, nitrogen molecular ions and NO

21 p3886 A70-41067

Pressure dependence and efficiency of carbon trioxide formation in Mars and Venus atmospheres

21 p3887 A70-41107

Venusian and Martian upper atmosphere chemistry, emphasizing ionization height distribution

22 p4106 A70-43312

Mars atmospheric nitrogen abundance relative to carbon from spacecraft UV spectrometer data

23 p4238 A70-43805

Martian brightness increase at 1 deg phase angle, explaining by transparent cubic crystals presence in clouds

23 p4240 A70-43920

MARS ENVIRONMENT

NT MARS ATMOSPHERE

Martian surface features and environment, discussing winds, particle sizes, moisture content, craters, etc

03 p0563 A70-12986

Chemical heat source combined with metals ignition properties considered for spacecraft heating during Mars nighttime landing

04 p0628 A70-15426

Physical and life supporting properties of hypothetical Martian biosphere, considering organism adaptation theories

05 p0803 A70-17109

Insulation materials selection for Martian soft lander to meet mission environmental conditions based on tests

[AIAA PAPER 70-11] 06 p1182 A70-18224

Microorganisms survivability in agar subjected to simulated Martian freeze-thaw cycles, discussing soil samples collection and composition

09 p1618 A70-22767

Subsystem weight trade-offs for design optimization of out-of-orbit Mars soft lander, using atmosphere and surface environmental Monte Carlo model

11 p1214 A70-26215

Cryobiological data for life mechanisms on planets in solar system emphasizing Mars

14 p2536 A70-30344

Mars surface, environment and electrical, thermal and mechanical properties

14 p2647 A70-31080

Mars geology, discussing polar caps phenomena, diurnal variations, orbital eccentricity, seasonal meteorology, volcanism, erosion, etc

15 p2800 A70-32059

Thermal conductivity of particulate basalt as function of density in simulated lunar and Martian environments, noting temperature and pressure effects

18 p3316 A70-36772

MARS EXCURSION MODULE

Nuclear propulsion requirements for manned landing mission to Mars assuming Saturn 5-based operation

07 p1375 A70-18874

Radar signal quick indication and extrapolation for terminal guidance control of Mars soft lander, reducing radar lock on loss sensitivity and engine spurious noise throttling

11 p2080 A70-26210

Martian multispectral imaging from lander emphasizing spectral bands and gray levels number for discrimination of surface constituents

12 p2229 A70-26928

MARS LANDING

Retrorocket jet size and structure for scientific instruments soft Mars landing, estimating off-optimum supersonic jet interaction with quiescent atmosphere

17 p3011 A70-35660

Manned Mars lander launch-to-rendezvous analysis, using subsequent Venus swingby for mission velocity requirement reduction

[AIAA PAPER 70-1075] 19 p3530 A70-38887

Spacecraft trajectory initial conditions expressions as parameters dependent functions, applying results to Mars lander mission

[AIAA PAPER 70-1016] 20 p3666 A70-39517

Hydrogen, N, O, Kr methane and carbon dioxide gas chromatographic examination, discussing life detection device for Mars landing

22 p3983 A70-43094

MARS PROBES

NT MARINER 4 SPACE PROBE

NT MARINER 6 SPACE PROBE

NT MARINER 7 SPACE PROBE

NT VIKING MARS PROGRAM

High gain antenna for 1973 Mars Soft Lander data transmission using sensors and digital computer to achieve autonomous precision pointing to earth

[AAS PAPER 69-578] 04 p0716 A70-14653

Statistical orbit and position determination for Mars orbiters and landers based on Viking 1973 mission requirements, discussing tracking problems

[AIAA PAPER 70-160] 06 p1158 A70-18177

Insulation materials selection for Martian soft lander to meet mission environmental conditions based on tests

[AIAA PAPER 70-11] 06 p1182 A70-18224

Visual imaging systems for Mars orbiter compared for performance and interactions with mission and spacecraft design

07 p1280 A70-19230

Ablation, transmission transparency and embrittlement of heat shield materials for Voyager tested under simulated Mars entry conditions

07 p1395 A70-19885

Mars imaging mission and astrodynamical interaction, discussing arrival geometry and orbit size effects

[AIAA PAPER 69-127] 11 p2112 A70-26130

Unmanned Mars roving vehicle navigation subsystem feasibility study covering inertial and gyrocompass-odometer systems

11 p2080 A70-26211

Satellite navigation method for locating Mars landmark or target point for exploration by roving vehicle located as center of coordinate system

11 p2080 A70-26213

Mariner Mars 1969 navigation, guidance and control systems design, mechanization and flight testing

13 p2446 A70-28393

Radio command guidance system for Mars probe ascent from surface to rendezvous with flyby vehicle on escape trajectory

13 p2447 A70-28421

Mariner, explorer, high Data Orbiters, Viking and Rover landers as required systems for unmanned Mars exploration, examining ballistic and lifting entry

[AAS PAPER 70-030] 17 p3156 A70-34805

Terminal guidance for Mars softlander utilizing Doppler and range radar for steering and propulsive control

17 p3133 A70-35286

Mars and Venus orbiter spacecraft electric propulsion system, discussing Hg electron bombardment ion engine

21 p3868 A70-41786

Statistical orbit and position determination for Mars orbiters and landers based on Viking 1973 mission requirements, discussing tracking problems

21 p3931 A70-41861

MARS SPACECRAFT

U MARINER SPACECRAFT

MARS SURFACE

Mars craters and crater-like objects catalog from Mariner 4 photographs, statistically analyzing diameter-frequency relations

01 p0179 A70-10523

Martian carbon dioxide band observations using multislit spectrophotometer, indicating surface height variations near Syrtis Major

01 p0182 A70-10723

Mars surface features, describing diagonal and meridian-latitude grid systems, continental blocks and continental drift

01 p0183 A70-10869

Martian dark area extending from Tritonius Sinus to Casius southern tip, comparing observations and charts

02 p0370 A70-12086

Martian topographic contours determined from detected carbon dioxide abundances indicating large scale differences from previous data

02 p0373 A70-12390

Martian surface features and environment, discussing winds, particle sizes, moisture content, craters, etc

03 p0563 A70-12986

Martian orbital photographic missions objectives and sensors realizable capabilities, discussing relationships between orbital parameters and imaging systems constraints

03 p0490 A70-13663

Mars surface reddish color due to carbon suboxide suggested based on spectral reflectivity measurements and matching in laboratory

04 p0743 A70-14423

Visual interpretation of moon and Mars surface photographs taken from satellites, analyzing craters and bumps

04 p0686 A70-14626

Mars atmosphere refractivity, carbon dioxide condensation, temperature and surface pressure from Mariners 6 and 7 radio occultation measurements

05 p0908 A70-16301

Martian topographical radar ranging data correlated with surface features, discussing deserts, canals and maria topography

05 p0909 A70-16388

Martian surface temperature distributions based on IR scans of disk compared with predictions of thermal properties

05 p0909 A70-16389

Mayedda flare observed on Mars 4 June 1937, suggesting oriented reflection of solar rays from ice crystals cloud or Martian surface feature

05 p0918 A70-16916

Optical parameters of Martian surface and temperature, discussing brightness distribution along diameter in red spectral region, based on photoelectric cross sections

05 p0918 A70-16917

Martian polar cap spectra interpreted with laboratory measurements of water-carbon dioxide frost spectral reflectance

07 p1388 A70-19946

Martian surface radar observation results, discussing data processing method, backscattering behavior evaluation, relief and composition model, etc

08 p1456 A70-20643

Critique of blue haze negative hypothesis in preliminary Mariner 6 data report

08 p1578 A70-21556

Carbon dioxide adsorption and desorption in Martian bright areas, discussing assumptions relative to temperature, pressure and dust adsorption

08 p1579 A70-21566

Meteorological observations of Mars polar regions, surface activity and atmosphere with astronomical telescopes during Mariner 6 and 7 flyby

09 p1754 A70-22500

Frequency-size distribution of Martian and lunar craters and oases, suggesting common mode of origin

09 p1765 A70-23810

Martian soil surface anomalies observed from polarimetric analysis of light diffused by Hellas region

10 p1943 A70-24708

Blue haze hypothesis of Martian atmosphere using Mariner 6 and 7 blue filter photographs, reviewing topographic observations

10 p1943 A70-24841

Differential thermal analysis-effluent gas analysis (DTA-EGA) experiment for lightweight Martian landed capsule

11 p2050 A70-25802

Mars surface, discussing craters, slump terraces, dry chutes, crater pair abundance, ballistic megacratering theory, etc

11 p2109 A70-25838

Multispectral imaging from lander for Martian surface constituents discrimination

11 p2051 A70-26000

Routing algorithm for computer controlled unmanned autonomous roving vehicle on Martian surface

11 p2081 A70-26317

Multichannel IR spectrophotometer to obtain albedo curves of Martian surface

12 p2229 A70-26927

Martian multispectral imaging from lander emphasizing spectral bands and gray levels number for discrimination of surface constituents

12 p2229 A70-26928

Mars border-disk brightness comparison noting atmospheric transparency effects

12 p2311 A70-28303

Martian terrain features and atmospheric activity observation by Mariner 6 and 7

13 p2494 A70-29526

Surface navigation for unmanned Martian surface roving vehicle

14 p2615 A70-30469

Mars surface, environment and electrical, thermal and mechanical properties

14 p2647 A70-31080

Mars surface topography and roughness from radar measurements

14 p2648 A70-31081

Mars radar results during 1969 opposition, presenting elevation and radar brightness as function of longitude

14 p2648 A70-31082

Mars surface material properties from radio emission observations, considering daily temperature variations distribution

14 p2648 A70-31083

Liquid water occurrence on Mars surface, considering ice melting, evaporative cooling, atmospheric moisture content, etc

14 p2651 A70-31298

Electromagnetic absorption of Martian matter based on vertical temperature variations in planet surface layer

15 p2802 A70-32491

Martian soil thermal conditions at south pole, considering polar cap annual variations and carbon dioxide sublimation

15 p2802 A70-32492

Mars photography from flybys and orbiters, communicating planetary scene information to eye-brain receiver of earth based interpreters

16 p2912 A70-33976

Organic compounds detection and identification on Mars surface for living systems existence or evolution

16 p2857 A70-33977

Mars evolution observation by gamma ray spectrometer in Martian orbit, transmitting information to earth as pulse height distribution

16 p2912 A70-33978

IR radiometer for Mariner Mars 1971 project providing surface brightness temperatures

16 p2913 A70-34028

IR Michelson interferometer for Mariner Mars 1971 mission, investigating atmospheric and surface temperatures and atmospheric water vapor content

16 p2978 A70-34029

Mars 1969 planetary surface drawing and photograph evaluation, noting dark spot east of Nodus Lacoontis

17 p3154 A70-34677

Mariner 6 and 7 TV camera pictures of Mars during approach and encounter, discussing IR spectroscopy, celestial mechanics experiment and Martian terrain

17 p3158 A70-34875

Mars surface smoothness from photometric and space probe data for atmospheric optical thickness and surface barometric pressure

19 p3512 A70-37300

Hydrogen flame ionization detector (HYFID) for life-derived organic matter in Martian/Lunar soil

19 p3426 A70-37896

Mariner-type spacecraft launch in 1971 to orbit Mars, discussing onboard experiments and instrument

20 p3716 A70-39797

Electromagnetic absorption of Martian matter based on vertical temperature variations in planet surface layer

23 p4240 A70-43913

Martian soil thermal conditions, considering polar cap annual variations and carbon dioxide sublimation

23 p4240 A70-43914

Mars topography from Mariner 6 and 7 IR spectra, discussing geographical resolution, surface carbon dioxide pressure, depressions, ridges and valleys

24 p4399 A70-45128

MARS 69 PROJECT

Optical approach navigation experiment on 1969 Mariner mission to Mars demonstrating accuracy potential of spacecraft-based measurement

[AIAA PAPER 70-70] 06 p1103 A70-18152

Navigation data from Mariner Mars 1969 TV pictures, estimating spacecraft trajectory to planetary center

14 p2614 A70-30468

MARS 71 PROJECT

Rocket engine prototype for Mariner Mars 71 spacecraft, describing performance test results and response, thermal and throttling characteristics

[AIAA PAPER 70-716] 16 p2966 A70-33545

Mariner Mars 1971 scientific experiments, describing onboard equipment, mission objectives, etc

16 p2983 A70-34026

TV experiment for Mariner Mars 1971 Project, providing fixed and variable feature imaging data

16 p2978 A70-34027

IR radiometer for Mariner Mars 1971 project providing surface brightness temperatures

16 p2913 A70-34028

Celestial mechanics experiment for Mariner Mars 1971 to test general relativity theory and improve Martian ephemeris

16 p2978 A70-34031

S band occultation experiment for Mariner Mars 1971 orbiters, measuring atmospheric density and ionospheric electron density profiles

16 p2978 A70-34032

Mariner Mars 1971 gimbal actuator design and life test for autopilot system using hypergolic bipropellant rocket engine

17 p3022 A70-34758

Mars 1971 and 1975 missions, discussing Mariner 8 and 9 and Viking lander objectives

18 p3334 A70-37224

Mariner Mars 1971 mission design, discussing objectives, orbit selection, guidance, navigation and sequence analysis

19 p3527 A70-38863

Mariner-type spacecraft launch in 1971 to orbit Mars, discussing onboard experiments and instrument

20 p3716 A70-39797

Preflight error statistics of earth based Doppler tracking for Mariner navigation concerning Mars 1971 and Venus-Mercury 1973 missions

20 p3670 A70-40023

MARTENSITE

Martensite start depressed temperatures vs pressure for steels, discussing hardness effects and microstructure

01 p0120 A70-10740

Martensite structure, discussing intensity anomalies in X ray diffraction pattern of intermetallic Ni-Nb

01 p0121 A70-10900

Ferrite and martensite precipitation hardening in Fe-Ni-Mo alloy, studying dislocation structure and aging kinetics

01 p0123 A70-11243

Martensite transformation with fcc lattice in Ti alloys containing 5.9 percent Fe as function of cooling rate, using X ray analysis

01 p0124 A70-11590

Structures formed during aging of martensite in maraging steels by X ray and chemical analyses using electrolytic isolation of phases

05 p0865 A70-16871

Martensitic transformations during quenching and tempering of maraging steels

08 p1520 A70-21495

Austenitic stainless steel hydrogen damage noting role of martensite plastic deformation

08 p1525 A70-21965

Work strengthening and microstructure of Co-Ni base alloys containing Cr and Mo, discussing deformation induced martensitic transformation

09 p1705 A70-22806

Ferritic and martensitic Fe-Ni alloys lattice parameter determined by standard X-ray techniques

12 p2256 A70-27613

Hydrogen embrittlement of martensitic Fe-Ni alloys as function of temperature via slow strain rate tensile tests

15 p2755 A70-31559

Austenite strength effect on austenite-martensite transformation in alloy steels, measuring resistance to plastic deformation

15 p2760 A70-32376

Austenitic stainless steel martensitic transformations, using transmission electron microscopy in conjunction with X ray and magnetization methods

15 p2761 A70-32379

Martensite-to-austenite reverse transformation in Fe-Ni-Co alloys, using dilatometry and coercive force measurements

15 p2761 A70-32386

Phase transformations in beta isomorphous Ti alloys, discussing effects on omega and alpha phases during quenching and aging and on martensite under stress

15 p2763 A70-32807

Maraging nickel steel martensitic transformation temperature reduction after interruption by nonisothermal or isothermal tempering below 460 C
16 p2932 A70-33850

Martensitic transformation in Ti and Ti alloys, discussing shear systems influence
17 p3118 A70-34404

Twinned hexagonal martensites crystallography in Ti alloys, discussing alpha-beta and beta-fcc transformations
17 p3118 A70-34405

Ti alloys M sub s and beta sub s points thermodynamics, considering initiation of bcc-oph martensitic transformation
17 p3193 A70-34407

Martensite transformations and cellular phase separation in Ti-Cu alloys, using electron microscopy
17 p3119 A70-34412

Martensitic transformation effects on mechanical properties of beta quenched Ti binary alloys
17 p3119 A70-34414

Mn and Ti effects on hardening of Fe-Ni-Mn-Ti and Fe-Ni-Mn maraging martensitic steels
17 p3125 A70-35145

Martensitic phase change effects in TiNi on ultrasound waves propagation in transition region, using pulse echo measurements
17 p3126 A70-35603

Precipitation hardening Co-Cu-Mo stainless steels, determining martensitic structures free from delta ferrite and residual austenite
18 p3262 A70-35965

Two phase stainless steels with microduplex structures, taking into account martensite and ferrite effects on mechanical properties
18 p3272 A70-36038

Fe-Ni alloy alpha-gamma phase transformation after heating, noting deformation planes and directions in martensite
18 p3275 A70-36204

Dynamic and static stress effects on martensite formation temperature in Fe-Ni-C alloys
19 p3451 A70-37569

Fe-Ni-C alloys austenite dispersion matrix effects on martensite structural characteristics
20 p3649 A70-39705

Zr-Nb alloys mechanical strength increase due to beta phase martensitic decomposition
21 p3840 A70-41897

Fracture behavior and tempered martensite embrittlement relationship in steel, using V- notched and fatigue precracked Charpy specimens
22 p4054 A70-42736

Orthorhombic martensite tempering behavior in Ti alloys, observing distinct stages for binary and ternary alloys
22 p4054 A70-42742

Austenitic formation by rapid heating of Ni maraging steel, noting microstructural characteristics relationship to martensite before phase transformation
24 p4356 A70-45144

Maraging steel grain size and externally applied shear stress effects on morphology of martensite formation
24 p4357 A70-45231

Crystallography of martensite transformation on /225/ type planes of austenite in Fe-Mn-Cr-C alloy
24 p4358 A70-45237

Martensite plate substructure in Fe-Mn-Cr-C alloy, using transmission electron microscopy and diffraction study
24 p4358 A70-45238

MARTENSITIC STAINLESS STEELS

Structure and mechanical properties of martensite and bainite in Fe-Ni-Co-C steels, discussing isothermal aging to obtain tough twinned martensite steels
01 p0119 A70-10733

Martensitic steel /AFC 77/ austenite grain size refinement process, noting effects on yield strength, toughness, stress corrosion resistance and fatigue crack growth rate
01 p0120 A70-10739

Age hardening characteristics of maraging martensite stainless steels containing Mo and Co subjected to subzero treatment
01 p0125 A70-11641

Calorimetric analysis and hardness test to investigate low temperature aging behavior of maraging stainless steels
01 p0125 A70-11642

Embrittlement in martensitic and semiaustenitic precipitation hardening stainless steels upon exposure to high temperatures to determine causation and controlling means
03 p0506 A70-13132

Manganese and sulfur content effects on martensitic stainless steels machinability, describing effects on mechanical properties, cold formability and corrosion resistance
03 p0507 A70-13135

Stress corrosion of martensitic and austenitic steels, discussing hydrogen embrittlement, mechanical strains, etc
04 p0710 A70-15676

Martensitic stainless steels structure related to energy dissipation capability, obtaining damping mechanism as magnetomechanical hysteresis
08 p1515 A70-20979

Martensitic stainless steels corrosion damage in jet engine compressors noting effects of temperature, surface condition, time and chloride presence
12 p2252 A70-26963

High strength martensitic stainless steel stress corrosion resistance and fatigue crack growth rate, considering austenite content, strain aging and tempering temperatures
24 p4359 A70-45245

Fe-Ni-Co martensitic alloys isothermal age hardening, comparing bcc phase energy parameters of binary systems
24 p4362 A70-46182

Fe-Ni-Mn ternary martensitic alloy, discussing metastable miscibility gap island existence in bcc phase
24 p4363 A70-46193

MARTIN MILITARY AIRCRAFT

U MILITARY AIRCRAFT

MASCONS

Lunar mascon origin theories, discussing mass transfer by excess pressure generation due to rapid cooling crust and densification by water outgassing
02 p0379 A70-12779

Nonexistence of large mascons at Mare Marginis and Mare Orientale deduced from residual acceleration analysis of Lunar Orbiter Doppler tracking data
04 p0743 A70-14424

Creep behavior of mascons to infer lunar temperatures at depth compared with electrical conductivity data and heat conduction equation
05 p0906 A70-15892

Gravity anomalies of moon mapped by time differentiation of Doppler-tracked satellite velocities, noting isostatic equilibrium
05 p0915 A70-16827

Lunar maria hypothetical simultaneous formation by impact, discussing significance of mascons
06 p1138 A70-17279

Apollo lunar orbit irregularities attributed to mascons beneath lunar surface, using short arc perturbation method
06 p1145 A70-18068

[AIAA PAPER 70-163]

Lunar mascons formation by isostatic and volcanic processes, using normal density lunar crust and mantle model
06 p1150 A70-18476

Lunar mascon effects on Apollo type spacecraft orbits calculated for minimizing orbital instabilities
07 p1387 A70-19715

Satellite impact interpretation of lunar maria surface distribution, discussing lava origins and mascon distribution
09 p1752 A70-22310

Mascons in lunar maria depressions observed by Lunar Orbiter 5 on basis of two layer model of crust
12 p2299 A70-27281

Lunar near surface gravity estimation by mass density model for agreement between Doppler tracking data from Lunar Orbiter and trajectory predictions
14 p2645 A70-31064

Lunar mascons origin explanation in terms of primordial atmosphere and hydrosphere
14 p2646 A70-31065

Pulsar gravitational waves detection by lunar mascons, discussing resonant standing vibrations
16 p2980 A70-34306

Mascon effects on close lunar orbit, using short arc perturbation technique
18 p3314 A70-36518

Lunar mascon detection in Sinus Aestuum neighborhood by Apollo 8 tracking data analysis
21 p3886 A70-41058

Lunar sea, mascon and interior composition, discussing crystallization of Apollo 11 Tranquility samples and synthetic analogs at high pressure
21 p3901 A70-41542

MASER OUTPUTS

Output characteristics of cyclotron maser with resonator field due to plane waves interference along static magnetic field, deriving tensor equations
05 p0858 A70-16260

Ammonia maser transient spiking effects under periodic oscillation condition modulation, noting frequency sweep width role
07 p1299 A70-19685

Electron paramagnetic resonance absorption curve influence on power transfer characteristics and maximum passband of multicavity maser
09 p1695 A70-22278

Broadband traveling wave masers bandwidth increased by staggering direct current magnetic field along active structure length
12 p2249 A70-27690

Multilevel maser oscillators undamped output pulsations, investigating effect of coupling between signal frequency energy storage and circuit properties at pump frequency
13 p2430 A70-29704

Rubidium-85 maser, discussing continuous oscillation in low magnetic field
19 p3446 A70-37769

Magnetic field-independent optically pumped Rb 85 maser oscillator power output
22 p4049 A70-42334

Semiconductor microwave generator design for maser simulator using transistorized amplifier, varactor frequency multiplier and diode multiplier
23 p4171 A70-43878

MASER RESONATORS

U MASERS

MASERS

NT GAS MASERS

NT TRAVELING WAVE MASERS

X band electron paramagnetic resonance spectrometer with ruby maser preamplifier, correcting misinterpretation and noise figure analysis
01 p0114 A70-11196

Cyclotron resonance maser /CRM/ monoton with inclined electron flux and magnetic field, considering design for performance optimization
03 p0499 A70-13455

Population inversion coefficient as function of optimal impurity concentrations and efficiency of ruby quantum paramagnetic amplifier in 3 cm range
03 p0499 A70-13457

Transient processes in ruby quantum paramagnetic amplifier during pumping, showing technique for saturation prevention and relaxation effects on population inversion
03 p0456 A70-13460

Atomic clock reproducibility short and long term stability, weight and power consumption characteristics, noting Rb gas cell for collision avoidance systems
04 p0688 A70-14724

Maser-like stimulated OH emission regions observed in interstellar rarefied gas
06 p1148 A70-18391

Maser coherent amplification possibility in comet atmospheres at various frequencies assuming thermodynamic nonequilibrium and nonBoltzmann populations
07 p1378 A70-19034

Multiple maser-magnet units packaging in single cryostat for maximum tunability
08 p1513 A70-21599

Double resonator ruby maser dynamic and static characteristics for centimeter band improved by pumping frequency modulation
09 p1695 A70-22188

Maser amplification in Chirp radar signals pulse paramagnetic compressors using electron spin echoes
09 p1637 A70-23321

Natural frequency of paramagnetic amplifier retuned by coupling Cr ions doped silver coated ruby resonator to passive resonator
10 p1901 A70-25138

Linear theory of cyclotron resonance maser with TEM standing wave field, considering coherent emission for nonrelativistic electrons oscillating in magnetic field
11 p2061 A70-25392

Parametric effect maser developed by maintaining self oscillations in static amplitude modulated magnetic field, noting application as magnetometer
11 p2063 A70-25947

Anomalous LF noise in receiving devices with traveling wave quantum paramagnetic amplifier
11 p2020 A70-26817

Maser amplifier with nonoriented Fe-doped rutile powder as active material, observing broad absorption bands under magnetic field
12 p2249 A70-27649

Equivalent radioelectric plan of ammoniac maser marginal type oscillator
18 p3265 A70-35946

Doubly pumped ruby maser operating in conjunction with superconducting magnet
18 p3265 A70-35953

Double resonator ruby maser for observing transitions of interstellar hydroxyl, noting incorporation in modulation radiometer of astronomical telescope
21 p3835 A70-40641

Anomalous LF noise in receiving devices with traveling wave quantum paramagnetic amplifier
24 p4351 A70-45189

Polarized maser emission from interstellar hydroxyl and water related to nonlinear weak magnetoplasma
24 p4381 A70-45258

MASKING

Target-field luminance or duration effect on target susceptibility to masking demonstrated in visual backward masking study
01 p0039 A70-11163

Contralateral remote masking /CRM/ increase of LF tone burst produced by middle ear muscle contractions
04 p0632 A70-15082

Lateralization and detection of signals under antiphase noise masking measured at various SNR levels
06 p1106 A70-17597

Visual backward masking facilitation dependence on target duration as opposed to interstimulus interval or target-onset/mask-onset interval durations
07 p1221 A70-19850

Permanent memory faults effects on sequential machines finite-state behavior, considering masking role in synthesis of fault-tolerant sequential networks
11 p2072 A70-26220

Narrow band FM noise suggested for masking studies application, discussing noise properties
11 p2011 A70-26496

Audio signals frequency and time resolution, discussing discretizing action of masking effect for higher information rate of spectrally encoded messages
13 p2450 A70-28647

MASS

NT OXYGEN MASKS

MASS

NT CRITICAL MASS

NT ELECTRON MASS

NT PARTICLE MASS

NT PLANETARY MASS

NT STELLAR MASS

Meteorite falls statistics correlations for fragmentation relationships with mass, time of fall and class
05 p0912 A70-16447

Galaxy mass loss on billion year time scale, discussing possibility on basis of bound stellar orbits
06 p1139 A70-17472

Photometric masses of bodies producing bright meteors, considering emission efficiency dependence on velocity, mass and composition
08 p1573 A70-20948

Optimum control law for minimizing mass point maximum deviation under given disturbance obtained by graph analytic method
09 p1727 A70-22534

Translational spectral bands of compressed rare gas binary mixtures, considering mass and temperature effects
12 p2275 A70-27172

Inertial and gravitational mass equivalence related to observation of anomalous K-meson decay
12 p2272 A70-27391

Galactic masses and mass-luminescence ratios from motions data
15 p2801 A70-32480

Photometric masses of bodies producing bright meteors, considering emission efficiency dependence on velocity, mass and composition
15 p2806 A70-32760

Parametric representation of brachistochrones of mass point in centrosymmetrical gravitational field
18 p3283 A70-36387

Galactic masses and mass-luminescence ratios from motions data
23 p4240 A70-43905

Supernovae frequency in Sb and Sc spiral galaxies, considering luminosity class, absolute magnitude and mass of parent galaxy
24 p4413 A70-46164

MASS BALANCE

Gravitational experiments in manned spaceflight employing Eotvos balance in orbit and direct force technique
21 p3929 A70-41002

Attitude control of artificial gravity mass-unbalanced axisymmetric orbital space stations
23 p4258 A70-44502

MASS DISTRIBUTION

Semiautomatic mass condensation transformation for reducing structural vibration calculations, including computer program and mode shape plotting
01 p0200 A70-10868

Nonlinear vibrations in mechanical systems of elastic components having equivalent circuits represented by finite number of discrete masses interconnected by weightless infinite rod
01 p0143 A70-11027

Symmetrical body rotational motion with asymmetrical mass distribution about center of mass, determining minimum initial value of angular velocity
01 p0192 A70-11482

Leonid meteoroids mass distribution law exponent evaluation based on unstable meteoric radio echo durations integral distribution
03 p0574 A70-13884

Galactic mass loss by gravitational radiation, discussing galactic expansion and nucleus mass
04 p0752 A70-15068

Mass density estimated in solar vicinity for distribution among celestial bodies
05 p0914 A70-16647

Lunar structure and evolution based on satellite measurements of mass distribution, radius moments of inertia, gravity anomalies and topographic irregularities
05 p0920 A70-16945

Meteor fragmentation in flares, determining fragments mass, time and special parameters for plotting flare brightness curves
06 p1140 A70-17734

Mass variation laws in light of Tsiolkovskii hypothesis, considering particle separation rates and thermal energy losses for actual jet engines
07 p1363 A70-19088

Mechanical vibration of beams analyzed by partial differential equations of beam vibration involving mass concentration and flexibility
07 p1411 A70-19786

Rotating rotor with mass distributed along shaft analyzed for nonlinear flexural and torsional vibrations, determining dynamic instability ranges
08 p1584 A70-20694

Boundary conditions effect on natural vibration frequencies of unloaded components and components loaded with concentrated masses, obtaining frequency equations
08 p1584 A70-20698

Matter distribution and motion in conformally flat gravitational fields, analyzing Friedmann solution to Einstein equations
08 p1544 A70-20991

Mechanical system undergoing internal mass redistribution, showing energy dissipation during motion
08 p1545 A70-21203

Motion equations and decay of rotating equal mass triple systems for random configuration integrated numerically on computer
09 p1751 A70-22160

Moon gravity field model derived from long-arc analysis of Lunar Orbiters tracking data, considering lunar mass distribution role
09 p1752 A70-22309

Angular motion of deformable earth satellite as solid-elastic system with distributed masses, applying automatic control transfer function
10 p1914 A70-24308

Iterative numerical method for determining optimal mass distribution in complex frameworks, maintaining dynamic response level
10 p1960 A70-25053

Spherical harmonic coefficients of eccentric dipole potential and coinciding magnetic and mass center, noting geophysical prospecting applicability
11 p2047 A70-26571

Diffuse matter distribution in northern region of Milky Way, examining relation with O-BO stars distribution
11 p2116 A70-26588

Mass distribution of Sikhote Alin meteorite fragmentation, noting similarity to terrestrial rocks
13 p2490 A70-28916

Motion stability of variable mass solid body with ideal liquid filled cavities about stationary point using Liapunov theorem
13 p2452 A70-29310

Rotating spherical galaxy evolution, using equations of motion for mass points representing mass distribution
13 p2492 A70-29385

Lunar near surface gravity estimation by mass density model for agreement between Doppler tracking data from Lunar Orbiter and trajectory predictions
14 p2465 A70-31064

Andromeda Galaxy M31 hydrodynamic model based on given mass distribution, determining kinematic functions
15 p2808 A70-32884

Dynamic flexible artificial earth satellites with mass distribution, considering control systems design principles
17 p3180 A70-35294

Mass distribution role in stability theory of rods under nonconservative buckling load
18 p3335 A70-35961

Mathematical model of asteroidal evolution and meteoritic mass distributions under collisional fragmentation using power law
18 p3312 A70-36213

Late-type barred spiral galaxies structure and dynamics with asymmetric mass distribution, using model consisting of small prolate spheroid displaced from disk center
18 p3331 A70-37194

Meteor luminous efficiency and luminosity factor for mass determinations
19 p3515 A70-37661

Antimatter distribution in universe, investigating mass lower limit
19 p3518 A70-38025

Multiplane balancing method for minimizing weight required for spacecraft stability [SAWE PAPER 848]
20 p3595 A70-40362

Variable mass body rotational motion stability in central Newtonian field with gyroscope on symmetry axis
21 p3849 A70-40616

Aircraft, rocket or other rigid or flexible structure, computing inertial constants based on measurements of generalized masses of natural modes
21 p3935 A70-41408

Sweepback thin cantilever wing transonic flutter characteristics, investigating concentrated mass spanwise location effects
22 p4112 A70-42274

Matter and heat balance of cosmic grains surrounded by plasma and neutral gas under radiation
22 p4097 A70-42473

Gravitational collapse for astrophysical matter distributions, discussing differential geometry, relativity, Schwarzschild metric, static equilibrium and spacetime geometries
22 p4098 A70-42579

Lunar geomorphic features and mass wasting relation, discussing landslides, rockfalls, debris slides, slump and creep play
22 p4102 A70-42972

Cosmic rays galactic propagation and confinement, discussing matter and star distributions, magnetic fields, positron flux and energy spectrum, etc
22 p4096 A70-43396

Gravitational acoustic wave emission in isothermal stellar atmosphere with mass sources
23 p4242 A70-44267

Lunar mass and gravitational fields determined from lunar satellite dynamics
24 p4407 A70-45533

Nonlinear distributed sources induced diffusion, calculating relationship between source intensity and maximum temperature or mass concentration field
24 p4380 A70-46034

MASS FILTERS

U FLUID FILTERS

MASS FLOW

Velocity and density profiles obtained from mass diffusivity time measurements in axisymmetric turbulent air pipe flow over specific Reynolds number range
02 p0295 A70-11853

Coupled diffusion of heat and vorticity in gaseous vortex caused by radial mass convection and temperature dependence of gas properties
02 p0400 A70-12858

Pressure changes associated with surface friction and geostrophic drag coefficient related, discussing mass inflow and outflow
05 p0837 A70-16151

Base mass injection effects of various gases on slender body supersonic near wake stability, diffusion and cooling
06 p0970 A70-18075

Slip flow of nitrogen gas through long circular tubes, measuring mass flow, pressure drop and cross sectional velocity profiles
06 p1051 A70-18368

Steady and unsteady flow through Napier turboblower axial flow turbine for full and partial admission, estimating mass flow and power output
07 p1189 A70-20294

Viscoelastic fluid steady flow in porous walled channel, examining mass flow solution continuity
08 p1485 A70-21639

Thermal properties associated with temperature gradients in He-K plasma, studying mass motions initiated by cold wall contact
09 p1735 A70-22844

Onset, mass motion and flash phase in 2b solar flares observed in filtergrams spanning H alpha line
11 p2105 A70-25748

Temperature distribution in opposed jet diffusion flames, discussing mass fluxes and fuel and oxygen concentrations effect
11 p2151 A70-26385

Apparent mass measurements of supersonic jet in incalculable flow regimes, determining dependence on Mach number at nozzle and on distance from exit
13 p3877 A70-28859

Residence times distribution in confined round swirling jet, considering mass conservation of hypothetical tracer substance in combustion efficiency prediction
13 p3522 A70-29609

Linear power scaling-mass flow relationship in multi-Joule pulsed carbon dioxide-nitrogen-helium laser, noting thermal effects role
15 p2751 A70-31977

Trail formation due to tidal effect in interacting galaxies during close approaches, considering mass flow hydrodynamics
15 p2801 A70-32481

Mass flow ion drift anemometer applicable to aircraft speed measurement including VISTOL
19 p3425 A70-37885

Materials jet-like ejection from metal surfaces under high density laser radiation action, investigating erosion and plasma spectrum
19 p3448 A70-38734

Trail formation due to tidal effect in interacting galaxies during close approaches, considering mass flow hydrodynamics
23 p4240 A70-43906

Friction-originated ageostrophic mass flux in ground friction layer at nonaccelerated geotropic boundary layer flow
24 p4370 A70-45133

MASS FLOW FACTORS

Material flow acceleration in jet propulsion systems, discussing acceleration by gravitational field, thermodynamic nozzle expansion, electrostatic forces and Lorentz force
04 p0671 A70-15090

Injection induced swirl effect on thrust and mass flow through nozzle in spinning rocket, discussing internal and exhaust flow measurements and visualization 09 p1606 A70-23247

MASS FLOW RATE

Electromagnetic procedures and camera-spectrometer system for studying detonation processes, measuring mass flow rates and explosives spectra 01 p0909 A70-10887

Free molecular mass flow rate through vacuum seal separating two rarefied gas environments, using coupled integral equations formulated on kinetic theory [ASME PAPER 69-WA/FE-18] 04 p0625 A70-14779

Mass flow rate calculation of methane and natural gas mixtures through critical flow nozzles [ASME PAPER 69-WA/FM-4] 04 p0667 A70-14839

Linear momentum mass flowmeter, discussing operation, damping torque-mass flow rate relationship, operation and advantages 06 p1067 A70-18427

Burning rates of monopropellant droplet evaluated by variable property models, discussing dimensionless mass flow rate 07 p1358 A70-18914

OB supergiants atmospheric expansion indicated by medium-dispersion spectra, noting mass loss rate increase with luminosity and effective temperature 11 p2117 A70-26657

High secondary/primary mass ratio multinozzle jet pump/ejector/operation feasibility [AIAA PAPER 70-579] 13 p2342 A70-29890

Oscillatory flow in turbulent boundary layer modeled by eddy viscosity distribution, deriving mass transport velocity induced by progressive and standing waves 20 p3608 A70-39358

Time-of-flight mass flow rate and thrust stand data comparison for two 100 micropound colloid thrusters [AIAA PAPER 70-114] 20 p3691 A70-40229

Colloid annular thruster performance, using low mass flow rate data and space charge formulas [AIAA PAPER 70-1113] 20 p3692 A70-40230

Colloid engine propellant mass flow distribution, determining beam current and specific charge effects on thrust, efficiency and specific impulse [AIAA PAPER 70-1109] 20 p3692 A70-40234

Tube heat transfer augmentation by helical vane inserts, noting Reynolds number and mass flow rate effects 21 p3949 A70-41318

Mass flow rate correlation for nonsteady convective heat transfer in thin walled tubes with turbulent air flow 21 p3953 A70-42087

MASS RATIOS

NT PAYLOAD MASS RATIO

NT PROPELLANT MASS RATIO

Autonomous two degrees of freedom Hamiltonian system triangular libration points found stable for all mass ratios in circular restricted three body problem 01 p0192 A70-11575

Mariners 6 and 7 range and Doppler tracking data for studying Martian mass and earth-moon mass ratio 06 p1151 A70-18486

Mass to luminosity relations in RF region derived from data for nearest galaxies 07 p1383 A70-19404

High secondary/primary mass ratio multinozzle jet pump/ejector/operation feasibility [AIAA PAPER 70-579] 13 p2342 A70-29890

Earth/moon mass ratio and Mars mass and ephemeris from Mariners range and Doppler tracking data, noting relativistic time delay measurement possibility 15 p2798 A70-31652

Solar system Eotvos experiments for measuring gravitational to inertial mass ratio of celestial bodies 16 p2978 A70-34033

Carbon isotopes abundance in primary cosmic radiation by nuclear emulsion stack exposure in high altitude balloon flight 17 p3151 A70-34914

MASS SPECTRA

Computer program to decide structure for aliphatic ketone from low resolution mass spectrum using DENDRAL algorithm 05 p0810 A70-16048

D region positive ion composition measurements by rocket-borne quadrupole mass spectrometer, discussing downleg and upleg data 06 p1137 A70-18537

Seasonal variation of F 1 region ion composition measured by rocket-borne mass spectrometer, noting altitude dependence of electron and ion temperatures 06 p1059 A70-18540

Infinite-dimensional relativistic wave equations for mass spin dependence 07 p1333 A70-18959

Evidence against electron impact induced alkyl shifts in mass spectra of alpha-hydroxy-ketones, showing thermal rearrangements 13 p2363 A70-29803

Microscopic particle mass spectra in six dimensional scalar, spinor and vector fields, noting 22 p4025 A70-42312

cosmological implications and eight dimensional theory 14 p2616 A70-30342

Wolf-Rayet associated nebulae, presenting radio observations and mass determinations 16 p2980 A70-34193

MASS SPECTROMETERS

Respiratory mass spectrometer design specifications, considering sampling and vacuum systems 01 p0041 A70-11649

Ionic collision processes in nitrogen and oxygen mixtures in mass spectrometer ion source 04 p0646 A70-14700

Mass spectrometer design and calibration for ionic composition measurements on ionosphere sounding satellite, noting effects of satellite velocity and altitude 06 p1065 A70-17908

Computerized mass spectrometer for monitoring atmosphere in astronauts suits and cabin [AIAA PAPER 69-1016] 07 p1249 A70-19730

Gaseous pyrolysis products detection and identification during eruption from polymeric surfaces subjected to flash heating by time of flight mass spectrometer 07 p1319 A70-19887

Omegatron mass spectrometer for rocket measurements of molecular nitrogen density and temperature in middle thermosphere 07 p1289 A70-20308

Monopole mass spectrometer mass range extension by voltage method, discussing sensitivity and mass scan time 08 p1497 A70-21537

Upper atmosphere research by U.S.S.R. mass spectrometers onboard French rocket probes, discussing design, payloads and equipment tests 09 p1766 A70-22658

Blood carbon dioxide and oxygen content determined by respiration mass spectrometer using carrier gas 09 p1629 A70-23584

Differential thermal analyzer coupled to mass spectrometer for kinetics of reactions giving volatile products at high temperature, considering ablative materials 14 p2664 A70-30292

E region ion composition from rocket-borne mass spectrometer data 15 p2725 A70-31689

Atmospheric density and temperature measurements by satellite- and rocket-borne pressure gages and mass spectrometers, considering error sources 15 p2731 A70-32092

Mass spectrometric analysis of lunar rocks for rare gases of solar wind, determining relative abundance, isotopic composition, rock age, exposure time, etc 18 p3320 A70-37083

Photofragment spectrometer, describing vacuum chamber, molecular beam and light sources, mass spectrometer detector, data acquisition and display system, etc 18 p3261 A70-37094

Mass spectrometer modified for use with X-Y recorder for accurate and reproducible ionization efficiency curves 18 p3262 A70-37099

Residual gases partial pressure measurement in vacuum chamber by mass spectrometer with electromagnetic scanner and electron multiplier, detecting electron current 19 p3421 A70-37466

Preventive maintenance of stationary automatic mass spectrometers 19 p3432 A70-38584

Voltage programmed RF oscillator (VPO) for spaceborne quadrupole mass spectrometer, describing transistorized circuitry 20 p3630 A70-39487

Positive ionospheric ion species concentration measurements using magnetic deflection mass spectrometer on Explorer 31 satellite 21 p3815 A70-40999

Spacecraft sheath structure, potential and velocity effects on ion current measurements by traps and mass spectrometers 21 p3816 A70-41087

Pulsed ruby laser mass spectrometry technique for flash pyrolysis of ammonium perchlorate-catalyst mixtures [AIAA PAPER 68-149] 21 p3781 A70-41729

Quadrupole mass spectrometer design for lower thermosphere neutral composition measurement, discussing atmospheric physics, installation on rockets, etc 21 p3830 A70-41990

Mass spectrometer and high voltage converter powering electrostatic plasma and wind analyzer for cosmic space studies on Sputnik 3 and Heos A satellites 22 p4025 A70-42312

Ultrahigh vacuum calibration system for vacuum gages and mass spectrometers based on pressure attenuation and molecular beam techniques 22 p4029 A70-42620

Metal vapor flow measurement by quadrupolar mass spectrometer for control of thin film depositions by evaporation 23 p4198 A70-44872

MASS SPECTROMETRY

U MASS SPECTROSCOPY

MASS SPECTROSCOPY

Secondary halo in spark source mass spectrography, determining corrections 02 p0298 A70-12211

Gas chromatography and mass spectroscopy study of fatty acids and hydroxy acids in 5000 year sediment from English Lake District 02 p0252 A70-12507

Gas chromatography and mass spectroscopy applied to porphyrin microanalysis, studying homologous porphyrin series in ancient sediments and oils 02 p0252 A70-12516

Rocket-borne cryogenic sampler for stratospheric composition measurement by mass spectrometer analysis for computing radiation balance in stratosphere [AAS PAPER 69-569] 04 p0687 A70-14661

Mass spectrometric determination of proton affinities of simple molecules determined from proton transfer and ion-molecule reactions 05 p0885 A70-17081

High resolution mass spectrography using AgBr photographic plates as ion detectors for organic chemical problems 07 p1224 A70-18894

Mass spectra of 1,2-cyclohexanediol and deuterium labeled analogs data recorded and mechanistic rationalizations of degradation processes given 07 p1225 A70-20200

Mass spectrometric sequence determination of oligopeptides via acetylacetyl derivatives, giving reliable results with small peptides 09 p1630 A70-22976

Cyclohexene oxide mass spectral fragmentation by means of deuterium labeled analogs 09 p1630 A70-23397

Aliphatic ethers low resolution mass spectra interpretation using computer program heuristic DENDRAL 09 p1631 A70-23400

Isomeric 1-phenylheptenes mass spectra, investigating electron impact induced rearrangements of double bond 09 p1631 A70-23401

Mass spectroscopy for solar system exploration, discussing ion sources, mass analyzers and ion detectors meeting mission requirements 10 p1942 A70-24612

Lunar rocks types determination by mass spectroscopy, describing results of terrestrial rocks tests 11 p2119 A70-26799

Mass spectrometric analysis of lunar material from soil vaporization products ion component by electron beam 11 p2119 A70-26800

Neutral molecule-solid surface interactions mass spectrometric techniques for measuring molecular flux and mean thermal energy after interaction 12 p2181 A70-27257

Omegatron for total and partial pressure measurement or mass spectrometer applications 12 p2231 A70-27262

Electron impact promoted phenyl migration of trans phenyltolalene, considering mass spectroscopy and stereochemistry 14 p2544 A70-30189

Ion-polar molecule collision time history plots and computer movies, calculating capture cross sections for mass spectroscopy 18 p3292 A70-36561

Upper atmospheric ions kinetic temperatures based on chromatic broadening of mass spectral lines 18 p3252 A70-36985

Optimal separation height of instrument container in atmospheric gas composition mass spectrometric studies 18 p3260 A70-36996

Exhaled alveolar air data acquisition using mass spectrometer and multichannel analyzer 19 p3367 A70-37356

Ion collision effect in quadrupole mass spectrometer, describing ion energy, total pressure in system and other parameters 19 p3421 A70-37411

Ultrahigh vacuum pressure measurement by improved residual gas analysis mass spectroscopy with magnetic section 19 p3396 A70-37465

Sealed-off carbon dioxide laser discharge deposits analyzed by mass spectroscopy 19 p3445 A70-37670

Evolved gas analysis by mass spectroscopy (EGA-MS), discussing filament heating system and data processing 19 p3374 A70-38495

Carbonaceous chondrites noble gases measurement by mass spectroscopy, discussing compositional trends and origins 20 p3703 A70-39323

- Simultaneous mass spectrometric differential thermal analysis of low pressure decompositions of nitrate salts of monomethylhydrazine and methylamine
20 p3688 A70-40475
- Apollo 11 lunar fines organic compounds detection and identification by mass spectrometry
21 p3780 A70-41632
- Mass spectroscopy analysis of neutral and ionic population of plasma in carbon dioxide laser gas mixture, discussing collision processes
21 p3838 A70-42006
- MASS TRANSFER**
- Hydrodynamics, mass and energy transfer equations for moderately dense gases multicomponent mixtures, using Bogoliubov theory
01 p1146 A70-10129
- Heat and mass transfer in Couette flow of partially ionized symmetric diatomic gas for chemical equilibrium and chemically frozen flow cases
01 p0060 A70-10290
- Laminar boundary layer analysis of heat and mass transfer in dispersed two phase flow over heated surface
01 p0214 A70-10293
- Soviet monograph on transfer processes theory in statistical mechanical systems based on probabilistic approach to random particle walk
01 p0215 A70-10650
- Mass loss rate of evaporating liquid droplet with vapor reacting with oxygen of atmosphere in combustion front
[DFVLR-SONDDR-16]
01 p0216 A70-10932
- Mass transfer analysis for axisymmetric turbulent flow in circular tube, deriving turbulent velocity profile from two part model, based on von Karman similarity hypothesis
01 p0064 A70-11092
- Nonaxisymmetric mass transfer in turbulent flow in plain circular tube, considering diametral line and discontinuous ring sources
01 p0065 A70-11093
- Aerodynamics, heat and mass transfer in vapor condensation from humid air on flat plate in longitudinal flow in asymmetrically cooled slot
01 p0004 A70-11178
- White dwarfs formation in close binary systems ascribed to mass exchange between components, describing evolutionary followup of primary from main sequence by model
01 p0189 A70-11343
- Volumetric reaction rates and mass transport coefficients as function of position for ducted two dimensional turbulent hydrogen-air diffusion flame
02 p0398 A70-12036
- Stratospheric air intrusion into troposphere calculated for speed and frequency of occurrence, considering mass and energy transfer
02 p0329 A70-12690
- Lunar mascon origin theories, discussing mass transfer by excess pressure generation due to rapid cooling crust and densification by water outgassing
02 p0379 A70-12779
- Soviet bibliography on heat and mass transfer covering thermodynamics, heat conduction, convection and radiation, phase and chemical transitions, aerodynamics, geophysics, etc
03 p0605 A70-13392
- Tropopause role in stratospheric-tropospheric exchange processes for radioactive debris transport
03 p0476 A70-13908
- Ideal fluid motion characteristics near variable volume spheres with radial mass transfer through surfaces
04 p0672 A70-15198
- Equations and techniques to analyze transient heat and mass transfer characteristics of packed adsorption beds for spacecraft life support systems
04 p0786 A70-15316
- Mass transfer and viscous interaction combined effects on axisymmetric hypersonic flow of perfect gas over slender bodies
[AIAA PAPER 68-717]
04 p0675 A70-15576
- Heat and mass transfer in reacting laminar boundary layer over porous cylinder with propane injection in wind tunnel experiments
05 p0956 A70-16289
- Soviet bibliography on heat and mass transfer covering thermodynamics, heat conduction, convective and radiant heat transfer, phase and chemical transformations, combustion, etc
05 p0957 A70-16297
- Galactic expansion due to mass energy loss by gravitational radiation
05 p0913 A70-16557
- Collection of papers on heat and mass transfer theories, measurements and applications
06 p1174 A70-17676
- Turbulent boundary layers and wall jets development investigated for effect of mass injection through porous smooth and rough surfaces
06 p1034 A70-17679
- Convective heat and mass transfer augmentation techniques including surface and displaced promoters, vortex flows, etc
06 p1174 A70-17681
- Collection of papers on heat and mass transfer, Volume 2, covering free convection, forced fluid flow, nozzle flow, boundary value problems, etc
06 p1174 A70-17682
- Heat and mass transfer in passive transpiration cooling system with two moving boundaries, observing porosities and radius of curvature effects
06 p1176 A70-17692
- Heat and mass transfer across laminar boundary layer around stagnation line of cylinder in crossflow affected by free stream turbulence intensity
06 p1176 A70-17693
- Particle ejection moments from tail of comet Ikeya-Seki determined from photographs having visible terminal synchroes
06 p1140 A70-17732
- Energy and mass transfer during elastic and inelastic molecular collisions in reacting gas mixtures, using Enskog and variational methods in solving Boltzmann equations
06 p1110 A70-17760
- Pyrolysis effect on infinite slab subjected to front heat flux, attributing increased porosity to mass loss
[WSCI PAPER 69-27]
06 p1178 A70-17978
- Hypersonic aerodynamic measurements on cone, investigating effects of oscillatory mass addition on stability
[AIAA PAPER 70-217]
06 p0974 A70-18171
- Monte Carlo analysis of free and near free molecular flow through circular tubes for mass, momentum and energy transfer
06 p1051 A70-18367
- Mass loss rates for short period comets from non-gravitational terms in equations of motion, paying particular attention to secular variations
06 p1151 A70-18490
- Integral method for time development of viscous, heat and mass conducting layer over leading edge of volatile drop instantaneously immersed in gas stream
07 p1358 A70-18916
- Fcc metals surface changes following adhesion using low energy electron diffraction (LEED), relating intersurface metal transfer to applied adhesive force
07 p1305 A70-18920
- Downstream distribution of trace element injected into boundary layer of flat plate or cone with self similar mass transfer
[SAMSO-TR-69-56]
07 p1256 A70-19313
- Electronic analog model for simulating convective mass transport in system with stationary and dynamic phases
07 p1423 A70-19740
- Stefan problem involving mass transport and phase transformations, presenting solution algorithm
08 p1596 A70-20852
- Hydrodynamics, mass and energy transfer equations for moderately dense gases multicomponent mixtures using Bogoliubov theory
08 p1548 A70-21405
- Interhemispheric mass exchange as function of eddy transfer and meridional circulation
08 p1539 A70-21922
- Heat and mass transfer coefficients in binary laminar boundary layer convection obtained with integral equations and Karman-Pohlhausen method
09 p1787 A70-22264
- Heat and mass transfer in binary turbulent boundary layer during natural convection on vertical surface, allowing for diffusional heat conduction
09 p1787 A70-22267
- Drag on sharp cones in hypersonic flow, studying effects of intense transverse mass injection through porous walls
09 p1603 A70-22441
- Turbulent heat and mass transfer from wall to plane-parallel fluid flow at large Reynolds and Peclet numbers, developing universal law
09 p1789 A70-23169
- Laminar boundary layer separation noting effect of mass slot suction
09 p1662 A70-23236
- Turbulent pipe flow with wall suction, calculating friction factor, pressure gradient, heat and mass transfer coefficients, velocity and temperature profiles
[ASME PAPER 69-HT-4]
09 p1790 A70-23558
- Heat and mass transfer during liquid surface evaporation in vacuum, calculating temperature field on basis of heat balance level
09 p1791 A70-23717
- Naphthalene rotating disk with confronting stationary disk, investigating heat and mass transfer dependence on shroud dimensions, measuring flow types
11 p2060 A70-26410
- Flat plate normal to two dimensional impinging air jet, investigating heat/mass/transfer structure using naphthalene method
11 p1977 A70-26411
- Laminar boundary layer equations solved for heat and energy transfer in binary gas mixture, investigating forced and free convection
11 p2151 A70-26558
- Simultaneous heat and mass transfer coefficients in laminar free convection boundary layers on horizontal cylinders or vertical axisymmetric bodies
11 p2151 A70-26559
- Compressibility transformation theory extended for turbulent boundary layer, involving mass transfer with/without chemical reactions
[AIAA PAPER 69-161]
12 p2211 A70-27825
- Similar laminar boundary layer solutions exhibiting separation, pressure gradient and mass transfer
12 p2211 A70-27828
- Mass transfer in close binary stars and in highly variable stars
12 p2306 A70-27858
- Bubble dynamics in subcooled nucleate boiling, deriving mathematical model based on evaporation-condensation mass transfer mechanism
12 p2333 A70-28113
- Unsteady heat or mass transfer to translating fluid sphere thermal boundary layer, determining analytical solution method accuracy
12 p2333 A70-28116
- Graphite mass removal rates under ohmic heating in reacting gas turbulent flows
13 p2519 A70-28579
- Surface erosion of sublimating graphite and naphthalene due to inequilibrium mass transfer in gas flows
13 p2437 A70-28580
- Mass transfer in electrochemically accelerated plasma, discussing recombination, ambipolar diffusion, electrode sputtering, charge exchange, electron capture and resistance forces effect on acceleration
13 p2461 A70-28862
- Laminar near wake flow field of two dimensional adiabatic circular cylinder with surface mass transfer
[AIAA PAPER 69-67]
13 p2343 A70-29951
- Reynolds momentum and mass transport at velocity half radius of coaxial jet compared to eddy viscosity models
14 p2564 A70-30260
- Two dimensional incompressible turbulent boundary layer with mass addition and heat transfer, calculating temperature and velocity profiles by marching integration
14 p2564 A70-30261
- Three dimensional boundary layer along semi-infinite swept stagnation line, assessing counteracting effects of cross flow and mass transfer
14 p2565 A70-30278
- Sonic boom minimization methods involving mass or energy addition
14 p2531 A70-30868
- Sound propagation in atmospheric fog, considering mass, momentum and energy transfer mechanisms between particles and gas
15 p2769 A70-31443
- Monograph on momentum, heat and mass transfer rates to vertical continuous cylinder moving through quiet fluid in forced and free convection
15 p2825 A70-31694
- Thermal boundary layer and heat and mass transfer at porous horizontal heated surface in presence of free convection, considering blowing and suction effects
15 p2827 A70-32133
- Distributed-lumped parameter model for impeded mass transfer and blood-gas maldistribution effects in human respiratory system
15 p2694 A70-32844
- Iodine concentrations, temperature gradients and transport ampules etching effects on mass transport rate and crystal growth of MnS-MnSe-iodine system
16 p2960 A70-33088
- Mechanical erosion concomitant with thermochemical erosion in mass and energy transfer at interface of boundary layer and ablating nylon-silica-phenol material
[AIAA PAPER 70-824]
16 p2941 A70-33942
- Iron, Ni, Cr and Co corrosion and mass transfer in high temperature Na, examining properties of stainless steels and cobalt base alloys
16 p2933 A70-34209
- Comet Alcock flareup on 27-29 May 1969, noting visible rays in coma, dust grains expulsion from nucleus, tail structure, etc
16 p2980 A70-34304
- Frequency spectra of gravitational waves radiated from celestial phenomena, suggesting mass exchange in binary containing neutron star
17 p3067 A70-34619
- Heat and mass transfer in flowing fluid, deriving conservation and constitutive equations, with application to boundary layer flow of gases
17 p3069 A70-35033
- Transient heat and mass transfer in adiabatic regenerator, solving mathematical model in terms of Green functions
17 p3197 A70-35542
- Explicit differences scheme for heat and mass transfer differential equations
18 p3345 A70-36114
- Meteorite masses evaporation during flare, showing discrepancies for luminosity factors
18 p3315 A70-36604
- Burning rate theory applied to heat and mass transfer rates of monopropellant droplets in heat-up and steady burning at wet bulb temperature
18 p3348 A70-36696

DC plasma generator with Ar stabilized arc, investigating heat and mass transfer in jet discharge channel
19 p3481 A70-38189

Phase formation and mass transport during iodine-refined Ti reaction with nitrogen at various elevated temperatures
19 p3452 A70-38364

Turbulent heat and mass transfer from wall to plane-parallel fluid flow at large Reynolds and Peclet numbers, developing universal law
19 p3552 A70-38392

Turbulent jet system with previously unmixed chemically active gases, calculating heat and mass transfers during diffusion combustion
20 p3737 A70-39813

Human mass exchange parameters permissible errors for manned space vehicles life support systems design
20 p3581 A70-40200

Flat plate boundary layer flow with surface blowing and suction /mass transfer/, investigating stability by numerical techniques
20 p3615 A70-40507

Turbulent boundary layers calculation with and without mass addition based on eddy viscosity concept, including accelerating flows
21 p3807 A70-41029

Accelerated self similar compressible laminar boundary layer flows with and without mass transfer, obtaining numerical solutions
21 p3807 A70-41031

Reentry vehicle with multicomponent gas mixture injection, calculating heat and mass transfer correlations for stagnation point flow
21 p3945 A70-41033

Thermal protection system based on radiation cooling for high altitude cruising hypersonic flight, achieving zero net mass transfer
21 p3950 A70-41745

Upstream mass injection effects on downstream heat transfer of supersonic reacting boundary layer
21 p3952 A70-42079

Turbulent heat/mass transfer from solid boundary with shear stress dependent on wall distance for various Schmidt or Prandtl numbers
21 p3953 A70-42088

Combined effects of flow unsteadiness and surface mass transfer on displacement thickness of boundary layer, using flat plate geometry
21 p3811 A70-42092

Heat and mass transfer in plane inductionless and dissipationless incompressible MHD boundary layer with longitudinal pressure gradient
21 p3861 A70-42231

Mass transfer effects on plasma electrodynamic acceleration, discussing plasma recombination and diffusion
22 p4083 A70-43386

Two phase liquid one dimensional motion in variable cross section tube, deriving mass transfer, motion and phase interaction differential equations
22 p4012 A70-43721

Mass transfer and velocity gradient fluctuations at wall in two dimensional or rotational flow for large Schmidt numbers
23 p4181 A70-44210

Heat and mass transfer for liquid film evaporation during two phase two component flow in vertical steel tube under adiabatic and nonadiabatic conditions
23 p4276 A70-44215

Mass transfer between sphere and liquid flow at small Reynolds numbers
23 p4276 A70-44219

Three dimensional laminar boundary layer separation at infinite swept stagnation line with high mass injection rates
23 p4182 A70-44568

Close binary star components axial rotation, considering synchronism, angular velocity and mass exchange
23 p4250 A70-44814

Biological life support systems mass exchange processes analysis based on mathematical models, predicting artificial ecological systems stability
23 p4149 A70-45029

German monograph on radioactive gases and decomposition products mass transport in turbulent atmospheric boundary layer, noting Boussinesq approximation and Reynolds decomposition
24 p4324 A70-45094

High speed radiographic observation of electric arc movement and metal transfer during submerged arc welding
24 p4322 A70-45724

MASSAGING

Bioelectrically controlled system for indirect heart massage, noting dynamic simulation of system on digital computers using block oriented programming languages
01 p0047 A70-10261

MATCHING

Physical identity and name sameness matchings efficiency noting role of interpolated activity
07 p1203 A70-18942

Matching operations for difference and differential equations describing discrete control systems dynamics having cyclic interruption of data quantization frequency
08 p1480 A70-20999

Helicopter engine rotor matching for tip propulsion efficiency, comparing with conventional shaft drive propulsion
18 p3215 A70-36842

MATERIAL ABSORPTION

Carbon dioxide absorption from gas streams by weak base ion exchange resins
18 p3226 A70-36767

MATERIAL BALANCE

NT WATER BALANCE

MATERIAL REMOVAL (MACHINING)

U MACHINING

MATERIALS EROSION

U EROSION

MATERIALS HANDLING

NT GROUND HANDLING

NT PROPELLANT TRANSFER

NT REMOTE HANDLING

Worldwide door-to-door cargo shipping by airline, considering marketing systems approach
07 p1426 A70-18875

Air-land demountable cargo containers specifications, establishing dimensional, structural and environmental requirements
07 p1249 A70-19599

Onboard cargo loader to make aircraft independent of specialized ground equipment
10 p1862 A70-25330

Two-point suspension system with longitudinally displaced cargo hooks for handling helicopter loads, discussing wind tunnel and flight tests
17 p3014 A70-34714

Static charge reducer for aircraft fuels handling safety, discussing performance factors
18 p3263 A70-36808

Lead alloys as shielding materials in nuclear systems, discussing physical, chemical and metallurgical properties, fabrication and applications
19 p3469 A70-37833

Surface damage of GaAs crystals by mechanical handling and polishing with hard abrasive lapping materials
20 p3686 A70-39119

Hydrogen slush characteristics, discussing advantages of liquid-solid mixture over liquid hydrogen, production methods, aging effects, transfer and pumping losses, storage, instrumentation, etc
23 p4232 A70-45075

MATERIALS RECOVERY

NT WATER RECLAMATION

Constant stress creep and recovery behavior experiments of polycarbonate under combined tension and torsion stresses in weakly nonlinear range
01 p0130 A70-11083

Creep and recovery of polyvinyl chloride reinforced by oriented cotton fibers, considering roles of fiber density and stress magnitude
03 p0516 A70-13499

Annealing properties of radiation damage in lithium-diffused silicon, formulating kinetic equation to describe processes associated with recovery and instability
20 p3687 A70-40165

Gas bubbles effect on recovery and recrystallization in W sheet deposited from tungsten fluoride vapor
24 p4358 A70-45243

MATERIALS SCIENCE

Discrete models formulated for thermomechanical behavior of materials with memory, obtaining equations of motion and heat conduction for finite elements of nonlinear continua
01 p0208 A70-11183

Optical studies of deformational structures of minerals from meteorite craters and cryptoexplosion structures
02 p0292 A70-12510

Gear materials evaluation program for space environment application with unlubricated or solid film lubricated operation mode
[ASLE PREPRINT 69-LC-6] 02 p0309 A70-12539

Papers on engineering materials covering refractory creep resistant materials, fiber reinforcement, ceramics, polymers, alloys, etc
02 p0318 A70-12709

Polymers application as engineering materials, discussing properties, physical states, etc
02 p0322 A70-12716

Servo systems for analog automatic reduction of time dependent photomechanical model materials fringe data in stress analysis
03 p0482 A70-12967

Soviet collection of papers on metal science and corrosion problems covering welding, heat treatment, Cr-Mn steel, Ti alloys, etc
03 p0509 A70-13276

Nonlinear solid applied mechanics, emphasizing nonlinear constitutive equations and related subjects, cyclic loading effect on solid materials, etc
03 p0610 A70-14230

Specific heat, electrical resistivity and thermal conductivity changes in materials properties at cryogenic temperatures, noting parasitic phenomena, mechanical and dielectric properties
03 p0525 A70-14269

Materials science experimental and diagnostic phases in mechanisms of metal erosion by impacting dust particles
[ASME PAPER 69-WA/MET-8] 04 p0704 A70-14760

Metals, plastics and ceramic materials under erosion by irregular quartz particles, using vacuum whirling arm
[ASME PAPER 69-WA/MET-6] 04 p0704 A70-14762

Materials in spatial motion criteria of stress power positiveness
05 p0929 A70-16069

Cryogenics applications to solid state physics and materials research tabulated for experimental methods and objectives
05 p0892 A70-16398

Material inhomogeneity during high temperature fatigue tests taking into account probability density of random failure coordinate distribution
07 p1401 A70-18839

Carbon fabrics and filaments, resin carbonizing and carbon-carbon composites, discussing processing parameters, initial carbonizing resin binder and reinforcement effects on laminate properties
07 p1316 A70-18932

Filamentary composite materials for commercial aircraft and engine construction noting boron, graphite and glass reinforcement
07 p1316 A70-18950

Materials selection and simulated service testing to preclude failure, considering roles of design, fabrication and maintenance
07 p1248 A70-19235

High temperature techniques, measurement and data methodology noting refractory materials
07 p1312 A70-19877

Servo systems for analog automatic reduction of time dependent photomechanical model materials fringe data in stress analysis
07 p1286 A70-20040

Strength and plasticity criteria for anisotropic reinforced materials model taking into account material structure, components properties and behavior
09 p1768 A70-22119

Book on solid materials under stress covering mechanical testing, metals and polymers structure, ceramic crystals and creep and composite materials properties
09 p1708 A70-23476

Gear materials evaluation program for space environment application with unlubricated or solid film lubricated operation mode
10 p1893 A70-23837

Materials and processing technology roles in NASA programs involving manned space stations, service spacecraft and unmanned space exploration
10 p1902 A70-23855

Book on tensor calculus in materials science covering thermodynamic equilibrium, gaseous and solid phase heat engines, solids crystalline structure, etc
12 p2282 A70-26866

Structures, structural mechanics and materials - AIAA-ASME Conference, Denver, April 1970
12 p2317 A70-27126

Acoustooptics materials selection guidelines, estimating lead molybdate figure of merit on basis of chemical composition and density
13 p2469 A70-28796

Book on high temperature, transition and hydrated ceramics covering nomenclature, natural occurrence, mechanical, thermal, sonic, electrical, magnetic and chemical properties
13 p2436 A70-29781

Elastoplastic material mechanical theory, considering constitutive equations with plastic deformations and decompositions of total velocity-strain /stretching/
14 p2661 A70-31281

Materials durability in presence of stress concentration under biharmonic loading
15 p2813 A70-31527

Materials research - Conference, Tokyo, September 1969
17 p3123 A70-34651

Materials and noncontacting design for 50,000 hour lifetime electromechanical components, noting magnetically suspended motor
17 p3100 A70-34754

Polyimide prepreps reinforced with glass, carbon and graphite, describing processing characteristics, properties and applications
17 p3127 A70-35419

Materials deformational flow theory, relating dislocation motions in solids to fluid viscosity concept
17 p3190 A70-35452

Homogeneity criteria for semiconductor materials, considering variation coefficient, goodness factor and overshoot density
18 p3298 A70-36468

Book on materials for structural and mechanical functions covering electrical engineering properties, ferrous and nonferrous metals and alloys, fabrication methods, environmental protection, etc
19 p3453 A70-38622

Soviet book on fiber reinforced composites covering strength, rheologic and elastic properties, thermal conductivity, diffusion processes, etc
19 p3456 A70-38795

Hot gas pipe thermoelastic reduction factors, determining elastic support, material and dimensions
20 p3720 A70-39624

High strength and stress corrosion resistant materials, considering Ti, Ni, Al alloys, metal-matrix composites and polymers
20 p3655 A70-39666

Photographic materials resolving power for lines and points
20 p3633 A70-39750

Materials viscous failure at various temperatures and stresses, discussing damage accumulation
20 p3725 A70-39870

Materials technology - Conference, Mexico City, August 1970
20 p3649 A70-39939

Be production, development, potential uses and properties [ASM PAPER G8-102]
20 p3650 A70-39970

Mechanics of composite materials - Conference, Philadelphia, May 1967
20 p3728 A70-40026

Composite material engineering problems, discussing tensile, compressive and shear strengths, design approaches, unidirectional properties and substance characterizations
20 p3651 A70-40027

Parabolic solar furnace for chemical manufacture of impurity sensitive materials in orbiting spacecraft
21 p3804 A70-41001

Aircraft flight propulsion systems performance improvement via materials technology for gas turbine engine components
22 p4057 A70-43573

French book on strength of materials covering potential energy theory, cutoff and matrix methods, computer calculations, etc
22 p4119 A70-43623

Papers on thermoplastics covering types, properties and applications
22 p4060 A70-43624

Materials problems in space and spacecraft environments, discussing particle density, composition and UV radiation, spacecraft structure, payloads, vibration, etc
23 p4209 A70-44328

Fibrous, cellulosic, elastomeric and plastic materials with improved flame resistant properties for space applications
23 p4152 A70-44461

Temperature dependent materials heat flow analysis using perturbation method for nonlinear boundary value problems
23 p4282 A70-44589

Fibrous composites thermomechanical properties derivation by theoretical analysis from basic constituents characteristics, presenting comparisons with experimental results
24 p4366 A70-45170

Materials design and development for engineering applications, discussing relationships and importance of strength, stiffness, weight, toughness and work of fracture
24 p4419 A70-45174

Plasticized high polymers mechanical and optical properties, studying birefringence phenomena interrelation with applied external stresses
24 p4424 A70-45590

Nondestructive testing - Conference, Hanover, June 1970, Materials properties determination, Stress measurements
24 p4347 A70-45728

MATERIALS TESTS

Nondestructive evaluation of components and materials in aerospace, weapons systems and nuclear applications - Conference, San Antonio, April 1969
01 p0095 A70-10001

Contact thermographic materials application to nondestructive materials testing based on heat capacity, costs, removal time, equipment, personnel skill and training, etc
01 p0097 A70-10007

Electronic materials nondestructive evaluation techniques, describing analytic tests for chemical, structural, electrical and optical characteristics determination
01 p0085 A70-10023

Release adiabats and recentered Hugoniot curves determination by shock reverberation techniques for compressible nonlinear materials, presenting results for epoxy resin and porous tuff
01 p0198 A70-10106

Fibrous filter materials filtering capability, comparing extruded and drawn metallic filters
01 p0007 A70-10159

Defects development in cermet materials sealing elements in high O content gas flows of turboprop and turbojet engines
01 p0161 A70-10160

Laser processing applied to optical nondestructive materials tests for surface flaws
01 p0086 A70-10416

Ultrasonic methods for materials evaluation, discussing goniometry, measuring techniques and acoustic wave propagation in various materials
01 p0104 A70-10878

Diffraction loss measurement in solid state laser to determine laser material contribution to total cavity loss
01 p0113 A70-10919

Steels tested to evaluate proposed incremental strain theories predicting loads on thin walled cylinders subjected to nonproportionate loading, discussing stress-strain diagram
01 p0202 A70-11057

Constant stress creep and recovery behavior experiments of polycarbonate under combined tension and torsion stresses in weakly nonlinear range
01 p0130 A70-11083

Microwave propagation in materials and measurement methods for inspection based on reflecting surface movement and scattering method for porosity detection
01 p0094 A70-11395

Machine element materials damping properties, determining energy dissipation during steady resonant vibrations
01 p0211 A70-11423

PKR portable xeroradiographic defectoscope for nondestructive testing of steel and Al alloys
02 p3001 A70-12486

Nb-Mo alloys in various proportions prepared by vacuum casting, showing embrittlement under hydrogen atmosphere
02 p0318 A70-12671

Test fixture for determining mechanical properties of metals and steels at moderate strain rates, detailing design and instrumentation
03 p0462 A70-12883

Apparatus for short term thermal vacuum mechanical testing of materials
03 p0463 A70-13253

Air plasma pulsed discharge jets erosive effects on metals, semiconductors and dielectrics, noting role of thermal effect
03 p0532 A70-13742

Nonflammable material development program for Apollo spacecraft, noting requirements imposed by high oxygen environments, toxic offgassing and temperature range
03 p0436 A70-14055

Structural materials mechanical properties tests during neutron bombardment, discussing atomic reactors optimal parameters calculation
04 p0775 A70-15259

Compression test for ductile materials based on Saint Venant principle of plasticity to reduce friction effects on deformation by lubricant pressurization
04 p0776 A70-15373

Stress corrosion testing method to separate corrosion and stress effects applied to Al and Ti alloys
04 p0708 A70-15374

Variable strain bending form design for determining environmental craze resistance of polymers
04 p0713 A70-15375

Reinforced plastics destructive and nondestructive testing including standard methods, equipment and procedures applicable to materials and parts
05 p0874 A70-16621

Composite materials properties test methods, discussing nondestructive method for shear or rigidity modulus of square plates
05 p0874 A70-16622

Testing equipment and methods for metallic materials selection for low temperature applications, characterizing plasticity by yield strength, tensile strength, elongation, etc
05 p0864 A70-16805

Heat resistant materials damping properties at high temperatures under distributed stresses measured in thin walled tubular specimens with vibrogram
05 p0952 A70-17049

Scale dependence and optimal sample dimensions for strength tests of brittle refractory materials
05 p0955 A70-17064

Test facilities for studying materials thermophysical properties and stress relaxation, including dynamic hardness measurement and torsion tests up to 2500 K
05 p0830 A70-17074

Recrystallization behavior of Al alloy containing Mg and Si subjected to maximum aging before cold working
06 p01085 A70-17418

Thermal and dynamic considerations of materials choice for satellite mounted telescope mirrors noting Be and silica properties
06 p1064 A70-17781

Insulation materials selection for Martian soft lander to meet mission environmental conditions based on tests
06 p1182 A70-18224

Laboratory Electronic Servo Controller for structural fatigue tests, aircraft material tests, model position and velocity control in wind tunnels
06 p0989 A70-18606

Fe-Cr-Ni alloys for use in high temperature oxidizing environments
07 p1305 A70-18966

Materials selection and simulated service testing to preclude failure, considering roles of design, fabrication and maintenance
07 p1248 A70-19235

Fiberglass reinforced materials characteristics under stress evaluated by ring test in form of split disk or hydraulic tests
07 p1410 A70-19758

Radiative heating rates and gas environments effects on ablative material performance from tests at arc image facility
07 p1319 A70-19888

Laboratory and field tests to evaluate liquid rocket propellant properties for tactical mission
07 p1362 A70-19918

Stress wave propagation in particulate loaded carbonaceous materials induced by homogeneous laser beam
07 p1302 A70-20097

Static and dynamic low temperature crack toughness behavior of steels, determining strain rate effect
08 p1518 A70-21317

High speed testing - Conference, Boston, March 1969, Volume 7, Rheology of solids
08 p1526 A70-21326

Composite materials testing and design - ASTM Conference, New Orleans, February 1969
08 p1528 A70-21876

Composite materials shear strength test problems with high modulus fibers
08 p1529 A70-21877

Inplane shear stress-strain response determined for unidirectional composites, using uniaxial test method for laminated plates
08 p1530 A70-21884

Mechanical testing of metal matrix high modulus B-Al filament composites, using unidirectional and multidirectional reinforcement
08 p1523 A70-21894

Yttrium iron garnet sintering and grain growth rates dependence on yttrium/iron ratio [ACS PAPER 16-BE-68F]
09 p1740 A70-22982

Composite window permitting visual or photographic observation and IR irradiation of test materials in ultrahigh vacuum system
09 p1698 A70-22994

Materials static tested for compatibility with pure and moisture contaminated chlorine pentafluoride at 160 F and ambient temperatures
09 p1742 A70-23250

Oxygen index flammability test for polymeric materials, showing general applicability in quality control and research
09 p1710 A70-23346

Fibrillated asbestos dispersed in thermoplastic ionomer lattices, precipitated, dried and compression molded into bars, testing for flexural modulus, flexural stress and Vicat softening temperature
10 p1906 A70-24024

Solid electrolyte high temperature fuel cells electrode materials, investigating various metal oxides
10 p1830 A70-24461

Aviation and space industry metallic and nonmetallic materials testing, discussing corrosion and ultimate fatigue due to impurities
10 p1861 A70-24664

Flammability resistance and smoke emission characteristics of aircraft interior fire retardant materials under ambient and increased temperature and zero ventilation conditions [AIAA PAPER 70-400]
10 p1908 A70-24905

Hollow cylindrical sample scale effect on accuracy of testing heat resistance of brittle materials
10 p1965 A70-25301

Stability conditions in metal specimens tension tests, considering fcc and bcc metals strain hardening, rate and gradients and temperature dependence
10 p1966 A70-25326

Stress peak distribution effects on fatigue life of test specimen excited to bending by Gaussian random vibrations
11 p2137 A70-26093

Lifting entry vehicle thermal protection system /TPS/ material performance, analyzing metallic radiator and passive transpiration systems and rigid insulation
11 p2150 A70-26368

Materials absorption coefficients determination at high temperatures based on spectrophotometric analysis of emission from samples of different thicknesses
12 p2331 A70-27305

Fracture toughness and cyclic crack propagation of surface cracked high strength aircraft structure steels 12 p2254 A70-27467

Materials life estimation under irregular load sequences, discussing computational and graphical method, applications and test and computer equipment 13 p2513 A70-29162

Transfer molding of electronic modules, discussing materials for evaluating selection and processing guidelines 13 p2421 A70-29255

Quasi-stationary analysis of thermophysical characteristics of materials, considering cylinder and plate samples under unsteady heating 15 p2826 A70-32105

Materials testing machine for tension, compression and flexure at constant strain rate and for fatigue 16 p2900 A70-33067

Ceramic material ranking, using thermal stress crack initiation method 16 p2934 A70-33274

Epoxy laminating resin evaluation for tooling industry, considering diluent, fillers, thixotropy, hardeners and physical property testing 16 p2936 A70-33360

Glass fiber reinforced resin structures evaluation by plastographic analysis using visual, macrographic, stereomicroscopic, and scanning electron microscope methods 16 p2908 A70-33361

Materials test fixture design and fabrication for vacuum testing and evaluation of slip rings and brushes, discussing dry film lubrication 16 p2920 A70-33812

Satellite-borne test instrument for determining mirror materials degradation due to long solar exposure 16 p2921 A70-34109

Materials technology for reuse capability of space shuttle, discussing normal and stress corrosion, hydrogen embrittlement and flammability 16 p2987 A70-34228

Strain rate effect on cyclic behavior of materials with hardening and softening characteristics 17 p3187 A70-34988

Fatigue life prediction under irregular stress conditions, considering material characteristics determination by standard tests 17 p3187 A70-34990

Shock wave response of metals and nonmetals under high strain rates 17 p3188 A70-35223

Temperature changes minimization techniques in specimens during microplasticity tests, describing gage assembly for plastic strain measurement 18 p3272 A70-36030

Polymers dynamic properties in hyperelastic and vitreous states as function of temperature, using torsion pendulum method 18 p3263 A70-36469

Dry friction and wear tests of various materials in vacuum at low temperatures 18 p3263 A70-36471

Dynamic hysteresis loop measurement of energy dissipation in materials, showing deformation effects on accuracy 19 p3535 A70-37346

Energy dissipation in material under complex vibrations, noting role of summary shear stress 19 p3535 A70-37347

Apparatus for short term thermal vacuum mechanical testing of materials 19 p3401 A70-38471

Jet engine roller bearings retainer candidate cage materials and coatings evaluation on test rig simulating engine conditions [ASLE PREPRINT 70AM 2D-1] 19 p3439 A70-38805

Molybdenum disulfide abrasiveness on test rings coated with bonded solid lubricant [ASLE PREPRINT 70AM 5A-1] 19 p3439 A70-38811

Carbon/carbon composites constituent characteristics effects on thermal and mechanical properties, using polarized light and scanning electron microscopy 20 p3653 A70-39204

Composite materials physical properties measurement and defect locations detection by NDT techniques 20 p3636 A70-39210

Unidirectional and multidirectional carbon/carbon composites quality and performance evaluation by NDT methods, including X ray radiography, ultrasonic test, pulse echo mapping, etc 20 p3654 A70-39211

Papers on design and materials, discussing alloys for aircraft structures, stress-rupture life of Ni base alloy, single crystal structures, etc 20 p3648 A70-39412

Composite structural materials for thermal protection in reentry vehicles applications, evaluating fused quartz yarns, silicone rubber and phenolic resins 20 p3656 A70-40031

Al alloys and stainless steels tensile properties and application in lightweight cryogenic propellant tank structures, discussing Ti alloys and reinforced composite materials tests 20 p3651 A70-40123

Integrating cavity spectroscopy for measuring absorption coefficient of material 21 p3822 A70-40817

High temperature aromatic polyester Ekonol, discussing fabrication, properties and potential applications 21 p3842 A70-41136

Turbocompressor disk materials selection by low cycle fatigue tests, discussing stop and start repetition and cracks in stress concentration zones 21 p3867 A70-41261

Aerial retrieval webbing performance characteristics, discussing structure, type of material, finishing and strength levels 21 p3843 A70-41832

Ultrasonic spectroscopy in nondestructive materials tests, discussing electronic equipment design, FM, pulse and pulsed FM methods 22 p4027 A70-42583

Scorched aluminum powder /SAP/ materials, discussing fabrication, physical and mechanical properties, applications in aircraft structural components, etc 22 p4055 A70-43084

Materials for glass-metal compressed joints, tabulating stress and thermal expansion coefficients 22 p3999 A70-43447

Manned spacecraft nonmetallic construction materials selection criteria, testing and configuration control, considering flammability hazard 23 p4152 A70-44462

Saturn Orbital Workshop experiment for testing chemically rigidized expandable materials and structures for space applications, discussing resin impregnated glass fiber cloth 23 p4264 A70-45012

Nondestructive testing - Conference, Hanover, June 1970, Electric and magnetic methods 24 p4343 A70-45693

Nondestructive defectoscopic diagnostics, applying cybernetics to materials testing 24 p4344 A70-45694

Gamma ray nondestructive tests for materials defects, discussing cinematic, geometric and radiological factors effects on detection 24 p4337 A70-45711

Oscillating pendulum equipment for nondestructive material tests, determining longitudinal and transverse elastic moduli of specimen 24 p4338 A70-45738

Potentiometer application to nondestructive tests of materials, operation principles, methodology and advantages 24 p4338 A70-45739

Fluorescent penetrants vs magnetic powder test for individual and continuous material inspection, discussing sensitivity and surface finish influence 24 p4338 A70-45741

Metal and nonmetal thermal nondestructive tests based on surface temperature distribution produced by heat treatment 24 p4348 A70-45744

Fast neutrons for radiogenic nondestructive material testing, describing defectoscope performance, sensitivity and cost efficiency 24 p4377 A70-45851

Instantaneous corrosion rate measurement, comparing coupon, resistance and polarization methods 24 p4365 A70-46390

MATHEMATICAL ANALYSIS

U APPLICATIONS OF MATHEMATICS

MATHEMATICAL LOGIC

NT ALGORITHMS

NT BOOLEAN FUNCTIONS

NT EQUIVALENCE

NT FORMULAS [MATHEMATICS]

NT LATTICES [MATHEMATICS]

NT SET THEORY

NT THRESHOLD LOGIC

Majority logic decodability of product of two majority logic decodable cyclic codes 17 p3049 A70-34853

Polynomial and logic theories of dynamic systems, explaining linear and nonlinear elements of automatic control systems 19 p3392 A70-37447

MATHEMATICAL MODELS

NT DIGITAL SIMULATION

NT THOMAS-FERMI MODEL

Mathematical model coefficients determination for planar diffused transistor, obtaining admittance parameters 01 p0048 A70-10050

Hydrogen type exciton model applied to analysis of intermediate exciton state role in two quantum absorption in semiconductors 01 p0153 A70-10068

Mathematical model of spherically symmetric quiescent droplet undergoing quasi-steady vaporization near thermodynamic critical point 01 p0213 A70-10291

Mathematical model for vestibular nystagmus adaptation to subjective sensation of rotation, noting time constants 01 p0032 A70-10362

Mathematical models for perception and skilled action in man or machine, noting sensorimotor theory 01 p0034 A70-10498

Mission simulation mathematical modeling technology developed for optimization of experiment program management and operational planning for manned space station missions [AIAA PAPER 69-1065] 01 p0181 A70-10634

Mission model construction for power limited systems, discussing flight concepts, propulsion mixes and electric propulsion 01 p0183 A70-10848

Mathematical model for studying three dimensional whirling shaft stability as function of angular to critical velocity ratio, using Liapunov method for equations of motion 01 p0143 A70-10889

Binocular brightness mixing and autocorrelation function, discussing mathematical model, computer simulation and test results 01 p0025 A70-11053

Discrete models formulated for thermomechanical behavior of materials with memory, obtaining equations of motion and heat conduction for finite elements of nonlinear continua 01 p0208 A70-11183

Book on mathematical methods of reliability theory covering probability theory, statistics, Laplace transformation, set theory, testing, quality control, mass production, sampling, etc 01 p0133 A70-11308

Nervous stress effect on coronary thrombosis, deriving mathematical theory based on biophysical and biochemical approaches 01 p0028 A70-11369

Left ventricle confocal prolate spheroid model taking into account physiologic variations of thickness 01 p0040 A70-11373

Availability model for system with exponential reliability function and constant repair time, determining start-up costs, cost-optimal mean up and down time, etc 01 p0221 A70-11382

Dynamic characteristics of model of spacecraft-astromat-tether system during approach, deriving kinetic potential 01 p0192 A70-11587

Cost model based on initial and support costs for studying availability variations effect on system total cost and maintainability and reliability interrelationship 02 p0401 A70-11674

Electron loss in heavy body collisions from free scattering model and Born approximation 02 p0342 A70-11879

Premature saturation in strongly magnetic systems explained by model with nonuniform magnon modes, applying time dependent Green functions 02 p0338 A70-11886

Mathematical model for local postbuckling strength of flat truss core sandwich panels loaded in compression, considering application to Ti structures 02 p0386 A70-11948

Mathematical models construction for predicting and measuring air traffic controller workload, using synthetic and analytic methods 02 p0332 A70-11972

Three dimensional linear combustion instability in liquid propellant rocket motors using concentrated combustion model, presenting mathematical analysis as boundary value problem 02 p0353 A70-12011

Mechanical properties of human skull specified for construction of physical and mathematical models 02 p0243 A70-12097

Mathematical model formulated in terms of feedback controller for simulation of horizontal eye movement for positioning upon objects of interest 02 p0243 A70-12098

Computer simulation of automated air traffic control concepts, formulating and implementing generalized model of automated transition/terminal area systems 02 p0335 A70-12133

Automatic flight control systems with aerodynamic characteristic and control parameters deviation from nominal values, discussing mathematical model describing aerodynamic characteristics behavior 02 p0381 A70-12408

Mathematical elastodynamic model for parametric dynamic study of forced response solution of motion equations during head trauma 02 p0238 A70-12548

Analytical scoring model design for effective evaluation of competing research and development projects 02 p0402 A70-12634

- Incremental profit and total airline profit model programs for air cargo systems
[SAE PAPER 690413] 03 p0411 A70-12899
- Mathematical model for burning rates of solid propellant rocket motors during pressure transients, coupling conservation equations with mass balance equation
03 p0543 A70-12912
- Mathematical model for ejection fraction of human left ventricle incorporated with fiber orientation and ventricular geometry, showing consistent results with biplane angiocardigraphic films
03 p0433 A70-12975
- Decision model for R and D project selection
03 p0609 A70-12991
- Laminate approximation model of randomly oriented fibrous composites estimating stiffness and thermal and expansional strains
03 p0587 A70-13126
- Negative resistance mechanism model with larger electron accumulation in conduction band than free holes
03 p0539 A70-13212
- Terrain computerized mathematical model for determining unobstructed line of sight between observer and target
03 p0455 A70-14172
- Two loop control system model of human lens accommodative system derived on basis of muscle mechanics, optics and experiments
03 p0439 A70-14275
- Deformability calculation of two phase composite solid materials through laminated structural models
03 p0602 A70-14337
- Mathematical model for computer simulation of homogeneous neuron nets with recurrent inhibition control, considering activated and inactivated states
04 p0640 A70-14553
- Mathematical model based on equivalent electrical circuit for transient radiation analysis by computer (TRAC) family of circuit analysis programs, simulating semiconductor devices
04 p0657 A70-14737
- Turbine flowmeter theoretical model
[ASME PAPER 69-WA/FM-2] 04 p0689 A70-14841
- Mathematical model building for temporal human motor responses /reaction, movement, manipulation/ by response surface technology and statistical experimental design
[ASME PAPER 69-WA/BHF-5] 04 p0642 A70-14851
- Theoretical model of fan/compressor noise blade passing frequency generation and transmission, noting duct length and configuration in engine operation
04 p0734 A70-14886
- Electron scattering by molecules, demonstrating formal equivalence of fixed nucleus and free rotator scattering models
04 p0722 A70-14949
- Conducting fluid steady convection due to combined effects of thermal gradient and DC electric field predicted by analytical model
04 p0785 A70-14989
- Resonant compression waves in geomagnetic tail estimated for frequency and spatial distribution by single layered two dimensional model
04 p0680 A70-15127
- Geometrical model for characterizing instrument landing system (ILS)/ null reference glide path utilizing CW measuring system
04 p0716 A70-15330
- Solar powered communications spacecraft weight, electrical power and communication capacity models for optimizing size and launch vehicle fractionation
04 p0763 A70-15347
- Lifting rotor blades flapping response to atmospheric turbulence, discussing time averaging and perturbation schemes
[AIAA PAPER 69-206] 04 p0624 A70-15378
- Automated modeling and structure optimization of linear dynamic systems and circuits, using hybrid computer techniques and time-domain test data
04 p0654 A70-15452
- Flowfield and chemical kinetics model to calculate nitrogen dioxide chemiluminescence wake emission
[AIAA PAPER 68-702] 04 p0620 A70-15535
- Exchange perturbation theories applied to delta function model of molecular hydrogen ion, discussing EL-HAV second order energy at large internuclear separations
05 p0884 A70-15878
- Numerical integration of linearized two level forecast model to analyze behavior of accumulated error
05 p0878 A70-16153
- Burgers one dimensional model equation for homogeneous turbulence treated by Fourier transform in space and time, using Bogoliubov expansion method
05 p0833 A70-16331
- Hartree model to study superfluid He film bound to uniform substrate
05 p0883 A70-16469
- Miniature fluxgate magnetometer for sounding rocket measurements of two orthogonal components of external magnetic field, predicting performance by linear mathematical model
05 p0851 A70-16690
- Ball lightning mechanism proposal based on mathematical model for electric discharge current in parabolic plasma shell forming vortex-type storm front
05 p0879 A70-17021
- Mathematical model for investigating satellite thermal behavior in space based on space simulation in vacuum chamber with walls maintained at liquid nitrogen temperature
05 p0924 A70-17022
- Mathematical model of optimal partially closed life support system consisting of man, recycling unit, storage unit and waste disposal outlet
05 p0809 A70-17110
- Mathematical models for describing visual perception of distance to ground during VTOL landing and takeoff
05 p0810 A70-17119
- Hazards model for probabilistic prediction of casualties by exploding solid propellant rockets, deriving casualty expectation equation
[AIAA PAPER 69-461] 06 p1154 A70-17169
- Properties of unstable confocal resonator used with carbon dioxide-nitrogen-helium laser, using geometric models and measurements
06 p1079 A70-17188
- Kolmogoroff constant determined by Heisenberg turbulence formula and model for transfer of turbulent energy between different wave numbers
06 p1034 A70-17467
- Mathematical models for progressing waves diffracted by smooth surfaces
06 p1105 A70-17533
- Mathematical models describing interactions between rarefied gas atoms and solid surfaces
06 p1036 A70-17759
- Hyperstability conditions of model reference adaptive control systems, noting applications
06 p1026 A70-17966
- Mathematical model for testing theory of solar differential rotation maintenance by two dimensional turbulence
06 p1144 A70-18009
- Experimental data to define idealized thruster discharge model power efficiency limits, computing probabilities for excitation, ionization, propellant escape and wall interception of ions
[AIAA PAPER 70-177] 06 p1131 A70-18034
- Ammonium perchlorate deflagrations, determining intrinsic stability of one dimensional burning configuration based on flame structure modeling
[AIAA PAPER 70-123] 06 p1128 A70-18044
- Flow model for steady asymmetric vortex system shed from slender body of revolution in coning motion
[AIAA PAPER 70-52] 06 p0971 A70-18118
- Combustion characteristics of blended droplets composed of monopropellant and diluent, using theoretical model to predict life histories
[AIAA PAPER 70-7] 06 p1180 A70-18141
- Gas dynamic effects of reaction center in explosive gas mixture analyzed by model and numerical computation
[AIAA PAPER 70-147] 06 p1181 A70-18144
- Modified Maxwellian models for particle reflection in free molecular flow, correlating model parameters with gas-surface properties
06 p1110 A70-18259
- Model for impact behavior of elastic body at elastic half space, measuring gas molecule impulse exchange at metal surfaces
06 p1171 A70-18260
- Three dimensional model for high energy scattering of inert gas atoms from solid surfaces, calculating trapping, accommodation and flux and velocity distributions
06 p1110 A70-18261
- Statistical model based on kinetic and probability theories to determine drag coefficient of orbiting satellites
06 p1159 A70-18289
- Solar wind interaction with moon derived for model and compared with satellite data
06 p1147 A70-18291
- Moment methods for calculating modeled diffusion gas mixture shock waves using Monte Carlo method, discussing distribution function and flow pattern
06 p1050 A70-18336
- Molecular beam continuum model to determine structure of shock waves in diatomic gases, comparing calculated profiles with measurements in nitrogen
06 p1050 A70-18338
- Kinetic model equation for shock structures in rotationally relaxing gas with internal degrees of freedom
06 p1050 A70-18340
- Monograph on models of failure covering mathematical system reliability determination and relationship to physical nature of failures
06 p1171 A70-18394
- Black box modeling of linear integrated circuits for computer analysis in frequency domain
06 p1026 A70-18416
- Stochastic model of information handling centers as typified by document storage and retrieval derived for integral equation to determine expected primary store size
06 p1016 A70-18450
- Boundary value problems and Cauchy problem considered for mathematical model of turbulent motion in liquid or gas
07 p1252 A70-18671
- Dynamic response of gas lubricated radial sliding bearing from transfer function derived from pH linearized mathematical model of gas lubrication
07 p1290 A70-18739
- Multivariate linear model and robust estimators of parameters based on rank tests
07 p1323 A70-19027
- Mathematical models of vertical antennas of finite length and height, discussing signal strength and LUF determinations
07 p1240 A70-19167
- Optical activity theory based on Kirkwood independent group model using scattering matrix
07 p1334 A70-19264
- Thermoelasticity equations derived for regular systems of M bodies in dynamic and thermal interaction using nonlocal continuous model
07 p1407 A70-19381
- Mathematical model for oxygen tension changes in dogs brain tissues under hypoxia during altitude simulation
07 p1208 A70-19505
- Real plasma isotherms using three component /atoms, electrons, positive ions/ model in search for supercooled dense plasma
07 p1349 A70-19651
- Mathematical models for photogrammetric disposition in aerial photography
07 p1284 A70-19780
- Disturbances of air flow originating from small scale mountains using numerical model
07 p1330 A70-19799
- High attenuation quantum communication channel capacity based on mathematical model
07 p1335 A70-19864
- Freezing-mixing model for predicting plasma jet flow reactor yield development from analyses of thermochemical equilibrium, chemical reaction freezing and turbulent mixing
07 p1351 A70-19893
- Mathematical model for calculating radiative heat transfer from turbulent diffusing buoyant flame and predicting liquid fuel burning rate
07 p1425 A70-20008
- Automatic control system identification with respect to optimality criteria, mathematical models, computing techniques and input signals
07 p1247 A70-20029
- Wall boundary condition model modification applied to molecular beam-solid surface scattering, noting qualitative agreement with observed distributions
07 p1342 A70-20118
- Ground wave electric field intensity prediction model in EMC applications, discussing soil conditions and polarization effects
07 p1336 A70-20217
- Finite element models for nonlinear problems analysis in coupled thermoelasticity dynamical theory, deriving heat conduction equations from energy balance considerations
07 p1417 A70-20363
- FM spectral density model with applications to radio transmitter bandwidth estimation and interference analysis
08 p1456 A70-20473
- Mathematical model of extensive air showers, calculating lateral distribution of photoelectric component at all altitudes
08 p1560 A70-20598
- Stochastic programming models for flight scheduling within airlift system accounting for cargo uncertainties, using convex programming, linear programming codes, etc
08 p1600 A70-20605
- Radio waveguides with random inhomogeneities, studying mathematical models by orthogonalization method
08 p1457 A70-20723
- Human color vision simulation by mathematical and electronic analogs for photoelectric color measurement and eye resolution
08 p1450 A70-20727
- Deductive model of vision statics formulated for Grassman laws without using operation of color composition
08 p1450 A70-20729
- Alternative equipment maintenance procedures costs by combined discrete event and continuous system simulation, discussing additional model applications
08 p1466 A70-20927
- Model characteristics selection for dynamic system behavior simulation, studying characteristics variability extent without changing trajectory behavior dependence on parameter space
08 p1544 A70-20953

Pulse neurons random homogeneous networks macroscopic description, considering operation modes in terms of input frequencies and output pulse sequences 08 p1451 A70-21000

Vertical plane and axis symmetrical numerical models for cumulus convection of moist atmosphere, discussing initial conditions 08 p1536 A70-21025

Multistage axial compressor performance described by mathematical model based on maximum probability principle 08 p1558 A70-21190

Prandtl-Kolmogoroff model of turbulence with inclusion of second order terms for stress and velocity gradient not to vanish coincidently 08 p1484 A70-21458

Civil air transportation in India, using mathematical models to estimate optimal development and efficiency of future air traffic potential 08 p1601 A70-21544

Model for magnetic field-line reconnection in conducting incompressible fluid, determining maximum reconnection rate entirely by null point conditions 08 p1553 A70-21615

Auroral zone electrojet return current spatial distribution using idealized models for stationary state 08 p1491 A70-21718

Mathematical model for finite-density non-homogeneous Newtonian cosmologies, approximating solutions using coupled Vlasov-Poisson equations 08 p1581 A70-21740

Deuterium Lyman alpha line profiles generated from microwave powered lamp for experimental testing of two layer model characterizing emission line profiles 09 p1730 A70-22066

Optimal control mathematical modeling for dynamic systems under statistically indeterminate disturbances based on game theory and pattern recognition 09 p1653 A70-22141

Vibration theory damping using mathematical model emphasizing controlling response under steady state resonance and random excitation 09 p1769 A70-22238

Pulsar mathematical model accounting for pulse width, polarization and spectrum of emitted radiation 09 p1753 A70-22383

Damage model for materials failure prediction under cyclic loading developed for strain controlled cycle with hold time 09 p1774 A70-22588

Inner-shell ionizations by proton impact calculated for cross section using impulse approximation model, comparing results with Born approximations 09 p1732 A70-22781

Error analysis of position finding techniques using analytical model composed of equations describing position error differential relationships 09 p1724 A70-23045

Incompressible homogeneous fluid model in non-relativistic generalized gravitation theory using analytical solution 09 p1762 A70-23118

Mathematical model with straight wake airfoil to determine aerodynamic forces on oscillating rotor blades in hovering flight 09 p1605 A70-23222

Polynomial force model supplementing reduced gravity model in determining accuracy of near equatorial, near synchronous and near circular satellite orbits 09 p1762 A70-23256

Pressure oscillations in LOX pump inducer of J-2 machine, using semianalytical first order model with retarded time mechanism 09 p1693 A70-23257

Shock wave structure nonequilibrium kinetic model using Boltzmann and Navier-Stokes equations 09 p1662 A70-23306

Eddy penetration model for heat transfer from trailing face of cylinder in transverse flow 09 p1791 A70-23566

Discrete dynamic models construction using Gaussian quadrature formula with Jacobian weight, noting Raleigh function role 09 p1785 A70-23597

Equivalent oscillatory model defined from asymptotes of frequency response amplitude and cut-off frequency amplitude value of plane rigid airfoil in incompressible potential flow 10 p1953 A70-23841

Supersonic leading edge problem solved by ellipsoidal model using discrete ordinate method compared with BGK model solution 10 p1797 A70-23957

MGD model of plasma with dissipation due to finite electrical conductivity described by differential equations 10 p1922 A70-24144

Balancing method for correcting mathematical model discrepancy with gas turbine based on test data 10 p1930 A70-24289

Mathematical model for determining optimal control of spacecraft reentry into atmosphere 10 p1940 A70-24318

Error propagation in flowmeter calibration on model using empirical model-transmission equation 10 p1888 A70-24391

Control synthesis method using optimization technique to design controllers making closed loop system behave as ideal system or model 10 p1855 A70-24450

Pituitary hormone ACTH stimulatory effect on steroid hormone cortisol secretion by canine adrenal cortex, constructing seventh order state variable model 10 p1819 A70-24868

Hardware and system testing mathematical model assuming stochastic design and manufacturing defects detection and nondetection probability equations analogous to reliability function 10 p1896 A70-24915

Polynomial model of uniform target motion for smoothing and extrapolating coordinates and parameters using independent radar range and velocity readings 10 p1843 A70-25136

Educational satellite TV for developing countries, giving model relating economic development to education and applied technology 11 p2152 A70-25429

Turbulence model with level and scale functions for flows including homogeneous turbulence, logarithmic boundary layer, duct center flow, linear shear layer and viscous sublayer 11 p2035 A70-25685

Mathematical model for oxygen tension changes in dogs brain tissues under hypoxia during altitude simulation 11 p1987 A70-26104

Radiant heat transfer predictions between isothermal plates based on diffuse plus specular directional property model 11 p2149 A70-26157

Regression analysis of linear statistical model experiments with stationary Gaussian error of slowly varying spectral density 11 p2073 A70-26249

Ground testing apparatus with three degrees of freedom for artificial satellites attitude control systems, establishing mathematical model by digital and analog techniques 11 p2031 A70-26290

Human controllers nonlinear time domain mathematical model for analyzing compensatory tracking task data 11 p1992 A70-26396

Asymptotic model for stationary radiative stationary transitions using Newman-Penrose spin coefficient approach to gravitational radiation for Riemann spacetime 11 p2084 A70-26547

Discrete models for boundary value problems analysis in first strain-gradient elasticity theory, using extended finite element method 11 p2142 A70-26637

Turbulent reacting wakes properties prediction models validity, discussing Lagrangian formulations and eddy diffusivity and mixing models 11 p1978 A70-26772

Linville bipolar transistor model for computer-aided design programs 11 p2021 A70-26830

Mathematical model for rats nonlinear time-varying glucocorticoid secretion control mechanism, obtaining time dependent characteristics of hypothalamic-hypophyseal complex 12 p2174 A70-26893

Spectral discrimination technique for crops remote sensing, comparing statistical irradiance model with airborne multispectral scanner data 12 p2219 A70-26931

Mathematical model of microwave probe for reentry plasma, using variational method to calculate reflection coefficient 12 p2230 A70-26983

Lunar Orbiter spacecraft vibration responses based on mathematical models, comparing results with experiment 12 p2315 A70-27098

Limited frequency range analytical model for predicting mass and stiffness changes effect on natural frequencies and normal modes 12 p2317 A70-27121

Lumped linear model parameters determined from dynamic test data on mode shapes and frequencies for approximating distributed elastic structure 12 p2317 A70-27122

Composite reinforced materials similarity criteria to relate static and dynamic fields of various physical parameters, outlining mathematical simulation 12 p2259 A70-27526

Polymer shells lasting stability mathematical simulation, discussing similarity criteria of nonlinearly and hereditarily elastic materials 12 p2259 A70-27528

Euler-Bernoulli and Timoshenko beam impact models compared for case of finite beam resting on spring supports 12 p2327 A70-27843

Radiation transfer models for diffuse reflection of quanta from turbulent medium applied to electromagnetic wave propagation in turbulent atmosphere 12 p2306 A70-27855

Mathematical model for flow within external target type thrust reverser, assuming inviscid incompressible two dimensional flow [AIAA PAPER 69-3] 12 p2291 A70-28085

Bubble dynamics in subcooled nucleate boiling, deriving mathematical model based on evaporation-condensation mass transfer mechanism 12 p2333 A70-28113

Mathematical models for radar transmitters emission spectra envelopes calculation, considering effects of pulse width, rise and fall times, corner smoothing and frequency modulation 12 p2189 A70-28136

Shock wave formation and propagation analyzed by hydrodynamic model of two directional traffic flow based on continuity equations and velocity-density empirical relations 12 p2212 A70-28196

Elssasser and statistical band models in single parameter functions representing mean absorption in given spectral range 12 p2191 A70-28295

Rotating shaft model with slight curvature for estimating maximum bending moment through Fourier series analysis 13 p2416 A70-28372

Space information systems effectiveness evaluation based on generalized homomorphous model 13 p2372 A70-28377

Crosstalk effects on data transmission in multiplex TV systems for aerospace communications analyzed by signal and noise models 13 p2363 A70-28384

Admissible controls synthesis for closed loop system [satellite] stability 13 p2500 A70-28410

Hard sphere model for reactive molecular collisions based on energy and momentum of reactants and products 13 p2361 A70-28497

Configurations stress stability liquid propellant rocket nozzle analysis by BOSOR 3 digital program, describing mathematical model construction 13 p2508 A70-28509

Mathematical background for strong turbulence analysis in liquids and MHD 13 p2457 A70-28554

Mathematical models reproducing nonlinear mode interactions in CW bounded plasma devices 13 p2458 A70-28567

Sheath structure of plasma diode using kinetic theory model of plasma-sheath transition 13 p2376 A70-28642

Detonation model, discussing combustion gases from solid explosives detonation 13 p2520 A70-28803

Mathematical model for describing flow in Hele-Shaw cell, predicting attached viscous shear layers in lifting body wake 13 p2338 A70-28818

Automatic control systems for scientific experiments, considering algorithms, mathematical models and system designs 13 p2524 A70-28887

Radar cross section sea clutter model based on slightly rough surface superposition on swell structure 13 p2366 A70-29215

High temperature dislocation model based on dislocation dynamics, rate theory and varying back stress ratio 13 p2436 A70-29563

Cost effective spares provisioning models for airline operations, minimizing availability-cost ratio for line replaceable unit and total fleet 13 p2525 A70-29571

Tubular gas turbine combustors design by analytical model, summarizing theories of combustor analysis, turbulent flame speed, microvolume burning and stirred reactors [WSCIPAPER 70-2] 13 p2474 A70-29613

Mathematical models for human adaptive and optimizing characteristics in manual control systems regarding behavior phase 13 p2360 A70-29780

Fatigue damage accumulation deterministic models for predicting longevity 14 p2656 A70-30300

Solar wind interaction with moon, constructing mathematical model based on MHD equations and Explorer 35 data 14 p2630 A70-30356

Chromium lattice vibrational properties based on fourth-nearest-neighbor tensor force model, obtaining agreement with inelastic neutron diffraction data and elastic constants 14 p2626 A70-30480

Band and localized models for electrical conduction of metal oxides, discussing Mott and semiconductor to metal transitions 14 p2627 A70-30498

- Chemically reacting ideal substance model, describing thermodynamic properties and application to energy conversion processes 14 p2533 A70-30529
- Book on automation of mathematical description of controlled plants covering signal generation, information acquisition, statistical disturbance, self adaptive systems, etc 14 p2560 A70-30629
- Soviet collection of papers on automation theory and biological systems simulation covering game theory and mathematical models 14 p2542 A70-30630
- SCAMP 4 program for electronic circuits statistical analysis in frequency domain, obtaining mathematical models and transfer functions 14 p2561 A70-30667
- Mathematical model for interaction of solar wind with geomagnetic field, predicting magnetosphere shape 14 p2574 A70-30736
- Deterministic model for cost effectiveness of avionics support programs based on subsystems support ability, test philosophy and test equipment design and manufacture [AIAA PAPER 69-305] 14 p2563 A70-30857
- Book on space flight simulation systems examining real time and real performance requirements, mathematical models and various simulation programs 14 p2563 A70-30955
- Lunar near surface gravity estimation by mass density model for agreement between Doppler tracking data from Lunar Orbiter and trajectory predictions 14 p2645 A70-31064
- Availability assurance using computerized spare allocation model for optimal selection of sufficient spares to achieve required protection against system failures 14 p2592 A70-31114
- Stress-strain relationships model for nonlinear restrained cylinders, using compression tests and finite element method 14 p2660 A70-31135
- Synchronous satellite orbits determination using mathematical model for simulating gravitational perturbations induced by terrestrial globe and foreign bodies 14 p2651 A70-31279
- Aircraft design optimization by multisearch programs, considering mathematical model role 14 p2532 A70-31400
- Kinetic gas theory mathematical models, analyzing system of N particles in cube 14 p2601 A70-31422
- Boundary value problems and Cauchy problem considered for mathematical model of turbulent motion in liquid or gas 15 p2718 A70-31463
- Model for hydraulic resistance reduction for turbulent fluid flows by injecting suspended impurities 15 p2719 A70-31489
- Numerical model of diurnal variations of minor neutral constituents in mesosphere and lower atmosphere including molecular and eddy diffusion 15 p2727 A70-31909
- Stochastic medium mathematical model for loose medium motion in potential field of forces 15 p2821 A70-32342
- Kelvin wave propagation numerical model, showing influence of mean zonal wind vertical and horizontal shear in lower stratosphere 15 p2771 A70-32370
- Spacecraft thermal mathematical model adjustment to fit measured temperatures, using iteration method 15 p2812 A70-32513
- Nonlinear time-invariant lumped parameter dynamic systems, determining mathematical model by piecewise continuous power series expansions 15 p2768 A70-32576
- System maintainability stochastic modeling using probability density functions 15 p2748 A70-32670
- Mathematical reliability model for quasi-redundant electronic system with two failure modes for each component 15 p2769 A70-32827
- Mathematical-physical parametric model of satellite geodetic laser range accuracy, false alarm and count probabilities, correlating with retroreflector signal strength 16 p2863 A70-33166
- One dimensional controlled plants structure identification with mathematical model composed of aperiodic nonlinear and delay components connected in series 16 p2883 A70-33235
- Iterative weighted nonlinear least squares parameter estimation for human respiratory control system by transfer function modeling, comparing results with visual curve fitting 16 p2851 A70-33322
- Optimal fixed-form pilot model computer program for VTOL longitudinal control hover task evaluation 16 p2851 A70-33341
- Linear systems approximate minimum energy controller, suggesting algorithm for mathematical model evaluation 16 p2886 A70-33344
- Discrete stochastic optimal control model of human operator for single loop compensatory/pursuit tracking situation, considering application to manual control system design 16 p2852 A70-33463
- Angle modulated carrier acquisition and demodulation, developing baseband model for behavior of output signal from phase lock loop 16 p2864 A70-33481
- External burning fuels environmental temperature requirements from nonlinear droplet ignition model, emphasizing droplet size importance [AIAA PAPER 70-607] 16 p2997 A70-33604
- Numerical simulation of large scale atmospheric motions, considering pressure distribution, vorticity, kinetic energy, etc 16 p2946 A70-33625
- Resonant electron scattering processes in atoms and molecules, discussing mechanistic models and use in interpretation of experiments 16 p2955 A70-33798
- Liquid rocket propellant engine exhaust plume flow field, discussing mathematical models for combustion chamber, throat region and nozzle [AIAA PAPER 70-844] 16 p3001 A70-33927
- Model relating spectral reflectance to thermal control materials properties and environment induced changes 16 p2940 A70-33934
- Monte Carlo model of V groove surface roughness effects on directional reflections in plane of incidence, employing energy localization circle [AIAA PAPER 70-820] 16 p3002 A70-33944
- Mathematical model of heat flux absorbed by heated part in radiant heating reflector systems, considering shape, spectral, directional and polarizing effects [AIAA PAPER 70-818] 16 p3002 A70-33945
- German monograph on temperature distribution and motion of free burning arcs in transversal magnetic fields and gas flows, covering aerodynamic model concept 16 p2959 A70-34077
- Nonlinear wave equations model for human torso under impulsive stress, obtaining asymptotic solution 16 p2854 A70-34247
- Nonlinear mechanical lumped dynamic systems trajectory analysis in terms of P and G sets 16 p2944 A70-34285
- Mechanical vibrations models and analysis techniques, emphasizing problem of weak couplings in discrete systems 16 p2996 A70-34290
- Annoyance assessment for sonic boom series exposure near airport 16 p2843 A70-34325
- Analytical model for jet interaction induced separation of supersonic turbulent boundary layers, conducting flat plate tests at Mach 4 [AIAA PAPER 70-765] 17 p3007 A70-34486
- Probstein-Gold model for ablated materials crosshatching patterns, using interaction between inelastic deformable surface and supersonic turbulent boundary layer [AIAA PAPER 70-768] 17 p3009 A70-34504
- Frequency analysis of cylindrically curved panel with clamped and elastic boundaries, using mathematical and panel models 17 p3181 A70-34524
- Large complex system with standby components, approximating reliability by simple model substitution 17 p3099 A70-34582
- Direction finder for point source signals, discussing mathematical model for random noise in space, S/N performance and equipment design 17 p3042 A70-34586
- Stratified-rotating fluids mathematical analogy, examining flow constraints, parameters and variables 17 p3068 A70-34664
- Weather prediction models, describing equation systems, roles of friction and heating, meteorological data analysis, fronts, convection, etc 17 p3132 A70-34668
- Horizontal gravity gradient components in outer space from Stokes function expansion, using sphere as model 17 p3154 A70-34682
- Model diffusion equation for inhomogeneous incompressible turbulent flow, applying to free turbulent flows 17 p3069 A70-34825
- Gaussian source model of image, deriving rate distortion function under mean square error criterion 17 p3049 A70-34857
- Vibrating structure mathematical model for predicting radiated noise level 17 p3187 A70-35169
- Bipolar transistor behavior identification and characterization in static regime, discussing measurement methods for parameters of IBIS model 17 p3054 A70-35414
- Transient heat and mass transfer in adiabatic regenerator, solving mathematical model in terms of Green functions 17 p3197 A70-35542
- Closed compartment fire mathematical model to analyze combustion parameter effects, atmosphere pressure and temperature during fire 17 p3198 A70-35646
- Mathematical model for short term adaptation effects in human semicircular canal response to rotation, discussing nystagmus 18 p3216 A70-35940
- Ideal fluid contained in half space with circular or strip-like aperture, formulating mathematical model to determine sloshing frequencies 18 p3238 A70-36057
- Left ventricle pumping function self regulation mathematical model, obtaining transfer function 18 p3217 A70-36080
- Astatic gyroscope subjected to steady random translational vibration, optimizing parameters by mathematical model 18 p3257 A70-36136
- Mathematical model of asteroidal evolution and meteoritic mass distributions under collisional fragmentation using power law 18 p3312 A70-36213
- Dynamic numerical weather forecasting based on balanced model consisting of closed system of equations 18 p3284 A70-36232
- Mathematical model of three dimensional separated flows with applications to small aspect ratio delta wing and flat plate 18 p3207 A70-36438
- Mathematical simulation of human thermoregulatory system, considering automatic control theory 18 p3224 A70-36530
- Autoignition, ignition and surface temperatures of M-2 double base propellant at low pressure, correcting thermocouple measurements by theoretical model 18 p3299 A70-36697
- Fuel cell cavities, analyzing fluid motion purge dynamics based on anisotropic porous media model 18 p3216 A70-36766
- Magnetohydrodynamic calculations, discussing various models, difference methods, codes, boundary conditions, etc 18 p3296 A70-36794
- Book on crack problems in classical theory of elasticity, emphasizing mathematical aspects 19 p3534 A70-37234
- Optimal control for one dimensional compressible gas flow, combustion and heat exchange, described by first order partial differential hyperbolic equations 19 p3402 A70-37240
- Asymptotic high energy behavior of Feynman integrals in scalar field theory models for elastic scattering 19 p3457 A70-37549
- CdTe nonlinear electro-optical susceptibility predicted by mathematical model using two coupled anharmonic oscillators 19 p3485 A70-37668
- Mathematical representation of heart muscle mechanical properties, examining tensile stress in parallel and series elements 19 p3368 A70-37809
- Thermoelastic composite materials, deriving crystal lattice type model of equations for predicting dynamic or thermomechanical behavior 19 p3540 A70-37958
- Blast loaded cylindrical shell collapse hinge dynamic instability prediction by mathematical model 19 p3545 A70-38334
- Lumped parameter model for multidimensional solid mechanics problems with inelasticity, discussing stress wave interaction in cylindrical cavity 19 p3458 A70-38357
- System with N independently failing subsystems minimum cost solution mathematical model based on opportunistic preventive replacement policy 19 p3437 A70-38400
- Pop-in fractures analyzed by semiquantitative model, establishing relationship between pop-in length, stress intensity factor and crack-front plastic deformation 19 p3549 A70-38626
- Operational analysis and real time computer simulation models in ATC development 19 p3468 A70-38637
- Multidimensional decision models for optimal control, using piecewise constant functions 19 p3394 A70-38679
- Rarefied gas viscoseals performance prediction by theoretical model, comparing results with experiment [ASLE PREPRINT 70AM SC-3] 19 p3439 A70-38806
- Weather occultation satellite orbit determination by radio wave measurements between master and slave satellites, formulating mathematical model [AIAA PAPER 70-1067] 19 p3529 A70-38880
- Oscillatory flow in turbulent boundary layer modeled by eddy viscosity distribution, deriving mass

transport velocity induced by progressive and standing waves 20 p3608 A70-39358

V/STOL aircraft automatic flight control, guidance and navigation by onboard computer, discussing mathematical model and simulation results [ALAA PAPER 70-1035] 20 p3665 A70-39502

Category II longitudinal approach system model taking into account inputs, gusts, ILS beam noise, man machine interaction, etc [ALAA PAPER 70-1034] 20 p3665 A70-39503

Fluidic inertial platform feasibility model for air to surface missile line-of-sight guidance, noting cost, reliability and environmental advantages [ALAA PAPER 70-1009] 20 p3667 A70-39523

Highly constrained optimal control problems, using nonlinear programming in mathematical model for trajectory optimization 20 p3600 A70-39565

Self adaptive system with standard model, using direct loop amplification factor as controlled parameter 20 p3603 A70-39832

Computer calculations automation in mathematical models construction by statistical methods, discussing programs for distributed parameter systems, stochastic approximation, etc 20 p3592 A70-39903

Stochastic approximation iterative algorithms for multivariable plants mathematical models, including steepest descent method 20 p3593 A70-39910

Generator for modeling random processes with given statistical parameters 20 p3593 A70-39915

Variable wing sweep aircraft angular motion mathematical model, analyzing inertial moments influence on control dynamics 20 p3562 A70-40182

Lunar based astronomical research program logistics model taking into account scientific mission, launch vehicle capacities, supply and support requirements, etc 20 p3710 A70-40336

Predictive model for potential variance from planned schedule of R and D tasks to minimize risk in management 21 p3955 A70-41172

Subjective probability estimation for R and D decision making, using analytical models incorporating risk and uncertainty 21 p3955 A70-41175

Regulated spacecraft solar array mathematical model for high voltage power supply regulator analysis 21 p3757 A70-41208

Mathematical model for projectile penetration into metallic targets, calculating velocity after perforation 21 p3939 A70-41968

Ablative response predictions analytical tools, discussing boundary layer edge conditions definition, atmospheric entry, rocket propulsion, etc 21 p3952 A70-42055

Computerized evaluation of Krook kinetic relaxation equation approximating Boltzmann nonlinear integral equation for rarefied gas motion 21 p3851 A70-42201

Relative pressure and excitation induction transverse distribution relationship for MHD machine model, assessing dimensionless criteria effect on pressure peaks position 21 p3760 A70-42232

Internal gravity waves mathematical model for atmosphere with arbitrary distributions of temperature, molecular weight, viscosity and conductivity, deriving wave propagation into thermosphere 21 p3821 A70-42257

Spoiler theory based on mathematical model, using two dimensional potential theory in conjunction with experimental data on wake phenomena 22 p3957 A70-42273

Fluidic amplifier with axisymmetric jets, deriving approximate mathematical model for static no-load operation [ASME PAPER 70-FLCS-4] 22 p3964 A70-42427

Viscoelastic liquids state equations, surveying various fluid models 22 p4009 A70-42541

Two dimensional incompressible flow, calculating strong suction effects on laminar boundary layer separation by linear model 22 p4010 A70-42630

Lagrange formulation for deriving energy conserving numerical approximations for Vlasov plasmas 22 p4080 A70-42750

Mathematical model of heart beat control during muscular activity in aging individuals, reflecting neutral and hormonal control circuits 22 p3969 A70-42901

Mathematical model avoiding repetitive tests costs for Nerva nuclear rocket engine 22 p4070 A70-43179

Shock wave formation and propagation analyzed by hydrodynamic model of two directional traffic flow

based on continuity equations and velocity-density empirical relations 22 p4012 A70-43321

Collision integral model for multicomponent mixture, investigating partially ionized plasma longitudinal vibrations 22 p4083 A70-43382

Discrete decision variable models formulated as linear integer programs, deriving shrinking boundary algorithm for optimization 22 p3994 A70-43497

Sequential experiments design and model discrimination, comparing Chernoff and Box-Hill approaches 22 p4064 A70-43527

Vortex induced vibration problems, deriving mathematical model for periodic lift on circular cylinder 22 p3960 A70-43546

LF passband ideal filter instantaneous pulse response, using delta function model 22 p4005 A70-43555

STOL system traffic analysis simulation model for interurban transportation system as tool for flight hardware evaluation 22 p4007 A70-43731

Gunn effect, comparing intervalley scattering model to diffusion model for dynamic domain equilibrium 23 p4229 A70-43794

Scale invariance models correlation with cosmic ray data, comparing neutrino- and antineutrino- nucleon scattering 23 p4210 A70-43800

Computerized mathematical modeling of transistors statistical and dynamic characteristics as functions of structural parameters 23 p4171 A70-43954

Mathematical models derivation for systems of interconnected elastic segments, using variational method and energy summation via difference equations 23 p4266 A70-44019

Geomagnetic field behavior prediction based on extrapolation of magnetic data collected by observatories and dipole model approximation 23 p4189 A70-44068

Wind tunnel wall interference effects for V/STOL aircraft with lift jets, using modified theoretical model for complex jet arrangements [ICAS PAPER 70-54] 23 p4139 A70-44150

Functions of two variables, using digital method for curve family modeling 23 p4166 A70-44350

Closed cell polyurethane foam for cryogenic insulation, determining thermal conductivity and net heat flow by analytical model and test 23 p4280 A70-44367

Electromagnetic ground wave propagation, deriving exact solution from two dimensional cylindrical earth model with any number of homogeneous sections 23 p4164 A70-44405

Gyro drift rate mathematical modeling based on stationary and nonstationary time series analysis techniques with random process reduction to white noise residuals [ALAA PAPER 69-838] 23 p4197 A70-44557

ESRO 1 satellites attitude reconstruction, describing torque determination from known altitude 23 p4259 A70-44614

Antenna radiation pattern modeling by power optimization under constraints 23 p4175 A70-44800

Mathematical model simulating human respiratory physiopathology, based on hypothetical stable autooscillations dependence on ventilation/ pulmonary exchange system 23 p4155 A70-44859

Biological life support systems mass exchange processes analysis based on mathematical models, predicting artificial ecological systems stability 23 p4149 A70-45029

Gravitational field fine structure representation near earth surface as sum of global model in spherical harmonics and local model in harmonic B functions 24 p4328 A70-45287

Mathematical modeling of atmospheric gusts in stratosphere, mountain wave and thunderstorm conditions relevant to aircraft design 24 p4371 A70-45420

Mathematical model for plasma expansion resulting from short energy pulse absorption 24 p4387 A70-45799

Simplex lattice mathematical models of solidus volume for quaternary Nb-W-Ti-Zr system 24 p4361 A70-45833

Short haul transportation needs in multimodal transportation systems planning, discussing modeling in Northeast Corridor Project [ALAA PAPER 70-1265] 24 p4431 A70-45925

Air traffic flow digital computer simulation model including departure, enroute and arrival phases for collision avoidance, weather effects and control constraints [ALAA PAPER 70-1316] 24 p4373 A70-45945

Weather regimes in statistical meteorology constructed in stochastic models representing randomly transformed Markov chain 24 p4371 A70-46035

Aircraft maintenance cost statistical analysis recursive regression model for aircraft failure and manhour cost data 24 p4292 A70-46125

Mode locked laser pulses picosecond structure predicted from theoretical model of Gaussian random radiation field with temporal envelope modulation 24 p4355 A70-46263

MATHEMATICAL STATISTICS U STATISTICAL ANALYSIS

MATHEMATICAL TABLES
Beginning of table calculations using difference methods for numerical integration of ordinary differential equations 13 p2440 A70-28960

MATHEMATICS

Philosophical problems arising in contemporary and modern mathematics, discussing metaphysics and psychology 07 p1327 A70-19787

Lectures on forms in many variables covering Chevalley-Waring and Lang-Nagata theorems for finite and function fields, discrete valuation rings, etc 13 p2441 A70-29454

MATHIEU EQUATION U MATHIEU FUNCTION MATHIEU FUNCTION

Mathieu equation with nonlinear terms for damping and restoring forces, investigating first order instability region 18 p3337 A70-36224

Boundedness theorem for nonlinear Mathieu equation describing motion of parametrically excited system 24 p4380 A70-46042

MATRICES

Fiber-matrix interface mechanics in composites, considering shear strength, stress distribution, fiber strength effects, etc 01 p0127 A70-10479

MATRICES (CIRCUITS)

Electroluminescent matrix displays, discussing limitations in control element 05 p0827 A70-16186

N-port resistive networks synthesis from terminal conductance matrices with two-tree port structures 06 p1023 A70-17426

Resolution, contrast and gray scale performance of CRT displays compared to dot matrix displays 08 p1500 A70-21763

Integrated image sensor matrix array derived from equivalent circuit to minimize sneak path effects 10 p1854 A70-23879

Electro-optical light modulators representation by two port matrices, deriving amplitude modulation methods 13 p2427 A70-28924

Microwave circular array with electronic beam rotation of patterns by applying linear phase tapers to Butler matrix feed 16 p2874 A70-33393

Four dimensional matrix type CRT decoder characterized by large storage capacity and high resolution 18 p3256 A70-36105

Matrix condenser for tuning hybrid thin film self excited quartz oscillator with common base transistor configuration, discussing electrical properties and fabrication 20 p3597 A70-39257

Admittance matrix of microwave networks, referring to coaxial line-waveguide coupling through 3 kMc adapter 21 p3802 A70-42250

Reprogrammable read-mostly memory /RMM/ using integrated circuit array of amorphous and crystalline semiconductor devices, discussing design and applications 22 p3996 A70-42772

One dimensional cellular logic arrays fault circumvention by bypass switching out defective cells in cascade 22 p4004 A70-43073

Optical read-write mass memory based on holographic storage and light addressable matrix array, discussing significance to computer design and usage 22 p3994 A70-43606

Mappings of linear vector spaces induced by transformation matrix applied to linear dynamical systems 01 p0132 A70-11125

Square root filters algorithms based on covariance and invariance matrices extended to include process noise effects 01 p0144 A70-11193

- Algorithm for algebraic matrix Riccati equation, using Fletcher-Powell reformulation of Davidson function minimization 02 p0324 A70-12604
- Homogeneous waveguide solutions by finite element method using matrix operator and function minimization to assure rapid convergence to eigenvalue 03 p0457 A70-13936
- Complete solution of fifth order Runge-Kutta equations in condensed matrix form, considering coefficients of linear dependence 04 p0714 A70-15047
- Plan hybrid element generalized to arbitrary quadrilateral form, considering hybrids having constant and linear stress distributions 04 p0779 A70-15614
- Optimally ordered triangular factorization for solving symmetrical systems of linear matrix equations 05 p0876 A70-16573
- Computational algorithm for fast Hadamard matrix transform of order 12 via factorization 06 p1093 A70-17314
- Matrix Computer equisolution matrices for non-linear algebraic and integrodifferential equation systems solution 06 p1014 A70-17427
- Liapunov functions generation by matrix transformation of state-space system vector applicable to linear and nonlinear systems 06 p1023 A70-17544
- Frontal solution program for symmetric positive definite equations met in finite element applications 06 p1014 A70-17936
- Nonnegative matrices characterization by diagonal products to imply properties of stochastic matrices 06 p1094 A70-17950
- Boundary conditions and iterative procedures for plasma sheath problems, using matrix equation to represent differenced Poisson equation 06 p1123 A70-18295
- Rayleigh phase matrix solutions and albedo values for imperfect Rayleigh scattering in semiinfinite planetary atmosphere 06 p1149 A70-18460
- Capacity calculation of N identical discrete memoryless nonsingular channels cascade, discussing dependence on eigenvalues and eigenvectors of subchannel transition matrices 06 p1013 A70-18628
- Space vehicle digital control system attitude computations using quaternion matrix algebra to simplify control equations [AIAA PAPER 68-825] 07 p1393 A70-19302
- Matrix graph concept to unify signal-flow, flow- and N-graph technique approaches to representation and evaluation of matrices and linear algebraic equations 07 p1238 A70-19676
- Time-variable constrained control matrix optimization using Pontryagin principle applied to minimal time transfer, payoff and rotation maximization 07 p1247 A70-20024
- Time dependent matrix elements for multistate impact-parameter calculations for atom-atom inelastic cross sections 07 p1346 A70-20242
- Separable potential with hard core effects, treating short range repulsion in nucleon-nucleon interaction, generating T matrix for existing data 09 p1725 A70-22042
- Eigenvalues and eigenvectors evaluation for real symmetric matrices by iterating simultaneously with trial vectors 09 p1641 A70-22283
- Matrix multidimensional singular linear integral equation applied to electromagnetic radiation transfer through stratified atmosphere 09 p1711 A70-22349
- Numerical algorithms for solving Liapunov matrix equation in nonlinear stability analysis and optimal systems design 09 p1641 A70-22959
- ALGOL modified Gaussian algorithm for geodetic calculations, combining matrices for storage place economy 11 p2013 A70-25797
- Time-invariant linear dynamical systems transfer equivalence leading to algorithm for minimal realizations of transfer function matrices 11 p2072 A70-26161
- Invariance conditions and state transition matrix of linear systems 11 p2074 A70-26400
- Finite element bending stress analysis of thin rectangular and skew plates, discussing computational procedure generating stiffness matrices 11 p2143 A70-26641
- Transfer matrix spectrum for lattice gas models with finite interaction, constructing stochastic operator as stochastic matrices limit 12 p2272 A70-27343
- Transition matrix of Markov chain with finite states from noisy measurements of state, discussing algorithms convergence rates and computations 12 p2261 A70-27421
- Closed product form and simplified algorithm for efficient operation of generalized Kronecker matrices, considering role in spectral analysis 12 p2193 A70-28029
- Terminal constraints affecting matrices comprising linear impulsive guidance law for earth approach, discussing Mars mission 13 p2447 A70-28516
- Relationship between fundamental matrices of solutions to boundary value problems of parabolic and elliptical systems with Bessel functions 13 p2441 A70-29314
- Boundedness of solutions and higher derivatives for degenerate matrices, showing dependence on characteristic numbers and linear groups 13 p2443 A70-29744
- Price estimate elements interrelationship using three dimensional matrix for computerized cost data extraction 14 p2668 A70-30524
- Grassmann manifold projective transformations into itself, considering matrix theorems 14 p2601 A70-31423
- Axisymmetrical boundary value problem solution by net point method via transformation into self adjoint second order elliptic equation, obtaining positively determinate matrix 15 p2767 A70-31588
- Floquet-Liapunov theorem matrix representation derivation, improving accuracy of Liapunov classical representation 15 p2774 A70-31643
- Polarized light scattering angle relationship with Mueller matrix elements for polydisperse systems of irregular randomly oriented particles 15 p2775 A70-32040
- Multidimensional linear stationary systems controllability and observability with given transfer matrix 15 p2716 A70-32345
- Liapunov functions direct generation by state space system vector matrix transformation 15 p2768 A70-32555
- Combinational logic cells cellular arrays synthesis, considering truth table and transition matrix 15 p2712 A70-32606
- Adaptive Kalman filtering with unknown process and measurement noise covariance matrices 16 p2880 A70-32983
- Laser beam anticorrelation after attenuation by two photon amplifier, deriving density matrix in time dependent perturbation theory 16 p2928 A70-33283
- Linear multivariable feedback control systems design method based on transfer matrix, testing decoupling desirability 16 p2884 A70-33318
- Systems consisting of redundant and different modules, deriving vector and matrix expressions for effectiveness 17 p3099 A70-34581
- Lifting rotor blade motions stability computation using Floquet transition matrix 17 p3009 A70-34726
- Liapunov functions synthesis for aperiodic linear systems by inspecting traces of state matrix and products 17 p3129 A70-34955
- Matricial group representation theory for constructing elastic vibration equations of symmetric flexible mobile controlled members 17 p3180 A70-35293
- Parameter analysis of dynamical systems by matrix approach, using n-dimensional parameter space 17 p3130 A70-35300
- Hurwitz matrix of real Hurwitzian polynomial, discussing relation between eigenvalues and zeros locations 18 p3279 A70-36062
- Eigenvalues of transfer matrix and vibrations generation for passive mechanical systems with n degrees of freedom based on Laplace transformation 18 p3337 A70-36225
- Communication modulation systems unified description by conversion and indication matrices 18 p3229 A70-36942
- Nontrivial eigenvalues of stochastic matrices 19 p3456 A70-37414
- Feedback regulator synthesis for linear time invariant dynamic system with quadratic performance index, using computer algorithm for algebraic Riccati matrix equation 19 p3395 A70-38937
- Covariance matrices estimates for trajectory parameter tracking of thrust-maneuvering spacecraft [AIAA PAPER 70-1017] 20 p3666 A70-39516
- Kalman filter sizing for air-launched tactical missile via covariance sensitivity matrix [AIAA PAPER 70-954] 20 p3601 A70-39574
- Automatic digital device for evaluating matrix determinants 20 p3591 A70-39788
- Linear multivariable feedback control system, deriving conditions for existence of triangular decoupling transfer function matrices 20 p3605 A70-40118
- Rational polynomial matrices inversion by automatic computational procedures, considering Gaussian elimination and Faddeev algorithm 22 p0462 A70-42926
- Matrix transformations and minimization of computation algorithms for arbitrary linear equations systems, using direct methods 22 p0463 A70-43479
- Digital computer constructed with diodes and transistors logic for evaluating matrix determinants and minors 23 p4166 A70-43955
- Sufficient condition for bounded solution of matrix Riccati differential equation 23 p4212 A70-44896
- Large element method for stiffness matrix order reduction in two-dimensional continua problems 23 p4275 A70-44940
- Electromagnetic scattering by homogeneous gyrotropic cylinder, discussing matrix equations formulation and solution by reciprocity theorem 23 p4165 A70-44959
- Heat conduction problems numerical solution, using hypermatrices 24 p4428 A70-45127
- Matrix-vector computer program for three dimensional perspective projection and shell analysis in FORTRAN IV 24 p4419 A70-45155
- Successive iterative solution for large matrix equations reduced from Fredholm integral equations of second kind 24 p4369 A70-45164
- Approximate N-representability of density matrix by set of spin geminals 24 p4378 A70-45259
- Real matrix stability determination by right half plane eigenvalues, using symmetric solution of Liapunov equation 24 p4370 A70-46098

MATRIX METHODS

- Matrix method applied to achromatic linear phase plates design for polychromatic Ar lasers half wave phase shift 01 p0113 A70-10988
- Transfer matrix method analysis of dynamic behavior of beam structures applied to single rows of aircraft panels 01 p0209 A70-11200
- Finite element bending stiffness matrices for deflections analysis of pretwisted cantilever plate subjected to static loads 02 p0384 A70-11858
- Stiffness matrix derivation for curved beam emphasizing uncoupled normal to plane loads 03 p0584 A70-12949
- Stress-strain state of perforated shallow shells with arbitrary curvature using Green matrices 03 p0591 A70-13416
- Nonlinearity sources in elastic structures under large displacements, developing general matrix formulation 04 p0768 A70-14748
- Pressure vessel deformation and stress analysis by matrix displacement method, considering solids and membrane shells under axisymmetric and asymmetric loading [ASME PAPER 69-WA/PVP-3] 04 p0768 A70-14790
- Matrix analysis of steady state temperature field and heat flux through multilayer, plane, cylindrical or spherical partitions with internal heat sources 04 p0785 A70-14924
- Axisymmetric structures under load and temperature distribution analyzed by matrix displacement method [DGLR-69-62] 04 p0774 A70-15167
- Coefficient matrix-structural method for obtaining transfer function of linear automatic control systems 04 p0662 A70-15277
- Fundamental matrix asymptotic forms obtained for supersonic and subsonic three dimensional steady flows past body in uniform stream of viscous thermally conducting fluid 04 p0673 A70-15320
- Stiffness and mass matrices of free-free vibration structure reduced to eliminate zero frequencies 04 p0778 A70-15553
- Matrix algorithm from parallel element method derived for reducing computer time required in structural modification analysis 04 p0779 A70-15589
- Plan hybrid element generalized to arbitrary quadrilateral form, considering hybrids having constant and linear stress distributions 04 p0779 A70-15614
- Computational procedures for matrix analysis of stability and vibration of thin flat rectangular plates in longitudinal compression 05 p0927 A70-16010

Solar system resonant structure probability analyzed by matrix methods 05 p0910 A70-16397

Convergence of eigenvalues and eigenvectors in torsional vibration problems of continuous systems via improved matrix displacement analysis using points of freedom in segments 05 p0939 A70-16502

Monograph on computation of density functions of parameters in stochastic systems, giving algorithms involving only matrix computations of fixed dimensionality 06 p1093 A70-17730

Matrix method for calculating aerodynamic loads, shearing forces, bending moments, torques, etc, in hinged main rotor helicopter blades during hover and vertical flight 06 p1167 A70-17914

Green function of region near circle approximation by matrix method, considering Laplace differential equation solution, conjugate harmonic function and conformal transformation 07 p1253 A70-18924

Ideal fluid planar potential flow, approximating stream function and velocity potential by matrix method 07 p1253 A70-18925

Soviet book on matrix methods in relay and sampled data control theory described by linear differential and finite difference equations 07 p1244 A70-19069

Green matrices construction for joint shells by method of arbitrary constants variation, considering strained state symmetrical with joint lines 07 p1413 A70-20144

Automatic system of kinematic analysis (ASKA), based on matrix displacement finite element method, applied to structural strains calculations 07 p1417 A70-20362

Matrix method for converting time variable stress vector into strain vector allowing for linear creep and aging 08 p1583 A70-20531

Prismatic thin walled shells with box type cross section under torsion using Vlasov variational method in conjunction with transfer matrices 08 p1589 A70-21248

Matrix method for maximizing radar antenna directive gain and simultaneously placing nulls in far field radiation patterns 08 p1477 A70-21758

Matrix decomposition and full release methods for substructure analysis 09 p1770 A70-22258

Artifices to allow computing time reduction in recursive data elaboration for high order differential system 09 p1720 A70-22647

Forced vibrations of cylindrically curved multispan shell structures, using transfer matrix methods 10 p1962 A70-25062

Complex redundant structures matrix analysis by substructure approach, obtaining elastic properties of system by subdivision and synthesis [SAE PAPER 700217] 11 p2134 A70-25889

Finite element matrix structural analysis by direct stiffness method and use of computers, considering thin wall box beams [SAE PAPER 700218] 11 p2134 A70-25890

Finite element method using shallow shell stiffness matrix extended to cylindrical shell solution 11 p2138 A70-26159

Vector-matrix differential equation for second order sensitivity coefficients applied to trajectory optimization, modeling and compensation and guidance and control 11 p2029 A70-26324

Finite element solution procedures for inextensible beams elastica problem, using galerkin method for element stiffness matrices 11 p2143 A70-26640

Nonuniform beam element stiffness matrices for dynamic and elastic instability analysis, determining frequencies, mode shapes and critical loads 11 p2143 A70-26643

Vibrating thin beam cross sectional displacement-force equations coefficients included in coefficient matrix, considering shear deformation and rotary inertia effects on vibration modes 12 p2324 A70-27397

Shear deformation of sandwich plate cross sections with hinged opposite edges, constructing transfer matrix for state variables 13 p2508 A70-28483

Derivation procedure for dynamic flexibility matrix including material damping for triangular plate in bending, twisting and shear 13 p2509 A70-28540

Elastoplastic thermal stress analysis using finite element matrix method exemplified by cylindrical bar induction quenching 13 p2513 A70-28992

Stiffness matrices of three dimensional finite elements, considering tetrahedron, hexahedron and nodal configurations 14 p2659 A70-31127

Thin shells stiffness matrix and shear by finite curved triangular elements based on discrete Kirchhoff hypothesis 14 p2659 A70-31129

Matrix analysis of discretized dynamical system with constraints, considering case of damped oscillators 15 p2774 A70-31697

Stress-strain vector for straight bar of constant or stepwise cross section, using initial parameter matrix method 15 p2822 A70-32363

Shells of revolution nonlinear finite element analysis by matrix displacement method, including higher order strain energy terms 16 p2991 A70-33885

Twisted uniform beam element flexibility and stiffness matrices, using continuous bending theory 16 p2894 A70-33887

Nonlinear dynamic systems described by matrix equation, formulating asymptotically stable conditions, discussing motion equations of two degree of freedom system 16 p2995 A70-34281

Elastic and equilibrium matrices for semimonocoque membrane /plane stress/ elements using skin and reinforcing member transformations 17 p3185 A70-34921

Structure of flexural members, analyzing torsional and lateral stability by finite element method and matrix formulation 18 p3339 A70-36494

Matrix filtering method for stability solutions of shells and plates by finite difference method 18 p3341 A70-36580

Automatic matrix method for vibration modes of large structures with multiple degrees of freedom 18 p3342 A70-36684

Stiffness matrix correction for curved element deficient in rigid body motion 18 p3342 A70-36687

Covariance matrix of mean square response in structural systems under white noise 19 p3536 A70-37702

Finite element stiffness matrix technique for composite structures, discussing airplane component design program 20 p3730 A70-40040

Spacecraft principal inertial axis orientation estimation, comparing tangent 2 theta method with eigenvalue solution [SAWE PAPER 847] 20 p3660 A70-40361

Natural flexural vibration frequencies of bars with periodic thickness variations, comparing Hamilton principle, matrix approach and experimental investigations 20 p3735 A70-40536

Skew panels supersonic flutter and vibration calculated by matrix displacement method 21 p3933 A70-40586

Free vibration optimization analysis by reducing stiffness and mass matrices 21 p3933 A70-40587

Structural stability analysis by matrix decomposition and iteration, extending to structures with nearly equal critical loads 21 p3934 A70-40888

French book on strength of materials covering potential energy theory, cutoff and matrix methods, computer calculations, etc 22 p4119 A70-43623

Structural eigenvalue problems solved by sparsely populated matrices for structural vibrations and critical buckling, using finite element method 23 p4271 A70-44708

Finite beam element in bending, deriving shear deflection terms in stiffness matrix based on stress assumption 23 p4274 A70-44909

Feed voltages and directional gain maximization for loaded long thin-wire antennas with multiple excitations, using matrix methods 23 p4176 A70-44972

Dynamic structural stability analysis, describing integral equation matrix technique 24 p4419 A70-45156

German monograph on deformations and tensile stresses calculation in axisymmetric bodies via finite element method involving matrix displacement method 24 p4420 A70-45225

MATRIX STRESS CALCULATION U MATRIX METHODS MATRIX THEORY

Trench algorithm for Toeplitz matrix inversion, presenting proof for nonHermitian matrices case 01 p0131 A70-10456

Book on theory of matrices covering linear spaces, matrices algebra, linear algebraic equations, varia-

tional method, position vectors, perturbation theory, eigenvalues, etc 01 p0133 A70-11323

Noniterative algorithm for generalized inverse of arbitrary rectangular matrix computation 02 p0387 A70-11996

Element relations of phase transformation matrix for scattering, relating radiation field vector to scattered field vector 02 p0339 A70-12283

Matrix elements of nonadiabatic perturbation emphasized in semiempirical theory for evaluating polyatomic molecules radiationless rate constants in terms of electronic-vibrational state 04 p0722 A70-14699

Matrix elements systematic calculation method in terms of inelastic transition densities to evaluate nuclear properties 04 p0723 A70-15634

Optimally ordered triangular factorization for solving symmetrical systems of linear matrix equations 05 p0876 A70-16573

State transition matrix computation method with efficient algorithm for orbit prediction in n-body gravitational field 06 p1095 A70-18497

Regular matrix inverse computation by method of forbidden zero element removal 09 p1711 A70-22275

Matrix theory of elastic locking structures, programming for analysis under given loads and dislocations 09 p1771 A70-22396

Algorithm for transfer matrix Heaviside expansion, using Krylov and Vandermonde transformations for multiple eigenvalue case 10 p1910 A70-24705

Piecewise linear elastoplastic matrix structural theory with interacting yield planes, discussing kinematic and isotropic hardening 14 p2656 A70-30475

Sufficient conditions for convergence of infinite determinant 15 p2766 A70-31448

Generalized spectral analysis method implementing orthogonal transformations through Kronecker product representation and matrix factorization 15 p2767 A70-32099

Baecklund type matrix transformations application to hodograph equations system for aligned nondissipative MGD flows 16 p2958 A70-33747

Complex matrix eigenvalues bound derivation by constructing integral equation with degenerate kernel 17 p1311 A70-35934

Parametric functions of integral matrices representing linear differential system via continuous coefficients 18 p3279 A70-36156

Pivot search at Gaussian algorithm, investigating Hilbert matrix approach 18 p3283 A70-36364

Neighboring normal matrix pairs eigenvalues determination 19 p3459 A70-38685

Existence theorem for finite integral matrix extended to infinite matrices, prescribing upper and lower bounds for row and column deficiencies 20 p3657 A70-39445

Soviet book on matrix theory application to problem solutions in structural mechanics covering computer techniques, internal forces, initial parameter method, displacements, etc 20 p3719 A70-39600

Script-F radiative interchange matrix for enclosures with arbitrary surface emission and reflection characteristics 21 p3944 A70-41020

Nesbet algorithm modified for iterative evaluation of eigenvalues and corresponding eigenvectors for large matrices 22 p4062 A70-42749

Rational polynomial matrices inversion by automatic computational procedures, considering Gaussian elimination and Faddeev algorithm 22 p4062 A70-42926

Parallelism of two regression lines, suggesting distribution free signed rank test 22 p4064 A70-43526

Successive iterative solution for large matrix equations reduced from Fredholm integral equations of second kind 24 p4369 A70-45164

Approximate N-representability of density matrix by set of spin geminals 24 p4378 A70-45259

Real matrix stability determination by right half plane eigenvalues, using symmetric solution of Liapunov equation 24 p4370 A70-46098

MATTER (PHYSICS)

Final state of matter resulting from star contraction, white dwarfs development and neutron stars problem, explaining hydrostatic equilibrium 02 p0370 A70-12085

Equation of state for neutron, proton and electron gas mixture associated with cold matter above white dwarf densities and below nuclear density
05 p0905 A70-15756

Observational extragalactic dependences obtained within framework of Friedmann universe model with matter and neutrino background
07 p1383 A70-19407

Matter distribution and motion in conformally flat gravitational fields, analyzing Friedmann solution to Einstein equations
08 p1544 A70-20991

Equation of state for cold matter at neutron star densities, deriving equilibrium equations for nuclear interactions among hadrons
09 p1764 A70-23606

Neutron star models based on equation of state for cold degenerate matter, taking into account nuclear forces and clustering
09 p1764 A70-23607

Cosmic background radiation interactions with matter, discussing molecular excitation and black body radiation interpretation
12 p2291 A70-27054

Pulsars properties and physical nature, considering state of matter not reproducible in terrestrial laboratories
12 p2297 A70-27056

State equations of matter at high density and zero temperature, considering neutron stars relationship to supernova explosions and collapse
12 p2298 A70-27059

Cosmological constant role in closed universes with matter and radiation
13 p2490 A70-28936

Theory of matter from low energy data, discussing particle and charge classification, relativistic quantum dynamics, charge dynamics and superstrong reactions
14 p2620 A70-30783

Neutron core star models based on realistic nuclear matter calculations and hyperons equation of state
17 p3157 A70-34844

Antimatter distribution in universe, investigating mass lower limit
19 p3518 A70-38025

Antimatter detection and interaction with matter on moon, discussing radiation from electron-positron annihilation processes
19 p3521 A70-38482

Equation of state of nuclear neutron matter as function of density
19 p3524 A70-38695

Einstein-Maxwell fields in presence of matter and pressure, expressing existence conditions in terms of eigenvalues and eigenvectors of Ricci tensor
22 p4074 A70-43206

Universe cold matter structure and distribution from far IR data
22 p4096 A70-43395

MATURING U GROWTH MAXIMA

Maxima increases without limit in damped linear oscillator response to random wideband excitation interpreted by heuristic explanation
11 p2085 A70-26694

Consistent dependence of best rational Chebyshev Lp approximator on given function
23 p4210 A70-44025

MAXIMUM LIKELIHOOD ESTIMATES

Digital radar receiver based on pseudo Bayes likelihood ratio algorithms
21 p3789 A70-41353

Brittle fracture stress statistics for Weibull distribution function parameter determination, comparing linearizing, least squares curve fitting and maximum likelihood techniques
22 p4117 A70-43414

Satellite orbital element values and perturbation parameters from incomplete element system, using maximum likelihood principle
24 p4406 A70-45529

MAXIMUM PRINCIPLE

Interior estimates for second order elliptic differential or finite difference equations, applying maximum principle
01 p0131 A70-10375

Time optimal control of system variable with bounded controlling input and arbitrary disturbances, deriving necessary conditions using maximum principle [ASME PAPER 69-WA/AUT-7]
04 p0661 A70-14827

Optimization of control of oscillatory process with deviating argument in maximum principle form, reducing solution to boundary value problem
08 p1544 A70-20954

Memory systems described by integrodifferential equations with distributed time lag, obtaining optimality condition in form of maximum principle
08 p1480 A70-21177

Maximum principle optimality for nonlinear two group parameter control applicable to plants described by integrodifferential and delay equations
10 p1911 A70-25184

Maximum principle condition of optimal control of monodimensional system described by nonlinear hyperbolic equations with time delay
11 p2021 A70-25340

Maximum principle least squares (MPLS)/nonlinear filter scheme simplified, using digital simulation for stability and tracking performance
11 p2028 A70-26315

Optimal control for processes with parameters and state variable inequality constraints using gradient projection method and maximum principle
12 p2205 A70-28337

Optimal control problems solution by maximum principle, describing variational formulation simplification
12 p2205 A70-28339

Optimal control problems constraints and necessary conditions, deriving maximum principle
14 p2600 A70-31202

Optimal startup control of jacketed tubular reactor with first order reversible exothermic reaction, presenting distributed maximum principle for diffusional parameter system
16 p2885 A70-33330

Noisy stochastic pattern recognition system, determining optimal measurement sequence by discrete Pontryagin maximum principle
18 p3234 A70-36337

Optimum one dimensional journal bearing for maximum load with minimum film thickness, using Pontryagin principle [ASME PAPER 69-LUB-9]
19 p3435 A70-37614

Sufficient condition for optimal control with continuous nonlinearities, using Pontryagin maximum principle
19 p3394 A70-38717

Discrete parameter stochastic optimization problems necessary conditions, deriving maximum principle
20 p3659 A70-40107

Maximum principle for discrete systems of recurrence equations, applying Pontryagin principle
22 p4073 A70-42696

Schedule theory problem with redundancy and technological constraints reduced to optimal control problem by penalty function, making maximum principle applicable
23 p4177 A70-44304

MAXIMUM USABLE FREQUENCY

F 2 layer effects on ionospheric short wave scattering lines for operating frequencies above MUF
14 p2547 A70-30231

Short wave propagation above F2 maximum usable frequency, observing field intensity and SNR seasonal and diurnal variations
18 p3226 A70-36092

Short wave ionospheric scatter propagation, observing interference and crowding in 16-23 MHz and relationship to F 2 layer maximum usable frequency
18 p3227 A70-36093

Short radio wave propagation over single jump lines in F sub zero F 2 gradient presence, examining maximum usable frequency increase
23 p4162 A70-44076

F 2 layer effects on ionospheric short wave scattering lines for operating frequencies above MUF
24 p4316 A70-46306

MAXWELL BODIES

Spatial and temporal relaxation problems approximate solution in kinetic theory, making calculations for Maxwellian molecules and hard spheres
06 p1047 A70-18318

First collision Monte Carlo method for calculating aerodynamic drag on hard sphere and Maxwell molecular models in near-free molecular flow
06 p0983 A70-18379

Critical stresses and stability of thin Maxwell plates under random temperature fields
18 p3337 A70-36368

MAXWELL EQUATION

Inertial gravitational fields described by Maxwell equations, showing potentials defining four vector velocity field of test particles
01 p0141 A70-10140

Nonlinear modification of Maxwell equations, discussing conformal invariance and nonsingular solutions to neutral and charged states with zero mass
02 p0339 A70-12067

Electromagnetic pulse scattering in time varying inhomogeneous medium, applying finite difference method to Maxwell equations
02 p0261 A70-12588

Plasma waves and instabilities, detailing linearized Vlasov-Maxwell equations solution appropriate to Landau problem
06 p1118 A70-17378

Lagrangian invariance transformation application to steady state solution for Einstein-Maxwell equations interpreted as external field of charged isolated rotating source
06 p1106 A70-17747

Stationary solutions of Einstein-Maxwell equations constructed from Einstein-Maxwell or vacuum fields
06 p1106 A70-17748

Einstein-Maxwell equations solutions relation to Robinson and Robinson metrics compared with Reissner-Nordstrom solution relation to Schwarzschild
07 p1333 A70-18961

Surface oscillations of plasma in external HF field derived from hydrodynamics and Maxwell equations
07 p1355 A70-20367

Characteristic equations for differential symmetry operators in homogeneous and nonhomogeneous Maxwell equations
08 p1544 A70-20990

Pulse propagating in unstable plasma, determining characteristics by asymptotic expansion applied to Vlasov-Maxwell equations
09 p1734 A70-22684

Navier-Stokes-Maxwell equations solutions for conducting fluid flow in azimuthal magnetic field, noting jet acceleration near symmetry axis
10 p1924 A70-24574

Book on electromagnetic fields and waves covering electrostatic and magnetic fields, relativity, vectors, Maxwell equations and propagation
12 p2273 A70-28150

Yagi antenna field theory derived from Maxwell equations by solving in cylindrical coordinates and satisfying boundary conditions
13 p2364 A70-28898

Inductive flow measurement history, considering Maxwell, material and Poisson equations
15 p2735 A70-31823

Rough surface radiative properties, determining electromagnetic wave scattering by Maxwell equation solution [AIAA PAPER 70-862]
17 p3135 A70-34508

Maxwell equations and equations of massive-vector-meson fields in spatially homogeneous Bianchi cosmologies, obtaining formula for homogeneous EM field
17 p3156 A70-34827

Maxwell equations derivation, describing assumptions needed
17 p3136 A70-35198

Variational principle application to relativistic MHD, deriving Einstein field equations, Maxwell equations and equations of motion for self gravitating charged fluid
19 p3478 A70-37591

Maxwell equations for hybrid modes of shielded ring line with axial and coaxial region at cut-off and near cut-off conductivity
21 p3793 A70-42269

Quasi-Maxwellian equations of inertial-gravitational fields
22 p4075 A70-43223

EM wave effects on radio receiver, using Maxwell equations without taking photons into account
23 p4221 A70-44798

Pre-Maxwellian electromagnetic equations application to MHD, investigating existence theorems generalization from system at rest to system with motion
24 p4386 A70-45593

MAXWELL FLUIDS

Maxwellian fluid oscillating flow in thin walled elastic circular tube as function of tube dimensions, elastic properties, oscillation frequency, etc
21 p3810 A70-41963

MAXWELL-BOLTZMANN DENSITY FUNCTION

Quasi-linear ion oscillation theory for Maxwellian plasma, considering electron and ion distribution perturbations and energy transfer
02 p0346 A70-12105

Warm Maxwellian plasma stabilization of velocity-space instabilities, evaluating densities and temperatures for stabilizing resonant loss-cone modes
02 p0347 A70-12237

Formation of Maxwell and non-Maxwellian energy distribution in gases, noting reduction of time reversible to time irreversible equations
03 p0606 A70-13861

Distribution functions for solving moment equations of Maxwell-Boltzmann equation used in studying heat conduction through rarefied gases within concentric cylinders and spheres [ASME PAPER 69-WA/HT-17]
04 p0783 A70-14817

Maxwellian distribution perturbation in chemically reacting gas mixtures with lower inelastic collision frequency than elastic
06 p1110 A70-17761

Solar wind temperature, using distribution function for solar wind ions in anisotropic Maxwell distribution form
06 p1135 A70-17895

Modified Maxwellian models for particle reflection in free molecular flow, correlating model parameters with gas-surface properties
06 p1110 A70-18259

Plane Couette flow and heat transfer problem numerical solution, using Krook kinetic equation and Maxwell boundary condition
06 p1048 A70-18326

Chemical reaction rates corresponding to initial molecules fixed internal energy levels determinable

for multitemperature Maxwell-Boltzmann distribution as function of reagent temperatures
07 p1224 A70-18769

Globular cluster relaxation time using nonMaxwellian velocity distribution and polytropic spatial distribution
22 p4109 A70-43744

Spectral line width distributions in main sequence stars, emphasizing B2 to A2 range rotational velocities with Maxwellian distribution
23 p4251 A70-44821

MAXWELLIAN DISTRIBUTION [DENSITY]

U MAXWELL-BOLTZMANN DENSITY FUNCTION

MAYER PROBLEM

Optimal trajectory and control approximate solution by asymptotic expansion, considering Mayer variational problem solution
16 p2943 A70-33897

Optimal low thrust transfer between coplanar circular orbits, examining thrust direction and steering as Mayer problem
22 p4097 A70-42489

MAZE LEARNING

Restricted problem solving tasks /perceptual maze test/ formulated as multistage decision making, discussing use of dynamic programming and algorithms
02 p0246 A70-12321

MCDONNELL AIRCRAFT

NT C-9 AIRCRAFT

NT F-4 AIRCRAFT

MCDONNELL MILITARY AIRCRAFT

U MILITARY AIRCRAFT

MCLAURIN SERIES

U MACLAURIN SERIES

MEAN

Arithmetic mean, least squares method and standard deviation concepts in random error analysis of measurement data
11 p2117 A70-26674

Algorithm for fast digital computer recursive estimation of mean of random variable
22 p3993 A70-43074

MEAN FREE PATH

Enskog method for Boltzmann equation, analyzing asymptotic nature of integral kinetic equation for molecular mean free paths and Laplace probabilities
01 p0068 A70-11568

Flame positive ion concentration measurements with Langmuir probes with mean free path smaller than probe diameter
02 p0397 A70-12019

Cosmic ray particles inelastic nuclear interactions mean free path in iron measured in Wilson chamber and ionization calorimeter
03 p0554 A70-13030

Molecular mean free path influence on gas lubricated thrust bearings performance, discussing slip flow effect and load capacity
05 p0854 A70-15909

Asymptotic behavior /for small mean free path/ of rarefied gas steady flow over smooth solid boundary
06 p1048 A70-18328

Hyperthermal leading edge analyzed by examining adjacent relevant mean free paths for collisions, establishing basis for formal expansion of Boltzmann equation
06 p0979 A70-18347

Polarization of laser medium consisting of colliding two level molecules with velocity dependent mean free time
08 p1512 A70-20992

Stationary gas flows continuous to rarefied transition analysis based on mean free path anisotropy
15 p2721 A70-32139

Collision dominated plasma column radial structure including ambipolar diffusion region obtained from constant mean free time and path approximate formulas
16 p2959 A70-34311

Rarefied gas flow over plane wall, considering boundary layer thickness of order of mean free path
21 p3809 A70-41715

NT WEIGHTING FUNCTIONS

Algebraic properties of indefinite Riemann in integral useful in computer programming, emphasizing invariant algebras
04 p0654 A70-14683

Gaussian quadrature integration technique developed for collocation approach for integral equation of steady subsonic lifting surface theory [AIAA PAPER 70-191]
06 p0970 A70-18097

News function relation with far fields of sources obtained in linear approximation for axisymmetric case in integrating Einstein field equation
08 p1543 A70-20721

Integration of Saint Venant equations of deformation continuity for region occupied by elastic medium
08 p1587 A70-21166

Equations of motion integration for solid body in potential forces field induced by elastic springs
09 p1728 A70-23386

Analytic function integration optimal rate, discussing weighting function
10 p1909 A70-24509

Integrating sphere theory with wall mounted specular sample in reflectance and transmittance measurements
18 p3284 A70-36776

Products integration of unit vector components over all solid angles
24 p4370 A70-46029

Differential equations with integrable coefficients, proposing asymptotic integration for second order system
24 p4370 A70-46031

MEASURE THEORY

U MEASURE AND INTEGRATION

MEASUREMENT

Expected values optimal measurement, given auxiliary conditions between measured value number and quantization
02 p0299 A70-12400

Mean square error for measurement series with unknown error distribution law, specifying necessary number of terms
19 p3390 A70-38583

Monograph on estimation and optimal control with quantized measurements covering linear, nonlinear and time varying systems
20 p3658 A70-40024

Fluctuating data transmission, using measurement channel with digital logarithmic conversion
20 p3635 A70-40534

Wall thickness measurement by supersonic testing method based on resonance
24 p4336 A70-45681

Motion equations for vibratory two degrees of freedom spring mass system subjected to rotation, discussing use for small rates of turn measurement

Apparatus for continuous creep measurement at high temperature for fine wire and thin tubular samples with small cross sectional areas

Continuous measurement and automatic recording of metals electrical resistance during fatigue testing in vacuum at elevated temperatures

Hardness measuring instrument by dynamic method at high temperatures in vacuum, using magnetic or nonmagnetic indenter balls

Handbook of transducers for electronic measuring systems covering operating principles, design features, etc

Rumanian book on shock tubes covering facility construction, gas flow, electronic measuring equipment, etc

Electronic gauging machine for multipoint measurement at preselected points around turbine blade airfoil produced by electrochemical machining

Phase detector with two value output and pulsed input for measurement and control circuits, noting construction with semiconductor elements

Flow direction and velocity measurement in three dimensional boundary layer, discussing instrument and restrictions

Sensing device to measure radial stress induced at solid propellant grain-to-case bond interfaces during wide temperature variations, detailing instrumentation and operation

Ponderomotive meter for laser energy and power measurement, discussing mechanical design and elimination of radiometric and convection disturbances

Elastic sensor for measuring linear displacements using fine crossed filaments and torsion principle

Surveyor TV camera conversion from qualitative viewing device into quantitative measuring instrument by calibration coupled with data processing program [JPL-TR-32-1374]

RF hazard measuring system for complete guided weapons electromagnetic compatibility tests with instrumented inert device replacing live igniter

Instrumentation concepts for electromagnetic compatibility measurements on electroexplosive devices, considering thin film thermocouple, electrical diode detector and microstrip transmission line techniques

Josephson effect in superconductors emphasizing Josephson junction electrical properties and applications to devices and measuring techniques

Monitoring and recording of physiological parameters, discussing heart, muscle, brain potentials, blood pressure, respiration measurements and instrumentation

Multiple optical properties measurement instrumentation for cellular specimens to classify biological cells, analyzing and displaying data by on-line computer

Radiation fluxmeters involving black plates and sensor disk respectively for use in space simulation chambers

Calibrating rods design for vibrating components stress measurement gauges

Level differences measured at 300 Hz to 200 MHz frequency range, discussing methods and measuring circuits and components

Torsion balance for measuring gravitational constant based on Langevin resonance method

Loading effects in measurements involving electrical and nonelectrical systems used in determining gas pressure and fluid flow

Acoustic fluidic amplifiers, considering receiver, transmitter and operating mode

Dynamic force measurement methods, considering reaction force and operational compensation

Aerodynamic subsonic and supersonic wind tunnels parameter measurement methods including static and total pressure, current direction, velocity, density, etc

Metal and alloys hardness measuring devices at high temperatures in ultrahigh vacuum based on use of synthetic sapphire pyramidal indenter

Instrumentation and measurement - IEEE Conference, Ottawa, May 1969

Frequency measurement in millimeter and submillimeter ranges, using high quality Fabry-Perot resonator

Plasma conductivity measuring device using phenomenon of change of coil induction in electromagnetic field

Digital wavemeter description using interferometer with parallel plates and automatic frequency readout for submillimeter band

Electron beam fluorescence probes for rarefied gas flow, describing local density and temperature measurement methods

Dynamic force measurement, evaluating hybrid system with reaction force summation and operational compensation subsystems

Solar flare videometer for measuring flare area and peak and integrated intensity in real time

Quadratic error of semiautomatic measuring apparatus for photographic plates, noting operator contribution

Measurement of dynamic mechanical quantities - Conference, Warsaw, May-June 1968

Device for measuring turbine blades natural frequencies by converting vibrations to electric current at same frequency

Connecting wires length effect on sensitivity and current-voltage characteristics of sensors for dynamic values measurement, deriving integral electrical parameters

Multichannel measurement system for inductive transducers, describing system components and capabilities

Sensor selection and telemetry measurement of physical parameters

Noise effects during mechanical parameters measurement by electronic devices, noting noise from resistors, potentiometers, power lines and wiper-type distributors

Dynamic measurements of aerospace mechanical quantities covering tensometry, vibration, torque, angular velocity, pressure, telemetry and data processing

Metals thermal properties simultaneous determination at high temperatures, describing measuring equipment operation and circuitry

Standard method for aircraft engine exhaust smoke measurement for air pollution control [SAE PAPER 700250]

Dynamic errors of electric measurement devices during three dimensional polyharmonic vibrations of foundation

Test and measuring equipment control systems analysis, discussing metrology and calibration requirements in overall quality assurance problem

Electrodynamic transducer electrical and mechanical parameters measurement, comparing various techniques

Haring x type vibration insulation table for impact sensitive measuring instruments

Large diffraction gratings by interferometrically controlled commercial measuring machine

Automatic narrow band meter for continuous readout of frequency characteristics of radiation detectors

Free nuclear precession sensor with rotating sample for performing measurements in nonuniform magnetic field

Inter-Range Instrumentation Group /IRIG/ document regarding meteorological data reliability, defining measuring process accuracy and errors

Meteorological parameters measuring instruments optimal design, presenting formalized procedure flow chart and examples

Quartz crystal particulate sensor instrument for terrestrial and Mars atmospheres

Memory systems in measurement and control equipment, describing applications to linearizing, compression and data refresh operations

Contactless electromagnetic level sensor for liquid metal using eddy currents

Magnetoelastic sensors for small force measurement, describing instrument error reduction

Laser velocimeter application to laminar-turbulent flow transition at glass tube centerline

Measuring instrument for total cross section of proton elastic scattering during sigma R reactions

Force-balance principle application to pressure and skin friction measuring instruments, discussing construction, operation and performance

Measurement transducers transforming measured quantity into forms suitable for comparison with standards in metrological sciences

High speed photoelectric measurements of lunar occultation using computer and nuclear physics instrumentation

Natural convection heat transfer from vertical cylinder outer surface to liquids, discussing apparatus design and measurements

Weak ion concentration in stratosphere and mesosphere measured using accumulated capacity amplifier

Atmospheric humidity measuring equipment and procedures for high altitudes, considering hygrometers, mass spectrometers, sondes, absorption spectra, etc

Adiabatic microwave power meter design using sodium thiosulfate phase transformations

Piezoelectric force and moment measurement by quartz multicomponent devices

Phase meter for measuring angular coordinates of reflecting meteor trails

Optical properties of system measuring atmospheric transmittance by recording light backscattered from atmospheric layers

Sensing device to measure radial stress induced at solid propellant grain-to-case bond interfaces during wide temperature variations, detailing instrumentation and operation

Fluorine-compatible apparatus for measuring temperature PVT properties of gaseous and liquid fluorine

Instruments for platforms stability determination, considering azimuth, tilt rotation and translational motion

Precise sensing systems and instruments calibration with respect to inertial frame of reference for geokinetics

Measuring and test equipment economic approach to quality levels and accuracy ratios, deriving cost tradeoffs in optimum inspection fidelity

Test measurement instruments - Conference, Houston, October 1969

Oscilloscope design involving optimum bandwidth and input sensitivity, reference measurement and second time base

- Wind tunnel response tests of cup, vane and propeller wind sensors, determining wind direction and speed parameters, damped and natural frequencies, etc 22 p4030 A70-42914
- Fluidic amplifiers in measurement technology including turbulence, pulse, Coanda, induction, vortex, arc and focusing amplifiers 23 p4142 A70-44246
- Automated high precision electrical resistance measuring system using digital computer control 24 p4334 A70-45384
- Cryogenic fluid multipoint level sensing detector circuit using carbon resistors 24 p4339 A70-46200
- Free nuclear precession sensor with rotating sample for performing measurements in nonuniform magnetic field 24 p4339 A70-46293
- Thrustmeter for direct output reading from jet engines based on stream and total port pressures 24 p4340 A70-46328
- MECHANICAL DEVICES**
- Dynamic vibration absorbers (DVA) efficiency in limiting excessive vibrations in mechanical systems by transferring motion to auxiliary system 04 p0699 A70-15306
- Sliding tube assembly for diverting carrier gas from flow pattern of Verneuil apparatus for flame fusion crystal growth 05 p0829 A70-16849
- Mechanical electromagnet model of MHD dynamo achieving direct conversion of mechanical to magnetic field energy 06 p1121 A70-17803
- Mechanical latching crossbar switches for space division electronic switching, discussing structure, performance, reliability, etc 06 p1023 A70-18413
- Mechanical system undergoing internal mass redistribution, showing energy dissipation during motion 08 p1545 A70-21203
- Hydromechanics and thermodynamics in mechanical radial face seal design 11 p2059 A70-25792

- Rolamite low friction suspension system, describing components, force generation and applications 16 p2923 A70-34165
- Torsion, filar, flexure and coil type mechanical suspensions for space applications, considering instability due to temperature changes and magnetic, electric and force fields 16 p2924 A70-34169
- Flexural pivots for space structures, describing design, fabrication and applications 16 p2924 A70-34170

- Nonlinear mechanical systems transient motion analysis based on phase trajectories 16 p2944 A70-34283
- Nonlinear mechanical lumped dynamic systems trajectory analysis in terms of P and G sets 16 p2944 A70-34285
- Mechanical system random excitation, evaluating parameters to satisfy conditions for statistical characteristics of steady state output processes 16 p2953 A70-34296
- Mechanical system with n material points, deriving control algorithms for realizing constrained programmed motion 16 p2953 A70-34297
- High reliability release mechanism with mechanical redundancy on SERT 2 satellite 17 p3174 A70-34759
- Spacecraft separation mechanisms selection, design and use, discussing multiple device point and linear systems 17 p3175 A70-34767
- Eigenvalues of transfer matrix and vibrations generation for passive mechanical systems with n degrees of freedom based on Laplace transformation 18 p3337 A70-36225
- Mechanical systems spontaneous oscillation due to different critical velocities with and without arbitrarily small damping 18 p3338 A70-36430
- Rotating mechanical components reliability under complex fatigue, presenting design data 19 p3442 A70-38845
- Helicopter mechanical power transmission design, describing gearing, shaft bending, bearings, lubrication, weight factors, etc [SAWE PAPER 844] 20 p3563 A70-40367
- Mechanical passive cone angle amplifier for spinning sounding rockets for IR sky scanning, solving equations of motion for system 21 p3931 A70-41905
- Electro-thermal-mechanical switches based on shape-memory effect in Ti-Ni alloys 22 p3965 A70-43330
- Spacecraft fluid mechanical system design, considering environments, materials, lubrication, zero gravity and inflight maintenance [SAE PAPER 700781] 24 p4295 A70-45862
- MECHANICAL DRIVES**
- NT HELICOPTER PROPELLER DRIVE
- NT PROPELLER DRIVE
- Gear ratios series determination for planetary reduction gear having positive and negative difference between number of gear teeth 05 p0856 A70-17007
- Optimal traction drive system design for lunar roving vehicle, considering weight, energy consumption, operational flexibility, power supply, motor and power train [SAE PAPER 700023] 11 p2030 A70-25375
- X band mechanically despun antenna system with RF and motor drive assembly developed for earth coverage communications satellite [ALAA PAPER 70-422] 11 p2001 A70-25481
- Dynamic synthesis of hinged four-element mechanism with respect to driven link position, transmission relations and allowance for transmission angle 11 p1983 A70-25934
- Mechanical systems vibrations comprising tension couplings compensating misalignment between non-coaxial shafts 11 p2060 A70-26348
- Swinging gear drive, breather cartridge and hypocycloid timer mechanisms for reliable aerospace applications 16 p2921 A70-34104
- Gearhead DC/AC electric motors with wet/dry lubricants, discussing selection criteria for spacecraft boom deployment 16 p2846 A70-34139
- Brushless despin mechanical drive and control system design and performance for orientation of high gain communications antenna from spin stabilized satellite 16 p2986 A70-34161
- Discrete mechanical models of single speed gearings in torsional vibrations without teeth deformation and damping resistance 16 p2995 A70-34288
- Composite tail rotor driveshaft for next generation helicopter, discussing materials, fabrication and tests [AHS PREPRINT 451] 17 p3100 A70-34703
- Rotary relay for solar array space power transfer using clutch of low moment of inertia capable of recycling once each orbit 17 p3101 A70-34765
- Standard units and assembling of electrical driving mechanism for telescope, using audio reference oscillator, electronic power amplifier and synchronous motor 18 p3259 A70-36609
- Helicopter cost reduction by transmission overhaul frequency reduction, discussing savings with on-condition maintenance 19 p3441 A70-38824

- Rotor drive systems for rotary wing aircraft, indicating mechanical hub drive advantages over reaction blade drive 21 p3755 A70-41850
- Differential equations of motion for machine assembly, using Appel equations 23 p4200 A70-44319
- Direct drive turbine engine control components and airframe accessories, noting weight and frontal area reduction [SAE PAPER 700821] 24 p4394 A70-45896
- MECHANICAL ENGINEERING**
- Optical and mechanical techniques for space experiment structures and metals satisfying space requirements 03 p0492 A70-13848
- Equations governing electrofluid dynamic energy conversion processes and indicating differences between EFD and magnetofluid dynamic processes presented for mechanical engineering problems [ASME PAPER 69-WA/ENER-9] 04 p0627 A70-14899
- Overcut phenomenon in early stage of cutting developed as theory for tip interference in internal gears 05 p0854 A70-15885
- Mechanical engineering and mechanics-Conference, Haifa, June-July 1969 05 p0939 A70-16508
- Book on statistical methods in structural mechanics covering design, fracture, stability, random loads, damage accumulation, reliability, etc 07 p1411 A70-19849
- Book on dynamics of mechanisms with elastic connections and impact systems covering differential and finite difference equations, equations of motion, friction effects, etc 08 p1502 A70-20753
- Stress concentration effect, surface states and similarity conditions in fatigue ruptures in machine construction, considering statistical analysis 09 p1776 A70-22615
- Book on mechanical seals design covering temperature and pressure effects, leakage and wear problems, etc 12 p2238 A70-26851
- Hydraulic system pumps ratings, classification and selection 13 p2419 A70-29219
- Jet thrust reversers mechanical design limits, objectives and materials 14 p2628 A70-30500
- Cage trim control valve designs, outlining properties, advantages and limitations 14 p2534 A70-30682
- Aerospace mechanisms design attitudes effects on cost and success of space mission 16 p2985 A70-34102
- Aerospace mechanism design from test laboratory viewpoint, balancing technical, cost and schedule factors with mission objective 16 p2921 A70-34103
- High strain fatigue machine with axial loading and servocontrol for short endurance testing 17 p3063 A70-35586
- Mechanical Engineering - Conference, Haifa, July 1970 21 p3809 A70-41951
- Tension-torsion machine developed from aircraft carrier catapult principle, producing radial loading paths 22 p4117 A70-43453
- MECHANICAL IMPEDANCE**
- Bolted joints inspection using mechanical impedance algorithm method involving bolt head mechanical shock pulse response in adjacent structure 01 p0098 A70-10017
- Vibration mode response and impact time sensitivity of mechanical impedance of human skull, relating head injury factors 15 p2682 A70-31934
- MECHANICAL MEASUREMENT**
- NT DISPLACEMENT MEASUREMENT
- NT DRAG MEASUREMENT
- NT FLOW MEASUREMENT
- NT FRICTION MEASUREMENT
- NT PRESSURE MEASUREMENTS
- NT STRESS MEASUREMENT
- NT THRUST MEASUREMENT
- NT VELOCITY MEASUREMENT
- NT VIBRATION MEASUREMENT
- NT WIND MEASUREMENT
- NT WIND VELOCITY MEASUREMENT
- NT X RAY STRESS MEASUREMENT
- Metal and alloys micro and macro stress-strain behavior data correlated for linear differential transformers, strain gages, longitudinal resonance waves and X ray diffraction 01 p0092 A70-11248
- Twin wave interferometer and strain gage mechanism for press-fit measurements of contact deformation on metallic and polymer samples 03 p0484 A70-13426

Electroexplosive devices output energy measurement through metal deformation by lead block and projectile penetration methods

03 p0548 A70-14121

Tangential cutting force measurements during Ti grinding by microtols, noting properties of W, aluminum boride and zirconium carbide

04 p0697 A70-14466

Dynamic measurements of aerospace mechanical quantities covering tensometry, vibration, torque, angular velocity, pressure, telemetry and data processing

11 p2057 A70-26750

Dynamic hysteresis loop measurement of energy dissipation in materials, showing deformation effects on accuracy

19 p3535 A70-37346

Linear elastic structure with few degrees of freedom, discussing parameters experimental determination

21 p3935 A70-41409

Free vibrating reed apparatus for polymer low temperature internal friction and Young modulus measurements, discussing polystyrene properties

21 p3827 A70-41464

Rumanian book on methods, equipment and facilities for aeromechanical measurements covering fluid flow, wind and shock tunnels, flow measurements, etc

23 p4199 A70-45000

MECHANICAL OSCILLATORS

NT GYROSCOPIC PENDULUMS

NT PENDULUMS

Optical data display involving laser light deflection by vibrating mirrors actuated by mechanical resonators

01 p0108 A70-10355

Pressure and temperature sensitivity tests of fluoric oscillator for timer application, testing fluid relaxation oscillators using R-C-R feedback loops

[ASME PAPER 69-WA/FLCS-9]

04 p0626 A70-14844

Soviet book on vibrations of complex oscillatory systems with mechanical, pneumatic and electromagnetic couplings

10 p1959 A70-24650

Self-synchronization of forced frictional mechanical vibrators assuming simple harmonic combination

11 p2139 A70-26417

Simple harmonic scotch yoke mechanical oscillator for strain gauge accelerometer calibration in VLF range

16 p2900 A70-32995

Mechanical-stereomechanical analogy of two index Lagrange equations of second kind

17 p3130 A70-35192

Elastoplastic oscillator dynamic behavior with one degree of freedom compared with bilinear hysteretical model results, investigating mechanical scheme with continuous skeleton intrinsic curve

19 p3432 A70-38665

Combined aging and plastic deformation treatment effects on breaking point, yield stress, elongation and contraction of austenitic Fe-Ni-Ti alloy

01 p0115 A70-10064

Chemistry variations effects on mechanical properties, phase stability and microstructure of alloy Unitemp 718 /Ni-Fe-Cr alloy/ via microscopy and X ray analysis

01 p0116 A70-10092

Heat resistant alloys for gas turbine blades observed for long term heating effects on changes of hardness, tensile, impact and stress-rupture properties and microstructure

01 p0116 A70-10149

Rolled bimetallic Ni-Mo mechanical properties produced by powder metallurgy methods

01 p0116 A70-10157

Projector with paraboloid mirror solar radiation condensing lens for studying heat resistant materials mechanical properties at high temperatures

01 p0055 A70-10179

Textolites and ferromagnetodielectric wedges mechanical strengths compared for use in open grooves of compound winding

01 p0008 A70-10195

Thermomechanical processing of high strength low alloy steels to evaluate effects of composition, coiling temperature and cooling rate on mechanical properties and microstructures

01 p0118 A70-10726

Structure and mechanical properties of martensite and bainite in Fe-Ni-Co-C steels, discussing isothermal aging to obtain tough twinned martensite steels

01 p0119 A70-10733

Martensitic steel /AFC 77/ austenite grain size refinement process, noting effects on yield strength, toughness, stress corrosion resistance and fatigue crack growth rate

01 p0120 A70-10739

Digital computer for data recording in stress-strain curves and data points for mechanical tests

01 p0058 A70-11062

FeCo V plastic deformation and fracture, noting temperature and grain size effects on yield and flow stresses, ductile to brittle transition, etc

01 p0123 A70-11244

Impeller elastic and elastoplastic strength of centrifugal supercharger with curved disks and radial blades, using variational method

01 p0211 A70-11417

Dynamic loads calculation on teeth of cylindrical straight tooth gears under engaged and disengaged conditions, performing strength analysis

01 p0105 A70-11421

Al double crystals mechanical properties improvement after shock loading, studying surface and dislocation structures and active slip planes number

01 p0124 A70-11449

Beryllium properties and processing including magnesianothermal reduction, power purity, oxygen content, grain size and temperature effects on mechanical properties

01 p0124 A70-11618

Mechanical properties of carbon fiber reinforced Al, Cu and Ni, noting rope and wire applications

02 p0384 A70-11676

Mechanical properties of asbestos as reinforcing material for fiber filled thermoplastics compared with glass fiber

02 p0320 A70-11677

Fortified thermoplastic compounds for increased flame retardancy, environmental resistance and toughness

02 p0320 A70-11865

B and C fiber unidirectionally reinforced plastic composites, discussing mechanical properties, fabrication and testing

02 p0321 A70-12082

Mechanical properties of human skull specified for construction of physical and mathematical models

02 p0243 A70-12097

Mechanical strength and breakdown metallography of plate shaped structural steel and Al alloy specimen under various HF elastic vibrations

02 p0318 A70-12398

Reinforced epoxy resin performance prediction from correlation between unfilled resin and laminates mechanical properties

02 p0322 A70-12606

Co-base hardfacing alloys mechanical properties and applications, discussing mechanical and chemical wear processes in cast and wrought types

02 p0319 A70-12712

Fiber reinforced composites fabrication, properties and industrial applications, discussing modulus of elasticity and tensile strength equations, bonding and temperature applicability

02 p0322 A70-12713

Technical ceramic products physical properties compared with metals, discussing manufacturing methods and industrial and engineering applications

02 p0322 A70-12714

Chromium refractory alloys, discussing production difficulties, mechanical properties, engineering applications, etc

02 p0320 A70-12760

Test fixture for determining mechanical properties of metals and steels at moderate strain rates, detailing design and instrumentation

03 p0462 A70-12883

Mechanical properties of ordered Ni-Cr alloys, establishing hardening effect of annealing

03 p0505 A70-13105

Mechanical properties of Al composites reinforced with alpha-silicon carbide sintered whiskers, discussing voids, fiber breakage and orientation effects

03 p0506 A70-13113

Shear moduli and lattice parameters effect on screw dislocation equilibrium in bimetallic medium of soft and hard phases

03 p0587 A70-13117

Serrated plastic flow in stable austenitic steels based on Fe/Ni, showing strength dependence on C and/or Cr presence

03 p0506 A70-13134

Mechanical responses and residual defect structures in brass and stainless steel following explosive shock loading and cold reduction by rolling

03 p0507 A70-13139

Gray hypersthene Ramsdorf chondrite with thermal and mechanical alterations, discussing shock heating, metal plus troilite melt redistribution, collision and rapid cooling effects

03 p0563 A70-13147

Turbine disk strength calculations, obtaining matrix expressions and optimum algorithm for arbitrary disk shapes

03 p0588 A70-13242

Mechanical properties, optimum deformation and rupture of W wire reinforced Ni and Ti metal composites obtained by hot rolling in vacuum

03 p0508 A70-13245

Apparatus for short term thermal vacuum mechanical testing of materials

03 p0463 A70-13253

Case hardened steels structure and properties, intermetallic phases, hardness variation with depth and hardening techniques by Be and B

03 p0510 A70-13351

Polycrystalline Co strength and plastic properties tested at various temperatures and strain rates

03 p0510 A70-13352

Titanium aluminide-Mo system hardness, electrical conductivity and density as function of chemical composition, presenting creep test results

03 p0510 A70-13353

Steel crystal lattice fine structure and mechanical properties during annealing using X rays as function of temperature

03 p0511 A70-13422

Electron bombardment effects on epoxy based textolites mechanical properties, studying structural changes spectroscopically

03 p0516 A70-13735

Beta III Ti alloy cold formability, mechanical properties and heat treatment noting use for fasteners, sheet metal parts, honeycomb sandwich sections and metal matrix composites

03 p0512 A70-13776

Heat treatment effects on mechanical properties of Ti-Fe and Ti-Fe-Al alloys

03 p0512 A70-13855

Quenching temperature and deformation conditions for Ti alloy bars optimal mechanical properties emphasizing effect of primary structure

03 p0497 A70-13856

Polyethylene and polypropylene mechanical behavior under tensile and compressive loads and subject to hydrostatic pressure, obtaining tensile nominal stress-strain curves for various pressures

03 p0517 A70-14201

Electrical and mechanical instability of jets, threads and sheets of viscous fluid, noting role of deceleration

03 p0471 A70-14253

Specific heat, electrical resistivity and thermal conductivity changes in materials properties at cryogenic temperatures, noting parasitic phenomena, mechanical and dielectric properties

03 p0525 A70-14269

Thin elastic laminar shells nonlinear physical theory assuming Love-Kirchhoff hypothesis validity, rigidly connected layers and nonlinear mechanical behavior

04 p0765 A70-14419

Kamchatka regions volcanic deposits structural and mechanical characteristics compared with lunar soil characteristics

04 p0744 A70-14440

Mechanical behavior of anesthetized dog abdominal vena cava from pressure wave transmission characteristics, discussing chemical and electrical stimuli

04 p0630 A70-14630

Apparatus and techniques for investigating spacecraft materials mechanical and thermal properties, using vacuum effect to simulate space environment [ASME PAPER 69-WA/PID-22]

04 p0663 A70-14752

Structural aluminum alloy developed for Concorde Mach 2.2 flight, discussing cold mechanical properties, zero creep and fatigue resistance

04 p0706 A70-15041

Surveyor 7 highland landing soil mechanical properties and rock diameter similar to previous sites

04 p0752 A70-15063

Structural materials mechanical properties tests during neutron bombardment, discussing atomic reactors optimal parameters calculation

04 p0775 A70-15259

Gas turbine rotating disks failure analysis, studying strength as function of material properties, thermal stresses and hole dimensions

04 p0775 A70-15260

High temperature effects on mechanical properties of recrystallized Ta relating strength, hardness and yield point

04 p0707 A70-15267

Commercial Ni-Co gas tungsten arc filler metal with mechanical properties stable following stress relief

04 p0710 A70-15653

Shell directional antennas operational behavior at 2 and 4 GHz and mechanical properties

04 p0660 A70-15661

Polycrystalline metals strength factors in aircraft and aerospace construction as relation between rupture time and embrittled grain boundary at high temperatures

04 p0779 A70-15671

High temperature properties mechanisms in aluminum coated vacuum cast nickel base superalloys

04 p0711 A70-15705

Mechanical properties of eutectic superalloys compared with commercial superalloys, noting thermal stability applicability to gas turbine engines [SAE PAPER 690689]

05 p0861 A70-15827

Low melt viscosity prepolymers of diallyl phthalate and isophthalate in mold encapsulation showing dimensional, electrical and mechanical stabilities under adverse environments

05 p0869 A70-16035

Gas turbine blade material properties change effect on thermal fatigue strength after long term heating

05 p0864 A70-16700

Mechanical properties of cast light alloys at low temperatures, showing satisfactory plasticity and insensitivity to stress raisers

05 p0864 A70-16868

Stress concentration effect on mechanical properties of Ti-Ta alloys at low temperatures, showing insensitivity to notch and suitability for cryogenics

05 p0864 A70-16869

Maraging steels mechanical properties, studying changes in lattice constant and electric resistance to determine Al strengthening effect nature

05 p0865 A70-16872

Maraging steel mechanical properties as function of aging temperature and time

05 p0865 A70-16873

Maraging steel mechanical properties with Mn, Mo and Co additions in heat treated condition

05 p0865 A70-16874

Mechanical properties of nickel steels with carbon after suitable heat treatment found similar to high strength nickel steels properties without carbon

05 p0865 A70-16875

Strength and plasticity of Mo and Nb sheet in oxidizing medium at high temperatures and pressure range

05 p0865 A70-17029

Gas dynamic stand for testing turbine disks strength under mechanical and cyclic thermal loads, analyzing breakdown data for various disk geometry

05 p0953 A70-17052

Scale dependence and optimal sample dimensions for strength tests of brittle refractory materials

05 p0955 A70-17064

Metals mechanical properties with inorganic heat resistant coatings between 1900-2300 K in oxidizing medium, describing facility based on solar furnace

05 p0875 A70-17069

Red blood cell mechanical fragility independence from cell age in rats

06 p0989 A70-17221

Collection of papers on strength at small number of load cycles, problems of mechanical fatigue

06 p1160 A70-17382

Soviet monograph on nickel and Ni vacuum melted alloys, studying physicochemical, operational characteristics and gas content

06 p1085 A70-17411

Thin gas turbine disk strength under axisymmetric flexural vibrations, noting agreement of calculated and experimental rotor rpm danger zone

06 p1166 A70-17654

Mo-nitrogen interaction, studying nitriding influence at various temperatures on Mo alloys properties

06 p1089 A70-17741

Mechanical behavior of cylinders with alternating layers of reinforcing and matrix materials derived from governing equations, including equations of motion

[AIAA PAPER 70-134]

06 p1169 A70-18051

Gibeon meteorite iron strength and ductility tests, discussing fragmentation and relation to parental planet structure

06 p1150 A70-18478

Mechanical property factors influencing selection of sintered uncorked refractory metals and alloys for structural applications

[AIME PAPER F-69-4]

07 p1290 A70-18810

Oxidation, hot corrosion resistance and mechanical properties of aluminide coated superalloys, discussing failure analysis instruments and methods

07 p1305 A70-18969

Solution treating temperature and microstructure effects on hot rolled Ni base alloy properties

07 p1306 A70-18995

Heat transfer effects during solidification on mechanical properties of Al alloy castings compared with sand castings

[ASM PAPER W9-7.2]

07 p1293 A70-18998

Cobalt effects on Ni-W alloys mechanical and metallurgical properties including thermal stability, fabrication response, weldability and impact resistance

07 p1306 A70-19070

Light Mg-Li alloys physical and mechanical properties, production and treatment

[DFVLR-SONDDR-18]

07 p1306 A70-19234

Oxygen content influence on Nb-Mo alloy mechanical properties at ambient temperature in air and hydrogen

07 p1307 A70-19374

Interrelation of precipitation state, mechanical properties and electrical conductivity of wrought aluminum age hardened alloy under varied heat treatment conditions

07 p1294 A70-19389

Oriented single crystals properties obtained from Mo powder subjected to compacting, annealing in hydrogen and electron beam zone melting

07 p1308 A70-19610

Size effect on structure and mechanical properties of thin wire made of Mo single crystals deformed in recrystallized state

07 p1308 A70-19611

Structure and mechanical properties of Mo single crystals grown from gas phase using metallographic and X ray analysis

07 p1308 A70-19612

Intermetallic precipitates development and mechanical properties of maraging steel as function of composition, tempering time and temperature using electron microscopy

07 p1310 A70-19748

Selenium additions effect on structural steels transverse mechanical properties, emphasizing plasticity, shock resistance and machinability

07 p1310 A70-19750

Fiberglass reinforced materials characteristics under stress evaluated by ring test in form of split disk or hydraulic tests

07 p1410 A70-19758

Boron and carbon fiber reinforced composites mechanical properties compared with fiberglass reinforced composites

07 p1318 A70-19770

Single crystal carbides as high temperature structural materials, noting titanium carbide properties and strength-to-density ratio of B-doped crystals

07 p1312 A70-19883

Solid propellant mechanical properties tests, failure and physical deterioration /aging/

07 p1361 A70-19913

Geometrical-mechanical properties in terms of interlaminar shear stress of composite cantilever beams under end load

07 p1412 A70-19965

Glass fiber reinforced polyether composites long time strength under plane stress

07 p1321 A70-20187

Soviet book on mechanical properties of heat resistant steels and alloys at room and elevated temperatures

06 p1515 A70-20691

Glass filament reinforced plastics characteristics, considering filament protection during manufacture

08 p1526 A70-20717

Static loading effect at high temperatures in argon and liquid lithium on mechanical properties stability of steel

08 p1515 A70-20920

Steel strength under prolonged preliminary loading at elevated temperatures

08 p1515 A70-20934

Steel structure and mechanical properties under preliminary loading at elevated temperature and liquid Li at various exposure times

08 p1515 A70-20935

Mo mechanical properties dependence on surface defects and Ti films

08 p1515 A70-20937

Rare earth elements effects on microstructures and mechanical properties of cast Al, Al-Si and Al-Si-Mg alloys

08 p1516 A70-21127

Al-Mg alloys mechanical properties and corrosion resistance during aging, noting Zr and Mo additives effects

08 p1517 A70-21129

Al-Mg oxidation resistance and kinetics, studying Zr, Ce and Be additives effects on oxide films mechanical properties

08 p1517 A70-21130

Graphite molds compaction pressure effect on Ti castings nonporosity and surface layers carburization

08 p1506 A70-21143

Nickel boronizing in high temperature vacuum, studying mechanical properties and layer thickness time dependence

08 p1517 A70-21148

Mo sheet longitudinal and transverse mechanical properties and microstructure after annealing

08 p1517 A70-21199

Ti-based alloys with Al and Mo investigated for chemical composition and heat treatment effects on mechanical properties

08 p1518 A70-21200

Strain rate effects on mechanical properties of solids under dynamic loading

08 p1590 A70-21328

Dynamic mechanical properties of filled polymers as function of filler concentration, particle agglomeration and ratio of particle to polymer modulus

08 p1527 A70-21335

Nonmetallic inclusions effect on steels cyclic strength dependence on inclusion composition and metallic matrix properties derived from fatigue tests

08 p1590 A70-21413

Ultrasonic vibration effect on strength and plastic properties of metals undergoing torsion tests

08 p1520 A70-21499

Terminal mechanical characteristics of metals after ambient-temperature high energy rate forming compared with low rate processes

08 p1520 A70-21554

Turbine disk strength calculations, obtaining matrix expressions and optimum algorithm for arbitrary disk shapes

08 p1580 A70-21657

Mechanical properties and fracture behavior of chemically bonded glass matrix-metal composites

08 p1521 A70-21699

Wrought aluminum based high strength alloys structure and mechanical properties

08 p1522 A70-21708

Engineering use of filament reinforced metal matrix composites dependent on fabrication cost reduction, consistent properties and form flexibility

08 p1509 A70-21851

Cobalt modified Ti-6Al-4V plate and billet, testing effects on heat treatment response, microstructure, tensile and fatigue properties, fracture toughness, etc

08 p1523 A70-21852

Al alloy matrix composites with beta-SiC whiskers reinforcement, evaluating tensile and fatigue properties

08 p1523 A70-21856

Tension, compression and in-plane shear tests to obtain boron epoxy composite materials mechanical properties to design FB-111 wing box extension

08 p1529 A70-21879

Uniaxial and multiaxial stiffness and property characterization of anisotropic composite materials formed as thin walled cylinders

08 p1529 A70-21880

Mechanical properties characterization of unidirectional high modulus carbon fiber reinforced epoxy matrix composite

08 p1530 A70-21883

Mechanical testing of metal matrix high modulus B-Al filament composites, using unidirectional and multidirectional reinforcement

08 p1523 A70-21894

Graphite fiber/resin matrix composites for airframe structures, studying tensile, compressive and in-plane shear strengths

08 p1532 A70-21901

Fiberglass-epoxy laminates mechanical behavior under biaxial loading, describing test equipment and procedures

08 p1532 A70-21904

- Fractography of Al-B metal matrix composites to study micromechanical behavior, using scanning electron microscopy 08 p1524 A70-21913
- Metastable austenitic steel mechanical properties after thermomechanical treatment with deformation, discussing stress-strain curves to exhibit yield point 08 p1525 A70-21963
- Co-based alloy mechanical properties and physical parameters at high temperatures, discussing oxidation and hot corrosion resistance 09 p1700 A70-22025
- Strength and plasticity criteria for anisotropic reinforced materials model taking into account material structure, components properties and behavior 09 p1768 A70-22119
- Solid propellants mechanical properties under uniaxial tension 09 p1741 A70-22423
- Soviet collection of papers on mechanical fatigue from statistical standpoint 09 p1775 A70-22614
- Mechanical and physical properties of Nb-Ti binary annealed alloys as function of compound NbTi using microscopic and X ray phase analysis 09 p1704 A70-22755
- Thermal cyclic loads effects on heat resistant materials strength during strain hardening, considering role of time factors in durability 09 p1779 A70-23104
- Cellular structure and grain size effects on mechanical properties of strained and recrystallized chromium 10 p1902 A70-23862
- Ultrasonic vibrations effects on microstructure and mechanical properties of polycrystalline titanium during phase recrystallization 10 p1903 A70-23863
- Tantalum mechanical properties dependence during deformation on temperature and strain rate irregularities, discussing serrated yielding 10 p1904 A70-24386
- Duplex aging treatment effect on Ni-Co-Mo-Ti maraging steels mechanical properties 10 p1905 A70-25171
- Binary Ni-Cr alloys tensile mechanical properties at 25 C after water quenching and heat treatments 10 p1905 A70-25172
- Monograph on adhesive materials covering selection criteria tables, mechanical properties, specifications, surface preparation and joint strength 10 p1908 A70-25225
- Multicomponent Ti alloys mechanical properties for use in cryogenics describing alloying advantages with tantalum 10 p1906 A70-25295
- Shells equilibrium with large plastic deformations, discussing stability under uniaxial/biaxial tension and physical models for material mechanical properties 11 p2130 A70-25569
- Glass epoxy cross ply laminates with brittle or ductile epoxy matrices tensile tested, comparing mechanical performance 11 p2068 A70-25686
- Copper alloy composite reinforced by unidirectional solidification of pseudobinary eutectic Cu-ZrCuSi, discussing mechanical properties and electrical conductivity 11 p2066 A70-25775
- Silicon carbide whiskers properties and applications compared with other reinforcing fibers 11 p2070 A70-26340
- Measurement of dynamic mechanical quantities - Conference, Warsaw, May-June 1968 11 p2052 A70-26426
- Mechanical parameters measurement by radio telemetry during aircraft and motor vehicles tests, noting onboard recording methods 11 p2056 A70-26452
- Noise effects during mechanical parameters measurement by electronic devices, noting noise from resistors, potentiometers, power lines and wiper-type distributors 11 p2056 A70-26454
- Metals low cycle fatigue resistance, discussing repeated plastic straining effect on mechanical properties 11 p2141 A70-26609
- Earth mechanical properties and composition compared with moon and other terrestrial planets 11 p2047 A70-26616
- Mechanical properties in solids under dynamic incremental shear loading, discussing wave propagation tests on steel, Cu and Al 11 p2143 A70-26669
- Physicomechanical properties of tuff rock based on similarity to lunar surface rock, determining natural density, porosity and compression strength 11 p2119 A70-26798
- Structural materials chemical and metallurgical factors controlling mechanical properties, machinability and finished part producibility [ASTME PAPER MR-69-731] 12 p2240 A70-26992
- Wide goods fabrication of boron composites, discussing mechanical properties and cost effectiveness [ASTME PAPER EM-69-142] 12 p2240 A70-27078
- Strength conditions for orthotropic Hooke law materials with complex elasticity, giving elastic potential boundary values in tensor form 12 p2325 A70-27560
- Transpiration-cooled systems design with porous materials, considering mechanical and flow control/permeability/properties requirements 12 p2256 A70-27822
- Aluminum-boron composite material applications to structural components of F-106 aircraft, noting weight saving and mechanical properties [AIAA PAPER 68-975] 12 p2257 A70-28082
- Annealed compressed ground synthetic mica and silver dust composite materials, analyzing physicomechanical properties 12 p2260 A70-28319
- Fiber diameter effects on metal matrix composites strength from proposed model 12 p2329 A70-28370
- Kamchatka regions volcanic deposits structural and mechanical characteristics compared with lunar soil characteristics 13 p2485 A70-28465
- Glass fiber reinforced resin structures and equipment quality and physical/mechanical conditions determined by plastographic analysis 13 p2404 A70-28665
- Nonlinear theory describing mechanical behavior of prestressed laminated composites subjected to large deformations 13 p2511 A70-28738
- Collection of papers on nickel and nickel alloys covering thermal and mechanical properties during annealing and precipitation hardening behavior 13 p2432 A70-28758
- Deformation, mechanical properties and processes during recrystallization annealing of nickel and alloys single crystals 13 p2433 A70-28761
- Ni alloys hardening by solid solution precipitation and insoluble particles dispersion, emphasizing heat resistant alloys and mechanical properties 13 p2433 A70-28762
- Diffuse coatings effect on strength characteristics and corrosion resistance of steels, analyzing structure, thickness and purity of surface layers 13 p2433 A70-28888
- Electrodynamical transducer electrical and mechanical parameters measurement, comparing various techniques 13 p2406 A70-28991
- Structural Al-Zn-Mg alloys strain hardening effect on mechanical and corrosion properties, noting relationship between stress corrosion cracking and shear cracks 13 p2434 A70-29155
- Versamid cured epoxies time-dependent mechanical properties, determining loading mode, strain level and reinforcing agent effects on time-temperature shift factors 13 p2438 A70-29205
- Planar reinforced plastic resins strength and stiffness, considering mechanics of film, flake and ribbon reinforcements 13 p2438 A70-29206
- Titanium alloys powder metallurgy, considering manufacturing methods and physical, chemical and mechanical properties 13 p2435 A70-29214
- Materials selection for vibration or shock control based on cost, resonance frequency, strength, weight, etc 13 p2513 A70-29218
- Borsic-aluminum composite materials fabrication, properties and applications to aircraft parts 13 p2420 A70-29246
- Skin and tissue mechanical characteristics response to vibratory stimulation, considering effects on physiological and psychophysical tactile sensitivity measurements 13 p2354 A70-29598
- Stainless steel fiber reinforced Sn-Pb eutectic alloy composite mechanical properties, noting tensile strength and rupture behavior 13 p2436 A70-29625
- S glass fibers strength characteristics at quasi-static strain rates, considering temperature effects on elastic modulus 13 p2439 A70-29707
- Fatigue life and long term strength of polycarbonate components in pneumatic pulsating pressure equipment described by power and exponential equations 13 p2440 A70-29784
- Tensile tests on wings and wing components of plastic engine-driven aircraft, discussing design, configurations and mechanical properties 14 p2656 A70-30250
- Soviet monograph on V and V alloys covering phase diagrams, mechanical, chemical and physical properties, compounds and chemical composition 14 p2595 A70-30627
- Mission sequential environment effects on Dacron parachute material mechanical properties [AIAA PAPER 69-1018] 14 p2563 A70-30770
- Airframe critical part structural reliability on basis of ultimate static strength test data and extreme gust spectrum and maneuver loads 14 p2658 A70-30852
- Hydride segregation in Ti alloy weldments made with unalloyed Ti filler metal, determining effect on mechanical properties 14 p2591 A70-30932
- Al heat treatable alloys for welded structures, considering stress corrosion resistance, aging effects, brittle and delayed rupture resistance, etc 14 p2596 A70-30961
- Work hardening and tempering effects on Al-Mg alloy stress corrosion and mechanical properties 14 p2597 A70-30963
- Al-Zn-Mg weldable alloy composition, mechanical properties, heat treatment, aging effects, etc 14 p2597 A70-30964
- Al-Mg-Zn alloy composition, mechanical properties and structure for various heat treatments, discussing welded structures stability, stress relief, corrosion resistance and tensile strength 14 p2597 A70-30966
- Al alloy welded sheets strength and plasticity under biaxial tension, examining excess elastic energy effects on strain kinetics and rupture 14 p2597 A70-30967
- Al weldable alloys for cryogenic applications, considering plasticity, brittleness and tensile and yield strengths at low temperatures 14 p2597 A70-30968
- Lunar surface mechanical properties from Surveyor spacecraft interactions with soil /exclusive of surface sampler/ 14 p2644 A70-31055
- Piezoelectric annular disk transducer mechanical response to step voltage input with prescribed temperature field 14 p2588 A70-31228
- Book on high modulus fibers and composites providing data for preparation, microstructure, structure and properties 14 p2598 A70-31315
- Pyroceramics transient strength measurements on cylindrical and prismatic samples under static bending 15 p2764 A70-31545
- Hot rolling and warm working effects on microstructure and mechanical properties of Ni-Cu-Cb steel, noting optimum austenite plus ferrite phase field 15 p2756 A70-31566
- Filament orientation and fabrication variables effect on Ag matrix-W fiber composite mechanical properties 15 p2756 A70-31569
- Carbon reinforcing fibers, discussing mechanical properties, production, cost reduction, etc 15 p2765 A70-32246
- Superalloys commercial development, investigating strength, heat resistance and weldability of Fe- and Ni-based alloys [ASM PAPER W70-9-4] 15 p2760 A70-32335
- Thermal-mechanically treated stainless steels structure and properties, discussing stress relief aging effects 15 p2761 A70-32380
- Room temperature mechanical properties and structure of age hardened Ti-Cu alloys 15 p2761 A70-32384
- Statistical theory of material strength applied to composite materials reinforced with whiskers and noncontinuous fibers 15 p2763 A70-32833
- Book on engineering properties of thermoplastics covering strength characteristics, plastic components design, etc 15 p2766 A70-32843
- Isotropic composite materials with anisotropic components, determining microconstants for heat conduction, elasticity and thermoelasticity problems 15 p2766 A70-32896
- Anisotropic glass fiber reinforced plastics strength and deformability under cyclic axial loads 15 p2766 A70-32897
- Boron effects in austenitic stainless steels, considering chromium carbide formation, high temperature strength, ductility, etc 16 p2916 A70-33079
- Mechanically heterogeneous and optically homogeneous solid/liquid mixed laser with active centers contained in Ne bathed in liquid 16 p2926 A70-33109
- Ti-Mo cermet alloys properties and production technology, testing corrosion resistance 16 p2931 A70-33220
- Book on refractory metal properties covering nuclear reactor use, atomic, electronic and crystal structures, thermal and electrical characteristics irradiation effects, nuclear properties, etc 16 p2931 A70-33268
- Chemical structure and room temperature tensile, flexural and compressive properties of metaphen-

ylene diamine cured castings for graphite fiber reinforced epoxy resin matrices

16 p2936 A70-33358

Mechanical properties of composite materials reinforced with ribbon fibers consisting of stainless steel and polyethylene ionomer resins

16 p2988 A70-33366

Mechanical properties prediction analysis of boron filament wound reinforced composite structures verified by structural tests

16 p2937 A70-33370

Chemical and moisture resistance, electrical and mechanical properties of engineering thermosetting plastics made of HYSTL resins

16 p2938 A70-33380

Large capacity sealed nickel cadmium battery for spacecraft, describing mechanical and electrical characteristics

16 p2844 A70-33473

Beta transition mechanism dynamic mechanical properties in bisphenol-A based epoxy resins prepared with different curatives

16 p2856 A70-33500

Laminated multioriented filamentary composites strength and fracture characteristics under longitudinal tension and compression

[ASME PAPER 70-DE-31]

16 p2989 A70-33502

Fatigue life estimation from fracture mechanics data, discussing flaw geometry and propagation, mechanical properties, damage accumulation, etc

16 p2989 A70-33601

[AIAA PAPER 70-601]

16 p2989 A70-33601

Titanium electron beam welding in aerospace industry, discussing alloy properties and strength behavior

16 p2919 A70-33683

Grain boundary sliding model subjected to shear strain, discussing effect on mechanical properties

16 p2932 A70-33789

Thermal and mechanical properties of materials for spacecraft booms design

16 p2986 A70-34138

Dislocation diffusion effects on strength of whiskers and fine grained polycrystals

16 p2934 A70-34327

Chemical and structural microinhomogeneity, diffusion and mechanical properties of Ti alloys in connection with phase transformation characteristics

17 p3112 A70-34354

Electroslag melted titanium wrought shapes mechanical properties, comparing with double vacuum arc melted material properties

17 p3112 A70-34356

Interstitial impurities effect on mechanical properties of Ti alloys, discussing interaction between solutes and dislocations

17 p3116 A70-34390

Unalloyed alpha titanium mechanical properties, emphasizing grain size and interstitial content effects on strain hardening and deformation dynamics

17 p3116 A70-34391

Martensitic transformation effects on mechanical properties of beta quenched Ti binary alloys

17 p3119 A70-34414

Solution heat treatment temperature effects on strength and age hardening of Ti alloys

17 p3120 A70-34419

Shock deformation effects on strengthening and microstructure of Ti and Ti-Mo alloys

17 p3120 A70-34420

Thermal exposure effect on room temperature mechanical properties of Ti alloys, noting diffusion bonding, hot forming and heat treatment

17 p3120 A70-34422

High temperature heating and cooling effects on mechanical properties and structure of Ti welds, using notched bar impact specimens

17 p3098 A70-34423

Forged alpha/beta Ti alloys, investigating relationship between mechanical properties and microstructures produced by heating

17 p3120 A70-34427

Ultrahigh strength alpha-beta titanium alloys, examining carbon and oxygen effects on mechanical properties

17 p3121 A70-34429

High strength Ti alloys depth hardenability, discussing mechanical properties and use in aircraft components

17 p3121 A70-34434

Heat treatment effect on strength and ductility of Ti-Al-V-Sn alloy by optical and electron microscopy and X ray diffraction

17 p3122 A70-34437

Heat treatment and composition effect on mechanical properties of alpha Ti-base alloy, discussing creep resistance, tensile strength, etc

17 p3122 A70-34439

Ti alloys use in Olympus 593 engine for Concorde SST, discussing weight saving, mechanical properties and manipulation characteristics

17 p3146 A70-34449

Cold working effects on Zircaloy tubes mechanical properties and hydride orientation, discussing tubes use in nuclear power stations

17 p3123 A70-34645

Temperature and strain rate effects on polycrystalline Al strength

17 p3124 A70-34655

Composite materials in aerospace vehicle design, discussing mechanical behavior, applications and characteristics

17 p3127 A70-34674

Physical properties and structure of Cr-Ni austenitic stainless steels with high Mn and N content as function of temperature

17 p3125 A70-35143

Corrosion and mechanical properties of Cr-Ni-Mn-N austenitic stainless steels

17 p3125 A70-35144

Temperature and constant compressive loading effects on mechanical characteristics of fiberglass reinforced plastics

17 p3127 A70-35341

Collection of papers on physics of strength and plasticity, covering flow mechanisms, stress fields, alloy hardening, crack structure and initiation, rock ductility, etc

17 p3190 A70-35451

Temperature dependence of materials with protective coatings, emphasizing mechanical properties of Mo with various diffusive coatings

17 p3126 A70-35716

Composite compression tubes for VTOL aircraft components, describing weight parameters and mechanical properties

[AIAA PAPER 70-898]

17 p3193 A70-35809

Ti-Al binary and Ti-Al-X ternary alloys grain boundary precipitation kinetics and correlation with mechanical properties

18 p3272 A70-36035

Two phase stainless steels with microduplex structures, taking into account martensite and ferrite effects on mechanical properties

18 p3272 A70-36038

Ti-Al alloys room temperature mechanical properties after age hardening

18 p3274 A70-36055

Mechanical properties of binary Ti-Ni and ternary Ti-Mo-Ni alloys

18 p3275 A70-36122

Fine grained Be structure and mechanical properties under tensile deformation at temperatures from 20 to 1000 C

18 p3276 A70-36311

Thickness determination of external elastic plates in freely supported three layer structures of uniform strength under perpendicular loads

18 p3343 A70-36717

Al alloy matrix-boron fiber-stainless steel wire composites fabrication into various shapes with desired mechanical properties for aerospace structural components applications

18 p3263 A70-36837

Porosity effects on mechanical properties of Al alloy gas tungsten arc welds, noting strength loss proportional to cross sectional area loss

18 p3265 A70-37205

Normalization of mechanical properties of aircraft engine components, increasing weight efficiency and reliability

19 p3490 A70-37254

Ti and C effects on Fe-Cr-Ni alloys mechanical properties

19 p3449 A70-37271

Heat resistance of cast, forged and annealed Ti-Cu alloys, discussing forged alloys mechanical properties as function of chemical composition and temperature

19 p3449 A70-37273

Dispersion hardened Co strength and plasticity temperature dependence, determining Ti and Nb carbides additives effects

19 p3450 A70-37350

Tungsten fiber reinforced copper based composite material, investigating moulding and sintering conditions effect on mechanical properties

19 p3450 A70-37454

Ti alloys low temperature strength and plasticity, noting twinning and additives effects

19 p3450 A70-37457

Friction reducing oxide layer effects on Ti alloys low temperature plastic and mechanical properties

19 p3450 A70-37458

Electron radiation damage and stage 3 annealing effects on polycrystalline Mo properties

19 p3451 A70-37570

Mathematical representation of heart muscle mechanical properties, examining tensile stress in parallel and series elements

19 p3368 A70-37809

Graphite-polyimide composites development for high temperature environments, discussing mechanical properties

19 p3455 A70-38425

Turbine disk strength calculations, obtaining matrix expressions and optimum algorithm for arbitrary disk shapes

19 p3548 A70-38460

Mechanical properties, optimum deformation and rupture of W wire reinforced Ni and Ti metal composites obtained by hot rolling in vacuum

19 p3453 A70-38463

Apparatus for short term thermal vacuum mechanical testing of materials

19 p3401 A70-38471

Book on materials for structural and mechanical functions covering electrical engineering properties, ferrous and nonferrous metals and alloys, fabrication methods, environmental protection, etc

19 p3453 A70-38622

Pt resistance thermometers for low temperature measurements, discussing structural and mechanical characteristics

19 p3432 A70-38704

W-Mo-Nb-Ta system structure and properties at room and high temperature by microstructural analysis and hardness measurements, discussing Mo addition effects

19 p3453 A70-38713

Heat treatment and alloying element influence on phase and structure transformations in Ti alloys, investigating mechanical properties and creep resistance

20 p3645 A70-39039

Ti alloys fine structure, mechanical properties and alloying elements diffusion mobility during heat treatment, observing chemical and structural inhomogeneities

20 p3645 A70-39040

Nb-Ta and Nb-Mo alloys single crystal solid solution strengthening as function of composition, temperature and strain rate

20 p3646 A70-39105

One-component rigid epoxy foam system suitable for lightweight electronic potting, determining mechanical, electrical and thermal properties

20 p3652 A70-39167

High temperature acoustic waves, examining solid and fluid properties, weld integrity nondestructive material tests and nondisruptive process measurement

20 p3628 A70-39170

Carbon/carbon composites constituent characteristics effects on thermal and mechanical properties, using polarized light and scanning electron microscopy

20 p3653 A70-39204

Carbon/carbon composites thermal and mechanical properties measurements by NDT including image transducer, IR scanning and ultrasonic methods

20 p3636 A70-39213

Alloys for aircraft structures design, considering materials strength, corrosion resistance, producibility and cost

20 p3648 A70-39414

Stainless maraging steel bolts tensile, shear and fatigue strengths and stress corrosion resistance at room and high temperatures

20 p3650 A70-39964

Ti alloy bolts mechanical properties improvement by beta heat treatment

20 p3650 A70-39965

Beta III Ti alloy for aircraft fasteners, describing microstructure and mechanical properties

20 p3650 A70-39966

Composites potential structural performance, determining mechanical properties for fiber and matrix materials and unidirectional and isotropic composites in cylinders and box beams

20 p3651 A70-40042

Wire reinforced solid rocket propellant grains mechanical properties and failure modes

20 p3689 A70-40050

Unidirectional fiber reinforced composites strength, obtaining limit load bounds from plasticity analysis

20 p3731 A70-40051

Glass reinforced plastics /GRP/ mechanical properties degradation by water, discussing effects of temperature, pressure, environment, etc

20 p3656 A70-40056

Ti mechanical properties dependence on grain boundary size and hydride precipitation characteristics, considering transcrystalline and intercrystalline fracture

20 p3652 A70-40179

Mechanical behavior of cylinders with alternating layers of reinforcing and matrix materials derived from governing equations, including equations of motion

20 p3732 A70-40267

Elastomechanical system reciprocity relation principles using differential equations for bar with forces in two places

20 p3735 A70-40537

Multilayer three dimensionally woven fiberglass-reinforced materials, measuring strength and deformation under tension, compression, bending, torsion and shear tests

21 p3841 A70-40646

Unidirectional fiberglass-reinforced plastic, investigating binder content and porosity effects on strength

21 p3841 A70-40647

Mechanical behavior differential equation representation in presence of finite deformations using state variables

21 p3937 A70-41434

Zr-Nb alloys mechanical strength increase due to beta phase martensitic decomposition

21 p3840 A70-41897

Hot pressed zirconia-zirconia ceramic fiber reinforced ceramic matrix composites, discussing mechanical properties and failure modes

22 p4057 A70-42285

Solid rocket fuels mechanical properties, using high speed pneumatic test machine and impact tensile tester

22 p4088 A70-42342

Repair weld procedures effects on annealed Ti-Al-V weldments mechanical properties, examining defects in inert gas shielded arc welded joints

[ASME PAPER 70-MET-1] 22 p4043 A70-42425

Scorched aluminum powder /SAP/ materials, discussing fabrication, physical and mechanical properties, applications in aircraft structural components, etc

22 p4055 A70-43084

High strength high Ni maraging steels crystal structure, alloying elements effects on mechanical properties, applications, etc

22 p4055 A70-43121

Vacuum-melted and deformed Mo alloys tests, showing long term strength decrease under cyclic heating

22 p4055 A70-43123

Recrystallized and overrecrystallized Al alloys, investigating factors controlling anisotropy of mechanical properties

22 p4056 A70-43126

Al-Be-Mg alloys under solution treatment, noting aging and prolonged heating effects on mechanical properties from solid solution decomposition diagram

22 p4056 A70-43127

Polycrystalline aluminas under thermal shock, investigating strength decrease and subcritical crack formation

22 p4059 A70-43413

French book on strength of materials covering potential energy theory, cutoff and matrix methods, computer calculations, etc

22 p4119 A70-43623

Laminated composites time dependent static strength and reliability under uniaxial tension

22 p4119 A70-43678

Solidified polyglycol maleinate resin optical and mechanical properties under tensile stress creep, using hereditary photoelasticity

22 p4121 A70-43723

Mechanical properties and internal stress fields in composite materials reinforced by glass fibrous filler under transverse shear

22 p4061 A70-43724

Specific strength of unidirectional fiber reinforced metal matrix composites, using volume ratio-transfer coefficient diagrams

23 p4209 A70-43939

Statistical analysis of durability data of heat resistant alloys for gas turbine engines, using long term strength tests of melts in mass production

23 p4204 A70-43940

Fiberglass reinforced plastic strength and deformation properties under creep and stress relaxation, investigating temperature effects and load duration

23 p4209 A70-43980

German monograph on glass fiber reinforcement effect on soft thermoplastics strength, adhesion and slip properties

24 p4366 A70-45088

Fibrous composites use in compressor blades, discussing materials characteristics requirements relative to environmental and stress conditions in aircraft operational service

24 p4392 A70-45169

Fibrous composites design for mechanical properties improvement, discussing interfacial properties conflicting requirements as to interlaminar shear, transverse tensile strength, high work of fracture values, etc

24 p4419 A70-45172

Polymers strength and stiffness properties, considering different molecular chain alignments as related to elastic modulus

24 p4366 A70-45173

Materials design and development for engineering applications, discussing relationships and importance of strength, stiffness, weight, toughness and work of fracture

24 p4419 A70-45174

Superalloys dispersion strengthening and age hardening by mechanical alloying

24 p4341 A70-45246

Unimodal and bimodal distribution of fiber composite properties at different stress levels using quantitative metallography

24 p4359 A70-45250

Steel and duralumin strips with circular holes tested under axial tension, determining relationship between strength weakening and ultimate stress

24 p4420 A70-45272

Polyvinyl chloride /Novodur/ mechanical properties application to structural model testing

24 p4367 A70-45445

Caprolon B mechanical properties, comparing properties to other polyamide resins for use in machine parts fabrication

24 p4367 A70-45503

Alpha phase Ti strengthening, investigating interaction between dislocations and interstitial solute atoms

24 p4360 A70-45516

Plasticized high polymers mechanical and optical properties, studying birefringence phenomena interrelation with applied external stresses

24 p4424 A70-45590

MECHANICAL RESONANCE U RESONANT VIBRATION MECHANICAL SHOCK

Bolted joints inspection using mechanical impedance algorithm method involving bolt head mechanical shock pulse response in adjacent structure

01 p0098 A70-10017

Mechanical shock accelerometer calibration by light frequency Doppler shift measurement using laser interferometer and single sideband carrier insertion circuit

08 p1493 A70-20602

Simple high level shock machine producing trapezoidal and terminal peak sawtooth pulses with Al honeycomb impact material

19 p3396 A70-37832

Optical FM system with laser interferometer and sideband carrier circuit for measuring mechanical shock by Doppler shift

23 p4193 A70-43964

Shock and bump testing for dynamic mechanical environments effects encountered by vehicle equipment and components

23 p4195 A70-44331

Resonant fixtures utilization attaining high amplitude in shock synthesis testing, discussing test specifications

24 p4322 A70-45886

[SAE PAPER 700848] MECHANICAL TWINNING

Fast brittle crack slowing by mechanical twins in transformer steel and by slip bands in LiF and NaCl crystals

15 p2755 A70-31526

Twinning lamella formation in Nb single crystals, examining slip and shear roles in surface tilt formation

15 p2761 A70-32382

MECHANICS (PHYSICS)

Developments in mechanics - Conference, Ames, Iowa, August 1969

01 p0203 A70-11126

Holographic interferometry applications in experimental mechanics, illustrating nondestructive testing by flaw detection in bonded honeycomb

03 p0481 A70-12959

Applied mechanics - Conference, Stanford, August 1968

03 p0596 A70-14226

Nonlinear solid applied mechanics, emphasizing nonlinear constitutive equations and related subjects, cyclic loading effect on solid materials, etc

03 p0610 A70-14230

Theoretical and applied mechanics - Conference, Coimbatore, India, December 1966

03 p0601 A70-14326

Mechanical engineering and mechanics-Conference, Haifa, June-July 1969

05 p0939 A70-16508

Apollo 8 mission, spacecraft and booster details, calculating earth-moon flight parameters based on laws of mechanics

07 p1375 A70-18776

Soviet collection of papers on control mechanics and processes, computational mathematics

09 p1772 A70-22532

Applied mechanics - Conference, Bucharest, June 1969

10 p1802 A70-24776

Applied mechanics - Conference, Bucharest, June 1969

10 p1870 A70-24794

Mechanics of solid structures including shells and beams, considering three dimensional behavior laws in plasticity and creep

14 p2656 A70-30294

Mechanics - Conference, Bucharest, June 1969

16 p2893 A70-33740

Applied mathematics and mechanics - Conference, Aachen, Germany, April 1969

18 p3280 A70-36351

Computer language related to ALGOL 60 for handling nonnumerical problems of mechanics

18 p3283 A70-36367

Theoretical and applied mechanics - Conference, Tulane University, February-March 1968

19 p3543 A70-38326

Theoretical and applied mechanics - Conference, Haifa, July 1970

21 p3938 A70-41958

Applied mechanics - Conference, Bucharest, June 1969

22 p4113 A70-42601

Applied mechanics - Conference, Bucharest, June 1969

22 p4009 A70-42605

Applied mechanics - Conference, Bucharest, June 1969

22 p4113 A70-42610

Applied mechanics - Conference, Bucharest, June 1969

24 p4423 A70-45576

Applied mechanics - Conference, Bucharest, June 1969

24 p4423 A70-45586

MECHANISM

Book on dynamics of mechanisms with elastic connections and impact systems covering differential and finite difference equations, equations of motion, friction effects, etc

08 p1502 A70-20753

Equations of motion of holonomic and non-holonomic mechanical systems obtained by displacement operators

08 p1546 A70-21627

MECHANIZATION

Mechanized Algebraic Operations software package for manipulation on computer Poisson series, noting application to celestial and nonlinear mechanics and astrodynamics

10 p1845 A70-24179

Strapdown inertial system mechanization and modularized instrument packaging with self contained failure isolation, temperature control and redundant components

22 p4066 A70-42315

[AIAA PAPER 70-1027] Inertial navigation system application to air transportation, discussing system mechanization and compatibility with ATC requirements

22 p4066 A70-42654

MEDIA

NT ANISOTROPIC FLUIDS
NT ANISOTROPIC MEDIA
NT ELASTIC MEDIA
NT INTERGLACTIC MEDIA
NT INTERPLANETARY DUST
NT INTERPLANETARY GAS
NT INTERPLANETARY MEDIUM
NT METEOROID DUST CLOUDS
NT ZODIACAL DUST

Book on antennas and waves covering EM radiation, configurations, insulation, dissipative media, coupling, transmission lines, etc

12 p2194 A70-27095

Stochastic medium mathematical model for loose medium motion in potential field of forces

15 p2821 A70-32342

MEDICAL ELECTRONICS

Rocky Mountain Bioengineering - Conference, Laramie, Wyoming, May 1969

02 p0242 A70-12093

Monitoring and recording of physiological parameters, discussing heart, muscle, brain potentials, blood pressure, respiration measurements and instrumentation

03 p0439 A70-14267

Arrhythmia monitor for cardiac distress prediction, using small hybrid computer for detection of abnormal rhythm and ECG complex comparison

07 p1221 A70-19604

Electronic measurement of bronchial flow resistance in pulmonary function to determine impediment in inhaled and exhaled air passage

08 p1449 A70-20676

Electromagnetic flowmeter for cardiac output changes in unanesthetized rats, discussing construction, form and associated electronic equipment of implanted probe

09 p1627 A70-23267

ECG telemetry system within small irregular metal chamber

11 p1992 A70-26514

Dry electrodes application to ECG monitoring under primitive field conditions, noting materials storage and transportation advantages

11 p1993 A70-26524

Electromagnetic blood flow determination by catheter in external magnetic field, discussing intravascular EM flow sensor capable of percutaneous introduction into vascular system

11 p1993 A70-26663

Medical electronics and biological engineering - Conference, Nancy, France, June-July 1969

14 p2540 A70-30376

Cycloergometer with powder type electromagnetic brake for respiratory and circulatory measurements and functional rehabilitation

14 p2541 A70-30379

Bioradiotelemetry of human cardiac activity during professional activities, using ultrasonic searchless Doppler cardiography

17 p3038 A70-35365

- Cardiovascular stress testing using posterior bipolar lead for radiotelemetry monitoring
20 p3578 A70-39199
- Medical monitoring system onboard Soyuz spacecraft, describing equipment design, data acquisition and analysis, telemetric recordings, etc
20 p3581 A70-40193
- Reverse curvature silicon transistor linearizer for hot-wire and thin-film constant temperature anemometers for aorta blood flow velocity measurements
21 p3827 A70-41458
- High fidelity microelectrode recording of phase zero cardiac transmembrane action potentials, utilizing memory oscilloscope
21 p3772 A70-42163
- Real time contourographic electrocardiographic display determining heart rate from CRT face on beat-by-beat basis
23 p4150 A70-44377
- Electronic simulation of indicator-dilution curves for comparative evaluation of cardiac output computers
24 p4309 A70-46120

MEDICAL EQUIPMENT

- NT ARTIFICIAL EARS**
NT CARDIOTACHOMETERS
NT PROSTHETIC DEVICES
NT SURGICAL INSTRUMENTS
- Inexpensive schlieren system for medical ultrasonic research, discussing equipment and application to short wave transducer beam patterns used in ophthalmology
02 p0300 A70-12472
- Medical kit utility for colds, sore throats, scrapes, cuts and bruises
07 p1219 A70-19021
- Biomedical instrumentation evaluation procedure to minimize redesigns and delays and to bridge communication gap between medical and engineering fields
08 p1450 A70-20791
- Medical laser systems applications, design criteria, general functions, etc
08 p1450 A70-20819
- Laser safety programs in biomedical applications, discussing installations, techniques, hazards and protection
08 p1451 A70-21048
- Medical thermograph with modified image-pickup device characteristics and additional thermal analysis equipment
10 p1828 A70-25307
- Preflight medical examination of flying personnel, describing portable device for recording systolic/diastolic pressure, body temperature and pulse rates
13 p2357 A70-29296
- Portable battery operated system for rapid measurements of blood plasma electrolytes during aeromedical evacuation
20 p3579 A70-39433
- Multiple choice rotation chair for clinical experimental research and pilot vestibular tests
20 p3580 A70-39438
- Air transportation of respiratory failure patients, considering medical equipment adaptation for aircraft use
20 p3580 A70-39440
- Lasers biomedical applications based on thermal and ionization effects on biological targets, considering eye surgery, tumor treatment, etc
24 p4308 A70-45568
- Lasers for surgical applications, cancerous tissue treatment, ophthalmology and comparison with RF diathermy
24 p4308 A70-45569

MEDICAL PERSONNEL

- NT FLIGHT SURGEONS**
NT PHYSICIANS
- MEDICAL PHENOMENA**
NT PHENOMENOLOGY
- Medical wastage of professional aviators in military and civil aviation, discussing reasons for preventing flying license revalidation
13 p2359 A70-29440

MEDICAL SCIENCE

- NT EPIDEMIOLOGY**
NT HISTOLOGY
NT IMMUNOLOGY
NT NEUROLOGY
NT NEUROPSYCHIATRY
NT OTOTOLOGY
NT PHENOMENOLOGY
NT PSYCHIATRY
NT RADIATION MEDICINE
NT RADIOBIOLOGY
NT RADIOLOGY
NT SYMPTOMOLOGY
NT TOOTH DISEASES
- Biochemical, electron microscopy and experimental medicine data indicating pathogenetic mechanism responsible for arteriosclerosis
03 p0431 A70-14278
- Imagery in medicine - Conference, Ann Arbor, May 1969
04 p0640 A70-14556

- Real image holography of complex organism or body organs as teaching aid and research tool in medicine and biology
04 p0685 A70-14558

- Computer processing role in film scanning and digitizing for enhancing X ray and radioisotope scanner images in medical radiographs, discussing image noise reduction
04 p0654 A70-14562

- Computer program for evaluating measured lung function values by comparison with accepted norms, using matrices containing regression coefficients
04 p0644 A70-15360

- Empirical formulas derived for intuitive estimates of blood coagulability in patients to facilitate medication dosage prescription
07 p1210 A70-19558

- Pattern recognition systems design and applications in medical and photographic data classification
13 p2374 A70-29580

- Hyperthyroidism diagnosis by pattern recognition, using computerized class featuring information compression
22 p3977 A70-43732

MEDICAL SERVICES

- Ground and ditching emergency evacuation tests of C-9A aeromedical aircraft under worst possible simulated crash conditions
01 p0035 A70-10716
- Helicopters for injured or sick persons transportation as compared with ambulance use based on West Germany experience
03 p0436 A70-13822
- Public health services problems analyzed by statistical simulation method, using Markov process
04 p0644 A70-15356
- Physician-monitored central control facility communicating with remote site facilities staffed by paramedical personnel for public health care, based on aerospace experience
04 p0644 A70-15357
- Problems experienced in using computers for medical diagnosis and treatment processes, discussing Bayes formula application
04 p0644 A70-15358
- Computer aided medical diagnosis
04 p0644 A70-15359
- Victim examination, human factors and forensic problems in flight accident investigations
05 p0807 A70-16497
- Air crash rescue operations by helicopter ambulances of U.S. Army Medical Department, discussing postcrash fire suppression and injured personnel removal, emergency treatment and evacuation
06 p1002 A70-17714
- Automatic control of continuous medical monitoring in manned space flight
07 p1220 A70-19512
- Helicopter utilization in emergency transportation of civilian patients, discussing questionnaire results from medical and police agencies
08 p1454 A70-21937
- Aeromedical Evacuation System in overall treatment process for seriously ill patient
09 p1628 A70-23467
- Automatic control of continuous medical monitoring in manned space flight
11 p1991 A70-26111
- Patients emergency transportation by helicopter, discussing vehicle types and onboard medical treatment
14 p2540 A70-30191
- Survival training program preparing physicians as advisors regarding survival equipment and medicine
23 p4152 A70-44463

MEDITERRANEAN SEA

- Highly localized clear air turbulence at aircraft flight level over Mediterranean, noting simultaneous temperature rise
19 p3463 A70-38948
- Synoptic surface and upper air analysis and APT mosaics of meridional circulation over Mediterranean by remote satellite images
21 p3846 A70-41399

MEDIUM SCALE INTEGRATION

- Integrated logic circuits, considering switching properties and medium and large scale integration
13 p2372 A70-29116

MEETINGS

- U CONFERENCES**
MEISSNER EFFECT
U DIAMAGNETISM
U SUPERCONDUCTIVITY
MELLIN TRANSFORMS
- Laplace and Mellin transforms inversion in one dimensional cascade theory problems, using numerical methods for primary electron and photon spectra
20 p3675 A70-39305

MELTING

- NT ARC MELTING**
NT FUSION [MELTING]
NT VACUUM MELTING
- Transient one dimensional heat transfer analysis demonstrating infiltrant melting effect on self heat-re-

- tarding porous metal composite during surface melt layer formation
04 p0709 A70-15414

- Melting ablation for two dimensional and axisymmetric blunt bodies with body force, predicting gas-liquid interface temperature for free stream conditions
06 p1176 A70-17690

- Melting zone evolution in thermal history of earth, investigating upper mantle heat transfer effect on layer motion due to radioactive decay
06 p1056 A70-17804

- Al alloys melting in flame furnaces, studying oxidation and various sources of metal losses
08 p1505 A70-21131

- Projectile penetration of Al alloys, noting melting during intense shear band formation
08 p1522 A70-21710

- Extended chain polymer crystals temporary superheating before final melting, discussing hexagonal selenium crystals data
11 p2069 A70-25803

- Temperature, stresses and deformations in melting plates of elastic perfectly plastic material, using penetration depth concept with heat balance approach
11 p2138 A70-26134

- Polyethylene extended chain crystals melting process via electron microscopy and differential thermal analysis
12 p2258 A70-26896

- Liquid water occurrence on Mars surface, considering ice melting, evaporative cooling, atmospheric moisture content, etc
14 p2651 A70-31298

- Materials preparation processes and improvements in space weightless environment, considering metals and ceramics melting, solidification, electromagnetic process control, etc
16 p2919 A70-33717

- Ni-S melts thermodynamic properties in 700-1100 C range by continuous thermal balance method, calculating S vapor pressure
18 p3271 A70-36029

- Slab melting under hot spots, obtaining starting solutions
18 p3346 A70-36491

- Plastic deformation of melted Al-Mg single crystals, using dynamic tensile testing
19 p3450 A70-37374

- Deformable bodies rupture condition formulation by melting analogy, comparing results to experimental data
20 p3733 A70-40394

- Vapor capillary /melt/ depth in electron beam welding, considering electron energy, radiative dissipation, etc
21 p3833 A70-41124

- Lunar crystalline rock melting at atmospheric pressure under partial oxygen pressure, suggesting crystallization temperature
21 p3895 A70-41508

- Finite difference numerical integration method for melting and freezing problems extended to free convection in liquid and unequal densities for phases
21 p3953 A70-42093

- Dynamic melt properties of polymer blends, using orthogonal rheometer measurements
22 p4058 A70-43076

- Pulsed spray welding electrode melting rates for Al alloy, mild steel and stainless steel electrodes over range of pulse current levels
22 p4046 A70-43147

- One-phase Stefan problem of heat conduction with melting, proving existence and uniqueness theorems for solid and free boundary temperature determination
24 p4429 A70-46036

MELTING POINTS

- Extended chain crystals of hexagonal Se temporary superheating before final melting, presenting melting equation
01 p0126 A70-10222
- Ti-Al-Co alloys melting points and cast structures, discussing reactions with melt
01 p0125 A70-11644
- Alloying elements preventing hot cracking in weld metal by converting iron sulfides into higher melting point sulfides
07 p1293 A70-18979
- Jupiter conductive molten metallic hydrogen core of moderate temperature suggested from solids melting point temperature dependence on pressure
07 p1390 A70-20238
- Pressure effects on melting temperature curves of solids, considering Van der Waals solids, metals and ionic compounds
09 p1665 A70-22056
- Melting diagram for five element Mo-W-Nb-Ta-V system constructed by optimal projections from known composition-property relations for corresponding ternary systems with common components
09 p1702 A70-22561
- Helium melting pressure curve to calibrate cerium magnesium nitrate or NMR low temperature thermometers
09 p1728 A70-22999

Phase equilibria and maximum melting compositions determinations for compound semiconductors by differential thermal analysis compared with vapor and high pressure techniques 11 p2098 A70-25812

Linear aliphatic polyesters melting point, fusion heat and entropy correlations to molecular parameters 22 p3982 A70-42502

Subsolidus state multicomponent eutectics systems temperature range based on number and melting points ratios of individual components 24 p4367 A70-45476

MEM [EXCURSION MODULE]
U MARS EXCURSION MODULE
MEMBRANE ANALOGY
U MEMBRANE STRUCTURES
U STRUCTURAL ANALYSIS
MEMBRANE STRUCTURES
NT SKIN [STRUCTURAL MEMBER]
 Wave front discontinuities during pressure wave propagation in membranes and elastic shells by asymptotic procedure using Laplace transform 03 p0589 A70-13331

Eigenfunctions of oscillating infinite perforated membranes for various boundary conditions at holes 03 p0591 A70-13415

Tension field theory describing buckling of membranes or thin plates with boundaries subjected to excessive planar displacements 03 p0599 A70-14246

Pressure vessel deformation and stress analysis by matrix displacement method, considering solids and membrane shells under axisymmetric and asymmetric loading [ASME PAPER 69-WA/PVP-3] 04 p0768 A70-14790

Laplace transform of axial stress resultant in impacting semiinfinite elastic cylindrical membrane as exponential function involving wave propagation speed, applying continued fractions [ASME PAPER 69-APM-K] 04 p0769 A70-14859

Stereophotogrammetric measurement for dynamic deformation of circular membrane subjected to underwater detonation 05 p0927 A70-16009

Membrane stress concentration near circular cutouts in uniaxially stressed sheets reduced by predeforming immediate surroundings of hole 05 p0940 A70-16515

Membrane reinforced thin walled cylindrical shells stability as asymmetric contact problem in shell and plate theory 05 p0947 A70-17011

Unsteady interaction of compressible fluid and flat circular deforming elastic membrane analyzed by coupled computer program method [AIAA PAPER 70-75] 06 p1039 A70-18082

Elastic membranes deformation compressed by restraints using discrete dynamic programming 07 p1400 A70-18680

Membrane deformations in second order rotating surfaces with positive Gaussian curvature investigated for external couple loaded spherical shells 10 p1958 A70-24515

Thin soap membranes shape determined by photogrammetric method, using stereo camera and fluorescent light 10 p1891 A70-24735

Circular membrane creep under one-sided hydrostatic pressure, using governing equations for finite deformation 10 p1959 A70-24828

Self opening em-operated secondary and ternary mylar diaphragms for expansion tubes and tunnels 11 p2031 A70-25982

Membrane theory for thin single layer orthotropic cylindrical shells experiencing harmonic axisymmetric motion 11 p2136 A70-26084

Tension rays and load transfer from compact member via wrinkled membrane determined by variation technique using maximum strain energy 12 p2322 A70-27225

Pressurized orthotropic cylindrical membrane shells free and forced vibration, considering dynamic response dependence on internal pressure 12 p2326 A70-27815

Active and passive ion transport mechanisms in excitable animal cell maintaining constant membrane polarization 13 p2352 A70-29351

Wave front discontinuities during pressure wave propagation in membranes and elastic shells by asymptotic procedure using Laplace transform 14 p2657 A70-30710

Circular cylindrical membrane axially symmetric deformations, determining axial and circumferential stresses 14 p2657 A70-30844

Eigenvalues of membranes and plates, comparing asymptotic and numerical values 14 p2600 A70-31223

Elastic membranes deformation compressed by restraints using discrete dynamic programming 15 p2813 A70-31472

Zero moment /membrane/ theory for anisotropic thin walled shells, deriving expressions for stress-strain states and displacements under torsion 15 p2824 A70-32894

Optical membranes design, discussing properties of materials and mountings 16 p2904 A70-33148

Membrane stresses on nonspherical domes with axisymmetric loads 16 p2990 A70-33743

Vibrations of shells, plates and membranes carrying dynamic systems at discrete points on surface, obtaining eigenfunction and eigenvalue equations 16 p2993 A70-34090

Elastic and equilibrium matrices for semimonocoque membrane /plane stress/ elements using skin and reinforcing member transformations 17 p3185 A70-34921

Vibrating diaphragm gas pressure measuring system based on membrane damping, applying to prototype atmospheric entry probes 17 p3095 A70-35524

Double curved shell membrane stress calculation under arbitrary load, using stress functions 18 p3338 A70-36373

Nonhomogeneous Helmholtz vibration equation for sectorial-annular membranes and plates under arbitrary load, using Fourier method 19 p3535 A70-37343

Membrane attachment for pressure transducer with help of holographic interferometry, describing optical system 19 p3427 A70-38453

Singular integral equation formulation for torsion from membrane analogy, obtaining boundary value problem solution by computer program 20 p3718 A70-39000

Elastic membrane axisymmetric deformations, reducing nonlinear equations system to quadratures 20 p3718 A70-39230

Turtle bladder walls osmotic properties, discussing transmembrane water flow transient acceleration by sodium transport inhibition 21 p3762 A70-41223

Turtle bladders isolated mucosal and serosal fractions histological and physiological properties, discussing ion transport and oxygen consumption 21 p3762 A70-41224

Membrane theory of shells, reducing equilibrium equations to single second order partial differential equation through transformation in terms of stress function derivatives 21 p3939 A70-42031

Thin shell structural analysis by doubly curved arbitrary quadrilateral finite element, using Kirchhoff theory and cubic polynomial for membrane displacements 23 p4272 A70-44711

Rectangular cable networks covered by or embedded in membrane matrix, calculating vibration response under load by Galerkin method 24 p4421 A70-45279

NT MEMBRANE STRUCTURES
NT PLEURAE
NT SKIN [STRUCTURAL MEMBER]
 Lower bounds of Stekloff and free membrane eigenvalues for sloshing of incompressible inviscid fluid, subject to gravity in rigid tank with free surface 02 p0278 A70-11999

Gamma radiation effects on membrane permeability of isolated nuclei from white rats thymus in sucrose-calcium buffer 04 p0629 A70-14460

Hyperbaric oxygenation effects on cellular membrane permeability, analyzing rat plasma behavior of transaminases GOT and GPT and K and Na cations electrolytes 05 p0802 A70-16493

Liquids particulate contamination sizing and counting by membrane filtration, specifying procedures and apparatus used 07 p1195 A70-18804

Blasius flow stability on deformable surface of membrane using Orr-Sommerfeld equation to calculate amplitude of function for perturbation flow 09 p1658 A70-22182

Lobster giant axon membrane steady state current fluctuations measured under voltage-clamp conditions, considering current potassium component 11 p1987 A70-26006

Countercurrent sandwich type dialyzer for small animals, noting membrane support function and applicability to human use 13 p2360 A70-29950

Electronic simulation of neuron membrane demonstrating nervous impulses generation and propagation behavior 14 p2542 A70-30387

Physical principles of biological membranes - Conference, University of Miami, December 1968 16 p2847 A70-33026

Water structure role in membrane systems, considering phase transitions and thermal anomalies in surface properties 16 p2847 A70-33027

Molecular structural relationship between cellular membranes and photoreceptors in plants and animals 16 p2847 A70-33028

Membrane-like properties of synthetic proteoid microparticle systems, considering catalytic activities, size and ultrastructure 16 p2847 A70-33029

Tympanic membrane and rectal temperatures compared over wide range of ambient environments as indicators of deep body temperature 17 p3029 A70-35332

Thermodynamic effects and transport phenomena in discontinuous system of gas filled containers connected by membrane, deriving entropy production and diffusion flux in membrane 17 p3197 A70-35531

Limit surface behavior equations for structural membrane elements in terms of number, orientation and limit load of constituent fibers by limit theorems 21 p3934 A70-40778

Fluorescent probes inserted into biological membranes for molecular structural and dynamic facets 24 p4304 A70-46231

MEMORY

Neurons tracing activity and cellular memory mechanisms in cortical projection region of cutaneous analyzer of immobilized rats following electric acoustic stimuli 01 p0030 A70-11468

Long term memory effects in visual perception of apparent movement, discussing experience prior to tests 02 p0239 A70-12622

Image memory in Papio hamadryas monkeys reacting to visual and flavor food stimuli 04 p0632 A70-15219

Retroactive interference stimuli effects on pitch discrimination in short term recognition memory task 07 p1215 A70-20046

Hypoxia effect on retrograde amnesia /recent memory loss/ in albino rats subjected to shock and decompression treatments 08 p1441 A70-20477

Verbal information recall latencies as function of time interval from initial memory storage and retrieval repetitions 10 p1818 A70-24718

Short-time memory test based on model involving continuous information storage and reproduction [DFVLR-SONDDR-30] 12 p1715 A70-27027

Memory mechanisms of brain, discussing molecular physiology, information storage in living systems 12 p1668 A70-27278

Dynamic interaction between stored and active memory images in apes and monkeys with conditioned alimentary motor reflexes stimulated by visual signals 12 p1713 A70-28352

He-Ne laser memory, discussing induced oscillation excitation with radiation fed back to resonator by moving reflecting mirror 13 p2429 A70-29572

Three phase code transformation task for human subjects, determining memory aid role in problem solving phase from factor analysis 13 p2361 A70-30019

Altitude hypoxia adaptation effects on brain protein and RNA synthesis in rats, noting increase in memory resistance to environmental stress effects 17 p3030 A70-35359

Psychophysiological tests involving programmed memory device evaluating human memorization process and sensorimotor reactions to light signals 17 p3040 A70-35676

Human memory information structure, discussing pattern recognition, simultaneous attention, problem solving and logic 19 p3363 A70-38322

Alcohol effects on human short term memory, discussing pathological intoxication from flying safety viewpoint 24 p4307 A70-45345

Neurophysiology of membrane and synaptic mechanisms of prolonged trace changes in neuron activity concerning memory and cellular learning analogs 24 p4305 A70-46393

MEMORY STORAGE UNITS

U COMPUTER STORAGE DEVICES

MENISCI

Meniscus curvature correlation to viscosity contrast in capillary during fluid displacement 13 p2390 A70-29633

MENTAL HEALTH

Cardiovascular system, neuromuscular activity and mental fitness of subjects performing physical and mental assignments with prescribed work-rest schedule during confinement 03 p0425 A70-13895

Fatigue and aircraft environment effects on physical and mental state of airline flight attendants during prolonged cruises
15 p2692 A70-32211

MENTAL PERFORMANCE

Digital computer display techniques relationship with man in modern environment, considering human engineering and educational problems and future impact on intellectual qualities
01 p0221 A70-11281

Man machine systems - IEEE/ERS Conference, Cambridge, England, September 1969, Volume 3, Decision making and mental work load
02 p0244 A70-12137

Task interference model for interference among two or more continuous manual control tasks, suggesting metric for pilot mental work load
02 p0244 A70-12139

Task loading of human operator in terms of central capacity sharing model, discussing model implications for mental workload measurements
02 p0245 A70-12142

Experienced and naive subject evaluation of probabilistic data, data source determination and prediction of subsequent data in complex decision task
02 p0247 A70-12379

Recall and recognition memory in concept identification, discussing presentation time /PT/
03 p0424 A70-13767

Relative slant judgments elicited by paired comparison methods from subjects viewing computer generated slides representing rotated regular dot patterns
03 p0435 A70-13769

Cortical cells fatigue and performance in subjects doing mental work, using motion picture signal perception method
04 p0639 A70-15509

Survival psychology for civil aviation, discussing irrational behavior after forced landings resulting from exhaustion of mental resources and inappropriate activity
07 p1204 A70-19018

Aircraft pilots psychic and flight stress admissible degree not resulting in hazardous consequences, suggesting measures to increase resistance
09 p1625 A70-23006

Environmental thermal stress effect on human performance under high mental and low physical workload
10 p1812 A70-24505

Psychic functions stability during prolonged hypodynamia, discussing memory, attention span, sensometer reactions, time estimating, etc
10 p1816 A70-24685

Short-time memory test based on model involving continuous information storage and reproduction [DFVLR-SONDDR-30]
12 p2175 A70-27027

Pilot training applicant test profiles, discussing difference between intelligent and intellectual candidates
12 p2176 A70-27028

Mental blocking/incidental long reaction times/ during continuous serial performance using perceptual-selection and response theories
12 p2178 A70-27045

Flying qualities application to automobiles, discussing work load with respect to controllability and pilot behavior
13 p2347 A70-29142

Acceleration effects on mental working capacity of fighter pilots, discussing attention shift and stability, operational memory, sensorimotor reactions
13 p2351 A70-29337

Three phase code transformation task for human subjects, determining memory aid role in problem solving phase from factor analysis
13 p2361 A70-30019

Rheoencephalographic recording of healthy persons during rest and mental tension in expectation of stimulus
18 p3222 A70-37219

Decreased mental and physical performance of human beings due to T-oral and placebo vaccine reactions
19 p3359 A70-37389

Soviet monograph on secondary signaling system role in development of speech, thought, conditioned and unconditioned reflexes, human will and hypnosis, noting salivary gland function
19 p3359 A70-37407

Psychological tests for ability to learn association between event and occurrence probability
19 p3363 A70-38319

Mental performance changes due to extended exposure of man to sensory deprivation environment, discussing prevention and treatment methods
21 p3770 A70-41479

Human mental stress evaluation through chemical analysis of 17-hydrocorticosteroid level in parotid fluid
24 p4308 A70-45509

MERCURY [METAL]

NT MERCURY VAPOR

Static pressure distributions and velocity profiles for Hg flow through circular pipes in transverse magnetic field, studying laminar and turbulent flows
04 p0728 A70-15001

Co and Fe base alloys corrosion in Hg tested in reflux capsules and forced flow loops
04 p0710 A70-15631

External convective heat transfer coefficients from quartz-coated cylindrical hot film anemometer probes in mercury
08 p1599 A70-21582

MHD pressure head variations in Hg flow in square channel with conducting and insulating walls under transverse magnetic field
13 p2465 A70-29838

Magnetometer design based on Hg isotopes optical pumping, discussing sensitivity improvement
13 p2414 A70-30037

Spilled Hg removal from metal surfaces, describing brush technique based on capillary action
15 p2748 A70-32775

Mercury cadmium telluride photodetectors, analyzing gain, signal current and radiation limits
16 p2905 A70-33153

Liquid mercury /LM/ cathode thruster characteristics, power conditioning and control requirements [AIAA PAPER 70-646]
16 p2965 A70-33536

Submillipound mercury electron bombardment ion thruster efficiency, noting cathode pole piece, baffle position and geometry influence on ion chamber performance
16 p2969 A70-33612

Convective diffusion and liquid velocity in Co and Fe based alloys corrosion in Hg at high temperature, using reflux capsules and forced flow loops
16 p2933 A70-34207

Dynamic behavior of eccentric annular mercury nutation damper, using variational principle of least viscous frictional power loss
17 p3023 A70-34770

Ce atom collision with excited Hg atom, measuring ionization cross section
18 p3292 A70-36154

Current and resistance in Hg filled space between two circular electrodes under strong magnetic field, using boundary layer techniques
19 p3477 A70-37578

Single crystalline mercury elastic constants calculated from propagation velocity measurements of polarized sound waves
19 p3486 A70-37770

Critical components effect on small Hg electron bombardment thruster performance, considering glass coated accelerator grids, hollow cathodes and plasma bridge neutralizers
20 p3692 A70-40238

Parameters influence on mercury hollow cathode neutralizers for Kaufman ion thruster [AIAA PAPER 70-1090]
20 p3693 A70-40245

Transient and steady state free convection heat transfer with mercury in vertical rectangular channel, measuring temperature distributions
21 p3941 A70-40773

Low specific impulse hollow cathode mercury thruster for deep space electric propulsion, using SERT 2 configuration [AIAA PAPER 70-1099]
21 p3866 A70-40893

Space compatible flight prototype ion engine power conditioning system design for Hg thruster using oxide cathode
21 p3867 A70-41006

Mercury as stainless steel heat pipe working fluid, determining wetting characteristics and heat transfer capability
21 p3947 A70-41051

Liquid metal /mercury/ cathode thruster system for operation at reduced beam voltages, discussing design and performance [AIAA PAPER 70-1103]
21 p3868 A70-41788

Thermoanemometric velocity measurements in non-stationary MHD Hg flows by insulated Pt sensors
21 p3831 A70-42229

Spectroscopic features of mercury laser associated with electron energy levels and spontaneous emission line structure, giving excitation and disruption mechanisms
23 p4202 A70-45054

MERCURY [PLANET]

Internal structure models of Mercury, Mars and Venus based on radar measurements of radius and mass, discussing two and three zone models [JPL-TR-32-1439]
01 p0176 A70-10315

Mercury atmospheric models for preliminary environmental criteria to be used in spacecraft design and engineering tradeoff studies [AIAA PAPER 69-54]
01 p0183 A70-10838

Planetary information obtained from radar installations, discussing distance and orbit measurements, rotation periods, planetary surfaces, emphasizing Mercury and Venus
01 p0185 A70-11046

Mercury flyby mission feasibility study for ESRO considering payload, picture transmitting TV system, orbits, etc [DGLR-69-12]
04 p0754 A70-15157

Mercury shape estimated with isostatic form of equilibrium controlled by situation near perihelion passage at 3-2 resonance spin rate, discussing solidification thermal effects
05 p0908 A70-16332

Radiative heat transfer in lunar and Mercurian surfaces, discussing radiative heat transfer in powders
08 p1579 A70-21569

Wind and atmospheric temperature variations on Mars, Venus and Mercury interpreted from observational data in terms of earth atmospheric processes
09 p1762 A70-23127

Mercury flyby mission feasibility study for ESRO considering payload, picture transmitting TV system, orbits, etc
09 p1763 A70-23426

Solar charge effects on Mercury perihelion motion, relativistic light deflection and gravitational red shift, using Reissner-Nordstrom solution
11 p2107 A70-25395

Mercury surface features from spectrograms of depolarized radar echoes
12 p2298 A70-27268

Thermal tidal friction and gravitation effects on Mercury libration after solidification, noting equilibrium with orbital and rotational periods locked in 3/2 resonant state
14 p2638 A70-30701

Mercury rotational angular velocity fluctuation in terms of orbital mean motion at different orbit positions
14 p2639 A70-30708

Venus and Mercury radio and radar studies concerning brightness temperature, surface reflectivity and planetary motion
14 p2647 A70-31074

Mercury disk temperature at 3.75 cm wavelength, showing variation with phase angle and hemographic longitude
14 p2647 A70-31075

Mercury mm wave observations, examining longitude dependence of disk average brightness temperature and epilith thermal parameters range
14 p2647 A70-31076

Venus and Mercury surface height variations near equators, using radar time delay and Doppler observations
14 p2647 A70-31077

Unmanned flyby missions to Mercury in 1973-1990, discussing scientific objectives and payloads [AAS PAPER 70-027]
17 p3155 A70-34798

Mercury disk temperature from microwave spectrum analysis, proposing subsurface greenhouse effect
17 p3157 A70-34838

Planet Mercury transit on photographs, noting role as test for terrestrial time systems
18 p3314 A70-36515

Mercury drawings from refractor observations during 1964-1967
18 p3315 A70-36611

Mercury transit across sun on 9 May 1970, discussing observation, equipment and photographs
18 p3319 A70-37050

Mercury photometric measurement, examining surface brightness for photometric function
18 p3319 A70-37052

Planet Mercury knowledge summary, discussing orbit, diameter, mass, density, rotation, surface features, atmosphere, polarization, albedo and color
19 p3515 A70-37930

Mission planning for 1973 Mariner Venus/Mercury flyby, discussing trajectory and navigation aspects [AIAA PAPER 70-1049]
19 p3528 A70-38864

MERCURY ARCS

Langmuir probe position-dependent ion flow effects on plasma density measurement in low pressure mercury discharge
17 p3083 A70-34995

Electron bombardment Hg thruster with divergent magnetic fields, investigating performance dependence on configuration and propellant utilizations [AIAA PAPER 70-1092]
20 p3692 A70-40243

Mercury electron bombardment thruster, measuring effect of geometry and magnetic field inside pole piece region on discharge losses and propulsion efficiency [AIAA PAPER 70-1088]
20 p3693 A70-40247

Low pressure Hg vapor arc with remote wall, investigating magnetic self striction by ambipolar diffusion in fields
20 p3685 A70-40503

MERCURY COMPOUNDS

NT MERCURY TELLURIDES

Geochemistry of venus volatile elements identifying cloud forming species as Hg compounds
14 p2650 A70-31217

MERCURY LAMPS

Mercury arc injection lamp as radiation source for testing sunlight biological effects
10 p1888 A70-24388

- Optical parametric noise from barium sodium niobate crystal pumped at 4358 Å by compact source mercury lamp 22 p4074 A70-43022
- MERCURY PROJECT**
Radiation data from manned orbital Mercury missions, correlating measurements from various additional sensors with main nuclear emulsion sensors 06 p1134 A70-17267
- MERCURY SPACECRAFT**
Astronauts celestial training, using Mercury capsule simulator and Zeiss planetarium projector for flight simulation 08 p1481 A70-21275
Power conditioning and control system prototype for Mercury spacecraft ion thruster, describing supply subsystems, circuit design, component selection and reliability [AIAA PAPER 70-649] 16 p2970 A70-33615
Space shuttle electronics requirements, considering systems in Mercury and Gemini spacecraft and Apollo lunar and command service modules 23 p4259 A70-44612
- MERCURY TELLURIDES**
Mercury cadmium telluride alloy as photoconductive IR detector material noting properties, composition and temperature dependence of energy gap 03 p0543 A70-14196
- MERCURY VAPOR**
Mercury plasma flow rate change effect on electron temperature and density in thermoelectric converter determined by spectroscopy 05 p0887 A70-16028
Secondary frequency standard obtained for Hg laser operating at microwave frequencies 05 p0859 A70-16271
Heavy negative charges formation in ionized Hg vapor by electron capture, basing demonstration on magnetic field effects on free electrons or charged droplets 08 p1550 A70-20594
Hollow cathode mercury electron bombardment thruster design, emphasizing low specific impulse operation and discharge chamber improvements 13 p2473 A70-28505
Small-orifice hollow cathode discharge properties in electron bombardment ion thrusters, using vaporized mercury propellant [AIAA PAPER 70-1087] 20 p3693 A70-40248
Microwave characteristics in plasma of short discharges in low pressure cesium and mercury vapors, noting spectral and spatial distribution of microwave power and intensities 22 p4083 A70-43392
Hg vapor thermal conductivity at various temperatures, using fine wire frequency response and kinetic theory 23 p4281 A70-44428
- MERIDIANS**
U LATITUDE
U LONGITUDE
- MERIDIONAL FLOW**
Star rotation and meridional circulation hydrodynamic theory, considering magnetic fields and internal friction 03 p0564 A70-13228
Linearized steady state hydrodynamic equations describing solar wind meridional motions used for studying zonal pressure perturbations 03 p0558 A70-13599
Tropospheric circulation transformation from meridional to zonal forms due to macrostructure activity of solar wind, considering magnetosphere perturbations 03 p0559 A70-13757
Spatial variations in zonal and meridional components of stratospheric and mesospheric winds traced over horizontal distances by Arcas ROBIN rockets 07 p1274 A70-20275
Star rotation and meridional circulation hydrodynamic theory, considering magnetic fields and internal friction 08 p1580 A70-21661
Interhemispheric mass exchange as function of eddy transfer and meridional circulation 08 p1539 A70-21922
Seasonal variation of vertical profiles of atmospheric radioactivity concentration between stratosphere and troposphere due to meridional zonal wind distribution caused by eddy diffusion 08 p1539 A70-21923
Swirling and meridional flow induced by steady rotation of gravitating sphere in compressible monatomic gas, considering compressibility effects and surface layer [ASTME PAPER MR-69-714] 11 p1978 A70-26690
Auroral absorption bays meridional motion, observing absorption onset systematic lag at various ground stations 14 p2570 A70-30216
Annual variations of monthly mean meridional circulation, discussing observations, zonal asymmetries, accuracy and transports of angular momentum and energy 16 p2945 A70-33249
Meridional circulation velocities in Roche envelope of uniformly rotating star, using nonlocal equation for radiative heat transfer 17 p3171 A70-35560
Meridional transport of angular momentum in various wavenumber-frequency domains, discussing linear and nonlinear contributions 19 p3462 A70-38258
Meridional mean eddy transport of enthalpy in Southern Hemisphere during IGY, comparing results with Northern Hemisphere 20 p3661 A70-39143
Differential rotation at solar surface caused by anisotropic turbulent viscosity in hydrogen convection zone, solving via Navier-Stokes equation 20 p3711 A70-40404
Synoptic surface and upper air analysis and APT mosaics of meridional circulation over Mediterranean by remote satellite images 21 p3846 A70-41399
Auroral absorption bays meridional motion, observing absorption onset systematic lag at various ground stations 24 p4331 A70-46291
- MEROMORPHIC FUNCTIONS**
NT ELLIPTIC FUNCTIONS
NT RATIONAL FUNCTIONS
Linear structures response to pressure fields of deterministic excitation with input function spectra as meromorphic functions of wave number and frequency 01 p0208 A70-11191
- MESH**
Heat transfer coefficients for mesh simulating porous parachute cloth, measuring Nusselt number as function of sonic Reynolds number 01 p0004 A70-10292
Bird deflection grill device for turboprop engine inlet ducts, noting effects on inlet flow characteristics, engine performance, etc 01 p0165 A70-10688
- MESON RESONANCES**
Interacting meson systems effective masses with/without secondary proton measured, detecting heavy boson resonances and fireballs, considering proton nuclear interactions 03 p0472 A70-13031
- MESON-NUCLEON INTERACTIONS**
Thermodynamic potential of meson-nucleon plasma, showing variation of Landau equation of state in hydrodynamic theory of multiple particle production 03 p0527 A70-13052
- MESONS**
NT MESON RESONANCES
Cosmic rays meson component recording by proportional counters designed for use in large telescopes 05 p0846 A70-15939
Intensity variations of cosmic ray neutrons and mesons analyzed to isolate lunar day period 07 p1368 A70-20033
Automatic system for processing data from underground meson telescopes 07 p1238 A70-20347
Interplanetary cosmic ray positrons energy spectral component with origin different from interstellar mesons decay 19 p3502 A70-38098
Automatic cosmic ray station for recording nucleon and meson components 20 p3629 A70-39314
- MESOPAUSE**
Rocket-borne sampler for collecting noctilucent cloud particles in mesopause, describing collection and analysis methods and protection against tropospheric contamination 07 p1273 A70-20266
Noctilucent clouds in mesopause over North America, discussing ground stations network, intensity variations, structure and time distribution 07 p1273 A70-20267
Nonlinear diurnal tide and gravity wave interactions at meteor heights below mesopause 14 p2579 A70-31251
- MESOSPHERE**
Upper atmosphere-lower atmosphere interactions, middle atmospheric physics and dynamics and mesospheric seasonal and large scale zonal and meridional behavior 01 p0073 A70-10581
Wind oscillations in stratosphere, lower mesosphere and meteor heights noting periodicities 01 p0074 A70-10591
Satellite and rocket probe measurements of water vapor in mesosphere 01 p0082 A70-11510
Global satellite VLF propagation system for investigating mesospheric ionization 03 p0475 A70-13827
- Clear air turbulence and mesoscale structure subsynoptic air motion experiments for numerical weather prediction 04 p0714 A70-14394
Altitude variation of mesospheric daytime sky brightness from earth based measurements of twilight sky brightness, noting inconsistency in calculations based on standard atmospheres 06 p1053 A70-17207
Photochemical calculations on mesospheric ozone for oxygen only, oxygen-hydrogen and oxygen-hydrogen-nitrogen atmospheres 07 p1273 A70-20268
Vertical eddy diffusion effect on chemical composition of mesosphere and lower thermosphere using photochemical model containing oxygen and hydrogen 07 p1274 A70-20269
Stratospheric and mesospheric circulation during winter, investigating wind fluctuations using meteorological rocket observations 07 p1274 A70-20274
Spatial variations in zonal and meridional components of stratospheric and mesospheric winds traced over horizontal distances by Arcas ROBIN rockets 07 p1274 A70-20275
Thermal structure transition of mesosphere at high altitudes from persistent summertime to dynamic wintertime case 08 p1539 A70-21649
Stratosphere-mesosphere coupling phenomena during sudden stratospheric warmings, considering ozone and ionospheric drift measurements 10 p1913 A70-24948
Mesospheric daytime/nighttime ozone abundance vertical profile diurnal variations 14 p2568 A70-30130
Upper stratosphere-mesosphere monthly-mean charts from reentry heating and atmospheric model based on hydrodynamics 14 p2608 A70-30590
Statistical mesosphere temperature, density and wind profiles models based on rocket soundings 14 p2608 A70-30593
Strong wind and vertical wind shear in upper stratosphere and mesosphere 14 p2608 A70-30594
Stratospheric and mesospheric ozone diurnal variation by rocket-borne ozonesonde in January 1968 14 p2577 A70-31170
Mesospheric levels wind oscillations in Spanish range of Arenosillo measured by meteorological rockets during February 1970 15 p2723 A70-31653
Vertical temperature profiles and global circulation patterns in stratosphere and mesosphere, discussing Northern Hemispheric seasonal, latitudinal and longitudinal variations 15 p2724 A70-31665
Upper stratosphere and mesosphere structure and circulation in Southern Hemisphere, using meteorological rockets and radiosonde data 15 p2724 A70-31683
Numerical model of diurnal variations of minor neutral constituents in mesosphere and lower atmosphere including molecular and eddy diffusion 15 p2727 A70-31909
Lidar probing of stratosphere and mesosphere using automatic data acquisition system 16 p2862 A70-33016
Weak ion concentration in stratosphere and mesosphere measured using accumulated capacity amplifier 18 p3257 A70-36179
Charged particle balance equations for stratosphere and mesosphere, noting particle composition investigation and formation and annihilation processes 19 p3491 A70-37311
Thermosphere, stratosphere and mesosphere reactions involving water, hydrogen, methane, ozone, nitric oxide and nitrogen peroxide 22 p4023 A70-43298
Noctilucent clouds blue color and rocket sounding results explained by ozone model of mesospheric clouds formation 23 p4188 A70-44048
- MESSAGES**
Message switching techniques in digital telecommunication networks, discussing automatic routing, operational and control facilities, etc 02 p0256 A70-11973
- METABOLIC WASTES**
NT FECES
NT HUMAN WASTES
NT URINE
Barometric pressure reduction effect on gaseous and volatile metabolic products elimination in men wearing oxygen-supplied rubberized suits 17 p3038 A70-33363
Heme catabolism in untreated rats and in animals treated with phenobarbital or porphyrogenic drug, comparing bilirubin and Co production 20 p3583 A70-40450
Vapor biowaste electric spacecraft propulsion system, discussing recovery cycles and subsystem

tradeoffs, specific impulse, chamber heating, power input and reaction products 21 p3866 A70-40869

Biological compatibility problem in long duration space operation crew change, discussing human metabolic processes and difference effects 22 p3980 A70-43641

METABOLISM

NT ADRENAL METABOLISM
NT CALCIUM METABOLISM
NT CARBOHYDRATE METABOLISM
NT CATABOLISM
NT ELECTROLYTE METABOLISM
NT ENZYME ACTIVITY
NT FERMENTATION
NT HORMONE METABOLISMS
NT HYPOGLYCEMIA
NT LIPID METABOLISM
NT OXYGEN METABOLISM
NT PROTEIN METABOLISM

Metabolism and biological activity of urea, citrulline, arginosuccinic acid in organism ornithine cycle, discussing role in brain and liver 01 p0019 A70-10513

Assimilation and metabolism of C atoms of pyruvate and acetate by strict autotrophs *Thiobacillus* cell, using radioactive substrates 01 p0021 A70-10788

Rats decreased muscular work and denervation effects on alpha-aminoisobutyric acid uptake by skeletal muscle 02 p0232 A70-11712

Prolonged dehydrated food diet effect on metabolism of humans, noting complete adaptation after three or four months 04 p0630 A70-14577

Hyperbaric oxygenation effects on metabolism, comparing protective agents for rats exposed to 5 absolute oxygen pressures 04 p0631 A70-14681

Myocardial metabolism in ischemic heart disease using arterial and coronary sinus catheterization 04 p0636 A70-15469

Temperature variations in organs of man and animals performing physical work as physiological base of metabolic processes and for daily activity timetable development 04 p0638 A70-15502

Human exhaled air contaminants analysis role in disease diagnosis, metabolism study and spacecraft cabin atmosphere changes 07 p1220 A70-19514

Human metabolic study showing effect of yeast RNA and allopurinol on serum and urinary uric acid formation 08 p1454 A70-20679

Thymidine tracer distribution in bone marrow chromosomes of rats and mice treated with radioprotectors, noting cell metabolic activity reduction by sulfhydryl-type radioprotectors 09 p1619 A70-22818

Brain cerebral tissues electrical impedance measurement by electrodes and bridge circuit, discussing chemical and metabolic properties 09 p1620 A70-22897

Metabolic and heart rates determined in experienced and inexperienced pilots during Hiller 12-E and 12-EL helicopters flight through standard maneuvers 09 p1627 A70-23455

Organic substrates effects on *Hydrogenomonas eutropha* autotrophic and heterotrophic metabolism 10 p1817 A70-24700

Physiology of hibernation and hypothermia, noting potential use for metabolic need reduction during long interplanetary flight 10 p1943 A70-24757

Human exhaled air contaminants analysis role in disease diagnosis, metabolism study and spacecraft cabin atmosphere changes 11 p1991 A70-26113

Metabolism in left ventricular myocardium of rabbits after asphyxiations and during postasphyxial recovery 12 p2168 A70-27624

Canoe paddlers physical training effect on cardiac output and local blood flow and metabolism at and during exercise and recovery 12 p2169 A70-27653

Mg ion metabolism in neuromuscular excitability maintenance, discussing quantity requirements, detection and electromyographic recording 12 p2172 A70-28045

Energy consumption in male subjects during walking and running in erect and supine position under simulated gravity 13 p2351 A70-29335

Epinephrine uptake and metabolic disposition in rat brain, determining pathways and turnover of endogenous brain hormone and enzymatic synthesis 14 p2536 A70-30348

Biological satellite experiment, considering long term weightlessness effects on metabolism and biological rhythms of medical leech 16 p2854 A70-33993

Plasma free fatty acids and glucose relative role in contribution to metabolic state and energy production in partially hepatectomized rats 16 p2850 A70-34319

Ergonomic and medicomilitary aspects of human adaptation to cold environments, discussing metabolic and physical protective reactions, clothing and personnel selection 16 p2850 A70-34346

Human water-salt metabolism following exposure to transverse accelerations, discussing diuresis and Cl-K excretion 17 p3038 A70-35364

Adaptive recession of gas metabolism in rats during multiple high temperature exposures 18 p3220 A70-36545

Low ambient temperature exposure effect on hamster intestinal absorption capacity, using glucose test compound 19 p3360 A70-37772

Tyrosine content and utilization in mouse liver, showing daily rhythm in composite metabolism rate 20 p3568 A70-38976

Atmospheric composition cyclic changes effects on human basal metabolism under hypokinesia 20 p3576 A70-40197

Lateral and angular acceleration effects on blood and urine contents in specific metabolic indices of healthy young men 22 p3971 A70-43136

Water and salt metabolism changes during prolonged hypokinesia of rabbits, noting blood plasma dilution, hematocrit number and hemoglobin concentration reduction, etc 23 p4146 A70-44656

Biological life support system based on mutual equilibration of human metabolism and technically controlled algae culture, discussing experimental evaluation 23 p4156 A70-45026

Vascular smooth muscle contraction regulation, discussing contractile protein, energy metabolism, excitation-contraction coupling, spontaneous rhythmicity, response to stimulants, etc 24 p4299 A70-45807

METAGALAXY

U UNIVERSE

METAL AIR BATTERIES

Refuelable Mg-air battery anode, electrolyte and packaging materials selection from standpoint of cell voltage, metal consumption and sludge formation 02 p0253 A70-12721

Mechanically rechargeable zinc-air battery, discussing electrical performance, advantages and military applications 12 p2167 A70-27928

Third electrode use in charging secondary zinc air battery, presenting performance data and operation problems 14 p2533 A70-30527

METAL ALLOYS

U ALLOYS

METAL BONDING

NT METAL-METAL BONDING
Metal fabrication shop environment contamination effect on bond strength of various adhesive system tested by humidity and salt spraying exposures 02 p0310 A70-12664

Modified explosive bonding process for welding wire reinforced Al composite materials 03 p0497 A70-13120

Bond quality and strength of high temperature adhesive films for titanium 04 p0699 A70-15158

Inertia bonded and electron beam welded joints of Waspaloy compared for suitability in aircraft gas turbine engines 04 p0700 A70-15655

Joint design for braze bonding and joining of Al-B composites using Borsic tape backed with alloy brazing foil 07 p1293 A70-18994

Collection of papers on metal bonding including technology, principles, testing, behavior calculations and applications 08 p1502 A70-20877

Metal surface adhesion to materials, examining structure and energy with allowance for environmental effect 08 p1503 A70-20878

Organic adhesives preparation and application to metal surface for bonding, examining time, pressure and temperature effects on curing 08 p1503 A70-20881

Adhesive metal bonding, considering methods for application of pressure and heat 08 p1503 A70-20882

Ceramic adhesives with glassy matrix for metal bonding, describing chemical reactions in interface, adhesive processing and application 08 p1526 A70-20883

Metal adhesive joints nondestructive tests involving acoustic and supersonic, X ray and heat flow characteristics methods 08 p1503 A70-20885

Bonds strength involving metallic, organic and ceramic adhesives at various temperatures, considering metallic additives effect 08 p1504 A70-20891

Composite materials application to structural members, considering bond or adhesive shear strength 08 p1594 A70-21855

Adhesive bonding of aircraft components, describing autoclave environmental control for curing adhesives, parts prefritting, core fitting and quality control 09 p1690 A70-22022

Titanium and titanium alloys bonding, discussing pretreatment, adhesives and assessment of temperature, environment and nuclear radiations 09 p1704 A70-22750

Adhesive bonding for structural efficiency, lower weight, reduced production costs and improved appearance in general aviation industry [SAE PAPER 700221] 11 p2134 A70-25893

Collection of papers on diffusion processes in metals covering welded joints layers, radiation effects, radioactivity, nickel grain growth 11 p2067 A70-26593

Ultrasonic Al wire bonding for microelectronic applications, discussing tensile strength dependence on machine parameters and aging 15 p2747 A70-32647

Solid state diffusion bonding applied to rocket engine injectors manufacture [AIAA PAPER 70-639] 16 p2968 A70-33597

Ti explosive bonding and forming, examining peel and shear strengths on Ti clad steel plate 17 p3098 A70-34446

Metal bonding at low temperatures, studying atmosphere and metal plating effects 18 p3265 A70-37203

Nondestructive testing of diffusion bonded metals for quality assurance 19 p3437 A70-38423

Adhesive bonded aircraft structures, discussing methods and requirements for establishment and control of manufacturing procedures 19 p3438 A70-38594

Explosive metal bonding in electronics, noting explosive strength and initial surface angle effects on bond physical and chemical properties 19 p3438 A70-38752

Book on adhesives for metals covering cleanliness, surface treatment, joint designs, sealants, etc 20 p3652 A70-39194

Optimum conditions and methods for vacuum diffusion welding of heat resistant alloys, removing thermodynamically stable surface oxide films by gaseous reaction products 20 p3636 A70-39197

Synthetic resin adhesives for aircraft components fabrication 20 p3657 A70-40532

Ultrahigh vacuum metal bonding by twist compression technique, reporting adhesion and friction coefficients for atomically ordered Pt-Co alloy 21 p3833 A70-41465

Welding electron beams metal penetration dependence on ionization phenomena, discussing model based on self focusing 22 p4043 A70-42379

Nondestructive testing of adhesively bonded metal assemblies 22 p4047 A70-43523

Holographic nondestructive testing of laminate structures, honeycomb-sandwich panels and rubber-to-metal bonds 24 p4338 A70-45755

Airframe skin panels adhesive bonding in wide-bodied jet transports, emphasizing fuselage fatigue and corrosion resistance [SAE PAPER 700863] 24 p4349 A70-45875

METAL CARBIDES

U CARBIDES

METAL COATINGS

NT ALUMINUM COATINGS
NT GOLD COATINGS
NT NICKEL COATINGS
NT ZINC COATINGS

Aluminum oxide whiskers/metal matrix composites, discussing metallic coatings effects on filament wetting, bonding and surface protection 01 p0117 A70-10480

Bridging joints resistance effect on thermoelement efficiency, describing W and Co coatings deposition on GeTe based thermoelectric alloys 01 p0159 A70-10757

Molten bridging alloy deposition on p and n type thermoelectric materials, utilizing diffusion process brief duration during contact 01 p0009 A70-10758

Vacuum deposition of Cr-Al film on Ni-Mo alloys, describing operating pressure, temperature and film thickness 01 p0124 A70-11617

Mo coated with Ni-base Nimonic and Co-base heat resistant alloys, for working degree effect on creep rupture strength 01 p0126 A70-11646

Co-base hardfacing alloys mechanical properties and applications, discussing mechanical and chemical wear processes in cast and wrought types
02 p0319 A70-12712

Cr diffusion coating influence on fatigue life of Fe and steel, discussing residual stress measurement technique
02 p0320 A70-12848

Ceramic, cermet and metallic high temperature coatings development and applications, discussing time and cost saving procedures
[SAE PAPER 690478] 03 p0515 A70-13267

Diffusion layer and protective oxide composition changed to increase chrome plated Mo heat resistance
06 p1089 A70-17742

Temperature and pressure effects as function of time in spectral and total normal emittance of metal coated refractory metals
[ALAA PAPER 70-68] 06 p1092 A70-18136

High chromium stainless steels nitriding and carburizing processes stabilized by nickel galvanic coating, enhancing nitrogen or carbon diffusion into steel
07 p1291 A70-18832

Compatibility of single metal coated carbon fibers, discussing structural recrystallization in contact with Ni or Co matrix by dissociation/ diffusion/precipitation mechanism
07 p1315 A70-20048

AlN deposition rate from gaseous phase on Mo substrate as function of temperature
07 p1357 A70-20311

Performance characteristics of low density epoxy-water emulsion corrosion resistant coating for nonferrous alloys
08 p1526 A70-20648

Nondestructive tests for diffusion-formed refractory alloy coatings used as oxidation protection for hypervelocity spacecraft and reusable systems
09 p1692 A70-22679

Sputtering method used for applying metallizing layer to ceramics in producing ceramic to metal seals
10 p1895 A70-24555

Axial flow compressor clearance control coatings at blade tip paths for efficiency
[SAE PAPER 700330] 12 p2291 A70-27462

Corrosion resistance of molybdenum coatings on steel and Pb-Bi eutectic alloy obtained by vacuum contact fusion method
12 p2258 A70-28320

Residual gas effects on critical load and brittleness of pure and molybdenum-coated niobium bars after annealing in vacuum
12 p2258 A70-28324

Heat energy transport mechanism in metallic plasma deposited coating, investigating role of elastic crystal lattice vibrations, electrons, molecules, etc
13 p2419 A70-28858

Diamond burnishing effects on wear and contact endurance of chromium coatings, investigating surface hardening and residual stresses
13 p2419 A70-28868

Structure and chemical composition of high Cr diffusion coating on Cr-Ni austenitic steels
15 p2756 A70-31634

Wear and fatigue of Ti-Mo-Al-Sn-Si /Hylite 50/ alloy with resistant Mo or Cr coatings
17 p3099 A70-34447

Fractography of fatigue and delayed fracture of hydrogenated, unplated and Cd-plated ultrahigh strength steel
17 p3124 A70-34654

Two-component metal coatings on Ni alloys for gaseous corrosion resistance increase, comparing microstructure and properties
17 p3125 A70-35393

Metallic surfaces vacuum electric spark alloying, investigating pressure effects on coating layer thickness and area
20 p3636 A70-39195

Optical multilayer metal coatings vacuum deposition by cathode sputtering, using automatic apparatus
22 p4045 A70-42510

Thermochemical method for directional crystallization of wear-resistant alloy coatings on machine parts
23 p4205 A70-44043

CW GaAs semiconductor laser fabrication by liquid epitaxy, noting Ag plating role in output power
24 p4352 A70-45468

Diffusive carbon redistribution in Mo during interaction with Ni and Cr protective coatings
24 p4364 A70-46334

High temperature coatings of high melting point alloys on graphite, determining optimum fabrication conditions
24 p4368 A70-46339

Surface alloying of alloy with three elements /Al, Si and Cr or Zr/, investigating coating stability in weight, microstructure and microhardness
24 p4364 A70-46340

Heat resistant alloys with metal coatings applied by diffusion in vacuum, investigating structure and fatigue strength at high temperatures
24 p4364 A70-46342

METAL COMBUSTION

Combustion time of Al powder, considering concentration, injection into gas flow, oxidizer composition and agglomeration
01 p0161 A70-11015

Mg vapor and oxygen surface reactions in MgO deposits, using atomic absorption spectrophotometry
02 p0250 A70-12006

BeO whiskers formation on burning Be droplets surface using scanning electron microscopy, noting temperature effects
02 p0318 A70-12641

Metal particle and wire combustion using static and flow methods, obtaining experimental results for Al, Be, Mg and B
[ONERA-TP-735] 03 p0543 A70-13633

Combustion of stationary particle of metal with boiling point lower than ignition temperature in gaseous oxidizing medium
07 p1419 A70-18753

Chemical composition effects on Zr-Ti, Zr-Si, Ni-Al and Ni-Ti alloy aerosols combustion temperature
07 p1419 A70-18755

Metal particle size relation to combustion time using statistical method applied to polydisperse Mg powder
07 p1419 A70-18756

Metal particles additives behavior in solid rocket propellant combustion, using scanning electron microscope
07 p1359 A70-19585

Two body collisions reaction mechanisms with small heats of reaction for Be and Al gaseous oxidation, noting low free energy properties of polymerization
10 p1928 A70-24089

Oxide transport and water vapor effects on flash-heated beryllium droplet combustion
10 p1969 A70-25042

Electron affinity and compound formation in hydrogen/nitrogen/oxygen flames containing potassium and boron using mass spectrometry
10 p1832 A70-25150

Chemical high energy rocket propellants, discussing metal combustion, hybrid and tribrid engines, combustion chambers, etc
11 p2100 A70-26282

Al and B particles combustion in methane-oxygen system, considering reaction zone models, energy release rate, particle kinetics, instabilities, etc
11 p2149 A70-26284

Preignition and combustion kinetics in airstream of Mg and Al suspensions in aviation kerosene and gasoline
14 p2664 A70-30395

Particles shape and phase composition in combustion products of dispersed Al-Mg alloy powders by electron diffraction and X ray analysis
14 p2664 A70-30396

Al and Be single particles combustion in various oxidizers, using pulsed Nd-glass laser and Xe flash heating device and scanning electron microscope
14 p2628 A70-30949

Aluminum spherical particles nonautonomous and autonomous combustion in O with N or Ar initiated by HF induction heating
17 p3145 A70-35042

Aluminum particle combustibility in deflagration zone of ammonium perchlorate pellets, measuring combustion rate and pyrolytic behavior
17 p3145 A70-35208

METAL COMPOUNDS
Isostructural crystals of Dy compounds investigated for magnetic behavior using high resolution photoelectric optical spectroscopy
12 p2261 A70-27243

METAL CORROSION
U CORROSION
METAL CRYSTALS
X ray topography of postannealing substructure of neutron irradiated W and Mo single crystals, indicating increase in disorientation
01 p0115 A70-10065

Al double crystals mechanical properties improvement after shock loading, studying surface and dislocation structures and active slip planes number
01 p0124 A70-11449

Recrystallization diagrams of commercially pure Mo and Mo alloyed with Fe, Co or Fe plus Ni, noting additions effect on recrystallized grain size
01 p0124 A70-11616

Constitutive equations and thermally activated dislocation processes in metals, noting temperature and strain rate relationship
02 p0316 A70-11737

Polycrystalline Ni steady state creep characteristics measurement emphasizing temperature dependence of creep rate
03 p0504 A70-13022

High temperature heat treatment effects on Mo, W, Ta and Re crystal surface order and faceting observed by electron diffraction, noting contamination role
03 p0538 A70-13097

Low energy electron diffraction structures due to Re crystal surface interaction with CO and molecular oxygen at high temperatures
03 p0440 A70-13098

Nonuniformity of dislocation structure and stress distribution in deformation of Cr samples longitudinal sections subjected to upsetting
03 p0511 A70-13488

Vacancies influence on macrodefect nucleus formation in single metal crystals under uniaxial strain explaining Griffith crack initiation
05 p0861 A70-15784

Creep in single crystal and polycrystalline Nb between 1300-1900 C under stresses, showing stress independent activation energy
05 p0862 A70-16202

Specific heat and thermal EMF increase due to radiation damage in lattice of fast neutron bombarded Cu, Mo and W specimens
05 p0863 A70-16292

Structures formed during aging of martensite in maraging steels by X ray and chemical analyses using electrolytic isolation of phases
05 p0865 A70-16871

Structural changes in polycrystalline Al subjected to HF fatigue, using transmission electron microscopy
06 p1084 A70-17127

V and Cr single crystals microhardness anisotropy and causes, noting similarity with W, Nb and silicon ferrite
06 p1088 A70-17613

Radioactive sodium and potassium diffusion in single crystal and polycrystalline Mo and Nb at various temperatures, calculating activation energies and coefficients
06 p1089 A70-17745

Inert gases scattering from Ni /111/ plane as function of beam temperature and angle of incidence compared to Au and Ag
06 p1110 A70-18263

High energy Ar atomic beams scattering from single crystal face of W measured for distribution pattern
06 p1112 A70-18270

Niobium single crystals annealed in ultrahigh vacuum, studying stress-strain behavior, secondary slip geometry and slip line morphology
06 p1090 A70-18493

Electrolyte purity effect on initiation times and growth rate of Zn dendrites in alkaline zincate solution, discussing dendrite initiation retardation
07 p1356 A70-19387

Molybdenum rolling-deformed single crystals recovery and recrystallization using diffraction electron spectroscopy
07 p1307 A70-19550

Soviet collection of articles on single crystals of rare and high melting point metals
07 p1307 A70-19606

Carbides content determination in Mo single crystals by metallographic method, establishing relation between brittle-ductile transition temperature and carbon content
07 p1308 A70-19607

Vanadium single crystals substructure on different planes to growth direction using X ray diffraction
07 p1308 A70-19608

Structure and mechanical properties of Mo single crystals grown from gas phase using metallographic and X ray analysis
07 p1308 A70-19612

Dislocation velocity-stress exponent for Nb single crystals calculated from strain rate sensitivity measurements of effective flow stress
07 p1314 A70-20011

Gruneisen parameter for metal and semiconductor single crystals obtained from measuring one dimensional thermoelastic response during exposure to pulsed electron beam
07 p1357 A70-20020

Thermal accommodation coefficients of Ar atomic beams scattered from nominal plane of Ag crystal measured by time of flight techniques
07 p1343 A70-20125

Yield stress and work hardening properties of tension-deformed vanadium single crystals as function of purity
08 p1522 A70-21750

Subboundary migration in Mo, W and W-Re alloy single crystals subjected to cyclic heating, using metallographic technique involving electrolytic polishing and special etching
09 p1701 A70-22297

Rhenium single crystals basal plane surface properties using LEED and Auger electron spectroscopy, describing gas adsorption studies
09 p1739 A70-22526

Metallic solutions formation dependence on alloying elements electron structure assumed by atoms in solvent lattice
09 p1702 A70-22560

Growth kinetics of gamma prime precipitate in Ni-Ti alloy noting Ti content variation as function of aging
09 p1706 A70-22812

Nb-W single crystal low temperature thermally activated deformation, observing slope change in temperature dependence curves of flow stress and strain rate sensitivity

09 p1708 A70-23572

Optical properties of beta prime phase CoAl, CoGa and NiGa as functions of composition and photon energy

10 p1919 A70-23986

Oxygen sticking coefficients and desorption kinetics on tungsten crystal by step desorption/ reflection technique, postulating formation and decomposition of surface oxide phases

10 p1832 A70-25147

Stability conditions in metal specimens tension tests, considering fcc and bcc metals strain hardening, rate and gradients and temperature dependence

10 p1966 A70-25326

Composition and monoclinic parameters of chromium sulfide mineral breznaita in metal matrix and silicate inclusions of Tucson meteorite using electron microprobe

11 p2110 A70-26004

Anomalous grain growth kinetics and recrystallization in electron beam annealed nickel determined by microstructural and radiographic study, noting annealing time dependence

11 p2068 A70-26596

Plastic properties of materials to elastic limit of pure metal and ionic solid crystals

12 p2283 A70-27055

Polycrystalline W-Re alloy creep tests in tension, investigating dislocation substructure formation as function of stress, temperature and strain

12 p2255 A70-27606

Contaminated Ni crystal /100/ surface photoelectric yield as function of temperature, considering effects of Ar ion bombardment and annealing

12 p2288 A70-27680

Sintering processes using boundary porosity in welded Nb bicrystal for model of final stages

13 p2434 A70-29081

Irreversible yield stress component of aluminum, Armpco iron and tantalum with fcc lattice, showing temperature dependence

13 p2436 A70-29500

Plastic deformation of Mo-Re single crystals produced by electron beam zone refining, investigating lattice frictional stress, activation volume temperature variation, etc

13 p2436 A70-29562

Cr-Ni cold worked austenitic steel dislocation structure in tensile tests at different strains

14 p2596 A70-30874

Single crystal W and W alloys dislocation structures as function of strain, temperature and dilute alloys addition, using electron microscopy

15 p2756 A70-31563

Torsional vibrations amplitude effect on polycrystalline Al stress-strain curve during uniaxial tensile test

15 p2758 A70-32125

Work hardening properties of Ni single crystals of various orientations during intermittent and continuous plastic deformation

15 p2762 A70-32394

Electron energy losses at interface of helium inclusions in aluminum irradiated by radioactive lithium

15 p2785 A70-32764

Lattice planes and interplanar spacings of small vapor deposited gold crystals, using transmission electron microscopy

16 p2961 A70-33644

Unalloyed polycrystalline Ti fatigue tests, observing cyclic stress effect on twinning

17 p3116 A70-34393

Al single crystals hardening under low temperature reactor irradiation, emphasizing yield phenomenon associated with Luders bands

17 p3123 A70-34647

Plastic deformation of melted Al-Mg single crystals, using dynamic tensile testing

19 p3450 A70-37374

Superlattice stacking faults in plastically deformed nickel aluminate /gamma prime phase/ due to interaction of antiphase boundary /APB/ type dislocation pairs

19 p3451 A70-37704

Argon hydrostatic pressure effect on self diffusion coefficients and activation energy of Al and Be single crystals

20 p3644 A70-38961

Bcc metals and alloys stress relaxation, internal stress and work hardening, discussing temperature dependence and dislocation motion

20 p3647 A70-39108

Slip band formation dislocation-diffusion mechanism for single crystal and polycrystalline metals, considering stress intensity and load cycles effects

21 p3936 A70-41416

Elemental composition and structure of metallic iron particles in lunar fines compared to meteorites, using neutron activation technique

21 p3774 A70-41556

Directional dependence of elastic shear stiffness on cubic axes for Si, Cu and Mo, making polar plots of shear stiffness coefficients

21 p3850 A70-41909

Electron tunneling through p-type GaAs point contacts on Pb single crystals at liquid He temperatures

21 p3864 A70-42017

Copper and Al polycrystalline single crystal substructure changes, examining high temperature, unsteady and diffusion creep

22 p4056 A70-43342

Polycrystalline aluminas under thermal shock, investigating strength decrease and subcritical crack formation

22 p4059 A70-43413

METAL CUTTING

Electrical discharge machining using electrical spark eroding action for machining tough metals in burr-free intricate configurations, including narrow slots and blind holes

03 p0497 A70-13564

Tangential cutting force measurements during Ti grinding by microtools, noting properties of W, aluminum boride and zirconium carbide

04 p0697 A70-14466

Overcut phenomenon in early stage of cutting developed as theory for tip interference in internal gears

05 p0854 A70-15885

Metal cutting by gas jet lasers, discussing single and multimode lasers, carbon dioxide lasers, power and power density requirements, etc

08 p1501 A70-20470

Machine tools used in production of Hawker Siddeley Buccaneer low level strike and reconnaissance aircraft

09 p1691 A70-22608

METAL DRAWING

Cold reduction effects on press formability of pure Al sheet with allowance for tensile properties and crystallographic orientation

06 p1075 A70-17145

Strain rate effects in cold metal working processes involving rolling and drawing

08 p1590 A70-21327

METAL FATIGUE

Cyclic loading test apparatus for studying ferromagnetic metals structural changes due to fatigue

01 p0116 A70-10076

Fatigue crack propagation in metals exhibiting initial crystallographic shear mode followed by noncrystallographic tensile mode

01 p0198 A70-10101

Corrosion induced fatigue damage suppression in jet engine compressor steel components, describing various surface treatment effects

01 p0165 A70-10699

Fatigue crack growth rate for high strength steels from crack length during cyclic loading and striation spacings after fracture

01 p0119 A70-10732

Aluminum alloys fatigue properties tested at ultrasonic frequencies

01 p0120 A70-10879

TD-Ni low cycle fatigue properties at high temperature, discussing grain morphology, thoria particles role and oxidation resistant coating effect

01 p0123 A70-11245

Metal fatigue in Al alloys subjected to stress cycles, determining macrocracks propagation stages

01 p0212 A70-11607

Chromium-nickel steel fatigue strength under repeated thermal cycles, showing dependence on long term fatigue buildup and single cycle fatigue damage effects

02 p0383 A70-11653

Machine parts fatigue strength under thermal cycles, studying nonlinear dependence of energy dissipation per unit volume on cycles number

02 p0383 A70-11654

Stress rupture strength dependence on specimen geometry /scale effect/ from analyzing metals failure under prolonged loads

02 p0383 A70-11655

Stress concentrations and load cycle asymmetry effect on materials stress and breakdown behavior under various load cycles

02 p0383 A70-11656

Ti alloys creep and fatigue breakdown under cyclic tensile loads at room temperature

02 p0315 A70-11660

Brazed plate-fin superalloy panels suitable for hydrogen-cooled structures, discussing fabrication techniques, performance tests and pressure containment and fatigue characteristics

02 p0306 A70-11930

F-8 wing service life extension design techniques, emphasizing fatigue design curves and procedures

02 p0386 A70-11939

Out-of-phase or nonsynchronous biaxial straining effects on low cycle fatigue observed on Al specimen by cycling tension-compression and cyclic torsion

03 p0481 A70-12955

Metals fatigue strength prediction by hysteresis loop method, presenting results for irreversible energy dissipation rules during cyclic loading

03 p0587 A70-13240

Short term creep and stress-relaxation curves analytic extrapolation for metals and alloys with lifetimes exceeding test duration

03 p0588 A70-13246

Durability of refractory tubes of small thickness under creep with account of scale factor and unsteady conditions, tabulating experimental and theoretical values

03 p0508 A70-13247

Al alloy and structural steel fatigue strength under superelastic cyclic axial stresses, describing observed plastic deformation patterns

03 p0509 A70-13271

Creep rupture and fatigue strength in solid body mechanics, considering triaxial stress state and simplified creep rupture theory variant

03 p0599 A70-14249

Dynamic equilibrium prediction for creep and fatigue of various metals under various loading conditions, using time-temperature and cyclic stress-strain parameters

[ASME PAPER 69-WA/MET-9] 04 p0704 A70-14759

Structural metals hysteresis properties under cyclic plastic loading at room temperature, considering cycle dependent creep and stress relaxation

[ASME PAPER 69-WA/MET-4] 04 p0705 A70-14763

Stress-strain spatial distribution in notched plate fatigue specimen of mild steel determined by finite element method, noting cyclic strain softening effect

[ASME PAPER 69-MET-C] 04 p0770 A70-14876

Dimensional analysis for describing steel surface microcracks growth under uniaxial fatigue loading, using stress-intensity factor and crack extension concepts of fracture mechanics

[ASME PAPER 69-MET-G] 04 p0770 A70-14879

Axial compression effect on low cycle fatigue of thin walled metal tubes in torsion

[ASME PAPER 69-MET-H] 04 p0705 A70-14880

Metals and alloys creep under tension and compression at elevated temperatures, considering plastic deformation equation applicability

04 p0707 A70-15265

Surface work hardening and stress concentrations effects on fatigue strength of alloy under asymmetric tension and compression load cycles at high temperatures

04 p0707 A70-15270

Polycrystalline metals strength factors in aircraft and aerospace construction as relation between rupture time and embrittled grain boundary at high temperatures

04 p0779 A70-15671

Hydrogen embrittlement as delayed rupture origin in high strength steels

04 p0711 A70-15682

X ray metallography methods applied to high temperature protective coating development, refractory alloys strengthening and metal fatigue studies

04 p0711 A70-15706

Book on basic metal fatigue covering microstructure, crystal structure, plastic deformation, dislocations and point defects

05 p0929 A70-16070

Test apparatus for investigating crystal defects influence on simultaneous measurement of metals thermal and electric conductivity under plastic deformation at cryogenic temperature

05 p0829 A70-16399

Al alloys crack growth effects due to gaseous environment and fatigue frequencies, suggesting role of gas adsorption

05 p0938 A70-16478

Overstress cycles sensitivity for welded specimens on basis of French fatigue damage line and Wohler S-N line

05 p0941 A70-16520

Cryogenic temperature effect on short life torsional fatigue properties of Ni-Cr-Mo steel, discussing cyclic strain range effects

05 p0864 A70-16807

Deformation and failure of refractory metals at high temperatures under constant and variable thermal loads concerning turbomachine components

05 p0865 A70-17027

Plastic deformation of refractory alloys during stress relaxation tests under vibrations, showing enhanced stability

05 p0866 A70-17033

Low cycle fatigue of alloy and steel materials under bending and cyclic heating, relating strains and number of cycles to failure

05 p0866 A70-17036

Thermocyclic creep and rupture strength of Nb, Ta and Mo refractory alloys under temperature and load variations, showing failure dependence on cycle parameters

05 p0867 A70-17043

Nickel-based alloys small cycle thermal and mechanical fatigue limit during tensile stresses and operational temperatures, analyzing fatigue curves

05 p0867 A70-17046

Fatigue life tests for heat resistant gas turbine blade alloys under power and thermal loads simulating aircraft flight 05 p0953 A70-17051

Heating influence on circular bending fatigue strength of refractory steel and alloys, using radiative and HF inductive heating 05 p0868 A70-17059

Fatigue strength of T-shaped blade roots of steam turbine regulating stages subjected to combined static tension and cyclic bending 05 p0954 A70-17060

Structural changes in polycrystalline Al subjected to HF fatigue, using transmission electron microscopy 06 p1084 A70-17127

X rays of surface residual stresses produced during fatigue process of annealed low carbon steel and copper 06 p1084 A70-17128

Plastic flow theory applied to cyclic deformation of metals under complex cyclic loads 06 p1162 A70-17385

Copper specimens stress-strain diagrams under cyclic loads of various amplitudes, noting three stage process plastic deformation 06 p1162 A70-17386

Cyclic creep curves plotted from expansion diagrams for steel, copper and brass under small numbers of cyclic compression tension loads 06 p1162 A70-17388

Stress kinetics and breakdown time of hardening Al alloys and steels under cyclic loads, noting dependence on plastic deformation 06 p1162 A70-17391

Time to crack formation determined in cylindrical and flat Al and steel specimens having various surface properties under cyclic loads 06 p1084 A70-17392

Steel elements failure during nonstationary thermal fatigue with varying strain and temperature, discussing linear damage accumulation theory 06 p1163 A70-17397

Temperature cycle duration effects on heat resistant alloys thermal fatigue resistance, noting stress relaxation occurrence 06 p1085 A70-17398

Steels crack propagation direction dependence on load magnitude in low cycle fatigue, noting groove width effects on resistance to static loading 06 p1163 A70-17401

Low cycle fatigue life of various structural steels and alloys, studying stress cycle number relations 06 p1085 A70-17402

Surface work hardening effects on steels resistance to low cycle fatigue with stress concentration, applying results to aircraft parts 06 p1085 A70-17403

Normalized steel low cycle fatigue strength under bending and torsional rotation, testing linear damage accumulation theory 06 p1163 A70-17404

Ti alloy tensile strength under cyclic loads at room and high temperatures, noting plastic deformation and damage accumulation effects 06 p1085 A70-17406

Fatigue at high temperatures - ASTM Conference, San Francisco, June 1968 06 p1086 A70-17451

Adverse effects of temperature and strain rate on low cycle fatigue resistance of austenitic stainless steels at elevated temperatures compared with tension tests 06 p1086 A70-17452

Refractory Nb alloy low cycle fatigue characteristics in vacuum at high temperatures, describing testing machine 06 p1086 A70-17453

High purity Ni fatigue in reversed bending as function of oxygen pressure and temperature 06 p1086 A70-17454

Creep-low cycle fatigue interactions in Udimet alloy at elevated temperatures, investigating cumulative damage 06 p1086 A70-17455

Elevated isothermal and low cycle thermal fatigue of Hastelloy X, investigating test temperature, cycle frequency and stress temperature effects 06 p1087 A70-17457

Microstructure effects on smooth and notched fatigue and room temperature tensile properties of Ti-Al-V alloy using heat treatment combinations 06 p1087 A70-17458

Energy dissipation patterns of metal fatigue failure during static and cyclic loading applied to untreated and heat treated steel samples 06 p1166 A70-17651

Mean cyclic stress effect on stress concentration and fatigue strength of smooth and notched steel specimens at normal and high temperatures with superimposed bending 06 p1088 A70-17653

Energy dissipation during torsional and flexural vibrations of steel and duralumin specimens subjected to plastic deformation, accounting for discrepancies due to methodical errors 06 p1166 A70-17658

Plastic zone around propagating fatigue crack in Cu single crystals, using transmission electron microscopy and X ray topography 06 p1171 A70-18494

Steels fatigue strength under biaxial tension, considering complex stress-strain state 07 p1304 A70-18823

Alloying elements preventing hot cracking in weld metal by converting iron sulfides into higher melting point sulfides 07 p1293 A70-18979

Reverse-bend and tension-tension fatigue properties of high strength Cr-Mn-N stainless steel sheet in notched and unnotched conditions 07 p1305 A70-18993

Microbiological corrosion effects on aluminum alloy fatigue properties inducing further microbiological corrosion compared to chemical corrosion effects 07 p1310 A70-19735

Stability criterion applied to asymmetric rigid cyclic strains and plastic cyclic strains, considering failure of metals 07 p1315 A70-20182

Duraluminum sheets fatigue life and corrosion fatigue strength decrease with corrosion damage area increase 08 p1515 A70-20921

Electronic recording of cyclic strain diagrams of metals in wide loading frequency range using dynamic hysteresis method 08 p1585 A70-20987

Static and dynamic low temperature crack toughness behavior of steels, determining strain rate effect 08 p1518 A70-21317

Stress corrosion-fatigue crack propagation in high strength structural steels, relating growth rates to crack tip stress intensity factor 08 p1519 A70-21452

Al alloys fatigue cracks propagation rate using electron microfractography 09 p1701 A70-22223

Metal fatigue by proliferation, diffusion and vanishing of lattice dislocations under varying loadings described by nonlinear inhomogeneous parabolic differential equations 09 p1770 A70-22253

Multiaxial thermal fatigue cracking in carbon steels predicted by elastoplastic stress-strain analysis using finite element method 09 p1773 A70-22578

Strain rate and hold time effects on steels low cycle fatigue behavior, graphing various correlations among stress amplitude, time to fracture, etc 09 p1774 A70-22589

Stress concentration effect on fatigue strength of Al- and Mg-base structural alloy specimens of different sizes analyzed statistically 09 p1703 A70-22617

Fatigue strength tests of alloy during static and programmed loading at high temperatures from statistical standpoint 09 p1703 A70-22620

High temperature fatigue crack growth in metal, suggesting condensation of vacancies at crack front after each loading cycle 09 p1776 A70-22644

Fatigue crack probability distributions under oscillatory stationary random loading, basing analysis on crack propagation model 09 p1776 A70-22683

Al alloys fatigue properties dependence on surface oxide cracking in moist and dry air, investigating oxidation and kerosene processing 09 p1707 A70-23206

Lattice defects in Al-Zn alloy due to fatigue investigated for mechanism and effect on aging kinetics by resistivity measurement 09 p1707 A70-23326

Dislocations maximal concentration during metal fatigue 10 p1955 A70-24081

Energy dissipation-fatigue strength relationships during vibrations for prestrained metals and alloys 10 p1956 A70-24244

Ti-Al-Zr-W-Si alloy fracture surface concentric markings number related to loading cycles after crack formation 10 p1904 A70-24837

Design mean stress and ground-air cycles minimum stress effect on fatigue behavior of titanium alloy in supersonic transport operating environment 11 p2128 A70-25370

[SAE PAPER 700033] VTOL aircraft metal fatigue examination by photoelasticity emphasizing stress reduction 11 p2132 A70-25622

High fatigue life resulting from titanium spot welding realized by preweld and postweld treatment 11 p2059 A70-25662

Fatigue properties of electron beam welded precipitation hardening stainless steels 11 p2059 A70-25664

Stress ratio effects on Al alloy during crack propagation and fatigue, introducing notch stress and strain approximations 11 p2066 A70-26089

METAL FATIGUE

Fatigue life tests of Al alloy under narrow and broad band random loads based on number of peaks to failure 11 p2066 A70-26095

Fatigue crack propagation in high strength steels during fatigue cycling in dry and wet environment containing NaCl 11 p2067 A70-26100

Metals low cycle fatigue resistance, discussing repeated plastic straining effect on mechanical properties 11 p2141 A70-26609

Uniaxial low cycle thermal fatigue test procedure for ductile metals, describing strain measuring system allowing direct recording of load vs mechanical deformation 11 p2034 A70-26615

Electrochemical machining effects on surface integrity and fatigue properties of steel, Ti and Al alloys [ASTME PAPER MR-69-110] 12 p241 A70-27081

Fretting and fretting fatigue in metal-metal contacts, showing friction as important parameter 12 p2253 A70-27110

Fatigue crack initiation and propagation in steel using surface plastic replication method, determining propagation rate by stress intensity 12 p3321 A70-27207

Kinetic theory for fatigue crack propagation using cyclic stress-strain relation in connection with strain hardening characteristics 12 p3322 A70-27208

Annealed stainless steel low cycle fatigue data analysis leading to method of characteristic slopes approach for correlating plastic strain range to fracture time 12 p2255 A70-27604

Fatigue crack propagation dependence on environment and load frequency in Al alloys, correlating data by stress-intensity factor 13 p2431 A70-28603

Fatigue crack growth dependence on load profile, temperature, test frequency and environment and stress in high strength Al and Ti alloys and steels 13 p2431 A70-28604

Creep properties of torsion-tension metal members subjected to nonproportionate loading at high temperatures 14 p2656 A70-30637

Erosion damage of porous sintered Fe in water or oil in test device with disk rotating near sample surface, noting relationship to metal fatigue 14 p2592 A70-31272

Al-Mg alloy nonpropagating fatigue cracks at roots of sharp notches, discussing cyclic strain hardening 14 p2598 A70-31299

Fracture mechanics and stress analyses comparison for fatigue cracked steel cantilever beam stress corrosion specimens 15 p2755 A70-31473

Plain strain fracture toughness index measurement, discussing application to metal fatigue and stress corrosion 15 p2757 A70-31927

Metallic materials damage accumulation and structural failures due to fatigue, considering surface changes, crack initiation and dislocation pattern 15 p2757 A70-31928

High temperature metal fatigue crack growth monitoring by ultrasonic detection [SESA PAPER 1622] 15 p2744 A70-32321

Pure iron and low carbon steel macroscopic stress measurements, determining correlation between residual stress, fatigue damage and fatigue life 15 p2759 A70-32322

Surface layer dislocations concentration role in metal fatigue, using variable diffusion coefficient 15 p2822 A70-32352

Metal fatigue cracks, reviewing propagation theories and structure life prediction equations 15 p2822 A70-32358

Glass bead blast induced residual stress and surface cold work effects on Ni base superalloy fatigue crack initiation and propagation 15 p2761 A70-32381

Dislocation distribution in Ta foil following yield point fatigue testing, using thin film electron microscopy 15 p2761 A70-32385

Environmental fatigue crack propagation in Al alloys at low cyclic stress intensity levels 15 p2762 A70-32390

Crack initiation and propagation in rolling contact fatigue, emphasizing electrochemical effects in ball bearing failure [ASME PAPER 70-DE-46] 16 p2931 A70-33509

Hysteresis loop behavior under tension-compression cycle fatigue related to Meyer strain hardness values of cyclically strained metals 16 p2934 A70-34334

Alpha Ti and alpha Ti-hydrogen alloys fatigue behavior, emphasizing twin formation influence and hydrogen effects 17 p3116 A70-34394

METAL FILMS

Ti-Al-Cr-Fe tensile, fatigue and creep properties at various temperatures, considering industrial applications

17 p3121 A70-34428

Weldability, tensile and fatigue properties of Ti sheet alloys, discussing TIG welds

17 p3121 A70-34431

Fatigue properties of solution treated and age hardened hot rolled Ti alloy bars, discussing sprayed tungsten carbide coatings effects on bearing properties

17 p3121 A70-34432

Fatigue characteristics of Ti alloy forgings for rotary wing vehicles, discussing effects of welding, annealing, reduction, surface finish and shot peening

17 p3122 A70-34441

Low cycle fatigue and short term tensile behavior correlation for irradiated and unirradiated stainless steels

17 p3123 A70-34627

Residual stress concentration at fatigue crack tip, using oscillating crystal X ray microbeam diffraction photographic method

17 p3183 A70-34652

Fractography of fatigue and delayed fracture of hydrogenated, unplated and Cd-plated ultrahigh strength steel

17 p3124 A70-34654

Steel and cast iron early stage fatigue failure, using photoelastic coatings

17 p3192 A70-35741

Stainless steel load-strain characteristics and cumulative damage in cyclic fatigue life

18 p3273 A70-36048

Ti alloy prior plastic deformation effect on fatigue strength under bending, tension, torsion and rolling

18 p3275 A70-36141

Chromium-nickel steel fatigue strength under repeated thermal cycles, showing dependence on long term fatigue buildup and single cycle fatigue damage effects

19 p3547 A70-38426

Machine parts fatigue strength under thermal cycles, studying nonlinear dependence of energy dissipation per unit volume on cycles number

19 p3547 A70-38427

Stress rupture strength dependence on specimen geometry /scale effect/ from analyzing metals failure under prolonged loads

19 p3547 A70-38428

Stress concentrations and load cycle asymmetry effect on materials stress and breakdown behavior under various load cycles

19 p3547 A70-38429

Ti alloys creep and fatigue breakdown under cyclic tensile loads at room temperature

19 p3452 A70-38434

Metal fatigue strength prediction by hysteresis loop method, presenting results for irreversible energy dissipation rules during cyclic loading

19 p3548 A70-38458

Short term creep and stress-relaxation curves analytic extrapolation for metals and alloys with lifetimes exceeding test duration

19 p3548 A70-38464

Durability of refractory tubes of small thickness under creep with account of scale factor and unsteady conditions, tabulating experimental and theoretical values

19 p3453 A70-38465

Gaseous radioactive penetrant inspections for early low cycle fatigue in aircraft engine materials, discussing impact on maintainability

19 p3441 A70-38828

Aluminum alloys subjected to random loading, comparing fatigue life with predictions based on linear accumulation of damage hypothesis

20 p3647 A70-39157

Low cycle metal fatigue under stress concentration, examining complex loading, cyclic strain, stress-strain state and plastic deformation

20 p3727 A70-39885

Steady state and transient fatigue behavior of stainless steel wire-Al alloy composite subjected to push-pull and pull-release frequency tests

20 p3649 A70-39946

Stainless maraging steel bolts tensile, shear and fatigue strengths and stress corrosion resistance at room and high temperatures

20 p3650 A70-39964

Notched polycrystalline Al-Mg alloy dislocation structure near propagating fatigue crack at various stress levels

21 p3839 A70-40925

Nondestructive ultrasonic measurements of crack depth in high strength steel plate weldments, studying low cycle fatigue

21 p3834 A70-41943

Stress concentration effect on perforated Al alloy panel fatigue, using theory for material critical thickness near notch

21 p3938 A70-41955

Book on fatigue crack propagation in pure Al covering tension and compression tests, single and

polycrystalline materials, elastic stress, notched and smooth specimens, etc

22 p4057 A70-43740

Fatigue limits of Ti alloy by Wohler and Locati loading methods

23 p4204 A70-43933

Crack propagation resistance-cyclic fracture strength relation for Mn-Cr-V steels, considering thermomechanical working effects

23 p4204 A70-43935

Fatigue of turbine blade stainless steels and nickel alloys as function of temperature, stress and surface layers

[ICAS PAPER 70-38]

23 p4205 A70-44135

Papers on plane strain fracture toughness testing covering metallic materials, steels and aluminum alloys

23 p4205 A70-44189

Fracture toughness testing of metallic materials including fatigue cracking, thickness limitations and crack detection

23 p4206 A70-44190

Plane strain fracture toughness testing of high strength Al alloys and steels, using fatigue cracked bend specimens

23 p4206 A70-44191

Crack and thickness effects on fracture toughness tests of high strength steel in precracked sheet and bend specimens

23 p4206 A70-44193

Specimen size and mechanical factors in plane strain fracture toughness testing of metallic materials

23 p4206 A70-44195

Bcc metals, measuring correlation between residual stress level and fatigue damage by X ray diffraction analysis

23 p4207 A70-44422

German monograph on notched structural steels fatigue properties and crack propagation under tensile-compressive alternating loads

24 p4356 A70-45086

High strength martensitic stainless steel stress corrosion resistance and fatigue crack growth rate, considering austenite content, strain aging and tempering temperatures

24 p4359 A70-45245

Cyclic loaded high purity Al samples, noting substructure around fatigue cracks

24 p4362 A70-46185

METAL FILMS

Low speed Ga lubricated sliding electrical contacts of Be in vacuum, discussing Ga film role in friction and contact resistance

01 p0099 A70-10325

Metal film graded filter fabrication for schlieren photographic system with laser light source and framing camera, using vacuum evaporation

01 p0113 A70-10921

Titanium thin films prepared in ultrahigh vacuum to determine low temperature/pressure oxidation kinetics, using electron microscopy and X ray diffraction

02 p0317 A70-12316

Frequency spectrum, Q factor and single mode selectivity of two mirror laser resonator with absorbing thin metallic films, showing agreement for Ag and Ni

03 p0500 A70-13459

Semitransparent Pt film reflectance in vacuum UV evaporated on glass, quartz, Al, Au and Cr on glass compared with opaque films

04 p0731 A70-15023

Hall voltage measurements on Ta thin films using square wave generator current, discussing parasitic effects and suppression possibilities

05 p0863 A70-16366

LF creep characteristics in Block-wall Permalloy films, using high resolution Bitter pattern technique

[IEEE PAPER 5.7]

05 p0893 A70-16996

Mn-Bi films Curie point switching with laser, measuring magnetization dependence via magneto-optic effect

[IEEE PAPER 9.3]

05 p0893 A70-16997

Calorimetric measurements determining total hemispheric emittance of thin gold films as function of temperature, demonstrating film thickness effect

[AIAA PAPER 70-63]

06 p1180 A70-18140

Crystal structure imperfections and elastic anisotropy of crystallites in condensed Ni films by X ray analysis

07 p1309 A70-19636

Low temperature oxide film effect on porous titanium carbide impregnation by liquid steel

07 p1311 A70-19805

Chromium films obtained on tungsten by sputtering, studying structure and work function at various temperatures

08 p1516 A70-21123

Strain gage for measuring strain waves amplitude on surface of fused quartz to study electromagnetic waves interaction in Permalloy films

09 p1681 A70-23349

Epitaxy of Ag deposited on Ni, observing irreversible crystallographic order transition from metastable nominal orientation by LEED

10 p1927 A70-24076

Electron energy loss spectrum in Ti measured by bombarding thin films vacuum deposited on NaCl crystal with electrons of intermediate energy

11 p2065 A70-25376

Thermal conductivity of thin metallic films and wires at cryogenic temperatures, discussing electron transport properties

11 p2083 A70-25752

Frenkel pairs and interstitial hydrogen atoms observed in thin silver films after proton bombardment

12 p2253 A70-27209

Thin films of vanadium niobium and tantalum obtained by vacuum thermal decomposition of metal iodides

12 p2253 A70-27210

Quenched MnBi thin films measured for magnetic, magneto-optical and optical properties, noting Faraday rotation

12 p2284 A70-27246

Au, Ag and Al films evaporation in ultrahigh vacuum on LiF and MgO surfaces, showing insignificant role of lattice misfit for epitaxy

12 p2285 A70-27260

Bi polycrystalline film grown by vacuum deposition on amorphous substrates investigated for electron microscope beam effects

12 p2285 A70-27261

Tantalum RF sputtered superconducting films structure and properties at various substrate temperatures, observing bcc, fcc and amorphous phases by electron microscopy

12 p2288 A70-27876

Microwave transmission through thin film screens with apertures placed in transverse plane of X band rectangular guides

12 p2202 A70-28164

Threshold light flux densities for thin Al film breakdown by laser radiation

13 p2428 A70-29383

Attenuation length of vacuum UV photoexcited electrons in evaporated metal films, observing lack of dependence on photon energy

13 p2472 A70-29711

Ta thin film integrated circuit technology including resistor and capacitor elements, conductors, cross-overs, etc

14 p2625 A70-30284

Evaporated Au-Ni-Cr alloy resistor films physical and electrical characteristics, noting dependence on composition

14 p2625 A70-30285

Au films nucleation and growth on single crystal graphite substrates in ultrahigh vacuum, using transmission electron microscopy for examination

14 p2627 A70-30499

Thin film sandwich Ag/Ni/Cu, demonstrating multiple electron diffraction

14 p2627 A70-30724

Constant temperature hot split film anemometer sensors based on velocity and heat flux distribution about probe, measuring flow rates

15 p2734 A70-31691

Au-Pd films boundary structure during diffusion annealing, noting polymerized oil vapor effect originating from vacuum pump

15 p2758 A70-32121

Thermoelectric power measurement of thin Au films, relating results to transport parameters and internal stresses

15 p2785 A70-32582

Scattering cross sections for monoenergetic Ar beams on epitaxial Ag films

16 p2956 A70-34013

Oxidation dependence on physical nature of Ti surfaces obtained by thin film techniques under ultrahigh vacuum conditions

17 p3098 A70-34364

Growth mechanism and crystal structure of Ge films deposited from molecular beam onto GaAs, Si and Ge substrates

18 p3297 A70-36415

Fe and Al impurities in bis-ethylbenzene chromium /BEC/ and in chromium films obtained by thermally induced decomposition of metal organic compound

18 p3297 A70-36463

X ray fluorescence determination of thickness and composition of Permalloy films deposited on wire surface

18 p3258 A70-36466

Adherent Ta films deposition onto Teflon disks by sputtering

18 p3264 A70-37098

Dielectric properties of thin barium titanate films from microwave resonance frequencies and resonance reflection coefficient

19 p3482 A70-37255

Substrate and thickness dependence of electrical and superconductivity properties of rhenium and molybdenum films prepared by electron beam evaporation

19 p3485 A70-37684

- Cesium films structure and work function on W /011/ face, discussing order-disorder transition
19 p3487 A70-37817
- Cooled antimony-cesium film photoelectric effect for weak luminous flux, examining electronic camera reciprocity
19 p3427 A70-38175
- Thin metal film electrical conduction current noise characteristics
19 p3487 A70-38196
- Deformation effects on metallic and semiconductor thin films conductivity
19 p3488 A70-38199
- Epitaxial GaAs films growth from solid solutions of InAs-GaAs system deposited on GaAs substrates, noting electron mobility and temperature effect
20 p3686 A70-39629
- Hydrogen emanation and distribution in metals and alloys by Nd hydrogen metal detection method
20 p3651 A70-40071
- Temperature dependent anomalous optical absorption of thin yttrium films under static ultrahigh vacuum
21 p3862 A70-40816
- Numerical solution for multilayer insulation system comprised of infinite parallel metallic films separated by optically thin dielectrics
21 p3947 A70-41054
- Nb-Zr thin films superconducting properties dependence on deposition temperature and rate and substrate material
22 p4085 A70-42623
- Thin film granular aluminum superconductors as sensitive thermometers
22 p4031 A70-43009
- Optical transmission and reflection gratings formed by standing light waves evaporation of thin metallic films in ruby laser cavity
23 p4200 A70-43817
- Crystal growth in polycrystalline Au, Ag and Au-Ag thin films annealing, observing by electron microscopy and electron diffraction
24 p4391 A70-45672
- IC metallization systems in semiconductor devices fabrication and packaging, assessing metals alternate to Al for electromigration difficulties avoidance
24 p4319 A70-46075
- Thin epitaxial Ag films on mica, measuring electrical resistivity strain dependence
24 p4391 A70-46266
- Metal layer and absorbed oxygen quantities in reactive oxidation deposition of aluminum
24 p4365 A70-46354
- ## METAL FINISHING
- ### NT ELECTROPOLISHING
- ### NT SHOT PEENING
- Nickel boronizing in high temperature vacuum, studying mechanical properties and layer thickness time dependence
08 p1517 A70-21148
- ## METAL FOILS
- DC electrical conduction in In and In-Pb alloy foils sandwich structures, discussing size effect and Pb diffusion rate
03 p0540 A70-13624
- Elastoplastic zone and instability of precracked thin sheets under uniaxial loading applied to rectangular center-notched steel foils
03 p0598 A70-14239
- Al foil exposed to solar wind on moon during Apollo 11 mission examined for helium particles, finding lunar solar wind albedo
05 p0900 A70-16093
- Swiss Solar Wind Composition Experiment, analyzing trapped particles characteristics of Apollo 11 and 12 lunar exposed aluminum foil
11 p2105 A70-25950
- Foil decarbonization process monitored by mass spectrometry of secondary carbon ion emission
12 p2254 A70-27311
- Energetic ion production by giant pulse lasers measured on Al and Au foil targets
15 p2777 A70-32333
- Dislocation distribution in Ta foil following yield point fatigue testing, using thin film electron microscopy
15 p2761 A70-32385
- Concorde engine bay thermal insulation combining stainless steel foil and polytetrafluorethylene film, considering noise level, engine fire conditions and molten Ti globules penetration
18 p3346 A70-36345
- Nonsteady combustion analysis, using method of flame front penetration through fine metal layer in solid propellant
18 p3300 A70-36704
- Fluid inertia and compressibility effects considered in equations for foil over lubricating film
19 p3435 A70-37615
- Gold foil surface thermal contact resistance, investigating temperature and pressure effects and elastic and plastic deformation of surface structure
21 p3953 A70-42166
- Thin Al foil subjected to cyclic bending stresses, investigating substructures and strain regions around fatigue crack
24 p4362 A70-46186
- ## METAL FORGING
- ### U FORGING
- ## METAL FORMING
- ### U FORMING TECHNIQUES
- ### U METAL WORKING
- ## METAL FUELS
- Chemical heat source combined with metals ignition properties considered for spacecraft heating during Mars nighttime landing
04 p0628 A70-15426
- Metallic fuels preparation by electric spark discharge process
17 p3145 A70-35214
- ## METAL GRINDING
- WC-Co alloys noting polishing and grinding effects on residual stress and crack resistance
03 p0508 A70-13145
- Tangential cutting force measurements during Ti grinding by microtools, noting properties of W, aluminum boride and zirconium carbide
04 p0697 A70-14466
- Roller bearings convex conical surfaces grinding using centerless grinder
08 p1506 A70-21192
- Material thickness tolerances control for weight minimization of aerospace vehicles by abrasive metal grinding, improving surface quality
20 p3638 A70-40358
- ## METAL HALIDES
- ### NT ALUMINUM CHLORIDES
- ### NT BARIUM FLUORIDES
- ### NT BERYLLIUM FLUORIDES
- ### NT CADMIUM FLUORIDES
- ### NT CALCIUM FLUORIDES
- ### NT COPPER CHLORIDES
- ### NT IRON CHLORIDES
- ### NT LITHIUM CHLORIDES
- ### NT LITHIUM FLUORIDES
- ### NT MAGNESIUM FLUORIDES
- ### NT POTASSIUM CHLORIDES
- ### NT SILVER HALIDES
- ### NT SILVER IODIDES
- ### NT SODIUM CHLORIDES
- ### NT SODIUM IODIDES
- ### NT STRONTIUM FLUORIDES
- ### NT TITANIUM CHLORIDES
- Polyamides /nylons/ stress cracking by metal halides and halide-like salts, investigating effects of nylon temperature, moisture content, concentration, etc
10 p1907 A70-24224
- Polyamide and secondary amide mode compounds stress cracking by metal halides using IR and nuclear magnetic resonance techniques
10 p1907 A70-24299
- Nylon 6 polyamide tensile stress cracking by metal thiocyanates in aqueous and nonaqueous solutions, comparing results with cracking by metal halides
10 p1907 A70-24300
- High temperature molecules matrix isolation in saturated vapor over refractory solids, discussing optical spectroscopy of VO, metal oxide and halide molecules
14 p2545 A70-30903
- ## METAL HARDENING
- ### U HARDENING [MATERIALS]
- ## METAL HYDRIDES
- ### NT LITHIUM HYDRIDES
- Nb-NbH solid solutions thermodynamic properties at various temperatures described by formulas
02 p0320 A70-12819
- Binary transition metal hydrides consisting of single metal and single hydrogen isotope, discussing preparation and kinetic, thermodynamic and structural properties
05 p0863 A70-16523
- Ignition of single particles of light metal hydrides, considering combustion stages and heat transfer
06 p1179 A70-17984
- Serrated yielding in hydrogenated nickel alloys, noting hydride stability role in Portevin-Le Chatelier effect
08 p1522 A70-21706
- MgH molecular lines Zeeman splitting in sunspot spectra confirmed by photoelectric observations
24 p4400 A70-45308
- ## METAL INSULATOR SEMICONDUCTORS
- ### U MIS [SEMICONDUCTORS]
- ## METAL IONS
- ### NT MANGANESE IONS
- Reduced Nd ion absorption in matrices of fluorides, fluoride mixtures or oxygen-containing compounds with various ion concentrations, analyzing optical centers statistical properties
01 p0107 A70-10210
- Positive Na and K ion effects on mitochondrial respiratory control, O uptake and adenosine triphosphate activity in rat liver
01 p0026 A70-11063
- Test program preceding first German satellite experiment using HEOS satellite for Ba ion cloud injection into deep space
02 p0380 A70-12081
- Amplification cross section of 1.06 micron transition of trivalent Nd ion in alkaline silicate glass host material, based on three level energy level diagram
02 p0312 A70-12111
- Slow waves and spikes in intestinal muscle of cat noting dependence on intracellular iontophoresis of Na
03 p0416 A70-13014
- Electron-phonon interaction model of temperature dependence of luminescence produced by multiphonon nonradiative transitions in Cr ions of ruby crystal, deriving transition probability
03 p0538 A70-13058
- Rocket-borne spectroheliograph for taking X ray and monochromatic pictures of sun in Mg II line
03 p0370 A70-13594
- He-Ne-Cd II laser operation modes for optimum pressure fill, obtaining red to blue outputs by varying current and/or temperature
04 p0702 A70-15366
- Nickel IV forbidden lines suggested from spectrum study of slow nova RR Telescopii
05 p0905 A70-15758
- Excitation of ground configuration of Fe XIII for density and temperature range in solar corona, using proton collisions, electron collision strengths, etc
05 p0902 A70-16434
- Hyperbaric oxygenation effects on cellular membrane permeability, analyzing rat plasma behavior of transaminases GOT and GPT and K and Na cations electrolytes
05 p0802 A70-16493
- Ca II 7323 forbidden line in solar Fraunhofer spectrum, estimating center-limb variation of equivalent width of transition
06 p1143 A70-17994
- Gadolinium ions in zinc tungstate single crystals, studying low symmetry effects on EPR spectrum
08 p1556 A70-21120
- Iron ions EPR lines widening in corundum crystals due to lattice defects, estimating mosaic blocks disorientation parameter and point defects density
08 p1556 A70-21122
- Excitation energy transfer processes in oxide glasses containing trivalent Tb ions in combination with other rare earth activators
09 p1738 A70-22137
- Excitation equilibrium relative populations calculations for Fe, Ni and Ca ions under solar coronal conditions
09 p1757 A70-22735
- Singly ionized Mg resonance lines electron impact broadening quantum mechanical calculation
09 p1732 A70-22827
- Energy levels predicted for various electron orbital configurations in Fe V by Slater parameters
10 p1944 A70-24953
- Natural frequency of paramagnetic amplifier retuned by coupling Cr ions doped silver coated ruby resonator to passive resonator
10 p1901 A70-25138
- Radiative lifetime for atomic transitions in UV multiplets of zinc and cadmium atoms and ions measured using phase shift method
11 p2086 A70-25363
- Electron and proton excitation of forbidden transition lines in Ca XV ground configuration determined for coronal densities and temperature

- Lead ion effects on single crystal zinc dissolution and electrodeposition in alkaline solutions investigated microscopically
13 p2361 A70-28928
- Solar Ca II H and K lines formation, discussing double reversal, limb darkening, plage and spot lines and anomalous line ratios
13 p2494 A70-29481
- Ionized iron lines observations under coronal conditions, giving halfwidths and kinetic temperatures for forbidden lines Fe X-Fe XV
14 p2651 A70-31377
- Ferrous and ferric ions properties in corundum from observing acoustic paramagnetic resonance
15 p2784 A70-32397
- Binuclear scalar spin Hamiltonian inadequacy to describe electron exchange in systems containing orbitally degenerate ions, considering cobalt magnon spectra
15 p2777 A70-32399
- Fine structure in Ca II K line core, determining reduced high dispersion spectra at solar disk center
15 p2804 A70-32618

METAL JOINTS

Resonance and satellite lines of highly ionized iron in solar spectra, discussing spectrum features during chromospheric flares

17 p3154 A70-34541

Solar chromosphere resonance lines, observing H and K line profiles of Mg ions

17 p3161 A70-34893

Fabry-Perot interferometry of solar Mg II resonance lines

17 p3162 A70-34897

Fe II line behavior in plages near solar limb

17 p3174 A70-35866

He-Cd laser discharge, determining population densities and lifetimes for levels of Cd ion excited by He metastables

17 p3108 A70-35903

Intermediary complexes between Na-K ion stimulated ATPase/adenosine triphosphate/ and microsomal proteins of turtle bladder epithelial cells

18 p3225 A70-36233

Electron beam interaction with ionized K plasma, considering Langmuir waves instability, turbulence and electron heating

18 p3295 A70-36614

Power conditioning system for Hg ion thruster on SERT 2 spacecraft, considering performance, design, control circuits and arcing

20 p3568 A70-40216

Solar photospheric spectrum Ni II forbidden lines analysis, determining abundance of Ni for comparison with coronal and meteoritic data

20 p3711 A70-40405

Sco X-1 X ray emission data from rocket-borne measurement, indicating Fe K-emission from high ionization states

21 p3873 A70-40667

Sn and tetraethylammonium ions effects on Zn electrodeposition on Zn single crystals in aqueous KOH, using scanning electron microscopy

21 p3772 A70-40726

Molecular orbital energy level diagram for metal ion X ray emission and absorption spectra interpretation from titanium and vanadium compounds

21 p3853 A70-41901

Solar chromosphere elements abundances methods, suggesting Fe differences origin in Fe I and Fe II inconsistencies

21 p3925 A70-42194

Rb and Cs ions implanted Si analyzed by Hall effect and sheet resistivity measurements and channeling techniques

22 p4087 A70-43143

Ionization and loss processes for meteoric elements in lower ionosphere, suggesting hydrates formation role in alkali metal ions depletion

22 p4106 A70-43305

Metal phthalocyanin catalyzed oxidation by oxygen of vanadium and iron couples in externally regenerated redox fuel cell cathode

22 p3966 A70-43536

Meteoric metallic ions above F 2 peak, discussing current density and transport mechanisms

23 p4239 A70-43841

CA II chromospheric emission lines for deriving Mn in stellar luminosity, discussing calibration

23 p4242 A70-44293

Multiply ionized Fe valence and inner shell transitions from spectrum analysis, noting similarities to solar flares

24 p4401 A70-45315

Ion-ion potential for sodium vapor for second virial coefficient as function of temperature at 1200-1700 K

24 p4381 A70-45649

ESR intensities and line widths at X and Q bands of Cr and Fe molecular ions in water/glycerol mixtures

24 p4310 A70-46045

Chromium ions isothermal annealing kinetics in X ray irradiated ruby crystals, using EPR method

24 p4382 A70-46253

METAL JOINTS

NT SPOTLED JOINTS

NT SPOT WELDS

NT WELDED JOINTS

Diffusion welding of dissimilar metals with or without intermediate layers, assessing joint strength factors

03 p0498 A70-14071

Stress rupture strength of turbine blades fir tree type root joints under prolonged loads at high temperatures, studying disk teeth shearing

05 p0953 A70-17055

Turbine blades root joints endurance limit concerning tensile stress determination at stress raiser contour for elastoplastic deformation and creep

05 p0954 A70-17062

Joint design for braze bonding and joining of Al-B composites using Borsic tape backed with alloy brazing foil

07 p1293 A70-18994

Metal adhesive joints peeling and stripping strength determinations, describing static and dynamic tests

08 p1503 A70-20884

Metal adhesive joints nondestructive tests involving acoustic and supersonic, X ray and heat flow characteristics methods

08 p1503 A70-20885

Metal adhesive joints strength under tensile and torsional stresses, considering effects of dimensions, metal type and surface finishing

08 p1504 A70-20886

Metal adhesive joints behavior under prolonged static stresses, showing time dependence of tensile strength

08 p1504 A70-20887

Adhesive bonds strength in metal joints under stress cycling, examining effects of temperature and cycles frequency

08 p1504 A70-20888

Metal adhesive joints under cyclic stresses, studying stress distribution and fracture occurrence by high speed cameras

08 p1504 A70-20889

Metal adhesive joints permanence under various environmental conditions, considering surface properties effect

08 p1504 A70-20890

Shear stress distribution in metal adhesive joints, discussing methods for calculating

08 p1504 A70-20892

Metal adhesive joints strength and suitable dimensions determination, presenting parameter relations for design

08 p1584 A70-20893

Adhesive joints design, considering layer type, pipe connections and honeycomb structures for application in aircraft and automotive industries

08 p1585 A70-20894

Low cost programming system for gas tungsten arc welding process for Ti taper and stepped joint designs

08 p1507 A70-21484

Stainless steel wire-reinforced Al alloy diffusion bonded scarf joints, considering aluminum oxide coating and bonding times effects

08 p1509 A70-21906

Numerically controlled gas tungsten arc welding, discussing tape programming, fixture design and fabrication for various welded metal joint configurations

11 p2058 A70-25661

Book on metal joining techniques covering various welding and brazing processes

11 p2061 A70-26599

Polymer-metal adhesive joints rupture characteristics, considering polymer in solid or structurally fluid/elastic/ state during tests

12 p2244 A70-28341

Organic adhesives for bonding continuous surface and core-to-face joints, discussing strength, environmental resistance, producibility and reproducibility

13 p2419 A70-29118

In-place gas tungsten arc fusion welding for joining small diameter precipitation hardenable aluminum tubing

14 p2590 A70-30930

Low pressure diffusion welding for joining Ti-6Al-4V alloy in Ar atmosphere under compressive loading, evaluating performance

14 p2591 A70-30933

Transverse contraction during butt welding of plates of steel and Ti and Al alloys, showing dependence on joint thickness

16 p2916 A70-33053

Refractory alloys Li corrosion resistance, examining effects of oxygen contamination during welding

16 p2924 A70-34205

Precision electron beam welding for metal joints, discussing equipment and quality control factors

19 p3436 A70-38072

Microjoining in electronics industry, discussing technologies and nondestructive testing

19 p3437 A70-38424

Stainless steel sheet-to-plate tee joint resistance welded by Magnetic Force Upset Welding process, testing performance

21 p3832 A70-40792

Materials for glass-metal compressed joints, tabulating stress and thermal expansion coefficients

22 p3999 A70-43447

METAL MATRIX COMPOSITES

Aluminum oxide whiskers/metal matrix composites, discussing metallic coatings effects on filament wetting, bonding and surface protection

01 p0117 A70-10480

Tensile tests of heat treated silicon carbide coated B filament reinforced metals, discussing fiber strength and interfacial stability

01 p0117 A70-10483

Fiber breakage during powder metallurgy fabrication of compact Al-B composites as function of density

01 p0104 A70-10741

Tensile strength of flat specimens of Ni reinforced by W wire gauze

02 p0315 A70-11661

Mechanical properties of carbon fiber reinforced Al, Cu and Ni, noting rope and wire applications

02 p0384 A70-11676

Al-B composite missile adapter design for aerospace structures

02 p0306 A70-11951

Reversed bending fatigue tests on stainless steel fibermetal with porous structure to investigate effects of density, thickness, wire diameter, screen stiffening, etc

03 p0481 A70-12957

Mechanical properties of Al composites reinforced with alpha-silicon carbide sintered whiskers, discussing voids, fiber breakage and orientation effects

03 p0506 A70-13113

Modified explosive bonding process for welding wire reinforced Al composite materials

03 p0497 A70-13120

Al-Ni intermetallic whisker-reinforced Al microstructure and mechanical properties, studying effects of cold rolling

03 p0508 A70-13142

Mechanical properties, optimum deformation and rupture of W wire reinforced Ni and Ti metal composites obtained by hot rolling in vacuum

03 p0508 A70-13245

Composite materials possible applications, considering metal matrices reinforced by high strength metallic or nonmetallic fibers

03 p0512 A70-13857

Al and Sn composites reinforced by E glass and silicon dioxide glass fibers compared for tensile strength, noting difference due to resistivity

03 p0514 A70-14314

Titanium carbide based cermets with steel matrices, studying heat treatment effects on hardness

04 p0696 A70-14462

Electrical resistivity, contact resistance and weldability of cast Cu and Ag contact materials reinforced unidirectionally by W wire compared to powder composition

04 p0711 A70-14465

Transient one dimensional heat transfer analysis demonstrating infiltrant melting effect on self heat-retarding porous metal composite during surface melt layer formation

04 p0709 A70-15414

Ni dispersion-strengthened composites from ultrafine comminuted powders, describing forming techniques and test results

04 p0709 A70-15629

Ceramic fibers formation by particles mechanical deformation by extrusion in W matrix, describing grain structure of various extruded metal oxides

04 p0699 A70-15643

Continuous metal fiber composites tensile strength and ductility in terms of plastic instability

05 p0946 A70-16924

Joint design for braze bonding and joining of Al-B composites using Borsic tape backed with alloy brazing foil

07 p1293 A70-18994

Sapphire whisker-Al composites fabrication methods using air elutriation techniques and semiautomatic methods for fiber alignment, discussing elastic modulus, tensile strength, etc

07 p1314 A70-19956

Fiber reinforcement of metals, considering strength of boron, alumina, graphite, silicon carbide and silica glass fibers

08 p1514 A70-20471

Nickel alloy based metal fiber reinforced composites long-time structural stability at high temperatures

08 p1517 A70-21150

Aluminum-base reinforced material synthesis by liquid impregnation, investigating transition layer dependence on holding time and fiber/matrix microhardness

08 p1520 A70-21500

Axial constant load creep and strength rupture measurements of B-coated and silicon carbide-coated B filament reinforced Al alloys

08 p1521 A70-21702

Engineering use of filament reinforced metal matrix composites dependent on fabrication cost reduction, consistent properties and form flexibility

08 p1509 A70-21851

Al alloy matrix composites with beta-SiC whiskers reinforcement, evaluating tensile and fatigue properties

08 p1523 A70-21856

Transverse and shear strengths of Al-B composite materials used in F-111 aircraft components, investigating cold work, thermal treatments and steel wire addition effects

08 p1509 A70-21857

Compression test data of Al-B composites used for predicting structural element failure

08 p1523 A70-21886

Fatigue testing and thermal mechanical treatment effects on uni- and biaxial Al alloy-B composites tensile strength at room and elevated temperatures

08 p1523 A70-21893

Mechanical testing of metal matrix high modulus B-Al filament composites, using unidirectional and multidirectional reinforcement 08 p1523 A70-21894

Tensile, fatigue, creep and stress-rupture behavior of unidirectional, unidirectional off-axis and cross-ply composites of B filaments in Al alloy matrix 08 p1531 A70-21896

Stainless steel wire-reinforced Al alloy diffusion bonded scarf joints, considering aluminum oxide coating and bonding times effects 08 p1509 A70-21906

Tungsten alloy fiber reinforced Ni-base superalloy composites evaluated for high temperature turbojet engine applications, considering stress-rupture strength, oxidation and impact resistance 08 p1523 A70-21907

Composite materials in Co or Fe matrix for solid rotor core materials applications at high temperature and stress, discussing magnetic properties 08 p1524 A70-21908

Fractography of Al-B metal matrix composites to study micromechanical behavior, using scanning electron microscopy 08 p1524 A70-21913

Microstrain characteristics of continuously reinforced W-Cu composites as function of volume fraction of fibers and prestrain, discussing dislocation friction stress 08 p1524 A70-21917

Cold rolling characteristics of unidirectionally reinforced Al-B fiber composites, measuring hardness and tensile properties 08 p1524 A70-21957

Al-B composites mechanical properties, using heat treatments and transverse steel wires to increase matrix shear and transverse tensile strengths 09 p1701 A70-22551

Metal matrix fiber reinforced materials bonding, discussing brazing and fusion and diffusion welding [ASM PAPER W9-23.2] 09 p1690 A70-22557

Tungsten fiber reinforced aluminum composites tensile strength aspect ratio using foil metallurgy technique 09 p1703 A70-22627

Fiber-reinforced composite alloys prepared by controlled dissociation of Au-Ni and Al-Zn solid solutions 10 p1902 A70-23814

Filament-reinforced metallic composites corrosion control by specificity of environment and galvanic interactions between components 10 p1904 A70-24651

Copper alloy composite reinforced by unidirectional solidification of pseudobinary eutectic Cu-ZrCuSi, discussing mechanical properties and electrical conductivity 11 p2066 A70-25775

Metal matrix composites forming processes, describing liquid-metal infiltration, vapor deposition, electroforming, mechanical compaction and unidirectional solidification 11 p2060 A70-26343

Fiber reinforced Al alloys fabrication by thin sheet metallurgy techniques 12 p2252 A70-26887

Fiber diameter effects on metal matrix composites strength from proposed model 12 p2329 A70-28370

Ductile fracture in Al matrix composite reinforced with unidirectional stainless steel fibers described by critical crack tip displacement and fracture strain criteria 13 p2512 A70-28917

Borsic-aluminum composite materials fabrication, properties and applications to aircraft parts 13 p2420 A70-29246

Aluminum-boron composites for aircraft adapter fabrication 13 p2435 A70-29247

Filament reinforced metal matrix composites fabrication and engineering uses 14 p2590 A70-30542

Fe-Al and Fe-Si alloys strengthening by pyrolytic graphite fibers 14 p2595 A70-30543

Metallic base fiber and particulate composites, emphasizing silicon carbide, sapphire, boron and graphite filaments 14 p2597 A70-31168

Eutectic NiAl-Cr structure and high temperature tensile strength as function of solidification rate 15 p2755 A70-31560

Uniaxial yielding correlation with substructure in Al-stainless steel metal matrix composites, using compressive loading test 15 p2756 A70-31565

Filament orientation and fabrication variables effect on Ag matrix-W fiber composite mechanical properties 15 p2756 A70-31569

Beryllium fibers and Al matrix interactions at high temperatures and various durations, investigating diffusion by X ray diffraction, electron microscope and microprobe analysis 15 p2757 A70-31812

Al-B composites forming and machining, discussing tooling, methods and filament orientation [ASM PAPER W70-5.2] 15 p2744 A70-32334

Metal fiber multiple necking effect on uniaxial metal matrix composites ductility and plastic deformation behavior for brass-W model system 15 p2761 A70-32378

Work to fracture measurements on brittle fiber ductile-matrix metal composites, using Charpy test 15 p2763 A70-32832

Lamellar and fibrous Be-reinforced epoxy resin and metal matrix composites, describing preparation and properties 16 p2939 A70-33693

Metal matrix composite resistance spot welding, discussing value of nondestructive tests 17 p3100 A70-34636

Metal matrix alloys with base of Co, Fe or Ni reinforced by transition metal carbide fibers, discussing deformation tests at various temperatures 17 p3124 A70-35142

Deformation behavior of continuous W and B fibers reinforced Al alloy matrix composites, monitoring stress-strain characteristics by X ray diffraction 18 p3272 A70-36036

Rolled fine grained aluminum-alumina particles composites, determining creep strength dependence on temperature and tensile stress axis orientation 18 p3274 A70-36051

Fiber-metal matrix composites for gas turbine blades, discussing stress rupture strength, modulus of elasticity, fabrication, etc [ASME PAPER 70-GT-133] 18 p3302 A70-36827

Al alloy matrix-boron fiber-stainless steel wire composites fabrication into various shapes with desired mechanical properties for aerospace structural components applications 18 p3263 A70-36837

Tungsten fiber reinforced copper based composite material, investigating moulding and sintering conditions effect on mechanical properties 19 p3450 A70-37454

Longitudinal and transverse tensile strengths of Al sheet reinforced with continuous oriented steel wire of various cross sectional shapes 19 p3541 A70-38047

Tensile strength of flat specimens of Ni reinforced by W wire gauze 19 p3452 A70-38435

Mechanical properties, optimum deformation and rupture of W wire reinforced Ni and Ti metal composites obtained by hot rolling in vacuum 19 p3453 A70-38463

Duplex eutectic with Ni-Be fibers embedded in Ni-Cr solid solution matrix, discussing solidification conditions, optimum composition, heat treatment, mechanical properties and oxidation 20 p3647 A70-39107

High strength and stress corrosion resistant materials, considering Ti, Ni, Al alloys, metal-matrix composites and polymers 20 p3655 A70-39666

Ti-Be composite materials production by coextrusion of powders, investigating microstructure by microprobe analysis and X ray diffraction 20 p3649 A70-39945

Steady state and transient fatigue behavior of stainless steel wire-Al alloy composite subjected to push-pull and pull-release frequency tests 20 p3649 A70-39946

Tungsten wire reinforced copper matrix composite, determining fibers pull-out contribution to fracture work 20 p3651 A70-40047

Dynamic elastic moduli of model two phase continuous composites, using polymer and metallic foams 22 p4059 A70-43077

Composites made by unidirectional solidification of eutectics with transition metal carbide fibers embedded in metal matrix, discussing tensile tests [ONERA-TP-853] 22 p4057 A70-43457

Graphite fiber oxidation prevention in metal matrix composites, examining various thermodynamic parameters 22 p4126 A70-43676

Thin metal matrix composite rods elastic properties, examining Al-W system by Young and shear modulus measurements 22 p4061 A70-43687

Specific strength of unidirectional fiber reinforced metal matrix composites, using volume ratio-transfer coefficient diagrams 23 p4209 A70-43939

Phase equilibria, hardness and electroresistivity of Ti-Al-V alloys at solid compound section for reinforced metal composites 24 p4361 A70-45831

Metal matrix composite structures tooling and fabrication processes, considering forming, joining, welding, machining joining, etc [SAE PAPER 700752] 24 p4348 A70-45873

METAL OXIDE SEMICONDUCTORS

Digital adaptive-element building blocks in monolithic Si structures for MOS large scale integra-

METAL OXIDE SEMICONDUCTORS

tion, considering serial/parallel multiplier and shift register chips 01 p0047 A70-10458

Metal-nitride-oxide semiconductor (M/NOS) FET load devices by changing from enhancement to depletion through polarizing voltage 01 p0051 A70-10785

Junction gate and MOS field effect transistors thermal noise calculations, using circuit analysis based on equivalent circuits 02 p0258 A70-12424

MOS structure electrical characteristics dependence on silicon/silicon dioxide interfacial energy and electric charges, considering fabrication difficulties 02 p0350 A70-12541

MOSFET uses in spacecraft electronic subsystems, describing digital control unit and typical logic circuitry 03 p0456 A70-13534

Complementary symmetry MOS/CMOS integrated circuit transient response to electron irradiation 04 p0657 A70-14733

Chromium doping effect on ionizing radiation damage in MOS field effect transistors 04 p0658 A70-14744

MOS devices radiation testing for estimating anticipated threshold voltage shift at various dose levels, including gate bias intermittent application during irradiation 04 p0658 A70-14745

Bipolar n-p-n transistors fabrication to increase driving capabilities of complementary MOS transistors while retaining low power dissipation 05 p0621 A70-16419

Radiation environments effect on logic circuitry constructed of MOS and bipolar transistors, discussing permanent and transient effects 07 p1242 A70-20149

Switching and memory phenomena in semiconductor glasses, thin films and variable threshold metal-oxide-nitride-semiconductor MNOS transistor 08 p1556 A70-21304

MOS transistor amplifier circuits, analyzing circuit parameters for common-source, common-drain and common-gate configurations 09 p1643 A70-22126

MOS structures and transistors emission-current degradation mechanism at heterojunction under ionizing radiation 12 p2194 A70-27165

MOS-FET HF noise quantities computed in terms of substrate doping, angular frequency and gain-bandwidth product 12 p2196 A70-27672

Computer-aided MOS/LSI four phase logic circuit design, discussing software, design cycles and testing 13 p2380 A70-28375

Hysteresis in MOS transistors attributed to trapped charge carriers on oxide near silicon oxide interface 14 p2555 A70-30338

MOSFET integrated circuits radiation resistance measurements under electron irradiation, determining changes in threshold voltage, transconductance and on-resistance for applications in spacecraft 14 p2559 A70-31372

MAGFET devices for integrated circuits, calculating magnetic sensitivity as function of channel aspect ratio and Hall electrode position 15 p2710 A70-32572

Junction and MOSFET transistors thermal noise characteristics at cryogenic temperatures 15 p2710 A70-32585

Ion implantation doping for MOS devices, discussing improved HF performance, integrated circuitry and threshold voltage selection 16 p2872 A70-33054

High speed MOS circuitry design with application to digital equipment, noting low power and high packaging density 16 p2887 A70-33456

Portable MOS memory module with optical loading and electrical readout, using hybrid array of complementary silicon on sapphire chips 16 p2868 A70-33457

MOS transistor associative memory cell design utilizing LSI technology 16 p2869 A70-33464

MOS structure, measuring ionizing radiation effects on interface barrier energies by internal photoemission techniques 17 p3144 A70-35901

MOS devices, investigating laser radiation effects on electrical behavior 18 p3266 A70-36237

MOS structures deep depletion capacitance/voltage characteristics by ramp response method 19 p3389 A70-37972

Large scale array (LSA) MOS devices failure rate prediction model, determining reliability 19 p3391 A70-38847

Epitaxially grown Si contact for area reduction of MOS transistor circuits 20 p3596 A70-39099

METAL OXIDES

Complementary metal oxide semiconductor and bipolar transistors fabrication on same integrated circuit chip by C-squared technology 20 p3598 A70-40130

High voltage MOST silicon integrated circuits, using dielectric isolation and field plate techniques 21 p3798 A70-41214

Metal nitride oxide silicon /MNOS/ integrated circuit transistor, reviewing characteristics, operation mechanisms and applications 21 p3800 A70-42113

Silicon MOSTs LF noise model, discussing noise and gate voltages and trapping efficiency of surface states 22 p3996 A70-42916

MOS field effect transistor, measuring electrons and holes thermal emission rates and activation energies at gold centers in Si 22 p3997 A70-43016

MOS transistor trigger circuit design parameters statistical calculation and optimization by Monte Carlo method using computer 23 p4171 A70-43957

Miniature avalanche MOS diode, investigating capacitance voltage characteristics of deep depletion regime 23 p4172 A70-44007

P- and n-channel MOS transistor instability during superbreakdown voltage application to drain electrode 24 p4319 A70-45811

LSI 4-bit complementary speed /COS/ MOS parallel processor array 24 p4317 A70-46215

Refractory metal-oxygen systems phases and phase relations 02 p0318 A70-12640

Initial oxide film on Cr-Ni steel at high temperatures observed by electron microscope, noting Ni role 04 p0708 A70-15311

Ceramic fibers formation by particles mechanical deformation by extrusion in W matrix, describing grain structure of various extruded metal oxides 04 p0699 A70-15643

Metal oxides additions effect on Ti glass crystallization, studying small and large ion radii 05 p0871 A70-16593

Density, refractivity, thermal expansion coefficient, softening point and soaking stability for glass containing barium, lead, boron, bismuth and titanium oxides 05 p0871 A70-16594

Crystallization and dielectric properties of glass containing barium, lead, titanium and boron oxides, noting frequency and temperature dependence 05 p0871 A70-16595

Oxidation behavior of metals concerning oxide plasticity role in connection with oxide film macro- and microstresses 07 p1305 A70-18968

Refractory oxides synthesized using metal alkoxide thermal decomposition, comparing thermophysical properties with conventional ceramics 07 p1320 A70-19891

Al-Mg oxidation resistance and kinetics, studying Zr, Ce and Be additives effects on oxide films mechanical properties 08 p1517 A70-21130

Al alloys melting in flame furnaces, studying oxidation and various sources of metal losses 08 p1505 A70-21131

Free radicals role in high temperature surface reactions of solid metal oxide particles interacting with unburned flame gases 09 p1629 A70-22320

High temperature fuel cell electrolytes, analyzing electrical conductivity of ternary systems of zirconium, cesium or tantalum and yttrium oxides in fluorite phase 10 p1830 A70-24460

Solid electrolyte high temperature fuel cells electrode materials, investigating various metal oxides 10 p1830 A70-24461

ETA oxides compositions in Hf-Ni-O, Ta-Ni-O and W-Ni-O systems determined by studying 1000 C isothermal sections with X ray diffraction 12 p2255 A70-27607

Low temperature oxidation of metals, discussing logarithmic kinetics of slow growth of oxides 12 p2257 A70-28006

Low resistance small area contacts on semiconductor metal oxides 12 p2288 A70-28057

Band and localized models for electrical conduction of metal oxides, discussing Mott and semiconductor to metal transitions 14 p2627 A70-30498

High temperature molecules matrix isolation in saturated vapor over refractory solids, discussing optical spectroscopy of VO, metal oxide and halide molecules 14 p2545 A70-30903

Failure mode and mechanism in dielectrically isolated IC attributed to metal bridging under planar oxide 15 p2713 A70-32648

Metal oxides thermal control coatings, investigating mechanisms of interaction between constituents by luminescent technique [AIAA PAPER 70-832] 16 p2940 A70-33936

Friction reducing oxide layer effects on Ti alloys low temperature plastic and mechanical properties 19 p3450 A70-37458

Oxide dispersed Cu alloys preparation by surface oxidation of powders, considering structural stability and stress rupture properties 20 p3646 A70-39103

Nonweldable internal flaws detection containing oxides in steel slabs by neutron activation analysis 24 p4376 A70-45750

Thermodynamic equilibrium analysis of metal oxidation and thermal dissociation of oxides in vacuum, noting decreased affinity by evaporation 24 p4361 A70-45835

Stainless steel oxide films structures and chemical compositions, examining oxidation time, polishing conditions, vapor humidity and temperature effects 24 p4362 A70-46191

METAL PARTICLES

NT METAL POWDER

NT POWDERED ALUMINUM

Metal particle and wire combustion using static and flow methods, obtaining experimental results for Al, Be, Mg and B [ONERA-TP-735] 03 p0543 A70-13633

Combustion of stationary particle of metal with boiling point lower than ignition temperature in gaseous oxidizing medium 07 p1419 A70-18753

Metal particle size relation to combustion time using statistical method applied to polydisperse Mg powder 07 p1419 A70-18756

Metal particles additives behavior in solid rocket propellant combustion, using scanning electron microscope 07 p1359 A70-19585

Particle fracture in oxide dispersed stainless steels during plastic deformation at room temperature 09 p1706 A70-22813

Liquid metallic particles fragmentation in two phase flow injected into vacuum, noting atomization enhancement by sodium nitrate 13 p2391 A70-29994

Integral model for combustion of metal particle laden jet mixing with subsonic secondary stream in duct, considering air breathing engine design [AIAA PAPER 70-736] 16 p2964 A70-33490

Aluminum spherical particles nonautonomous and autonomous combustion in O with N or Ar initiated by HF induction heating 17 p3145 A70-35042

Aluminum particle combustibility in deflagration zone of ammonium perchlorate pellets, measuring combustion rate and pyrolytic behavior 17 p3145 A70-35208

Rocket exhaust micro and mm waves attenuation attributed to low ionization potential metal particles in propellants 17 p3196 A70-35215

Kingfisher meteorite metal particles microstructures, discussing phase transformation during reheating by shock 18 p3310 A70-35970

Al particles fusion during combustion of stoichiometric mixtures of ammonium and potassium perchlorate and polyformaldehyde 18 p3299 A70-36246

Particulate matter interaction with ionized gas in external magnetic field and nonequilibrium state, examining free electron density 20 p3677 A70-39324

Thermal radiation spectrum power of small spherical tin and lead particles 20 p3737 A70-39745

Lunar breccia and fine sample metal particles, using optical and scanning electron microscopy and electron probe microanalysis 21 p3899 A70-41529

Metallic Fe grains in Apollo 12 igneous rocks, discussing Ni and Co abundances 21 p3920 A70-41881

Titanium diboride particles contact surface increase during sintering in vacuum as function of temperature 23 p4205 A70-44042

METAL PLATES

Mechanical strength and breakdown metallography of plate shaped structural steel and Al alloy specimen under various HF elastic vibrations 02 p0318 A70-12398

Electromagnetic energy transmission factors for metal-dielectric-metal system, calculating net energy flux, noting effects of metal spacing, time, temperature level, etc [ASME PAPER 69-WA/HT-8] 04 p0784 A70-14822

Radiative heat flux between two parallel copper disks at cryogenic temperature, showing dependence on emitter temperature and spacing [ASME PAPER 69-WA/HT-7] 04 p0784 A70-14823

Crack propagation rate in aluminum alloy plates under cyclic tensile and transverse shear loadings, noting sliding mode increasing effect [ASME PAPER 69-MET-1] 04 p0705 A70-14881

Thermal resistance of multiconduct heat conducting stainless steel plate stacks with different interface purities in vacuum 05 p0957 A70-16293

Thin metal plate surface impedance during excitation by HF electromagnetic field as function of magnetic field, calculating line shapes 08 p1557 A70-21754

Thermal decomposition of ammonium perchlorate and polymethylmethacrylate mixture thin layer between Ti plates in vacuum 09 p1741 A70-22109

Nonuniform stress distribution along side fillet welds and in welded plates of lap joint, discussing tangential stresses and plate width 11 p2058 A70-25598

Two plate meteoroid shields effectiveness determined by analyzing debris cloud ejected behind front plate after hypervelocity impact [AIAA PAPER 69-380] 11 p2138 A70-26132

Metal plates vibration under viscoelastic damping layers using electromagnetic transducer and impact excitation 11 p2145 A70-26702

Strain measurement over large steel plate surface ground to reasonable flatness and in welded joints by applying moire method 11 p2061 A70-26836

Heat conduction for thermally insulated bilayer metal wall for time-variable heat transfer and ambient temperature, using Green function 12 p2330 A70-27292

Dislocation structure during fretting corrosion in steel plates, analyzing via electron microscopy 12 p2258 A70-28318

Cover plates unsteady motion during explosive welding of metals, discussing edge damage 13 p2416 A70-28484

Quality control technique for predicting exfoliation and stress corrosion resistance of Al alloy sheet and plate 13 p2435 A70-29175

Sliding rigid conical indenter friction experiments over work hardenable metal flats in high adhesion conditions, observing forces, stresses and deformation modes 13 p2421 A70-29548

Convective heat transfer in Cu spherical shell and plate in supersonic rarefied gas flow at zero angle of attack from wind tunnel experiments 15 p2824 A70-31497

Charpy impact test evaluation on hot rolled metal plates for low temperature welded structures 15 p2819 A70-32235

Stress concentration around oblique circular cylindrical apertures in steel plates [SESA PAPER 1533] 15 p2820 A70-32306

Biaxial stress effect on fatigue crack propagation in Al alloy plate under reversed bending 15 p2821 A70-32324

Alternating stress required for edge crack propagation in metal plates under tensile loading cycles 15 p2762 A70-32464

Admittance measurements of rectangular or circular waveguide fed aperture antennas illuminating displaced metal plate 16 p2872 A70-32963

Transverse contraction during butt welding of plates of steel and Ti and Al alloys, showing dependence on joint thickness 16 p2916 A70-33053

Powder combustion on metal plate, investigating unburned layer thickness dependence on initial temperature 17 p3198 A70-35738

Pyrex spheres accelerated to 15 km/sec by plasma rail gun to study hypervelocity impact in twin stainless steel and Al targets [AIAA PAPER 69-378] 18 p3342 A70-36685
Welded Al plates high temperature bend tests, describing materials and procedures 18 p3278 A70-37115

High strength Al alloys plate and welds, comparing tear notch tests at cryogenic and room temperatures 23 p4206 A70-44352

Powdered flat steel plates cooling by air blown through pores, determining internal heat exchange coefficients 23 p4283 A70-44731

Finite thickness metal plate eddy current response to pulsed field from aperture probe 24 p4344 A70-45696

Defect effects on welds fatigue properties in low carbon steel plates estimated, using radiograms 24 p4347 A70-45733

Clamped parallelogram metal plate thermal deformation under single surface radiant heating 24 p4426 A70-46009

METAL POLISHING

NT ELECTROPOLISHING

WC-Co alloys noting polishing and grinding effects on residual stress and crack resistance 03 p0508 A70-13145

Band polishing machines slave mechanisms and programmed controllers, describing helicopter longerons finishing process 07 p1291 A70-18829

Gas turbine engine blades grinding and polishing procedures, considering fatigue life increase and physical properties stabilization 07 p1292 A70-18833

Mechanical and electrochemical polishing effect on turbine blade alloy fatigue strength, discussing surface strain hardening as function of temperature in mechanical polishing 07 p1304 A70-18838

Ti alloy band polished surfaces properties, obtaining required residual stresses by process control 08 p1507 A70-21198

Diamond burnishing effects on wear and contact endurance of chromium coatings, investigating surface hardening and residual stresses 13 p2419 A70-28868

Stainless steel oxide films structures and chemical compositions, examining oxidation time, polishing conditions, vapor humidity and temperature effects 24 p4362 A70-46191

METAL POWDER

NT POWDERED ALUMINUM

Rhenium powder sintering activated by palladium additions producing low porosity 01 p0117 A70-10158

Relieving microstrains in Ni powders by cold compaction at room temperature using X ray analysis, discussing polygonization process 01 p0117 A70-10161

Critical diameter and detonation parameters of nitromethane and tetranitromethane as function of powder content 01 p0217 A70-11004

Niobium powder hot pressing compaction in terms of porous body volume viscous flow, determining viscosity shift time dependence 04 p0696 A70-14461

Ni dispersion-strengthened composites from ultrafine comminuted powders, describing forming techniques and test results 04 p0709 A70-15629

Fillers effect on thermal conductivity in porous cermet elements, investigating powdered Ti plates with air replaced by Hg, benzene, ethanol, ether and water vapor 05 p0957 A70-16291

Residual free energy effects on ferrites density and structure after sintering, using powders obtained by thermal decomposition of solid solutions of salts 07 p1355 A70-18703

Chemical composition effects on Zr-Ti, Zr-Si, Ni-Al and Ni-Ti alloy aerosols combustion temperature 07 p1419 A70-18755

Oriented single crystals properties obtained from Mo powder subjected to compacting, annealing in hydrogen and electron beam zone melting 07 p1308 A70-19610

Reduction temperature effects on molybdenum powders sinterability noting dispersion role 08 p1517 A70-21145

Contact compaction methods of metal powders involving vibration, shock, detonation and hydrodynamic pressure 09 p1706 A70-23122

Propellant extinction near powder-metal contact to steady nonsteady combustion mechanism 09 p1742 A70-23228

High intensity ultrasonics for changing solids properties, discussing effects on metal powder sintering, yield strength, fatigue life, crystallization rate, etc 09 p1728 A70-23348

Powder base superalloy with superplastic behavior, ascribing mechanism to migration of second phase gamma prime particles 12 p2252 A70-26889

Porous Ti powder sintering process activation energy determination, noting influence of oxides solution in surface layer of Ti particles 12 p2254 A70-27283

Annealed compressed ground synthetic mica and silver dust composite materials, analyzing physicochemical properties 12 p2260 A70-28319

Metal powder mixtures homogenization time calculation, using Fick equation and matrix model 13 p2433 A70-28845

Powder metal parts induction sintering, comparing performance with conventional method 13 p2420 A70-29249

Tri- and bipropellants in spacecraft propulsion, discussing liquid and powder metals, hybrids, frozen tripropellants, etc 15 p2789 A70-32253

Mo powder compacting by hot pressing, determining activation energy 16 p2931 A70-33222

Carburizing spherical powders of Nb, Mo and W to obtain carbides, noting agreement between theoretical and experimental data 17 p3125 A70-35410

Powdered metallic additions effect on combustion rates of ammonium perchlorate with bitumen and polymethyl methacrylate and potassium perchlorate with bitumen mixtures 18 p3299 A70-36247

Combustion rates and self ignition vs pressure and activity in ammonium perchlorate mixtures with Al and Mg powders compressed to maximum densities 18 p3299 A70-36249

Metal powder rolling process as compaction with plastic particle deformation, deriving pressure distribution on rollers 19 p3434 A70-37451

Iron cyanide surface additives effect on photodamage to ZnO powder, using ESR method 19 p3372 A70-37543

Plasticity and strain hardening in sintered metals, considering pressure at pores and elastoplastic limit under small plastic deformation 20 p3644 A70-38962

Silica marker motion in sintering of loose spherical copper powder aggregates 20 p3647 A70-39109

Titanium powder compacts exothermic solid phase reaction ignition by focused laser pulse, obtaining temperature profile from mathematical model based on energy transport 20 p3639 A70-40473

Photoelastic stress measurement of metal powder particles during sintering, using two dimensional models 21 p3935 A70-41410

Carburization and grain size of tungsten carbide powder from W powder as function of temperature, using optical and electron micrographs 21 p3839 A70-41412

Thermal decomposition of fine-dispersion iron sulfate powders under continuous heating during ferrites manufacture 23 p4205 A70-44041

Self flammability temperature of binary alloy Al-Si powders in aerosol state as function of chemical and phase compositions 23 p4205 A70-44046

Powdered flat steel plates cooling by air blown through pores, determining internal heat exchange coefficients 23 p4283 A70-44731

Sintered material density-sound velocity relation, deriving ultrasonic wave propagation time dependence 24 p4360 A70-45731

METAL PROPELLANTS

Atmospheric contamination due to Be solid propellant exhaust products, discussing pollution levels, governmental restrictions on testing, etc [AIAA PAPER 70-117] 06 p0997 A70-18085

Solid propellant rocket engines design, considering nonlinear longitudinal combustion instability encountered in aluminized propellants 08 p1558 A70-20623

Hybrid rocket engine with solid oxidizer based on ammonium perchlorate and Al, studying performance with FORTRAN 5 program 15 p2787 A70-32273

Metallized solid propellant, calculating condensed phase distribution heterogeneity effect on performance 18 p3300 A70-37207

METAL SHEETS

Annealing effects on cold rolled titanium sheets, noting changes in Young modulus and characteristics of recrystallized titanium 01 p0124 A70-11620

Photogrammetric deformation measurement of thin steel sheets during static bending tests 02 p0302 A70-12653

Inductive eddy current strain gage for repeated strains measurement in magnetic and nonmagnetic sheets offering direct readout and remote recording 03 p0485 A70-13475

Rolling, picking and annealing influence on composition of steel sheet surface 03 p0497 A70-13775

Residual stress distribution in butt joints during welding of sheet Nb measured by extensometer, noting annealing temperature effect on stress relieving 03 p0513 A70-14072

Sound attenuation rate of rectangular flat steel plates contact and branch point relation to velocity difference and absorption length 03 p0526 A70-14353

Divergences in tension textures and values of anisotropy coefficients ascribed to imperfections in cubic texture of aluminum sheet deformed by straining 05 p0927 A70-15995

Young modulus anisotropy and recrystallization texture during annealing in cold rolled TI sheets using Fourier analysis 05 p0862 A70-16200

Stress rupture strength and relaxation and time to failure of AMG-6M sheet under creep using energy dissipation method 05 p0952 A70-17034

Cold reduction effects on press formability of pure Al sheet with allowance for tensile properties and crystallographic orientation 06 p1075 A70-17145

Cold reduction and annealing temperature effects on Al sheet ductility noting roles of hardness, crystallographic orientation and microscopic structure 06 p1075 A70-17146

Harris method for determining inverse pole figures as description of sheet metal texture 06 p1088 A70-17611

Brazing time and temperature effect on depth of Ag based brazing alloys penetration into thin Ti-Al-V sheet substantiated by microprobe analysis 06 p1078 A70-18513

Ti alloy welded sheets bending fatigue test facility, discussing test stand calibration and optimal welding 07 p1291 A70-18824

Vibration damping by sandwich structure consisting of viscoelastic layer between two high Youngs modulus metal sheets 07 p1401 A70-18845

Ni maraging steel sheets tensile strength and elongation anisotropy, studying effects of directional cold work, aging and annealing 07 p1306 A70-19072

High temperature creep rupture tests of arc cast and powder metallurgy wrought unalloyed W sheets 07 p1313 A70-19884

Mo sheet longitudinal and transverse mechanical properties and microstructure after annealing 08 p1517 A70-21199

Cubic texture components preferred orientation shares into rolling texture during cold rolling of aluminum sheets determined quantitatively 09 p1690 A70-22255

Limit and shakedown loads in creep range investigated on sheet rolled aluminum at room temperature for structural design applications 09 p1775 A70-22591

Thickness effects on elongation of sheet type Al alloys, tabulating tensile test results 10 p1887 A70-24043

Elastoplastic compressible sheet metals reinforced by isotropic work hardening under action of bending moments, analyzing stresses and strains 10 p1955 A70-24056

Fiber reinforced Al alloys fabrication by thin sheet metallurgy techniques 12 p2252 A70-26887

Aluminum sheets anomalous plastic behavior under balanced biaxial and uniaxial tensions 12 p2324 A70-27398

Quality control technique for predicting exfoliation and stress corrosion resistance of Al alloy sheet and plate 13 p2435 A70-29175

Al-Mg alloy sheets work hardened plastic properties, tensile strength and elongation 14 p2597 A70-30962

Al alloy welded sheets strength and plasticity under biaxial tension, examining excess elastic energy effects on strain kinetics and rupture 14 p2597 A70-30967

Bend formability and fracture toughness tests on Be ingot and cross-rolled powdered sheet and brake grade block materials [ASM PAPER W70-15.3] 15 p2760 A70-32337

METAL SHELLS

Lateral pressure bulging of superplastic alloy sheet, considering flat circular sheet and bulging into V grooves

16 p2916 A70-32918

Pressure forming Ti sheet alloy blanks in superplastic condition under controlled temperature and strain rate

17 p3117 A70-34402

Ti-Cu alloy sheet material age hardening, considering cold and warm work effects at various stages in aging cycle

17 p3121 A70-34430

Weldability, tensile and fatigue properties of Ti sheet alloys, discussing TIG welds

17 p3121 A70-34431

Strain gage measurements of elastic properties of Ti sheet alloys, computing polycrystalline properties from single crystal values

17 p3121 A70-34433

Ti hot forming, discussing sheet use as aircraft structural material

17 p3098 A70-34444

Forming Ti-Al-V sheet metal in heat treated conditions, showing mechanical properties improvement over mill annealed parts

17 p3098 A70-34445

Ti sheet welded construction for transport aircraft fuselages, assuming use of electron beam and plasma arc equipment

17 p3198 A70-34452

Crack initiation in wrought polycrystalline Be sheet, investigating three point loaded bend fractures of powder and ingot samples by optical and electron microscopy

17 p3122 A70-34551

Electron beam welding for thin steel, nonferrous metals and reactive metals sheets

19 p3436 A70-38073

Electron beam welding for thin copper, carbon and Cr-Ni steel sheets in precision mechanical and optical devices

19 p3436 A70-38075

Fatigue crack growth tests on Al alloy sheets under variable amplitude loading

21 p3831 A70-40749

Polyvinyl chloride sheet steel manufacture, properties and welding methods

22 p4045 A70-42479

Strained state of Ti and steel sheets during unsymmetric rolling, constructing deformed metal particles displacements rates field based on ideal fluid motion equations

22 p4045 A70-42814

Low alloy Mo sheet recovery and aging characteristics studied by X ray scattering

22 p4055 A70-43124

Temperature measurement on thin steel shield subjected to hydrogen peroxide motor exhaust heating at cryogenic temperatures in space

23 p4280 A70-44389

Metal and alloy sheets, investigating deformation and failure under biaxial stretching tensile tests

24 p4358 A70-45240

Al alloy sheets with multicolor protective coatings, measuring surface temperature under solar radiation

24 p4428 A70-45434

Metal sheets thickness measurement and monitoring by through-transmission eddy current nondestructive testing, using phase locked amplifier

24 p4344 A70-45699

METAL SHELLS

Axial compressive forces influence on steel and Al cylindrical shell stability under external pressure

03 p0593 A70-13472

Thin walled metal cylinders residual deformation microstructures under internal impulsive loading

07 p1285 A70-19969

Toroidal metallic shells stability under static loads, determining snap-through pressures in pressure chamber with nitrogen working gas

08 p1588 A70-21195

Rapid expansion of thin walled aluminum alloy cylinders under pulsed magnetic field pressure using high speed streak camera oscillography

10 p1964 A70-25120

Metallic cylindrical shells design reinforced with elastic glass fiber rings, considering elastoplastic deformation

12 p2324 A70-27530

Convective heat transfer in Cu spherical shell and plate in supersonic rarefied gas flow at zero angle of attack from wind tunnel experiments

15 p2824 A70-31497

Internal pressure deformation of thin cylindrical shells of materials with nonlinear stress-strain relations, considering Al alloy shell and axial strain

15 p2816 A70-32009

Metallic shell with passive thermal protection coating, solving boundary value problem for high temperature heating with simplified mathematical model

20 p3739 A70-40296

Rapid expansion of thin walled aluminum alloy cylinders under pulsed magnetic field pressure using high speed streak camera oscillography

20 p3735 A70-40513

METAL SPINNING NT HYDROSPINNING METAL SPRAYING

W, Ta and Mo components economical fabrication by plasma spraying for rocket nozzles, susceptors and crucibles

24 p4350 A70-46355

METAL STRIPS

Elastoplastic stress concentrations calculations in notched strips and shafts under tension, bending and torsion, using approximate method

01 p0211 A70-11425

Al alloy strips weakened by holes, analyzing limiting tensile load-carrying capacity

02 p0384 A70-11741

Coplanar waveguide consisting of thin metallic film strip on dielectric slab with ground electrodes adjacent and parallel to strip for nonreciprocal gyromagnetic device applications

08 p1475 A70-21281

Interdigitated microstrip quadrature couplers suited for monolithic or hybrid thin film microwave integrated circuitry

08 p1476 A70-21291

Radiation pattern of conducting strip excited by linear slot parallel to strip edges, deriving asymptotic solution

16 p2863 A70-33239

Minimal interference thin metal support system for dynamic stability tests of high fineness ratio wind tunnel-models

17 p3063 A70-35657

[AIAA PAPER 69-350] Plane TM wave scattering by systems of two parallel conducting elliptical cylinders, metal tapes and combinations

19 p3374 A70-37278

Scattering structures of two parallel elliptical cylinders, tapes or combinations, deriving surface current density distribution under plane TM wave excitation

19 p3375 A70-37279

Dry and water-saturated sintered fiber metal wick thermal conductivity, obtaining semicompil correlations for solid and fluid phases and void fraction

21 p3945 A70-41041

METAL SURFACES

Metal surface microscopic defects detection and display using diffused radioactive Kr-85 gaseous penetrant for anodized flaws, bearing porosity and turbine blade cracks

01 p0096 A70-10006

Oleic acid concentration effects on electron work function during surface-active agent deposition on Fe, Ni, Cu, Al and steel surfaces

01 p0099 A70-10074

Temperature effect on work function minimum of cesiated W surfaces

01 p0154 A70-10108

Surface roughness effects on dry friction between two metals, considering conical asperities and friction coefficients

01 p0102 A70-10394

[ASME PAPER 69-LUB-10] Friction and surface damage between clean metal hemispheres and flats at low sliding speeds and 25 K room temperature range

01 p0105 A70-11393

Fracture surface topography variation with specimen thickness, studying fatigue crack propagation in Al

02 p0317 A70-12317

Cu, W and oxidized W adhesion to Ni surface, examining before and after adhesion contact with low energy electron diffraction

02 p0318 A70-12535

[ASLE PREPRINT 69-LC-13] Twin wave interferometer and strain gauge mechanism for press-fit measurements of contact deformation on metallic and polymer samples

03 p0484 A70-13426

Solid lubricant films adhesion to metallic surfaces measured using pivot-twist technique

03 p0485 A70-13485

Radiative transfer between two infinite parallel metallic surfaces separated by nonconducting thick film ideal dielectric based on electromagnetic wave theory

04 p0784 A70-14824

[ASME PAPER 69-WA/HT-6] Dimensional analysis for describing steel surface microcracks growth under uniaxial fatigue loading, using stress-intensity factor and crack extension concepts of fracture mechanics

04 p0770 A70-14879

[ASME PAPER 69-MET-G] Reflectance of clean and fluoride coated aluminum surfaces in vacuum UV

05 p0883 A70-16590

Harris method for determining inverse pole figures as description of sheet metal texture

06 p1088 A70-17611

Thermal isolation characteristics of interstitial materials in vacuum environment, inserting materials between contacting metal surfaces at various pressures and temperatures

06 p1181 A70-18143

[AIAA PAPER 70-13] Accommodation coefficients ratio of He 4 to He 3 measured on W and K clean surfaces

06 p1183 A70-18257

Electromagnetic torsion balance measurement of forces exerted on clean Au surfaces by monoenergetic, steady state Ar and Kr beams, calculating thermal accommodation coefficients

06 p1066 A70-18257

Nitrogen molecule-tungsten surface interactions, computing trajectories and accommodation coefficients for various temperatures by equations of motion

06 p1110 A70-18261

Lift and drag forces measured on metal surface inclined to Ar ion stream above and below earth-satellite speeds in free molecular flow

06 p1111 A70-18269

Angular distributions of fast scattered particles resulting from noble gases collision with metal surfaces

06 p1112 A70-18271

Rare gas scattering from Ag surfaces calculated up to earth satellite energy values

06 p1112 A70-18279

Rough metal surfaces thermal constriction resistance for total heat flow through microcontacts

07 p1418 A70-18641

Fcc metals surface changes following adhesion using low energy electron diffraction (LEED), relating intersurface metal transfer to applied adhesive force

07 p1305 A70-18921

Metallic adhesion produced by surfaces compression, discussing asperities plastic deformation and macrodeformation caused by contact area growth

07 p1292 A70-18939

Contact resistance measurements used in contaminant removal and metallic adhesion on iron surfaces

07 p1293 A70-18944

Discharge circuit parameters and heat physical constants of electrode material effects on electrical erosion of metals

07 p1294 A70-19351

Specific radiant heat flow and spectral blackness degree of tungsten with different surface finish

07 p1309 A70-19666

Corrosion cracking mechanism for notched metal surface in aqueous environment under tensile stress discussing electron distribution and H ion concentration

07 p1310 A70-19739

Sand erosion of metals and plastics, discussing effects of impact conditions and impacting particles and target surface properties

07 p1314 A70-20004

Angular and energy distributions of hyperthermal K atoms scattered and ionized by W surface measured as function of beam particle energy

07 p1342 A70-20115

Electron elastic scattering from surface plane of Au and W fcc lattices using quantum mechanics

07 p1343 A70-20120

Metal surface adhesion to materials, examining structure and energy with allowance for environmental effect

08 p1503 A70-20878

Mo mechanical properties dependence on surface defects and Ti films

08 p1515 A70-20937

Metal erosion under liquid drop impingement attack, investigating damage from microplastic deformation to surface material removal using wheel and jet apparatus

08 p1519 A70-21354

Solid Mo, Ni, Ta and W surface energies determined by multiphase equilibration technique

08 p1522 A70-21749

Metals yield locus in strain hardening range in sigma-tau plane determined using slip theory, considering Bauschinger effects

09 p1771 A70-22395

Molecular vibration spectra from inelastic interaction between electrons and absorbed molecules at metal-vacuum interface

09 p1732 A70-22904

Silicon oxide films coated satellite aluminum surfaces solar absorptivity and thermal emissivity, noting suitability as temperature control coatings

09 p1613 A70-23514

Laser beam interaction with metals on basis of energy balance measurements, obtaining time dependent radiation reflectance

10 p1898 A70-23982

Intensity vs voltage curves for LEED beams from clean Ni surface, calculating Bragg spectrum with energy diagram method

10 p1927 A70-24077

Synthetic molybdenum disulfide crystal properties compared to natural crystals, discussing friction coefficient, adherence to metal surfaces, etc

10 p1907 A70-24787

Surface wave reflection during propagation along transversely magnetized ferrite plate on metal backing, using perturbation theory to find cylindrical wave field

10 p1844 A70-25163

Metal surfaces contact with cones and pyramids asperities, analyzing surface roughness effects on dry friction

11 p2060 A70-26412

DC air flow plasmatron arc chamber operation with metal surfaces used for charge stabilization, obtaining I-V characteristics and gas flow parameters in quasi-limiting region

11 p1984 A70-26738

Fretting and fretting fatigue in metal-metal contacts, showing friction as important parameter

12 p2253 A70-27110

Friction and wear of Ni sliding on Ni, Cu on Cu and Au on Au tested in vacuum at room temperature with constant load

12 p2242 A70-27229

Oxygen adsorption on W(110) surface determined for coverage as function of exposure by Auger electron spectroscopy

12 p2180 A70-27253

Nusselt numbers of nonstationary and stationary heat transfer between metal spheres and liquid flow, showing bulk heat and geometry dependence

12 p2330 A70-27288

Heat resistance of machined stainless steel and molybdenum contact pairs in vacuum, discussing compressive loads and surface defects effects

12 p2243 A70-27290

Low temperature oxidation of metals, discussing logarithmic kinetics of slow growth of oxides

12 p2257 A70-28006

Polyurethane and metal surface layers deformation related during sliding friction in presence of liquid media, noting friction coefficient- deformation relation

12 p2244 A70-28284

Pulsed plasma jet radiant heat flux effect on celophane film coated, polished and etched metals, noting erosion destruction

12 p2282 A70-28287

Metal surfaces friction and wear processes dynamic equilibrium noting loading conditions effects

13 p2423 A70-29766

Titanium effect on iron and steels nitriding at high temperature, obtaining high surface hardness

13 p2423 A70-29773

Nondestructive noncontacting microwave depth measurement of thin slits and cracks in metal surfaces

14 p2584 A70-30507

Cobalt surface X ray analysis after spark erosion treatment, revealing phase with high temperature stability

14 p2596 A70-30840

Chemical and electrochemical corrosion resisting primers for Mg surface coatings in machine parts

14 p2598 A70-31293

Wear intensity of abrasives during fine grinding of Armco Fe, Ti and Ti alloys, comparing friction and chemical composition effects

15 p2743 A70-31640

Spilled Hg removal from metal surfaces, describing brush technique based on capillary action

15 p2748 A70-32775

Metal property effects on deformation and strain energy distribution during hypervelocity projectile cratering

15 p2824 A70-32790

Intensity and velocity distributions of thermal energy argon atoms scattered from silver (111) face, using time of flight methods

16 p2953 A70-33007

Upstream wear of small metal orifices under large pressure drops in phosphate ester hydraulic fluids due to current driven electrochemical corrosion

16 p2919 A70-33629

Thermal constriction resistance between contacting metallic paraboloids applied to instrument bearings

16 p2998 A70-33902

Kirchhoff law validity for freely radiating metallic surfaces, using emissometer to measure hemispherical emittance

16 p2999 A70-33903

Contacting metal surfaces thermal conductance prediction in vacuum, formulating dimensionless parameters in terms of properties, surface measurements and load/temperature conditions of contact

16 p2932 A70-33919

Surface interaction between Al single crystals in ultrahigh vacuum, investigating galling, distortion and adhesion

16 p2924 A70-34168

Diffuse-specular models for radiant heat interchange prediction for isothermal-adiabatic surface enclosure tested for steel and gold

16 p3003 A70-34197

Anodic breakdown characteristics of Ti alloys as function of metal surface condition

17 p3113 A70-34366

Metal-silicate rock friction in ultrahigh vacuum of near environment

17 p3101 A70-34760

Metal surface ionization measurements for upper atmosphere and interplanetary space energetic neutral hydrogen analyzer design

17 p3138 A70-35309

Collection of papers on protective coatings on metals

17 p3101 A70-35390

Collection of papers on protective coatings on metals, Volume 2

17 p3102 A70-35403

Electron impact desorption kinetics of ions and neutrals from polycrystalline W surfaces, using cylindrical magnetic spectrometer

18 p3225 A70-36321

Metal surface through and part through cracks, investigating dimensions and material properties effects on fracture stresses

18 p3278 A70-36565

Low energy ion beam system for studying electron ejection from controlled metal surfaces, describing vacuum, ion source, lens and mass spectrometer components

18 p3261 A70-37086

Fcc metals surface self diffusion temperature dependence, using model based on complex defects contribution to diffusion flux at high temperatures

19 p3483 A70-37545

Critique of paper on electron diffraction study of Ce adsorption on W surface, discussing electron work function changes and data discrepancies

19 p3473 A70-37548

Materials jet-like ejection from metal surfaces under high density laser radiation action, investigating erosion and plasma spectrum

19 p3448 A70-38734

Metallic surfaces vacuum electric spark alloying, investigating pressure effects on coating layer thickness and area

20 p3636 A70-39195

Gadolinium surface work function from contact potential difference against platinum

20 p3687 A70-39996

Metal surfaces friction and wear processes dynamic equilibrium noting loading conditions effects

20 p3638 A70-40099

Heat resistance of machined stainless steel and molybdenum contact pairs in vacuum, discussing compressive loads and surface defects effects

20 p3638 A70-40340

Surface films effect on thermal contact conductance of aluminum surfaces contacting in high vacuum environment

21 p3944 A70-41024

Pt and Ag surface effects on LOX nucleate boiling heat transfer, considering embedded abrasives relationship to hysteresis

21 p3947 A70-41056

Hydrogen adsorption and coadsorption with oxygen on W single crystal surface measured by mass spectroscopy and low energy electron diffraction method

21 p3862 A70-41887

Tungsten adatoms migration and binding energies on W surfaces, taking relaxation effects into account

21 p3862 A70-41888

Ruby giant pulse laser produced plasmas from aluminum and copper surfaces, measuring electron and ion energies by time of flight and retarding potential techniques

21 p3860 A70-41925

Angular distribution of thick target bremsstrahlung produced by electron bombardment of Be, Sn and Au surfaces

21 p3854 A70-42020

Molybdenum trisilicide-tantalum trisilicide and molybdenum trisilicide-tungsten trisilicide interdiffusion for molybdenum disilicide protective coating on Ta and W surfaces

21 p3840 A70-42056

Room temperature oxygen adsorption on tungsten surfaces

22 p4087 A70-43235

Concentrated pulsed electromagnetic fields penetration into conductor, assuming magnetic field along metal surface

22 p4041 A70-43621

Damage data comparison for vibratory cavitation and liquid impact on aluminum alloy, stainless steels and pure nickel

23 p4203 A70-43870

Precious metals, measuring tension, grinding and polishing induced surface plastic deformation effects on electron work function and exoemission

23 p4204 A70-43927

Thermal radiation emissivity predictions for metal surfaces at cryogenic temperatures, comparing anomalous skin effect and Drude single electron theories

23 p4218 A70-44388

Spectral bidirectional reflectance measurements of rough metallic surfaces for reflected energy spatial distribution determination in radiative heat transfer problems

23 p4281 A70-44446

Heat resistant surface diffusion alloying of Ni alloys with Cr, Ti and Si saturation

24 p4361 A70-45834

Electrochemical corrosion of metals, discussing passivity and passivating techniques, inhibitors and resistant alloys

24 p4361 A70-46142

Thermal constriction resistance due to nonuniform metal surface conditions, considering macroscopic contact resistance for nonuniform interface pressure distribution

24 p4429 A70-46177

Spark erosion or plasma jet treatment effects on Co surface structure, describing allotropic delta phase

24 p4364 A70-46221

Diffusing element deposition on metal surface during saturation from gas phase based on calculation of equilibrium composition of reaction mixture

24 p4364 A70-46333

Diffusive carbon redistribution in Mo during interaction with Ni and Cr protective coatings

24 p4364 A70-46334

METAL VAPORS

NT MERCURY VAPOR

NT SODIUM VAPOR

Thermodynamic and transport properties of Na, K, Rb and Cs vapors to 3000 K, for use in liquid metal coolant and power systems

01 p0214 A70-10299

Helium-cadmium laser operation, using DC cathodoresis to maintain spatially uniform optimal Cd vapor concentration

01 p0110 A70-10562

Mg vapor and oxygen surface reactions in MgO deposits, using atomic absorption spectrophotometry

02 p0250 A70-12006

Sonic waves induced by shock of laser produced brass and graphite vapor in air at atmospheric pressure using high speed shadowgraphs

05 p0857 A70-15802

Electron work function variation of W in Ba-Cs-Sr vapor combinations determined using thermionic diode

05 p0891 A70-15974

Refluxing capsule tests of refractory metal alloy-boiling alkali metals corrosion compatibility, noting role of capsule geometry

06 p1087 A70-17510

Surface shielding from reentry radiation by injecting metal vapors into oxygen bearing boundary layer, calculating particle size distributions, optical depths and attenuation factors

06 p1041 A70-18163

[ALAA PAPER 70-156] He-Cd laser output improved by transverse magnetic field application

06 p1084 A70-18619

Effusion steady state pressures time dependence of carbon monoxide and calcium vapors generated during calcium oxide-graphite interaction

11 p1995 A70-26602

Parametric resonances at zero field crossing levels of optically pumped atoms on alkali vapors, noting applications to weak magnetic measurements

13 p2456 A70-30034

Microwave harmonic generation by nonlinear plasma-metal junctions noting calcium, gallium, molybdenum, gold, copper and platinum cathodes

14 p2549 A70-30438

Optimum alkali metal vapor humidity for turbine equipment estimated from energy output

14 p2535 A70-31008

Humidity measurement for alkali metal vapor in turbines by electric calorimeter with two heaters

14 p2587 A70-31009

He-Cd laser with cathaphoretic transport and diffusion return path, noting condenser critical temperature for radiation noise reduction

15 p2751 A70-31987

CW Cd vapor laser oscillation achieved with slotted hollow cathode discharge containing He carrier gas at pressures of several Torr

15 p2751 A70-31988

Initial stages of Ti vapor deposition on Mo, using secondary ion-ion emission and mass spectral analysis

15 p2757 A70-32120

Alkali metal vapors diffusion coefficients in inert gases, determining atomic interaction parameters

19 p3473 A70-38190

Binary Nb vapor systems mutual diffusion coefficients concentration and temperature dependences, discussing interatomic bonds and melting point of alloys

19 p3454 A70-38715

Metal vapors electrical conductivity and density measurement at high temperatures and supercritical pressures

20 p3648 A70-39637

Projected nuclear MHD system conditions, examining electrical measurements in K vapor with diode at atmosphere pressure and high temperatures

20 p3681 A70-40006

Low voltage slotted hollow cathode laser tube design with transverse discharge operation and uniform axial distribution of laser media, including metal vapors

21 p3834 A70-40571

Temperature, metal vapor density and energy balance in Ar shielded welding arc with Fe electrodes

22 p4043 A70-42381

Metal vapor flow measurement by quadriplanar mass spectrometer for control of thin film depositions by evaporation

23 p4198 A70-44872

METAL WHISKER REINFORCEMENT

METAL WHISKER REINFORCEMENT

U WHISKER COMPOSITES

METAL WORKING

- NT BULGING
- NT CLADDING
- NT EXPLOSIVE FORMING
- NT FORGING
- NT HYDROFORMING
- NT HYDROSPINNING
- NT MAGNETIC FORMING
- NT METAL DRAWING
- NT SIZING [SHAPING]

Mo coated with Ni-base Nimonic and Co-base heat resistant alloys, for working degree effect on creep rupture strength

01 p0126 A70-11646

Forming techniques to overcome pressing behavior of maraging steels, noting tendency to thin during stretching and reluctance to stretch

03 p0497 A70-13620

Al extrusions, discussing tooling, controls, indirect extrusion, drawn tubing and painted extrusions

03 p0512 A70-13777

Electrochemical machining based on reverse plating useful in gas turbine industry

04 p0699 A70-15398

Solution treating temperature and microstructure effects on hot rolled Ni base alloy properties

07 p1306 A70-18995

Laser systems application to automatic or semiautomatic materials processing in metal working and microelectronics, including hole drilling, silicon wafers scribing, etc

08 p1502 A70-20820

Earing during rolling of high purity aluminum on broad hot-strip mill, investigating thickness, temperature and composition relationship

09 p1692 A70-22641

Vacuum rolling of high strength hard-workable dispersion-hardened Nb base alloys excluding recrystallization

09 p1692 A70-22756

High power CW carbon dioxide laser design and operation for use as heat source in metal fusing, welding and cutting

10 p1897 A70-23816

Cost effectiveness in Ti forming, discussing materials, tooling and fabrication cost ratios

10 p1970 A70-23852

Creep forming application in producing aircraft parts from metal sheets, plates and extrusions, discussing blank forming and drawing

10 p1893 A70-23854

Metal working technology of Ti and alloys for structural parts fabrication for Concorde aircraft, describing laser cutting, electron beam welding, explosive forming, etc

10 p1895 A70-24594

Nickel base alloy as die material for creep forming titanium

11 p2060 A70-26424

Flash, gas-pressure and electron-beam welding of airframe steels

[ASTME PAPER MR-69-712] 12 p2239 A70-26987

Aerospace materials machining processes guidelines to minimize structural failures caused by lack of surface integrity

[ASTME PAPER MR-69-730] 12 p2239 A70-26988

Electrochemical machining of metals with complex shapes, discussing performance capabilities and cost efficiency

[ASTME PAPER MR-69-711] 12 p2239 A70-26989

Electric discharge machining technology, discussing quality control factors

12 p2239 A70-26990

Structural materials chemical and metallurgical factors controlling mechanical properties, machinability and finished part producibility

[ASTME PAPER MR-69-731] 12 p2240 A70-26992

Short time tensile properties of thermomechanically treated astrolloy showing improvement due to refined gamma precipitate and grain boundary carbides

12 p2256 A70-27610

Metals and metal alloys ductility development, discussing plastic flow problem in metal working

12 p2327 A70-28144

Engineering development role in metal forming industry expansion, discussing metals ductility or plasticity increase for extending processes

12 p2244 A70-28146

Die surface composition effects on lubricant efficiency in metal working judged by friction coefficient and surface damage

13 p2418 A70-28830

Cold worked metal, estimating lattice imperfections mol fractions based on reversible cell thermodynamics

15 p2676 A70-31564

Bend formability and fracture toughness tests on Be ingot and cross-rolled powdered sheet and brake grade block materials

[ASM PAPER W70-15.3] 15 p2760 A70-32337

Metallic superplasticity and superplastic alloys in simple tension, forming tubes and sheets of superplastic Sn-Pb eutectic alloy by pressure forming techniques

16 p2916 A70-32916

Ti-Al-Nb system creep strength, oxidation resistance, density, forging and rolling

17 p3120 A70-34426

Metastable ageable beta Ti-Mo-V-Fe-Al alloy, discussing plate, sheet and forgings producibility, metallurgical characteristics and structural properties

17 p3121 A70-34435

Metal powder rolling process as compaction with plastic particle deformation, deriving pressure distribution on rollers

19 p3434 A70-37451

High magnetic fields applications, emphasizing metal forming and superconducting rings levitation

19 p3471 A70-37948

Long structural shape production for titanium and super alloys, discussing rolling, extrusion, drawing, frictionless forming and filler techniques

19 p3437 A70-38420

Drilling rates improvement for Ti by adding ultrasonic vibration to conventional process

19 p3437 A70-38421

Cold form rolling of various metal-shape combinations to close tolerance net shapes without machining

20 p3637 A70-39940

Cold metal working techniques, describing electromagnetic, explosive, ultrasonic, high velocity hammering, stretch forming, deep drawing and superalloy shaping

20 p3639 A70-40445

Thermal processes during electron beam metal working, deriving relations for temperature field

21 p3833 A70-41123

Succession of passes in rolling and hot shaping of thin walled angle steel

22 p4045 A70-42813

Metal deforming machines permissible impact velocities determination

22 p4046 A70-42815

Metal matrix composite structures tooling and fabrication processes, considering forming, joining, welding, machining joining, etc

[SAE PAPER 700752] 24 p4348 A70-45873

METAL-GAS SYSTEMS

Dissolved gases and carbon effect on transition temperature from plastic to brittle state of high melting metals including niobium and vanadium

01 p0124 A70-11615

PdH system electrical resistivity, studying hydrogen concentration role

12 p2282 A70-26900

Dissociation energy of gaseous TiN molecule at high temperature

15 p2695 A70-32748

Yield strength of Nb-O single crystal solid solutions as function of temperature

15 p2763 A70-32808

Refractory metals penetration by liquid alkali metals along grain boundaries and crystallographic planes, considering threshold oxygen concentration

16 p2932 A70-34203

Physical properties and structure of Cr-Ni austenitic stainless steels with high Mn and N content as function of temperature

17 p3125 A70-35143

Corrosion and mechanical properties of Cr-Ni-Mn-N austenitic stainless steels

17 p3125 A70-35144

Yield stress in electron beam-refined Nb-N solid solution at room temperature and specific strain rate range

19 p3454 A70-38813

Niobium suboxide formation in Nb-O system from supersaturated solution of oxygen in niobium after annealing

20 p3648 A70-39630

Hydrogenated Ni elastic limit discontinuity, discussing Portevin-Le Chatelier effect

23 p4208 A70-44921

METAL-METAL BONDING

Ta-V-Cb and Ta-V-Ti alloys used as brazing fillers for refractory metals bonding, noting wetting and flow characteristics, shear strength, remelt temperatures, etc

02 p0319 A70-12753

Diffusion welding of dissimilar metals with or without intermediate layers, assessing joint strength factors

03 p0498 A70-14071

Al weld metal compositions and hydrogen content effects on weld porosity, locating hydrogen in weld by radioactive tracers

08 p1507 A70-21485

Nondestructive test procedures development and implementation for bond strength of honeycomb sandwich and metal-metal adhesive bonded structures of F-5 and T-38 aircraft

09 p1692 A70-22798

Adhesive bond stress of aircraft structural joints between metal plates of variable cross section designed for shear

10 p1957 A70-24296

Joining small components made of difficult to weld materials by percussive welding consisting of stationary and moving electrode actuated by pretensioned spring

10 p1894 A70-24298

Metal contact welding principles, materials geometries and machines

10 p1897 A70-25311

Mechanism and kinetics of intermetallic layers for mation and growth in welded joints of unlike metals

11 p2067 A70-26594

Solid state welding processes for space, nuclear and deep submergence technologies, discussing diffusor bonding of Al and stainless steels

13 p2419 A70-29117

Organic adhesives for bonding continuous surface and core-to-face joints, discussing strength, environmental resistance, producibility and reproducibility

13 p2419 A70-29118

Explosive bonding applications, safety, detonation velocity, cost and handling

13 p2419 A70-29119

Weld transition joints from explosive bonded Al-steel and Al-Cu composite plates, discussing mechanical and electrical properties

17 p3102 A70-35551

Tungsten adatoms migration and binding energies on W surfaces, taking relaxation effects into account

21 p3862 A70-41888

Hydrostatic and anisotropic piezoresistance in organometallic crystals, noting iridium and platinum complexes with maximum metal-metal interaction

22 p4086 A70-43021

METAL-WATER REACTIONS

Metal corrosion product dissolution in reactor cooling deionized water, investigating Cu, W and Cd using chemical analyses

10 p1904 A70-24398

METALLIC PLASMAS

NT CESIUM PLASMA

Transverse Kelvin-Helmholtz instability in rotating thermally ionized alkali metal plasmas /Q machines/, analyzing LF drift wave edge oscillation using dispersion equation

02 p0348 A70-12239

Heavy negative charges formation in ionized Hg vapor by electron capture, basing demonstration on magnetic field effects on free electrons or charged droplets

08 p1550 A70-20594

Ionized potassium plasma three body recombination coefficient measurements showing inverse temperature dependence

09 p1735 A70-22778

Variational model of collisional-radiative recombination of atomic ions in hydrogen and alkali plasmas

09 p1735 A70-22828

Thermal properties associated with temperature gradients in He-K plasma, studying mass motions initiated by cold wall contact

09 p1735 A70-22844

Laser-produced Al plasmas linear and nonlinear behavior, using framing camera and energy absorption measurements to study outermost ion energy increase and luminous front expansion

09 p1736 A70-23187

Nonlinear parametric excitation of stable resonant drift waves by mode-mode coupling in potassium plasma of Q device

11 p2090 A70-26020

Tuned laser radiation to diagnose and enhance local conditions in alkali metal plasma

12 p2281 A70-27793

Heat energy transport mechanism in metallic plasma deposited coating, investigating role of elastic crystal lattice vibrations, electrons, molecules, etc

13 p2419 A70-28858

He-Ne laser radiation absorption in dense Li plasma, calculating absorptivity for bremsstrahlung and photoionization

13 p2465 A70-29710

Potassium plasma-electron beam interaction, studying LF instability due to electron and ion heating

22 p4083 A70-43385

Plasma formation from transition metal target under monopulse laser radiation, noting absorbed surface density energy role in onset

24 p4385 A70-45463

METALLIZING

Wear resistance of Ti alloys chromosilicified by thermal diffusion in vacuum

01 p0115 A70-10072

Dielectric overcoatings effect on Al interconnections electromigration in IC metallization, noting longer interconnections between failures

01 p0153 A70-10083

Open circuit development in microcircuits metallization and processing to eliminate nonuniformity, voids and microcracks

02 p0316 A70-12056

Beam-lead substrate package for six stage TTL shift register, discussing metallization systems for interconnections and beams

02 p0271 A70-12846

Alloying elements effects on vanadium alloys case hardening by boronizing

07 p1303 A70-18742

Chromized molybdenum thermal stability under cyclic induction heating and subsequent air cooling

07 p1304 A70-18743

Diffraction gratings produced by holographic techniques and vacuum metallization to provide high performance

07 p1279 A70-19049

Sputtering method used for applying metallizing layer to ceramics in producing ceramic to metal seals

10 p1895 A70-24555

Thermal coated extendable boom for space applications, describing construction and vacuum metallizing technique

12 p2242 A70-27266

Plasma torch for increasing material fusion temperatures in metallization methods

12 p2244 A70-28072

Inconel 713 alloy, investigating chromaluminization treatment effect on fatigue strength at 700 C

18 p3278 A70-37211

Fluxless paste for thermomigration calorizing stainless and heat resistant steels and alloys

19 p3434 A70-37459

Titanizing Armco iron and carbon steels, examining diffusion layer structure and phase composition

19 p3451 A70-37460

Metallization systems materials for IC, discussing environmental stability, metals electromigration, electrochemical corrosion tests, etc

23 p4173 A70-44533

IC metallization systems in semiconductor devices fabrication and packaging, assessing metals alternate to Al for electromigration difficulties avoidance

24 p4319 A70-46075

METALLOGRAPHY

X ray metallography methods applied to high temperature protective coating development, refractory alloys strengthening and metal fatigue studies

04 p0711 A70-15706

Metallographic observations on slow crack growth in Be monocrystals suggesting explanation for transition regions

16 p2933 A70-34275

Metallographic preparation of materials for microstructural studies, discussing deformation- free sampling, metal polishing, microphotography and quantitative microscopy

21 p3825 A70-40895

Pulsed eddy currents in metals nondestructive testing, discussing masked probes, reflection systems, correlation and filtering methods, etc

22 p4028 A70-42593

Metallurgical interaction phenomena in welding zone of heat treated Inconel 600, using hot ductility testing and metallographic methods

22 p4046 A70-43150

Martensite plate substructure in Fe-Mn-Cr-C alloy, using transmission electron microscopy and diffraction study

24 p4358 A70-45238

METALLOIDS

NT BORON

NT BORON ISOTOPES

NT SILICON ISOTOPES

Simultaneous titration of gases, metalloids and metals in steels and refractory alloys by far UV vacuum spectrometry

[ONERA-TP-765] 08 p1455 A70-21842

Solid state plasmas waves and oscillations in metals, semimetals and semiconductors, noting applications for microwave devices

19 p3479 A70-37944

METALLORGANIC COMPOUNDS

U ORGANOMETALLIC COMPOUNDS

METALLURGY

Beryllium properties and processing including magnesium thermal reduction, power purity, oxygen content, grain size and temperature effects on mechanical properties

01 p0124 A70-11618

Cobalt effects on Ni-W alloys mechanical and metallurgical properties including thermal stability, fabrication response, weldability and impact resistance

07 p1306 A70-19070

Strength, corrosion resistance and fabricating qualities future improvements in metals and alloys, discussing chemical composition approach, dispersion hardening, superplasticity, etc

08 p1518 A70-21267

Apollo command and service modules from metallurgical viewpoint

09 p1766 A70-22792

Structural materials chemical and metallurgical factors controlling mechanical properties, machinability and finished part producibility

[ASTME PAPER MR-69-731] 12 p2240 A70-26992

Superplasticity in physical metallurgy, comparing with metal deformation modes

12 p2257 A70-28145

Physical metallurgy, discussing metals, intermetallic compounds and polymorphic metals properties, single crystals production, etc

12 p2257 A70-28272

Pure metals structure effect on friction and lubrication under steady slip in ultrahigh vacuum at low temperatures

19 p3438 A70-38729

Be production, development, potential uses and properties

[ASM PAPER GG8-102] 20 p3650 A70-39970

Metallurgical changes induced by planar shock wave propagation through metals and alloys, describing shock-hardened metals macro and substructure

20 p3652 A70-40142

Band structure contributions to elastic shear constants of hexagonal close packed metals, using optimized model potential

21 p3839 A70-40600

Metallurgical interaction phenomena in welding zone of heat treated Inconel 600, using hot ductility testing and metallographic methods

22 p4046 A70-43150

Nondestructive tests and controls in metallurgy and nuclear technology - Conference, Saclay, France, June 1968

22 p4040 A70-43617

Annealing response of explosively shock loaded Ni, thoria-Ni, Chromel-A, Inconel 600 and thoria-Chrome, noting activation temperature inverse relation with stacking fault free energy

23 p4204 A70-43883

Liquid oxygen and water cavitation effects on lead, copper, nickel, iron and zinc

01 p0115 A70-10071

Antarctic twilight observation by photoelectric scanning spectrometer in search for metallic emission lines in upper atmosphere

01 p0081 A70-11231

Metal and alloys micro and macro stress-strain behavior data correlated for linear differential transformers, strain gages, longitudinal resonance waves and X ray diffraction

01 p0092 A70-11248

Acoustic emission analysis for material evaluation and polymorphic phase transformations characterization for metals and alloys, discussing electronic instrumentation and experimental techniques

02 p0276 A70-12551

Soviet collection of papers on metal science and corrosion problems covering welding, heat treatment, Cr-Mn steel, Ti alloys, etc

03 p0509 A70-13276

Optical and mechanical techniques for space experiment structures and metals satisfying space requirements

03 p0492 A70-13848

Materials science experimental and diagnostic phases in mechanisms of metal erosion by impacting dust particles

[ASME PAPER 69-WA/MET-8] 04 p0704 A70-14760

Extrusion forces required for metals and alloys determined by mathematical equations correlating extrusion pressures with process variables, discussing lubrication systems effectiveness

[ASME PAPER 69-WA/LUB-6] 04 p0697 A70-14767

Torsion tests on cylindrical plastic metals, considering shear stresses calculation as function of torsion angle and changes determination as function of increasing cold work

05 p0927 A70-15996

Micromechanisms of fracture in metals and polymers before plastic deformation onset, discussing macroscopic polymer properties from microstructure and molecular structure

05 p0937 A70-16365

Testing equipment and methods for metallic materials selection for low temperature applications, characterizing plasticity by yield strength, tensile strength, elongation, etc

05 p0864 A70-16805

Metal content effects on evolution tracks of five solar mass stars with different chemical composition, discussing Magellanic Clouds composition

05 p0919 A70-16936

Globular clusters in M31, discussing metallicity and heavy element enrichment in Andromeda

06 p1138 A70-17306

Impurities effect on grain boundaries composition and brittle fracture of metals

06 p1087 A70-17608

Time dependent relaxation model for heat flux in metals from quantum mechanical form of Boltzmann transport equation, yielding damped wave equation for temperature

06 p1090 A70-18612

Oxidation behavior of metals concerning oxide plasticity role in connection with oxide film macro- and microstresses

07 p1305 A70-18968

Ultrasonic vibration effect on strength and plastic properties of metals undergoing torsion tests

08 p1520 A70-21499

Metals thermal conductivity at high temperatures determined by direct electrical heating method, considering specimen geometry effects on radiation losses

08 p1497 A70-21526

Terminal mechanical characteristics of metals after ambient-temperature high energy rate forming compared with low rate processes

08 p1520 A70-21554

Metal-poor stars evolution during hydrogen and helium burning from main sequence to giant branch, estimating relative cluster ages

09 p1755 A70-22507

Phase diagrams of metal systems - U.S.S.R. Conference, Moscow, June 1967

09 p1702 A70-22559

Metal and alloys hardness measuring devices at high temperatures in ultrahigh vacuum based on use of synthetic sapphire pyramidal indenter

09 p1675 A70-22566

Metals and plastics tensile strain rate sensitivity tested by drop weight tests, obtaining dynamic and static stress-strain curves

09 p1704 A70-22725

Atoms diffusion mobility enhancement in metal systems during irradiation suggested due to change in electrons energy states

09 p1707 A70-23192

Metallic materials homogeneous and nonhomogeneous corrosion kinetics based on superposition principle of independent partial electrode reactions

09 p1707 A70-23422

Metal probes friction coefficient and impact temperature during impingement onto rotating chromium steel disk related to speed under various atmospheres

09 p1708 A70-23425

Enstatite chondrites and achondrites electron microprobe analysis for Si, P and Ni in metal grains and associated schreibersite and perryite

10 p1935 A70-23849

Amplitude dependence of Young modulus defect in metals during large stress HF oscillations

10 p1956 A70-24247

Thermomagnetic transport coefficients in anisotropic metals based on theory for galvanometric properties, producing closed form expression for conductivity tensor

11 p2097 A70-25618

Thermal conductivity coefficient of metals and alloys above 1000 C by longitudinal heat flow method

11 p2065 A70-25761

Thermal conductivity of metals and alloys, separating electronic and lattice contributions

11 p2098 A70-25762

Star 15 Vulpeculae metal lines analyzed by growth curve differential method

11 p2113 A70-26464

Zeeman effect on solar flares metallic lines splitting

11 p2106 A70-26592

Diffusion processes rate changes in metals and alloys resulting from radioactive emission, noting role in stress rupture strength mechanisms

11 p2068 A70-26595

Olivine and metal compositions of pallastic meteorites by electron microprobe measurements, obtaining cooling rates

12 p2296 A70-26895

Thermal metal fatigue testing, including resistance to cyclic temperature variation, operating conditions simulation and stress-strain determination

12 p2322 A70-27218

Metals thermal properties simultaneous determination at high temperatures, describing measuring equipment operation and circuitry

12 p2206 A70-27219

Metals purity, gas content and porosity effects on nature and size of material zone affected by laser beam treatment

12 p2250 A70-28219

Physical metallurgy, discussing metals, intermetallic compounds and polymorphic metals properties, single crystals production, etc

12 p2257 A70-28272

Polycrystalline lanthanides and metals resistance to deformation under compression and tension at different temperatures and strain rates

12 p2257 A70-28273

Metallic state basic parameters determined by electron transfer technique, discussing ion charges, electron and hole concentrations current scattering cross sections, etc

13 p2433 A70-28886

Metallic materials under cyclic stress conditions, investigating creep rate dependence on cycling frequency and impurities during static-to-dynamic transition

13 p2513 A70-28993

Ammonium ions elimination from atmospheric moisture condensates by treatment with metal-exchange resins, discussing volume sorption capacity

13 p2362 A70-29339

Geoactive ionizing radiation emitted by solar flares having metallic spectral lines of various brightness intensities

14 p2630 A70-30219

Concentrations model of metallic atoms and ions in upper atmosphere with deposition from meteors, using diffusion equation

14 p2580 A70-31262

Metal to hydrogen ratio for sun, Hyades and F-G stars based on photoelectric measurements of weak metal lines

14 p2652 A70-31388

Impact testing of metals - ASTM Conference, Atlantic City, June 1969

15 p2758 A70-32232

Metals and hard materials sliding wear due to granular abrasives in heated vacuum chamber

17 p3100 A70-34646

Finite element formulation for large strain and displacement problems with emphasis on elastic-plastic behavior in metals

17 p3184 A70-34905

Soft metal and dilute alloy dynamic yielding, describing high dislocation mobility effects on mechanical properties

17 p3191 A70-35459

Onsager reciprocal relations experimental validity in irreversible processes application to metals, electrokinetics, isothermal diffusion, heat conduction, chemical reactions, etc

17 p3197 A70-35538

Cryogenic attachment for cooling and tilting metal samples in electron microscope

18 p3259 A70-36474

Extrusion forces required for metals and alloys determined by mathematical equations correlating extrusion pressures with process variables, discussing lubrication systems effectiveness

[ASME PAPER 69-WA/LUB-6] 19 p3435 A70-37604

Solid state plasmas waves and oscillations in metals, semimetals and semiconductors, noting applications for microwave devices

19 p3479 A70-37944

Continuum bodies strain subjected to shearing stresses in incremental form based on slip theory of metals plasticity

19 p3549 A70-38668

Am and Ap stars metallic absorption lines, determining photometrical indices correction

19 p3523 A70-38689

Ceramic whisker and continuous filaments reinforced metals, discussing processing, properties, matrices selection of reinforced composites, etc

20 p3650 A70-39948

Metals purity, gas content and porosity effects on nature and size of material zone affected by laser beam treatment

20 p3643 A70-40094

Globular cluster color-magnitude diagram parameters, examining giant branch and metal content

21 p3889 A70-41153

Metal cracking and fracture mechanics under creep conditions at elevated temperatures, discussing notch rupture testing

21 p3937 A70-41437

Abundance ratios of metallic line star 15 UMa, using absorption spectrophotometric observations

21 p3926 A70-42270

Impurities concentration estimate in metals by low temperature residual resistivity, investigating contact and contactless measurements

22 p4052 A70-42573

Compressional sound waves electromagnetic generation in metals in static magnetic fields, examining acoustic amplitude variations

22 p4074 A70-42968

Ultrasound inductive absorption coefficient of metals in quantized magnetic field

22 p4075 A70-43474

Photometric search for metal deficient stars, using objective prism plates and four color Stromgren technique

22 p4109 A70-43736

Neutron activation determined concentrations of Ni, Ga, Ge and Ir in iron meteorites with silicate inclusions

24 p4401 A70-45376

Angle beam ultrasonic testing of metals, considering beam and depth scanning characteristics and wave reflectability of various flaws

24 p4343 A70-45687

Magnetic and nonmagnetic metals flaw detection, using orthogonal eddy current probe to reduce permeability and conductivity variations effects

24 p4344 A70-45700

Metals flaw detection, using electronic balancing type eddy current detecting coil

24 p4336 A70-45701

Metallic rods and tubes permeability and resistivity nondestructive measurement by AC apparatus with self balancing sensing coil, using computer program for data reduction

24 p4345 A70-45704

Nondestructive thermal and thermochemical treatment penetration depth measurement in metal, examining magnetic test and ultrasonic techniques

24 p4346 A70-45721

Stress-strain curves of polycrystalline metals and composites using single crystal elastoplastic model

24 p4425 A70-45779

Geoactive ionizing radiation emitted by solar flares having metallic spectral lines of various brightness intensities

24 p4398 A70-46294

METAMORPHISM [GEOLOGY]

Age and initial strontium for Guarena chondrite, determining differential evolution of Rb/Sr systems involving simple metamorphism of closed systems or multistage processes

03 p0576 A70-14088

Shock and thermal metamorphism of olivine trachybasalt by nuclear explosion at Nevada test site

05 p0843 A70-16946

Static and shock kink bands in biotite deformed by metamorphism, meteorite impact, nuclear explosion and laboratory experiments

09 p1665 A70-22053

Apollo 11 lunar crystalline rock samples petrology, discussing shock and other metamorphic effects on mineral structure

21 p3897 A70-41516

Apollo 11 lunar soil and breccia shock metamorphism, examining plastic deformation structures in plagioclase, pyroxene and olivine

21 p3897 A70-41520

Shock metamorphism, grain size and mineralogy of lunar surface regolith materials

21 p3901 A70-41543

METASTABILITY

U METASTABLE STATE

METASTABLE ATOMS

Ionization and metastable excitation in low energy collisions of ground state argon atoms formed by charge transfer

14 p2618 A70-30121

Nitrogen deactivation by ground state atomic oxygen resulting in metastable oxygen atom as auroral green line source

17 p3080 A70-35770

METASTABLE STATE

Stellar systems evolutionary stages, considering gravitational instability in rotating expanding gas, relaxation, viscosity, transition to metastable state and drift effect on geometry

02 p0376 A70-12445

Quantitative separation of metastable and cubic chromium carbides in alloyed Cr steels utilizing hydrogen peroxide

03 p0504 A70-12981

Lattice misfit influence on metastable omega phase morphology and stability in Ti transition metal alloys

03 p0508 A70-13146

Metastable diatomic N beam scattering from Teflon and Cu surfaces measured for velocity and angular distributions

06 p1112 A70-18273

Metastable tau-phase in Fe-Ni-B melt solidifying into boride, noting lattice constant and solubility

07 p1307 A70-19393

Metastable austenitic steel mechanical properties after thermomechanical treatment with deformation, discussing stress-strain curves to exhibit yield point

08 p1525 A70-21963

Metastable level populated by dissociative recombination mechanism, estimating efficiencies of various processes

09 p1745 A70-23438

Ternary metastable phase diagram for W-Ti-B system at room temperature

10 p1905 A70-25226

Metastable time-of-flight technique for measuring free molecular flow velocity distribution

12 p2231 A70-27255

Metastable He ion two photon decay, observing photon coincidence angular correlation in spectral distribution

13 p2456 A70-29811

Ionization and metastable excitation in low energy collisions of ground state argon atoms formed by charge transfer

14 p2618 A70-30121

Metastability effects on plastically deformed Al, showing superplastic flow

15 p2764 A70-32902

Metastable beta phase decomposition in Ti alloy during mechanochemical treatment and aging, determining correspondence to alpha phase segregations via electron microscopy

16 p2931 A70-33207

Phase diagrams of high strength metastable Ti beta alloys, showing minimum quantity of alloying elements for solid solution retention

17 p3119 A70-34418

Metastable ageable beta Ti-Mo-V-Fe-Al alloy, discussing plate, sheet and forgings producibility, metallurgical characteristics and structural properties

17 p3121 A70-34435

Signal to noise ratios for metastable and ion detection of excited neutral molecules in beam

18 p3262 A70-37096

Lifetimes and fine structure of differentially metastable autoionizing states of negative He ion in axial magnetic field, using time of flight techniques

19 p3473 A70-37746

Beta Ti-V-Cr-Al phase transformations below 500 C, discussing metastable phase, bcc formation and thermodynamics

20 p3646 A70-39106

Metastable excitation levels in np/4f configuration for population inversion, discussing free electron collisions, forbidden line intensity and flow density pressure 20 p3642 A70-39751

Metastable beta Ti alloy as-quenched microstructure stability with respect to thin foils transformation during electrolytic polishing and bulk specimens during cold rolling 21 p3841 A70-42150

Upper atmosphere ionization balance, examining metastable species in E and F regions 22 p4106 A70-43306

Nonequilibrium solidification and metastable stable phase transformation during heating of Al-Mo and Al-Cr alloys 24 p4360 A70-45829

Fe-Ni-Mn ternary martensitic alloy, discussing metastable miscibility gap island existence in bcc phase 24 p4363 A70-46193

METAZOA

U ANIMALS

METEOR BURSTS

U METEOROID SHOWERS

METEOR HAZARDS

U METEOROID HAZARDS

METEOR TRAILS

Ionized meteor trails initial radii statistical characteristics determined for two models 01 p0192 A70-11537

Atmospheric density in meteor region and atmospheric wind conditions determined from meteor trail drifting and artificial noctilucent clouds 03 p0563 A70-13178

Human eye image accumulation effect and meteor brightness estimation dependence on angular velocity based on visual and telescopic observations 03 p0569 A70-13358

Meteor trail drift characteristics from telescopic observations, determining velocity and diffusion coefficient 05 p0920 A70-16975

Wind velocity measurements by coherent radar pulse method of meteor trail observations 06 p1141 A70-17739

Faint meteor ablation processes, presenting evidence of solid consistency prior atmospheric entry, vaporization, wake blending and trails 06 p1151 A70-18481

Polarization- and space-diversity reception techniques for radio links based on diffraction from ionized meteor trails 07 p1378 A70-18990

Meteorite fireball track projected on earth surface determined from nearly overhead observations 07 p1387 A70-19629

Derived winds, wind shears and densities accuracies obtained by radar meteor trail technique 07 p1237 A70-20281

Meteors spectral intensity variations along flight path noting color dependence on brightness 08 p1572 A70-20946

Atmospheric particle interaction layer in front of meteor body, discussing ionization, diffusion, excitation, recombination, heat generation and luminosity 09 p1761 A70-23059

Meteor ionized trails initial expansion and diffusion resulting in dissociation and ionization of air molecules through collision, using electromagnetic wave scattering 09 p1762 A70-23177

Meteor trail angular dimensions determined by frequency scanning method involving minimum points on reflected signal characteristics 11 p2107 A70-25556

Human eye image accumulation effect and meteor brightness estimation dependence on angular velocity based on visual and telescopic observations 11 p2118 A70-26723

Auroral green line decay of atomic oxygen measured photometrically from multiple exposure spectra of meteor wakes 12 p2304 A70-27713

Small meteor streams trajectories and radiants from epsilon-Lyrids, alpha-Coronids and phi-Draconids observations by amateur astronomers 12 p2311 A70-28307

High altitude meteor winds, investigating atmospheric tides and short term wind oscillations, wind shears and drift nature 14 p2601 A70-30122

Altitude distribution of radar-signal-reflecting points and ionization in meteor trails 14 p2635 A70-30308

Meteor trail radiant, velocity and altitude measurement by obliquely incident radio waves 14 p2635 A70-30309

Transverse structural function of velocity field of turbulent motion in upper atmosphere, using meteor speed radio observations 14 p2635 A70-30312

Forward and backscattering meteor radio echo intensity variations during decay under molecular and turbulent diffusion, recombination and trapping 14 p2635 A70-30313

Phase angle gauge measurement of meteor shower radiants, using radar observations of signal scattering in meteor trails 14 p2582 A70-30314

Meteoroid radio reflections time variation based on observations at two frequencies, analyzing angular dimensions in reflecting regions 14 p2635 A70-30315

Radio wave scattering and echo intensity at inhomogeneous underdense meteor trail allowing for electron density, trail formation time and diffusion coefficient 14 p2636 A70-30316

Ionized meteor trail radio signal reflections, observing duration and echo quantity random deviations and activity coefficient at specified times 14 p2636 A70-30318

Meteor radio path activity coefficient, reflections density distribution, characteristic heights and mean durations, noting meteor velocity effects 14 p2636 A70-30319

High stability oscillators frequency check, using meteor trails and combined least squares and moving averages methods 14 p2583 A70-30320

Frequency synchronization of far spaced high stability oscillators with aid of meteor trails, discussing signal retratranslation and duplex methods 14 p2636 A70-30321

Vaporization of small meteor particles with identical surface temperature, considering radar communication based on reflection from ionized trails 14 p2636 A70-30323

Meteor radio reflections time-amplitude characteristics, discussing dependence on mirror point position in trail, wavelength, diffusion factor and initial radius 14 p2636 A70-30324

Radio echoes duration distribution from supercondensed meteoric trail emphasizing effects of recombination, adherence and turbulent diffusion 14 p2636 A70-30325

Radio wave reflection from ionized meteor trails, calculating propagation parameters by computer algorithm based on cylindrical approximation method 14 p2636 A70-30327

Wind velocity determination by radar tracking of meteor trails, investigating errors 14 p2572 A70-30328

Correlation characteristics of turbulent motions in atmospheric meteor region, discussing diversity and single point reception methods 14 p2572 A70-30329

Errors estimation in wind velocity values by radio echo observations in meteor trails of different densities 14 p2572 A70-30330

Radio observations of dense briefly visible Leonid meteor shower with fixed pencil beam antenna in coping with wave scattering in trails 15 p2796 A70-31511

Meteor radiant, drag and altitude via CW radar observation of meteor trails 15 p2800 A70-32150

Meteors spectral intensity variations along flight path noting color dependence on brightness 15 p2806 A70-32758

Fireball of 25 April 1969 crossing England, Wales, Irish Sea and northern Ireland, recovering meteorites in northern Ireland 16 p2973 A70-33117

Meteor deceleration rates in atmosphere, using base line radar measurements 18 p3313 A70-36294

Atmospheric density from radar observations of meteor trails drift, using wind velocity semidiurnal components amplitudes 18 p3253 A70-36994

Meteor radar echoes of parallel and perpendicular polarization from ionized transient trails with linear electron densities 18 p3317 A70-36995

Na D lines emission cross sections measurement from ionic and neutral gases collisions at simulated meteor conditions 18 p3318 A70-37014

Delay time between beams reflected from different parts of meteor trail, using phase invariant and frequency scanning methods 19 p3512 A70-37313

Radar tracking of meteors with slow drift velocity, improving accuracy via echo frequency multiplication 19 p3514 A70-37644

Upper atmosphere wind, density, temperature and pressure from Soviet meteor data 19 p3412 A70-37651

Meteor velocity determination by CW radar for constant phase angle, describing reflected signal processing 19 p3514 A70-37655

Meteoroid flux density from radar measurements, noting detectability dependence on initial ionized trail radius 19 p3515 A70-37660

Atmospheric turbulence scale and dissipation from 80 to 120 km, using photographic observations of Leonid meteor trails 19 p3515 A70-37663

Electron photodetachment rate from meteor radar echo duration during night and daytime observations 19 p3515 A70-37664

Optimal reception points for radar ranging measurement of angular coordinates of meteor trails, using central transmitter 19 p3515 A70-37665

Phase meter for measuring angular coordinates of reflecting meteor trails 19 p3526 A70-38777

Spectral energy distribution of meteor trail in Leonid meteor shower from photographic analysis 19 p3526 A70-38779

Spectral energy distribution curves and color indices of specific meteor trails observed on 12 August 1959 and 25 July 1963 19 p3526 A70-38780

Wind motions from meteor trails observation during IQSY, tabulating amplitudes and phases of constant, diurnal, semidiurnal and 8-hr components 19 p3526 A70-38788

Meteor trails angular coordinates, using phase difference in pairs of spaced antennas with unequal base lengths 19 p3433 A70-38789

Characteristic dimensions of large and small scale atmospheric turbulence by meteor trails photographic observations, determining energy dissipation 19 p3526 A70-38790

Meteor trail angular dimensions determined by frequency scanning method involving minimum points on reflected signal characteristics 21 p3892 A70-41306

Ionization and loss processes for meteoric elements in lower ionosphere, suggesting hydrates formation role in alkali metal ions depletion 22 p4106 A70-43305

Air current in upper atmosphere meteor zone above equator, noting diurnal and semidiurnal harmonics in wind velocity components 23 p4188 A70-44049

Meteor trails isotropic diffusion in presence of moving point source of ionization with variable intensity, calculating plasma density on and near trajectory 23 p4240 A70-44084

Upper atmosphere tidal pressure and wind variations from meteor trail drift data 23 p4215 A70-44266

METEOR 1 ROCKET VEHICLE

Meteorological rocket system Meteor 1 firing procedure 07 p1395 A70-20254

METEORITE COLLISIONS

Worldwide data inventory of rock features associated with meteorite impact structures, including photomicrographs of petrographic features 01 p0069 A70-10223

Meteoroid collision hazards of space travel, discussing meteor flux, mass and impact measurements 02 p0360 A70-11668

Meteoroid impacts as sources of seismic energy on moon, using projectile impact coupling to seismic waves in vacuum chamber experiment 04 p0751 A70-15056

Meteoroid impact mass loss and formation of planets, investigating projectile-ejecta ratio and dependence on escape speeds 05 p0910 A70-16393

Canadian Shield ridges and meteorite impact scars, discussing state of earth crust during meteoritic bombardment of earth and moon 08 p1563 A70-20500

Tungusk meteorite atmospheric shock waves obtained from simulation experiments based on forest damage 08 p1572 A70-20944

Meteorites explosive fragmentation under aerodynamic loads simulated by steel balls shot into increasing-density target, discussing parameters 08 p1572 A70-20947

Tungusk meteorite atmospheric shock waves obtained from simulation experiments based on forest damage 15 p2806 A70-32756

Meteorites explosive fragmentation under aerodynamic loads simulated by steel balls shot into increasing-density target, discussing parameters 15 p2806 A70-32759

Vredfort Ring origin, discussing paleomagnetic evidence to choose between meteorite impact or terrestrial cause 16 p2899 A70-34050

Mathematical model of asteroidal evolution and meteoritic mass distributions under collisional fragmentation using power law 18 p3312 A70-36213

Structural configurations effect on momentum imparted to spacecraft by hypervelocity meteoroid impact 21 p3938 A70-41879

Preferred disorder and shock histories of chemical group 4A meteorites from metallographic and X ray diffraction, discussing preterrestrial shock loading 21 p3920 A70-41940

Electron pulse generator for imaging of glass microspheres simulating meteorite flight and impact in evacuated vessel [SMPT PREPRINT 96] 22 p4036 A70-43059

METEORITE CRATERS

Worldwide data inventory of rock features associated with meteorite impact structures, including photomicrographs of petrographic features 01 p0069 A70-10223

Meteor explosion theory of origin of lunar craters and round maria, suggesting endogenic origin 01 p0193 A70-11592

Optical studies of deformational structures of minerals from meteorite craters and cryptoexplosion structures 02 p0292 A70-12510

Hypervelocity impact craters formed in low and variable strength laboratory materials to provide insight into formation mechanics and resultant structures of meteorite craters 03 p0603 A70-14349

Volcanic and meteoritic processes compared as lunar cratering agency, tabulating terrestrial lopolith and cryptoexplosion structures 05 p0913 A70-16553

Tungusk meteorite as comet nucleus, discussing comet structure, composition and behavior analysis 08 p1572 A70-20943

Lunar crater meteoritic origin argument based on comparison with earth crater structure 09 p1751 A70-22195

Microscopic meteoritic spherules in soil surrounding terrestrial impact craters 09 p1758 A70-22745

Meteor explosion theory of origin of lunar craters and round maria, suggesting endogenic origin 09 p1763 A70-23436

Nonlunar origin of tektites indicated from molten glass dispersion generated by terrestrial crater-forming meteorite impact 12 p2302 A70-27584

Meteorite craters on U.S.S.R. territory, discussing impact, explosive and complex craters 12 p2311 A70-28308

Long term effects model evaluation of meteoritic impact against lunar surface compared with analyses of Lunar Orbiter photographs 14 p2645 A70-31062

Tungusk meteorite as comet nucleus, discussing comet structure, composition and behavior analysis 15 p2806 A70-32755

Lake covered ancient meteorite impact crater in Canada, noting eroded rim and microscopic shock criteria 15 p2732 A70-32849

Tenoumer crater meteorite impact origin from shock metamorphic features analysis 20 p3619 A70-39216

Shock metamorphism in lunar microbreccias and loose regolith materials, assuming crater formation by meteorite impacts 21 p3902 A70-41551

NT TUNGUSK METEORITE

Twilight and nightglow measurements with stratospheric balloons, discussing use for upper atmosphere exploration, meteoric influence and French network 01 p0079 A70-11217

Meteorites fossil tracks due to cosmic radiation heavy nuclei 02 p0361 A70-11748

Lunar surface samples characteristics correlation with terrestrial igneous rocks /basalts/ and eucrite meteorites based on alpha scattering analysis 07 p1380 A70-19203

Meteor ablation, investigating removal rate of molten film and droplet evaporation 09 p1754 A70-22476

Solar corpuscular streams effect on meteoric particles behavior in circular orbit around sun, determining lifetime on basis of mass loss due to pulverization 09 p1763 A70-23382

Radioactive dating of meteorites based on high temperature release of iodine-correlated Xe129 and Xe128 10 p1949 A70-25328

Serra de Mage meteorite impact history from charge particle track analysis, noting feldspar content 13 p2497 A70-29854

Astronomical, geometrical and physical selectivity factors of forward scattering radar observation concerning meteor weight 14 p2635 A70-30310

Saint-Severin meteorite thermoluminescence from mineralogical fractions separated by density 15 p2800 A70-32025

Fireball of 25 April 1969 crossing England, Wales, Irish Sea and northern Ireland, recovering meteorites in northern Ireland 16 p2973 A70-33117

Meteorites and celestial products legal status with respect to rights of property 17 p3173 A70-35793

Photometric reduction of meteor luminosity to photovisual /international/ system 19 p3515 A70-37662

Chondritic meteorite thermal histories based on K-Ar dating using Ar 39/40 method 21 p3921 A70-41974

Schenectady meteorite recovery, discussing mass, size, physical characteristics, cosmic ray track, crystalline structure and age 23 p4241 A70-44258

Meteors and meteorites research, noting fireball photointerpretation, simulated meteors, theoretical equations, etc 23 p4256 A70-45039

METEORITIC COMPOSITION

Ca-rich basalt achondrites cosmogenic isotopes characteristics, discussing lunar or cosmic origin 01 p0174 A70-10136

Petrological, X ray and chemical analyses of Muzaffarpur Ni-rich ataxite, showing kamacite, taenite and minor schreibersite composition 01 p0177 A70-10328

Chondrite-normalized lanthanide pattern of silicate inclusion of Woodbine iron meteorite, showing differences from mesosiderite phase and chondrite 01 p0177 A70-10340

Nitrogen abundances measured in enstatite chondrites by inert carrier gas fusion extraction technique, noting agglomeration of chondrules 01 p0179 A70-10475

Neutron activation analysis for U and Th in various tektites, discussing evolution and extraterrestrial origin 03 p0576 A70-14090

Isotopic composition of meteoritic Ti determined in Ivigtut galea, Plainview chondrite, Canyon Diablo troilite and Canyon Diablo metal 03 p0576 A70-14091

Isotopic composition and contents of xenon and krypton in Pesyanoe meteorite suggesting presence of solar type gas component 04 p0754 A70-15274

Allende carbonaceous chondrite radionuclide composition and concentration determined by nondestructive gamma ray spectrometry 04 p0754 A70-15275

Bronzite, hypersthene and amphibole chondrites examined by X ray diffraction for inert gas retention ages relationship to shock and reheating 05 p0912 A70-16448

Chemical compositional evidence of Needles /California/ iron meteorite, suggesting distinct fall nature 05 p0912 A70-16465

X ray diffraction analysis for composition and structure of meteorites found in Kansas, classifying as hypersthene and bronzite chondrites 05 p0912 A70-16466

I-Xe dating of Abee enstatite chondrite by combined neutron activation and mass spectrometric analysis 05 p0915 A70-16829

Microtektites chemical analysis data providing appraisal of strewn field boundaries, implying lunar origin 05 p0916 A70-16837

Ni-Cr content and variability in Ivory Coast tektites using atomic absorption and X ray emission techniques 05 p0916 A70-16837

Correlation between O isotope ratios and composition of tektites investigated for origin of tektites 05 p0917 A70-16840

Electron microprobe determinations of Si concentrations in metal of iron meteorites, showing weak evidence for Si presence in earth core 05 p0921 A70-17094

Cliftonite occurrence, internal structure, orientation within kamacite and implications on origin of diamonds in meteorites 05 p0921 A70-17095

Tektite field studies in China concerning stratigraphic occurrence and chemistry 06 p1148 A70-18393

Australasian microtektite compositional trends compared with critical plots enabling distinction between rocks formed by igneous sedimentary and vapor fractionation processes 06 p1150 A70-18477

Rb 87-Sr 87 age determination of carbonaceous chondrites, showing agreement among petrological classification types 06 p1150 A70-18480

Faint meteor ablation processes, presenting evidence of solid consistency prior to atmospheric entry, vaporization, wake blending and trails 06 p1151 A70-18481

Pueblo de Allemande chondrite unextractable carbon content using meteorite pyrolysis, obtaining aromatic hydrocarbons 07 p1380 A70-19204

Half life of Mn53 calculated from measured activity in sample from Fe meteorite and isotopic ratio Mn53/Mn55 07 p1337 A70-19226

Iron troilite meteorites lead isotopic, Pb and U concentrations, considering fractionation and terrestrial contamination effects 07 p1388 A70-20035

Bismuth concentrations in various carbonaceous and equilibrated chondrites determination by neutron activation technique 07 p1388 A70-20036

Carbonaceous chondrites primordial He and Ne isotopes variations 07 p1388 A70-20037

Satellite recording of electron-positron annihilation gamma emission on Cosmos 135 artificial earth satellite relating to meteors antimatter nature 07 p1371 A70-20334

Ti demonstrated as predominantly chalcophilic in highly reduced enstatite chondrites and achondrites 07 p1391 A70-20352

Uranium abundance in hypersthene chondrites determined by homogenized fission track analysis, comparing age estimation with iron meteorite event occurrence 07 p1391 A70-20354

Carbonaceous material genesis in Tieschitz meteorite from electron microprobe analysis, discussing chondrule formation process residue likelihood 08 p1578 A70-21561

Allende meteorite showing presence of Ca-Al-rich glasses associated with other crystalline phases 08 p1579 A70-21562

Microscopic meteoritic spherules in soil surrounding terrestrial impact craters 09 p1758 A70-22745

Rare gases abundance patterns on earth and in chondrites, proposing chemical adsorption mechanism at planetesimal stage during accretion 09 p1764 A70-23610

Carbonaceous meteorites analyzed for soluble organic compounds, carbonate and residual carbon, showing endogenous nature 10 p1935 A70-23812

Angra dos Reis stone meteorite containing cosmogenic and fissionogenic xenon 10 p1935 A70-23850

Ureilite structures and relationship to carbonaceous chondrites, considering chemical composition, diamond content, age, size, etc 10 p1941 A70-24552

Chondrites elements fractionation in solar nebula starting from carbonaceous material 10 p1949 A70-25329

Composition and monoclinic parameters of chromium sulfide mineral breznaitite in metal matrix and silicate inclusions of Tucson meteorite using electron microprobe 11 p2110 A70-26004

Olivine and metal compositions of pallastite meteorites by electron microprobe measurements, obtaining cooling rates 12 p2296 A70-26895

Iron-nickel alloy phase and diffusion relationships, composition gradients and hardness variations involving long time metallic meteorite anneals 12 p2252 A70-26964

Neutron capture effects in Gd from Norton County meteorite by isotopic composition analysis 12 p2300 A70-27524

Ar 37 and Ar 39 isotopes in recently fallen iron-ataxite and stony meteorites, discussing relevance to cosmic ray variations in space 12 p2309 A70-27950

Seymour coarse octahedrite, compositional and mineralogical relationships 13 p2487 A70-28695

Microchondrules from chondritic meteorites, investigating morphology, composition and structure 13 p2487 A70-28696

Iron meteorites electrolytic corrosion using potentiostatic technique, noting roles of Ni content and crystal structure 13 p2432 A70-28697

Holbrook chondrite specimen, discussing effects of weathering, leaching and trace elements enrichment over period of time before recovery 13 p2487 A70-28698

Pu/U ratio in St. Severin meteorite at time of Xe retention beginning 13 p2488 A70-28723

Majorite garnet in veinlet of Coorara meteorite suggesting transformation from pyroxene 13 p2492 A70-29267

Total nitrogen content determination in silicate samples of rocks, synthetic silicate standards, NBS steels and meteorites using inert carrier-gas extraction-gas chromatography 13 p2362 A70-29497

Serra de Mage meteorite impact history from charge particle track analysis, noting feldspar content 13 p2497 A70-29854

He, Ne, Ar and Xe in plagioclase concentrate separated from Serra de Mage meteorite feldspar 13 p2497 A70-29855

Weekeroo Station iron meteorite silicate inclusions chemical composition compared to chondrites 13 p2497 A70-29858

C13/C12 component composition from carbonaceous chondrites and terrestrial samples, showing similar fractional patterns but isotope variations 13 p2497 A70-29860

Gold and iridium distribution in stony meteorites, discussing metal silicate fractionation process during chondrite formation 13 p2497 A70-29862

Lunar, meteoritic and terrestrial silicate rock chemical individuality based on atomic ratios 15 p2799 A70-31896

Enstatite chondrites K, Rb and Sr concentrations, measuring ages from Sr87/Sr86 ratios 16 p2974 A70-33649

Chromatographic analysis of organic matter in Pueblito de Allende meteorite 17 p3173 A70-35754

Chondritic and achondritic meteorites Zr and Hf abundances, distributions and ratios, using thermal and neutron activation analyses 18 p3310 A70-35968

Kingfisher meteorite metal particles microstructures, discussing phase transformation during reheating by shock 18 p3310 A70-35970

Fireballs atmospheric debris collection by high altitude filtration, describing analysis results 18 p3311 A70-35971

Lunar tidal force influence on meteoritic material fission before impact, calculating internal to explain topographical features 18 p3319 A70-37051

Sodium line in meteor spectrum, determining electron temperature and number of atoms as velocity and height function 19 p3514 A70-37600

Allende Type III carbonaceous chondrite, examining rare earth and other elemental abundances 19 p3519 A70-38028

Galactic cosmic rays temporal and spatial variations in solar system, discussing nuclear active particles and spallation products depth distribution in meteorites 19 p3509 A70-38143

Thermal release profiles and retention coefficients of injected argon ions for silicates and iron simulating meteoritic materials 19 p3474 A70-38601

Chondrites and terrestrial rocks trace elements by neutron activation analysis, discussing radiochemical separation and computer analysis of gamma ray spectra 20 p3582 A70-38980

Silicate inclusions in iron meteorites analyzed by microprobe and classified according to phase assemblages, compositions and textures 20 p3701 A70-38981

Stony meteorites radionuclides gamma emission measurement, determining specific activity ratios 20 p3703 A70-39322

Carbonaceous chondrites noble gases measurement by mass spectroscopy, discussing compositional trends and origins 20 p3703 A70-39323

Chromite, zircon and quartz crystals in Muong Nong type tektites by X ray diffraction, discussing possible impact origin 20 p3709 A70-40088

Dosso stony meteorite gamma emitters radioactivity by nondestructive spectroscopy, obtaining quantitative analysis by least squares method 21 p3893 A70-41446

Mineralogy and petrology of lunar rock samples indicating meteoritic increments 21 p3900 A70-41539

Mineral chemistry of Apollo 11 igneous rocks, soil and breccia samples, comparing with meteorites 21 p3773 A70-41545

Elemental composition and structure of metallic iron particles in lunar fines compared to meteorites, using neutron activation technique 21 p3774 A70-41556

Allende meteorite age determination, probing K, U and rare gases in whole rock and chondrule samples 21 p3920 A70-41939

Preferred disorder and shock histories of chemical group 4A meteorites from metallographic and X ray diffraction, discussing preterrestrial shock loading 21 p3920 A70-41940

Chondrites Tl content by neutron activation analysis 21 p3921 A70-41941

Nitrogen content of Odessa and Canyon Diablo iron meteorites from thermal neutron activation, Kjeldahl distillation and alkali fusion methods 21 p3921 A70-41942

Lake Toba, Sumatra as possible tektite source region based on surrounding welded tuffs composition 21 p3923 A70-41996

Schenectady meteorite recovery, discussing mass, size, physical characteristics, cosmic ray track, crystalline structure and age 23 p4241 A70-44258

Fe meteorites with high Ge content, tabulating concentrations of Ni, Ga, Ge and Ir 23 p4241 A70-44259

Neutron activation determined concentrations of Ni, Ga, Ge and Ir in iron meteorites with silicate inclusions 24 p4401 A70-45376

Abiotic synthesis of meteoritic aliphatic hydrocarbons produced by open flow Fischer-Tropsch processes for hydrogen and Co interactions 24 p4402 A70-45377

Carbonaceous chondrites isomeric alkanes identification by mass spectrometry and gas chromatography 24 p4402 A70-45378

Iron meteorites graphite-troilite nodules isomeric alkane composition, using gas chromatography and mass spectrometry 24 p4402 A70-45379

Kapoeta howardite Xe abundance and isotopic composition for indications of extinct Pu 244 and I 129 decay 24 p4402 A70-45380

Terrestrial and chondrites vanadium isotopic ratios indicating irradiation histories difference 24 p4402 A70-45381

V and Cu emission spectrographic analyses in chondrite types, noting distribution patterns between groups based on meteorite chemical fractionation mechanisms 24 p4411 A70-45789

Murchison and Lost City chondrites element abundance analysis by thermal neutron activation and wet chemical techniques, noting low oxygen content 24 p4411 A70-45790

Borgo San Donino chondrite petrology and mineralogical and chemical composition, considering texture and recrystallization features 24 p4411 A70-45791

Orgueil C 1 carbonaceous meteorite mineral content, describing pyrrhotite identification by electron microprobe 24 p4411 A70-45792

Chemical composition and degree of thermodynamic equilibrium reflected in ferromagnesian silicates of chondrites 24 p4411 A70-45793

Sequential instrumental activation analysis for trace elements in rocks and stony meteorites, comparing with silicate method 24 p4310 A70-46407

METEORITIC DAMAGE

Optical properties changes of various transmitting materials under simulated micrometeoroid environment, using silicon carbide particles accelerated in shock tube 03 p0523 A70-13027

Hypervelocity impact craters formed in low and variable strength laboratory materials to provide insight into formation mechanics and resultant structures of meteorite craters 03 p0603 A70-14349

Meteorite falls statistics correlations for fragmentation relationships with mass, time of fall and class 05 p0912 A70-16447

Meteoroid hazard to spacecraft, discussing penetration and protection information reliability obtained from terrestrial and satellite observations 05 p0914 A70-16631

Tektite damage caused by micrometeoroid impact, projectile firing at glass spheres and survival time estimation 05 p0916 A70-16834

Tungusk meteorite atmospheric shock waves obtained from simulation experiments based on forest damage 08 p1572 A70-20944

Meteoroidal bombardment effects on material loss or gain in Saturn rings 11 p2113 A70-26471

Micrometeorites impact on lunar surface, using optical reflecting and stereoscan electron microscopes to investigate craters on Apollo 11 samples 13 p2485 A70-28474

Tungusk meteorite atmospheric shock waves obtained from simulation experiments based on forest damage 15 p2806 A70-32756

Lunar dimple craters formation by meteoritic erosion of concentric impact craters 15 p2807 A70-32850

Natural thermoluminescence of limestone within/near Charlevoix meteorite impact structure, discussing impact effects on quartz-rich rocks 18 p3314 A70-36499

Power loss due to cumulative meteoroid impacts on solar cells during extended planetary missions, investigating hypervelocity particle impacts into glass [ALAA PAPER 70-1139] 20 p3567 A70-40210

Meteor impact probability on spacecraft from statistical evidence from Pegasus, Explorer and Gemini spacecraft, discussing damage prevention methods 22 p4097 A70-42524

METEORITIC DIAMONDS

Cliftonite occurrence, internal structure, orientation within kamacite and implications on origin of diamonds in meteorites 05 p0921 A70-17095

METEORIC DUST

U MICROMETEORIODS

METEORITIC IONIZATION

U ATMOSPHERIC IONIZATION

U METEOR TRAILS

METEORITIC MICROSTRUCTURES

Naturally and artificially shocked iron meteorites, analyzing microstructure and alterations induced by pressure wave and high temperatures 02 p0377 A70-12506

Metallographic examination of impact induced deformation textures of Campo del Cielo iron meteorite, analyzing phase homogeneity, microstructures and shock intensity 02 p0377 A70-12511

Widmanstatten structure in iron meteorites relationship to cooling rate and meteoritic origin 04 p0751 A70-15039

Chemical compositional evidence of Needles/California/ iron meteorite, suggesting distinct fall nature 05 p0912 A70-16465

X-ray line broadening analysis for lattice damage in kamacite phase of Fe meteorites, evaluating particle size and elastic strain 05 p0915 A70-16828

Glassy drops identity and moldavites sculpturing origin in Pannonian sediments in southern Moravia 05 p0916 A70-16838

Normal and bottle-green microtektite glass measured for magnetic susceptibility, magnetization and Curie constants 05 p0916 A70-16839

Gibeon meteorite iron strength and ductility tests, discussing fragmentation and relation to parental planet structure 06 p1150 A70-18478

Shock wave compression of single olivine crystals and specimens from chondritic meteorites, observing planar deformation microstructures 07 p1391 A70-20353

Ureilite structures and relationship to carbonaceous chondrites, considering chemical composition, diamond content, age, size, etc 10 p1941 A70-24552

Iron-nickel alloy phase and diffusion relationships, composition gradients and hardness variations involving long time metallic meteorite anneals 12 p2252 A70-26964

Microchondrules from chondritic meteorites, investigating morphology, composition and structure 13 p2487 A70-28696

Compressive yield strength of iron meteorites, discussing flow stress, microstructure, grain size, plastic deformation, slip lines, etc 18 p3314 A70-36498

Cosmic ray track sources in meteoritic minerals, considering heavy primaries, secondary spallation and fission products 19 p3508 A70-38142

Borgo San Donino chondrite petrology and mineralogical and chemical composition, considering texture and recrystallization features 24 p4411 A70-45791

METEOROID CONCENTRATION

Correlation between atmospheric meteor entry and gamma and neutron radiation intensity verifying micrometeor antimatter hypothesis 03 p0454 A70-13528

Meteor particles spatial density and energy characteristics on space vehicles, using luminescent sensors coupled with photomultiplier 04 p0744 A70-14445

Meteor rate data tabulated from controlled parameter radar survey of Southern Hemisphere activity, noting diurnal and annual variations 05 p0907 A70-16001

Meteoroid hazard data comparison from terrestrial and satellite measurements supporting Whipple theory of low density meteoroid

05 p0917 A70-16900

Sporadic meteoroid particles in ionospheric spatial density determined from kinetic energy measurements

10 p1940 A70-24322

Meteor particles spatial density and energy characteristics on space vehicles, using luminescent sensors coupled with photomultiplier

13 p2485 A70-28470

Orionid and eta Aquarid meteor showers structure and association with comet Halley

13 p2491 A70-29044

Geminid and Quadrantid meteor shower densities observed on wave-channel-antenna radar

14 p2635 A70-30305

Time-amplitude characteristics and abundance in Leonid meteor shower from azimuthal radar observations

14 p2635 A70-30306

Earth and moon meteor fall probabilities calculation using hyperbolic encounters method and lunar near and far sides crater densities difference interpretation

15 p2798 A70-31658

Meteoroids origin and distribution, examining collisional and radiative processes effects

16 p2974 A70-33650

Meteoric masses evaporation during flare, showing discrepancies for luminosity factors

18 p3315 A70-36604

Meteor luminous efficiency and luminosity factor for mass determinations

19 p3515 A70-37661

METEOROID CRATERS

U METEORITE CRATERS

METEOROID DUST CLOUDS

NT ZODIACAL DUST

Micrometeoroid experiments on OGO 2 and OGO 4 satellites, measuring velocity, masses and particle orbits in earth dust cloud

01 p0086 A70-10444

Interstellar spherical dust particles from meteoritic silicates and dirty ice, calculating optical properties and scattering functions

21 p3889 A70-41147

Ephemerides for lunar-orbiting observation of dust clouds in earth-moon system libration points L4 and L5 by observer orbiting over lunar equator

22 p4097 A70-42308

METEOROID HAZARDS

Meteoroid collision hazards of space travel, discussing meteor flux, mass and impact measurements

02 p0360 A70-11668

Meteoroid hazard to spacecraft, discussing penetration and protection information reliability obtained from terrestrial and satellite observations

05 p0914 A70-16631

Meteoroid hazard data comparison from terrestrial and satellite measurements supporting Whipple theory of low density meteoroid

05 p0917 A70-16900

Meteoroid impacts on Gemini spacecraft windows, calculating flux-mass relation

19 p3520 A70-38376

Meteor impact probability on spacecraft from statistical evidence from Pegasus, Explorer and Gemini spacecraft, discussing damage prevention methods

22 p4097 A70-42524

METEOROID PROTECTION

Optimal steady state thermal design for fin-tube single and double surface space radiators, including meteoroid protection and pumping power weight penalties

01 p0215 A70-10829

Penetration criterion for double walled structures subject to hypervelocity meteoroid impact providing choice of protective material properties

03 p0584 A70-12921

Space suit meteoroid protection for extravehicular activity, discussing Gemini and lunar surface EVA suits and bumper concept

04 p0645 A70-15402

Hypervelocity projectile size and density effect on ballistic limit of dual sheet spacecraft meteoroid protection structures, considering penetration of low and high density particles

04 p0776 A70-15422

Meteoroid hazard to spacecraft, discussing penetration and protection information reliability obtained from terrestrial and satellite observations

05 p0914 A70-16631

Lightweight double walled meteoroid shield for Mariner Mars 1971, considering Teflon impregnated glass fabric outer sheet and multilayer thermal insulation

07 p1394 A70-19712

Two plate meteoroid shields effectiveness determined by analyzing debris cloud ejected behind front plate after hypervelocity impact

11 p2138 A70-26132

Penetration mechanics of multisheet structures based on discrete particle modeling of impact debris

13 p2509 A70-28521

Spacecraft meteoroid protective shield thickness sensitivity relationship to luminous efficiency

15 p2813 A70-32518

Hypervelocity impact computerized calculations, considering material response, laminated meteor bumpers, hollowed projectiles and thick target cratering

15 p2823 A70-32787

Space vehicles with shielding for protection against meteor impacts, discussing tubular radiator design for heat removal

23 p4284 A70-45008

METEOROID SHOWERS

NT GEMINID METEORIDS

NT LEONID METEORIDS

NT ORIONID METEORIDS

NT PERSEID METEORIDS

NT QUADRANTID METEORIDS

Size and spatial distribution of meteoritic showers, establishing fragment distribution pattern relationship to sorting factor

05 p0912 A70-16464

Cosmic ray intensity increase due to meteor showers magnetic field trapping effect

08 p1560 A70-20568

Minor meteor showers radiants determined close to ecliptic plane from systematic visual observations during November, December and January 1961-67

08 p1577 A70-21532

Australite fall age determination from in situ radioactive carbon and standard geological dating methods

09 p1750 A70-22055

Meteor stream 11 Canis Minorids detected and associated with Comet Mellish 1917, discussing true radiant and orbit

11 p2108 A70-25699

Small meteor streams trajectories and radiants from epsilon-Lyrids, alpha-Coronids and phi-Draconids observations by amateur astronomers

12 p2311 A70-28307

Orionid and eta Aquarid meteor showers structure and association with comet Halley

13 p2491 A70-29044

Diurnal and seasonal variations of parameter s of meteor showers on celestial sphere, using radio echo amplitude distribution from radar observations

14 p2635 A70-30307

Three-reception-point radar system for radiant and speed measurement of individual meteors in stream, using forward scattering

14 p2582 A70-30311

Phase angle gauge measurement of meteor shower radiants, using radar observations of signal scattering in meteor trails

14 p2582 A70-30314

Extraterrestrial magnetic spherules concentration in relation to meteor shower activity and rainfall probability

14 p2640 A70-30740

Radar meteor shower rate observation compared with direct cosmic dust measurements on satellites

15 p2798 A70-31682

Cosmic ray intensity increase due to meteor showers magnetic field trapping effect

15 p2795 A70-32723

Shooting star shower and solar eclipse frequencies correlation with long term climatic changes

17 p3168 A70-35310

Meteoroid flux density from radar measurements, noting detectability dependence on initial ionized trail radius

19 p3515 A70-37660

Scorpionid shower radiants measurement, discussing position, activity, physical properties and genetic relation with comet 1770 1

19 p3526 A70-38791

Cosmic ray intensity variation during maximum meteor showers periods detected on earth, noting relationship to solar activity

20 p3697 A70-39294

Radiant dispersion, position, areas and orbital axis in meteor showers by double-station photographic observations, noting Apollo group detection

21 p3884 A70-40875

METEORIDS

NT GEMINID METEORIDS

NT LEONID METEORIDS

NT METEOROID DUST CLOUDS

NT MICROMETEORIDS

NT ORIONID METEORIDS

NT PERSEID METEORIDS

NT QUADRANTID METEORIDS

NT RADIO METEORS

NT ZODIACAL DUST

Atmospheric density on basis of photographic observations of meteors, comparing vertical profile with CIRA profile

01 p0084 A70-11556

Cometary and asteroidal meteors discriminated by orbital elements in region of Jovian comet family adjoining asteroidal belt

02 p0373 A70-12371

Meteor flakes nature and statistics obtained from meteors characterized by irregular brightness curve

03 p0574 A70-13883

Frequency distribution of apparent visual magnitudes of meteors observed from November 1960 to January 1967

04 p0750 A70-14707

Meteoroids average velocity relative to spacecraft determined using sporadic meteors orbital elements data in interplanetary space

04 p0757 A70-15550

Antarctic twilight Na emission abundance and concentration in lower E region, discussing meteor ablation models

05 p0836 A70-15819

Meteor fragments motion and vaporization based on photographs

06 p1140 A70-17733

Meteor fragmentation in flares, determining fragments mass, time and special parameters for plotting flare brightness curves

06 p1140 A70-17734

Meteor motions at cosmic velocities in real atmosphere studies to determine cause of sudden flares

06 p1140 A70-17735

Atmospheric tides influence on meteors characteristics from processing observation data

06 p1140 A70-17736

Meteors orbital elements distribution in solar system from radio observation data

06 p1141 A70-17737

Meteoroids structure, composition and fragmentation, summarizing existing evidence for photographic and radio meteors and meteor luminous and ionizing efficiency

06 p1153 A70-18551

Turbulent air flow velocities determined in meteor zone of atmosphere

07 p1386 A70-19461

Meteoroids atmospheric drag and heat transfer coefficients, considering weak shielding by repelled and vaporized molecules

08 p1572 A70-20945

Photometric masses of bodies producing bright meteors, considering emission efficiency dependence on velocity, mass and composition

08 p1573 A70-20948

Meteor abundance determination by visual observation, calculating sighting probabilities for various magnitudes

08 p1573 A70-20949

Meteor flare photographs statistical analysis, noting duration and weight distribution dependence on meteor velocity

08 p1574 A70-21214

E layer atmospheric circulation model for meteor zone, noting solar thermal radiation role

08 p1575 A70-21215

Meteor astronomical parameters measurement by pulsed and CW radio methods, considering effects of wind, meteor trails, phase angle, etc

09 p1638 A70-23627

Orbital elements of small high velocity meteors, using oblique radio sounding

12 p2311 A70-28306

Bright sporadic fireballs and faint photographic meteors orbits, discussing clustering in diagram of geocentric velocity vs inclination

13 p2490 A70-29040

Meteors hyperbolicity based on statistical considerations and radiant distribution, discussing orbits perturbation and observation from earth

13 p2490 A70-29041

Radar and optical meteor observations comparison, discussing luminosity function and angular velocity

13 p2490 A70-29042

Meteors position angles determination during telescopic observations, discussing error due to angle reversion

13 p2491 A70-29043

Meteor particle orbits, comparing inclined radar reflections with photographic and straight radar observations

14 p2636 A70-30322

Meteor observation station design and operation, describing calibration difficulties and reflecting points coordinates determination

14 p2583 A70-30331

Concentrations model of metallic atoms and ions in upper atmosphere with deposition from meteors, using diffusion equation

14 p2580 A70-31262

Meteor radiant, drag and altitude via CW radar observation of meteor trails

15 p2800 A70-32150

Meteoroids atmospheric drag and heat transfer coefficients, considering weak shielding by repelled and vaporized molecules

15 p2806 A70-32757

Photometric masses of bodies producing bright meteors, considering emission efficiency dependence on velocity, mass and composition

15 p2806 A70-32760

Meteor abundance determination by visual observation, calculating sighting probabilities for various magnitudes

15 p2806 A70-32761

Meteor orbit parameters and incident particle flux measurements by radio methods, eliminating backscatter radar sensitivity limitations

15 p2807 A70-32814

Nomograms for meteor geocentric velocity and trajectory with correction for zenith attraction and radiant

18 p3315 A70-36605

Turbulent air flow velocities determined in meteor zone of atmosphere

18 p3316 A70-36935

Spectrosensitometer for standardizing meteor spectrograms

19 p3514 A70-37643

Observed meteor brightness curve shortening with respect to theoretical curves

19 p3514 A70-37645

Meteor activity during IQSY by radar observations at 7.6 m wavelength

19 p3514 A70-37654

Fine structure of solar radiation-induced electrostatic fields on dielectric surface of comets and meteoroids

19 p3514 A70-37656

Orbital elements of photographic meteors brighter than first magnitude, tabulating dates, solar longitudes, corrected radiants, velocities, major axis, etc.

19 p3526 A70-38787

Cylindrical plasma inhomogeneities including meteor trains diffusion in presence of magnetic field, observing dependence on angle theta

21 p3886 A70-41060

Ionized gas density monitor as meteoroid detector, describing operation in ionization chamber, proportional counter and glow tube modes

23 p4197 A70-44513

Meteors and meteorites research, noting fireball photointerpretation, simulated meteors, theoretical equations, etc.

23 p4256 A70-45039

Fireball end point height as indication of meteoroid existence likelihood

24 p4411 A70-45787

METEOROLOGICAL BALLOONS

NT ROBIN BALLOONS

GHOST/Global Horizontal Sounding Technique/balloon for meteorological observation over Southern Hemisphere emphasizing technique to overcome icing in clouds

04 p0622 A70-14550

Pulse radar altimeter for measuring meteorological balloon altitude, using superregenerative RF stage

05 p0845 A70-15805

Flexible nickel cadmium secondary battery as nocturnal power supply for meteorological balloons transceiver and measuring instruments

08 p1440 A70-20711

Telemetry data processing of Eole scientific weather forecasting program, discussing mathematical model simulating atmospheric circulation in Southern Hemisphere

09 p1674 A70-22200

Kalman filtering applied to moving balloon position and velocity estimates related to upper atmosphere wind measurements by balloon-satellite experiment

11 p2025 A70-26206

Si solar cell configurations for balloons and satellites, discussing critical design constraints for weather balloon power systems

14 p2670 A70-31139

Solar cell power supplies for weather balloon and satellite systems

14 p2535 A70-31146

GHOST free floating balloon system for global atmospheric circulation data acquisition in World Weather Watch

14 p2610 A70-31153

French EOLE tracking satellite-balloon network for global atmospheric data, describing satellite and electronic instrument package

14 p2611 A70-31154

Constant altitude helium filled zero pressure polyethylene balloon for stratospheric meteorological data and atmospheric tides studies

17 p3075 A70-34607

METEOROLOGICAL CHARTS

Italian fog distribution charts compiled by Italian Air Force and Istituto Centrale di Statistica compared and criticized

02 p0328 A70-12397

Ground stations and low orbiting satellite system for automatic collection of meteorological data over Italy

03 p0581 A70-13832

Global cloud cover and earth atmosphere heat budget measured from weather satellites, discussing Tiros pictures, radiation charts and albedo

03 p0479 A70-14348

Seasonal and monthly mean charts forecasting method based on variation of annual difference in atmospheric circulation

04 p0715 A70-15294

Synoptic changes associated with midwinter 1967-1968 major stratospheric warming, including pressure and wind distributions and temperature maps

07 p1275 A70-20277

Prognostic maps of geopotential and wind in middle troposphere derived from hydrodynamic equations

07 p1330 A70-20307

Lebedev nomogram determination of climatic parameters dependability, considering underlying theory and temperature sums

09 p1718 A70-23171

Analog methods of weather forecasting involving map matching, discussing weather modification

14 p2610 A70-31141

Meteorological rocket probing, noting 100 and 170 km range probes in U.S.S.R., thermobaric maps and aerological stations for high altitude aviation

15 p2771 A70-32108

Weather situation persistency, using 500 mb contour chart catalog

16 p2945 A70-32950

Climatological maps of earth mean annual radiation balance compared with satellite data

18 p3286 A70-36966

Meteorological fields objective representation by numerical analysis, discussing statistical parameters and analytic errors checking

21 p3847 A70-41400

Midwinter warming period upper stratospheric vertical motion fields, obtaining 2-mb charts

21 p3847 A70-42123

METEOROLOGICAL FLIGHT

Lower atmosphere turbulence under convective conditions, comparing Doppler radar and instrumented aircraft wind speed fluctuation measurements

09 p1716 A70-22367

Meteorological Nimbus 3 satellite and aircraft observations of thermal radiation for vertical atmospheric temperature profile measurement

11 p2075 A70-25921

Project HARP gun-launched projectiles as vertical sounding probes for upper atmospheric meteorological and geophysical measurements, discussing payloads development for high acceleration

11 p2122 A70-26047

Statistical analysis of atmospheric wind and temperature variables relationships to high altitude clear air turbulence observed by U-2 flights

12 p2264 A70-28092

Rain sampling by Varsity aircraft, determining reliability of droplet sampling instruments above aircraft top surface

19 p3463 A70-38947

METEOROLOGICAL INSTRUMENTS

NT CLOUD HEIGHT INDICATORS

NT RADIOSONDES

NT RAWINSONDES

NT WEATHER DATA RECORDERS

NT WIND VANES

Aerodynamic roughness length estimation and site roughness increase due to micrometeorological equipment

03 p0483 A70-13166

Meteorological satellite TV cameras development, discussing image sensors and tabulating characteristics

03 p0491 A70-13665

Meteorological spaceborne IR instruments associated with NASA satellites, discussing various Tiros and Nimbus instruments

03 p0491 A70-13666

IR equipment on Tiros and Nimbus 1 and 2 satellites, describing vertical atmospheric sounding

03 p0492 A70-13833

Response characteristics of height-based and time-based wind reduction techniques for meteorological rocketsondes

05 p0879 A70-17101

Acoustic piezoceramic anemometer for steady state measurements of wind turbulence on meteorological tower

07 p1285 A70-19835

Soviet collection of papers on apparatus for meteorological measurements covering error analysis, reliability engineering, use of computers, etc.

08 p1494 A70-20771

Vacuum tube signal frequency converters for meteorological telemetry measurements including blocking oscillators, multivibrator and fantastron

09 p1718 A70-23332

Atmospheric modulation transfer function measuring instrument based on Lindberg principle, discussing optical and mechanical design features and applications

09 p1688 A70-23769

Atmospheric particles photographed in situ by cameras using microsecond flash lamps, discussing required mechanical motion compensation at aircraft speed

10 p1886 A70-23930

METEOROLOGICAL PARAMETERS

Hot-film anemometers for measuring storm turbulence in presence of heavy rain

10 p1887 A70-23940

IR sensor for detecting clear air turbulence, discussing design, installation, supporting equipment and inflight test results

12 p2229 A70-26946

Wind distribution by wind frequency counter controlled by electrical direction indicator, discussing design, operation and accuracy

13 p2445 A70-29469

Viking Mars mission meteorological instruments for measurements of water vapor content, wind speed/direction, temperature and pressure

14 p2584 A70-30553

Inter-Range Instrumentation Group/IRIG/ document regarding meteorological data reliability, defining measuring process accuracy and errors

14 p2606 A70-30567

Meteorological parameters measuring instruments optimal design, presenting formalized procedure flow chart and examples

14 p2607 A70-30568

Mesoscale stratospheric turbulence recording using even activated memory recorder

14 p2573 A70-30578

Wind velocity fluctuation randomization signal probability density measurement, using statistical sampler

18 p3238 A70-36067

Lunar surface radiative balance and thermal environment measurement by portable meteorological station, considering lunar environment peculiarities for instruments design

19 p3514 A70-37631

Acoustic piezoceramic anemometer for steady state measurements of wind turbulence on meteorological tower

20 p3634 A70-40342

Meteorological TV imaging systems development in last decade, including low and synchronous altitude camera, sensors, orthicons, etc.

23 p4193 A70-43963

Aerosol impact traps for ground and airborne water vapor condensation studies

23 p4195 A70-44272

Meteorological NEXAIR/Next Generation Upper Air System/ for atmospheric data from balloon-borne instrument packages

24 p4372 A70-46049

METEOROLOGICAL PARAMETERS

Hydrothermodynamic equations used in forecasting meteorological components solved by assuming equations of motion quasi-linear and reducing to ordinary differential equations

05 p0878 A70-16195

Meteorological parameters influence on diurnal variations of radionuclide activity and resulting global air pollution

05 p0903 A70-16662

Meteorological conditions effects on SST aircraft flight safety and economics, emphasizing stratospheric information for forecasting

06 p1095 A70-17193

Meteorological data from radiosonde and radar wind observations during Indian Ocean expedition of research vessel Meteor

07 p1329 A70-19350

Soviet book on meteorological conditions analysis and prediction for aviation covering fog, storms, showers, stratospheric turbulence studies, etc.

08 p1535 A70-20772

Spectra of meteorological variables - Conference, Stockholm, June 1969

09 p1713 A70-22351

Atmospheric variables/velocity, temperature, energy, etc/ spectra in lowest few hundred meters

09 p1714 A70-22352

Tropospheric refractive index homogeneity from beam-swinging experiments, noting relationship to meteorological parameters and height

09 p1715 A70-22363

Polydisperse dielectric system distribution parameters determined from hard monochromatic polarized radiation scatter by artificial aerosols

10 p1916 A70-24500

Book on statistical processing of geophysical and meteorological data covering independent and autocorrelated data, random processes, check tests, stochastic functions, filtering, etc.

11 p2046 A70-26425

Spatial-temporal distribution of meteorological elements allowing for effects of underlying surface

12 p2263 A70-27511

CAT parameters sensitivity to horizontal wind and temperature distribution

13 p2444 A70-28587

Atmospheric turbulence and irregularities, examining classical exchange coefficient and statistical theories

13 p2445 A70-28788

Shape and location error separation in deterministic predictions of meteorological scalar fields, considering air pressure system forecasting

13 p2445 A70-28995

Weather forecasting for SST operations, discussing wind, temperature, turbulence, clouds, etc
13 p2445 A70-29494

Diurnal and seasonal variations of parameter s of meteor showers on celestial sphere, using radio echo amplitude distribution from radar observations
14 p2635 A70-30307

UHF propagation measurement over sea for varying surface refractivity and meteorological conditions, noting diurnal variations
14 p2549 A70-30513

Meteorological problems associated with accurate weather prediction affecting launch, trajectory and recovery of ballooning systems
14 p2606 A70-30555

Atmospheric elements and properties pertinent to design and operations of Space Shuttle
14 p2606 A70-30556

Inter-Range Instrumentation Group (IRIG) document regarding meteorological data reliability, defining measuring process accuracy and errors
14 p2606 A70-30567

Statistical mesosphere temperature, density and wind profiles models based on rocket soundings
14 p2608 A70-30593

CAT and small scale atmospheric motions in relation to supersonic transport and space shuttle design and operation
14 p2609 A70-30602

Meteorological effects on air and noise pollution at U.S. airports
14 p2530 A70-30610

Meteorological problems associated with proposed tests for aircraft noise certification, discussing airport near-surface environments
14 p2610 A70-30612

Toxic fuel test site selection, evaluating meteorological factors in Gypsum Canyon, California
14 p2563 A70-30613

Solar eclipse of March 1970 observation by sounding rockets, discussing ionospheric and meteorological measurements
14 p2586 A70-30800

Auroral orientation curves evaluation, testing parameters by numerical integration and revised geomagnetic coordinate system
14 p2576 A70-30918

Passive optical crossed beam detection systems monitoring meteorological parameters in rocket or aircraft environments, noting real time display
15 p2736 A70-32032

Soviet book on statistical analysis of meteorological elements based on expanding natural orthogonal functions covering horizontal, vertical and time distributions including applications
15 p2772 A70-32842

Sonic boom variation with aircraft geometry, volume, weight, weather and environment conditions, noting effects on structures and people
16 p2840 A70-32947

Annual variations of monthly mean meridional circulation, discussing observations, zonal asymmetries, accuracy and transports of angular momentum and energy
16 p2945 A70-33249

Lidar technique for remote detection and mapping of atmosphere based on weather radar and optical scattering concepts
20 p3660 A70-39079

Surface haze and vertical aerosol attenuation for various meteorological ranges within 1.2-15 km, tabulating for UV, visible and IR wavelengths
20 p3661 A70-39082

Radar angels activity seasonal variation and height distribution statistical relationship to meteorological parameters
20 p3661 A70-39169

Forecasting air temperature over North Atlantic, analyzing atmospheric parameters informativeness
20 p3663 A70-39274

Global meteorological parameters measurement by satellites, discussing IR instruments
20 p3664 A70-39711

Millimeter wave propagation measurements by ATS-5 satellite, observing attenuation dependence on meteorological parameters for communication data link performance prediction
20 p3589 A70-40311

Clear lower atmosphere meteorological parameters remote sensing for weather forecasting, comparing optical, radio and acoustic radar techniques
21 p3785 A70-40802

Optimal flight route selection with respect to meteorological prediction errors, using decision under risk and Monte Carlo method
22 p4067 A70-42656

Thunderstorm frequencies related to lunar phase and declination for ground stations in eastern and central U.S.
22 p4018 A70-42909

METEOROLOGICAL PROBES

U SONDES

METEOROLOGICAL RADAR

Lidar technique using pulsed lasers as energy sources for operational type meteorological data col-

lection including cloud height, visibility, thermal stratification, etc
01 p0042 A70-10081

Forward sounding sensors /weather radar/ development for aiding human eye in detecting flight hazards /storms and CAT/
02 p0297 A70-11989

Wind field-Doppler velocity field generalized correlation, describing horizontal velocity component measurement by single pulse Doppler radar technique
02 p0326 A70-12287

Lidar technique capabilities and limitations in meteorological applications, emphasizing data storage and display instrumentation
03 p0450 A70-13673

Airborne and ground based radar data on thunderstorm echoes compared within framework of storm reflectivity model and radar theory
06 p1010 A70-18246

Ground based radar surveillance for SST to avoid convective clouds and thunderstorm activity during transonic acceleration phase ensuring minimum demands on maneuverability
09 p1610 A70-22242

Atmospheric small scale turbulence observation by Doppler radar, noting role of tracers radial velocity spectrum
09 p1716 A70-22364

Lidar techniques for meteorology, discussing atmospheric density measurement, cloud structure and screening effect, pollutant tracking, etc
09 p1635 A70-23066

Pulsed Doppler radar technique for monitoring and diagnosing severe storms, obtaining wind velocity and direction within cloud
10 p1844 A70-25242

Meteorological radar station reception equipment for increased radio telemetry channel reliability in complex radio sounding of atmosphere
11 p2075 A70-25920

Radar signature analysis of convective precipitation, hailstorms, tornadoes, lightning, hurricanes and clear air echoes
11 p2076 A70-26039

Lidar ground-based sensing of atmospheric density, temperature, moisture content, discussing scattering theory and technique
12 p2183 A70-26945

Radar meteorology, discussing convection in lower atmosphere and clear air turbulence observations
13 p2443 A70-28475

Civil aircraft weather radar for ground collision hazard warning
13 p2447 A70-28548

Heavy squalls observations by satellite TV and radar, considering wave disturbances at cold front
13 p2444 A70-28585

Weather radar signal processing and data recording at National Severe Storms Laboratory (NSSL), providing reduction in echo variations due to relative motion of precipitation elements
13 p2363 A70-28774

Radar meteorology in electromagnetic communications to provide storm systems data, noting clear air radar echoes
13 p2445 A70-28791

Antenna design for single engine light general aviation aircraft weather radar, reviewing attenuation and terrain return problems
16 p2864 A70-33471

Meteorological laser radar, discussing basis and techniques determining atmospheric radiation attenuation constant
17 p3045 A70-35106

Soviet collection of papers on radar meteorology
18 p3287 A70-36998

Lidar technique for remote detection and mapping of atmosphere based on weather radar and optical scattering concepts
20 p3660 A70-39079

Internal gravity wave shape at temperature inversion in lower atmosphere from high resolution vertically pointing FM/CW radar sounding
23 p4162 A70-44038

METEOROLOGICAL ROCKETS

U SOUNDING ROCKETS

METEOROLOGICAL SATELLITES

Weather satellites performance emphasizing designs for geostationary altitude and hydrological, oceanographic and earth science applications
[ALAA PAPER 69-1082]
01 p0135 A70-10648

Automatic picture transmission (APT) ground station design for reception of weather satellite cloud cover photographs, discussing SNR
01 p0059 A70-11451

Small read-out stations for automatic picture reception from meteorological satellites, detailing design
02 p0382 A70-12648

Meteorological satellite TV cameras development, discussing image sensors and tabulating characteristics
03 p0491 A70-13665

Ground stations and low orbiting satellite system for automatic collection of meteorological data over Italy
03 p0581 A70-13832

IR equipment on Tiros and Nimbus 1 and 2 satellites, describing vertical atmospheric sounding
03 p0492 A70-13833

Earth climatic control by reflecting satellites producing artificial solar irradiation
03 p0581 A70-13835

Atmospheric circulation in tropics using weather satellite data
06 p1095 A70-17220

Earth resources and meteorological data collection from in situ sensors via satellite, discussing system considerations
06 p1006 A70-17343

Satellite observed characteristics of severe local storms in central and eastern U.S., noting potential use for storm forecasting
06 p1102 A70-18584

Incipient tropical storm location and synoptic weather pattern analysis from environmental satellite system data utilization
07 p1329 A70-19196

Meteorological satellites motion parameters long term prediction, using final analytic relationships with allowance for zonal harmonics of gravitational field
07 p1329 A70-19650

Manned and unmanned earth observation satellite programs technology gains, discussing atmospheric temperature, pressure, winds, clouds and moisture
10 p1876 A70-24637

Numerical weather forecasting for several weeks based on global meteorological satellite network observation
10 p1913 A70-25241

Meteorological research potential of manned orbiting spacecraft, discussing electromagnetic sensing instrumentation development, specialized observing programs, etc
12 p2225 A70-27744

Meteorological satellites role in weather forecasting, discussing cloud photography and solar radiation and earth albedo measurements
12 p2265 A70-28269

Low altitude operational meteorological and navigation spacecraft, discussing need for orbit adjustment by dynamic control
13 p2500 A70-28404

Meteorological data acquisition by navigational aids, satellites and surface based indirect sensors for computer forecasting
13 p2405 A70-28773

Satellite based random Doppler environmental measurement technique for Global Atmospheric Research Program (GARP), receiving signals from balloons, buoys and land stations
13 p2407 A70-29176

Meteorological satellites TV pictures processing for hydrological information, emphasizing snow photographs interpretation
14 p2601 A70-30138

Algorithm for Fredholm integral equation in inverse problems of satellite meteorology
14 p2603 A70-30405

Soviet book on legal aspects of artificial satellites for meteorology and radio communication purposes
14 p2668 A70-30632

TIROS weather satellite TV system providing observations to ground stations via ESSA satellites
14 p2654 A70-31148

French EOLE tracking satellite-balloon network for global atmospheric data, describing satellite and electronic instrument package
14 p2611 A70-31154

Lidar for cloud height measurements from ground and meteorological satellites
14 p2611 A70-31155

Temperature profiles and wind velocities during convective cloud banks formation from meteorological satellite data
15 p2770 A70-32065

Tiros satellites window radiation applied to day and night surface temperature measurements on land and sea
17 p3081 A70-35932

Application satellites, discussing uses in communications, meteorology, earth survey and navigation
18 p3333 A70-36348

Soviet papers on atmospheric radiation processes and satellite meteorology
18 p3285 A70-36962

Meteorological satellites, discussing observation continuity, orbital characteristics onboard memory capacity and sensing methods

Weather occultation satellite orbit determination by radio wave measurements between master and slave satellites, formulating mathematical model [AIAA PAPER 70-1067]

Visible and IR imagery by meteorological satellites measuring surface temperature, atmospheric circulation and state parameters, storm development and tracking, cloud motions, etc

Atmospheric global observation for long term weather forecasts, obtaining cloud photographs and radiation data from satellites

Aeolus A satellite for position fixing and automatic meteorological signal transmission in link with balloons for tropospheric observation

Global thunderstorm activity location found by measuring differences between time of arrival of electromagnetic energy at three satellites

Large scale axisymmetric atmospheric vortex wind velocity determination, using statistical cloud data from meteorological satellites

European space applications program, discussing communication and meteorological satellites

ITOS-1 second generation meteorological satellite launched with Delta N booster, providing direct APT global readout and AVCS TV data recording for playback

Space technology applications to earth survey, discussing use of automatic satellites and manned space laboratories for meteorological, geophysical and related purposes

METEOROLOGICAL SERVICES

Lidar technique using pulsed lasers as energy sources for operational type meteorological data collection including cloud height, visibility, thermal stratification, etc

Global meteorological sounding network requirements, restraints and sensors, considering gun launched meteorological probe role

Reflected solar energy measurements by ATS satellites applied to meteorological research, emphasizing high areal resolution and dynamic range of cameras

Meteorological data provision for supersonic civil transport operations, considering various flight phases

Meteorological data processing computer center of German Weather Service, discussing equipment, data system, forecasting techniques and prediction control

ESSA system operation, describing applications of satellite meteorological data

Weather data communication, discussing transmission of radar, polar satellite and ATS satellite data to processing center and forecasts dissemination to public media

Electrostatic methods considered for using earth electric field in smog dispersion in polluted areas and for airport fog clearing

Severe storm research importance to aircraft design and operating efficiencies improvement by identifying meteorological alternatives for operations in and near adverse environments

Economic and social benefits from weather forecasting developments, noting expenditures on satellites and high speed computers

TIROS Operation Satellite /TOS/ system for daily observation of meteorological phenomena analyzed for problems of general data gathering satellite system

Tower influence of wind speed and direction measurements, comparing 150 meter meteorological tower and scale wind tunnel model

Airborne pyrotechnic cloud seeding system development, testing and application, comparing rainfall from test and control clouds

Nonlinear utility functions effects on assessor probability forecasts, discussing psychological factors

Flight test programs site selection method using computer program analysis of magnetic tape weather records

Combined statistical synoptic methods for mesometeorological forecasts

Automated Weather Network and Environmental Survey Satellite /ESSA 9/ global weather sensing systems

Digital river and rainfall data automatic transmission from remote hydrologic platforms via ATS-1, studying system economic and technological feasibility

Meteorological satellites role in weather forecasting, discussing cloud photography and solar radiation and earth albedo measurements

Apollo 9 scientific multispectral photography mission, discussing meteorological support aspect of real time planning

International cooperation in global meteorological network, outlining World Weather Watch

TIROS weather satellite TV system providing observations to ground stations via ESSA satellites

TIROS Operation Satellite /TOS/ system for daily observation of meteorological phenomena, analyzing problems of general data gathering satellite system

Incomplete historical data to infer state of atmosphere based on global circulation model, noting tradeoff of temperature for wind and time for space

Atmospheric effects on passive microwave sensing in EHF region under all-weather conditions on global scale using satellites

Thermometric convection coefficients used in automatic meteorological data correction program

Thunderstorms and thunderstorm phenomena - ASM Conference, Chicago, April 1969

Barometric and atmospheric temperature corrections of cosmic ray neutron component intensity fluctuations obtained statistically from monitor recording

Nonlinear computational stability of partial difference approximations to meteorological equations

Precondensation visibility dependence on aerosol particle swelling due to increasing humidity

Orbiting satellite-borne instruments for scientific observation of earthquakes, volcanic eruptions, atmospheric phenomenon, cyclones, floods and soil erosion

Earth atmosphere circulation mechanisms, discussing zonal and meridional components and eddy motions

Atmospheric stability sensing by millimeter wave radiometry, discussing thermal radiation emitted and absorbed by oxygen molecules

Meteorological situations and fields quantitative classification and regional grouping by statistical main components application

Solar radiation absorption by atmospheric ozone observations by ground stations for meteorological data

Automatic search for data in hydrology and meteorology, describing information search language development

Atmospheric optical thickness in visual spectrum region relationship to meteorological characteristics, plotting vertical profiles of humidity and aerosol attenuation coefficient

Aerospace meteorology - AMS-AIAA Conference, Las Vegas, May 1970

Vertical mesoscale contribution to vertical wind shear profiles, using radar/Jimsphere measurements

Combined statistical synoptic methods for mesometeorological forecasts

Automated Weather Network and Environmental Survey Satellite /ESSA 9/ global weather sensing systems

Digital river and rainfall data automatic transmission from remote hydrologic platforms via ATS-1, studying system economic and technological feasibility

Meteorological satellites role in weather forecasting, discussing cloud photography and solar radiation and earth albedo measurements

Apollo 9 scientific multispectral photography mission, discussing meteorological support aspect of real time planning

International cooperation in global meteorological network, outlining World Weather Watch

Soviet collection of articles on satellite meteorology covering atmospheric cellular convection, cloud cover, wind field analysis, etc

Cloud distribution and optimal satellite picture foreshortening for global meteorological analysis of atmosphere, using Zond 7 photograph

Meteorological problems associated with space shuttle design and operations, permitting tradeoff analysis on environment effects

German monograph on atmospheric turbulence by Rn 220 as tracer, relating concentration to various meteorological parameters

Ionospheric E region winds correlations to lower atmosphere meteorological phenomena

Barometric and atmospheric temperature corrections of cosmic ray neutron component intensity fluctuations obtained statistically from monitor recording

Passive microwave sensors based on brightness temperature vs frequency model for various atmospheric conditions, presenting vegetation pictures

Atmospheric effects on passive microwave sensing in EHF region under all-weather conditions on global scale using satellites

Statistical-dynamical atmosphere model for global circulation simulation, taking into account meteorological variables of velocity, temperature, pressure and eddy statistics

Weather regimes in statistical meteorology constructed in stochastic models representing randomly transformed Markov chain

Electric field effects on flame structure and propagation rate in methane-air mixture

Pressure and line width estimate from high resolution image tube spectra of Jupiter at 11,000 A

Rotational temperatures and methane abundances in Jovian atmosphere calculated for various Lorentz half widths

Methane photochemistry in Jupiter atmosphere, investigating acetylene, ethylene and ethane photolysis

Chemiluminescence in alkali metals and halogenated methanes diffusion flames, studying diatomic Cs spectral bands

Premixed methane-oxygen-nitrogen combustion in conical reactor fed by choked sonic flow jet, analyzing reaction products chromatographically

Chlorine dioxide-methane mixture flame stabilized in low pressure burner, determining emission spectra, burning velocity, activation energy, etc

Premixed perchloric acid-methane two flame structure, measuring burning velocities, spectra, temperatures and burned gas compositions

Ammonia/chlorine dioxide and ammonia/chlorine dioxide/methane flames burner stabilization and burst velocities

Liquefied natural gas or liquefied methane as burning propulsion system for SST, examining storage volume, fuel-tank insulation and implosion danger

He-Ne multimode laser radiation peak as function of pressure in methane-containing absorption cell installed in resonator

Burning velocity of methane-air flames inhibited by methyl bromide, using schlieren cone-nozzle burner method involving unburnt gas velocity measurement

Mass flow rate calculation of methane and natural gas mixtures through critical flow nozzles

Methane fuel systems for high Mach number supersonic transport aircraft on basis of minimum weight

Methane abundance in Jovian atmosphere deduced from line equivalent widths, obtaining line intensity for J manifolds

Combined statistical synoptic methods for mesometeorological forecasts

Automated Weather Network and Environmental Survey Satellite /ESSA 9/ global weather sensing systems

Digital river and rainfall data automatic transmission from remote hydrologic platforms via ATS-1, studying system economic and technological feasibility

Meteorological satellites role in weather forecasting, discussing cloud photography and solar radiation and earth albedo measurements

Apollo 9 scientific multispectral photography mission, discussing meteorological support aspect of real time planning

International cooperation in global meteorological network, outlining World Weather Watch

TIROS weather satellite TV system providing observations to ground stations via ESSA satellites

TIROS Operation Satellite /TOS/ system for daily observation of meteorological phenomena, analyzing problems of general data gathering satellite system

METEOROLOGICAL STATIONS

- Viscosity, thermal conductivity, specific heat and Prandtl number of hydrogen, methane and hydrogen-methane mixtures calculated for variation with temperature neglecting dissociation effects
06 p1177 A70-17700
- Fire extinguisher compounds/bromochloromethane and bromotrifluoromethane/pyrolysis products inhalation toxicities for rats
07 p1219 A70-19223
- Effective pressure and rotation line intensity in Uranus upper atmosphere obtained from methane band spectrograms, calculating maximum temperature at subsolar point
07 p1385 A70-19423
- Premixed flames of methane with chlorine dioxide and perchloric acid, comparing properties with methane-oxygen flames, suggesting unified reaction mechanism
07 p1425 A70-20007
- Absorption strengths of j-manifolds in R branch of Jupiter atmosphere methane band, discussing fine structure blending
10 p1919 A70-24473
- Gas mixture composition effect on bacteria growth oxidizing methane and propane, establishing proportional biomass concentration to hydrogen and oxygen in mixture
11 p1991 A70-25938
- Al and B particles combustion in methane-oxygen system, considering reaction zone models, energy release rate, particle kinetics, instabilities, etc
11 p2149 A70-26284
- Balloon-borne device for analyzing atmospheric carbon dioxide, moisture and methane, using cyclic analysis by gas chromatography
11 p2052 A70-26371
- Methane oxidation behind reflected shock waves between 1350-1900 K, measuring pressure, chemiluminescence and 3067 Å absorption of OH radical
11 p2150 A70-26380
- Methanol proton transfer reaction rate energy dependence
12 p2180 A70-26863
- Methane and ethane released from Apollo 11 lunar samples by crushing or acid treatment, suggesting carbides hydrolysis as main source
12 p2304 A70-27719
- Methane and ethane hydrate number measurement, alleviating liquid water occlusion and evaluating pressure effect
13 p2362 A70-29212
- Transport cross sections for isotopic methane and mixtures, considering inelastic and thermal diffusion effects
14 p2665 A70-30652
- Methane and propane flames in rotating air flow fields generated by cylindrical rotating wire mesh screen, discussing flame lengths and blowoff velocities
14 p2666 A70-31090
- Methane-air inverted flames blowoff at thin stabilization plates of twin slit inverted flame burner, determining critical values of Karlovitz flame stretch factor
14 p2666 A70-31092
- Burning velocities for methane-air mixtures with water cooled porous metal flat flame burner, discussing surrounding ambient atmospheres effects
14 p2666 A70-31093
- Hydrogen abundance in Jupiter atmosphere quadrupole line used in comparing jupiter and solar atmosphere C/H ratios
14 p2650 A70-31221
- Thermodynamic stability of methane clathrate hydrate, building up ice grains halo within comets inner coma
14 p2650 A70-31243
- Molecular hydrogen, methane, water vapor and tritium concentrations near stratosphere from air samples collected on Aerobee flight with liquid hydrogen cooled cryocondenser
15 p2728 A70-31995
- FLOX methane propellant rocket engines, describing operating conditions, injectors, thrust chambers fabrication and cooling, engine cycles, turbomachinery, etc
[AIAA PAPER 70-718] 16 p2965 A70-33540
- Photoreaction produced N-cyclohexyldiphenylketenimine from cyclohexyl isocyanide and diphenyldiazomethane
17 p3042 A70-34820
- Spectrophotometry of methane and ammonia absorption bands indicating decrease toward Jupiter disk edge
18 p3323 A70-37140
- Photoelectron spectra of methane, silane, germane, methyl fluoride, difluoromethane and trifluoromethane, describing electron spectrometer with double focusing electrostatic plates
19 p3374 A70-38269
- Environmental control-life support systems /ECLSS/ waste methane gas utilization in low thrust resistojet for manned space applications
[AIAA PAPER 70-1131] 20 p3568 A70-40214
- Methane IR filter for monochromatizing He-Ne laser
21 p3823 A70-40823
- Methane and hydrogen consumption rates during slow reactions in mixtures of molecular hydrogen, oxygen and nitrogen
21 p3772 A70-40879
- Hypersonic sound speeds measured in methane at moderate pressures by spontaneous Brillouin light scattering experiments
21 p3830 A70-41938
- Dichlorodifluoromethane ionization and attachment coefficients for wide pressure range
22 p4076 A70-42373
- METHIONINE**
Chlorella seaweed hybrid strains containing larger amounts of amino acids than original parent species
04 p0630 A70-14573
- L-dihydroxyphenylalanine intraperitoneal injection effect on S-adenosylmethionine concentration in rat brain
21 p3764 A70-41269
- METHOD OF CHARACTERISTICS**
Characteristic equations developed for two-spatial dimensional elastic wave propagating in linear elastic, isotropic and homogeneous medium
01 p0208 A70-11185
- Method of characteristic calculation of field amplitude of electromagnetic waves propagating in inhomogeneous nonlinear medium applicable for computer
03 p0448 A70-13461
- Annular nozzle shapes established via method of straight line characteristics, noting flow patterns at various regions
03 p0409 A70-13872
- Unsteady problems of gas dynamics solved by method of characteristics, Godunov method, difference methods, etc
04 p0670 A70-14958
- Method of integral relations, finite differences and method of characteristics applied to numerical solution of steady state problems of gas dynamics
04 p0670 A70-14961
- Flow distribution for short isentropic supersonic inlet diffusers, using method of characteristics and Oswatitch and Connors procedures
06 p0963 A70-17234
- Numerical method of characteristics for unsteady radiation gas dynamics, discussing surface pressures and heat transfer rates
07 p1256 A70-19314
- Three dimensional gas flow calculated by direct method of characteristics
08 p1431 A70-20860
- Survey of papers on computer calculation of two and three dimensional gas flows, emphasizing method of characteristics and finite difference techniques
09 p1603 A70-22265
- Riemann invariants, discussing method of characteristics in physical and hodograph space applications and multidimensional hyperbolic systems
10 p1865 A70-24103
- Three dimensional supersonic gas flow solution by numerical method of characteristics, discussing direct and inverse tetrahedral and semicharacteristic schemes
10 p1798 A70-24117
- Three dimensional hypersonic steady flow around blunt and pointed cones at nonzero angles of attack calculated by method of characteristics
[AIAA PAPER 69-187] 11 p1975 A70-25969
- Annealed stainless steel low cycle fatigue data analysis leading to method of characteristic slopes approach for correlating plastic strain range to fracture time
12 p2255 A70-27604
- Monge equation in small perturbation method of characteristics applied to propagation phenomena in three dimensional supersonic gas flow
13 p2386 A70-28490
- Numerical method of characteristics for three dimensional supersonic nozzle flow field calculations
13 p2338 A70-28512
- Second order hyperbolic partial differential equations solution by characteristic grid and continuous characteristic methods
15 p2768 A70-32818
- Second order hyperbolic partial differential equations analog solution based on method of characteristics, showing advantage over digital computer solution
15 p2768 A70-32819
- Parameter identification in distributed systems by method of characteristics, discussing noisy measurements and limited available transducers
16 p2942 A70-33338
- Elastic wave with discontinuities propagation, calculating decay velocities and stresses at leading wave front by theory of characteristics
17 p3189 A70-35436
- Method of characteristics for nonequilibrium flow fields analysis, reviewing theory, numerical methods and examples
17 p3071 A70-35470
- Method of characteristics for two dimensional steady supersonic gas flows with foreign particles in plane and axisymmetric nozzles
18 p3210 A70-37228
- Perfect and dissociating gas nonstationary supersonic flow around sharp profile of finite thickness analyzed by linearization and method of characteristics
19 p3351 A70-37242
- Laminar boundary layer multidimensional universal equations solution for incompressible liquid using method of characteristics
20 p3611 A70-39804
- METHODOLOGY**
Methodologies inadequacies for studying information processing rate in visual perception
07 p1203 A70-18943
- Prolonged hypodynamia effect on human organism, describing organizational and methodological principles for conducting investigations
10 p1813 A70-24667
- Rumanian book on methods, equipment and facilities for aeromechanical measurements covering fluid flow, wind and shock tunnels, flow measurements, etc
23 p4199 A70-45000
- METHODS**
U METHODOLOGY
U PROCEDURES
METHYL ALCOHOLS
Flame structure of liquid methanol burning spheres, discussing temperature and composition profiles
03 p0544 A70-13924
- Photoelimination of N from fused-ring triazoles in methanol
05 p0810 A70-16046
- Ti-6Al-4V dissolution in HCl-methanol, investigating corrosion rate
13 p2433 A70-28779
- METHYL CHLORIDE**
Modulation of carbon dioxide laser with Stark cell internal to cavity, using methyl chloride electrooptical gas
18 p3270 A70-36748
- METHYL COMPOUNDS**
Carbon dioxide lasers passive Q switching by gaseous methyl fluoride and phosphorus pentafluoride, presenting absorption coefficients
01 p0110 A70-10561
- Crossed molecular beam study of reactive asymmetry of oriented methyl iodide molecules reacting with Rb, accounting for observations with hard sphere model
07 p1225 A70-20051
- Corrosion shapes from iodine action on metals in methylic medium, discussing morphology dependence on purity, surface state and reaction products diffusion velocity
08 p1518 A70-21241
- Lil thermodynamic properties in dimethyl sulfoxide determined by emf method, discussing ionic solution energies
10 p1831 A70-25041
- Methyl fluoride calculated for ion-molecule reaction rate constants from ion cyclotron resonance spectra
12 p2180 A70-26862
- Methyl methacrylate and other vinyl monomers polymerization activation by low sulfur dioxide concentrations, noting inert solvents effect
14 p2544 A70-30246
- Methyl-nitroazobenzene-sulphenyl cyanide unit cell dimensions and space group by single crystal oscillation, rotation and Weissenberg X ray diffraction photographs
14 p2581 A70-31300
- 3-O-methyl-mannose neutral sugar identification as constituent of fungal polysaccharide
20 p3572 A70-39625
- Simultaneous mass spectrometric differential thermal analysis of low pressure decompositions of nitrate salts of monomethylhydrazine and methylamine
20 p3688 A70-40475
- Combustion products of 280-400 °C oxidation of ethyl acetate, methyl propionate and i-propyl acetate
21 p3864 A70-40882
- METHYLATION**
Methylating agents and nitrosoguanidine actions on polynucleotides, including ribonucleic acid
03 p0440 A70-13550
- METHYLENE**
Ketene and diazomethane flash photolytic measurement of reaction rates of singlet-triplet methylene deactivation
15 p2694 A70-31729
- METHYLHYDRAZINE**
Nomograms for correlation of dose to methemoglobinemia or plasma monomethylhydrazine /MMH/ concentration observed on dogs, considering human skin contact evaluation
06 p0992 A70-17298
- Behavioral changes due to repeated low doses of rocket fuel monomethylhydrazine
21 p3771 A70-41485
- Monomethylhydrazine /MMH/ missile propellant toxicity, describing symptoms and effects on blood and intellectual capacity
24 p4306 A70-45125

METRIC SPACE

- Hypothesis concerning initial spectrum of metric perturbations in Friedman model, discussing long wavelength gravitational waves energy
 - 07 p1383 A70-19406
- Vacuum metrics with null geodesic expanding shear-free congruences using holomorphic solution
 - 07 p1334 A70-19600
- Gravitational forces accompanying radiation bursts of metric outside collapsing supernova core
 - 12 p2300 A70-27393
- Four dimensional Einstein space metric of signature 2 with N type Weyl tensor and nonintegrable rays
 - 13 p2453 A70-29636
- Gravitational force and potential within static metric spaces
 - 17 p3136 A70-35597
- Stress energy tensor equal time commutation, observing metric dependence inability to satisfy relations for linearized gravitational fields
 - 19 p3536 A70-37550

METROLOGY

- Laser methods for industrial length measurements
 - 11 p2061 A70-25355
- Bonded resistance strain gages technical characteristics noting need for uniform standards
 - 11 p2053 A70-26427
- Resistance strain gages/tensometers/ for force and moment measurement in aerodynamic research, giving design and structural recommendations
 - 11 p2054 A70-26431
- Unbalanced Wheatstone bridge network operation for resistance strain gage measurements, determining dynamic transients variable extremes
 - 11 p2054 A70-26434
- Brush current collectors for strain measurements in rotating machine parts, discussing acceptance testing
 - 11 p1983 A70-26438
- Stability requirements for precision magnetic field measurements on ground and in space, discussing magnetic balances and fluxgate magnetometers for geomagnetic variations and spacecraft attitude
 - 13 p2415 A70-30050
- Nonisothermal measurement in semiconductors in presence of thermoelectric, thermomagnetic and galvanomagnetic effects
 - 16 p2960 A70-32920
- Measurement methods for forces, pressure and heat flow in hotshot hypersonic wind tunnels
 - 17 p3057 A70-34773
- He-Ne laser emission wavelength long and short term stability for metrological applications
 - 17 p3104 A70-35087
- Canadian laser stabilization program involving metrology and absolute standard replacing international meter
 - 17 p3105 A70-35089
- Measurement transducers transforming measured quantity into forms suitable for comparison with standards in metrological sciences
 - 17 p3090 A70-35432
- Piezoelectric sensors for multicomponent force and moment measurement
 - 20 p3635 A70-40533
- Rumanian book on methods, equipment and facilities for aeromechanical measurements covering fluid flow, wind and shock tunnels, flow measurements, etc
 - 23 p4199 A70-45000

MEXICO

- Geographically smoothed geomagnetic cut-offs for eliminating discontinuity in neutron monitor latitude variation in Mexico City vicinity
 - 01 p0167 A70-10229
- Solar eclipse of 7 March 1970 in Mexico, discussing characteristics, research program, equipment and photographs
 - 18 p3318 A70-37046

MICA

- NT BIOTITE
- NT MUSCOVITE
 - Thermal stability of turbine sealant mica-ceramic materials containing boron nitride
 - 04 p0712 A70-14467
 - Annealed compressed ground synthetic mica and silver dust composite materials, analyzing physicochemical properties
 - 12 p2260 A70-28319

MICE

- Lung lipid embolization effect in decompression sickness on obese mice, showing no relationship to dysbaric syndrome
 - 01 p0015 A70-10361
- Postnatal increase of immunologic competence to sheep RBC antigen in germ free and conventionally reared mice
 - 01 p0000 A70-11310
- Gnotobiotic mice with orally inoculated microorganisms observed for quantitation and fate of bacteria in intestinal tract
 - 01 p0027 A70-11312
- Protein metabolism of mice exposed to compression of air-oxygen mixture containing 27 percent oxygen, showing relationship to food intake
 - 01 p0028 A70-11363

- Altitude changes effect on brown fat content and metabolism in deer mice, noting oxygen consumption and heat production limitation by hypoxia
 - 02 p0242 A70-12865
- Radiation protective action of aminoalkylthiols, aminoalkyl disulfides, isothiuron, thiazolidine, etc, in mouse tissues, erythrocytes and yeast cells exposed to X ray doses
 - 03 p0419 A70-13307
- Radiation protective action of cystamin, cysteamine and aminoethyl in mice, noting equal decreases in redox potential
 - 03 p0419 A70-13310
- Temporary mitotic activity depression with decrease in aberrant mitoses observed in mice intestinal epithelium cells after exposure to 50 Mev proton doses
 - 03 p0423 A70-13708
- White mice hypoxia tolerance enhancement after intraabdominal administration of dilute hydrochloric and lactic acids
 - 03 p0424 A70-13718
- Antihypoxic preparations protective effect on white mice and rats subjected to gravitational accelerations
 - 03 p0425 A70-13890
- Oxygen consumption and rectal temperature in male mice confined in nitrogen and helium diluted hyperoxic atmosphere at specific temperature and humidity ranges
 - 03 p0425 A70-13891
- Corneal epithelium chromosome rearrangements in gamma irradiated white adult mice, noting radiation dosage and duration
 - 03 p0426 A70-13903
- Space cabin atmosphere effects on primary and secondary immunological responses in mice relative to spleen weight and antibody titers following antigenic stimulation
 - 03 p0437 A70-14062
- Spacecraft cabin atmosphere effects on mice primary and secondary immunological responses relative to spleen histochemical and biochemical changes in enzyme activity
 - 03 p0437 A70-14063
- Mice and hamster infection resistance following short term acceleration stress, eliminating low hydrocortisone level as protective agent
 - 03 p0428 A70-14067
- Hypokinesia effects on transversostriated muscle fibers of mice, noting changes in myofibrillar apparatus, mitochondria and sarcoplasm
 - 04 p0629 A70-14569
- Vascular resistance and constriction and muscle mass related in pulmonary arteries of mice subjected to alveolar hypoxia
 - 04 p0630 A70-14679
- Mice irradiation reactions determination from various metabolism indices including blood sugar level, leucocytes number, proteolytic processes rates, etc
 - 07 p1198 A70-18714
- Amysyl effects on conditioned passive avoidance reflexes development and reinforcement in white mice under electric shock
 - 07 p1198 A70-18717
- Resistance to decompression sickness increased and mortality rate decreased in mice after adaptation to hypoxia at normal barometric pressure
 - 07 p1206 A70-19469
- Minute volume changes under acoustic excitation of mice for measuring respiratory process without strain on organs
 - 07 p1214 A70-19824
- Atmospheric carbon dioxide and oxygen concentrations effects on white mice low temperature tolerance
 - 09 p1614 A70-22082
- Mild temperature and dehydration effects on toxicity of caffeine and dextroamphetamine in mice
 - 09 p1616 A70-22329
- Laser irradiation effects on mice skin and internal organs, observing inflammatory symptoms, hair follicles destruction and epithelial atrophy
 - 09 p1624 A70-22816
- Temporary mitotic activity depression with decrease in aberrant mitoses in mice intestinal epithelium cells after exposure to 50 Mev proton doses
 - 11 p1985 A70-25508
- White mice hypoxia tolerance enhancement after intraabdominal administration of dilute hydrochloric and lactic acids
 - 11 p1985 A70-25518
- Free radical content changes in mice organs under hyperoxia and hypoxia
 - 11 p1986 A70-25941
- Thermostability and survival rates of white mice in ambient medium with temperature variations
 - 13 p2351 A70-29330
- Compression effects in air-oxygen mixture on male mice, observing no adversity on mortality, growth and nitrogen content
 - 13 p2353 A70-29436
- Atmospheric carbon dioxide and oxygen concentrations effects on white mice low temperature tolerance
 - 15 p2685 A70-32678

- Hematology of sea level and high altitude native Sonoran deer mice, correlating hemoglobin electrophoretic patterns with oxygen affinity
 - 15 p2686 A70-32835
- Tyrosine content and utilization in mouse liver, showing daily rhythm in composite metabolism rate
 - 20 p3568 A70-38976
- Sodium pentobarbital effect on oxygen poisoned mice, observing respiratory depression coupled with lung failure
 - 21 p3764 A70-41480
- Temperature effect on radiation tolerance of mice exposed to low dose rate gamma radiation, noting mortality delay in low temperature environment
 - 23 p4148 A70-44789
- Mice intestinal epithelium, investigating high energy protons irradiation effect on cells
 - 23 p4149 A70-45028

MICHELSON INTERFEROMETERS

- Michelson interferometer with movable mirror using laser beam to measure linear by counting fringes number, discussing design features
 - 01 p0085 A70-10032
- Length measuring systems based on Michelson type interferometers, laser sources, fringe counting electronics, ambient air compensation, fringe-inch conversion and digital display
 - 01 p0108 A70-10418
- Double beam Michelson interferometer for middle IR with moving mirrors operating in constant velocity mode, applying method to atmospheric emission spectra
 - 01 p0091 A70-10909
- Interferential picture visibility in turbulent atmosphere measured at large path differences with Michelson-Twyman-Green interferometer using He-Ne laser radiation source
 - 03 p0498 A70-12869
- Laser interferometer for earth strain study, measuring Michelson arm length changes by counting fringes in interference pattern
 - 05 p0861 A70-16843
- Roof prism reversing-front Michelson interferometer for phase correlation measurements in turbulent atmosphere
 - 09 p1684 A70-23535
- Michelson interferometer usable in space for stellar spectroscopy, noting compactness achieved through mirror area reduction
 - 10 p1887 A70-24032
- Modified laser Michelson interferometer for probing highly transient plasmas occurring behind incident shock waves in shock tubes
 - 11 p2052 A70-26369
- Optical resonator longitudinal modes selection, comparing Michelson interferometer, internal slanted Fabry-Perot interferometer and absorbing film methods
 - 12 p2251 A70-28290
- Convergence corrections for absorption coefficient measurements by far IR Michelson interferometer
 - 14 p2586 A70-30988
- IR Michelson interferometer for Mariner Mars 1971 mission, investigating atmospheric and surface temperatures and atmospheric water vapor content
 - 16 p2978 A70-34029
- Nimbus 3 satellite-borne Michelson interferometer IR spectrometer for spectrum measurement, obtaining temperature, water vapor and ozone vertical distribution
 - 18 p3257 A70-36175
- Michelson IR interferometer spectrometer /IRIS/ design calibration and performance onboard Nimbus 3 satellite, demonstrating data reduction and inflight calibration
 - 20 p3626 A70-39078
- Stellar IR spectra for types A0 to M7, using Mertz type Michelson interferometer as Fourier transform spectrometer
 - 21 p3922 A70-41980
- Venus spectrum from high resolution Michelson interferometers with Fourier transform and digital computation, discussing Venus atmospheric models
 - 22 p4099 A70-42721
- Earth and atmosphere thermal emission spectra via Nimbus 4 Michelson interferometer, obtaining atmospheric temperature, humidity and ozone profiles
 - 23 p4192 A70-44866
- Millimeter wave solar radiation atmospheric absorption examined at sea level with Michelson interferometer
 - 24 p4398 A70-45785
- Thermal emission spectra of earth and atmosphere from IR Michelson interferometer onboard Nimbus 3 satellite
 - 24 p4330 A70-45977

MICROANALYSIS

- Microprobe analyzer for light elements using electronic optics probe, sample visualization devices and equipment for X photon detection and measurement [ONERA-TP-774]
 - 02 p0275 A70-12210
- Gas chromatography and mass spectrometry applied to porphyrin microanalysis, studying
 - 02 p0275 A70-12210

homologous porphyrin series in ancient sediments and oils

02 p0252 A70-12516

Electron microscope-thin film microprobe techniques in biomaterial studies of chemical segregation, species diffusion and small particle analysis

13 p2411 A70-29808

Diffusion layer microprobe analysis during chromaluminization of Inconel turbine blade

14 p2395 A70-30293

Cu-Ni diffusion couples voids and edges effect on concentration gradients measurement by electron probe microanalysis

22 p4054 A70-42740

MICROBALANCES

Uncoated quartz twin crystal microbalance for monitoring water vapor content of respiratory gases

19 p3368 A70-37844

MICROBE

U MICROORGANISMS

MICROBEAMS

Backreflection X ray microbeam camera with arrangement for positioning preselected area to study grain boundary during creep by Laue method

03 p0492 A70-13759

MICROBIOLOGY

NT BACTERIOLOGY

Germ-free biology experimental and clinical aspects - Conference, Buffalo, June 1968

01 p0027 A70-11309

Microbiological evaluation of modified vacuum probe surface sampler for handling and fallout contamination compared with swab-rinse technique

05 p0807 A70-16574

Microbiological corrosion effects on aluminum alloy fatigue properties inducing further microbiological corrosion compared to chemical corrosion effects

07 p1310 A70-19735

Carbon dioxide fixation in hydrogenomonas eutropha determined from titrating liquid culture with carbon dioxide, showing dependence on oxygen content in gas mixture

11 p1991 A70-25940

Field test for microbiological contamination of jet fuel, discussing phosphates detection

18 p3299 A70-36344

Microbial existence limits in hot springs at varying temperature and pH characteristics

22 p3970 A70-42956

Viruses response to environmental exposure emphasizing temperature, humidity, light and extraterrestrial conditions

23 p4146 A70-44398

MICROCALORIMETERS

U CALORIMETERS

MICROCIRCUITS

U MICROELECTRONICS

MICROCLIMATOLOGY

Hypodynamic effects on human external respiratory function and cardiovascular state under various microclimatic conditions

23 p4149 A70-45078

MICROCRACKS

Dimensional analysis for describing steel surface microcracks growth under uniaxial fatigue loading, using stress-intensity factor and crack extension concepts of fracture mechanics [ASME PAPER 69-MET-G]

04 p0770 A70-14879

Microfissuring of Ni base alloy weldments as function of grain size produced by solution treatment

07 p1306 A70-18996

Fracture processes in homogeneous anisotropic fiber composite materials, describing microcrack initiation, growth and unstable propagation at critical stress level

08 p1532 A70-21912

Electrical and photographic methods for measuring microcracking in fiber reinforced plastics

08 p1501 A70-21916

Precipitation hardened nickel-base alloy microcracking during gas tungsten arc and electron beam welding, studying heat affected zone hardness, phases and grain size

10 p1897 A70-25311

Laser output energy decreased by microscopical fractures masking effect in neodymium glass laser rod during monopulse operation

12 p2250 A70-28152

Ceramics microcrack propagation control through small slab with simultaneous microscopic observation of path and force changes, considering grain boundaries effects

15 p2741 A70-32434

Three dimensional stress fracture criterion for initial microcracking derived by generalizing Griffith flaw theory

19 p3540 A70-37955

Polymethyl methacrylate rupture during omnidirectional compression under laser radiation, showing pressure effect on microdefects and cracks

21 p3841 A70-40644

Polymethyl methacrylate glasses microcracks removal by dry friction

21 p3841 A70-40645

MICROELECTRONICS

NT LARGE SCALE INTEGRATION

Flip chip and beam lead methods for microcircuit assembling, discussing heat removal using heat spreader and temperature cycling effects on tensile strength

01 p0050 A70-10330

Microelectronics equipment high density packaging and heat dissipation, discussing full utilization of high speed

02 p0271 A70-12847

Design, performance and manufacturing information on various microcircuit bridges in conjunction with production of squibs, detonators and pressure cartridges

03 p0547 A70-14112

Ionizing radiation response of integrated microcircuits with different circuit functions and manufactured by different methods

04 p0658 A70-14741

Packaging and placement algorithms for modules in automated design of microelectronic equipment

04 p0659 A70-15193

Diode transistor microelectronic logic circuit reliability, efficiency and optimization using digital computer

04 p0659 A70-15210

Digital microcircuits for one kva three phase DC-AC inverter control to generate sinusoidal 400 Hz output using HF bridge chopper techniques

04 p0628 A70-15340

Concorde microelectronic power plant control system, noting overfueling prevention by throttle actuator during startup and speed governor function

05 p0896 A70-16003

Microelectronic L-band phase-lock loop receiver for data transmission between earth stations and satellites

06 p1017 A70-17338

Complex integrated avionics computer system design for navigation, guidance and control of rotary wing aircraft, emphasizing microelectronic modular assembly

06 p1014 A70-17353

Components and microelectronics - Conference, San Francisco, August 1969, Volume 13, Part 5

06 p1018 A70-17355

Large scale integration /LSI/ in electronics, discussing high density microelectronic, memory and logic circuits, fabrication and computer aided design

08 p1468 A70-20468

Microstrip integrated circuit technology in development of microwave components, discussing fabrication, design, performance and applications

08 p1471 A70-20787

Laser systems application to automatic or semiautomatic materials processing in metal working and microelectronics, including hole drilling, silicon wafers scribing, etc

08 p1502 A70-20820

Microstrip oscillator circuit design for operating with high power/efficiency avalanche diodes, describing low pass filter tuning section role

08 p1475 A70-21278

Diagnostic-control tests for automatic homogeneous microelectronic structures, considering element coupling

09 p1643 A70-22142

Integrated circuit film and hybrid technologies in microelectronics, discussing role of monolithic Si arrays

09 p1645 A70-22632

Sectorial and circular strip resonators natural oscillation modes and freely propagating waves of uniformly bent stripline

09 p1651 A70-23644

Coupled microstrip transmission lines characteristics from parameters evaluation, considering various geometries, inductive and coupling coefficients, dielectric constant and impedance

12 p2190 A70-28167

Quasi-TEM analysis justification for limit cases of guided waves on microstrip transmission lines with dielectric constant approaching free space

12 p2190 A70-28168

Resin systems for encapsulation of microelectronic packages, using thermal expansion dilatometer and gravimetric and differential analyses

13 p2439 A70-29258

Microstripline and balanced stripline, discussing parameters affecting maximum attainable Q in microwave integrated circuits

14 p2561 A70-30921

Microstrip circuit design, obtaining dimensions by computer programs incorporating subroutine sets

14 p2561 A70-30922

Airborne equipment microelectronics technology application to interrogators, transponders and UHF/VHF transceivers

14 p2558 A70-31294

Ultrasonic Al wire bonding for microelectronic applications, discussing tensile strength dependence on machine parameters and aging

15 p2747 A70-32647

Thermal design of hybrid microelectronics modules, considering resistance, assembly, joining, encapsulation and final packaging

16 p2879 A70-33957

Manufacturing and technology of hybrid microelectronics packaging in Black Arrow X-3 satellite equipment

16 p2879 A70-33959

Holographic projection for electronic microcircuit manufacture

17 p3088 A70-35028

Microelectronics in space environment, discussing circuit reliability, radiation effects, etc

17 p3053 A70-35269

Transmit only solid state radar module built with microstrip techniques for phased array systems operating at L and S dual bands

17 p3056 A70-35899

Multichip hybrid microcircuits design and construction, emphasizing reliability and cost reduction

18 p3232 A70-36759

Microelectronic systems radiation resistance, examining logic IC gates for reactor neutron irradiation

18 p3233 A70-36783

Electronically modified stroboscope as light source for multiflash photography of transient events, noting mechanical switches elimination

18 p3262 A70-37095

Thin films physics for microelectronic applications

19 p3389 A70-38194

Microjoining in electronics industry, discussing technologies and nondestructive testing

19 p3437 A70-38424

Integrated microcircuits reliability prediction models based on failure mode and mechanism knowledge

19 p3391 A70-38846

Microcircuit packaging /primarily hermetic/ and assembly techniques, considering cost reduction

20 p3597 A70-39443

Microelectronic packages encapsulation by resin systems with emphasis on thermal expansion, discussing effects of curing temperature, reactive diluents, etc

20 p3655 A70-39444

Aerospace microelectronic digital computer design, discussing optimal packaging by use of integrated circuits

21 p3795 A70-41694

High fidelity microelectrode recording of phase zero cardiac transmembrane action potentials, utilizing memory oscilloscope

21 p3772 A70-42163

Microelectronic phase lock microwave receiver packaging, discussing subassemblies interconnection minimization, shielding, RF interference, low loss and testing problems

23 p4164 A70-44536

Cumulative reference list of published books on microelectronics and reliability

24 p4322 A70-46014

High density packaging of micrologic flatpacks using high interconnection method for two-sided use of double-sided card in space flight applications

24 p4320 A70-46248

MICROFIBERS

Internal friction and shear modulus of thin glass fibers of sodium silicate, aluminosodium silicate and nonalkaline aluminoborosilicate

22 p4059 A70-43135

MICROFILMS

Threefold reduction of aerial negatives facilitating microfilming without impairing accuracy and clearness of image details

07 p1278 A70-18692

MICROGRAPHY

U PHOTOMICROGRAPHY

MICROHARDNESS

InAs-GaAs solid solutions microhardness and brittleness, studying chemical composition effects

04 p0730 A70-14464

V and Cr single crystals microhardness anisotropy and causes, noting similarity with W, Nb and silicon ferrite

06 p1088 A70-17613

Microhardness measurements of carbides, borides and nitrides in wide temperature range, considering indentation load selection

06 p1089 A70-17661

Isothermal section determination in Mo-Cr-B at 1000 C using X ray, metallographic analyses and microhardness measurements

06 p1090 A70-17847

Microhardness of transition metals carbides measured after hot compression, suggesting dependence on statistical weight of C atoms with stable sp³ configurations

08 p1516 A70-21116

Microhardness method for property changes in structural materials during sequential cyclic loading, discussing material identification, statistical fatigue theory, fine structure effects, etc

09 p1701 A70-22299

Temperature and hydrogen concentration effect on microhardness of polycrystalline beta-vanadium hydride, obtaining photomicrographs of indentations 10 p1906 A70-25227

Decomposition of supersaturated solid solutions in granulated Al alloys with Mn, Cr, Zr, Ti, V and Mo, studying microhardness and electrical resistivity 12 p2258 A70-28274

Depth measurement of gas-saturated surface layer in Ti alloys, using microhardness method 18 p3277 A70-36472

Silicon-containing pyrocarbon, relating microhardness to microstructure 18 p3279 A70-37220

MICROINDENTATION
U MICROHARDNESS
MICROINSTRUMENTATION
Thermocompensated wire loop microtensensors for machine part stress concentration measurements, including parameter selection nomograms 13 p2409 A70-29519

MICROMANOMETERS
U MANOMETERS
MICROMETEORITES
U MICROMETEORITIDS
MICROMETEORITIDS
NT METEORITID DUST CLOUDS
NT ZODIACAL DUST
Micrometeoroid experiments on OGO 2 and OGO 4 satellites, measuring velocity, masses and particle orbits in earth dust cloud 01 p0086 A70-10444

Optical properties changes of various transmitting materials under simulated micrometeoroid environment, using silicon carbide particles accelerated in shock tube 03 p0523 A70-13027

Correlation between atmospheric meteor entry and gamma and neutron radiation intensity verifying micrometeor antimatter hypothesis 03 p0454 A70-13528

Micrometeorite detection involving impact stress wave monitoring by strain gages embedded in viscoelastic plastic 03 p0487 A70-13573

Piezoelectric sensing diaphragm for detection of micrometeorites in space, noting vibration mode and effect of small beads contact time on calibration errors 04 p0695 A70-15567

Tektite damage caused by micrometeoroid impact, projectile firing at glass spheres and survival time estimation 05 p0916 A70-16834

High velocity microparticle simulation techniques for studying properties, dynamics and origin of micrometeoroids, considering accelerators and impact results [ALAA PAPER 70-30] 06 p1029 A70-18131

Micrometeor flux in near-earth space measured by satellite-borne low noise acoustic detectors 07 p1386 A70-19493

Micrometeorites impact on lunar surface, using optical reflecting and stereoscan electron microscopes to investigate craters on Apollo 11 samples 13 p2485 A70-28474

Vaporization of small meteor particles with identical surface temperature, considering radio communication based on reflection from ionized trails 14 p2636 A70-30323

Micrometeor flux in near-earth space measured by satellite-borne low noise acoustic detectors 15 p2805 A70-32738

Black Arrow X3 spacecraft design and experiments, including silicon cells performance electronic assemblies and micrometeoroid fluxes 17 p3178 A70-35256

British X 3 satellite for investigating thermal control surface finishes stability, ultrathin solar cells, electronic systems reliability and micrometeoroid flux measurement 18 p3333 A70-36511

Meteoritic dust collection in upper atmosphere by sounding rocket, discussing efficiency of sampling configurations for inertial impact 18 p3316 A70-36768

Ionization and loss processes for meteoric elements in lower ionosphere, suggesting hydrates formation role in alkali metal ions depletion 22 p4106 A70-43305

Meteoritic metallic ions above F 2 peak, discussing current density and transport mechanisms 23 p4239 A70-43841

MICROMETEOROLOGY
Periodic cellular convection in troposphere with allowance for anisotropic turbulent mixing, showing cyclone association and intervals 01 p0135 A70-10206

Aerodynamic roughness length estimation and site roughness increase due to micrometeorological equipment 03 p0483 A70-13166

Toxicity and downwind diffusion of Be rocket exhaust product measurements, using ADOBE experi-

ment and AFRPL micromet meteorological data system 14 p2628 A70-30611

MICROMETEORS
U MICROMETEORITIDS
MICROMETERS
Differential screw gauge for determining micrometer screw periodic errors and error components in level triers, using Rydberg method 04 p0693 A70-15488

Photoelectric multislit micrometer for astronomical purposes, presenting stochastic variables mean error difference formula for arbitrary power spectrum 06 p1071 A70-18458

Positional contact micrometer used to eliminate stars apparent oblique motion in astronomical universal instruments 09 p1681 A70-23342

Ring micrometer radius determination and application to right ascension changes in determining positions of comets, planets and planetary moons 11 p2057 A70-26675

Heart dimension measurement by miniature implantable ultrasonic sonomicrometer, describing system design and operation 12 p2174 A70-26897

MICROMINIATURIZATION
NT LARGE SCALE INTEGRATION
Ferrite-type phase shifter production by microstrip technique and integrated microwave system use in Gunn element Doppler radar 01 p0052 A70-11290

Book on thin film transistors microelectronics covering semiconductor physics, fabrication, analysis, applications and comparison with MOS transistors 01 p0052 A70-11329

Electron image projection tube for fabricating integrated circuits of micron size transistors 03 p0458 A70-14027

Guided elastic waves propagation on layered media, considering elastic wave circuitry design for true microminiaturization 06 p1018 A70-17476

Ultraminiature pressure transducers for use in wind tunnel models 17 p3093 A70-35492

Multipurpose microminiature multichannel biomedical telemetry system, discussing design 19 p3368 A70-37856

Epitaxially grown Si contact for area reduction of MOS transistor circuits 20 p3596 A70-39099

Compact low cost Controller/Programmer/ Evaluator for varied automatic tests, using microminiature components 21 p3803 A70-40768

MICROMINIATURIZED ELECTRONIC DEVICES
Miniaturized components in microstrips on low loss dielectric or magnetic substrates, noting suitability for microwave systems integration 01 p0052 A70-11313

Open circuit development in microcircuits metallization and processing to eliminate nonuniformity, voids and microcracks 02 p0316 A70-12056

Nd laser drilling and welding tool for microminiature electronic device fabrication 14 p2594 A70-30639

Ultraminiature piezoelectric semiconductor pressure transducers for wind tunnel models 17 p3093 A70-35491

Microminiature solid state LSI imaging system design, construction and performance characteristics 24 p4320 A70-46216

MICROMOTORS
Micromotor torsion moment-speed characteristic curve obtained by automatic recording apparatus 09 p1672 A70-22026

Optimality criterion selection for asynchronous microelectric motor design by computer 24 p4293 A70-45470

Gnotobiotic mice with orally inoculated microorganisms observed for quantitation and fate of bacteria in intestinal tract 01 p0027 A70-11312

Mathematical planning of experiments applied to biological mineralization of human wastes, using continuous microorganism cultivation 03 p0435 A70-13715

Vacuum probe as effective device for sampling surface contamination of airborne microorganisms 05 p0808 A70-16704

Microbiological assay procedures for spacecraft sterilization and tabulation of microorganisms found on Surveyor 7 05 p0808 A70-16705

Microbial contamination levels and types detected on Apollo 9 spacecraft and related effects of various test and assembly environments 05 p0809 A70-16711

Micrococcus radiodurans and Sarcina flava radiation resistance from proton irradiation tests in carbonaceous chondrite Migei 08 p1441 A70-20550

Unicellular algae protein diet effects on animal and human enteric microflora composition 09 p1615 A70-22087

Microorganisms survivability in agar subjected to simulated Martian freeze-thaw cycles, discussing soil samples collection and composition 09 p1618 A70-22767

Microorganisms survivability in soils near spacecraft assembly areas during simulated Martian freeze-thaw cycles 09 p1619 A70-22768

Mathematical planning of experiments applied to biological mineralization of human wastes, using continuous microorganism cultivation 11 p1990 A70-25515

Microbial release from solid spacecraft materials after hard landings, testing survival during decontamination or terminal sterilization 15 p2688 A70-31664

Microbial flora in human subjects confined to long term Teklite I underwater habitat 15 p2681 A70-31879

Unicellular algae protein diet effects on animal and human enteric microflora composition 15 p2685 A70-32683

Microbial contamination levels on Apollo 6 spacecraft, discussing intramural environments for assembly and testing 16 p2849 A70-33995

Thermal stability of glycolytic enzymes from thermophilic clostridia 17 p3042 A70-33327

Circadian rhythms in single cell animals, examining cell division, temperature and light effects 19 p3365 A70-38410

Microorganisms metabolic activity effects on rocks and minerals, observing solubilization and altered IR absorption in Si-oxygen vibration region during penicillium simplicissimum growth 21 p3761 A70-40712

Lunar soil sample preparation and monitoring for viable microorganisms presence 22 p3978 A70-42973

Reaction kinetics of microbial sterilization in ultrahigh vacuum and in outer space 23 p4148 A70-44841

MICROPARTICLES
High velocity microparticle simulation techniques for studying properties, dynamics and origin of micrometeoroids, considering accelerators and impact results [ALAA PAPER 70-30] 06 p1029 A70-18131

Microparticle collection experiments during 1966 Orionid and Leonid meteor showers accomplished by Luster and ALARR /air launched-air recovered rocket/ instruments 08 p1575 A70-21393

Refractory oxide submillimeter spherical particle preparation by focused emission from carbon dioxide laser 09 p1697 A70-22984

Filamentary crystal growth associated with hypervelocity microparticles impact upon Cu foil 13 p2513 A70-29264

Microscopic particle mass spectra in six dimensional scalar, spinor and vector fields, noting cosmological implications and eight dimensional theory 14 p2616 A70-30342

Membrane-like properties of synthetic proteinoid microparticulate systems, considering catalytic activities, size and ultrastructure 16 p2847 A70-33029

Extinction parameters of submicron carbon, tungsten and Si particles in hydrogen measured at various temperatures, discussing scattering amplitude functions and Monte Carlo calculations [ALAA PAPER 70-838] 16 p3001 A70-33933

Microprobe analysis of glassy spherules from Apollo 11 lunar regolith, discussing zoning, composition and hypervelocity impact formation 21 p3903 A70-41558

MICROPHONES
First order pressure gradient microphone design based on electrostatic principle, using foil electrets to discriminate against airborne and solid-borne noises 05 p0821 A70-16402

Electret microphones application for pressure fluctuations measurements on thin aerodynamic profiles 03 p0435 A70-13715

noting operation, vibration insensitivity, robustness and cost

06 p1071 A70-18473

Microphone output level in airstream relation to sound pressure and pressure fluctuations caused by turbulent flow

07 p1334 A70-19372

Thermal porous bronze screened microphones for noise measurements in medium under large heat flow

14 p2555 A70-30298

Probe connected to microphone membrane chamber by transmission tube for fluctuating pressure measurement at discrete point in air flow

20 p3635 A70-40509

MICROPHOTOMETERS

U PHOTOMETERS

MICROPLASMAS

P-n junction and microplasmas voltage temperature coefficients during avalanche breakdown

03 p0541 A70-13729

Gas discharge avalanche breakdown in Si semiconductors, analyzing microplasmas, ionization coefficients, p-n junction voltage, electron and light emissions

04 p0731 A70-15494

Laser microplasma formation in focus of two laser beams impinging on crystalline lithium hydride targets

12 p2246 A70-27355

Microplasma and burst noise measurements on discrete silicon planar transistors indicating origin at emitter-base junction

22 p3998 A70-43331

MICROPROGRAMMING

Fourth generation systems architecture in microprogramming in terms of control logic, describing inner computer as subroutine processor for controlling interstation communication

08 p1465 A70-20816

Aerospace system design, considering use of microprogram-controlled digital computers

21 p3795 A70-41690

MICROPULSATIONS

NT GEOMAGNETIC MICROPULSATIONS

Small scale motions in solar photosphere and chromosphere using solar spectrograms

09 p1757 A70-22729

Forward and backward enhancement of auditory system sensitivity as function of short acoustic stimuli

11 p2084 A70-26495

Picosecond pulses in Q switched neodymium glass and ruby lasers, describing pulse measurement with fluorescence

17 p3108 A70-35623

Micropulsations as diagnostic tool for magnetospheric research, explaining ULF and VLF results variances

22 p4021 A70-43282

Magnetospheric plasma parameters from ground observation data of Pc-1 type micropulsations, assuming radiation belt plasma cyclotron instability

22 p4022 A70-43283

Secondary emission detector using linear signal to measure nonrepetitive microsecond ion bursts

23 p4197 A70-44475

MICROROCKET ENGINES

Simulator for testing colloid microthruster, discussing spacecraft interfaces and time of flight thrust data

[AIAA PAPER 69-314] 01 p0058 A70-10834

Pulsed plasma and ion microthrusters providing satellite attitude and position control

05 p0896 A70-16119

Ammonia micropropulsion for geostationary satellites stabilization, discussing principle and working mode of thrusters

09 p1743 A70-22660

Ammonia micropropulsion operation modes and performance for stabilizing synchronous communication satellite, noting advantages over chemical and ion propulsions

11 p2122 A70-25817

Suboptimal satellite attitude control using ionic microthrusters operating by large modulated amplitude impulses caused by electrostatic deflection of beam

13 p2501 A70-28426

Pulsed plasma microthruster propulsion system for synchronous orbit LES 6 satellite

[AIAA PAPER 69-298] 13 p2473 A70-28504

Hollow cathode mercury electron bombardment thruster design, emphasizing low specific impulse operation and discharge chamber improvements

13 p2473 A70-28505

Waste hydrogen utilization in microthrusters for spacecraft attitude control involving mass expulsion of cold gas

[AIAA PAPER 70-613] 16 p2969 A70-33609

Spacecraft attitude control microthrusters utilizing catalytically reactive gas mixtures during pulse mode and steady state operation

[AIAA PAPER 70-614] 16 p2969 A70-33611

Submillipound mercury electron bombardment ion thruster efficiency, noting cathode pole piece, baffle

position and geometry influence on ion chamber performance

[AIAA PAPER 70-616] 16 p2969 A70-33612

Low, medium and high specific impulse microthrusters development in France, using cold gases, subliming solids, hydrazine, ammonia and cesium ions

[AIAA PAPER 70-617] 16 p2969 A70-33613

One millipound cesium ion thruster for synchronous ATS-F satellite, describing power conditioning and control logic subsystems

[AIAA PAPER 70-1149] 20 p3690 A70-40205

Time-of-flight mass flow rate and thrust stand data comparison for two 100 micropound colloid thrusters

[AIAA PAPER 70-1114] 20 p3691 A70-40229

Micropound extended range thrust stand (MERTS) for testing electric thrusters for spacecraft auxiliary propulsion, providing three thrust measurement ranges and data telemetry system

[AIAA PAPER 70-1111] 20 p3607 A70-40232

Colloid microthruster system life test, discussing design and steady state performance

[AIAA PAPER 70-1110] 20 p3692 A70-40233

Critical components effect on small Hg electron bombardment thruster performance, considering glass coated accelerator grids, hollow cathodes and plasma bridge neutralizers

[AIAA PAPER 70-1100] 20 p3692 A70-40238

Composite accelerator electrodes on Cs bombardment microthrusters, testing various designs and electrode coatings

[AIAA PAPER 70-1089] 20 p3693 A70-40246

MICROSCALES

U MICROBALANCES

MICROSCOPES

NT ELECTRON MICROSCOPES

NT ION MICROSCOPES

NT OPTICAL MICROSCOPES

IR microscope and digitally programmed mirror system for printed circuit inspection, allowing two dimensional scanning and magnetic tape reference

01 p0054 A70-10024

Particulate contamination in compliance with military standard cleanliness level, using zoom microscope, charts and tables

12 p2174 A70-27010

Microscopic data importance in recognizing IC semiconductor failure characteristic traits, revealing current direction, voltage magnitude, microsurface temperature excursion and approximate transient duration

15 p2693 A70-32664

MICROSCOPY

Scanned laser microscope producing shadowgraph displays of IR transmittance variations attributed to defects in polished Si and GaAs semiconductor wafers

01 p0105 A70-10025

Holography, discussing light propagation, basic principles, skew reference wave, diffused illumination interferometry, character recognition, microscopy, high density information storage, etc

19 p3427 A70-38449

MICROSEISMS

Quartz floating component design, discussing magnetic sensitivity temperature dependence and microseismic noise rejection properties

14 p2582 A70-30245

MICROSTRUCTURE

NT METEORITIC MICROSTRUCTURES

NT WIDMANSTATTEN STRUCTURE

X ray topography of postannealing substructure of neutron irradiated W and Mo single crystals, indicating increase in disorientation

01 p0115 A70-10065

Chemistry variations effects on mechanical properties, phase stability and microstructure of alloy Unitemp 718 /Ni-Fe-Cr alloy/ via microscopy and X ray analysis

01 p0116 A70-10092

Heat resistant alloys for gas turbine blades observed for long term heating effects on changes of hardness, tensile, impact and stress-rupture properties and microstructure

01 p0116 A70-10149

Relieving microstrains in Ni powders by cold compaction at room temperature using X ray analysis, discussing polygonization process

01 p0117 A70-10161

Microstructural interfacial stability and property retention after elevated temperature exposure of eutectic composites, discussing coarsening rate relationship to interfacial area and energy

01 p0117 A70-10485

Magnetic bay microstructures occurrences at low latitude not restricted to day or night hemisphere

01 p0076 A70-10668

Thermomechanical processing of high strength low alloy steels to evaluate effects of composition, coiling temperature and cooling rate on mechanical properties and microstructures

01 p0118 A70-10726

Metal and alloys micro and macro stress-strain behavior data correlated for linear differential trans-

formers, strain gages, longitudinal resonance waves and X ray diffraction

01 p0092 A70-11248

Ni-based superalloys microstructure, describing composition, formation and characteristics of various phases

01 p0124 A70-11448

Quenched Ti-Mn alloy omega transition phase microstructure characteristics by transmission electron microscopy using thin foils

01 p0125 A70-11639

Ti-Al-Co alloys melting points and cast structures, discussing reactions with melt

01 p0125 A70-11644

Al solidification in direct chilling molds effect on as-cast structure, analyzing heat removal, casting rate and application of water to outgoing ingot

02 p0316 A70-12298

Ingot and powder metallurgy polycrystalline Be flow and fracture behavior and microstructure pressure dependence at room temperature

02 p0317 A70-12318

Steel objects microstructure and hardness tested by continuous magnetic technique, describing experimental apparatus model

02 p0300 A70-12479

Structure and segregation effects in Type 304L stainless steel weldments using transmission electron microscopy, optical microscopy and electron microprobe, comparing weld types

02 p0319 A70-12754

Microstructure and impact strength of welds of Cr-Mn steel containing nitrogen, observing grain growth dependence on nitrogen content

03 p0509 A70-13277

Grain size, forging parameter and microstructure effect on stress-rupture properties of wrought Ni-base alloy

03 p0511 A70-13567

Maraging steels microstructure and ductility influence on stress corrosion resistance in magnesium chloride salt chamber

04 p0711 A70-15681

Stroboscope lighting system for microstructural examination of fatigue test sample failure

05 p0845 A70-15882

Thermodynamics of elastic continuum with microstructure, modifying second law to include microtemperatures

05 p0930 A70-16083

Constitutive equations for isotropic elastic and thermoelastic materials with microstructure derived using free energy function, giving uniqueness theorems

05 p0932 A70-16136

Binary Al-Y system thermal and microstructural analyses at room temperature and 200 C, obtaining partial diagram and mechanical properties

05 p0864 A70-16546

Thermal conductivity and aperiodic temperature distribution in microstructure of composite materials reinforced with solid and hollow fibers

05 p0958 A70-16952

Microstructure effects on smooth and notched fatigue and room temperature tensile properties of Ti-Al-V alloy using heat treatment combinations

06 p1087 A70-17458

Graphite microstructure effect on ablation performance, discussing grain size, porosity and degree of graphitization

[AIAA PAPER 70-155] 06 p1092 A70-18147

Boundary value problems in nonlocal elasticity, considering two one dimensional media coupling with microstructure by Green function analog

07 p1399 A70-18665

Steels microstructural plastic deformation under pulsed laser irradiation

07 p1303 A70-18712

Solution treating temperature and microstructure effects on hot rolled Ni base alloy properties

07 p1306 A70-18995

Thin walled metal cylinders residual deformation microstructures under internal impulsive loading

07 p1285 A70-19969

Thin sheet and laminate bullet hole deformation zone microstructure observation by electron microscopy, considering terminal ballistics approach

07 p1413 A70-20049

Ce-Ni-Si system X ray and microstructural analysis, constructing phase diagram for Ce contents of 0-33.3 wt percent

08 p1555 A70-21115

PbTe-based Sn, Se and Ge alloys lattice constant, thermal EMF and resistance, fusibility and microstructure

08 p1555 A70-21117

Rare earth elements effects on microstructures and mechanical properties of cast Al, Al-Si and Al-Si-Mg alloys

08 p1516 A70-21127

Pyrolytic C-TiC alloys obtained by precipitation from gaseous phase, discussing microstructural properties anisotropy

08 p1517 A70-21146

- Mo sheet longitudinal and transverse mechanical properties and microstructure after annealing
08 p1517 A70-21199
- High temperature thermomechanical treatment effects on stainless steels and Ti alloys microheterogeneity, noting corrosion resistance improvement
08 p1519 A70-21444
- Silicon carbide whiskers end structure using field emission patterns
08 p1528 A70-21551
- Waspaloy gamma prime solvus temperature relationships as function of solution treatment and precipitation strengthening additives, discussing microstructure and tensile properties
08 p1520 A70-21555
- Wrought aluminum based high strength alloys structure and mechanical properties
08 p1522 A70-21708
- Nondestructive testing and inspection by acoustic emission from stressed materials, discussing microstructure effect and crack initiation detection
08 p1508 A70-21747
- Cobalt modified Ti-6Al-4V plate and billet, testing effects on heat treatment response, microstructure, tensile and fatigue properties, fracture toughness, etc.
08 p1523 A70-21852
- Microstructure of wrought arc-cast polycrystalline W sheet after high temperature creep deformation at various stress levels
08 p1525 A70-21962
- Subboundary migration in Mo, W and W-Re alloy single crystals subjected to cyclic heating, using metallographic technique involving electrolytic polishing and special etching
09 p1701 A70-22297
- Transverse and longitudinal resistive critical fields of Nb wires, discussing superconductivity in dislocation cell walls created by drawing or swaging
09 p1704 A70-22802
- Internal stresses and substructures dependence on thermomechanical histories of stainless steel during creep, noting subgrain orientation
09 p1705 A70-22805
- Work strengthening and microstructure of Co-Ni base alloys containing Cr and Mo, discussing deformation induced martensitic transformation
09 p1705 A70-22806
- Yttrium iron garnet sintering and grain growth rates dependence on yttrium/iron ratio
[ACS PAPER 16-BE-68F] 09 p1740 A70-22982
- Mo single crystals dislocation substructure strain dependence after creep using etch pitting techniques
09 p1708 A70-23544
- Ultrasonic vibrations effects on microstructure and mechanical properties of polycrystalline titanium during phase recrystallization
10 p1903 A70-23863
- Microstructure and ductility of air- and vacuum-melted heats of corrosion resistant steels, investigating tensile and yield strengths for all grain directions
10 p1905 A70-25170
- Aluminum alloys hot cracking during welding, ascribing failure to combination of strain and susceptible microstructure
10 p1897 A70-25313
- Fe-Mo-C and Fe-Ti-C alloys microstructure and hardness after rapid cooling from melt, considering phase dispersion and particle size, spacing and shape
11 p2065 A70-25774
- Anomalous grain growth kinetics and recrystallization in electron beam annealed nickel determined by microstructural and radiographic study, noting annealing time dependence
11 p2068 A70-26596
- High modulus graphite fiber structure using electron beam
11 p2071 A70-26845
- Ti alloys tensile properties correlated with microstructure for multiple heat treatment cycle variations for high strength and adequate ductility
12 p2252 A70-27107
- Low carbon Ni steels isothermal transformation characteristics, observing equiaxed ferrite and Widmanstätten and bainitic structures at various temperatures
12 p2256 A70-27615
- Uniqueness theorem in Mindlin theory of elastic materials with microstructure
13 p2508 A70-28488
- Moisture effect on fatigue crack propagation and fracture path through microstructure of 300-grade maraging steel
13 p2432 A70-28607
- Linear theory of homogeneous and anisotropic elastic media with microstructure, establishing reciprocity and variational theorems
13 p2512 A70-28951
- Junction and contact regions in electronic devices using X ray microanalysis and electron probe
14 p2590 A70-30355
- Austenization temperature, cooling rate and tempering conditions effect on steel castings structure, strength and impact properties
14 p2596 A70-30875
- Book on high modulus fibers and composites providing data for preparation, microstructure, structure and properties
14 p2598 A70-31315
- Hot rolling and warm working effects on microstructure and mechanical properties of Ni-Cu-Cb steel, noting optimum austenite plus ferrite phase field
15 p2756 A70-31566
- Boundary value problem in linear elastodynamics, investigating Ignaczak type theorems for microstructure effects in transient heat conduction problems
15 p2822 A70-32343
- High temperature scaling of Ni, investigating role of oxide microstructure and growth stresses
15 p2762 A70-32388
- Fracture of failed tensile impact and compression test pieces of hardened SAE 52100 steel, using scanning electron microscope
15 p2745 A70-32443
- Thorium phosphide anti-type microstructure of La-Rh system by X ray diffraction, discussing bcc structure, lattice constants, etc.
15 p2695 A70-32549
- Composition and heat treatment effects on Fe-Ni alloys structure, using micrographic, autoradiographic and potentiokinetic methods
16 p2916 A70-33080
- Microstructure and reaction kinetics of flat premixed fuel-rich hydrogen-oxygen-nitrogen flame at atmospheric pressure
16 p2998 A70-33900
- Aqueous stress corrosion dependence on microstructural features of Ti alloys, using optical and electron microscopy and X ray diffraction
17 p3113 A70-34370
- Shock deformation effects on strengthening and microstructure of Ti and Ti-Mo alloys
17 p3120 A70-34420
- High temperature heating and cooling effects on mechanical properties and structure of Ti welds, using notched bar impact specimens
17 p3098 A70-34423
- Forged alpha/beta Ti alloys, investigating relationship between mechanical properties and microstructures produced by heating
17 p3120 A70-34427
- Cobalt addition to Ti-Al-V alloys, examining yield strength, heat treatment, ductility and microstructure
18 p3271 A70-35964
- Binary Co-Cr alloy open circuit potential and microstructure, examining effects of composition, heat treatment, allotropic transformation and precipitation
18 p3271 A70-35966
- Kingfisher meteorite metal particles microstructures, discussing phase transformation during reheating by shock
18 p3310 A70-35970
- Microstructural changes of Ni-Cr lamellar eutectic alloy during creep deformation at 625 and 760 C
18 p3272 A70-36034
- Two phase stainless steels with microduplex structures, taking into account martensite and ferrite effects on mechanical properties
18 p3272 A70-36038
- Silicon-containing pyrocarbon, relating microhardness to microstructure
18 p3279 A70-37220
- Titanizing Armco iron and carbon steels, examining diffusion layer structure and phase composition
19 p3451 A70-37460
- Microstructure effects on magnetic properties of polycrystalline MnZn ferrites with high permeability
19 p3484 A70-37565
- Crystal dislocations and microstructure effects on magnetic properties of polycrystalline MnZn ferrites with high permeability, noting eddy currents role
19 p3484 A70-37566
- Linear micromorphic material constants determination from constituent properties based on microelasticity theory
19 p3538 A70-37795
- Stress differential equations of micropolar elasticity, considering mass forces and moments of inertia
19 p3459 A70-38672
- W-Mo-Nb-Ta system structure and properties at room and high temperature by microstructural analysis and hardness measurements, discussing Mo addition effects
19 p3453 A70-38713
- Soviet papers on heat resistant alloys and steels structure by electron microscopes
20 p3644 A70-39036
- Ni-Cr heat resistant alloys structural transformation kinetics under aging, creep and operational conditions, discussing solid solution decomposition, hardening phases coagulation and dissolution, etc.
20 p3645 A70-39037
- Microstructure and phase distribution in maraging steels subjected to austenization and subsequent aging in reversible transformation temperature range
20 p3645 A70-39038
- Heat treatment and alloying element influence on phase and structure transformations in Ti alloys, investigating mechanical properties and creep resistance
20 p3645 A70-39039
- Ti alloys fine structure, mechanical properties and alloying elements diffusion mobility during heat treatment, observing chemical and structural inhomogeneities
20 p3645 A70-39040
- Two phase Ti alloy subjected to quenching and annealing studied by diffraction electron microscope, discussing needles complex fine structure
20 p3645 A70-39043
- Al-Zn-Mg alloys structural transformations by diffraction electron microscopy, investigating grain boundary and dislocation structure as function of heat treatment and chemical composition
20 p3646 A70-39044
- Duraluminum dislocation structure dependence on deformation temperature by electron microscopy, discussing subgrain boundaries
20 p3646 A70-39045
- Stressed cast Mg-Nd-Zr alloys structural transformations kinetics over temperature range by electron microscopy
20 p3646 A70-39046
- Graphite filament composite structure shear strength decrease with modulus increase, examining fiber microstructure effect on interlaminar properties by short beam shear test
20 p3654 A70-39206
- Carbons and graphites ablation tests for predicting performance under reentry conditions, considering microstructure effects
20 p3735 A70-39214
- Variational principles in linear quasi-static theory of inhomogeneous and isotropic viscoelastic solids with microstructure
20 p3718 A70-39229
- Microstructure and composition of hafnium dioxide stabilized with Ca, Y and Mg oxides using metallographic, X ray and microprobe
20 p3654 A70-39242
- Fe-Ni-C alloys austenite dispersion matrix effects on martensite structural characteristics
20 p3649 A70-39705
- Heating conditions effect on microstructure, hardness, transformation temperatures and dimensional anisotropy of maraging steel
20 p3649 A70-39941
- Beta III Ti alloy for aircraft fasteners, describing microstructure and mechanical properties
20 p3650 A70-39966
- Metallographic preparation of materials for microstructural studies, discussing deformation-free sampling, metal polishing, microphotography and quantitative microscopy
21 p3825 A70-40895
- Carburization and grain size of tungsten carbide powder from W powder as function of temperature, using optical and electron micrographs
21 p3839 A70-41412
- Sommerfeld type radiation conditions for linear homogeneous isotropic elastic materials with microstructure, discussing field equations, displacement and rotation vector and scalar conditions
21 p3936 A70-41417
- Creep and stability of microstructural Al elements under varying temperatures, noting grain boundary migration
21 p3839 A70-41429
- Apollo 11 lunar rock and fines shock induced and melting microstructural mineral damage, discussing meteorite bombardment, phases without melting and microbreccia
21 p3902 A70-41550
- Apollo 11 lunar dust and breccia micromorphology and surface characteristics implying weathering processes
21 p3910 A70-41622
- Metastable beta Ti alloy as-quenched microstructure stability with respect to thin foils transformation during electrolytic polishing and bulk specimens during cold rolling
21 p3841 A70-42150
- Recrystallization kinetics and microstructure of low carbon Ti stabilized steel cold rolled and annealed in 800-1750 F range
22 p4053 A70-42730
- Hot work effect on properties and microstructure of wrought Waspaloy, observing temperature decrease effect on fracture ductility
22 p4054 A70-42739
- Recrystallized and nitrided Mo alloy microstructure under plastic deformation by tension at high temperatures
22 p4038 A70-43122
- Mo microstructure changes at high temperatures, noting polygonization, grain migration and crack propagation during failure
22 p4055 A70-43125
- Sound velocity in isotropic nonlinearly elastic continuum with microstructure, showing dispersion coincident with Cosserat constant
22 p4120 A70-43713
- Columnar grain and Ni alloy single crystal gas turbine engine components resistant to high temperatures produced by precision casting, using directional solidification
23 p4207 A70-44857

Austenitic formation by rapid heating of Ni maraging steel, noting microstructural characteristics relationship to martensite before phase transformation

24 p4356 A70-45144

Martensite plate substructure in Fe-Mn-Cr-C alloy, using transmission electron microscopy and diffraction study

24 p4358 A70-45238

Eutectic NiAl-Cr alloys, investigating quaternary additions effect on rod-plate transition to faceted microstructure

24 p4359 A70-45244

Cyclic loaded high purity Al samples, noting substructure around fatigue cracks

24 p4362 A70-46185

Thin Al foil subjected to cyclic bending stresses, investigating substructures and strain regions around fatigue crack

24 p4362 A70-46186

Mg addition effects on impact strength and micro structure of Al-Si-Cu alloys, using Charpy test and metallographic methods

24 p4363 A70-46196

Spark erosion or plasma jet treatment effects on Co surface structure, describing allotrope delta phase

24 p4364 A70-46221

Aluminized Armco iron and steel diffusion layers phase composition and microstructure

24 p4350 A70-46337

MICROTHRUST

Satellite spin stabilization by Cs contact ion microthrusters with beam deflection, investigating performance obtained by optimal and suboptimal laws

13 p2506 A70-29143

Microthrusters for geostationary satellites attitude and position control

15 p2791 A70-32279

Spinning satellites stationkeeping at synchronous altitude, using solid propellant pulsed plasma microthrusters

[AIAA PAPER 70-1148]

20 p3690 A70-40206

Orbital mechanics of transfer orbits under small horizontal thrust, reducing second order differential equation to linear inhomogeneous equation

23 p4245 A70-44691

MICROTOPOGRAPHY

U TERRAIN

MICROVISION LANDING AID

Electronic attitude director indicator /EADI/ for supersonic transport, employing CRT display, head down TV and microvision sensors

19 p3463 A70-37911

MICROWAVE AMPLIFIERS

Microwave generation and amplification using Gunn effect semiconductor devices

01 p0160 A70-11289

Microwave transistor amplifier design and specifications, discussing applications and economy in design, production and use

06 p1018 A70-17358

Multistage microwave transistor amplifiers design for 4 GHz band, describing poor input/output impedance matching solution

08 p1475 A70-21279

TWT amplifiers for 4-8 GHz frequency range exhibiting decreased weight and volume and increased efficiency

08 p1477 A70-21370

Broadbanding method for microwave reflection type amplifiers using additional resonators

09 p1645 A70-22604

Low noise nonreciprocal microwave parametric amplifier with up-and-down converter and idlers in cascade

09 p1647 A70-22850

Silicon diodes pulse operated in avalanche resonance pumped modes for producing stable microwave amplification

10 p1847 A70-23889

Solid state multistage high power avalanche amplifier at X band

10 p1847 A70-23890

Spacecraft S band power amplifier TWT electrical, environmental and life tests under saturated conditions

[AIAA PAPER 70-506]

11 p2016 A70-25468

Microwave amplifiers based on interaction between piezoelectric acoustic waves and collinearly drifting carriers, analyzing gain, frequency response, etc

11 p2018 A70-26164

High dynamic range low noise parametric microwave amplifier performance measurement for radar receivers

12 p2183 A70-27166

Wideband microwave transistor IF amplifier for mm wave communication system

14 p2555 A70-30283

Millimeter and submillimeter wave receivers, describing detectors, mixers, low noise amplifiers and radiometers

14 p2549 A70-30448

Computerized design of transistorized UHF wideband amplifier, using successive approximations for optimum circuit automatic selection

14 p2556 A70-30668

Microwave parametric amplifiers with nonideal circulators, deriving gain via scattering matrix theory and signal flow graphs

16 p2874 A70-33389

Millimeter wave amplification by pumped n-type gallium arsenide oscillating in limited space charge accumulation mode

16 p2875 A70-33399

Silicon avalanche transit time diodes as CW microwave generators and amplifiers

16 p2876 A70-33404

Wideband microwave IC tunnel diode amplifier /TDA/ for artificial satellites, discussing noise, size and weight reduction

17 p3053 A70-35277

SHF traveling wave tube amplifier design and characteristics

17 p3054 A70-35413

S band CW power amplifier and varactor doubler module for airborne phased arrays

18 p3231 A70-36674

Hybrid integrated microwave power amplifiers, using high-Q thin film lumped passive elements

18 p3232 A70-36760

Optimum junction area for maximum microwave output power of silicon IMPATT diodes for X band operation

23 p4167 A70-43775

Design tolerances and compensating networks for microwave transistor amplifier, using synthesis search and trial calculation by computer

23 p4168 A70-43780

Minimum noise microwave parametric amplifiers incorporating varactor diodes with frequency dependent apparent loss resistance

23 p4169 A70-43786

Ferromagnetic microwave amplifiers operation, describing longitudinal pumping amplifier using YIG

23 p4170 A70-43825

Computerized design of broadband microwave amplifiers with complex terminations, using transfer scattering parameters for analysis and optimization

24 p4316 A70-45211

MICROWAVE ANTENNAS

Compact range techniques using collimator for radar reflectivity and microwave antenna gain and pattern measurements

02 p0269 A70-12586

Numerical solutions to determinantal equation for predicting properties of periodically modulated dielectrically filled frequency scanning waveguide as microwave antenna

03 p0457 A70-13696

Analytic solutions for focal plane electric field components in parabolic reflector antennas

03 p0457 A70-13697

Shell directional antennas operational behavior at 2 and 4 GHz and mechanical properties

04 p0660 A70-15661

Variational principle used in microwave breakdown predictions for rectangular aperture antenna

05 p0824 A70-16988

High gain paraboloidal reflector antenna with horn feed for satellite and terrestrial microwave links

06 p1022 A70-18022

Bounds on near electric field outside rectangular slot in conducting ground plane applied to microwave breakdown limitation

09 p1646 A70-22696

Stripline elements centimeter wavelength emission level determination by comparison with reference antenna radiation patterns

09 p1652 A70-23650

Phased array radar system synthesis, discussing small aperture systems, effects of solid state technology and role of data processing

10 p1842 A70-24877

Integrated circuit microwave phased array radar antenna systems for multiple frequency bands and multifunction operations to save cost and space

10 p1851 A70-24878

Microwave waveguide insertion-loss calibrations, comparing cavity Q and direct measurement methods

10 p1854 A70-25315

Microwave axicon with dielectric cone at aperture of focused antenna to reduce far-field radiation pattern beamwidth

14 p2549 A70-30512

Anechoic chambers and test equipment for microwave antenna pattern measurements, discussing electromagnetic shielding and construction

14 p2557 A70-31180

Steerable microwave circular array to provide 360 deg electronic beam steering with computerized adaptive amplitude and phase control

16 p2874 A70-33392

Microwave circular array with electronic beam rotation of patterns by applying linear phase tapers to Butler matrix feed

16 p2874 A70-33393

Steerable C band waveguide arrays design for forming monopulse cluster of sum and difference beams

16 p2875 A70-33395

Compact integrated microwave antenna of composite structure involving slotted waveguide planar array capable of operating in three frequency bands

16 p2876 A70-33406

Thin window for circularly polarizing antennas, measuring circularity and VSWR performance on S and X band test sections

16 p2877 A70-33410

X band airborne antenna phased array, describing phase shifter, radiation pattern, associated computer, etc

16 p2864 A70-33454

X band aircraft antennas selection and design for defense communications satellite systems, emphasizing steerable phased array

16 p2865 A70-33712

Microwave antenna with aperture in infinite conducting plane, analyzing radiation patterns, scattering and diffraction

17 p3043 A70-35053

Microwave receiving antenna, discussing directivity, cross section, power gain, equivalent circuit, etc

17 p3044 A70-35054

Geometrical optics laws, principles and procedures applied to microwave antennas design and analysis

17 p3044 A70-35067

Impedance measurements on microwave tripole antenna for circular polarization, including expressions for radiation pattern

19 p3388 A70-37868

U.S. nationwide satellite network for multichannel community antenna TV /CATV/ operated at 12 GHz band

19 p3382 A70-38891

Lens with radial symmetry for mm wave scanning antenna

20 p3598 A70-40307

Millimeter wave reflector antennas, considering various system designs, performance, pointing capabilities, limitations and applications

20 p3599 A70-40309

Uniformly and nonuniformly spaced microwave antenna arrays, investigating directivity function and gain characteristics dependence on spacing

20 p3599 A70-40313

T, Y and ring microwave antenna array configurations for radio astronomy, comparing baseline distributions

20 p3599 A70-40317

Short cylindrical microwave antenna radiation directivity enhancement by optimum double impedance loading

20 p3599 A70-40318

Microwave antenna near field patterns analysis by spherical harmonic expansion, discussing validity conditions and convergence

21 p3796 A70-40556

Low cost microwave receiver and antenna for instructional satellite TV broadcasting in developing nations

21 p3789 A70-41355

Multiple beam earth station torus microwave antenna for satellite communication with nonplanar field of view over geostationary arc

21 p3798 A70-41357

Parabolic reflector microwave antenna flared horn primary feeds design for maximum aperture efficiency based on electric field matching

21 p3800 A70-41946

Microwave antenna array irregularity location from hologram by optical signal processing, using far field spatial filter

21 p3792 A70-42048

Near field vector evaluation of Fresnel zone field for microwave reflector antennas

23 p4161 A70-43771

Low cost microwave antenna-receiver for satellite FM TV signal reception at SHF and conversion for standard sets

23 p4164 A70-44645

Airborne radiometer slim multibeam millimetric antenna, describing design, construction and performance

24 p4316 A70-46320

MICROWAVE ATTENUATION

Attenuation vs pathlength for given fading probability of microwaves by intense rain, evaluating dual parallel path diversity

05 p0815 A70-16575

Microwave absorption by rotational transition of interstellar formaldehyde in direction of Sgr B2, Sgr A and W51

08 p1570 A70-20896

Microwaves scattering and attenuation in precipitations from raindrop size distribution curves analysis

08 p1462 A70-21096

Low pass filter structure of focusing reflectors designed for quasi-optical system, noting energy absorption

08 p1476 A70-21287

Microwave signal fading in Venus atmosphere due to turbulence, discussing atmospheric dielectric permittivity variance

09 p1764 A70-23484

Microwave power absorption in plasma investigated by transmission cavity excited in TE mode, determining electron density and collision frequency
11 p2089 A70-25841

EHF microwave absorption in compressed carbon dioxide, measuring dielectric loss as function of gas density
12 p2273 A70-27571

Anisotropic superconducting energy gap of pure Zn from microwave absorption measurements
16 p2961 A70-33776

Anisotropic energy gap model in superconducting Zn to describe microwave absorption measurements
16 p2961 A70-33777

Cosmic microwaves anomalous absorption by interstellar IR-pumped formaldehyde in dust clouds shock heated layer
17 p3154 A70-34535

External DC electric field effect on microwave absorption in plasma
23 p4226 A70-44372

MICROWAVE CIRCUITS

Microwave circuit for increasing Gunn oscillators injection locking capabilities and reducing FM resulting from bias-voltage fluctuations
01 p0050 A70-10783

Ferrite-type phase shifter production by microstrip technique and integrated microwave system use in Gunn element Doppler radar
01 p0052 A70-11290

Rise time relationship with signal bandwidth for class of TEM mode microwave delay line filters
02 p0257 A70-12185

Microwave circuits automatic analysis and design using digital computer in batch mode, describing analysis-optimization program
03 p0457 A70-13562

Dielectric loaded waveguide with symmetric microstrip line, evaluating transverse wave number by finite difference method
03 p0458 A70-14035

Self excited microwave mixer and transmitting oscillator using Gunn diode applied to short distance Doppler radar
05 p0822 A70-16678

Solid state microwave acoustic variable delay devices for radar, fuses, repeaters, altimeters, etc, emphasizing magnetoelastic wave method
06 p1018 A70-17356

Microwave transistors frequency and power characteristics and tradeoffs in relation to thermal and packaging design
06 p1023 A70-18390

Microwave mixer design to increase dynamic range applied to communications and video systems
07 p1243 A70-20216

Microstrip integrated circuit technology in development of microwave components, discussing fabrication, design, performance and applications
08 p1471 A70-20787

Wideband tunable CW Gunn effect oscillator design, discussing microwave circuit effects on performance
08 p1471 A70-20788

Controllable microwave phase shift varactor diode circuit parameters design optimization using digital computer for transmittance matrix coefficients calculation
08 p1474 A70-21230

Interference emission filtering in high power microwave transmitters, discussing spurious emissions removal or rejection by transmission line filters
08 p1474 A70-21257

Hybrid microwave integrated circuits technology and design, discussing distributed and lumped-element structures and component properties
09 p1644 A70-22225

Natural frequencies and electromagnetism field distributions in rectilinear and cylindrical dielectric resonators used in microwave circuits
09 p1644 A70-22280

Quasi-optical waveguide component (attenuator) in S-band measured for performance noting diffraction as limiting factor
09 p1647 A70-22711

Nonlinear phase distortion measurement in microwave limiters under dynamic conditions using two tone test signal
09 p1647 A70-22714

Microwave sources power stabilization, control and noise reduction using feedback techniques
09 p1649 A70-23275

Avalanche diodes and associated microwave circuits power generation in terms of IMPATT, TRAPATT, parametric, space-charge feedback and thermal modes
10 p1847 A70-23887

Hybrid microwave integrated circuits application to phased array and Data Relay Satellite System space transponder
10 p1851 A70-24879

Integrated microwave systems development taking into account cost effectiveness and anticipating kilowatt and megawatt systems
10 p1851 A70-24880

Microwave devices including gridded tubes, magnetrons, traveling wave tubes, amplifiers, solid state devices for radar and communication applications
10 p1851 A70-24885

Microwave acoustic delay lines design and fabrication for UHF to X band frequency ranges
11 p2005 A70-26163

Surface acoustic wave delay lines using interdigital transducers based on piezoelectrics with applications in VHF and UHF signal processing
11 p2005 A70-26165

Microwave surface acoustic delay lines properties, advantages, electron beam fabrication, optical probing for propagation loss measurement, etc
11 p2005 A70-26166

Computerized design of microwave circuits with S matrix
11 p2019 A70-26714

Double diffused epitaxial silicon bipolar microwave transistor design, fabrication and performance evaluation, including scattering parameters vs frequency for common-emitter amplifier
13 p2379 A70-29592

Microwave backward tunnel diodes in InAs, predicting reliability and sensitivity improvements over other materials
13 p2379 A70-29593

Microwave integrated circuit lumped element approach, showing performance as function of geometry and frequency
14 p2561 A70-30920

Microstripline and balanced stripline, discussing parameters affecting maximum attainable Q in microwave integrated circuits
14 p2561 A70-30921

GaAs-Ge heterojunction transistors with microwave planar geometry, calculating performance for comparison with Ge homojunction transistor
14 p2556 A70-30925

Computer aided design for microwave branch line couplers dimensions practical for integrated circuit microstrip fabrication
15 p2711 A70-32602

Microwave IC methods applied to solid state signal sources design, using varactor tuned transistor oscillators, resistive isolation pads, amplifiers and frequency multipliers
16 p2872 A70-33069

X band acoustic delay lines using thin film piezoelectric transducers
16 p2874 A70-33391

High Q reactance network realization for integrated microwave systems employing evanescent mode waveguide components
16 p2875 A70-33402

Wideband varactor multipliers with flat output as microwave sources in radar systems
16 p2877 A70-33412

Microwave devices with harmonized electron beam constructed from klystrons, TWT, backward wave tubes, magnetrons
18 p3231 A70-36414

Avalanche transit time diode and transferred electron oscillators in microwave systems, discussing design, performance and applications
18 p3232 A70-36675

Extrinsic photoconductive detectors, comparing performance for microwave and DC bias based on gain bandwidth product and SNR analysis
18 p3232 A70-36746

Microwave conductivity of thick film screen-printed microstrip circuits, measuring closed resonators SHF Q factors
19 p3388 A70-37964

Microwave L-band correlator using YIG delay lines varied by electronically changing magnetic bias
20 p3597 A70-39468

Microwave waveguide mount characterization of varactor diodes, using transmission resonance and Dolph-Chebyshev taper
21 p3797 A70-40759

Admittance matrix of microwave networks, referring to coaxial line-waveguide coupling through 3 kMc adapter
21 p3802 A70-42250

RLC networks and microwave components design by applying optimization technique
22 p3997 A70-43175

Stripline and microstrip junction circulators analysis for microwave integrated circuits, based on clockwise and counterclockwise rotation modes
23 p4169 A70-43787

Information processing methods in microwave measurement using digital computers, emphasizing active and passive transducers
23 p4193 A70-43795

Superheterodyne EPR spectrometer microwave bridge using single X band klystron
23 p4170 A70-43798

Semiconductor microwave generator design for maser simulator using transistorized amplifier, varactor frequency multiplier and diode multiplier
23 p4171 A70-43878

Microwave p-n diode RLC equivalent circuit parameters experimental determination
23 p4171 A70-43956

Phased array radar for missile defense, discussing development trends toward adaptive system logic control and microwave digital circuitry for signal processing
23 p4172 A70-44012

Solid state IF or baseband switching elements design for high capacity multichannel microwave systems
23 p4172 A70-44014

Phased array radar systems microwave circuit modules packaging techniques, discussing interconnections, assembly, hermetic sealing and leak testing
23 p4173 A70-44535

Ferrite junction microwave circulator bibliography /1956-1969/ covering stripline and waveguide versions theory, designs, constructions and applications
24 p4318 A70-45210

Wideband TEM quarter wave microwave coupler with continuously variable coupling range, employing even and odd mode characteristic impedance levels change
24 p4318 A70-45215

Thin film microwave acoustic transducers, calculating top electrode thickness effect on frequencies of infinite conversion loss
24 p4333 A70-45218

Packaged microwave junction diodes in reduced-height waveguide, discussing parasitics and equivalent circuit parameters measurement technique
24 p4318 A70-45220

Variable microwave attenuator using p-i-n diodes and three-port hybrids built in stripline technique
24 p4318 A70-45222

MICROWAVE COUPLING

Impedance and field distribution of bifurcated and stepped waveguide junctions with inserted diaphragm calculated by transformed singular integral equation
05 p0820 A70-16385

Interdigitated microstrip quadrature couplers suited for monolithic or hybrid thin film microwave integrated circuitry
08 p1476 A70-21291

Computer aided design for microwave branch line couplers dimensions practical for integrated circuit microstrip fabrication
15 p2711 A70-32602

Equivalent circuits and general formulas for small hole coupling of resonant cavities and waveguides
15 p2714 A70-32817

MICROWAVE EQUIPMENT

NT GYRATORS
NT MICROWAVE ANTENNAS
NT MICROWAVE FILTERS
NT MICROWAVE INTERFEROMETERS
NT MICROWAVE PLASMA PROBES
NT MICROWAVE PROBES
NT MICROWAVE RADIOMETERS
NT MICROWAVE TUBES

Microwave ILS for difficult sites or conditions, detailing capabilities and operation principles
01 p0136 A70-10301

GaAs - Conference, Dallas, October 1968
01 p0157 A70-10515

Miniaturized components in microstrips on low loss dielectric or magnetic substrates, noting suitability for microwave systems integration
01 p0052 A70-11313

GaAs microwave diode Gunn oscillator subharmonically injection phase locked at low frequency ratios
03 p0459 A70-14041

Millimeter wave fields systems application to radar guidance, radiometry, communications, radio astronomy and satellite experiments
04 p0647 A70-14621

Quasi-optical design methods applied to mm microwave resonators characterized by high Q and low spectral densities
04 p0655 A70-14623

Low loss low sidelobe N-wave microwave optical power divider for single plane electronically steerable Ku band phased array antenna
04 p0655 A70-14624

Microwave Si transistors with overlay and interdigital geometries and integrated circuit design considerations for power amplifiers, power oscillators and frequency multipliers
05 p0819 A70-16149

Microwave and IR distance measuring devices design and operational principles, discussing main circuits and reading displays
05 p0851 A70-16799

Microwave applications in measuring and heating functions, describing battery operated radar for vibration and rotation measurements
05 p0816 A70-16824

Microelectronic L-band phase-lock loop receiver for data transmission between earth stations and satellites
06 p1017 A70-17338

Bulk GaAs devices and avalanche /IMPATT and TRAPATT/ diodes compared as microwave sources
06 p1018 A70-17357

Microwave acoustic transducer and delay line properties determination from mathematical analysis
06 p1062 A70-17481

Soviet book on microwave devices employing semiconductor diodes design and synthesis covering electric field effects, optimality criteria, tabular data, etc

06 p1019 A70-17536

Lumped element microwave Y circulator, describing device performance and ALGOL program for potentials calculation

07 p1241 A70-19751

Negative differential conductivity effects in Gunn domain GaAs semiconductors, discussing physical properties and microwave applications

08 p1556 A70-21303

Inorganic ceramic materials in design and fabrication of microwave antennas, filters and stable resonators, discussing density and dielectric constant variability by ceramics foaming

09 p1689 A70-22007

Automatic phase correction for modulated subcarrier microwave systems used for control of industrial processes

09 p1632 A70-22281

High sensitivity photomultiplier TWT microwave photodetector with internal louvered secondary electron multiplier and spiral HF getter

09 p1645 A70-22413

French microwave semiconductor technology in terms of basic research, technology studies, reliability and integrated circuits

09 p1739 A70-22602

Comparator for measuring relative phase difference between identical frequency signals within microwave octave band

09 p1647 A70-22715

Signal converter for centimeter band-DC voltage transformation, noting applications to microwave power measurement by digital computers

09 p1650 A70-23629

Waveguide windows for energy outlet in microwave devices analyzed by plane /Brillouin/ modes, discussing dielectric element reflection coefficient

09 p1651 A70-23646

Coaxial energy outlets satisfying vacuum maintenance requirements of dielectric waveguide windows in dismountable prototype microwave devices

09 p1652 A70-23647

Direct domestic reception of TV signals from satellites, discussing microwave components, economics and reliability

10 p1840 A70-24448

Microwave devices excess AM and FM noise levels measurement by carrier suppression methods

10 p1841 A70-24579

Avalanche diodes microwave properties in utilization circuit, discussing negative conductance, nonlinear impedance and intrinsic noise current

10 p1850 A70-24623

Collection of papers on microwave technology covering integrated circuits, amplifiers, radar, etc

10 p1851 A70-24876

Microwave equipment reliability achievement emphasizing tests and analyses on RF amplifiers, duplexers, antennas, etc

10 p1851 A70-24882

Millimeter wave transmission, discussing atmospheric effects, system components and applications in terrestrial communication networks, synchronous satellites, etc

10 p1842 A70-24883

Microwave devices including gridded tubes, magnetrons, traveling wave tubes, amplifiers, solid state devices for radar and communication applications

10 p1851 A70-24885

Rocket- and projectile-borne microwave miniature solid state transmitters, discussing transistor oscillator-multiplier, hybrid integrated circuits, bulk effect devices, etc

10 p1852 A70-24887

Complex microwave solid state subsystems designs for specialized systems

10 p1852 A70-24889

Microwave device test system design, considering measurement ranges and parameters, calibration, repeatability, accuracy, maintainability, etc

10 p1852 A70-24890

Microwave phase shifter with rectangular ferrimagnetic toroid in waveguide longitudinal center, discussing impedance matching, phased array applications, etc

10 p1852 A70-24891

Microwave converter system for ETV satellite reception, discussing characteristics and costs for mass production

11 p2017 A70-25493

Thermal imaging device adaptable to IR, microwave or ultrasound radiation, projecting image on heat sensitive surface

11 p2050 A70-25643

SAFEGUARD ballistic missile defense radars, discussing terminal defense concept, data processing system and microwave components

11 p2005 A70-26162

V/STOL aircraft ground guidance systems using microwave instruments for approach and landing

12 p2266 A70-27458

Microwave scanning beam landing system providing aircraft radio approach guidance

12 p2269 A70-27918

Microwave avalanche diode emission frequency dependence on charge transfer across drift region, considering varactor diode output, negative resistance and noise factor

14 p2555 A70-30354

Megavolt prebunched electron beam systems for electronic sources in millimeter and submillimeter region, describing microwave accelerators and bunchers

14 p2555 A70-30431

Binary varactor diode microwave device, displaying two capacitance values in reverse bias operation for application in phased array systems and frequency control

14 p2556 A70-30919

GaAs slices efficiency as transferred electron devices, correlating impurity profiles with microwave performance

15 p2708 A70-31957

IMPATT microwave diodes small signal characterization by equivalent circuit using iterative computer procedure

15 p2708 A70-31971

Microwave power transistors design and packaging

15 p2711 A70-32589

Solid state UHF and microwave device testing by computer automated network analyzers, measuring scatter parameters

15 p2742 A70-32590

French monograph on microwave ferrite devices, discussing paramagnetism, ferromagnetism, ferrimagnetism, gyromagnetic resonance and nonreciprocal effects, isolators, attenuators, phase shifters, etc

16 p2873 A70-33267

GaAs microwave devices including diffused varactor, Schottky barrier and Gunn diode, discussing single crystals preparation and epitaxial growth layers

16 p2873 A70-33293

Integrated X band superheterodyne receiver design using planar transmission lines as components

16 p2874 A70-33388

Microwave power transistors, considering figure of merit, performance and packaging

19 p3386 A70-37691

Microwave transistors parameters measurement by scattering /S/ parameter method for characterizing noise, gain and dynamic range, reading input and output impedances from Smith chart

19 p3386 A70-37692

Microwave feeding system for heating and cooking prepackaged meals during extended space missions

19 p3368 A70-37747

Breakdown electric field strength in S band microwave cavity for dry air, water vapor and mixture

19 p3423 A70-37757

Reliability figure of merit variations for predicted microwave radio system outages, using computer method

20 p3583 A70-38987

Centimeter wave transmitting and receiving equipment for studying nanosecond pulse propagation

20 p3632 A70-39627

Microwave apparatus for resonant frequency change and loaded resonator Q measurement during DC discharge afterglow electron removal studies

20 p3679 A70-39715

Microwave transistors for power generation and amplification, discussing packaging and pellet design

20 p3599 A70-40324

Cyclotron wave rectifier with Cuccia coupler for converting microwave power into DC or LF AC

21 p3756 A70-40730

High speed photodetectors for microwave demodulation of light, discussing electrical properties, equivalent circuits and noise factors

21 p3799 A70-41420

Microwave parameters for Gunn devices with low electric field, obtaining data on characteristics and operating mode

21 p3863 A70-41989

Distance measurements by microwave tellurometers, discussing accuracy factors

22 p4039 A70-43426

Integrated 7 GHz small signal microwave balanced mixer, using microstrip transmission lines

23 p4168 A70-43777

Microwave communication - Conference, Budapest, April 1970, Volume 5, Microwave electronics, system measurements

23 p4170 A70-43793

Microelectronic phase lock microwave receiver packaging, discussing subassemblies interconnection minimization, shielding, RF interference, low loss and testing problems

23 p4164 A70-44536

MICROWAVE FILTERS

Transistors used as UHF high-Q inductance active filters, utilizing internal phase shift and energy storage characteristics

03 p0458 A70-14033

Half wave stepped digital elliptic filter design showing improvements over microwave TEM line narrow band bandpass filter

08 p1476 A70-21284

Circuit development for realizing narrow bandwidth elliptic function filters at microwave frequencies

08 p1476 A70-21285

Optimal construction of microwave filters with TWT and ferrite direct gain receivers

09 p1648 A70-23166

Capacity bounds in microwave filters computed for periodic cylindrical rods between parallel ground planes using variational principles

10 p1850 A70-24834

Microwave IC-compatible resonators for communication systems filters, comparing microstrips, disks, waveguide cavities and dielectric-loaded cavities

10 p1852 A70-24892

Microwave band-stop filters based on ladder network low pass prototypes, comparing performance with bandpass type

14 p2557 A70-31179

Microwave channelizing filters input ports interconnection techniques for signals sorting into contiguous frequency bands

14 p2558 A70-31319

Microwave filters developments, performance, production and costs

14 p2559 A70-31374

Circular and nearly rectangular irises for resonant cavities in transmission line for microwave band stop filters, discussing design based on merit factor

21 p3792 A70-41992

Signal controlled microwave modulator as filter or attenuator, using rectangular waveguide and varactor diode switching

22 p3995 A70-42718

Transmission factors of microwave filters with prescribed attenuation and group delay

22 p3997 A70-43173

MICROWAVE FREQUENCIES

NT C BAND

NT EXTREMELY HIGH FREQUENCIES

NT SUPERHIGH FREQUENCIES

Microwave holography, discussing zone plate lens design, coherent side-looking radar, large antennas, three dimensional radar display applications

01 p0086 A70-10415

Airborne instrument landing systems and ground facilities analysis and specifications, examining future use of microwave frequencies

02 p0333 A70-11982

Spectral and lasing characteristics of microwave frequency modulated He-Ne laser operating at 0.63 micron wavelength

05 p0858 A70-16257

Secondary frequency standard obtained for Hg laser operating at microwave frequencies

05 p0859 A70-16271

Microwave frequency radar terrain echoes simulation concerning variation of echo delay, Doppler shift, random fine structure and time variation

06 p1008 A70-17482

Microwave variable delay devices, discussing solid state microwave acoustic interactions

06 p1019 A70-17483

Plane light wave diffraction incident upon isotropic dielectric layer traversed by acoustic microwave using guided microwave theory

06 p1105 A70-17484

Microwave irradiation effects on rabbit eye lenses, noting injury dependence on frequency

08 p1452 A70-21273

Schottky barrier diodes microwave power rectification efficiency, developing diode losses theory based on back capacitance, series and front resistance and knee voltage

08 p1474 A70-21274

Microwave conductivity and limiting frequency in Gunn effect GaAs using drifted Maxwellian

09 p1739 A70-22849

Microwave radiation thermal and nonthermal biological effects, considering exposure limits

10 p1824 A70-24061

Microwave phase shift measurement errors caused by reflections from interference systems elements

10 p1853 A70-25130

Complex dielectric constant of alpha-AgI measured in microwave region and far IR, noting sample positioning

16 p2960 A70-33225

Microwave scintillations at sunrise indicating solar point sources at sunspot cycle peak and terrain configuration influence on ionospheric disturbances

20 p3591 A70-40493

Constant emf in bulk Ge and Si N-type semiconductors under multifrequency microwave electric field

21 p3861 A70-40636

Antiferromagnetic resonance measurement in manganese difluoride as function of microwave frequency, sample size and shape

21 p3850 A70-41908

- Microwave communication - Conference, Budapest, April 1970, Volume 1, Communication system theory 23 p4158 A70-43751

- Small signal oscillation and growth for microwave loaded avalanche diodes with drift and ionization allowance 19 p3389 A70-37968
- IMPATT diode microwave oscillator with modulated bias current, discussing amplitude and frequency modulation sensitivity, thermal effects and load parameters 19 p3390 A70-38363
- Crystal controlled digital frequency setting for microwave oscillators in mobile FM radio links with remote handling 20 p3596 A70-39162
- Injection locked bilateral microwave oscillators, deriving criterion for preventing reverse locking 20 p3597 A70-39470
- Unmodulated microwave oscillations power stabilizer with semiconductor attenuator 21 p3796 A70-40635
- Avalanche diode microwave oscillators, considering Impatt and Trapatt oscillation modes 21 p3798 A70-41336
- Microwave frequency marginal oscillator for electron spin resonance spectrometer, using Gunn diode in sample cavity 21 p3827 A70-41460
- Microwave output power and impedance for InP and GaAs bulk negative resistance oscillators, using velocity/field characteristics 21 p3800 A70-42049
- Tunable high efficiency high peak power UHF avalanche diode oscillator 21 p3800 A70-42117
- CW silicon SHF TRAPATT diode oscillator, discussing double sided design and fabrication 21 p3800 A70-42118
- Tunnel diode microwave oscillator design, discussing fixed frequency or varactor tuned operation, power instabilities and load variations 22 p3997 A70-43129
- Radiosonde receiver and transmitter system optimization, obtaining increased microwave power by appropriate oscillator operating modes 22 p4038 A70-43379
- Gunn microwave oscillators I-V characteristics in quenched and retarded modes, using piecewise linear approximation 23 p4168 A70-43778
- P-n junction dependent FM noise spectrum of UHF transistor power oscillator at transit frequency 23 p4161 A70-43789
- High Q frequency stabilized cavity controlled microwave oscillator using Super Invar resonator 23 p4169 A70-43792
- S band tunable free running high Q triode oscillator phase and frequency instability measurement based on delay lines applications 23 p4170 A70-43796
- Klystron microwave signal generator power stabilization using compact low consumption integrated circuits 23 p4170 A70-43797
- High stability phase locked Gunn microwave oscillator with internal crystal reference, discussing applications as signal generator, low noise Doppler radar sources, etc 23 p4172 A70-44013
- Microwave oscillator design using Y-parameters from measured scattering parameter data at desired frequencies, applying negative resistance circuit theory 24 p4320 A70-46235
- MICROWAVE PHOTOGRAPHY**
- Acoustic /microwave/ holography for large masses by crossed linear array of microphones, discussing computer simulation of virtual holograms and image reconstruction 21 p3822 A70-40715
- MICROWAVE PLASMA PROBES**
- Electromagnetic wave reflection on thin plasma layer with Epstein electron density profile, noting use in microwave diagnostics 03 p0529 A70-13016
- Microwave nonlinear effects including mixing, harmonic generation and current rectification observed in plasma sheath surrounding Langmuir probe using PIG discharge 05 p0852 A70-16992
- Power absorption by microwave generated plasmas noting pressure effects 14 p2622 A70-30675
- Microwave probe for measuring electron density profile in supersonic arc jet plasma 15 p2741 A70-32433
- Microwave diagnostic method for amplitude variations of electron density and collision frequency in weakly ionized plasma 17 p3140 A70-34871
- Microwave diagnostics of electron density, temperature and light emission in self excited moving striations in hydrogen plasma 19 p3475 A70-37553
- Microwave diagnostics of plasma temperature and conductivity in streaming nitrogen arc with skin effect under atmospheric pressure 19 p3476 A70-37554
- MICROWAVE PROBES**
- NT MICROWAVE PLASMA PROBES**
- Microwave propagation in materials and measurement methods for inspection based on reflecting surface movement and scattering method for porosity detection 01 p0094 A70-11395
- Quadruple microwave probe applied to phase and attenuation variations measurements of HF wave propagating through dielectric media 02 p0345 A70-11898
- Atmospheric effects on passive microwave sensing in EHF region under all-weather conditions on global scale using satellites [ALAA PAPER 70-198] 06 p1010 A70-18099

Mathematical model of microwave probe for reentry plasma, using variational method to calculate reflection coefficient

12 p2230 A70-26983

Nondestructive noncontacting microwave depth measurement of thin slits and cracks in metal surfaces

14 p2584 A70-30507

Atmospheric effects on passive microwave sensing in EHF region under all-weather conditions on global scale using satellites

20 p3586 A70-39703

Microwave propagation, instrumentation and use in nondestructive testing, discussing components, methods and wave propagation equations

22 p4029 A70-42594

Nonmetallic nonconductive composite materials physical properties by swept microwave frequency nondestructive testing

24 p4345 A70-45705

MICROWAVE RADIATION

U MICROWAVES

MICROWAVE RADIOMETERS

Self calibrating radiometer for in-flight measurement of earth surface thermal microwave radiation

07 p1282 A70-19616

Atmospheric temperature measurement by microwave radiometry, considering instrument design for measurements at various barometric levels

08 p1495 A70-21041

Microwave radiometric techniques for continuous all-weather remote sensing of sea conditions from satellites, discussing foam and surface ripple effects [ALAA PAPER 70-318]

09 p1677 A70-22869

Atmospheric temperature and pressure profiles remote measurement using airborne microwave radiometer

11 p2056 A70-26502

Microwave radiometer as passive satellite sensor for observing ocean surface properties

12 p2228 A70-26902

Microwave radiometric temperature measurements generating curves relating sea state and surface temperature

12 p2215 A70-26903

Microwave radiometry assumptions relating to absorptivity, emissivity and reflectivity data for earth resources remote sensing applications

12 p2230 A70-26959

Millimeter and submillimeter wave receivers, describing detectors, mixers, low noise amplifiers and radiometers

14 p2549 A70-30448

Microwave radiometric receiver, analyzing video detector saturation effects on linearity

16 p2880 A70-34075

SHF radioheliograph with T shaped dish antenna array, noting high resolution and special applications

17 p3061 A70-35397

Shock layer microwave radiation measurements during reentry flight of spherical nose cone, determining effective plasma temperature

[ALAA PAPER 69-183]

18 p3208 A70-36694

Heterodyne millimeter wave radiometric system for observing atmospheric attenuation due to water vapor, discussing design, development and initial measurements

20 p3588 A70-40308

SHF-EHF region uses, discussing microwave radiometry and applications to radio astronomy and meteorology

21 p3799 A70-41421

Microwave radiometry and applications as material composition and temperature sensors for aircraft navigation, landing aids, pollution surveillance, meteorology and oceanology

23 p4198 A70-44648

Microwave radiometric airborne measurement of salinity of Mississippi River outflow, using P3A aircraft

24 p4330 A70-45979

MICROWAVE RESONANCE

Microwave spectral resonator and reentrant cavity as diagnostic tools to obtain discrete point data along plasma column compared with cylindrical cavity

04 p0696 A70-15650

Wobblator measurement of Q factor of microwave resonator cavities using double modulated klystron signal

05 p0822 A70-16528

Pulsed radio signals time delay due to molecular microwave resonance in earth atmosphere and interstellar medium

08 p1461 A70-20915

Dielectric properties of thin barium titanate films from microwave resonance frequencies and resonance reflection coefficient

19 p3482 A70-37255

Fabry-Perot microwave interferometer, examining resonant system electrodynamic properties by matrix method

19 p3422 A70-37722

IR microwave double resonance signals in systems of ammonia with nitrogen isotopes, using nitrous oxide laser

21 p3836 A70-41707

Resonant frequencies of microwave dielectric resonator in magnetic wall waveguide

23 p4169 A70-43784

MICROWAVE SCATTERING

Microwave propagation in materials and measurement methods for inspection based on reflecting surface movement and scattering method for porosity detection

01 p0094 A70-11395

Microwave dispersion caused by atmospheric gases at water vapor line, using microwave spectrometer based on dispersion detection in refraction spectrum

02 p0260 A70-12571

Reduced multiport equivalent scattering parameters derivation by matrix method, determining load reflection coefficients effect on signal attenuation and phase shift

03 p0458 A70-14038

Elliptically polarized microwave scattering at electrically conducting rough surface, considering probability distribution of profile angles and random reflection coefficients

04 p0650 A70-15286

Forward angle microwave scattering by plasma covered magnetized metallic sphere, calculating radial electron density distribution

06 p1008 A70-17576

Moving plasma column scattering of obliquely incident microwaves, assuming arbitrary polarization for incident plane wave

06 p1124 A70-18608

Microwave scattering from plasma column of low pressure discharge in Hg under free space conditions

06 p1125 A70-18609

Scalar radiative transport equation solved iteratively for microwaves backscattering from turbulent plasma, deriving model for direct and cross polarized cross section

07 p1353 A70-19993

Soviet collection of articles on physics of clouds modifications covering precipitations microstructure remote measurements, microwave scattering, etc

08 p1536 A70-21094

Microwaves scattering and attenuation in precipitations from raindrop size distribution curves analysis

08 p1462 A70-21096

Radar model of shower and hail clouds as two phase system of independently scattering spherical particles, stressing radar properties dependence on particle properties

08 p1536 A70-21097

Obstacle extinction cross section determination at microwave frequencies from Q factor of open resonator

09 p1637 A70-23307

Solid dielectrics permittivity measurement using beam deflection phenomenon in multislot waveguide antenna

09 p1652 A70-23656

Stratospheric water vapor measurement by submillimeter wave sounding, considering signal fluctuations due to scattering by high cirrus clouds

11 p2077 A70-26619

Microwave scattering by turbulent plasma electron density fluctuations

11 p2096 A70-26765

Double diffused epitaxial silicon bipolar microwave transistor design, fabrication and performance evaluation, including scattering parameters vs frequency for common-emitter amplifier

13 p2379 A70-29592

MICROWAVE SENSORS

Pulsed microwave spectrum analyzer using holography and Fourier spectroscopy compared with frequency methods

09 p1675 A70-22485

Waveguide gas discharge indicator of transmitted microwave power, investigating sensitivity, discharge conditions, filler gas and pressure effects

11 p2020 A70-26807

Passive microwave sensors based on brightness temperature vs frequency model for various atmospheric conditions, presenting vegetation pictures

20 p3626 A70-39054

Waveguide gas discharge indicator of transmitted microwave power, investigating sensitivity, discharge conditions, filler gas and pressure effects

24 p4317 A70-45179

MICROWAVE SPECTRA

Atmospheric models of deep atmosphere thermal emission and ionosphere free-free emission used for studying Saturn microwave spectrum

01 p0180 A70-10533

Solar microwave burst of 30 March 1969 associated with behind-limb proton flare, studying burst spectrum

[AFCRL 70-0141]

02 p0358 A70-12200

Doppler radar spectrum mean and variance derived for reflectivity gradients combined with linear wind shear velocity gradient

02 p0328 A70-12508

Microwave spectra of type 4 bursts at cm and dm waves compared to related PCA

02 p0359 A70-12774

Critical review of paper on molecular oxygen microwave spectrum analysis

09 p1732 A70-22829

Sagittarius sources A and B2 O18H absorption lines measured at microwave frequencies, determining oxygen isotopes abundance ratios

10 p1936 A70-23907

Passive remote sensing in microwave spectra for oceanographic applications including sea state, pollution and sea ice properties

12 p2216 A70-26905

Microwave solar bursts intensity and polarization measurements at 17 GHz, discussing chromospheric flares and X ray emission

12 p2293 A70-27592

Microwave lines due to hydroxyl radical in interstellar medium, discussing emission from excited OH states

13 p2484 A70-28371

Jupiter microwave spectrum from polarimetric observations and previous data

14 p2648 A70-31088

Hot universe model for demonstrating distortions in Rayleigh-Jeans region of microwave relic radiation spectrum by primeval plasma heating before recombination epoch

14 p2632 A70-31287

Mercury disk temperature from microwave spectrum analysis, proposing subsurface greenhouse effect

17 p3157 A70-34838

Planetary nebula K3-50 microwave observations, determining composite source radio spectrum

18 p3313 A70-36326

Variable radio source linear polarization at 8 GHz, examining degree, position angle and flux density

18 p3317 A70-37001

Radio sources with opaque microwave spectra near galactic equator

19 p3522 A70-38603

Solar eclipse microwave spectral observations for coronal condensation sources characteristics of solar radio emission slowly varying component, discussing ionospheric recombination coefficients

19 p3531 A70-38910

Cloud structure, atmospheric water vapor and liquid water contents from passive ground based microwave spectrum measurements

21 p3846 A70-40906

Microwave transitions for molecules in comets and interstellar space

21 p3887 A70-41110

Heavy atom skeletal molecular structure of asymmetric close-2,3-dicarbahexaborane from microwave rotational spectra

21 p3773 A70-41392

Laboratory measurement and low noise search in W3/OH for microwave emission lines in excited rotational level of interstellar OH

21 p3922 A70-41977

Atomic hydrogen 21 cm line intensity distribution in Carina arm of Milky Way galaxy

22 p4100 A70-42851

Venus atmospheric parameters from microwave spectrum, discussing brightness temperature, carbon dioxide content, opacity, water vapor, dust and models

23 p4241 A70-44256

Solar flare microwave spectra from coherent plasma emission mechanism

24 p4396 A70-45390

Delphini and Serpente Novae radio emission in microwave spectra, noting consistency with thermal radiation of expanding ionized gas envelopes

24 p4410 A70-45771

MICROWAVE SWITCHING

Three way power divider/summer fabricated symmetrically in stripline by resistive network transformation

05 p0821 A70-16386

Silicon window with double carrier injection to achieve high power broadband microwave switching, obtaining power increase over p-n diodes

10 p1847 A70-23892

Power ferrite modulator and switch for SHF band based on Faraday rotation principle

12 p2199 A70-28000

Signal controlled microwave modulator as filter or attenuator, using rectangular waveguide and varactor diode switching

22 p3995 A70-42718

MICROWAVE TRANSMISSION

Minimum microwave path clearance establishing procedures, considering relation to inverse beam bending in microwave propagation

02 p0253 A70-11746

Troposphere microwave transmission factor determined from dispersion and attenuation caused by water vapor isolated molecular resonance

02 p0261 A70-12593

Microwave transmission through afterglow of RF excited electrodeless He discharge approximating low collision frequency plasma slab of uniform electron density in magnetic field

03 p0530 A70-13152

- Rectennas design, construction and power output
04 p0660 A70-15649
- Errors arising in torsion-type ponderomotive watt-
meter connected in homogeneous microwave trans-
mission line with mismatched oscillator at input and
mismatched load at output
06 p1024 A70-17861
- Passive microwave observation from space of sea
surface degraded by atmosphere
[AIAA PAPER 70-197]
06 p1010 A70-18087
- Microwave radio refraction analysis for controlling
interference between radio relay antenna and geosta-
tionary satellites
07 p1235 A70-19363
- Step recovery frequency shift keyed retimer using
Gunn effect FSK pulse regenerator for microwave
communication
07 p1237 A70-20285
- Microwave propagation along earth-air path, study-
ing tropospheric layer role
08 p1461 A70-20968
- Polar gas phase dielectric under conditions of power
saturation interacting with microwave radiation field
in waveguide
09 p1728 A70-22908
- Microwave lines dispersion equations for ferrite
cylinder and spiral and circular waveguides
11 p2012 A70-26803
- Microwave signals covariance and spectra calcula-
tion for amplitude and phase fluctuations propagated
over line-of-sight path through turbulent atmosphere
12 p2189 A70-27963
- Microwave transmission through thin film screens
with apertures placed in transverse plane of X band
rectangular guides
12 p2202 A70-28164
- Microwave field component distribution in plasma
waveguide covered by metallic sheath in magnetic
field, using counterbalanced antenna probes for field
measurements
13 p2463 A70-29378
- Book on microwave propagation physics covering
unbounded homogeneous medium, terrain effects,
uniform refractivity gradient, nonstandard refractiv-
ity, fading, etc
14 p2551 A70-30953
- Counterrotating antenna onboard Italian satellite in
synchronous equatorial orbit for microwave propaga-
tion experiment
15 p2709 A70-32287
- Microwave propagation refractive index over India,
showing influence of humidity and vapor pressure
15 p2701 A70-32470
- Microwave transmission techniques with packaging
designs for radiation energy losses control, discussing
functions of components
15 p2714 A70-32750
- Radar ducting effects on propagation at microwave
frequencies, recording signal strength as function of
transmitter to receiver range
16 p2858 A70-32927
- Troposphere effects on microwave and optical
signals, correlating refractive index and dispersion
variabilities
16 p2862 A70-33020
- Electromagnetic wave scattering at ellipsoidal
bodies in microwave rectangular and circular
waveguides
17 p3046 A70-35346
- Nonlinear effects of harmonic generation and mix-
ing in lithium niobate microwave acoustic surface
wave delay lines measured using laser light deflection
19 p3485 A70-37698
- Worldwide multichannel air communications
system in 10 GHz to IR range by Quasi Laser Link
modulation and satellites
19 p3378 A70-37855
- SHF and EHF waves simultaneous propagation
over slant line-of-sight overwater path, comparing
phase variations and fading for signal coherence
20 p3588 A70-40301
- Millimeter waves atmospheric attenuation vs
frequency and altitude due to oxygen absorption, tu-
bulating for graphical and seasonal model atmospheres
20 p3588 A70-40302
- Millimeter and decimeter waves atmospheric
absorption as function of pressure, temperature and
water vapor density
20 p3588 A70-40303
- Rainfall effects on EM wave propagation at cen-
timeter and millimeter wavelengths
20 p3588 A70-40310
- Millimeter wave propagation measurements by
ATS-5 satellite, observing attenuation dependence on
meteorological parameters for communication data
link performance prediction
20 p3589 A70-40311
- Microwave propagation in circular waveguide con-
taining inhomogeneous gas discharge plasma
21 p3785 A70-40630
- Wideband millimeter wave communications experi-
ments for satellite applications, considering ATS-5,
radiometry and future lunar base
21 p3787 A70-41337
- Millimeter wave radio systems for relieving crowd-
ing at lower frequencies, discussing technology, at-
mosphere effects and applications
22 p3990 A70-43418
- Microwave transmission over elevated line-of-sight
path, measuring phase front distortion between pairs
of paths
22 p3991 A70-43580
- Microwave communication - Conference, Bu-
dapest, April 1970, Volume 3, Electromagnetic theory
23 p4160 A70-43764
- Multiplicative noise reduction during transmission
of analog signals over tropospheric microwave relay
links
23 p4162 A70-44090
- Directional microwave transmitter for 300 frequen-
cy division multiplexed telephone channels, discussing
transmission quality, reliability, design and operation
23 p4172 A70-44298
- Microwave lines dispersion equations for ferrite
cylinder and spiral and circular waveguides
24 p4317 A70-45178
- Microwave propagation in hollow conducting ellipti-
cal pipe waveguide, calculating successive modes cut-
off wavelengths by numerical analysis
24 p4318 A70-45212
- Microwave propagation in circular waveguide with
axially magnetized gas or solid state plasma /Faraday
configuration/, calculating twist modes
24 p4318 A70-45213
- Circular waveguide with axially magnetized plasma,
investigating twist mode propagation in InSb at 70
GHz
24 p4311 A70-45214
- Microwave propagation in waveguides, investigat-
ing trapped and slightly leaky modes in multilayered or
multiwave regions by ray-optical techniques
24 p4311 A70-45216
- Microwave transmission systems, determining elec-
tric potential functions in inhomogeneous dielectrics
by Earnshaw theorem and finite difference computa-
tion
24 p4318 A70-45217
- Microwave waveguide rotary joint using symmet-
rical excitation for mode conversion to obviate filters
24 p4318 A70-45221
- Microwave transmission in partially dielectric filled
circular waveguide, deriving cutoff wavelength and
phase velocity vs frequency
24 p4315 A70-46260
- MICROWAVE TUBES**
- Microwave devices including gridded tubes, mag-
netrons, traveling wave tubes, amplifiers, solid state
devices for radar and communication applications
10 p1851 A70-24885
- Microwave pencil triodes and cavities of miniature
design for Air Traffic Control Beacon Systems
10 p1852 A70-24886
- MICROWAVES**
- NT DECIMETER WAVES
- NT MILLIMETER WAVES
- Vertical atmospheric vapor distribution from mea-
suring microwave radiation of earth/atmosphere
system at several wavelengths
01 p0135 A70-10202
- Optical reconstruction of microwave holograms
recorded by liquid crystal detectors, emphasizing de-
pendence on IR heat bias provided by incandescent
bulb
01 p0086 A70-10421
- Microwave holography using probe scanning,
analyzing causes of distortion and effects on image
reconstruction
02 p0302 A70-12618
- Natural modes and multiple beam interference in
open resonators, taking into account centimeter wave
experiments and computations
02 p0340 A70-12829
- Book on microwave theory and applications cover-
ing transmission line theory, microwave measure-
ment, signal sources and analysis, network analysis,
etc
03 p0455 A70-13001
- Thin superconducting films nonlinear microwave
properties including impedance-amplitude relation, su-
perconducting current threshold decrease, mode
production, frequency mixing, etc
03 p0539 A70-13409
- Coherent microwave generation mechanism in indium
antimonide at high electric fields, formulating thin
plasma layer double stream interaction theory
03 p0534 A70-14214
- Solar microwave and soft X ray radiation emission
correlation to determine flare peak temperature and
solid angle
04 p0741 A70-15126
- Hologram constructed with microwaves with image
reconstruction at optical wavelengths using laser
05 p0849 A70-16659
- Heat stress due to microwave radiation, establishing
reduction factor for radiation protection guide number
under adverse thermal environments
06 p0998 A70-17202
- Whole body microwave irradiation effect on
chromosomes and protein synthesis in Chinese ham-
sters
06 p0998 A70-17203
- Peripheral blood and structural changes in
hemopoietic organs of rabbits and mice exposed to
microwave radiation
07 p1216 A70-18730
- Radar coherent linear FM microwave generation
with 14 microsecond pulse length and 1000 MHz band-
width, discussing phase error and coherency
07 p1236 A70-20064
- Solar microwave bursts with double structure,
discussing single frequency observations and flare
patrols, time variations of flux density and brightness
08 p1561 A70-21259
- Anomalous microwave recombination line at 11 cm
detected in NGC 2024, Orion A, and IC 1795,
discussing peak antenna temperature
08 p1576 A70-21399
- Microwave radiation exposure control program for
biological hazards, particularly to eye lens
09 p1623 A70-22221
- Microwave in-cavity modulation of helium-neon
laser, obtaining frequency dependence of modulation
depth
09 p1696 A70-22628
- Materials permittivity measurement at millimeter
and submillimeter wavelengths based on phase shift or
sample optical thickness
09 p1684 A70-23648
- Amplitude modulation of microwave signals
propagated through periodically varying plasma
09 p1639 A70-23673
- SID observed as VLF phase anomalies correlated
with solar microwave radio bursts
10 p1933 A70-24816
- Microwave illuminated aperture near radiation field
mapped and processed for microwave hologram suita-
ble for optical imaging for far field pattern simulation
11 p2051 A70-26025
- Pulsed and CW microwave discharge plasmatrons
design calculation, providing electrodeless plasma in
metallic chamber and nonequilibrium plasma
11 p1984 A70-26741
- Microwave radiation from electron beam generated
turbulent magnetoplasma measured, indicating
enhancement near electron cyclotron harmonic
frequencies
11 p2095 A70-26760
- Microwave conductance tensor in crystals with non-
parabolic carrier energy dissipation under crossed
constant electric and magnetic fields
12 p2288 A70-28326
- Microwave radiation effects on radar operators
myocardium functions
12 p2180 A70-28358
- Electron beam interaction with plasma in absence of
magnetic field, discussing microwave radiation emis-
sion and incoherent scattering and instability spatial
growth
13 p2459 A70-28569
- Hybrid ring microwave power divider /rat race/ for
equal or unequal power splitting
13 p2377 A70-29061
- Electron density and transverse electron tempera-
ture of magnetoactive plasma generated in circular
waveguide by microwave signal with variable polariza-
tion
13 p2462 A70-29128
- Cosmic microwave radiation origin based on dis-
crete source models
13 p2479 A70-29787
- Microwave harmonic generation by nonlinear
plasma-metal junctions noting calcium, gallium,
molybdenum, gold, copper and platinum cathodes
14 p2549 A70-30438
- Mercury disk temperature at 3.75 cm wavelength,
showing variation with phase angle and hermographic
longitude
14 p2647 A70-31075
- Microwaves in integrated military avionics systems,
discussing CNI, ECM, component reliability, etc
14 p2551 A70-31177
- X ray bursts rise and fall observed by spectrometer
onboard OSO-4
15 p2792 A70-31670
- Glass tube surrounded nonuniform plasma column
interaction with TM microwave field of cylindrical
cavity for electron density measurements
15 p2780 A70-32347
- Plasma electron density measurement for
microwave-excited pulsed discharges based on skin
effect
15 p2780 A70-32367
- X ray and microwave emissions relationship to
sources on sun, discussing development and structure
of sunspot groups
15 p2794 A70-32486
- Earth/atmosphere system outgoing microwave
radiation calculations, surveying aircraft/ satellite
measurements at various wavelengths
16 p2896 A70-33217

Microwaves - IEE Conference, London, September 1969

High power microwave pulse generation in SHF region, discussing use of boat-grown and epitaxial GaAs diodes

Optical images from microwave far field (Fourier transform/ holograms, noting carrier fringe dependence

Microwave properties of uniformly magnetized slabs filling cross section of rectangular lossless waveguide operating in specific modes

Microwave properties of infinite lossless rectangular waveguide semi-infinite filled with magnetic material operating in specific modes

Bird dispersal measure at airports, using behavioral and electrophysiological effects of high power microwave radiation

Commercial and industrial microwave hazards exposure criteria and survey techniques used in state and local governments

Galactic radio radiation observations at 610 MHz, using corner reflector antenna

Sea water temperature and salinity effects on smooth ocean surface radiation in centimeter range

Single crystal ferrite thin film microwave parameters measurement, examining susceptibility in weak magnetic fields and ferromagnetic resonance

Adiabatic microwave power meter design using sodium thiosulfate phase transformations

Magnetoelastic ferromagnet linear theory, considering spin-elastic microwaves propagation in ferrimagnetic crystal subjected to pulsed magnetic fields

Radio sources flux density and variability at microwave wavelengths

Microwave hologram recording for surface displacement, with laser beam illumination for optical reconstruction of image

Microwave emission from GaAs due to EM wave amplification within biased sample

Microwave radiation effects on maintenance personnel, investigating respiratory reaction, attention concentration, blood content of K, Ca, Na and proteins, etc

Correlated microwave bursts between adjacent active regions associated with solar flares

Crab Nebula electromagnetic spectrum deviation from power law in microwave region, investigating origin from Compton scattering of high energy electrons

Solar X-ray bursts correlation with H alpha flares and microwave bursts observed by Explorer 34 experiment

Acoustoelectric domain spectra in n-GaAs by microwave emission, comparing results with parametric conversions theory

VLF wave generation due to nonlinear interaction of two microwaves with plasma slab under high DC field

Electron beam interaction with external harmonic microwave field in planar diode gap, calculating electric field current and voltage distribution functions

Nonflaring solar X-ray and microwave radiation flux correlation from satellite data

Microwave characteristics in plasma of short discharges in low pressure cesium and mercury vapors, noting spectral and spatial distribution of microwave power and intensities

Microwave communication - Conference, Budapest, April 1970, Volume 4, Microwave theory and techniques

Safety standards and biological effects of microwave radiation, investigating cataractogenesis and heart rate in rabbits

X ray and microwave emissions relationship to sources on sun, discussing development and structure of sunspot groups

Earth/atmosphere system outgoing microwave radiation calculations, surveying aircraft/ satellite measurements at various wavelengths

Circular polarization time evolution during solar microwave impulsive bursts

Microwave emission from Maxwellian magnetoplasma in uniform magnetic field

Nondestructive examination for plastics, discussing transmission, microwave and ultrasonic tests

MICROWEIGHING

U WEIGHT MEASUREMENT

MICTURITION

U URINATION

MIDAS SATELLITES

NT MIDAS 4 SATELLITE

MIDAS 4 SATELLITE

Midas 4 satellite osculating orbital elements determined on basis of optical tracking data

MIDCOURSE GUIDANCE

Interplanetary midcourse velocity correction schedules optimization, discussing timing equations modifications, mission simulation and role of earth based radar

Optimal maneuver decision strategy for space vehicle midcourse trajectory corrections

Computational limitations of midcourse correction velocity for lunar impact trajectories, considering impact miss magnitude correction

Linearized theory for minimum fuel guidance in neighborhood of minimum fuel space trajectory, unrestricted thrust magnitude and allowances for midcourse impulses

Minimum fuel control for discrete time Gaussian processes, applying results to spacecraft midcourse guidance for earth-Mars mission

Manual control systems for spacecraft stabilization involved in rendezvous, midcourse correction, landing, etc

Onboard moon-to-earth trajectory approach guidance with or without midcourse guidance using optical angular measurements

Restricted three body interplanetary guidance scheme using midcourse fixed time of arrival velocity correction

MIDCOURSE TRAJECTORIES

Optimal maneuver decision strategy for space vehicle midcourse trajectory corrections

MIDDLE EAR

Contralateral remote masking /CRM/ increase of LF tone burst produced by middle ear muscle contractions

Tympanic membrane and rectal temperatures compared over wide range of ambient environments as indicators of deep body temperature

MIDLATITUDE ATMOSPHERE

Ionsospheric F layer in equatorial, mid and high latitude regions for various major phenomena including anomalies, neutral air winds, photoelectrons, etc

Ionsosphere total electron content diurnal and seasonal variations at midlatitudes, based on data analysis from Explorer 22 in polar orbit

Rocket sounding data on ionospheric currents at mid and low latitudes noting absence in D and above E region

Midlatitude ionospheric disturbances accompanied by auroral type radio absorption observed by radio astronomy and probes during 26 May 1967 storm

Explorer observations of large temporal variations of midlatitude outer zone energetic electron intensities interpreted as redistribution during geomagnetic disturbances

Balloon-borne experiments with directional scintillators to measure low energy gamma radiation spectrum in midlatitude atmosphere for photons origin and gamma albedos investigation

Diurnal fluctuations of quiet F 2 region intensity at midlatitude based on vertical probe observations during solar activity minimum

Oscillations intervals with diminishing period during magnetic storms, noting relationship to midlatitude disturbances in F region

Midlatitude F 2 perturbations from vertical sounding stations data during solar activity minimum, discussing F 2 region critical frequency variation

Midlatitude upper atmosphere soft electron energy flux nighttime measurements by sounding rocket

Winter midlatitude electron density trough from length fluctuation of Faraday signal fading period of satellite Explorer 22, noting characteristic seasonal variation

Small dispersion whistlers characteristics and propagation at midlatitudes based on observation at Tohokata, Japan

Simultaneous Thomson scatter measurements for middle and low latitudes, comparing electron density and temperature and exospheric and global temperature distributions

Midlatitude sporadic E layer critical frequencies dependence on solar activity using vertical ionospheric sounding data, observing ionization correlation

Tropical and midlatitude stratospheric dust by twilight photometry, considering possible causes of anomalous turbidity levels

Midlatitude upper atmospheric low energy proton intensity obtained from meteorological rocket data

Solar activity effects on midlatitude upper atmosphere corpuscular radiation intensity via rocket sounding

Delayed ionization effects in midlatitude nighttime ionosphere after geomagnetic storms, noting time lag vertical distribution

Midlatitude chorus frequency spectrum changes in relation to previous local magnetic conditions

Geomagnetic field influence on annual F 2 layer longitudinal ionization at midlatitudes, relating solar activity level

Diurnal fluctuations of quiet F 2 region intensity at midlatitude based on vertical probe observations during solar activity minimum

Midlatitude upper atmosphere soft electron energy flux nighttime measurements by sounding rocket

Winter anomaly of radio wave absorption in midlatitude lower ionosphere in terms of meteorological influences and particle influx enhancements

Midlatitude F 2 perturbations from vertical sounding stations data during solar activity minimum, discussing F 2 region critical frequency variation

Atmospheric ozone longitudinal variation in lower middle latitudes of Southern Hemisphere

Simultaneous hydrogen ion composition measurements by upper ionospheric polar orbiting OGO 4 and eccentric orbiting magnetospheric OGO 3 at midlatitude

Midlatitude atmospheric neutron density height dependence during minimum solar activity

Atmospheric dynamic effect on cosmic ray intensity, showing extremum and seasonal variation at midlatitudes

Earth magnetic field effects on midlatitude F 2 layer derivative absorption

Midlatitude stratosphere and lower ionosphere density model, discussing vertical, diurnal and seasonal variations effects on spacecraft trajectories

Midlatitude F 2 layer electron density structure using theoretical model, accounting for atmospheric physical and chemical processes

Midlatitude F region electron and ion temperatures during magnetic storms, examining Thomson scattering, density and time dependence

Photoelectron production and escape flux at midlatitudes, using spectrometric measurements from ISIS-1 satellite

F region night airglow in equatorial and midlatitudes, discussing red and blue emission origins

F 2 layer nighttime ionization at mid-latitudes, investigating conjugate point effects on observation point

Geomagnetic field influence on annual F 2 layer longitudinal ionization at midlatitudes, relating solar activity level 24 p4331 A70-46300

MIDLATITUDES

U TEMPERATE REGIONS

MIE SCATTERING

NT RAYLEIGH SCATTERING

Holograms of light scattered by clouds of water droplets to determine drop size, noting agreement with Mie theory 02 p0296 A70-11890

Mie scattering and polarization functions of atmospheric aerosols determined on basis of logarithmic Gaussian distributions 05 p0879 A70-16664

Field theory of moving dislocations in Cosserat continuum considered incomplete regarding constitutive equations, basing analysis on Mie-developed mathematical analogy to electrodynamics 07 p1334 A70-19564

Circumterrestrial dust component in Doppler shifted zodiacal light, considering Mie theory 11 p2045 A70-25698

Scattered radiation from plane parallel Mie atmosphere containing spherical particles by Fourier transform method 16 p2952 A70-33983

MIL AIRCRAFT

Mil-10 Soviet giant helicopter cargo and altitude record, VTOL and STOL capability and weight design 03 p0414 A70-14286

MILITARY AIR FACILITIES

Air breathing engine testing at propulsion Wind Tunnel Facility at Arnold Engineering Development Center 11 p2031 A70-25852

MILITARY AIRCRAFT

Blended wing-body design concept for F-15 air superiority fighter, providing fixed wing planform for maneuverability at transonic speed 04 p0622 A70-14395

Protection methods for increasing ground fire survivability of military aircraft hydraulic systems classified by cost, system and component design criteria 05 p0797 A70-15777

Emergency auxiliary hydraulic and electric power for commercial and military aircraft control, proposing self contained monofueled turbine system [SAE PAPER 690658] 05 p0797 A70-15838

Design safety requirement and philosophy differences distinguishing commercial from military aircraft programs 05 p0792 A70-15855

V/STOL and fixed wing tactical transport aircraft survivability while supporting forward area logistics bases, noting V/STOL advantage [SAE PAPER 690705] 05 p0792 A70-15857

British military and civilian aircraft and flying between World War I and II, discussing weapons systems and accidents 05 p0794 A70-16113

Integrated USAF acquisition management systems approach engaging top management abilities available in government and industry 05 p0959 A70-16463

Swedish VIGGEN program for aircraft weapons system development emphasizing management methods 05 p0960 A70-16717

Lift fan V/STOL tactical aircraft performance capabilities determination, using digital computer program 07 p1191 A70-18975

Isochronal maintenance inspection management of Military Airlift Command/MAC/, noting C-141 utilization rate 07 p1428 A70-19673

Remote control turboprop drone aircraft for long unmanned electronic intelligence or tactical communications relay missions 08 p1435 A70-20625

V/STOL transport aircraft design in Germany, analyzing demands in military and civil sectors 08 p1435 A70-20639

Lead-acid and vented nickel cadmium batteries compared in redesign of military aircraft battery for cells reduction, low current density, etc 08 p1440 A70-20712

Integrated display for crowded tactical aircraft cockpits, presenting multisensor information for weapons and fire control systems 08 p1500 A70-21760

Fiat G-222 aircraft featuring high wing twin engine retractable landing gear for military cargo transport 10 p1805 A70-24381

Large scale project grading into stepwise decision stages exemplified by aircraft weapon system development program 10 p1971 A70-24596

Military specification revision of Flying Qualities of Piloted Airplanes evaluated by flight test including

Flight Path Stability and Roll Rate Oscillation techniques [AIAA PAPER 70-372] 10 p1806 A70-24930

Gas turbine engine technology for military and commercial aircraft, discussing operations economy, design matching to missions and fabrication methods 11 p2101 A70-25873

Aircraft turbofan and turbojet engines military-commercial interrelationships [SAE PAPER 700268] 12 p2290 A70-27436

VORTAC system providing navigation service to civil and military air traffic on worldwide basis 12 p2269 A70-27919

Rigid wing subsonic and supersonic civil and military aircraft utilizing aerodynamic lift at takeoff and landing 13 p2344 A70-28543

European Panavia 100/200 two engine variable wing military aircraft, noting prototype design, use and production sharing 13 p2347 A70-29051

USAF undergraduate pilot trainees responses in prototype spatial orientation trainer 13 p2359 A70-29439

Avionics on military combat-reconnaissance aircraft, discussing automatic systems testing and cost effectiveness model 13 p2380 A70-29698

Airborne pulse Doppler radar for tactical aircraft velocity vector measurement, improving navigation system performance 16 p2840 A70-33448

Emergency auxiliary electric and/or hydraulic power for commercial and military aircraft using self contained monofueled gas turbine system 16 p2964 A70-33472

MHD power sources for onboard military aircraft electrical application 16 p2964 A70-33474

Emergency auxiliary hydraulic and electric power for commercial and military aircraft control, proposing self contained monofueled turbine system [AIAA PAPER 70-651] 16 p2970 A70-33616

Equipment and subsystems application to flight management avionics in military and commercial aircraft, noting role of ground-air information transfer 16 p2878 A70-33724

Tactical aircraft performance, discussing electro-optical devices, weaponry, communication and navigational networks, information displays and real time remotely manned control systems 17 p3013 A70-34672

Military aircraft avionics central digital computers, discussing memory capacity, computational speed requirements, cost and tradeoffs 17 p3049 A70-34673

Avionics problems in future Army aviation, discussing communications, navigation, instrumentation, automatic flight control, electronic countermeasures, fire control, etc 17 p3051 A70-34725

Variable sweep high thrust-weight ratio multirole combat aircraft/MRCA/, discussing British-French cooperation, development programs and requirements 17 p3017 A70-34916

Airborne data acquisition and flight recorder systems, comparing civil and military aircraft requirements 17 p3094 A70-35515

USAF aviation accidents diagnostic patterns of injury and death, noting increase in fire and/or associated complications 17 p3039 A70-35574

System engineering process for survival enhancement of military aircraft to meet stringent requirements of general nuclear war [AIAA PAPER 70-893] 17 p3019 A70-35810

Air to air armament selection effect on aircraft configuration [AIAA PAPER 70-939] 17 p3021 A70-35848

RAF aircraft damage due to bird strikes in U.K., discussing preventive measures at airfields 18 p3211 A70-35978

German Air Force aircraft bird strikes statistics 18 p3211 A70-35979

Military airlift command bird hazard minimization near airfields by environmental control, including uses of scare devices, chemicals, trapping, etc 18 p3212 A70-35988

YF-12A interceptor aircraft development and testing, discussing titanium alloys application, aerodynamics and thermodynamics, escape systems for high speed and altitude tests 18 p3213 A70-36451

Military aircraft engines performance increase and cost reduction [SAE PAPER 700272] 18 p3302 A70-36817

Military and commercial transports turbofan propulsion systems impact on future aircraft design and development [SAE PAPER 700267] 18 p3214 A70-36820

High angle of attack aerodynamic characteristics of swept wing navy aircraft designs improved via leading edge modifications [AIAA PAPER 70-904] 19 p3355 A70-37392

USAF operations integration into ATC system 19 p3465 A70-38229

Military Airlift Command jet aircraft computerized area navigation system operational procedures 19 p3465 A70-38232

Export market research for military aircraft 19 p3555 A70-38618

Comparative demand forecasting for military helicopter spare parts, stressing exponential smoothing model 20 p3740 A70-39643

Military and commercial aircraft maintenance costs reduction, discussing labor/material ratio, spare parts use, diagnostic systems, etc 21 p3749 A70-40750

Integrated communication, navigation and identification for worldwide needs of military aircraft 21 p3786 A70-41132

High temperature liquid metal cooled nuclear reactor for military aircraft with long flight endurance and range 22 p4071 A70-43188

Fluidics in naval avionics, discussing CH-46A helicopter stability augmentation and approach power compensator for carrier-based aircraft 24 p4293 A70-45428

Nondestructive testing technology impact on military aircraft maintenance, discussing training, applications and advantages 24 p4342 A70-45678

Fluidically augmented artificial feel system for fighter and attack aircraft control, discussing improved handling qualities [SAE PAPER 700785] 24 p4294 A70-45859

MILITARY AVIATION

Operational planning system for Strategic Air Command for data accessing, generating, displaying and editing using computer complex 01 p0048 A70-11282

Aviation environment master plan concerning public relations problems confronted by USAF bases with adjoining communities 05 p0960 A70-16634

Combat and noncombat ejection/extraction fatalities and major injuries to USAF crewmen 07 p1192 A70-19023

Psychological measures in RAF operational aircrew to obtain details for comparison of flying anxiety casualties from same population 07 p1214 A70-19941

SOAR/Simulation of Airlift Resources/ model for stochastic productivity variations of strategic airlift systems 08 p1466 A70-20930

Pilots anxiety in military milieu using interviews and questionnaires noting effect on proficiency 12 p2179 A70-27051

Medical wastage of professional aviators in military and civil aviation, discussing reasons for preventing flying license revalidation 13 p2359 A70-29440

Economic factors in aviation - RAS Conference, London, May 1970 14 p2668 A70-30935

Military aviation economics in UK emphasizing aircraft industry and government cooperation in meeting RAF requirements 14 p2668 A70-30938

International cooperation in military aviation emphasizing cost effectiveness in R and D, production and export prospects 14 p2669 A70-30939

Predicting retention rate of naval pilots and flight officers beyond initial obligated duty tour based on training performance 15 p2690 A70-31888

Asymptotic myocardial infarction in USAF flyers detected by annual electrocardiograms 15 p2690 A70-31889

Motion sickness among USAF flying personnel, examining organic and psychiatric factors 15 p2690 A70-31890

Combat and noncombat ejection/extraction fatalities and major injuries to USAF crewmen 17 p3039 A70-35576

Aeroatelectosis and pneumothorax in fighter pilot postflight chest pains, noting decompression role 17 p3041 A70-35920

Training simulation improving ejection decision making in naval aviation 23 p4178 A70-44467

Army aviation requirements in high intensity conflicts, discussing transportation, communications, intelligence acquisition, organization and suitable aircraft types 23 p4142 A70-44855

- Microwaves in integrated military avionics systems, discussing CNI, ECM, component reliability, etc 14 p2551 A70-31177
- Parts standardization in military electronics industry for cost reduction and reliability, discussing design transform from software to hardware 15 p2831 A70-32632
- Reliability factors in design and development staging systems (DDSS) for military and space exploration programs 15 p2747 A70-32639
- Reliability test facilities for military shipboard electronic equipment, subjecting equipment to combined thermal shock and vibration cycles 16 p2888 A70-33125
- Low light level TV (LLLTV) tube, camera and sensor development for military and space applications 16 p2903 A70-33129
- Phased arrays, discussing ground based, shipboard and airborne research programs for military 16 p2863 A70-33264
- In-flight thrust reverser for tactical/attack aircraft, discussing system influence on airplane stability and control [AIAA PAPER 70-699] 16 p2841 A70-33561
- Electronic equipment maintainability in military environment, discussing myths for hardware and human performance conditions 16 p2852 A70-33664
- Coding procedure for Air Force maintenance technicians to record and describe equipment malfunctions compared to experimental codes 16 p2853 A70-33666
- Air superiority fighter design philosophy, including tradeoffs between armament, detection capability, thrust, speed and load factor [AIAA PAPER 70-930] 17 p3021 A70-35840
- Cost effectiveness methodology for space program, industry, military sector, etc 19 p3554 A70-38402
- Military electronic equipment reliability limitations in terms of mean time to failure, considering quality control of components 19 p3390 A70-38596
- RAMMIT (reliability and maintainability management improvement techniques) for processing maintenance data relevant to Army aircraft operations and support 19 p3441 A70-38826
- Laser beam for military weapons applications, investigating energy levels and beam guidance 20 p3641 A70-39421

Electronic equipment test capability, programming methods and operation-modes of General Purpose Automatic Test System, describing updating by USN 21 p3803 A70-40769

General Purpose Automatic Test System using building block concept for avionic systems evaluation at military depot level 21 p3803 A70-40771

Disposable load drop effect on aircraft range, using Breguet equations for graphic determination of bombing range 21 p3750 A70-40868

Military program cost effectiveness and control, considering resources and products 21 p3955 A70-41173

Military sealed thin sintered plate Ni-Cd rechargeable batteries, comparing performance with other systems 22 p3966 A70-43538

Plastic encapsulated IC for military environments, discussing cooker, corrosion and thermal shock tests 23 p4173 A70-44534

Army aviation requirements in high intensity conflicts, discussing transportation, communications, intelligence acquisition, organization and suitable aircraft types 23 p4142 A70-44855

MILITARY VEHICLES

Computer program (TACTICS) for simulating three vehicles simultaneous motion in space, considering interceptor-target guidance and intercept trajectories 07 p1239 A70-20414

Ground effect machine, discussing tactical transport support role 16 p2843 A70-34265

MILK

Transport ratio for I-131 air to milk concentrations, determining mean value and statistical variation from Project Rover data 19 p3361 A70-38012

MILKY WAY GALAXY

Radial velocities determined from prism spectrograms for O and B stars in Milky Way field in Scorpius 02 p0369 A70-12062

Symmetric cosmologies within gamma ray measurement context showing antimatter limits in Milky Way and metagalaxy 02 p0371 A70-12196

Ionized matter complex at galactic periphery deduced from neutral hydrogen line and continuous spectrum observations 03 p0564 A70-13222

Galactic bending dynamics, discussing omega and zeta motions coupling of neutral hydrogen in outer region 03 p0570 A70-13553

BV photometry of Population I Cepheids in Magellanic Clouds, Galaxy and M31 03 p0578 A70-14287

Radio telescopic observations at 408 and 5000 MHz in galactic plane, describing two sources 04 p0746 A70-14514

Neutral atomic hydrogen in Virgo A cluster and between Galaxy and Virgo A, using emission and absorption measurements 04 p0758 A70-15707

NonJeans gravitational instability of stars and interstellar gas in Galaxy due to wave interaction with stars having velocity near wave phase velocity 05 p0917 A70-16906

Density wave theory and Schmidt model applied to Milky Way spiral structure, considering systematic motion of interstellar neutral hydrogen 05 p0918 A70-16928

H I gas and H II regions kinematics, comparing radial velocities near galactic center 06 p1149 A70-18459

Milky way and interstellar clouds brightness fluctuations statistical analysis by surface photometry, studying dust distribution, cloud absorption and dimensions, star distribution, etc 06 p1149 A70-18463

Flux densities and positions for Southern Milky Way sources at 1410 MHz, determining spectral indices 07 p1387 A70-19682

Earth observations of collapsing star neutrinos and neutrino oscillations in Milky Way galaxy 07 p1371 A70-20331

Ionized matter complex at galactic periphery deduced from neutral hydrogen line and continuous spectrum observations 08 p1580 A70-21655

Far IR radiation at galactic center suggested as thermal emission by dust particles 09 p1744 A70-22502

Galactic halo origin and evolution postulated from chemical evolution assuming stellar evolution details 09 p1758 A70-22742

Planetary faint nebulae containing northern Milky Way portion in direction of galactic anticenter observed with spectral Schmidt camera, noting stellar appearance 09 p1761 A70-23051

Galactic sources H109 alpha line and continuum surveys, showing thermal continuum spectrum for sources with radio recombination lines 10 p1936 A70-23903

Galactic radio sources examined for hydroxyl lines associated with H II regions, making observations in absorption and emission 10 p1936 A70-23904

Formaldehyde absorption profile in direction of Milky Way center observed using lunar occultation 10 p1936 A70-23905

Milky Way expansion, explaining Weber gravitation signals by collisions between neutron and normal star 10 p1943 A70-24698

Radial velocities of superegiant distant stars in southern Milky Way regions of I Sco Association 11 p2113 A70-26465

Diffuse matter distribution in northern region of Milky Way, examining relation with O-BO stars distribution 11 p2116 A70-26588

Pulsar research, discussing possibilities in probing galactic medium 12 p2301 A70-27577

Milky Way large scale structure from radio recombination line surveys 12 p2301 A70-27580

Diffuse galactic radiation and absorbing clouds luminescence illuminated by integral stellar radiation in Milky Way 12 p2307 A70-27866

Cosmic rays intensity frequency spectrum near earth, indicating relativistic electron energy spectra similarity in interstellar space and galactic particles existence 13 p2478 A70-29388

High energy cosmic ray muons, investigating arrival from both low and high galactic latitudes 13 p2478 A70-29482

Density wave theory and spiral gravitational field effects in migrating stars orbits and origins in Milky Way spiral arm, using Schmidt model 13 p2495 A70-29801

Near Galactic plane condensations of spectral A stars in HD catalog, investigating by Monte Carlo method and Poisson formula 15 p2797 A70-31616

Galactic structure of Milky Way towards Taurus based on two dimensional classification and three color photography of star group 15 p2797 A70-31621

Milky Way galaxy continuous background radio emission observed at various longitude intervals 18 p3322 A70-37130

Milky Way spiral structure - Conference, Basel, August-September 1969 18 p3324 A70-37151

Milky Way and other galaxies spiral arms configuration, comparing to Andromeda 18 p3326 A70-37154

Spiral galaxies pattern statistics, examining morphological type of Milky Way galaxy 18 p3326 A70-37155

Neutral H spiral structure in Milky Way galaxy, discussing map derivation, pattern interpretation, arm characteristics and kinematics 18 p3327 A70-37161

H 2 region and neutral gas spiral structure and radial distribution, using optical observations and radio continuum surveys 18 p3327 A70-37162

Milky Way galaxy spiral structure analysis, using neutral H Hat Creek survey with southern observations 18 p3327 A70-37164

Continuum source counts in galactic plane 18 p3327 A70-37165

Neutral H concentrations far from galactic plane associated with spiral arms 18 p3327 A70-37166

Milky way galactic plane corrugation, discussing maximum hydrogen brightness temperature oscillating in sinusoidal pattern 18 p3328 A70-37167

Neutral hydrogen distribution in galactic region surveyed with radiotelescope 18 p3328 A70-37169

Radial velocities of neutral hydrogen in anticenter region of Galaxy 18 p3328 A70-37170

H I local spiral arm drift curves from radio telescope operation 18 p3328 A70-37171

Galactic spiral structure relation to local stellar distribution, discussing OB associations, galactic cluster, WR stars, cepheids, and common stars in sun neighborhood 18 p3329 A70-37176

Local spiral arm H 2 regions distribution in Cygnus direction, discussing symmetry due to magnetic field 18 p3329 A70-37180

Milky Way appearance and galactic spiral structure, using models with variable and different absorption values of arms 18 p3329 A70-37181

Integrated Milky Way spectrum, examining composition and galactic structure in solar neighborhood 18 p3329 A70-37182

Interstellar dust spatial distribution, indicating galactic spiral structure 18 p3329 A70-37183

Large scale spiral galaxy structure interpretation, examining density wave theory, Milky Way System and spiral form origin 18 p3331 A70-37196

Young star velocity ellipse vertex deviation, discussing formation at right angles to galactic center direction 18 p3331 A70-37199

Galactic spiral arm helical magnetic fields related to interstellar gas flow, using magnetohydrodynamic models 18 p3331 A70-37200

Cosmic rays - Conference, Budapest, August-September 1969, Volume 1, Origin and galactic phenomena, covering supernovae, ray spectra, pulsar gamma rays, etc 19 p3497 A70-38076

Cosmic rays propagation and production in Milky Way galaxy, using equilibrium model 19 p3510 A70-38157

Expansion motions in inner Galaxy, discussing lower velocity absorption features, mass estimation method and model 19 p3522 A70-38602

Radio sources with opaque microwave spectra near galactic equator 19 p3522 A70-38603

H II region radial velocity comparison to galactic spiral structure, using optical and radio investigations 19 p3524 A70-38698

Cepheids in Galaxy spherical component, determining periodic variations by distribution function technique 19 p3525 A70-38768

Pulsars discovery at low galactic latitudes, investigating dispersion, pulse shape and period 21 p3923 A70-41995

Atomic hydrogen 21 cm line intensity distribution in Carina arm of Milky Way galaxy 22 p4100 A70-42851

OB star distribution statistical analysis in Southern Milky Way, discussing concentrations, relations and systematic deviations 22 p4100 A70-42854

H alpha emission objects in Southern Milky Way, discussing positions, photometric data and relation to galactic structure 22 p4101 A70-42865

Alpha hydrogen recombination lines 156, 166, 167 and 168 from galactic center, using radio telescope 22 p4103 A70-42980

Large scale magnetic field and spiral shock pattern of Galaxy, using density-wave theory 22 p4103 A70-42981

Galactic plane continuum surveys at 8000 MHz, presenting radio contour map and sources list 22 p4109 A70-43747

Radio astronomy research covering solar radio emission, Milky Way radiation, molecular radio line spectra, etc 23 p4256 A70-45041

German monograph on Milky Way spiral structure, describing elliptic orbit model 24 p4399 A70-45100

Discrete source interpretation of isotropic component of diffuse gamma radiation in Milky Way galaxy 24 p4398 A70-46166

MILLIMETER WAVES

Millimeter background discrete source model, deriving required source density from small scale anisotropy upper limit 01 p0173 A70-10041

Astronomical studies at millimeter wavelengths, describing radio meter and Fabry-Perot interferometer design for submillimeter range 01 p0185 A70-10975

Variable atmospheric attenuation of 5 mm wavelength band, considering oxygen absorption spectrum and attenuation for reference atmosphere 02 p0260 A70-12570

Radio telescope efficiency improved at 8 mm wavelength by quantum paramagnetic amplifier and multimirror antenna system 03 p0455 A70-13083

Millimeter wave fields systems application to radar guidance, radiometry, communications, radio astronomy and satellite experiments 04 p0647 A70-14621

Quasi-optical design methods applied to mm microwave resonators characterized by high Q and low spectral densities 04 p0655 A70-14623

MM wave outbursts of 1 and 2 November 1968, discussing wavelength dependence of flux density 05 p0912 A70-16441

Radio astronomical observations in millimeter wavelength region, discussing sun, moon, planets, galactic and extragalactic sources, etc 06 p1139 A70-17417

Solar bursts of enhanced intensity at millimeter wavelengths suggested for limb brightening mechanism

06 p1153 A70-18545

Plastic symmetrical trough waveguides with metalized surfaces for hybrid millimeter-wave integrated circuit systems, discussing ferrite resonant isolator

07 p1243 A70-20151

Millimeter wave CW Gunn oscillators construction by packaging free from spurious resonance, using sapphire ring and Au cap

08 p1468 A70-20482

Millimeter guided wave communication systems information transmission capacity increase, using quaternary and higher order modulation techniques

08 p1462 A70-21506

Permittivity of thin films in millimeter and submillimeter wavelengths measured by diffraction grating method

08 p1464 A70-21985

Frequency measurement in millimeter and submillimeter ranges, using high quality Fabry-Perot resonator

09 p1680 A70-23141

Klystrons operation at millimeter band, using efficiently bunching drift fields for steady power output at critical wavelength

09 p1651 A70-23636

Millimeter band direct-transit klystrons oscillation and amplification at improved output power obtained by electron bunching in nonuniform drift fields

09 p1651 A70-23637

Adaptive multiple access satellite communication system at millimeter wavelengths in time- and frequency-division modes, compensating rainfall attenuation

10 p1838 A70-24358

Multiple access technique for millimeter wave satellite communications, noting weight and size of on-board equipment

10 p1838 A70-24359

Solar mapping using millimeter wave radio telescope, comparing results with H alpha photographs and magnetograms

10 p1945 A70-24963

Solar flares period, core and physical nature of areas by measurements at millimeter wavelengths, discussing radio source center

10 p1934 A70-25277

Beam switching Cassegrain antenna for millimeter wave radio astronomical measurements, describing RF and electronic systems

11 p2019 A70-26374

Atmospheric stability sensing by millimeter wave radiometry, discussing thermal radiation emitted and absorbed by oxygen molecules

12 p2263 A70-26955

Solar radio emission maps at 8.6 mm using parabolic antenna and TV camera for optical control

12 p2293 A70-27591

Electromagnetic radiation attenuation in rain at cm and mm wavelengths, determining rainfall rates and drop size distribution

13 p2364 A70-28783

Millimeter wave probing for vertical distribution of atmospheric water vapor, comparing ground, balloon and satellite observation techniques

13 p2394 A70-28785

Millimeter and submillimeter radio waves propagation, outlining molecular and aerosol attenuation in real atmosphere together with transmitters and receivers

13 p2366 A70-29401

Atmospheric optical thickness from radio telescopic measurements of wave absorption at millimeter wavelengths, showing dependence on lower atmospheric moisture content

14 p2546 A70-30127

Book on millimeter and submillimeter waves covering generation, transmission, components and detection

14 p2548 A70-30426

Millimeter and submillimeter waves applications, discussing klystron oscillators for spectral purity and coherence

14 p2548 A70-30427

Coaxial, inside-out and rising-sun magnetrons for millimeter waves generation under pulsed conditions, discussing tunability, frequency stability and weight

14 p2555 A70-30429

HF backward wave oscillators with emphasis on limiting factors in millimeter waves generation, discussing ohmic and circuit imperfection losses

14 p2555 A70-30430

Megavolt prebunched electron beam systems for electronic sources in millimeter and submillimeter region, describing microwave accelerators and bunchers

14 p2555 A70-30431

Millimeter and submillimeter waves generation as difference frequencies of mixed laser beams

14 p2593 A70-30434

Millimeter waves generation by tunnel, Gunn and avalanche diodes, tabulating frequency, efficiency and power data

14 p2548 A70-30435

Nonlinear resistance and reactance type harmonic generator diodes performance with output in millimeter wave decade

14 p2548 A70-30436

Harmonic generation in gas discharge by frequency multipliers, assessing multipliers capabilities for millimeter wavelength operation

14 p2549 A70-30437

Circular low loss waveguides for millimeter waves, discussing construction, geometry, surface texture, etc

14 p2556 A70-30442

Surface wave transmission lines used at millimeter wavelengths

14 p2549 A70-30443

Millimeter waveguide components, discussing impedance measuring equipment, matched loads, variable short circuits and attenuators, power measurement equipment, etc

14 p2556 A70-30446

Millimeter and submillimeter wave receivers, describing detectors, mixers, low noise amplifiers and radiometers

14 p2549 A70-30448

Millimeter wave applications, considering waveguide and plasma communications, ground surveillance radars, vibration analysis equipment, decoders, etc

14 p2549 A70-30449

Quasi-optical filters with bandpass and pseudohigh pass structures for millimeter wave and far IR frequencies

14 p2558 A70-31318

TWT noise level minimization in 8 mm band with circular spiral slow wave structure and five electrode gun

15 p2707 A70-31519

Instrument for visualization of EM field in open resonators in mm range

16 p2908 A70-33213

Millimeter wave amplification by pumped n-type gallium arsenide oscillating in limited space charge accumulation mode

16 p2875 A70-33399

High speed millimetric horn antenna with small azimuth and elevation beamwidths for airfield radar

16 p2876 A70-33407

Millimeter wave radar for high resolution aircraft landing aid, describing experiments to obtain backscatter data from airborne platform

17 p3133 A70-34721

Lunar millimeter wavelength thermal radiation measurement noting surface roughness effect on polarization

17 p3171 A70-35559

Hour-angle and declination center-to-limb profiles of quiet sun 3.3mm brightness temperature distribution

17 p3174 A70-35868

High altitude humidity from millimeter-band water vapor lines, using EHF atmospheric spectral transparency calculation

19 p3461 A70-37633

Millimeter waves atmospheric attenuation vs frequency and altitude due to oxygen absorption, tabulating for graphical and seasonal model atmospheres

20 p3588 A70-40302

Millimeter and decimeter waves atmospheric absorption as function of pressure, temperature and water vapor density

20 p3588 A70-40303

Millimeter wave observation of sun, deriving empirical relationships between atmospheric attenuation, emission and water vapor

20 p3623 A70-40304

Millimeter wave and optical astronomical refraction differential measurements, showing dependence on atmospheric water vapor

20 p3588 A70-40305

Atmospheric turbulence and wind velocity remote probing by millimeter waves, comparing results with conventional anemometer measurement

20 p3665 A70-40306

Lens with radial symmetry for mm wave scanning antenna

20 p3598 A70-40307

Heterodyne millimeter wave radiometric system for observing atmospheric attenuation due to water vapor, discussing design, development and initial measurements

20 p3588 A70-40308

Millimeter wave reflector antennas, considering various system designs, performance, pointing capabilities, limitations and applications

20 p3599 A70-40309

Rainfall effects on EM wave propagation at centimeter and millimeter wavelengths

20 p3588 A70-40310

Millimeter wave propagation measurements by ATS-5 satellite, observing attenuation dependence on meteorological parameters for communication data link performance prediction

20 p3589 A70-40311

Solar active regions at millimeter wavelengths, discussing brightness temperature, background radiation, electron density, optical thickness, polarization and chromospheric magnetic fields

21 p3886 A70-40960

Millimeter wave space-to-space and space-to-ground satellite communication links frequency allocation problems

21 p3787 A70-41335

Wideband millimeter wave communications experiments for satellite applications, considering ATS-5, radiometry and future lunar base

21 p3787 A70-41337

Millimeter wave high gain Cassegrain antenna for wide bandwidth data link between communications satellites, obtaining accurate parabolic contours

21 p3799 A70-41359

Millimeter wave radio systems for relieving crowding at lower frequencies, discussing technology, atmosphere effects and applications

22 p3990 A70-43418

Millimeter band electromagnetic scattering from weakly doped GaAs, calculating reflection coefficient and phase angle

23 p4229 A70-43926

Uranus and Neptune millimeter wave observations, showing brightness temperatures in excess of black body equilibrium temperatures derived from solar heating

24 p4403 A70-45398

Millimeter wave solar radiation atmospheric absorption examined at sea level with Michelson interferometer

24 p4398 A70-45785

Mm wavelength radiometer for recording solar activity and radiation attenuation in atmosphere as function of time

24 p4315 A70-46236

MILLING [MACHINING]

Apparatus for studying vibrations via contactless HF resonant transducers during milling

09 p1691 A70-22625

Rotary Ultrasonic Machining with diamond tools for hard and brittle materials compared to ultrasonic impact grinding method

09 p1692 A70-22797

Laser applications of metal machining and micromachining, discussing drilling, cutting, milling, welding, dynamic balancing, automation, etc

12 p2241 A70-27082

Surface alterations by machining processes for gas turbine engine materials, emphasizing effects of milling on Ti and grinding on high strength steels

18 p3264 A70-36888

MILLING [MIXING]

U COMPOUNDING

MILLING MACHINES

Spark erosion milling machines adaptable to piece and mass production

15 p2744 A70-31899

Digitally controlled milling machine for complex aerodynamic profiles and prismatic blades

22 p4046 A70-43117

MILNE METHOD

Milne problem for anisotropic atmospheric scattering, determining radiation transmission at particular angle with arbitrary scattering indicatrices and particle albedo

15 p2801 A70-32477

Thick plane fog layers reflection and transmission properties, using emerging light angular distribution for Milne problem

18 p3284 A70-35944

Milne problem for anisotropic atmospheric scattering, determining radiation transmission at particular angle with arbitrary scattering indicatrices and particle albedo

23 p4239 A70-43902

MINER RULE

U PALMGREN-MINER RULE

MINERAL DEPOSITS

Gravity and magnetic geophysical prospecting methods, discussing data acquisition, reduction and analysis in terms of underground geologic anomalies

22 p4018 A70-43086

MINERAL OILS

Potentiometric analysis for determining acidity and alkalinity in dark mineral oils with additives

05 p0810 A70-15898

Distilled water and mineral oils heated to 50-80 C studied for effect on residual stresses in fiberglass reinforced plastics

08 p1526 A70-20925

MINERALOGY

Differential thermal analysis capabilities in mineralogy for determining present/past planetary environmental parameters having significance for biological experiment

11 p1994 A70-25811

Synthetic pyroxenoid stability and crystallography, noting pyroxenoid structure similar to yellow lunar mineral from Mare Tranquillitatis

12 p2226 A70-28022

Seymour coarse octahedrite, compositional and mineralogical relationships 13 p2487 A70-28695

Early Precambrian chert porosity and permeability, investigating hydrocarbon content origin 13 p2400 A70-29863

Apollo 11 lunar rocks mineralogy and petrology, noting anorthosite in powder and breccia 18 p3320 A70-37081

Lunar surface spectral reflectivity measured with ground based telescopes for remote mineralogical analysis 20 p3709 A70-39977

Apollo 11 lunar science - NASA Conference, Houston, January 1970, Volume 1, Mineralogy and petrology 21 p3893 A70-41501

Titanian and aluminian chromites and chromian ulvöspinel in Apollo 11 fines, microbreccias and basaltic type igneous rocks 21 p3895 A70-41505

Apollo 11 lunar rock and fines chemistry, mineralogy and petrology, discussing composition, igneous rocks, microbreccias, glasses and pyroxene relations 21 p3895 A70-41507

Mineralogy and chemistry of Apollo 11 lunar soil samples, using three-channel electron microprobe analyzer 21 p3896 A70-41509

Apollo 11 lunar rocks, breccias, dust and chip mineralogy and petrology, examining composition, texture, grain size and morphologies 21 p3896 A70-41511

Apollo 11 lunar igneous rocks mineralogical, chemical and petrological features by optical and electron microscopy and X ray spectrometry 21 p3896 A70-41512

Petrology, mineralogy and deformation of Apollo 11 rock samples using microscopic, X ray and electron microprobe methods 21 p3897 A70-41517

Tranquility Base lunar soil origin, establishing component nature, size distribution, density, mineralogy, constructional or destructional history 21 p3897 A70-41519

Apollo 11 lunar rock mineralogy, examining petrographic and chemical features by light microscopy, electron microprobe microanalysis and detector system 21 p3898 A70-41525

Bulk chemical compositions, mineral and glass analyses, X ray data and physical properties of Apollo 11 lunar fines and rocks 21 p3898 A70-41526

Plagioclases, pyroxenes and olivines in lunar soils and rocks, using X ray diffraction and Mossbauer effect 21 p3899 A70-41528

Lunar breccia and fine sample metal particles, using optical and scanning electron microscopy and electron probe microanalysis 21 p3899 A70-41529

Type 1 carbonaceous chondrites contribution to lunar soil, comparing mineralogical and trace element evidence 21 p3899 A70-41533

Apollo 11 lunar samples mineralogical and compositional studies concerning lunar origin hypothesis 21 p3899 A70-41534

Apollo 11 lunar igneous rocks minerals and glassy phases characteristics, using electron probe microanalysis 21 p3900 A70-41538

Mineralogy and petrology of lunar rock samples indicating meteoritic increments 21 p3900 A70-41539

Lunar rocks petrography, mineralogy and petrogenesis from Apollo 11 samples 21 p3902 A70-41554

Apollo 11 lunar igneous rock mineralogy and petrology, emphasizing ferrobasalt minerals microanalysis electron probe 21 p3903 A70-41557

Lunar rocks mineralogy and visible and near IR reflectivity, discussing depression in telescopic curve 21 p3912 A70-41637

Hydrous Cu-Ca silicate mineral /kinoite/ from Arizona occurring as single crystals and veinlets 24 p4329 A70-45459

Optical studies of deformational structures of minerals from meteorite craters and cryptoexplosion structures 02 p0292 A70-12510

Existence probability of useful mineral resources on moon, considering physical features and geological formations 03 p0563 A70-13170

Composition and monoclinic parameters of chromium sulfide mineral breznaitite in metal matrix and silicate inclusions of Tucson meteorite using electron microprobe 11 p2110 A70-26004

Reinforced plastics adhesion to hydrophilic mineral surfaces by using silane coupling agents 16 p2937 A70-33374

Minerals radiative thermal conductivity at high temperatures from IR measurement of absorption coefficient and refractive index 16 p2897 A70-33648

Cosmic ray track sources in meteoritic minerals, considering heavy primaries, secondary spallation and fission products 19 p3508 A70-38142

Microorganisms metabolic activity effects on rocks and minerals, observing solubilization and altered IR absorption in Si-oxygen vibration region during penicillium simplicissimum growth 21 p3761 A70-40712

Apollo 11 mafic crystalline rocks and mineral assemblages, discussing collection, classification and sample environments 21 p3894 A70-41502

Apollo 11 magnesium-rich opaque oxide armalcolite mineral from Tranquility Base noting relation to pseudobrookite series 21 p3895 A70-41503

Trace elements in Apollo 11 lunar glass clinopyroxene, plagioclase and ilmenite, using ion microprobe mass analyzer 21 p3896 A70-41510

Petrologic analyses of minerals and glass spherules in Apollo 11 lunar rocks, indicating little fractionation and shallow-level differentiation 21 p3897 A70-41521

Apollo 11 lunar rock fluorapatite and trace minerals, examining pressure and oxidizing conditions of formation, grain and crystallization 21 p3898 A70-41527

Apollo 11 lunar rocks and minerals oxygen 18-oxygen 16 ratios 21 p3777 A70-41609

X ray powder and chemical data on monoclinic secondary mineral guildite from mine fire at Jerome site 24 p4330 A70-46274

MINES [EXCAVATIONS]

X ray powder and chemical data on monoclinic secondary mineral guildite from mine fire at Jerome site 24 p4330 A70-46274

MINIATURE ELECTRONIC EQUIPMENT

Miniature piezoresistive pressure transducers for catheter and external physiological measurements in small animals 07 p1220 A70-19297

Standing wave ratio frequency dependence in miniature stripline power dividers and ring structure hybrid junction 09 p1652 A70-23653

Miniature wireless strain and temperature radio telemetry transmitters for measurements in areas inaccessible to direct wire connections 15 p2738 A70-32301

Solid state dipole antenna array miniaturization by etching microstrip components on alumina substrate having high dielectric constant 16 p2876 A70-33409

Subminiature solid state piezoresistive accelerometer using diffused four arm Wheatstone bridge sensor 17 p3094 A70-35522

Magnetic bubbles in miniaturized electronic circuits, discussing fabrication and uses in communication and computers 19 p3484 A70-37574

Miniature pressure transducers using piezoelectric or semiconductor elements 20 p3628 A70-39226

MINIATURIZATION

NT MICROMINIATURIZATION

NT SUBMINIATURIZATION

MINIMUM DRAG

Printed circuit board connector selection techniques based on miniaturization reliability, cost and compatibility with intended application 02 p0268 A70-12473

Microwave pencil triodes and cavities of miniature design for Air Traffic Control Beacon Systems 10 p1852 A70-24886

Miniature electromechanical gallium antimonide tunnel diode transducer theory fabrication and performance 12 p2236 A70-28055

Life and confidence tests of miniature self contained flexure pivots in critical mechanisms [ASME PAPER 70-DE-76] 16 p2918 A70-33522

Ultraminiature pressure transducer for airplane model and inlet/engine subsystem in wind tunnel tests, considering design, calibration, environments, etc 19 p3430 A70-38523

Miniaturized programmer-comparator MINI-BACE /Basic Automatic Checkout Equipment/, discussing design, mechanization, etc 21 p3803 A70-40767

Helicopter rotors fatigue testing using small scale models of full scale components [ICAS PAPER 70-34] 23 p4267 A70-44131

Miniaturized VHF transmitter with bonded circular printed circuits for withstanding high shock loads, discussing design, production, packaging and testing 23 p4164 A70-44537

MINIMA

Final state vector norm minimizing in linear optimal control, using successive approximation and quadratic programming 10 p1856 A70-25188

Minimum principles for rate solution in elastoplastic work hardening materials with regular yield surface 13 p2513 A70-29152

MINIMAX TECHNIQUE

Necessary and sufficient conditions for constrained extrema without use of Lagrange multipliers 07 p1325 A70-19335

Discrete process max-min problem, using dynamic programming to obtain upper and lower bounds 08 p1533 A70-20604

Optimum control law for minimizing mass point maximum deviation under given disturbance obtained by graph analytic method 09 p1727 A70-22534

Sufficiency conditions and Lagrange multipliers in maxima and minima theory with results restricted to ordinary extremal points, considering constrained optimization 11 p2073 A70-26232

Minimax one step and recursive nonlinear predictors for linear discrete time-invariant first order plant driven by unknown bounded forcing function 12 p2204 A70-28069

Soviet book on numerical methods of Chebyshev approximation covering minimax problems, computer methods, linear programming, etc 19 p3456 A70-37232

Unilateral and minimax control with functional restrictions, including pursuit and evasion games 23 p4177 A70-44906

Relaxed minimax control with functional restrictions by Uryson integral financial equation 23 p4213 A70-44907

Algorithm for Chebyshev solution of n plus 1 inconsistent linear equations in n unknowns, using minimax technique 24 p4370 A70-46241

MINIMIZATION

U OPTIMIZATION

MINIMUM DRAG

Surface shape determination for thin delta wing with variable geometry to minimize drag for given open and closed configurations and cruising supersonic speeds 01 p0002 A70-10547

Minimum drag hypersonic delta wing, analyzing shape for given planform, lift, pitching moment and volume using correction for pressure coefficient 01 p0002 A70-10557

Slender bodies optimum aerodynamic shape for supersonic velocities, discussing minimum wave drag and total drag two step analysis using calculus of variations 03 p0408 A70-13801

Two dimensional and axisymmetric bodies shapes providing minimum wave drag to supersonic flow of perfect gas, considering bodies around which flow causes bound shock waves 03 p0409 A70-13863

Streamlining design for high altitude hypersonic flight vehicles based on drag minimization at flight condition 07 p1189 A70-19717

Numerical solutions of variational problems concerning symmetrical wings with minimum drag and optimal aerodynamic efficiency in hypersonic flow 09 p1603 A70-22433

Generatrix shape determined for body of revolution moving at supersonic speed with minimum wave drag 09 p1603 A70-22434

Optimal deformation and minimum wave drag for wings with supersonic leading and straight trailing edge, solving variational problem by Ritz method
09 p1604 A70-22444

Shape of minimum drag slender body of revolution in Newtonian flow for given volume, length and maximum cross section determined by stochastic optimality principle
10 p1802 A70-24278

Minimum drag thin symmetrical cruciform wing fitted with central ridge, reducing problem to linear algebraic finite system of equations
10 p1803 A70-24784

Planar wing with end plates in ground effect, calculating minimum induced drag by approximation theory
21 p3743 A70-40919

Optimum thickness ratio and minimum drag of slender bodies in hypersonic viscous flow as function of altitude
23 p4134 A70-44571

MINKOWSKI SPACE

Pseudoisotropic surfaces in Minkowski space-time with proof of existence, formulating congruencies of normal fiber
13 p2452 A70-29634

MINORITY CARRIERS

Hole mobility in n-type InSb semiconductors determined from solving kinetic equation for minority carriers allowing for scatterings
01 p0155 A70-10185

Resistivity, temperature and injection level dependence of minority carrier lifetime in neutron irradiated p- and n-type Si
04 p0730 A70-14729

Minority current carriers diffusion in heterojunctions and p-n junctions in AlAs-GaAs, using X ray microanalyzer performing electron beam scanning
06 p1126 A70-7816

Minority carriers lifetime following CdS and ZnTe spontaneous luminescence relaxation after electron beam excitation
07 p1302 A70-20318

Volt-ampere characteristics of metal-semiconductor contacts for Schottky barrier diodes, investigating suppression of minority carriers and frequency response
09 p1741 A70-23352

Transient analysis of transistor under large input signal accounting for minority carrier life and base collector capacity
10 p1849 A70-24383

MIS varactors applications as nonlinear reactances, discussing charge-voltage characteristics and minority carriers effect
12 p2196 A70-27685

Minority carrier diffusion lengths on sides of copper sulfide-cadmium sulfide heterojunctions measured by light microprobes
13 p2471 A70-29709

Spectral distribution of GaAs photoconductivity, allowing for coordinate dependence of minority carrier lifetime in surface space charge region
15 p2782 A70-31626

Alloy junction transistors with emitter larger than collector, analyzing minority carrier distribution in base region and effect on current amplification
15 p2714 A70-32703

Conducting state propagation in p-n-p structure involving minority carrier diffusion between regions
23 p4232 A70-45068

Electron recombination effect on current transmission through insulator-semiconductor junction with large diffusion length of minority carriers
24 p4390 A70-45634

MINUTEMAN ICBM

Minuteman 3 Reentry System real time laboratory aging and surveillance test program to evaluate long-term storage effects on equipment behavior
[AIAA PAPER 70-395] 10 p1952 A70-24910

MINUTEMAN MISSILES

U MINUTEMAN ICBM

MIRRORS

NT CELESTROSCOPES

NT MAGNETIC MIRRORS

NT PARABOLOID MIRRORS

NT ROTATING MIRRORS

Optical data display involving laser light deflection by vibrating mirrors actuated by mechanical resonators
01 p0108 A70-10355

Absorber positioning inaccuracy influence in concentrating solar unit mirror on unit energy parameters, discussing defocusing
01 p0010 A70-10763

High reflectivity mirror construction for H Lyman alpha line using vacuum deposited Al layer coated by magnesium fluoride
02 p0299 A70-12367

Autostereoscopic display using vibrating varifocal mirrors, including laboratory computer generated real time image and movie projection systems
02 p0302 A70-12631

Multimirror illumination system for radio telescope antenna with reduced noise temperature, narrow
07 p1293 A70-19119

radiation pattern and optimal specular cross section, noting sensitivity
03 p0455 A70-13082

Complex profile aspherical mirrors used in He-Ne gas laser to obtain single mode emission
03 p0500 A70-13465

UHF self modulation in GaAs laser coupled to external cavity, focusing convergent beam on external mirror
04 p0701 A70-14718

Thermal and dynamic considerations of materials choice for satellite mounted telescope mirrors noting Be and silica properties
06 p1064 A70-17781

Mirror material for satellite-borne telescopes, considering Be and CER-VIT or ULE silica thermal and mechanical properties
07 p1279 A70-19000

Spatial and energy characteristics of laser with nonuniform transmittance across resonator mirrors, analyzing transverse modes interaction
08 p1514 A70-21816

Astronomical high power telescopes construction, discussing rough casting, forming, precision polishing, Foucaultage principle for spherical mirrors, thermal effects, etc
09 p1674 A70-22218

Lightweight mirror blanks of titanium silicate for OAO-4 providing thermal and dimensional stability
09 p1678 A70-22952

Interference proof characteristics and shielding capability of mirror antennas improved by peripheral sheet metal or wire screens, reducing rear lobe level
09 p1648 A70-23151

Optical resonators formed by spherical mirrors, deriving mode density-output power relationship by ray analysis
09 p1729 A70-23521

Mirror-grating system optical properties emphasizing coma-type aberration elimination
09 p1729 A70-23528

Antenna array circular polarization adjustment using reflections from horn radiator and mirror
09 p1650 A70-23633

Temperature insensitive telescope with metallic mirror at Milan-Merate Observatory
10 p1889 A70-24584

Mirror adjustment effect on transverse structure, time dependence and spatial coherence of pulsed UV molecular nitrogen laser emission
11 p2062 A70-25394

Selective optical coatings of alternate Ni and silicon dioxide layers, describing optical and spectral characteristics of black mirror
12 p2272 A70-27307

Gallium arsenide laser with external mirror excited by electron beam, measuring radiation patterns
12 p2247 A70-27482

Modal expansion method applied to thin deformable primary mirror surface control for orbiting astronomical observatory
13 p2403 A70-28427

Thermal control coatings, windows and mirrors for 1973 Mars Viking Lander vehicles under simulated Martian surface conditions
[AIAA PAPER 69-1023] 13 p2384 A70-28530

Gas laser radiation focusing with spherical mirrors, calculating field distribution and beam path
13 p2424 A70-28592

Two mirror astigmatic resonator mode fields and stability determined by writing Fredholm equation suitable to geometrical optics approximation
13 p2424 A70-28596

Fabry-Perot resonator mirrors with local reflecting inhomogeneities within perimeter of single crystal wafer for application in optically coupled semiconductor lasers
13 p2427 A70-28884

Reflecting surface nonplane parallelism effects on Fabry-Perot interferometers superposition bands contrast and multiplied length measurement accuracy
13 p2408 A70-29366

Fabry resonator X band model with step or slope rimmed mirrors, noting periodical trend of power losses
14 p2558 A70-31320

Shemakha observatory telescope main mirror spherical aberration, coma, astigmatism and light concentration, describing support system and adjustment and control mechanisms
15 p2738 A70-32203

Mirror damage problem with mode locked ruby laser system solved by rough stack mirror fabricated from microscope coverslips
15 p2753 A70-32546

Beryllium mirrors optical performance, describing causes and effects of anisotropy and dimensional instability
16 p2904 A70-33146

Reflecting X ray telescopes with glancing incidence mirror, discussing design, manufacture and testing
16 p2904 A70-33150

IR reflectometer system using Fourier transform spectrometer and ellipsoidal mirror, describing design, construction and performance
16 p2905 A70-33171

Automatic active optic control of alignment and figure of primary mirror of spacecraft-borne telescope with response time stability
16 p2907 A70-33189

Low threshold electron beam pumped CdS lasers with improved Al coated Fabry-Perot mirrors in end-pumped configuration
16 p2928 A70-33642

Laser beam photography by multiple reflections from partially reflecting mirrors
16 p2913 A70-33985

Scanning mirror system for Apollo telescope mount UV spectroheliometer, describing design, fabrication and testing
17 p3083 A70-34764

Primary mirror development problems for large orbiting telescopes
17 p3083 A70-34873

Spaceborne lightweight mirror blanks made from ceramics fabricated from glass crystallization
18 p3263 A70-36559

Cardioid condenser as radiometer mirror objective in low temperature radiometry, describing optical characteristics
19 p3420 A70-37261

Optical Schmidt system shortening with spherical, ellipsoidal and flattened spherical mirrors
19 p3433 A70-38767

Power diffraction losses at mirrors of asymmetric confocal laser interferometers with output coupling apertures
20 p3628 A70-39130

Mirror deformation effect on laser emission angular distribution, estimating output parameters by geometric optics
20 p3642 A70-39741

Thermally induced mirror deformations and wavefront distortions under radially nonuniform heating
21 p3942 A70-40806

Q switched free running mode-locked lasers with cavity mirror consisting of thin glass plates suitable for high power use
21 p3836 A70-40807

Surface contamination and degradation effect on reflectance of evaporated vacuum UV mirrors and temperature control coatings under simulated space environments
21 p3842 A70-40815

Optical devices contaminated mirror surfaces restoration with atomic oxygen from RF plasma by noncontaminating nondestructive oxidation of polymer film
22 p4029 A70-42622

Spheroidal three mirror telescopes distortion involving dioptrics combination
23 p4194 A70-44213

MIS (SEMICONDUCTORS)

MIS varactors applications as nonlinear reactances, discussing charge-voltage characteristics and minority carriers effect
12 p2196 A70-27685

Broadband frequency multipliers optimum efficiency solutions, realizing linear charge-voltage characteristics with MIS varactors
14 p2557 A70-31159

MIS structures with silicon nitride film deposited by RF glow discharge, observing doping increase in epitaxial substrate
17 p3055 A70-35873

Surface density, charge and field effect mobilities for electrons and holes on MIS insulator-semiconductor structure on narrow bandgap HgCdTe
22 p4086 A70-43018

MIS model applied to memory transistor with thin insulator consisting of silicon nitride on silicon dioxide
23 p4172 A70-44197

Tunneling electron and local mode phonon interaction in MIS n-type semiconductors
23 p4231 A70-44916

MISALIGNMENT

Misalignment and eccentricity effect on face seal, discussing leakage dependence on phase angle
[ASLE FICFS PREPRINT 15A] 02 p0308 A70-12171

Fabry-Perot resonator misalignment effect on TEM wave transmission coefficient in gas laser
03 p0492 A70-13749

Mode patterns and losses for laser resonator with identical tilted spherical rectangular reflectors in stable and unstable configurations
04 p0701 A70-15021

Shaft misalignment effect on accuracy of precision digital shaft angle encoders, using test fixture and optical methods
05 p0844 A70-15769

Hydrostatic journal bearing calculation for case of shaft misalignment, deriving linear inhomogeneous equations with symmetrical matrix for pressure
07 p1293 A70-19119

- Electron bombardment ion engine thrust variations, considering effects of electrode misalignment and ion current changes 12 p2291 A70-27808
- Continuous elastic turboshaft flexible journal bearings, analyzing radial misalignment effects on operation [ASME PAPER 70-DE-71] 16 p2918 A70-33521
- Gyro misalignment and encoder quantization effects for strapdown attitude error sources 22 p4040 A70-43588
- Tracking elevation/azimuth errors due to frame misalignment, presenting least squares procedure for determining true bias and misalignment angle and axis 23 p4215 A70-44518
- MISIBILITY**
U SOLUBILITY
- MISFIRES**
U FIRING [IGNITING]
- MISMATCH**

U MISSILE RANGES
MISSILE TESTS
Computer applications in French missile testing center, describing real and delayed time equipment and computations
01 p0057 A70-10798
- Optimal data filtering techniques and hardware for centrifuge testing of missile inertial platforms
[AIAA PAPER 70-405] 10 p1861 A70-24901
- Minuteman 3 Reentry System real time laboratory aging and surveillance test program to evaluate long-term storage effects on equipment behavior
[AIAA PAPER 70-395] 10 p1952 A70-24910
- Weapon Systems Level testing methods and machines application to missiles, manned space flight vehicles and Safeguard System
[AIAA PAPER 70-380] 10 p1862 A70-24923
- Seismic analysis of lunar module impact and missile-earth impact, comparing recorded signal parameters
11 p2118 A70-26748

- Missile aerodynamic characteristics investigation in subsonic low turbulence wind tunnel with three degrees of freedom angular motions
[AIAA PAPER 70-578] 13 p2342 A70-29891
- Army missile command /AMICOM/ plasma jet wind tunnel automatic control system design
16 p2888 A70-33303
- Ground environmental simulation test for captive carrying cycling of air launched missiles
17 p3060 A70-35182
- S band telemetry antenna with electronic tracking and polarity diversity for remote location missile testing
19 p3388 A70-37901
- Missiles aerodynamic coefficients parameter sensitivity from test data, using least squares analysis
23 p4133 A70-44525
- MISSILE TRACKING**
Antitank guided missiles guidance and control systems using optical tracking
01 p0139 A70-11261
- Laser range finding by mobile missile station compared with geodesic satellite telemetry by ground station
02 p0312 A70-12212
- Missile tracer mixture performance control facility noting chamber for pressure measurement during operation
03 p0544 A70-13758
- Missile impact location visual identification by marker system using pyrotechnic aboard to produce dense white smoke detectable to unaided eye, including flight test
03 p0582 A70-14104
- Tracking of goal seeking attack vehicles, discussing error improvement and destination estimating by tracking station observer
11 p2080 A70-26243
- Shipborne day/night star tracker assisting Missile Guidance System monitoring in Atlantic and Pacific Missile Ranges
16 p2905 A70-33156
- MISSILE TRAJECTORIES**
Kalman-Bucy filtering for nonlinear system consisting of missile in flight, discussing state variables values selected by estimator
11 p2025 A70-26221
- Controlled missile reentry trajectory through dense atmosphere, describing digital computer solution of differential equations of motion
12 p2314 A70-27768
- Missile impact and trajectory for water entry with zero angle of attack, including deceleration measuring instrumentation
[AIAA PAPER 70-531] 13 p2387 A70-29039
- Digital computer six degree of freedom wind tunnel separation simulator for air launched missile trajectory analysis
17 p3063 A70-35509
- Air to air missile launch range maximization for plane trajectories and nonmaneuvering targets, discussing optimal fuel burning rate
[AIAA PAPER 70-980] 20 p3668 A70-39549
- Spinning missile gravity induced angular motion for various trajectory portions, considering quasi-steady state assumption validity
[AIAA PAPER 70-968] 20 p3715 A70-39561
- Aerodynamic forces on flexible launch vehicles and missiles in supersonic flight based on first order method, solving boundary value problem for surface velocities
21 p3746 A70-41853
- MISSILE VIBRATION**
Saturn 5 launch vehicle design, role in exploration and anomalous structural vibration and oscillation
[AIAA PAPER 69-1094] 01 p0194 A70-10620
- Dynamical characteristics of variable-mass flexible spinning rocket with internal flow, investigating rigid body motion, elastic displacements and vibrations
09 p1767 A70-23252
- Missile oscillations in plane during pitching moment hysteresis, discussing test coefficients suitability for predicting motion
09 p1606 A70-23258
- Structural incompressible liquid element for discrete linear idealization of missile and propellant vibration analysis
16 p2991 A70-33852
- Ground vibration testing for aircraft and missile flutter prevention
[ONERA-TP-816] 18 p3339 A70-36508
- Discrete element idealization of missile and liquid propellant for vibration analysis, deriving sloshing theory
[SAE PAPER 700847] 24 p4326 A70-45885
- MISSILE WINGS**
U LOW ASPECT RATIO WINGS
MISSILES
NT AIR TO AIR MISSILES
NT AIR TO SURFACE MISSILES
NT ANTIAIRCRAFT MISSILES
NT ANTIMISSILE MISSILES
NT ANTITANK MISSILES
NT BALLISTIC MISSILES
NT CRUISE MISSILES

- NT HAWK MISSILE
NT MINUTEMAN ICBM
NT RAMJET MISSILES
NT SURFACE TO AIR MISSILES
NT SURFACE TO SURFACE MISSILES
NT TALOS MISSILE
RF hazard measuring system for complete guided weapons electromagnetic compatibility tests with instrumented inert device replacing live igniter
03 p0495 A70-14132
- Soviet SS-9 ICBM role in international debates over antiballistic missile, multiple independently targeted reentry vehicles, superhard silos and offensive forces
04 p0760 A70-14501
- Structural reliability of missile and aircraft solid propellant engines, estimating effect of loads variance, geometrical dimensions and mechanical strength
10 p1930 A70-24294
- MISSILRY**
U MISSILES
MISSION PLANNING
Solar and nuclear electric propelled spacecraft applications to planetary and interplanetary missions, considering asteroid survey, out-of- ecliptic, Mercury orbiter, comet rendezvous, etc
[AIAA PAPER 69-1108] 01 p0181 A70-10619
- Mission simulation mathematical modeling technology developed for optimization of experiment program management and operational planning for manned space station missions
[AIAA PAPER 69-1065] 01 p0181 A70-10634
- Mission model construction for power limited systems, discussing flight concepts, propulsion mixes and electric propulsion
01 p0183 A70-10848
- Solar photoelectric power ion propelled probe of asteroid region, describing design and mission planning
[AIAA PAPER 69-1105] 02 p0382 A70-12529
- Martian orbital photographic missions objectives and sensors realizable capabilities, discussing relationships between orbital parameters and imaging systems constraints
03 p0490 A70-13663
- Mission design, spacecraft characteristics, communications and experimental approaches for Viking 1973 Mars Project
03 p0576 A70-14020
- AMPROD /Automated Mission Profile Design/ generating schedules for long duration missions with real cost and time savings
03 p0581 A70-14023
- Apollo spacecraft pyrotechnics on lunar landing mission, considering standard initiator, modular cartridges, noninterchangeability of special purpose devices, postmanufacture indexing and data system
03 p0582 A70-14102
- Interplanetary trajectory selection, discussing transfer orbits, energy considerations, launch window computation, hyperbolic encounters and capture maneuvers
03 p0577 A70-14149
- Experiment selection in orbital program planning based on broad system synthesis, discussing identification and grouping of objectives, critical issues and experimental equipment requirements
[AAS PAPER 69-580] 04 p0749 A70-14652
- Automated parameter search techniques applied to low thrust mission design, stressing trajectories and mission optimization
[AIAA PAPER 69-261] 04 p0736 A70-15404
- Automated mars surface sample return /AMSSR/ mission, discussing Saturn 5 chemical and nuclear approach
[AIAA PAPER 69-1066] 04 p0764 A70-15626
- Manned space stations development, objectives, supply, storage and waste disposal, launching and artificial gravity
05 p0923 A70-16042
- Space programs and future missions assessment based on technical feasibility, considering effects of economic and social factors
06 p1185 A70-17644
- Return to earth abort capability for Apollo missions for various mission phases
[AIAA PAPER 70-94] 06 p1156 A70-18035
- Reentry targeting philosophy for Apollo missions emphasizing premission planning activities and real time targeting decisions, discussing Apollo 10 post-flight results
[AIAA PAPER 70-28] 06 p1158 A70-18149
- Apollo 11 lunar landing mission planning, control and evaluation of launch window and translunar, lunar parking orbit and transearth trajectories
[AIAA PAPER 70-24] 06 p1158 A70-18168
- Viking Mars orbiter/lander mission planning, studying sun, earth and star occultations sensitive mission characteristics
[AIAA PAPER 70-62] 06 p1146 A70-18193
- Apollo 11 premission planning, real time situation and postflight analysis for lunar descent and ascent phases, providing navigation correction capability for Apollo 12
[AIAA PAPER 70-25] 06 p1159 A70-18227

- Outer solar system exploration, discussing swingby and junction missions, Jovian satellite grand tours, mission energy requirements, etc
[AIAA PAPER 70-58] 06 p1147 A70-18229
- Analytic Trajectory Optimization Model to develop computational techniques for low thrust mission analysis
[AIAA PAPER 70-96] 06 p1159 A70-18230
- Short duration manned Mars and Venus exploration mission planning with chemical propulsion and Saturn 5 boosters
[AIAA PAPER 70-59] 06 p1147 A70-18238
- Space probe investigation of comets, discussing feasibility, instrumentation, mission planning, etc
06 p1153 A70-18550
- Nuclear propulsion requirements for manned landing mission to Mars assuming Saturn 5-based operation
07 p1375 A70-18874
- SERT 2 thruster system performance over expected mission parameters, noting operational lifetime excess over mission requirements
[AIAA PAPER 69-235] 07 p1364 A70-19702
- Fluid controlled solid rocket motors design for Mars mission with acceleration level as parameter, discussing mission specifications, system design and component considerations
[AIAA PAPER 69-446] 07 p1365 A70-19707
- Air breathing engines for long range Mach 4 transport, discussing airplane mission profile- engine configuration interface
[AGARDGRAPH-120] 08 p1560 A70-21934
- Premission planning and operational radiation dose limits for manned lunar and low earth orbit missions
08 p1454 A70-21940
- Manned Mars mission planning, discussing technologies and costs for planetary landing
09 p1757 A70-22676
- Manned Spacecraft Center spacecraft development, mission design and planning, flight crew operations for Apollo, discussing spacecraft design principles
09 p1767 A70-23703
- Apollo crew procedures, simulation and flight planning, discussing navigation, guidance and control procedures
09 p1657 A70-23706
- Apollo Program flight control operations personnel premission planning and training, discussing presolution of launch problems and emergencies
09 p1768 A70-23707
- Spacecraft mission planning for trajectory control after establishing mission objectives, trajectory plan and crew timeline for Apollo flights
09 p1725 A70-23709
- Apollo mission planning process, discussing flight schedule evolution from panels, meetings and working groups
09 p1768 A70-23710
- Operational planning for earth resources surveys using spacecraft
09 p1672 A70-23762
- Mass spectroscopy for solar system exploration, discussing ion sources, mass analyzers and ion detectors meeting mission requirements
10 p1942 A70-24612
- Franco-German telecommunication satellite Symphonie mission objectives and system design
[AIAA PAPER 70-406] 11 p1996 A70-25401
- Titan 3 launch vehicles capabilities communication satellites deployment modes, presenting cost and availability data for preliminary mission planning
[AIAA PAPER 70-482] 11 p2121 A70-25451
- Launch vehicle selection, utilization and mission planning and analysis in Comsat programs, discussing INTELSAT I-IV
[AIAA PAPER 70-484] 11 p2002 A70-25489
- Planetology and space mission planning - Conference, New York, October 1967
11 p2110 A70-26026
- Signature theory application to space mission planning and archeological project
11 p2051 A70-26034
- Interstellar exploration mission profiles, considering technical constraints, propulsion modes, environmental hazards, spacecraft communications and control, etc
11 p2112 A70-26065
- Spacecraft propulsion systems selection for particular exploration missions including planets, comets and interstellar space
11 p2112 A70-26066
- Low thrust mission simulation dependence on hardware definition, discussing power plant characteristics, jet velocity and thruster efficiency
13 p2486 A70-28517
- Planetary trajectory handbooks for mission and system analysis covering opportunities for Mercury, outer planets and Mars, contour charts, etc
13 p2486 A70-28525
- Navigation for planetary orbiter and lander missions, considering orbit insertion, trim corrections and capsule descent for poor planetary gravity field model
13 p2448 A70-28706
- Weather forecasting for manned space flights, emphasizing Apollo flights and operational decisions due to forecasts
14 p2606 A70-30557
- Cloud size clear area spacing statistics development for satellite mission and simulation analyses
14 p2609 A70-30598
- Apollo 9 scientific multispectral photography mission, discussing meteorological support aspect of real time planning
14 p2610 A70-30614
- Radiation planning nomogram to display radiobiological effects of dose, onset time and shielding factors for manned space vehicles
15 p2690 A70-31894
- Lunar exploration program based on U.S. antarctic research experience, considering man role, environment, logistics, transportation, economics, etc
15 p2800 A70-32058
- American-German solar probe HELIOS mission parameters for interplanetary and close proximity solar research, discussing spacecraft building and launching
15 p2801 A70-32281
- Space program planning for scientific and application earth satellites, stressing image sensors development
15 p2812 A70-32289
- Mission analysis in system evolution, determining subtasks sequence to accomplish performance goals
15 p2804 A70-32627
- Space based reusable manned/unmanned tug, discussing potential missions, system requirements and auxiliary hydrogen oxygen propulsion system
[AIAA PAPER 70-719] 16 p2964 A70-33533
- NERVA flight engine operating characteristics and reliability requirements for missions, noting conditioning, startup shutdown, reactor cooldown, fuel consumption, etc
[AIAA PAPER 70-676] 16 p2951 A70-33951
- Space station experiments, payloads and activity planning
16 p2983 A70-34067
- Aerospace mechanism design from test laboratory viewpoint, balancing technical, cost and schedule factors with mission objective
16 p2921 A70-34103
- Unmanned flyby missions to Mercury in 1973-1990, discussing scientific objectives and payloads
[AAS PAPER 70-027] 17 p3155 A70-34798
- Subsystem selection integration and technology for space base and planetary mission module /PMM/ of space station program
[AAS PAPER 70-021] 17 p3023 A70-34801
- NASA ten year space station operational concepts, discussing mission planning, crew scheduling and management
[AAS PAPER 70-031] 17 p3176 A70-34804
- M-4 SS launch vehicle capabilities and development schedule for low energy interplanetary missions
17 p3168 A70-35253
- OGOs design evolution with respect to scientific mission requirements
17 p3180 A70-35303
- German monograph on heavy space probes for solar system investigation covering systems analysis, mission success, flight programs, Saturn 5 launch vehicle, etc
17 p3168 A70-35378
- System analysis to determine orbital parameters influence on mission scientific objectives under engineering constraints, using value function
[AIAA PAPER 68-1052] 17 p3172 A70-35648
- Commercial air transport mission payload and range capability analysis, noting on-line flight planning computers
[AIAA PAPER 70-899] 17 p3204 A70-35815
- Comet de Arrest 1976 opportunity mission analysis, considering flyby and rendezvous trajectories and guidance problems
[AIAA PAPER 70-1073] 19 p3513 A70-37426
- Future space missions for observing solar events, magnetospheric problems, cosmic rays and low energy plasma, considering use of multiple satellites
19 p3513 A70-37523
- Mission success model for unmanned space exploration, combining expected data return with computer technique
19 p3527 A70-38838
- Mariner Mars 1971 mission design, discussing objectives, orbit selection, guidance, navigation and sequence analysis
[AIAA PAPER 70-1048] 19 p3527 A70-38863
- Mission planning for 1973 Mariner Venus/Mercury flyby, discussing trajectory and navigation aspects
[AIAA PAPER 70-1049] 19 p3528 A70-38864
- Pioneer-F Jupiter flyby mission planning, considering use of optimum broken plane trajectories to increase launch opportunity and/or payload capability
[AIAA PAPER 70-1050] 19 p3528 A70-38865
- Jupiter swingbys and multiplanet Jupiter swingby trajectory modes for outer planet missions, comparing in terms of passage conditions
[AIAA PAPER 70-1071] 19 p3530 A70-38884
- Future spacecraft mission for short period comets rendezvous, considering trajectory requirements and launch vehicle payload capabilities
[AIAA PAPER 70-1072] 19 p3530 A70-38885
- Manned Mars lander launch-to-rendezvous analysis, using subsequent Venus swingby for mission velocity requirement reduction
[AIAA PAPER 70-1075] 19 p3530 A70-38887
- Spacecraft trajectory initial conditions expressions as parameters dependent functions, applying results to Mars lander mission
[AIAA PAPER 70-1016] 20 p3666 A70-39517
- SERT 2 for testing ion thruster reliability and operational characteristics, discussing design and mission objectives
[AIAA PAPER 70-1124] 20 p3716 A70-40221
- Solar system unmanned exploration decision making, discussing resource utilization, sequence optimization, etc
20 p3710 A70-40335
- Life support systems oxygen generation mode selection based on mission parameters, including duration, crew size, resupply, vehicle leakage, etc
21 p3768 A70-40991
- Waste management for large space stations, discussing removal, venting, utilization, processing techniques, etc
21 p3769 A70-40996
- Mission analysis and trajectory simulation /MATS/ program, discussing computer controls, modular design, integration evaluation
[AIAA PAPER 69-939] 21 p3920 A70-41872
- Apollo lunar surface experiment package-SNAP 27 program, discussing mission profile, design and performance characteristics
22 p4071 A70-43194
- Space shuttle mission and economics, discussing cost effectiveness, capabilities, satellite transportation payloads and traffic forecasts
22 p4127 A70-43505
- Space station mission and configuration concepts, discussing experimental/operational capability, crew assignments, accommodation and module sizing
22 p4111 A70-43517
- Manned space program goals, discussing orbiting observatories, lunar bases, biological and earth resources satellites
22 p4128 A70-43627
- Space station requirements and design, discussing space shuttles, operational personnel, long term effects, logistical systems, functions, etc
23 p4259 A70-44606
- Solar-electric ion propulsion mission analysis and spacecraft designs, discussing thruster, power conditioning, propellant storage and feed, etc
23 p4234 A70-44631
- Apollo spacecraft program evolution, discussing Apollo 13 accident, command and service module modifications, oxygen tank design, mission objectives, etc
23 p4245 A70-44640
- Orbital space station utilization planning as international laboratory, discussing industry role, experiment program goals, etc
23 p4260 A70-44650
- Helios solar probe for automated spacecraft exploration of interplanetary space near sun, considering design, mission planning and U.S.-German cooperation
23 p4245 A70-44689
- Automated and manned spacecraft design, discussing mission objectives and present and potential applications
23 p4264 A70-45003
- Jupiter Orbiting Vehicle for Exploration system for gathering Jupiter atmosphere, magnetic, radiation, gravitation, temperature, topography and interplanetary data
23 p4264 A70-45010
- Space vehicle for interstellar flight, discussing propulsion concepts, mission implications and international cooperation
23 p4254 A70-45011
- Manned earth orbital space astronomy instruments, facilities and research objectives
24 p4415 A70-45825
- Orbital space station program, discussing common module design, support, space shuttles and objectives
[SAE PAPER 700755] 24 p4415 A70-45852
- Automated mission requirements for outer planets, discussing flyby spacecraft, orbiters, atmospheric entry and grand tour missions
[AIAA PAPER 70-1246] 24 p4411 A70-45919
- Skylab mission in 1972, describing orbital workshop configuration and three man crew integration for operational experiments
[AIAA PAPER 70-1328] 24 p4417 A70-45939
- Planetary exploration for solar system origin and evolution, identifying outer planet mission scientific values
[AIAA PAPER 70-1244] 24 p4411 A70-45962
- Long life spacecraft design and reliability based on marine practices and advanced system technology project, considering grand tour outer planets mission
[AIAA PAPER 70-1247] 24 p4412 A70-45964

MITOCHONDRIA

Book on lunar rocks covering pre-Apollo lunar scientific knowledge, Apollo and future lunar mission planning, lunar mineralogy, petrology and geochemistry, etc

24 p4412 A70-46025

MITOCHONDRIA

Gamma-aminobutyric acid effect on oxidative phosphorylation of rabbit and rat brain mitochondria, noting dependence on ionic concentration, temperature and amount of additions

01 p0019 A70-10509

Positive Na and K ion effects on mitochondrial respiratory control, O uptake and adenosine triphosphate activity in rat liver

01 p0026 A70-11063

Enzyme beta-hydroxybutyrate dehydrogenase concentration in mitochondria from bovine and sheep liver

03 p0430 A70-14198

Critical oxygen supply of cerebral mitochondria and intercapillary oxygen transport

10 p1821 A70-25080

Electronmicroscopical structure of laser irradiated Garding-Passy melanoma cell organelles, noting mitochondria damage

18 p3224 A70-36636

Senescent *Drosophila melanogaster* flight muscle electron microscopic examination showing mitochondria in stages of degeneration

20 p3574 A70-40075

Oxidative phosphorylation and oxygen intake during circulatory hypoxia in mitochondria of liver and brain in rats subjected to acute ischemia

23 p4145 A70-44315

Oxidative phosphorylation and oxygen consumption during hypoxia in mitochondria preparations and tissue homogenates from white rat liver

23 p4146 A70-44316

Monovalent cations active transport model in mitochondria, noting membrane potential as driving force and ion pump omission

24 p4304 A70-46230

MITOSIS

Temporary mitotic activity depression with decrease in aberrant mitoses observed in mice intestinal epithelium cells after exposure to 50 Mev proton doses

03 p0423 A70-13708

Chronic gamma irradiation effects on bone marrow mitotic activity and chromosome aberrations in dogs

09 p1614 A70-22083

Temporary mitotic activity depression with decrease in aberrant mitoses in mice intestinal epithelium cells after exposure to 50 Mev proton doses

11 p1985 A70-25508

Chronic gamma irradiation effects on bone marrow mitotic activity and chromosome aberrations in dogs

15 p2685 A70-32679

Mitotic activity and aberrant mitoses frequency in mice corneal and duodenal epithelium cells under fast fission neutron irradiation

17 p3026 A70-35319

MIXED CRYSTALS

Optical phonons in mixed sodium potassium tantalate crystals as function of temperature and composition, using IR and Raman spectra

03 p0542 A70-14002

MIXED FLOW

U MULTIPHASE FLOW

MIXERS

Germanium, silicon and gallium arsenide point contact and Schottky barrier diodes as submillimetric wavelength detectors and mixers

11 p2017 A70-25736

Passive coupling of spatial six-element mechanical mixer with rotary pairs as function of element axial position and dimensions

11 p1983 A70-25933

MIXING

NT COLLOIDING
NT COMPOUNDING
NT DISSOLVING
NT HOMOGENIZING
NT LAMINAR MIXING
NT SIGNAL MIXING
NT SUSPENDING [MIXING]
NT TURBULENT MIXING

Multiphase two dimensional mixing and combustion of flow fields suspended in gaseous medium for propulsion systems problems, obtaining governing equations

[AIAA PAPER 70-145] 06 p1181 A70-18175

MIXING CIRCUITS

Nonlinear distortion in switching transistor mixer predicted by modifying analysis used for diode modulator and mixer circuitry

02 p0268 A70-12423

Schottky barrier diodes design for wideband radiometer mixers to obtain optimum noise performance and broadband operation by DC bias application

03 p0457 A70-13968

Self excited microwave mixer and transmitting oscillator using Gunn diode applied to short distance Doppler radar

05 p0822 A70-16678

Microwave mixer design to increase dynamic range applied to communications and video systems

07 p1243 A70-20216

Cross modulation due to nonlinearity and linear cross modulation due to local oscillator pulling in FET FM receiver, discussing mixer operating points

08 p1460 A70-20818

Diode mixer analysis for arbitrary I-V characteristics and commensurate levels of converted signals, using modulation characteristics method

20 p3588 A70-40147

Low noise GaAs Schottky barrier beam lead mixer and chip style diodes, discussing fabrication and performance

22 p3998 A70-43333

Integrated 7 GHz small signal microwave balanced mixer, using microstrip transmission lines

23 p4168 A70-43777

MIXING LENGTH FLOW THEORY

Mixing length relationship in Prandtl theory for turbulent channel and pipe flow, deriving universal velocity distribution law

02 p0277 A70-11911

Compression wave mechanism of supersonic combustion controlled by mixing, discussing multiple injector design, thermal compression and geometry effect

02 p0399 A70-12041

Extended mixing length method for computing turbulent shear stress distribution required in calculating two dimensional incompressible turbulent boundary layer

02 p0282 A70-12333

Mixing length theory improvement to calculate turbulent boundary layers based on velocity profiles

02 p0284 A70-12342

Dissimilar coaxial axisymmetric jets confined laminar mixing obtained from numerical solution of boundary layer equations, considering binary, isothermal and nonreacting system

04 p0621 A70-15579

Prandtl mixing length and effective Schmidt number distributions from wall jet and wake data to predict film cooling

06 p1035 A70-17688

Isoenergetic mixing and reattachment processes of two dimensional supersonic turbulent separated flow, modeling mixing process by constant pressure theory [AIAA PAPER 70-108]

06 p1037 A70-18039

Elastic coatings effect on turbulent friction using turbulence flow theory based on mixing length concept

08 p1483 A70-21227

Solid particles or liquid drops admixture effect on propagation of inhomogeneous turbulent gas jet, using Prandtl mixing length theory to estimate pulsation velocities

12 p2213 A70-28218

Collisionless plasmas strong turbulence in terms of mixing length and Hamilton-Jacobi theories

13 p2458 A70-28562

Turbulent boundary layer characteristics on simple shapes in hypersonic flow, using mixing length theory and eddy exchange coefficient

14 p2564 A70-30262

Turbulent boundary layer instability on rotating cylinder in axial stream, correlating mixing length to Richardson number

15 p2722 A70-32372

Turbulent kinetic energy equation for determining turbulent flow fields applied to free mixing problem of constant density streams

16 p2894 A70-33856

Solid particles or liquid drops admixture effect on propagation of inhomogeneous turbulent gas jet, using Prandtl mixing length theory to estimate pulsation velocities

20 p3612 A70-40091

Compressible hypersonic turbulent boundary layers solution by finite difference method, relating mixing length to velocity profile shape factor

20 p3684 A70-40269

Turbulent near wake of symmetrical airfoil, determining universal constant in mixing length formula for inner wake

20 p3559 A70-40276

Upstream disturbances propagation during hypersonic flow boundary layer interaction

21 p3748 A70-42205

Turbulent boundary layer velocity profiles and shear stress distributions computation based on mixing length approach

23 p4182 A70-44574

MIXTURES

NT ADMIXTURES
NT AEROSOLS
NT AQUEOUS SOLUTIONS
NT BINARY FLUIDS
NT BINARY MIXTURES

NT SOLUTIONS

Digital control valve for high speed aerospace blending, considering propellant and cryogenics applications

06 p0989 A70-18602

Vapor-liquid equilibria predictions for multicomponent cryogenic mixtures, applying to correlation selection in critical and low temperature regions

14 p2616 A70-31015

Dynamic melt properties of polymer blends, using orthogonal rheometer measurements

22 p4058 A70-43076

MOBILE LOUNGES

Mobile lounges and airport productivity concepts for optimal handling of passengers at airport terminal [AIAA PAPER 70-918]

17 p3064 A70-35830

MOBILITY

NT ELECTRON MOBILITY

NT HOLE MOBILITY

NT IONIC MOBILITY

Dopant effect on dislocation mobility in elastically loaded silicon crystal using internal friction and modulus defect measurements

11 p2099 A70-26394

Soft metal and dilute alloy dynamic yielding, describing high dislocation mobility effects on mechanical properties

17 p3191 A70-35459

Mechanical structure dynamic response to vibration environment, using mobility method analysis

23 p4269 A70-44334

MODAL RESPONSE

Finite element method for calculating natural frequencies and mode shapes of pretwisted cantilever plates assembly of flat triangular elements

02 p0384 A70-11859

Natural mode shapes of longitudinal oscillations and resonant frequencies of thin rods of constant curvature and rings with slit, noting use for crack determination

03 p0588 A70-13283

Optical waves in round metallic and dielectric waveguides calculated using geometrical optics and model analysis for anisotropic wall impedance model

04 p0652 A70-15396

Avalanche diodes and associated microwave circuits power generation in terms of IMPATT, TRAPATT, parametric, space-charge feedback and thermal modes

10 p1847 A70-23887

Natural frequencies and mode shapes of vibrating shells and shell combinations determined using variational finite difference method in conjunction with Hamilton principle

10 p1961 A70-25056

Modal expansion method applied to thin deformable primary mirror surface control for orbiting astronomical observatory

13 p2403 A70-28427

Transmission line modal analysis for nonlinear polarizability in optical and quasi-optical waveguides

21 p3784 A70-40564

Laser and quasi-laser systems modulation for wide spectrum communications, discussing global potentials and application as low cost satellite links 08 p1459 A70-20802

He-Ne laser emission modulation by varying discharge current, studying gas pressure effect and role of ballast resistor 09 p1695 A70-22411

Inertialess nonlinear quadrupole output of oscillations modulated by normal noise, analyzing correlation functions 09 p1637 A70-23159

Review of 1969 London International Conference on Digital Satellite Communication session covering modulation, synchronization and coding [AIAA PAPER 70-464] 11 p1997 A70-25409

Multiplicative modulation noise of helium-neon traveling wave laser amplifier at micron wavelength 11 p2020 A70-26816

Spectral analysis of LF pulses from defects obtained by modulation method of monitoring using eddy currents with superposed converter 13 p2404 A70-28660

Optical absorption due to imperfections in CdS by sensitive differential technique using laser excitation 13 p2430 A70-29708

Soviet monograph on modulation of cosmic rays in interplanetary space, covering anisotropic diffusion approximation, diffusion equation, Forbush effects energy spectrum, etc 16 p2971 A70-32911

Resonant interaction and instability produced by nonlinear coupling of modulated wave and LF mode, stimulating self focusing of plasma waves 16 p2958 A70-33285

Pulsars PSR 1451-68, 1749-28 and 2045-16, discussing modulation effects associated with second periodicity 18 p3314 A70-36334

Communication modulation systems unified description by conversion and indication matrices 18 p3229 A70-36942

Residual solar modulation of relativistic cosmic ray nuclei in galaxy over eleven years, observing magnitude at solar activity minima 18 p3309 A70-37009

Monochromatic radiation from laser modulated electron beams 19 p3444 A70-37572

Analog communication optimal nonlinear modulation scheme design for large SNR through transformation into inner product functions 20 p3587 A70-39973

Diode mixer analysis for arbitrary I-V characteristics and commensurate levels of converted signals, using modulation characteristics method 20 p3588 A70-40147

Outer space galactic cosmic rays energy spectrum and modulation region boundary determination, using meteorite observations 23 p4236 A70-44050

Multiplicative modulation noise of helium-neon traveling wave laser amplifier at micron wavelength 24 p4317 A70-45188

MODULATORS
 Palladium alloy transmodulator for gas chromatograph, demonstrating sensitivity gain for thermal conductivity and ionization cross section detectors 03 p0442 A70-14325

Modem selection for satellite communications system, considering bandwidth and power constraints, propagation characteristics, point-to-multipoint operation, etc 08 p1459 A70-20807

Iterative solution for balanced diode modulator performance, obtaining output spectrum using Fourier transformation 10 p1849 A70-24232

Communication satellite PSK modulator-demodulator /modem/ implementation requirements and design for optimal performance 10 p1835 A70-24336

Modulation-demodulation system for multiple access tactical satellite communication 12 p2187 A70-27915

Power ferrite modulator and switch for SHF band based on Faraday rotation principle 12 p2199 A70-28000

Laser acoustooptic quartz modulators inserted inside He-Ne and argon cavities for internal power extraction 13 p2430 A70-29705

Elongation characteristics of modulation type charged particle traps and analyzers, discussing ions and electrons trapping 18 p3307 A70-36171

He-Cd pulsed laser mode locking at 4416 and 3250 A using intracavity acoustic loss modulator 18 p3266 A70-36314

Si controlled thyristors applied to pulse modulators in ionospheric stations 18 p3233 A70-37043

Radar transmitters modulating circuits protection with microsec rapidly by power elimination, discussing electronic switches 21 p3792 A70-41987

Signal controlled microwave modulator as filter or attenuator, using rectangular waveguide and varactor diode switching 22 p3995 A70-42718

Soviet book on modulation-type frequency converters based on electromagnetic and semiconductor elements covering modulators static and dynamic characteristics, optimal operating conditions, etc 24 p4319 A70-45626

Output signal/quantization noise ratio, dynamic range and transmission error effects for syllabically companded delta-sigma modulator systems 24 p4320 A70-46152

Water electrolysis module long term operation in providing oxygen for life support systems 05 p0804 A70-15843

F-111 crew escape module, describing main parachute and pyrotechnics severance improvements, parachute deployment and inflation, etc [AIAA PAPER 70-1210] 21 p3751 A70-41807

MODULUS OF ELASTICITY
 Annealing effects on cold rolled titanium sheets, noting changes in Young modulus and characteristics of recrystallized titanium 01 p0124 A70-11620

High strength high modulus carbon fibers for use in structural reinforced plastics, describing carbonizing and pyrolysis processes 02 p0320 A70-11856

Unidirectional composite materials properties, discussing stiffer filaments effect on Young modulus and shear coupling constant relating shear strain to longitudinal strain 03 p0587 A70-13128

Carbon effect on high temperature elasticity modulus and long term hardness of Nb, indicating diffusion enhancement and counteractive Zr addition 03 p0509 A70-13252

Complex Young modulus of plastics during flexural vibration, discussing deformation of viscoelastic bodies and test results of various plastics [ONERA-TP-715] 03 p0487 A70-13645

Elasticity theory of orthotropic materials applied to steady rotation of long cylindrical tubes of filament reinforced plastics 03 p0602 A70-14331

Energy balance relations for elastic material with different elastic moduli in two regions of deformation space 05 p0925 A70-15824

Torsion testing apparatus for refractory materials at 2400 C, measuring applied torsion moment, twisting angle and second order modulus of elasticity 05 p0825 A70-15881

Young modulus anisotropy and recrystallization texture during annealing in cold rolled Ti sheets using Fourier analysis 05 p0862 A70-16200

Structure and interstitial impurities effects on Nb modulus of elasticity at normal and high temperatures, noting rolling 05 p0866 A70-17040

Materials stress rupture strength and elastic constants at liquid hydrogen temperature, describing method and facility 05 p0955 A70-17076

Deformation pattern, interstitial impurities and alloying elements effects on temperature dependence of elasticity modulus of Nb and alloys 06 p1088 A70-17659

Dynamic elastic modulus of graphites and composites measured as function of temperature using thin rod resonance method 06 p1070 A70-18447

Saint Venant principle in cantilever sandwich beams under two statically equivalent load systems, considering Young moduli effects 07 p1406 A70-19328

Isotropic elastic body occupying half plane assuming elasticity coefficients of certain class 07 p1407 A70-19376

Vibrating composite beam test method for determining complex dynamic modulus of viscoelastic materials over broad frequency and temperature ranges 07 p1320 A70-19955

Complex modulus measurement for rigid linear viscoelastic materials over audio frequency spectrum by harmonic end displacement ratio method 07 p1413 A70-20044

Elastoplastic bending of inhomogeneous rectangular plates with modulus of elasticity and yield stress varying over plate thickness 08 p1583 A70-20530

Modulus of elasticity of fiber glass reinforced plastic under transverse bending as function of length-to-height ratio in laminates 08 p1526 A70-20532

Fiberglass reinforced plastics creep behavior under axial compression, studying time dependence of elasticity modulus and Poisson coefficient 08 p1526 A70-21174

Microphotometric spectral reflectivity correlation to static Young moduli of carbon and graphite yarn filaments as optical testing method 08 p1497 A70-21350

Variable modular elasticity theory demonstrated for anisotropic body subjected to plane stressed state, deriving expression for potential energy of deformation 09 p1769 A70-22152

Stress distribution in shells of revolution with variable elastic moduli, considering material rigidity and strain state 09 p1781 A70-23286

Amplitude dependence of Young modulus defect in metals during large stress HF oscillations 10 p1956 A70-24247

Dynamic shear modulus and depth of dominant layer of vibrating elastic medium, assuming foundation as isotropic stratum on rigid bed 10 p1957 A70-24481

Processing temperature effects on breaking strength-modulus relation for carbonized acrylic fibers 10 p1907 A70-24533

Resonant frequencies and Young/shear moduli of unidirectional graphite epoxy composite beams under high modes of vibration 11 p2136 A70-26082

Length effect on modulus determination test for thin laminated tube under combined loading using shell theory 11 p2136 A70-26086

Elastic moduli of fiber reinforced composites calculated, deriving reinforcement factor in Halpin-Tsai equation from volume fraction 11 p2070 A70-26087

Dopant effect on dislocation mobility in elastically loaded silicon crystal using internal friction and modulus defect measurements 11 p2099 A70-26394

Anisotropic fiber reinforced composites elastic moduli determined by analytical matrix method 11 p2141 A70-26488

High modulus graphite fiber structure using electron beam 11 p2071 A70-26845

Elastic moduli and damping coefficients for glass- and boron-epoxy beams determined from resonant frequencies and bandwidths during lateral forced vibrations 12 p2253 A70-27120

Complex moduli of isotropic viscoelastic composites from elastic moduli 13 p2511 A70-28735

Ni and Ni alloys elastic properties relationship with ferromagnetic and magnetostriction effects, determining modulus of elasticity for wide temperatures and heat treatment

13 p2432 A70-28760

Laminated composite materials dynamic elastic properties, outlining resonant frequency effect on apparent Young modulus

13 p2515 A70-29467

High temperature elastic moduli of slender polycrystalline aluminum rods with elastic waves generated by Q switched laser energy

14 p2595 A70-30638

Book on high modulus fibers and composites providing data for preparation, microstructure, structure and properties

14 p2598 A70-31315

Fiber reinforced viscoelastic composites complex elastic moduli derivation

15 p2816 A70-32003

High temperature elastic moduli in polycrystalline Al rods from propagation velocity of elastic waves generated by Q switched laser

[SESA PAPER 1641]

15 p2759 A70-32304

Activation energy for creep at intermediate temperatures, allowing for elastic modulus change

16 p2991 A70-33790

Beta-Ti and Ti-Cr single crystals elastic moduli, determining λ ratio temperature dependence

17 p3115 A70-34380

Longitudinal shear modulus of unidirectional fibrous composite, involving series solution of Laplace equation

17 p3183 A70-34564

Plastic materials Poisson ratio and Young modulus measurements by triaxial compression method

17 p3089 A70-35048

Graphite fibers made from polyacrylonitrile yarn examining density-Young modulus relationship

17 p3127 A70-35149

Viscoelastic materials cut growth, discussing strain, fracture and modulus of elasticity dependence on temperature variations

17 p3146 A70-35220

German monograph on stress and displacement in plane elastic circular rings, disk strips and wedges, considering single load distributions

17 p3189 A70-35370

Graphite modulus of elasticity as function of temperature, considering effects of moisture content in pores

18 p3278 A70-36470

Nonlinear elasticity law for elastic moduli of plastics

18 p3344 A70-36947

Hydrostatic pressure derivatives of adiabatic elastic moduli of single crystal zirconium, noting high temperature Gruneisen-thermal expansion deviation

19 p3486 A70-37763

Carbon effect on high temperature elasticity modulus and long term hardness of Nb, indicating diffusion enhancement and counteractive Zr addition

19 p3453 A70-38470

Graphite filament composite structure shear strength decrease with modulus increase, examining fiber microstructure effect on interlaminar properties by short beam shear test

20 p3654 A70-39206

Thermal stress and changes in modulus of elasticity and expansion coefficient effects on dynamical properties of turbine disks at high temperatures

20 p3721 A70-39783

Composite material dynamic properties, discussing modulus and damping during constant strain rate, viscoelasticity, fracture strength and high loading tests

20 p3731 A70-40048

Nonhomogeneous elastic cylinder under internal pressure with modulus in terms of Fermi-Dirac distribution function series, discussing fibers rigidity and modulus change

20 p3731 A70-40052

High strength and modulus continuous graphite fibers from pitch, describing production process from asphalt and specifications

21 p3842 A70-40732

Thermomechanical theory for elastic material with different moduli in tension and compression, noting heteroresistance

21 p3937 A70-41428

Free vibrating reed apparatus for polymer low temperature internal friction and Young modulus measurements, discussing polystyrene properties

21 p3827 A70-41464

Novozhilov complex transformation method extended to Timoshenko theory of elastic shells constructed with allowance for transverse shear deformation

21 p3941 A70-42237

Compatibility equations in superelastic domain for permanent deformation hypotheses

22 p4114 A70-42611

Dynamic elastic moduli of model two phase continuous composites, using polymer and metallic foams

22 p4059 A70-43077

Ultrasonic wave velocity measurements for flaw detection and modulus of elasticity of carbon-carbon composites

22 p4047 A70-43519

Numerical solution of first boundary value problem of elasticity theory involving biharmonic stress function relating to rim loads

23 p4275 A70-44942

High modulus carbon fibers production and properties describing polymer chains intermolecular structuring by pyrolysis and strength increase by fibers stretching at 2700 C

24 p4366 A70-45166

Oscillating pendulum equipment for nondestructive material tests, determining longitudinal and transverse elastic moduli of specimen

24 p4338 A70-45738

MOHR CIRCLES

U FRACTURE MECHANICS

MOIRE EFFECTS

Epitaxial PbSe films formation mechanism-defect structure relation using moire rotation method, discussing elastic strains, dislocations, boundary formation, etc

01 p0155 A70-10182

Optical spatial amplitude filtering techniques application to moire fringe patterns processing

01 p0058 A70-11060

Strain distribution measurement in plastically deformed region around crack tip in metals using moire grid and optical interference

03 p0513 A70-14019

Basic equations governing optical properties of telecentric lens systems for moire analysis, discussing suitability for stress analysis

07 p1248 A70-19238

Lens effects applied to measurement of stresses on plane transparent models in photoelastic analyses, visualizing stresses from moire fringes

07 p1409 A70-19746

Green and Cauchy deformation tensors determined from moire fringe pitch and angle measurements, deriving equations by specimen and master grid geometries indicial representation

[ASME PAPER 69-APMW-21]

08 p1591 A70-21462

Tensile and compressive strain measurements close to weld deposits, using moire fringe technique and mismatch grating

10 p1890 A70-24591

Deformed grating frequency multiplication by filtering in Fourier plane of lens, forming moire pattern in image plane by mechanical interference

10 p1890 A70-24592

Grid shadow moire method to measure displacement contours of large plates, discussing sensitivity changes

11 p2131 A70-25589

Profile plane state of stress in wedge with and without external notch using combined photoelastic analysis and moire method

11 p2131 A70-25591

Optical filtering applied to moire method for measuring small structural strains

11 p2131 A70-25595

Moire-holographic technique for deformed plane spatial displacements determination, describing diffraction patterns generation and stress analysis

11 p2140 A70-26487

Moire theory applied to direct strain measurement methods based on light diffraction

11 p2058 A70-26835

Strain measurement over large steel plate surface ground to reasonable flatness and in welded joints by applying moire method

11 p2061 A70-26836

Surface contours generation by Moire patterns

12 p2235 A70-27753

Hologram interferometry using moire method to determine bending moments of object surface

13 p2409 A70-29474

Holographic interferometry for moire strain analysis, discussing theory and applications

16 p2904 A70-33149

Book on elasticity theory covering end effects, Saint Venant principle, edge and screw dislocations, moire method, thermoelasticity, cavity and inclusion effects, Muskhelishvili methods, etc

17 p3183 A70-34603

Normally loaded thin plate displacements, bending moments and stresses determined by hologram interferometry and indirect moire and superposition of grilles

17 p3085 A70-35011

Combined lens-hologram system for strain measurements by moire technique

17 p3087 A70-35024

Shadow moire method for comparing diffusely reflecting component against holographically recorded master shape, noting turbine blade measurement

17 p3088 A70-35025

Bent plates strain analysis using in-plane moire method for small and large deflections

19 p3535 A70-37383

Welded joint strain measurement by grating etching and moire fringe technique

19 p3428 A70-38513

Strain analysis by moire technique, using triangular and square root of 2 gratings

19 p3432 A70-38720

Light intensity distributions within successive slits imaged by transmission gratings, using theory for spatial moire fringe blurring

23 p4217 A70-43819

Moire technique application to fracture toughness tests on Zr alloys, measuring crack opening displacements and plastic flow beneath notch

23 p4208 A70-44914

MOISTURE

Moisture absorptivity and hydrolytic stability effects on operational parameters of gas turbine engine lubricants

06 p1075 A70-17222

Moisture effect on fatigue crack propagation and fracture path through microstructure of 300-grade maraging steel

13 p2432 A70-28607

Moisture induced failure of glass-resin composites at interface, discussing water adsorption, crack propagation, wet strength and nonsilicate reinforcements

16 p2937 A70-33373

Aqueous stress corrosion dependence on microstructural features of Ti alloys, using optical and electron microscopy and X ray diffraction

17 p3113 A70-34370

MOISTURE CONTENT

NT ATMOSPHERIC MOISTURE

Venusian atmosphere water content determined by airborne interferometer

02 p0377 A70-12554

He-Ne laser emission attenuation coefficient relation to water content of artificial fogs for 0.63, 1.15 and 3.39 microns

06 p1079 A70-17209

Atmospheric integral moisture content determination from thermal radio emission measurements by Cosmos 243 satellite

07 p1329 A70-19649

Balloon-borne device for analyzing atmospheric carbon dioxide, moisture and methane, using cyclic analysis by gas chromatography

11 p2052 A70-26371

Atmospheric hemispheric general circulation model numerical time integration with moist processes and uniform earth surface

12 p2262 A70-26882

Atmospheric optical thickness from radio telescopic measurements of wave absorption at millimeter wavelengths, showing dependence on lower atmospheric moisture content

14 p2546 A70-30127

Atmospheric moisture balance solution for altitude dependent vertical velocity and turbulence coefficient, considering cloud water content and boundaries height calculation

14 p2601 A70-30137

Visual reflectance of wet soils, attributing darkening to internal reflection of radiation in water layer enveloping soil particles

14 p2577 A70-31236

Visible polarization signature for remote sensing of soil surface moisture, noting invariance to partial shadowing in plowed or rough soils

15 p2724 A70-31667

Radar and DC pulse signatures of multiple reflection from dry, damp and wet earth for vertical and horizontal polarization

16 p2861 A70-32977

Graphite modulus of elasticity as function of temperature, considering effects of moisture content in pores

18 p3278 A70-36470

Water separation index modified (WSIM) test for jet fuel surface active materials in relation to filter/separator performance

[SAE PAPER 700279]

18 p3300 A70-36815

Atmospheric moisture content vertical profile from terrestrial radiation measurements, using statistical regularization procedure

19 p3460 A70-37418

Uncoated quartz twin crystal microbalance for monitoring water vapor content of respiratory gases

19 p3368 A70-37844

Optical hydrometer measuring water vapor content in vertical atmosphere column, using interference filters and thermoelectric sensitive element

20 p3625 A70-39027

Cloud structure, atmospheric water vapor and liquid water contents from passive ground based microwave spectrum measurements

21 p3846 A70-40906

Apollo 11 lunar material water content and H and C isotope abundance, examining changes in deuterium and O by solar winds

21 p3774 A70-41570

Initial water content on moon implied from hypothetical falling temperature lunar accretion as original earth satellite
22 p4102 A70-42954

MOISTURE DETECTORS
U MOISTURE METERS
MOISTURE METERS
NT HYGROMETERS
NT PSYCHROMETERS
Moisture detector for evaluating trapped water effects in thermal insulation, describing equipment and test procedure
10 p1891 A70-24829

MOL [ORBITAL LABORATORIES]
U MANNED ORBITAL LABORATORIES
MOLABS
U LUNAR MOBILE LABORATORIES
MOLDAVITE
Glassy drops identity and moldavites sculpturing origin in Pannonian sediments in southern Moravia
05 p0916 A70-16838

MOLDING MATERIALS
Bag molding process for molding laminates of reinforced preimpregnated material containing thermosetting resin
05 p0856 A70-16612
Matched die molding technology working principles, mat materials, mold taper, preforms, etc
05 p0856 A70-16613
Preimpregnated materials processing, discussing molding, resin-reinforcement, unidirectional materials, ablative applications, mechanical data and air-frame uses
05 p0874 A70-16614
Optimum composition of sand-bentonite materials for aluminum alloy casting in molds compacted by high pressure
08 p1506 A70-21137
Nickel base alloy as die material for creep forming titanium
11 p2060 A70-26424
Molding procedure to orient filaments relative to loads for optimizing structural component/compressor blades/ of filament reinforced composite
13 p2417 A70-28663
Thermal stresses and curing in electronic modules transfer molding, discussing various design test models
13 p2420 A70-29252
Transfer molding process in fabrication of electronic modules components, emphasizing criticality and unfavorable characteristics
13 p2420 A70-29253
Internal stresses in transfer molding of electronic modules by photoelastic technique, discussing component failure
13 p2420 A70-29254
Transfer molding of electronic modules, discussing materials for evaluating selection and processing guidelines
13 p2421 A70-29255
Anisotropic composite materials comprised of B and graphite fibers in polymer matrix, discussing precision molding technologies
[ASME PAPER 70-GT-126] 18 p3264 A70-36852

MOLDS
Al solidification in direct chilling molds effect on as-cast structure, analyzing heat removal, casting rate and application of water to outgoing ingot
02 p0316 A70-12298
Matched die molding technology working principles, mat materials, mold taper, preforms, etc
05 p0856 A70-16613
Mold canting effects on nonporosity of Al alloys flat castings noting decreased metal losses
08 p1517 A70-21134
Graphite shell molds for Al castings mass production
08 p1505 A70-21135
Thermal interaction between casting and mold at beginning of cooling using mathematical model for temperature field
08 p1506 A70-21139
Heat exchange during solidification of castings in molds, studying thermal properties effect for achieving constant mold surface temperature
08 p1506 A70-21141
Solidification thermal conditions during Ti casting by melting out patterns in graphite molds, investigating heat accumulation coefficients in molds
08 p1506 A70-21142
High service temperature glass reinforced premix compound on Glastic grade electrical laminate, discussing optimum molding and applications
16 p2936 A70-33356
Matched-die compression molding of complex shape structures from composite materials
[SAE PAPER 700751] 24 p4348 A70-45874

MOLECULAR ABSORPTION
Jupiter Red Spot continuous spectrum intensity distribution and methane/ammonia absorption between 3300-6500 A
02 p0374 A70-12427

Troposphere microwave transmission factor determined from dispersion and attenuation caused by water vapor isolated molecular resonance
02 p0261 A70-12593
Molecular vibration spectra from inelastic interaction between electrons and absorbed molecules at metal-vacuum interface
09 p1732 A70-22904
Air polluting sulfur dioxide and nitrogen dioxide remote sensing based on radiation molecular absorption using long line correlation spectrometer
20 p3633 A70-39793

MOLECULAR BEAMS
Particle velocity distributions in low density supersonic jets measured by molecular beam sampling technique and multidisk velocity analyzer
02 p0276 A70-11849
Differential elastic scattering cross section of Ar nozzle beam in nitrogen considered with rainbow effect in determining intermolecular potential well depth
02 p0344 A70-12722
Molecular beam laser short term frequency instability found dependent on laser and measuring device noise
03 p0455 A70-13091
Nitrous oxide molecular beam reflection and dissociation on tungsten surface at high temperatures from angular distribution measurements
06 p1004 A70-17493
Molecule spatial and velocity distributions of supersonic molecular beams, measuring scattering cross sections of He and Ar on noncondensable gases
06 p1043 A70-18252
Intensity measurements of molecular beams skimmed from nearly inviscid nitrogen and Ar free jets, interpreting beam attenuation in terms of collisional models
06 p1043 A70-18254
Cold molecular beam of helium impinging on LiF or Si crystals investigated for gas-surface interactions, using time of flight method
06 p1043 A70-18255
Nitrogen molecule-tungsten surface interactions, computing trajectories and accommodation coefficients for various temperatures by equations of motion
06 p1110 A70-18262
Velocity distributions of incident and reflected Ar beams, determining partial energy accommodation coefficients for reflection from copper and carbon dioxide deposited surfaces
06 p1111 A70-18264
Time of flight spectroscopic measurements in arc heated supersonic molecular beam using algebraic relations, sensing modulated beam by Orbitron type detector
06 p1111 A70-18266
Molecular He and Ar nozzle-type beams scattering from room temperature LiF crystal surfaces, measuring particles flux and speed distributions
06 p1111 A70-18267
Momentum transfer from neutral nitrogen molecules to solid surfaces measured for various incident beam molecule energies
06 p1112 A70-18272
Metastable diatomic N beam scattering from Teflon and Cu surfaces measured for velocity and angular distributions
06 p1112 A70-18273
Ar beam scattering and UV radiation from glass target surface with adsorbed gas layer
06 p1112 A70-18274
Supersonic molecular free jets using electron diffraction technique, discussing vibrational and condensation states
06 p1044 A70-18301
Molecular beam continuum model to determine structure of shock waves in diatomic gases, comparing calculated profiles with measurements in nitrogen
06 p1050 A70-18338
Crossed molecular beam study of reactive asymmetry of oriented methyl iodide molecules reacting with Rb, accounting for observations with hard sphere model
07 p1225 A70-20051
High and medium energy molecular beams - Conference, Cannes, July 1969
07 p1339 A70-20101
Atomic and molecular beams produced by nozzle beams aerodynamic acceleration, discussing condensation effects, internal energy, scattering cross sections, etc
07 p1341 A70-20102
Skimmer interaction influences on nozzle beam production explaining intensity maxima, proposing model assuming normal shock across skimmer mouth
07 p1341 A70-20103
Supersonic molecular beam source operation, discussing dominant degradation factors and nozzle beam generation intensities and energies improvement
07 p1341 A70-20104
Binary mixture molecular beam apparatus combining aerodynamic acceleration and arc heating techniques, discussing particle energy and density
07 p1341 A70-20106

Single junction vacuum thermocouple measuring thermal beam effect with reference to velocity distribution perturbation in molecular beam scattering
07 p1341 A70-20107
Time of flight resolution of fast excited atoms from thermal molecular beam
07 p1341 A70-20108
Low and moderate energy gas molecule-solid surface interactions using molecular beams
07 p1328 A70-20116
Wall boundary condition model modification applied to molecular beam-solid surface scattering, noting qualitative agreement with observed distributions
07 p1342 A70-20118
Molecular beam interactions with solid crystalline surface with fcc lattice elementary cell, investigating intensity distribution of scattered particles
07 p1342 A70-20119
Solid surface roughness influence on reflection of thermal energy molecular jets, showing shock determined by incidence angle
07 p1343 A70-20121
Reflected molecular beam intensity distribution interpreted in terms of disturbances in boundary layer between gas and solid
07 p1343 A70-20122
Crystalline structure effect on molecular beam reflection from rough polycrystalline Au surfaces
07 p1343 A70-20123
Gas molecules scattering by solid surface for monoenergetic and Maxwellian beams, discussing model with different values for magnitude and velocity direction
07 p1343 A70-20124
Satellite-borne experiments of neutral molecular beam-solid surface interactions, describing Molsink chamber, densitometer, sphere and paddlewheel satellites
07 p1344 A70-20128
Helium high energy molecular beams for insulating body heating and thermal constants determination
07 p1344 A70-20129
Molecular beam approximation introduced in Boltzmann equation to investigate high speed rarefied flows
07 p1261 A70-20130
Molecular beam research at low, intermediate and high energies, discussing inelastic processes, intermolecular potentials, etc
07 p1344 A70-20131
Nitrogen molecules pulsed high energy beams transit time measurement by gated time of flight procedure and by multichannel analyzer
07 p1345 A70-20136
Energy dependence of elastic total collision cross section of identical He molecules, using velocity selected primary beams at low target temperature
07 p1545 A70-20137
Hydrogen triatomic molecules existence, stability and ionization in molecular beams
07 p1345 A70-20139
Rotational temperature of molecular beam by electron excited fluorescence method, discussing signal level, background light and scattering effects
07 p1345 A70-20140
Supersonic gas jets applicability as vacuum locks for molecular fluxes at thermal velocity in magnetic trap
07 p1549 A70-20509
Molecular beams and particle adsorbing surfaces interactions in state of relaxation, determining reflection parameters as function of gas characteristics
08 p1547 A70-21078
Molecular beams and particle adsorbing surfaces interaction with allowance for deposited atoms relaxation, determining reflected flux
08 p1547 A70-21079
Molecular beam and pure surface interactions on background of external forces field
08 p1547 A70-21080
Shock heated molecular beams of argon, oxygen and mixtures with helium, measuring particle velocities and gas dissociation
09 p1733 A70-23180
Deuterium atom reaction with hydrogen molecule yielding HD and H using modulated crossed beams, plotting angular distributions and reaction velocities
10 p1920 A70-25148
Nozzle source design for high intensity thermal energy molecular beam with small dispersion in velocity suitable for scattering experiments
11 p2086 A70-25973
High temperature gaseous molecular beams impingement on Cu surfaces at cryogenic temperatures measured for condensation rates
12 p2271 A70-27265
Molecular beam carbon dioxide laser Q switching by ethylene as saturating filter, reducing pulse duration by varying ethylene pressure and active mixture composition
12 p2248 A70-27509
Glorified shadows in molecular beam scattering, considering undulation spacing, bound states number and extrema amplitudes in terms of optical analogies
13 p2454 A70-28624

Molecular beams formation from high pressures, discussing detection, diagnosis and applications in high temperature chemistry

14 p2545 A70-30904

Scattering cross sections for monoenergetic Ar beams on epitaxial Ag films

16 p2956 A70-34013

Signal to noise ratios for metastable and ion detection of excited neutral molecules in beam

18 p3262 A70-37096

Capture coefficients and reflected flux measurements for gaseous nitrogen molecular beams impinging on solid nitrogen cryodeposit surface

20 p3675 A70-39390

Cesium beam velocity attenuation by He, Kr and Xe, determining scattering cross sections from gas pressure and density measurements

20 p3675 A70-39618

Monoenergetic nitrogen free molecule beam impingement on solid surface, calculating satellite drag coefficients from momentum transfer measurements

21 p3745 A70-41743

Solid surface interaction between surface with normal molecular beam, generalizing model by energy parameter simulating dissipative forces

23 p4223 A70-44994

MOLECULAR BONDS

U CHEMICAL BONDS

MOLECULAR CHAINS

Polymeric materials properties, discussing tensile stress disadvantage and compensation by reinforcement and polymer chain directional alignment

02 p0321 A70-12305

Polyethylene extended chain crystals melting process via electron microscopy and differential thermal analysis

12 p2258 A70-26896

Polymers as cryogenic adhesives, evaluating role of chain structure below glass transition temperature

21 p3783 A70-42142

Human hemoglobin chain, noting zeta chain synthesis during embryonic development

24 p4297 A70-45406

MOLECULAR COLLISIONS

Multistate impact parameter treatment of hydrogen-helium excitation collisions, considering distortion, back- and rotational-coupling and virtual transition sequence

01 p0147 A70-10285

Rotational excitation and scattering of diatomic molecules by structureless atoms, comparing approximation methods

01 p0147 A70-10470

Nitrogen and helium collisional effect on rotational relaxation rate of carbon dioxide upper laser level, noting thermalization

01 p0110 A70-10567

Vibrational energy exchange between colliding diatomic molecules modulated by harmonic oscillators with insignificant frequency difference

01 p0147 A70-11035

Molecular reaction rates and ion/electron vertical profile and concentrations in equatorial ionosphere, applying computer simulation to numerical solution of continuity equations

01 p0083 A70-11549

Hydrodynamic equations and Grad transport coefficients for nonequilibrium rarefied monatomic gases developed for molecular collisions

01 p0068 A70-11567

Enskog method for Boltzmann equation, analyzing asymptotic nature of integral kinetic equation for molecular mean free paths and Laplace probabilities

01 p0068 A70-11568

Oscillations and decomposition of diatomic gas molecules at high temperatures during atom-molecule collisions, deriving kinetic equations for energy level changes

01 p0148 A70-11630

Oxygen molecules dissociation by molecular and atomic collisions in shock tube from measuring molecular O concentration behind shock wave front

01 p0149 A70-11632

Vibrational energy exchange between molecules during collision behind normal shock front as function of wave velocity

03 p0468 A70-13873

Electron scattering by molecules, demonstrating formal equivalence of fixed nucleus and free rotor scattering models

04 p0722 A70-14949

Diatomic oxygen-nitrogen collisions in mixtures with CO, determining vibration-vibration energy exchange probabilities

04 p0723 A70-15562

Vibration effects on ion-molecule collision lifetimes and multiple reflections

04 p0723 A70-15638

Vibrational energy transfer in oriented nonlinear collisions between diatomic molecule and atom, considering molecular vibration excitation

05 p0885 A70-17080

Slow electron attachment to O molecules forming stable O-ions, discussing formation rate constant

06 p1109 A70-17488

Approximate solution to Boltzmann gas kinetics equation, using moment relations of collision integral and reverse collision operator

06 p1036 A70-17758

Energy and mass transfer during elastic and inelastic molecular collisions in reacting gas mixtures, using Enskog and variational methods in solving Boltzmann equations

06 p1110 A70-17760

Model for impact behavior of elastic body at elastic half space, measuring gas molecule impulse exchange at metal surfaces

06 p1171 A70-18260

Collision cross sections direct measurement for determining macroscopic reaction rates in inelastic molecular collision processes in gas dynamics

06 p1113 A70-18276

Evaporation rate from spherical drop into vacuum influenced by molecular collisions occurring in gas cloud formed by emitted particles

06 p1113 A70-18283

Knudsen iteration for predicting cooled blunt body near free molecular drag in hypersonic stream, using BGK model for collisions

06 p0979 A70-18313

Monte Carlo method for modeling gas flow by simulated molecules concurrently followed through collisions and boundary interactions in simulated physical space within computer

06 p1113 A70-18314

Hyperthermal leading edge analyzed by examining adjacent relevant mean free paths for collisions, establishing basis for formal expansion of Boltzmann equation

06 p0979 A70-18347

Angular distribution of nonreactively scattered molecules in reactive collision, analyzing relation to reaction probability using gray sphere optical model

07 p1225 A70-18903

Molecular beam interactions with solid crystalline surface with fcc lattice elementary cell, investigating intensity distribution of scattered particles

07 p1342 A70-20119

Ion production cross sections determined for alkali atoms and bromine molecules collisions, noting charge transfer

07 p1345 A70-20138

Polarization of laser medium consisting of colliding two level molecules with velocity dependent mean free time

08 p1512 A70-20992

Scattering equations and cross sections for rotational excitation in collisions of rigid diatomic molecules interacting through soft potential

09 p1732 A70-22901

Binary collision-induced rotational far IR spectrum of tetrahedral molecular gas, using induced absorption theory

09 p1732 A70-22905

Meteor ionized trails initial expansion and diffusion resulting in dissociation and ionization of air molecules through collision, using electromagnetic wave scattering

09 p1762 A70-23177

Fast electrons spatial distribution for multiple scattering in nitrogen and argon, noting target thickness and incident energy

09 p1735 A70-23179

Vibrational energy exchange between colliding diatomic molecules modulated by harmonic oscillators with insignificant frequency difference

10 p1920 A70-25004

Molecular reflection effects on aerodynamic characteristics of rarefied gas flow past plate

11 p1973 A70-25386

Hard sphere model for reactive molecular collisions based on energy and momentum of reactants and products

13 p2361 A70-28497

Flame ionization, extra-equilibrium excitation and electronic temperature resulting from electron collisions with gas molecules

14 p2666 A70-31096

Atomic oxygen 1D excitation state obtained by metastable He atoms collision with ground state oxygen molecules in O-He discharge

14 p2579 A70-31248

Fragment ion products velocity vector distribution for dissociative collisions of molecular ions with He

16 p2953 A70-33005

Photodissociation and fluorescence cross sections for hydrogen by Lyman-alpha photons emission from collisional quenching

16 p2953 A70-33006

Total cross sections for production of free electrons in collisions of low energy negative atomic oxygen ions with molecular nitrogen

18 p3292 A70-36188

Ion-polar molecule collision time history plots and computer movies, calculating capture cross sections for mass spectrometry

18 p3292 A70-36561

Atomic H electron transition induced by H atom collisional-excitation rates at various thermal energies, explaining anomalous recombination lines in H I regions

18 p3253 A70-37021

Ion-molecule pair relative motion in capture collisions, using computer-made movies

19 p3474 A70-38796

Molecular and noble gas rotational collision numbers from thermal transpiration measurements

20 p3738 A70-39995

Dynamical theorems to control number of collisions for sequences in generalized Boltzmann equation, discussing binary collisions involving three molecules

21 p3852 A70-40946

Rotational transition probabilities of molecular collisions, using time dependent perturbation theory along linear trajectories

21 p3853 A70-41390

Numerical molecular rotational transition probabilities and cross sections in HCN-HCN and ICN-ICN collisions, using perturbation theory and multipole potentials

21 p3853 A70-41391

Vibrationally adiabatic model for reaction dynamics of atomic and molecular hydrogen systems, using zero point energy path

21 p3773 A70-41397

Turbomolecular pumps efficiency calculation by Maxwell transport equation, assuming gas molecules perfect specular reflection from blade surface

22 p4009 A70-42607

Enskog theory extended to three particle collisions for gas transport properties

23 p4222 A70-44427

Electronic energy collisional transfer between atomic and molecular hydrogen, measuring excited molecule vibrational distribution

24 p4381 A70-45650

MOLECULAR DIFFUSION

Chromoluminescing process protecting alloys for gas turbines against oxidation at high temperatures by diffusion mechanism

04 p0711 A70-15683

Dissolved macromolecules effect on flow resistance due to turbulent friction in nonNewtonian liquids, considering physical parameters and hydrodynamic conditions

08 p1483 A70-21228

Diatomic gases, describing rotational distribution function evolution by diffusion equation approximation, discussing apparent relaxation times

08 p1548 A70-21521

Critique of paper on diffusion in Si isotopes and excess vacancies generation by motions of diffusion induced dislocations

08 p1553 A70-21696

Global atmospheric models computations based on treating molecular and eddy diffusion as dynamic processes

14 p2606 A70-30561

Nitrogen and nitric oxide production and diffusion, examining photochemistry and transport at high altitudes

20 p3620 A70-39339

MOLECULAR DISSOCIATION

U DISSOCIATION

MOLECULAR ELECTRONICS

NT LARGE SCALE INTEGRATION

Matrix elements of nonadiabatic perturbation emphasized in semiempirical theory for evaluating polyatomic molecules radiationless rate constants in terms of electronic-vibrational state

04 p0722 A70-14699

MOLECULAR ENERGY LEVELS

NT INTERMOLECULAR FORCES

Oscillations and decomposition of diatomic gas molecules at high temperatures during atom-molecule collisions, deriving kinetic equations for energy level changes

01 p0148 A70-11630

Quadrupole moment matrix elements in adiabatic approximation for transition bands of hydrogen, HD and deuterium molecules in ground electronic state

02 p0342 A70-11822

Intramolecular triplet-triplet energy transfer between nonconjugated molecular chromophores held together by rigid molecular frame at known separation distance and mutual orientation

02 p0251 A70-12277

Morse eigenfunctions for variational calculation of diatomic molecules vibrational-rotational energy level analysis, showing better convergence than harmonic oscillator basis

02 p0344 A70-12519

Dissociative recombination coefficients temperature dependence in molecular neon and argon ions measured under equal gas, ion and electron temperature

04 p0722 A70-14668

Excited oxygen molecules concentration in upper atmosphere calculated, considering deactivation during interactions in various energy states

04 p0684 A70-15750

Nitrogen ionization rate increase by admixing neutral molecules of electronically excited nitrogen, noting nitrogen decay controlled by spontaneous radiation and wall collisions

05 p0884 A70-15918

Radiative lifetimes of transitions to ground state for CS, SO and diatomic sulfur, showing relationship to absolute transition probabilities in terms of physicochemical applications

05 p0885 A70-16456

Chemical reaction rates corresponding to initial molecules fixed internal energy levels determinable for multitemperature Maxwell-Boltzmann distribution as function of reagent temperatures

07 p1224 A70-18769

Extrema behavior in nonlinear absorption of organic compounds under high power laser radiation interpreted by triple absorption molecular energy level models

07 p1302 A70-20100

Coupled Schrodinger equations for diatomic molecules internal motion solved using best adiabatic approximation to obtain energy correction to Born-Oppenheimer method

08 p1548 A70-21522

Compound state resonance energies and widths in elastic scattering of diatomic molecule at energies below rotational excitation threshold

08 p1548 A70-21523

Lyman-Birge-Hopfield nitrogen bands high resolution emission spectrum, giving energy values of particular states together with corresponding rotational constants and band origins

09 p1730 A70-22067

Quasi-bound levels determination method for molecular hydrogen ground state

10 p1919 A70-24395

API state lifetime of CO measured using molecular level crossing spectroscopy

10 p1920 A70-24629

Transitions in interstellar OH observed at National Radio Astronomy Observatory

10 p1948 A70-25000

Pulsed CO₂ laser calculating upper level lifetime of carbon dioxide molecule with allowance for gas heating at relaxation

12 p2251 A70-28296

Microwave lines due to hydroxyl radical in interstellar medium, discussing emission from excited OH states

13 p2484 A70-28371

Dissociation energy and long range interatomic potential of diatomic molecules from vibrational spacings of higher levels

13 p2454 A70-28495

Energy resonances between laser levels of carbon dioxide and diatomic and triatomic molecular impurity species, discussing population inversion due to superelastic collisions

13 p2425 A70-28622

IR spectroscopy, determining relative populations of carbon dioxide vibrational energy levels by comparing emission intensities

13 p2455 A70-29131

Carbon dioxide molecular vibrational energy levels above carbon monoxide-oxygen premixed flame, discussing vibration modes leading to population inversion and relaxation time variance

13 p2455 A70-29132

Excited oxygen molecules concentration in upper atmosphere calculated, considering deactivation during interactions in various energy states

14 p2576 A70-30834

Molecular nitrogen excitation under electron bombardment at auroral and airglow impact levels, using computerized Monte Carlo method

14 p2620 A70-31269

NaI molecular and ionic electronic states, discussing valence formulation, Hartree-Fock calculations, wave functions, excited state potential, etc

15 p2776 A70-31728

Acrolein photoisomerization in lower excited states, determining fluorescence and phosphorescence quantum yields

15 p2694 A70-31730

Three level molecular coherence effects in stimulated Raman scattering, considering molecular relaxation and field inhomogeneity

15 p2752 A70-32350

Perfect nonrelativistic bounded gas thermodynamics and surface tension, assuming single particle energy level density dependence on external potential

23 p4284 A70-44928

MOLECULAR FLOW

NT SLIP FLOW

NT TRANSITION FLOW

Output power and gain saturation characteristics for high speed flowing gas molecular lasers, discussing electrically excited fluid mixing carbon dioxide laser

01 p0107 A70-10103

Molecular velocity distribution function measured in normal He shock wave in low density wind tunnel by electron beam fluorescence technique

02 p0299 A70-12229

Molecular mean free path influence on gas lubricated thrust bearings performance, discussing slip flow effect and load capacity

05 p0854 A70-15909

Unsteady nonlinear molecular flow problems concerning plane Couette flow, heat transfer between parallel plates and density discontinuity propagation solved by Monte Carlo method

06 p1113 A70-18321

Thermal molecular flow kinetic theory, discussing anisotropic distribution function, thermal transpiration, thermal conduction, entropy production, etc

06 p1113 A70-18369

Simple molecules viscosity as function of temperature and density using empirical equation

09 p1731 A70-22292

Macroscopic properties of thermal molecular flow between coaxial cylinders and concentric spheres, using transpiration theory in Knudsen gas

09 p1788 A70-22906

Molecular, viscomolecular and laminar gas flows in tubes and porous bodies at low pressures

10 p1869 A70-24287

Rarefied gas mixtures efflux from opening at various pressures, calculating component discharge coefficients for molecular flow conditions

15 p2721 A70-32137

Time correlation functions approach to calculation of properties of nonequilibrium ensembles in fluid molecular motions

17 p3197 A70-35535

Low density gas jet from short circular cylindrical tube, calculating molecular flux radial density variation

22 p4076 A70-43430

Molecular jet velocity distribution, investigating adiabatic focalization conditions

24 p4351 A70-45370

Narrow capillary supermolecular flow density relation to vapor molecule specular reflection, considering Knudsen flow conditions

24 p4381 A70-45491

MOLECULAR GASES

NT DIATOMIC GASES

NT POLAR GASES

NT POLYATOMIC GASES

Mathematical model for saturable absorbers consisting of molecular gases for use in IR applied to carbon dioxide laser radiation absorption by sulfur hexafluoride

01 p0109 A70-10429

Total cross section for electron impact excitation and ionization in He, CO, nitrogen, oxygen, carbon dioxide, ethylene and benzene, emphasizing threshold values

01 p0147 A70-10489

Atomic O, H and D and molecular oxygen, deuterium and sulfur hexafluoride effects on nitrogen vibrational population distribution in nitrogen afterglow

01 p0148 A70-11356

Compact 4 micron radiation band from high temperature air and gases measured on arc jet and shock tube, noting molecular O and N source

02 p0392 A70-11901

Rotational compound state resonances in subthreshold atom-diatom scattering determined for lowest state molecular hydrogen and deuterium model systems scattered by Xe

03 p0526 A70-13006

Hydrogen molecule formation relation to galaxy formation, discussing cosmic plasma neutralization role

03 p0577 A70-14152

Electronic-vibrational coupling in nonequilibrium MHD generator with molecular gas to suppress electrode layer shorting and recombination in supersonic nozzles

[AIAA PAPER 70-41]

06 p0988 A70-18222

Thermomolecular pressure corrections in tubes and at orifices for errors in gaseous pressure measurements by temperature gradients

06 p1113 A70-18371

IR spectra excited by fast electrons in nitrogen, oxygen, carbon monoxide, carbon dioxide, nitrogen oxide, methane, ammonia and water molecules

07 p1337 A70-19045

Molecular oxygen concentration determined by absorption spectroscopy of solar hydrogen Lyman alpha line

08 p1490 A70-21390

Molecular hydrogen parallel and perpendicular dynamic polarizabilities calculated for frequency dependence, using many body perturbation theory

09 p1731 A70-22780

Fast argon beam scattering by gas molecules measured to study atomic and molecular two body systems involving nitrogen and oxygen atoms

09 p1732 A70-22902

Binary collision-induced rotational far IR spectrum of tetrahedral molecular gas, using induced absorption theory

09 p1732 A70-22905

Transient stimulated rotational and vibrational Raman scattering in gases using mode locked ruby laser

09 p1700 A70-23568

Emission and absorption by nonhomogeneous gases with vibration-rotation bands determined by scaling approximation

10 p1968 A70-24474

Acetone formation mechanisms during neopentane oxidation when added to slowly reacting molecular hydrogen and oxygen

11 p1995 A70-26379

Predissociation of excited molecules in molecular hydrogen and deuterium by electric field as linear function of field strength

13 p2362 A70-29479

Molecular gases ionization and dissociation by low energy atoms, using mass spectroscopy on secondary ionic products of collisions

14 p2619 A70-30723

Rotational transition of interstellar formaldehyde in absorption in direction of galactic and extragalactic objects

14 p2641 A70-30878

Flame ionization, extra-equilibrium excitation and electronic temperature resulting from electron collisions with gas molecules

14 p2666 A70-31096

Nitrogen dioxide continuum in green-white afterglow of molecular oxygen and nitrogen, using spectrometry and photometry

14 p2579 A70-31254

Molecular oxygen emissions in airglow, inverting calculation to determine ozone distribution from observed altitude profiles

14 p2580 A70-31265

Vibration-rotation band absorbance for nonisothermal gaseous radiation in terms of parameters describing isothermal gas

15 p2825 A70-31816

Dissociation energy of gaseous TiN molecule at high temperature

15 p2695 A70-32748

Gaseous diatomic molecules quantum mechanical treatment, calculating Hamiltonian matrix elements for interpretation of electron resonance spectra

16 p2955 A70-33799

Ionic and molecular gas lasers, discussing pumping, transitions, emission, discharge tube dimensions, cooling, pressures, optical elements and applications

19 p3449 A70-38751

Positive ion and electron production in H atom collisions with atomic and molecular gases, deriving ionization cross sections

20 p3675 A70-39605

Book on molecular and aerosol backscatter measurement from stratosphere by means of ground based laser beams

20 p3623 A70-39925

Venusian atmosphere carbon dioxide, water, molecular oxygen and nitrogen contents from Venera 5 and 6 data

21 p3883 A70-40837

Slow and fast ionization waves in inert gas or molecular gas plasma columns, describing striation formation in neon discharge by hydrodynamic equations

22 p4079 A70-42371

Carbon dioxide laser vibrational temperature measurement, determining ground state vibration level populations in various molecular gases

22 p4051 A70-43391

Atomic or molecular gases excited state lifetime measurements, using time to amplitude conversion and multichannel analyzer

23 p4198 A70-44946

MOLECULAR INTERACTIONS

NT MOLECULAR COLLISIONS

Mass spectrometric determination of proton affinities of simple molecules determined from proton transfer and ion-molecule reactions

05 p0885 A70-17081

Kinetic analysis of ion-molecule reactions in Ar-N₂ mixtures with H₂, deuterium and HD using ion ejection mode of ion-cyclotron-resonance spectroscopy

06 p1108 A70-17332

Molecular dipole moments-electric field interaction induction of cholesteric liquid crystal transition to nematic phase

07 p1225 A70-20053

Low and moderate energy gas molecule-solid surface interactions using molecular beams

07 p1328 A70-20116

Gas molecules scattering by solid surface for monoenergetic and Maxwellian beams, discussing model with different values for magnitude and velocity direction

07 p1343 A70-20124

Molecular beams and particle adsorbing surfaces interactions in state of relaxation, determining reflection parameters as function of gas characteristics

08 p1547 A70-21078

Molecular beams and particle adsorbing surfaces interaction with allowance for deposited atoms relaxation, determining reflected flux

08 p1547 A70-21079

Molecular beam and pure surface interactions on background of external forces field

08 p1547 A70-21080

Chemical high pressure laser action produced by stimulated phototransition of electrons at contact moment between pair of reacting nonexcited gas molecules

08 p1513 A70-21412

Elementary processes cross sections in charged states changes during proton-hydrogen molecule interactions

08 p1549 A70-21817

F region ion-molecule reaction rate constants laboratory measurements, observing reactions energy dependence

10 p1872 A70-23825

Transfer coefficients calculation for equations of motion of medium, presenting mathematical experiment requiring molecular interactions only

10 p1919 A70-24157

Molecular densities and population inversion pulse shape in working gas in mixture with thermally excited auxiliary gas

10 p1920 A70-25112

Methyl fluoride calculated for ion-molecule reaction rate constants from ion cyclotron resonance spectra

12 p2180 A70-26862

Neutral molecule-solid surface interactions mass spectrometric techniques for measuring molecular flux and mean thermal energy after interaction

12 p2181 A70-27257

Heat conductivity of Xe-He binary gas mixtures, allowing for molecular transfer and polarity effects

15 p2827 A70-32107

Molecular velocity influence of optically active medium in gas dynamic quantum amplifier on monochromatic radiation transport, using corpuscular light model

15 p2721 A70-32356

Molecular interactions, surface pressures and potentials of mixed monolayers of stearic acid and stearyl alcohol with inorganic substructures

15 p2695 A70-32547

Ion-molecule reactions produced in phosphine by ion cyclotron resonance

16 p2855 A70-33061

Ethyl nitrate positive and negative ion-molecule chemistry investigated by ion cyclotron single/double resonance techniques

16 p2855 A70-33090

Thermal energy negative ion-molecule reactions in photoionized NO-water vapor mixtures, determining rate constants by stationary afterglow system

16 p2954 A70-33280

Thermal product distributions and energy dependencies of ion-molecule reactions in allene and propyne, using ion cyclotron resonance

16 p2856 A70-33651

Hydrogen ion-molecule reactions analysis by flowing afterglow technique, noting application to proton affinity measurement

16 p2857 A70-34005

Inelastic energy losses in oxygen ion beams collisions with neutral molecules, determining vibrational transition probabilities

16 p2955 A70-34011

Ethylene and ethylene-acetylene mixtures ion-molecule reaction product distributions calculation using quasi-equilibrium theory of unimolecular reactions

16 p2858 A70-34012

Ion-molecule reactions investigation by resonance principle, discussing ion paths in crossed fields

17 p3081 A70-34574

Liquid Fe-Cr-C, Fe-P-C and Fe-Cr-P systems, evaluating interaction coefficients

18 p3272 A70-36032

Atmospheric ions interaction with rocket exhaust gas water molecules, using sounding rocket mass spectrometric data

18 p3293 A70-36982

Book on thermal radiative properties of air, Volume 2, covering reaction rates, photons and charged particles interactions with air molecules, secondary air excitation, etc

19 p3552 A70-38010

Fluid intermolecular potential and virial calculation, noting relationships to Boyle and Joule-Thompson inversion temperatures

20 p3671 A70-38988

Hydrogen negative ion thermal energy reactions with oxygen, nitric oxide, carbon monoxide and nitrous oxide, determining rate constants

20 p3583 A70-39616

Ion-molecule reactions in mixtures of hydrogen sulfide with ethylene and acetylene from deuterium labeling studies via ion cyclotron resonance spectroscopy

21 p3773 A70-41200

Ion cyclotron resonance spectroscopy for detecting trapped gaseous ions in analyzer cell, observing ion-molecule reactions

23 p4196 A70-44390

Beam laser operational efficiency relation to molecule /atom/ interaction in focusing system, explaining lasing power drop at large flow rates

24 p4351 A70-45457

MOLECULAR IONS

Collision induced dissociations of 2000 ev diatomic O, N, CO and NO positive molecular ions as function of reactant ion internal energy

01 p0148 A70-11354

Dissociative recombination coefficients temperature dependence in molecular neon and argon ions measured under equal gas, ion and electron temperature

04 p0722 A70-14668

Temperature dependence of reaction rate for dissociative recombination in vibrationally excited gases, using electronic threshold law for diatomic ions

04 p0722 A70-14669

Ionic collision processes in nitrogen and oxygen mixtures in mass spectrometer ion source

04 p0646 A70-14700

NO ion dissociative recombination rate coefficient determined in high temperature air plasma from electron temperature and number density measurements

04 p0675 A70-15583

Exchange perturbation theories applied to delta function model of molecular hydrogen ion, discussing EL-HAV second order energy at large internuclear separations

05 p0884 A70-15878

Absolute values of emission cross sections for vibrational Meinel bands of molecular nitrogen ions excited by electron impact

05 p0901 A70-16279

Electron temperature dependence of molecular neon ions recombination with electrons using microwave afterglow/mass spectrometer, obtaining recombination coefficient

05 p0885 A70-16468

Stationary nitric oxide afterglow, studying molecular ionic species by time resolved mass spectrometry

06 p1114 A70-18635

Numerical modeling of electron and molecular ion continuity equations describing conditions in lower F region near magnetic equator using analog computer

07 p1265 A70-19434

Molecular ion concentrations, using flap probe collector trap on Cosmos 5 satellite at 200-300 km

07 p1276 A70-20421

Uranyl ion luminescence and absorption cross section in silicate glass excited by high power light beam, considering Q switching action of ion

08 p1510 A70-20516

Dialkyl ketone ion in double McLafferty rearrangement, applying ion cyclotron resonance to structural study

08 p1454 A70-20525

Molecular cesium ion production by arc discharge in inhomogeneous cesium plasma, describing probable reaction mechanism

08 p1551 A70-20849

Electron, oxygen and NO molecular ions concentrations for E region from computer calculations of diurnal model compared to observations

08 p1490 A70-21391

Nitrogen oxide ions mobility in air calculated at high plasma temperatures

12 p2776 A70-27845

Molecular oxygen positive ion density in upper ionosphere as function of photoionization, ambipolar diffusion velocity and altitude effect

13 p2399 A70-29233

Charge, hydrogen atom and ion transfer in collisions involving deuterium-labeled methanol- acetaldehyde system and molecular ions

14 p2543 A70-30110

Electron impact excitation cross sections of oxygen ion first negative bands, considering relationship to oxygen ionization cross section

14 p2620 A70-31363

Rare gas diatomic ions reactions with molecules and rare gas atoms, measuring rate coefficients and product channels by flowing afterglow technique

15 p2776 A70-31726

Rare gas diatomic and hydride ions reactions with hydrogen, determining rate coefficients and product channels by flowing afterglow technique

15 p2776 A70-31727

NaLi molecular and ionic electronic states, discussing valence formulation, Hartree-Fock calculations, wave functions, excited state potential, etc

15 p2776 A70-31728

Fragment ion products velocity vector distribution for dissociative collisions of molecular ions with He

16 p2953 A70-33005

Effective cross sections for molecular hydrogen and hydrogen positive ion formation in collisions between He, Ne and Ar ions or atoms

16 p2954 A70-33193

NO and oxygen ions vibrational excitation due to inelastic scattering from He, calculating scattering angle variation

16 p2955 A70-34010

Diatomic nitrogen ions branch overlapping, discussing rotational line structure in first negative system vibrational bands

16 p2956 A70-34254

Nighttime E region molecular ion production rate estimation, taking into account windshear effect

18 p3245 A70-36022

Comet Morehouse CO ions lifetime and density from photometric analysis

18 p3313 A70-36324

Numerical modeling of electron and molecular ion continuity equations describing conditions in lower F region near magnetic equator using analog computer

18 p3249 A70-36908

Signal to noise ratios for metastable and ion detection of excited neutral molecules in beam

18 p3262 A70-37096

Indeterminacy interval reduction for ionospheric reaction rate constants by imposing supplementary condition on NO/oxygen molecular ion concentrations ratio

19 p3408 A70-37309

Nitrogen dioxide and molecular oxygen ions densities in lower ionosphere as function of solar corpuscular radiation

19 p3409 A70-37325

Ammonium molecules dissociation and ionization in comet atmospheres due to solar corpuscular and photon radiation

19 p3514 A70-37642

Collision induced dissociation of nitric oxide and molecular oxygen ions at low kinetic energies, noting internal ionic excitation effects

21 p3773 A70-41398

F I region positive nitric oxide and oxygen ions concentrations ratio and conversion rates from rocket data and theoretical formulas

23 p4189 A70-44075

Autoionization theory application to partial solar photoionization cross sections for production rates of vibrationally excited positive molecular oxygen ions

23 p4222 A70-44785

ESR intensities and line widths at X and Q bands of Cr and Fe molecular ions in water/glycerol mixtures

24 p4310 A70-46045

MOLECULAR ORBITALS

Plasma pi-electrons effects in annulene molecules, obtaining dispersion relation for plasma oscillations by Hueckel theory

14 p2621 A70-30116

Molecular orbital wave functions for water molecule, using minimum set of Slater orbitals

14 p2544 A70-30119

Papers on chemical physics covering photoelectron angular distribution, molecular orbital theories, electron impact spectrometry, resonant electron scattering, etc

16 p2857 A70-33796

Molecular orbital energy level diagram for metal ion X ray emission and absorption spectra interpretation from titanium and vanadium compounds

21 p3853 A70-41901

MOLECULAR OSCILLATIONS

Vibrational energy exchange between colliding diatomic molecules modulated by harmonic oscillators with insignificant frequency difference

01 p0147 A70-11035

Transient molecular vibration excitation by picosecond laser pulses found dependent on shape of Stokes pulses in Raman scattering study

04 p0702 A70-15298

Vibrational energy transfer in oriented nonlinear collisions between diatomic molecule and atom, considering molecular vibration excitation

05 p0885 A70-17080

Molecular vibration energy distributions of polyatomic molecules, formulating energy criterion valid for nth order general case

08 p1511 A70-20597

Pulsed radio signals time delay due to molecular microwave resonance in earth atmosphere and interstellar medium

08 p1461 A70-20915

Thermospheric molecular nitrogen vibrational temperature, studying various chemical reactions and collisions as energy sources

10 p1872 A70-23827

Diatomic molecules vibrational levels distribution near dissociation limit determined using WKB approximation

10 p1919 A70-24041

Vibrational energy exchange between colliding diatomic molecules modulated by harmonic oscillators with insignificant frequency difference

10 p1920 A70-25004

Fermi triplet resonance between fundamental molecular vibrations possible in presence of harmonic or composite tone of same symmetry

12 p2275 A70-27502

Electron beam measurement of rotational and high vibrational temperature in molecular nitrogen

13 p2412 A70-29980

Resonance excitation of oscillations in diatomic molecules by slow electrons, calculating scattering on spherical potential well

20 p3642 A70-39753

Oscillator strengths for aluminum oxide molecular electronic sigma band system from intensity measurements in cyanogen-oxygen flame system

20 p3676 A70-40474

Vibrational relaxation measurements of specific carbon dioxide vibrational-rotational states from tunable carbon dioxide laser beam absorption

23 p4221 A70-44011

Carbon dioxide molecular vibration excitation by Q switched carbon dioxide laser, obtaining accommodation and diffusion coefficients by relaxation measurements

24 p4351 A70-45369

Two point hydrodynamic equation for molecular fluctuations divergent growth in classical shear flow via B-B-G-K-Y procedure and double series moment expansion

24 p4382 A70-46254

MOLECULAR OSCILLATORS

IR light beam modulation in Gunn oscillator near fundamental edge of GaAs, investigating mechanism

03 p0539 A70-13160

SiH molecular absorption lines in solar disk spectrum, determining maximum equivalent widths and oscillator strength

06 p1143 A70-17996

Ionization energies and oscillator strengths for Fe XVI, Co XVII and Ni XVIII by frozen core approximation, noting applications to solar corona

06 p1150 A70-18465

MOLECULAR PHYSICS

Interstellar molecular radio frequency lines significance to galactic physics, noting abundance relation to constituent atoms indicating dust catalytic formation

19 p3521 A70-38496

MOLECULAR PUMPS

Aerospace coldness and vacuum simulation, discussing uses of cryogenic, titanium sublimation, ion and molecular pumps

19 p3396 A70-37462

Turbomolecular pumps with uniformly distributed small plane blades, calculating rotor efficiency

22 p3964 A70-42604

Turbomolecular pumps efficiency calculation by Maxwell transport equation, assuming gas molecules perfect specular reflection from blade surface

22 p4009 A70-42607

MOLECULAR RELAXATION

Vibrational relaxation and optimum population inversion of carbon dioxide molecules under unsteady conditions during pulsed electron excitation, discussing laser output increase

03 p0528 A70-13408

Carbon dioxide supersonic flows, describing numerical integration procedure for chemical and vibrational relaxation

03 p0440 A70-13743

Vibrational relaxation and continuous spectrum transition during dissociation of diatomic low temperature plasma

04 p0721 A70-14539

Numerical analysis of near equilibrium flow regions in chemically relaxing gas mixtures past blunt bodies at supersonic speeds

04 p0666 A70-14603

Matrix elements of nonadiabatic perturbation emphasized in semiempirical theory for evaluating polyatomic molecules radiationless rate constants in terms of electronic-vibrational state

04 p0722 A70-14699

High temperature thermal transport and ionization relaxation in Ar from measurements by thin film surface thermometer in high pressure shock tube end wall

04 p0787 A70-15607

Kinetic Boltzmann equations for spatially uniform two component gas mixture solved with allowance for relaxation processes, assuming differing temperatures

06 p1109 A70-17754

Kinetic relaxation and Boltzmann equations for studying shock waves propagating in gas composed of rigid ideally elastic spherical molecules without internal degrees of freedom

06 p1036 A70-17756

Iteration for Boltzmann equation solution for relaxation of gas having solid molecules with time variable and velocity dependent distribution function

06 p1109 A70-17757

Translational relaxation in low density axisymmetric hypersonic free gas jet, describing transition from isentropic to free molecular flow

06 p1043 A70-18277

Spatial and temporal relaxation problems approximate solution in kinetic theory, making calculations for Maxwellian molecules and hard spheres

06 p1047 A70-18318

Kinetic theory study of shock wave structure in rotationally relaxing diatomic gases

06 p1050 A70-18339

Kinetic model equation for shock structures in rotationally relaxing gas with internal degrees of freedom

06 p1050 A70-18340

Sound waves dispersion and attenuation produced in gas flow by relaxation effects of solid particles presence

07 p1258 A70-19567

Coupled vibrational relaxation in mixtures of diatomic gases, showing energy pumping phenomenon between species

07 p1338 A70-19627

Carbon dioxide laser emission spectrum, considering working mixture emission power and rotational relaxation characteristics

08 p1511 A70-20539

Oscillatory relaxation of binary system of heat conducting viscous gases composed of nonspherical molecules

08 p1547 A70-21085

Diatomic gases, describing rotational distribution function evolution by diffusion equation approximation, discussing apparent relaxation times

08 p1548 A70-21521

Rotational-translational energy transfer in collisions between homonuclear diatomic molecules and rotational relaxation time in diatomic gases

10 p1918 A70-23956

Vibrational and dissociation relaxation effects on plane shock wave structure and supersonic flow around blunt bodies

10 p1801 A70-24150

Liquid crystal of cholesteryl chloride and myristate measured for complex dielectric constant, noting role of molecular rotation modes in dipole relaxation

12 p2180 A70-26859

Weak plane waves propagation in binary mixtures of diatomic gases subject to vibrational relaxation, solving piston problem in acoustic approximation

12 p2209 A70-27151

Vibrational relaxation time and transition probability in bromine collisions with He, Ne, Ar, Xe atoms determined by shock wave method

12 p2275 A70-27353

Coupled relaxation dependence on translational and vibrational temperature and number of modes in polyatomic gases, noting molecular dissociation

12 p2276 A70-27797

Piston formed weak steady shock wave propagation in relaxing gases, investigating via characteristics method

12 p2212 A70-28206

Vibrational relaxation effect on supersonic flow past nose section of blunted body

12 p2159 A70-28231

Vibrational dissociation relaxation effects on chemical reactions, molecular energy and thermal quanta in air flow behind direct shock wave

12 p2213 A70-28232

Pulsed CO2 laser calculating upper level lifetime of carbon dioxide molecule with allowance for gas heating at relaxation

12 p2251 A70-28296

Strontium chloride lanthanum ion system with dynamic Jahn-Teller effect, indicating isotropic EPM spectrum resulting from averaging by relaxation

13 p2470 A70-29109

Hydrogen impurities anelastic relaxation effect on internal friction alpha peak in cold worked tantalum and niobium

13 p2435 A70-29350

Molecular Markov processes application to vibrational relaxation and dissociation, small system kinetics, nucleation and droplet growth, thermalization kinetics and diffusion processes

14 p2619 A70-30615

Three level molecular coherence effects in stimulated Raman scattering, considering molecular relaxation and field inhomogeneity

15 p2752 A70-32350

Transition probabilities for Markov chain describing bond breaking and molecular energy transfer in vibrational relaxation and dissociation

16 p2953 A70-33009

Chemical energy conversion in lasers, discussing vibrational inversions in diatomic and multiatomic molecules and chain reactions

16 p2927 A70-33233

Nonequilibrium vibrational energy and relaxation equation for carbon dioxide-nitrogen molecular gas mixtures in supersonic free jet exhausting into vacuum [AIAA PAPER 70-867]

16 p2895 A70-33910

Vibrational nonequilibrium nozzle flow problems, obtaining similar solutions for various initial conditions and nozzle geometries

17 p3065 A70-34459

Vibrational relaxation and energy transfer processes in gas dynamic flows, discussing cross sections, atom-molecule interactions, molecular rotation, kinetic equations, etc

17 p3068 A70-34670

Shock tube flow of dissociating oxygen with chemical relaxation using Lax method

17 p3070 A70-35243

Relaxation gas dynamics with chemical reactions, emphasizing differences and similarities with classical gas dynamics behavior

17 p3071 A70-35467

Nonequilibrium nozzle flows involving molecular vibrational energy relaxation and composition changes from gas phase chemical reactions respectively

17 p3071 A70-35469

Nonequilibrium gas states evolution in detached wave front of hypersonic blunt body, comparing vibrational relaxation in free flight and wind tunnel flow

18 p3335 A70-35962

Relaxation peaks associated with interaction clusters of Zr and N dissolved in Nb

18 p3274 A70-36056

Reacting gas relaxation with particle sink removing products from system calculating relaxation processes during equilibrium state approach

18 p3292 A70-36291

Relaxation time for nitrogen molecule vibration temperature in ionosphere due to thermal electron collisions

19 p3409 A70-37324

HD molecule nuclear relaxation time in liquid state as function of temperature, discussing various mechanisms

19 p3473 A70-37367

Laminar boundary layer equations on plate with arbitrary catalytic properties in diatomic gas flow undergoing vibrational dissociative relaxation

20 p3611 A70-39802

Weak steady shock waves formation in relaxing binary gas mixture, discussing vibrational specific heat temperature dependence

20 p3614 A70-40350

Rotational relaxation of diatomic molecular excited electronic state at high temperatures, discussing nonequilibrium region behind shock wave front in nitrogen

21 p3854 A70-42060

Diluent molecules effect on polymers relaxation behavior at cryogenic temperatures from internal friction measurements, noting loss peaks shift

21 p3844 A70-42138

Ultrasonic absorption in gaseous molecular relaxation processes, considering error due to neglecting thermal conductivity effect on frequency dependence

22 p4073 A70-42649

Hot air temperature decay, discussing relaxation process of lightning channel behavior

22 p4016 A70-42781

Relaxation gas dynamics, discussing vorticity and drag generation by relaxation, linearized theory and shock waves structure

23 p4178 A70-43889

CO vibrational relaxation measurements in shock tube expansion wave generated in argon heat bath

23 p4180 A70-44009

Vibrational relaxation measurements of specific carbon dioxide vibrational-rotational states from tunable carbon dioxide laser beam absorption

23 p4221 A70-44011

MOLECULAR ROTATION

Rotational excitation and scattering of diatomic molecules by structureless atoms, comparing approximation methods

01 p0147 A70-10470

Nitrogen and helium collisional effect on rotational relaxation rate of carbon dioxide upper laser level, noting thermalization

01 p0110 A70-10567

Rotational temperature of molecular nitrogen Vegard-Kaplan bands determined from auroral spectra, including variations in vibrational levels populations

01 p0076 A70-10873

Carbon dioxide laser with incorporated grating for measuring line strength to width ratio for various rotational lines

01 p0112 A70-10916

Rotational temperatures and methane abundances in Jovian atmosphere calculated for various Lorentz half widths

02 p0366 A70-11809

Quadrupole moment matrix elements in adiabatic approximation for transition bands of hydrogen, HD and deuterium molecules in ground electronic state

02 p0342 A70-11822

Rotation-vibration matrix elements of quadrupole moments and absorption coefficients of ground electronic states of hydrogen, HD and deuterium

02 p0342 A70-11823

Molecular rotations and kinetics from spectral features of molecular Raman spectra, using light scattering spectroscopy

02 p0343 A70-12077

Atmospheric oxygen A band individual rotational lines intensities and half widths measurements

02 p0344 A70-12656

Rotational compound state resonances in subthreshold atom-diatom scattering determined from lowest state molecular hydrogen and deuterium model systems scattered by Xe

03 p0526 A70-13006

Self broadened semihalf widths measurement in pure rotational spectrum of carbon monoxide compared with vibration-rotation calculation

05 p0886 A70-17086

Density effects on rotational temperature measurements in nitrogen by electron beam excitation, discussing emission intensity distribution
06 p1067 A70-18306

Hydrogen fluoride fundamental vibration rotation band spectral line shift and broadening due to carbon dioxide
07 p1337 A70-19365

Diatomic Br molecular vibration-rotation coupling effects on energy transfer during Br-Br collisions, determining probability distributions
07 p1339 A70-20054

Molecular N rotational temperature effect on rare gases scattering cross section
07 p1344 A70-20134

Rotational temperature of molecular beam by electron excited fluorescence method, discussing signal level, background light and scattering effects
07 p1345 A70-20140

Carbon dioxide laser emission spectrum, considering working mixture emission power and rotational relaxation characteristics
08 p1511 A70-20539

Diatomic gases, describing rotational distribution function evolution by diffusion equation approximation, discussing apparent relaxation times
08 p1548 A70-21521

Helical twisting power of steroidal solutes in cholesteric mesophases, discussing nematic temperature shift dependence on ester chain
08 p1455 A70-21524

Relative rotational lines intensities of carbon dioxide, considering sigma-sigma transitions for abundant isotopes
08 p1549 A70-21575

Lyman-Birge-Hopfield nitrogen bands high resolution emission spectrum, giving energy values of particular states together with corresponding rotational constants and band origins
09 p1730 A70-22067

Perturbation rotational levels in triplet states of CO emission spectra attributed to resonance fluorescence process involving optically forbidden transitions
09 p1731 A70-22282

Scattering equations and cross sections for rotational excitation in collisions of rigid diatomic molecules interacting through soft potential
09 p1732 A70-22901

Binary collision-induced rotational far IR spectrum of tetrahedral molecular gas, using induced absorption theory
09 p1732 A70-22905

Liquid crystal of cholesteryl chloride and myristate measured for complex dielectric constant, noting role of molecular rotation modes in dipole relaxation
12 p2180 A70-26859

Book on rotational structure of diatomic molecules spectra covering multiplets, intensity distributions and perturbations
12 p2274 A70-27094

CO vibration-rotation bands, calculating high resolution and temperature steradiance and spectral absorption coefficient
12 p2275 A70-27171

Rotational, vibrational and equilibrium molecular constants for Phillips system of diatomic carbon
12 p2275 A70-27174

Electron beam measurement of rotational and high vibrational temperature in molecular nitrogen
13 p2412 A70-29980

HF and DF continuous chemical lasers vibrational and rotational spectra, comparing lines and relative intensities
14 p2593 A70-30274

Rotational transition of interstellar formaldehyde in absorption in direction of galactic and extragalactic objects
14 p2641 A70-30878

Vibration-rotation band absorbance for nonisothermal gaseous radiation in terms of parameters describing isothermal gas
15 p2825 A70-31816

Vibrational energies, rotational constants and internuclear potential of ground state molecular iodine, using reanalyzed spectroscopic data
16 p2954 A70-33056

Night airglow hydroxyl rotational brightness temperature determined from emission spectra
19 p3412 A70-37777

Polar gas rotational relaxation time calculation, comparing volume viscosity and energy equation definitions
19 p3473 A70-38266

Diatomic molecules inelastic collision cross sections for specific rotational transitions, discussing S matrix energy requirements for statistical analysis
19 p3474 A70-38268

Formaldehyde rotational transition hyperfine components measured by molecular beam maser
20 p3702 A70-39008

Hydrogen molecules rotational excitation cross sections by electron impact in adiabatic excitation, discussing polarization and distortion effects
20 p3675 A70-39606

Molecular and noble gas rotational collision numbers from thermal transpiration measurements
20 p3738 A70-39995

Carbon dioxide and CO IR vibration-rotation spectral absorption coefficients, noting harmonic oscillator approximation
21 p3851 A70-40589

Electron collision frequency profile for energy loss rate in ionospheric G factor for air, considering rotational excitations of molecular oxygen and nitrogen
21 p3812 A70-40618

Rotational transition probabilities of molecular collisions, using time dependent perturbation theory along linear trajectories
21 p3853 A70-41390

Numerical molecular rotational transition probabilities and cross sections in HCN-HCN and ICN-ICN collisions, using perturbation theory and multipole potentials
21 p3853 A70-41391

Heavy atom skeletal molecular structure of asymmetric close-2,3-dicarbahexaborane from microwave rotational spectra
21 p3773 A70-41392

Laboratory measurement and low noise search in W3/OH for microwave emission lines in excited rotational level of interstellar OH
21 p3922 A70-41977

Rotational relaxation of diatomic molecular excited electronic state at high temperatures, discussing nonequilibrium region behind shock wave front in nitrogen
21 p3854 A70-42060

Liquid crystals orientational ordering molecular field theory examined by cluster variation method, predicting first order transition
22 p4085 A70-42485

Hydrogen chloride self broadened fundamental vibration rotation band intensity variation with pressure investigated by absorption spectroscopy analysis
22 p3983 A70-42945

Strong coupled rotational excitation problem in atom-diatom molecule scattering system, discussing transition probability matrices statistical analysis
23 p4212 A70-44600

Kinetic transport theory for mixed dilute gases consisting of linear rotating diamagnetic molecules in external homogeneous magnetic field
23 p4223 A70-44927

Rotational quantum numbers from iodine molecule resonance fluorescence measurements during laser excitation using Fabry-Perot interferometer
23 p4202 A70-44938

Narrow resonances in saturated absorption at molecular vibrational-rotational transitions in carbon dioxide laser
23 p4202 A70-45059

Rate equation study of multiwavelength far IR laser oscillations in water vapor, taking into account molecular rotation-vibration interaction
24 p4354 A70-45812

MOLECULAR SIEVES

U ABSORBENTS

MOLECULAR SPECTRA

NT ELECTRONIC SPECTRA

NT RAMAN SPECTRA

NT VIBRATIONAL SPECTRA

Carbon dioxide laser with incorporated grating for measuring line strength to width ratio for various rotational lines
01 p0112 A70-10916

Dispersed fluorescence spectra from vacuum UV photon impact on COS, noting absence of emission from higher vibrational levels
01 p0148 A70-11353

CH and CD molecules UV absorption spectra, using flash photolysis of diazomethane
02 p0341 A70-11795

Methane and ammonia absorption bands and possible structure of Jupiter and Saturn cloud layers by spectrophotometric observations
02 p0366 A70-11807

NH bands in stellar spectra by visual inspection of spectrograms, noting abundance of N in normal and strong CN stars
02 p0379 A70-12708

G values of hyperfine components of OH radical molecular vibrational-rotational levels determined using optical RF double resonance
02 p0345 A70-12822

IR spectra of M stars and alpha Tau obtained with Michelson interferometer, observing molecular features and water vapor absorption
04 p0747 A70-14548

Low resolution spectra of IR stars NML Tau, CIT 3, 6 and 13 considered inadequate for molecular band identification
04 p0748 A70-14591

Laser action observation on IR bands of first positive system of molecular nitrogen using pulsed excitation
04 p0704 A70-15625

Molecular fluorescence emission rate factors for strong bands of nitric oxide gamma systems, noting day airglow temperature dependence
05 p0886 A70-17085

Particle, momentum and energy flux spatial distributions of molecules scattered in collisions of low energy Ar atoms with mica and Ag surfaces
06 p1111 A70-18268

Excitation emission of diatomic nitrogen molecule for first negative band broadening, considering high energy primary beam with secondary electrons
06 p1124 A70-18305

Methylamine crystals lattice vibrations IR spectra recordings, making spectral band assignments according to translational and librational motions
07 p1356 A70-18958

Rotating and oscillating spectra in diatomic molecule excited by slow and fast electrons, discussing Boltzmann distribution of excited molecules
07 p1337 A70-19044

Pressure-narrowing theory applied to calculating equivalent widths of lines in quadrupole rotation-vibration spectrum of molecular hydrogen
07 p1338 A70-19366

Rotational temperature of molecular beam by electron excited fluorescence method, discussing signal level, background light and scattering effects
07 p1345 A70-20140

Perturbation rotational levels in triplet states of CO emission spectra attributed to resonance fluorescence process involving optically forbidden transitions
09 p1731 A70-22282

CH, CD and CH ion excited states decay rates determined from phase shift and frequency data, discussing implications for astrophysics
09 p1731 A70-22513

Critical review of paper on molecular oxygen microwave spectrum analysis
09 p1732 A70-22829

Photoelectric measurements of dust and CN/C2 molecular emission in atmosphere of Comet Ikeya-Seki
09 p1761 A70-23058

Emission and absorption by nonhomogeneous gases with vibration-rotation bands determined by scaling approximation
10 p1968 A70-24474

Interstellar atomic and molecular hydrogen abundance and physical state using rocket observations of Lyman alpha absorption line and ground based observations
10 p1941 A70-24551

Molecular line identification in sunspot spectrum of CN, diatomic carbon, TiO, MgH, CaH, NiH and water vapor
12 p2302 A70-27590

Electron impact excitation cross section of /O, first negative band of nitrogen ion from threshold to 3 keV, using photon counting techniques
12 p2276 A70-27880

Spectrographic measurements of Jovian Red Spot and Southern Tropical Zone molecular absorption bands related to cloud cover density and depth
12 p2311 A70-28305

CH molecule line formation mechanism for 4300 A transition in solar photosphere, noting collisions with hydrogen atoms
12 p2311 A70-28309

Stark cell with high electric fields for studying inactive IR spectrum of homonuclear diatomic gas molecules
13 p2450 A70-28499

Formation mechanism of molecular CN violet bands in solar photosphere
13 p2493 A70-29393

Atmospheric molecular oxygen photometric absorption spectral bands, calculating growth curves
14 p2572 A70-30403

High temperature molecules matrix isolation in saturated vapor over refractory solids, discussing optical spectroscopy of VO, metal oxide and halide molecules
14 p2545 A70-30903

Nitrogen dioxide continuum in green-white afterglow of molecular oxygen and nitrogen, using spectrometry and photometry
14 p2579 A70-31254

Vapor phase fluorescence spectra from benzene and deuterated benzene at zero point vibrational level
15 p2694 A70-31731

Hydrogen molecules rotational excitation cross sections by electron impact in adiabatic excitation, discussing polarization and distortion effects
20 p3675 A70-39606

Method of moments for determining wave functions used in calculating molecular properties
20 p3675 A70-39997

Oscillator strengths for aluminum oxide molecular electronic sigma band system from intensity measurements in cyanogen-oxygen flame system
20 p3676 A70-40474

Microwave transitions for molecules in comets and interstellar space
21 p3887 A70-41110

Absorption diffuse band systems of diatomic argon molecule in vacuum UV region

21 p3853 A70-41395

Steepest descent method for determining lowest ground state eigenvectors for molecular wave configurations

22 p4062 A70-42747

MgH molecular lines Zeeman splitting in sunspot spectra confirmed by photoelectric observations

24 p4400 A70-45308

MOLECULAR SPECTROSCOPY

NT RAMAN SPECTROSCOPY

Spectroscopic calibration of laser lines at simultaneous carbon dioxide and nitrous oxide transitions in gas flow, showing abnormal line intensity

03 p0501 A70-13685

API state lifetime of CO measured using molecular level crossing spectroscopy

10 p1920 A70-24629

Molecular I ground state dissociation energy value, proposing spectroscopic reassignment

12 p2180 A70-26861

IR spectroscopy, determining relative populations of carbon dioxide vibrational energy levels by comparing emission intensities

13 p2455 A70-29131

Atomic physics of lasers and active materials, noting multiplet spectra of atoms, molecular spectroscopy, energy level population distribution and amplification

[AIAA PAPER 69-63]

18 p3316 A70-36700

Saturated absorption spectroscopy of various molecules using emission spectra of carbon dioxide and nitrous oxide lasers

22 p4050 A70-43239

MOLECULAR STRUCTURE

Electric field effects on dielectric properties and molecular arrangements of cholesteric liquid crystals with temperature dependent helical pitch

01 p0160 A70-11352

Intramolecular triplet-triplet energy transfer between nonconjugated molecular chromophores held together by rigid molecular frame at known separation distance and mutual orientation

02 p0251 A70-12277

Biophysics research, discussing supramolecular biological structures, synthesis of proteins, nucleic acids and genetic codes, biological membranes, coding in nervous system, etc

03 p0420 A70-13491

Peroxides, superoxides and ozonides applications in industrial chemistry, semiconductors and rocket motor fuels, discussing chemical structure and properties and nomenclature

05 p0810 A70-15768

Computer program to decide structure for aliphatic ketone from low resolution mass spectrum using DENDRAL algorithm

05 p0810 A70-16048

Cytosine-thymine transitions from cytosine-5-H3 decay in bacteriophage S13 DNA, discussing coding change efficiency

05 p0803 A70-16948

Kinetic relaxation and Boltzmann equations for studying shock waves propagating in gas composed of rigid ideally elastic spherical molecules without internal degrees of freedom

06 p1036 A70-17756

Dialkyl ketone ion in double McLafferty rearrangement, applying ion cyclotron resonance to structural study

08 p1454 A70-20525

Amino acid sequence of Chromatium ferredoxin molecule compared with other ferredoxins concerning structural, functional and evolutionary relationships

13 p2361 A70-28921

Structural and functional properties of phosphates in biochemical reactions, discussing linkages

14 p2544 A70-30346

Water structure role in membrane systems, considering phase transitions and thermal anomalies in surface properties

16 p2847 A70-33027

Molecular structural relationship between cellular membranes and photoreceptors in plants and animals

16 p2847 A70-33028

Organic molecules topology, discussing Hamilton circuits, DENDROL applications, etc

16 p2855 A70-33298

Vibrational spectra and structure of oxalyl chloride in crystalline and fluid states, discussing molecular and space group symmetry

16 p2857 A70-34006

IR Raman and vibrational spectra and structure of gaseous and liquid 1-pyrazoline

16 p2857 A70-34007

IR and Raman spectra of gaseous and liquid germylcyclopentane, determining torsional barriers and skeletal ring atom symmetry

16 p2858 A70-34008

Heavy atom skeletal molecular structure of asymmetric close-2,3-dicarbahexaborane from microwave rotational spectra

21 p3773 A70-41392

Combustion rate as function of oxidizer molecular refractivity in perchlorates and nitrates of aliphatic and aromatic mono- and polyamines explosives

21 p3783 A70-42241

Atomic and molecular spin in cosmic medium

22 p4107 A70-43460

High modulus carbon fibers production and properties describing polymer chains intermolecular structuring by pyrolysis and strength increase by fibers stretching at 2700 C

24 p4366 A70-45166

Polymers strength and stiffness properties, considering different molecular chain alignments as related to elastic modulus

24 p4366 A70-45173

Fluorescent probes inserted into biological membranes for molecular structural and dynamic facets

24 p4304 A70-46231

MOLECULAR THEORY

Absorption and luminescence in complex molecules and semiconductors, describing particle distribution and Fermi quasi-levels dependence on temperature and excitation intensity

08 p1555 A70-20510

Molecular-statistical theory of second-harmonic light generation by isotropic bodies immersed in external AC or DC electric field

10 p1916 A70-24379

Resonant electron scattering processes in atoms and molecules, discussing mechanistic models and use in interpretation of experiments

16 p2955 A70-33798

Liquid crystals orientational ordering molecular field theory examined by cluster variation method, predicting first order transition

22 p4085 A70-42485

MOLECULAR TRAJECTORIES

Molecular size dependent steric effects in translation-vibration energy transfer by velocity dispersions in cyclopropane-inert mixtures

21 p3780 A70-41706

MOLECULAR WEIGHT

NT LOW MOLECULAR WEIGHTS

Critical impurity concentrations of He-Ne laser quenching determined with mass spectrometer, giving impurities molecular weight and ionization potential for input powers

01 p0110 A70-10491

Laminar isothermal entrance flows in circular cross section ducts with uniform mass injection at wall from boundary layer equations, discussing molecular weight effects

02 p0288 A70-12859

Polysiloxanes morphology crystallized isothermally from melt using electron microscopy, noting fracture ease increment with molecular weight decrease

03 p0517 A70-14203

Unsaponifiable, molecular weight acids, alcohols and esters effect on rheological properties of lithium lubricants based on synthetic fatty acids

06 p1076 A70-17800

Two temperature gasdynamics for binary gas mixtures of differing molecular weight components, analyzing ultrasound and shock wave propagation

08 p1486 A70-21808

Injectant stagnation temperature and molecular weight variation effect on flow field generated from secondary gas injection into supersonic stream

09 p1733 A70-23217

[AIAA PAPER 69-1]

Injectant stagnation temperature and molecular weight effects in jet interaction flowfield

11 p2036 A70-25989

Fluidic oscillator molecular weight of flowing mono- and polyatomic gases, discussing frequency dependence on pressure drop and temperature

17 p3081 A70-34515

Mean molecular mass determination method for upper atmosphere based on Nicolet equation for scale height, using satellite orbit and spin decay data

17 p3138 A70-35773

ELF and VLF propagation for perturbed ionosphere models, discussing effects of ion collision frequencies and molecular weights

20 p3585 A70-39454

T4 phage proteins radioisotopic examination, determining quantitative analysis and molecular weight by autoradiography

20 p3583 A70-40325

Poly/perfluoroalkylene oxides/ preparation and curing, considering molecular weight and thermal stability

21 p3783 A70-42145

Propellant binder prepolymers functionality distribution, examining solute concentration, solvent type and temperature effects on number average molecular weight measurements

21 p3865 A70-42146

MOLECULES

NT DIATOMIC MOLECULES

NT MONATOMIC MOLECULES

NT POLYATOMIC MOLECULES

NT TRIATOMIC MOLECULES

Source power molecule lifetime, acceleration and particle velocity in region near comet nucleus determined from brightness

07 p1378 A70-19036

K and M star molecular constituent density calculations using model atmospheres and observations

20 p3702 A70-39015

Photoelimination reactions of macromolecules, emphasizing intermediate pathways heuristic description via energy level diagrams

23 p4157 A70-44391

MOLIERE FORMULA

U COSMIC RAY SHOWERS

U SECONDARY COSMIC RAYS

U SPATIAL DISTRIBUTION

MOLLUSKS

Aplysias periodic spontaneous gill movements controlled by central neuron activity in abdominal ganglion

04 p0629 A70-14425

MOLNIYA SATELLITES

Molniya 1 communication satellite attitude control involving automatic solar panel and antenna orientation, using powered gyroscopic stabilizers

13 p2499 A70-28387

Soviet communication satellites orbit and design characteristics, operational uses and ground stations, discussing Molniya 1 series transmitting television, multichannel radio, telephone and telegraphy

18 p3230 A70-37225

SECAM video and audio color TV transmission over Molniya satellite relay path

23 p4162 A70-44091

MOLTEN SALT ELECTROLYTES

Molten carbonate fuel cells power source for military applications, considering catalytic recycle reformer

08 p1439 A70-20703

Fuel cells phase equilibria between carbonate melt and Li, Na and K solid aluminate electrolytes, analyzing thermal and electrical conductances

10 p1830 A70-24458

Molten lithium sodium carbonate electrolyte decomposition and evaporation at high temperatures in various atmospheres, noting water and carbon dioxide additives effects

12 p2166 A70-27763

MOLYBDATES

NT LEAD MOLYBDATES

MOLYBDENUM

X ray topography of postannealing substructure of neutron irradiated W and Mo single crystals, indicating increase in disorientation

01 p0115 A70-10065

Disk-shaped Mo and Nb specimens solar radiation reflection and absorption characteristics observed for temperature effect

01 p0117 A70-10176

Polycrystalline Mo ductility at low pressures in tension at ambient temperature, discussing H type embrittlement mechanism

01 p0121 A70-11234

Recrystallization diagrams of commercially pure Mo and Mo alloyed with Fe, Co or Fe plus Ni, noting additions effect on recrystallized grain size

01 p0124 A70-11616

Mo coated with Ni-base Nimonic and Co-base heat resistant alloys, for working degree effect on creep rupture strength

01 p0126 A70-11646

Molybdenum cylinders strength and plasticity under various compression and cyclic tensile loads

02 p0315 A70-11662

Temperature effects on tensile deformation mechanism of Mo single crystals, investigating stress-strain characteristics and slip geometry

02 p0316 A70-11699

Thermionic emission characteristics of W and Mo subjected to focused CW carbon dioxide laser radiation, discussing direct energy conversion

02 p0312 A70-12068

Titanium aluminide-Mo system hardness, electrical conductivity and density as function of chemical composition, presenting creep test results

03 p0510 A70-13353

Brittle fracture in neutron irradiated and nonirradiated Mo specimens tested in tension and compression at low temperature

03 p0513 A70-14013

Mo/Mo cylindrical thermionic converter steady state performance, measuring efficiency and power density at various low emitter and collector temperatures

04 p0627 A70-14947

Ductile-brittle transition temperature relation with grain size in polycrystalline Mo as function of annealing temperature

05 p0862 A70-15907

Binary system Mo-C determined in temperature range 1250-2270 C, using microscopic and thermal analyses and microhardness testing

05 p0862 A70-16198

Strength and plasticity of Mo and Nb sheet in oxidizing medium at high temperatures and pressure range

05 p0865 A70-17029

Chromized molybdenum thermal stability under cyclic induction heating and subsequent air cooling

07 p1304 A70-18743

Molybdenum rolling-deformed single crystals recovery and recrystallization using diffraction electron spectroscopy

07 p1307 A70-19550

Carbides content determination in Mo single crystals by metallographic method, establishing relation between brittle-ductile transition temperature and carbon content

07 p1308 A70-19607

Cylindrical Mo single crystals during cyclic heating, studying characteristic dislocation changes at various stages of thermal fatigue

07 p1308 A70-19609

Oriented single crystals properties obtained from Mo powder subjected to compacting, annealing in hydrogen and electron beam zone melting

07 p1308 A70-19610

Size effect on structure and mechanical properties of thin wire made of Mo single crystals deformed in recrystallized state

07 p1308 A70-19611

Structure and mechanical properties of Mo single crystals grown from gas phase using metallographic and X ray analysis

07 p1308 A70-19612

Rolling texture and recrystallization of Mo single crystals and deformation effect on texture formation using X ray transmission technique

07 p1309 A70-19613

Molybdenum single crystals orientation effect on thermal resistance to argon plasma flow

07 p1309 A70-19614

Interstitial atoms effect on dislocation relaxation and aging of Mo and Nb single crystals

07 p1309 A70-19638

Tracks shape associated with dislocation motion during etching of Mo single crystals

07 p1309 A70-19639

Fatigue crack growth in polycrystalline Mo at room temperature under cyclic loads observed along grain boundaries

07 p1314 A70-20013

AIN deposition rate from gaseous phase on Mo substrate as function of temperature

07 p1357 A70-20311

Low energy ions incidence angle effects on secondary electron emission from molybdenum cylinders in low pressure plasma, noting role of Langmuir sheath around target

07 p1355 A70-20356

Mo effect on structure and properties of Ni-Al-Nb system alloys in gamma and gamma prime solid solutions range, discussing high temperature strength

08 p1514 A70-20549

Mo mechanical properties dependence on surface defects and Ti films

08 p1515 A70-20937

Reduction temperature effects on molybdenum powders sinterability noting dispersion role

08 p1517 A70-21145

Combined solubility of group IVA metals and carbon in solid state molybdenum at various temperatures

09 p1704 A70-22754

Thermochemical predictions for high temperature oxidation of Mo and W, discussing oxide films or scales, reactant gases flow rate, etc

09 p1630 A70-22943

Molybdenum heat capacity, electrical resistivity and thermal radiation measurements at high temperatures with millisecond resolution

09 p1706 A70-22955

D-pattern changes of helium ions irradiated polycrystalline Mo and Ni specimens, observing line splitting

09 p1707 A70-23197

Mo single crystals creep behavior temperature and stress dependences using X ray analysis

09 p1708 A70-23543

Mo single crystals dislocation substructure strain dependence after creep using etch pitting techniques

09 p1708 A70-23544

Oxygen solubility in liquid Mo in presence of volatile oxides, determining equilibrium constant of dissolution reaction

09 p1709 A70-23784

High temperature creep of prestrained molybdenum single crystals as function of physical treatment and crystal orientation

10 p1902 A70-23860

Chemisorption on Mo single crystal surfaces observed by LEED techniques, discussing bcc planes and adsorbed gases

12 p2181 A70-27256

Foil decarbonization process monitored by mass spectrometry of secondary carbon ion emission

12 p2254 A70-27311

Polycrystalline molybdenum desorption of adsorbed hydrogen, oxygen and water by electron impact

12 p2182 A70-27679

Interstitial solid solutions stability in cast molybdenum subjected to heat treatment

12 p2257 A70-28225

Corrosion resistance of molybdenum coatings on steel and Pb-Bi eutectic alloy obtained by vacuum contact fusion method

12 p2258 A70-28320

Pure Mo recrystallization deformed by cold rolling using transmission electron microscopy

14 p2597 A70-31284

Initial stages of Ti vapor deposition on Mo, using secondary ion-ion emission and mass spectral analysis

15 p2757 A70-32120

Stress relaxation of Mo under plastic deformation controlled by diffusion of interstitial atoms and dislocations, determining activation energy

15 p2758 A70-32124

Flow stress and dislocation density dependence on temperature in polycrystalline molybdenum

16 p2930 A70-33085

Mo powder compacting by hot pressing, determining activation energy

16 p2931 A70-33222

Constant grain size cast Mo ductile-brittle transition temperature dependence on annealing temperature using tensile test

16 p2933 A70-34274

Siliconizing of Mo in medium with silicon chloride, comparing reaction probabilities for various heating methods

17 p3102 A70-35392

Diffusion during high temperature exposure of protective coatings on Mo, noting compact layers and carbide forming elements effect on thermal stability

17 p3125 A70-35404

Baron thermal diffusion effects on plastic of pure Mo subjected to recrystallization

17 p3102 A70-35408

Temperature dependence of materials with protective coatings, emphasizing mechanical properties of Mo with various diffusive coatings

17 p3126 A70-35716

Electron radiation damage and stage 3 annealing effects on polycrystalline Mo properties

19 p3451 A70-37570

Substrate and thickness dependence of electrical and superconductivity properties of rhenium and molybdenum films prepared by electron beam evaporation

19 p3485 A70-37684

Nitrogen diffusion coefficient in Mo and W using degassing method

19 p3452 A70-37828

Molybdenum cylinders strength and plasticity under various compression and cyclic tensile loads

19 p3453 A70-38436

Mo-Si system phase diagram by X ray, microstructural and thermal differential analyses, identifying eutectic, peritectic and eutectoid equilibria

20 p3649 A70-39773

Mo microstructure changes at high temperatures, noting polygonization, grain migration and crack propagation during failure

22 p4055 A70-43125

Mo single crystals tensile properties at different orientations, noting asymmetric slip in plastic behavior

22 p4056 A70-43155

Slip, fracture and rupture in sintered and cast ductile and brittle polycrystalline Mo under tension, using optical and electron microscopy

23 p4204 A70-43884

Convective diffusion limited oxidation of Mo, measuring kinetics up to 2000 K by rotating disk method

24 p4358 A70-45233

Aluminum oxide growth rate in molybdenum cermet after high temperature annealing

24 p4359 A70-45478

Diffusive carbon redistribution in Mo during interaction with Ni and Cr protective coatings

24 p4364 A70-46334

MOLYBDENUM ALLOYS

NT RENE 41

Roller bimetallic Ni-Mo mechanical properties produced by powder metallurgy methods

01 p0116 A70-10157

Recrystallization diagrams of commercially pure Mo and Mo alloyed with Fe, Co or Fe plus Ni, noting additions effect on recrystallized grain size

01 p0124 A70-11616

Nb-Mo alloys in various proportions prepared by vacuum casting, showing embrittlement under hydrogen atmosphere

02 p0318 A70-12671

Complexonometric analysis of alloys containing Mo without component separation, treating molybdenum aluminides, zirconium boride-molybdenum silicide, molybdenum carbide in Ti, etc

03 p0504 A70-12980

Mo separation from W during chemical analysis of W in binary Mo-W alloys, using organic reagents for precipitation and extraction

03 p0504 A70-12982

Phase alteration quenching effects in Ni-Mo alloys, discussing high temperature alpha region, isothermal annealing below peritectoid temperature and metastable nickel molybdenide phase

03 p0508 A70-13143

Nb-Mo alloy interstitial oxygen concentration determined by measuring internal friction /Snoek/ peak

03 p0512 A70-13763

Extension characteristics of delta and sigma related phases in Mo-Ni ternary systems and evaluation of unit cell dimension variations on alloying

04 p0704 A70-14392

Oxidation behavior of TiC base alloys containing Mo

04 p0708 A70-15312

Book on optimization by variational methods covering use of differential equations, Pontryagin minimum principle, optimal and feedback control, dynamic programming, etc

06 p1093 A70-17650

Mo-nitrogen interaction, studying nitriding influence at various temperatures on Mo alloys properties

06 p1089 A70-17741

Diffusion layer and protective oxide composition changed to increase chrome plated Mo heat resistance

06 p1089 A70-17742

Annealing atmosphere effect on permeability of Mo Permalloy

07 p1304 A70-18814

Oxygen content influence on Nb-Mo alloy mechanical properties at ambient temperature in air and hydrogen

07 p1307 A70-19374

Mo sheet longitudinal and transverse mechanical properties and microstructure after annealing

08 p1517 A70-21199

Cr-Mo steel strength and structural stability during tubular stress-rupture testing with high pressure hydrogen, discussing welding effect on strengths

08 p1519 A70-21455

Ni-Mo surface alloys investigated by low energy electron diffraction, using tabulated symmetry and extinction properties of space groups and phase diagrams

08 p1557 A70-21603

Dynamic strain aging effect on Mo-Ti-C alloy creep, relating carbides precipitation during plastic deformation to mobile dislocations density

08 p1524 A70-21954

Cleavage fracture of Ta-Mo bcc alloys, investigating short range ordering and size effects by X ray diffraction

09 p1708 A70-23573

Hot shortness of molybdenum alloys under tensile testing due to molybdenum carbide precipitation on grain boundaries

11 p2066 A70-25914

Heat resistance and elastic properties of binary Ti-Mo alloys as function of phase structure and chemical composition

11 p2066 A70-25915

Carbide-strengthened Mo alloys dynamic strain aging processes

12 p2255 A70-27605

Plastic deformation of Mo-Re single crystals produced by electron beam zone refining, investigating lattice frictional stress, activation volume temperature variation, etc

13 p2436 A70-29562

Nitrogen solubility in Nb-Mo solid solutions, determining relationship between N partial pressure, temperature and concentration

14 p2598 A70-31285

Beta phase decomposition kinetics and strain hardening inhibitions in Ti-base Mo alloys, using metallographic, dilatometric and X ray analyses

15 p2764 A70-32855

Ti-Mo cermet alloys properties and production technology, testing corrosion resistance

16 p2931 A70-33220

Working fluid /Ar/ purity and stability effects on fatigue life and creep of Nb and Mo alloys using gas analysis, microstructure and microhardness data

17 p3126 A70-35715

Mechanical properties of binary Ti-Ni and ternary Ti-Mo-Ni alloys

18 p3275 A70-36122

Cross sectional phase diagram of Nb-Ti-Mo-V, discussing continuous crystallization and composition dependent hardness and resistance

18 p3275 A70-36125

Mo alloying additions effects on carbide phases in Nb-C alloys

20 p3646 A70-39104

Nb-Ta and Nb-Mo alloys single crystal solid solution strengthening as function of composition, temperature and strain rate

20 p3646 A70-39105

Sintered boron-alloyed Mo electron beam welding behavior examined by texture-revealing color etching method

21 p3833 A70-41411

Ni-Nb-Mo, Ni-Nb and Ni-Mo alloys phase equilibrium

21 p3840 A70-41898

Recrystallized and nitrided Mo alloy microstructure under plastic deformation by tension at high temperatures

22 p4038 A70-43122

Vacuum-melted and deformed Mo alloys tests, showing long term strength decrease under cyclic heating 22 p4055 A70-43123

Low alloy Mo sheet recovery and aging characteristics studied by X ray scattering 22 p4055 A70-43124

Mo alloys strengthening by hydrostatic extrusion, combining dynamic strain aging with low temperature strain hardening 24 p4341 A70-45251

Phase regions and lattice parameters of isothermal section of Mo-Zr-Cr system at 1100 C from microstructural and X ray analyses 24 p4361 A70-45832

Ti-Mo and Ti-Mn alloys omega transition phase, describing shape and crystallographic characteristics 24 p4361 A70-46178

MOLYBDENUM CARBIDES

Carbides content determination in Mo single crystals by metallographic method, establishing relation between brittle-ductile transition temperature and carbon content 07 p1308 A70-19607

Phase equilibria, crystallization and solidus surface in transition conode triangle of ternary system Mo-Ti-C at high temperatures 07 p1310 A70-19804

Phase transformations of molybdenum carbide under elevated temperature in vacuum, using X ray and differential thermographic analysis 13 p2433 A70-28852

Carburizing spherical powders of Nb, Mo and W to obtain carbides, noting agreement between theoretical and experimental data 17 p3125 A70-35410

Molybdenum carbization in methane-based plasma glow discharge, considering possible pyrocarbon layer formation and temperature effects 19 p3434 A70-37456

MOLYBDENUM COMPOUNDS

NT LEAD MOLYBDATES
NT MOLYBDENUM DISULFIDES
NT MOLYBDENUM OXIDES

Synthetic molybdenum diselenide oxidation kinetics between 375-530 C, determining isothermally reaction rate constants in dry air [ASLE PREPRINT 69-LC-8] 02 p0321 A70-12537

German monograph on sintered molybdenum silicide recrystallization following high temperature heating in oxidizing atmosphere 24 p4367 A70-45575

Molybdenum disilicate and aluminum oxide coating sealing heat resistance tests 24 p4364 A70-46341

MOLYBDENUM DISULFIDES

Molybdenum disulfide surface and bulk properties, comparing endurance of fractions and grades with synthetic chalcogenides at same layer thickness in dry atmospheres [ASLE PREPRINT 69-LC-7] 02 p0322 A70-12538

Molybdenum disulfide solid film lubricant with increased wear life developed from in situ conversion of electrodeposited molybdenum trioxide 06 p1091 A70-17339

Burnishing load and time effect on deposition, endurance limit of lubrication and wear-in characteristics of molybdenum disulfide powder films 08 p1508 A70-21516

Service life and friction coefficient of molybdenum disulfide-silicon lubricating coating as function of load, sliding rate and vacuum level 11 p2060 A70-25943

Transformations on surfaces of molybdenum disulfide-stem system during friction in air, noting Mo oxides formation and friction coefficient increase 13 p2421 A70-29427

Molybdenum disulfide and phenol formaldehyde resin lubricants for hydroextrusion of steel 15 p2743 A70-31639

Molybdenum disulfide abrasiveness on test rings coated with bonded solid lubricant [ASLE PREPRINT 70AM 5A-1] 19 p3439 A70-38811

MOLYBDENUM OXIDES

Transformations on surfaces of molybdenum disulfide-stem system during friction in air, noting Mo oxides formation and friction coefficient increase 13 p2421 A70-29427

MOLYBDENUM SULFIDES

NT MOLYBDENUM DISULFIDES
Synthetic molybdenum disulfide crystal properties compared to natural crystals, discussing friction coefficient, adherence to metal surfaces, etc 10 p1907 A70-24787

Molybdenum disulfide dry film lubricant wear life as film sintering process dependent on binder, additive or atmosphere chemical effects 11 p2058 A70-25571

MOMENT DISTRIBUTION

Moment methods for calculating modeled diffusion gas mixture shock waves using Monte Carlo method, discussing distribution function and flow pattern 06 p1050 A70-18336

Differential equations of motion for body with stationary point, allowing for Kovalevskaja conditions and assuming nonzero gyrostatic moment 09 p1726 A70-22149

Zero moments surface in problem of two immovable centers, taking into account cosmic dust accumulation before binary apex moving forward with periastron of bright component 18 p3324 A70-37147

Mathematical theory of constitutive relations connecting surface tractions and moments with motion of single body in continuum 20 p3672 A70-39495

Method of moments for determining wave functions used in calculating molecular properties 20 p3675 A70-39997

MOMENTS

NT BENDING MOMENTS
NT DIPOLE MOMENTS
NT DISTRIBUTION MOMENTS
NT ELECTRIC MOMENTS
NT LOADING MOMENTS
NT MAGNETIC MOMENTS
NT MEAN
NT MOMENTS OF INERTIA
NT PITCHING MOMENTS
NT ROLLING MOMENTS
NT STABILITY DERIVATIVES
NT STANDARD DEVIATION
NT TORQUE
NT VARIANCE [STATISTICS]
NT YAWING MOMENTS

Dynamic behavior and moments of oscillatory systems under steady perturbations using linear differential equations 12 p2261 A70-27555

Bipolar moment integral in celestial mechanics formed by product of particle kinetic moments for n body problem order reduction 13 p2494 A70-29399

Delayed moment of force relativistic definition within reference of inertia, discussing lever bent at right angles 13 p2452 A70-29635

Piezoelectric force and moment measurement by quartz multicomponent devices 19 p3426 A70-37937

Piezoelectric sensors for multicomponent force and moment measurement 20 p3635 A70-40533

Non-Chebyshevian moments induced by system of linearly independent functions expanding to semi-infinite programs 23 p4211 A70-44243

Algorithm for moment problems in Chebyshev system with applications to numerical integration, series summation and function approximation 23 p4211 A70-44244

MOMENTS OF INERTIA

Inertia forces effect in turbulent and laminar, self acting and infinitely long film bearings, considering compressible and incompressible lubricants [ASME PAPER 69-LUB-2] 01 p10103 A70-10400

Inertia cross coupling during aircraft design stage allowing later flight testing, discussing analysis complexity and sensitivity to aerodynamic data change 01 p0007 A70-11315

Sinusoidal test for measuring knee moment increase required to flex and extend for various conditions of knee angle, angular velocity and steady knee moment 02 p0238 A70-12546

Eddington equation for white dwarf pulsation solved by treating eigenfunctions as differential moment of inertia functions 04 p0751 A70-15050

Human body turning /orienting/ in unsupported /weightless/ position by own muscular forces, determining inertia moments of body and parts relative to various axes 07 p1207 A70-19495

Perturbed gyroscopic system consisting of disk hinged by rigid weightless rod, investigating stability condition at axial and equatorial inertia moments 08 p1496 A70-21210

Ionosphere sounding satellite attitude variation dependence on transverse moments of inertia 10 p1949 A70-23918

Uniform beams flexural vibration natural frequencies approximate calculation showing effect of shear flexibility and rotatory inertia 10 p1959 A70-24562

Inplane and rotary inertia effects on free vibration frequencies of circular cylindrical shells eccentrically stiffened by orthogonal set of stringers and/or rings 11 p2135 A70-25993

Free elastic rotating beam with tip masses and inertia, developing solutions for flexible modes and natural frequencies of H-type configuration 12 p2273 A70-27820

Circular orbit gravitationally stabilized satellite oscillation damping by changes of moments of inertia 13 p2501 A70-28420

Effective moment of inertia in quantum mechanical three body problem, applying specific decoupling to wave functions 13 p2452 A70-29478

Human body turning /orienting/ in unsupported /weightless/ position by own muscular forces, determining inertia moments of body and parts relative to various axes 15 p2685 A70-32740

Optimal orientation of axisymmetric spin stabilized rigid bodies as function of moments of inertia ratios, using single jet for alignment [DFVLR-SONDDR-50] 16 p2976 A70-33773

Inertia forces effect in turbulent and laminar, self acting and infinitely long film bearings, considering compressible and incompressible lubricants [ASME PAPER 69-LUB-2] 19 p3435 A70-37613

Stress differential equations of micropolar elasticity, considering mass forces and moments of inertia 19 p3459 A70-38672

Variable wing sweep aircraft angular motion mathematical model, analyzing inertial moments influence on control dynamics 20 p3562 A70-40182

Shape factors for weight prediction and design optimization of structural members requiring given area moment of inertia [SAWE PAPER 828] 20 p3732 A70-40354

Optimal moments of inertia of rigid satellite in circular orbit by generalization of Beletskij concept, discussing libration boundaries 23 p4261 A70-44677

MOMENTUM

NT ANGULAR MOMENTUM

Turbulent boundary layers behavior prediction by strip integral momentum equation method, considering velocity profiles and shear stresses 02 p0282 A70-12332

Momentum integral method for turbulent boundary layers based on equilibrium profiles family, considering weighting function specification techniques 02 p0284 A70-12345

Spatial distribution function calculation for muons in extensive air shower model and secondary particles mean transverse momentum estimation 03 p0556 A70-13039

Atmospheric momentum and heat flux height variations in surface boundary layer, stressing instrument performance and measurement techniques 09 p1715 A70-22359

Laminar boundary layer in adverse pressure gradient calculated for momentum thickness from approximate equation, analyzing error 09 p1660 A70-22832

Vertical momentum flux correction for planetary scale gravity waves in equatorial lower stratosphere 13 p2445 A70-29623

Electron momentum distribution function of p-type semiconductor with arbitrary band structure under electric and magnetic fields 17 p3144 A70-35704

Subcritical and supercritical boundary layer problems, reviewing various momentum integral solution methods 18 p3242 A70-36705

Liquid fuel jet engine thrust aftereffect momentum, investigating switching off transient process 19 p3490 A70-37249

Insular system energy and momentum definition in external gravitational field, using dynamic equations and Einstein theory 19 p3513 A70-37412

Jet momentum for flow separation control of air past circular cylindrical surface 24 p4288 A70-46011

MOMENTUM ENERGY

U KINETIC ENERGY

MOMENTUM PRECESSION

U PRECESSION

MOMENTUM THEORY

Equations of hydrodynamics governing perfect fluid in second postNewtonian approximation to general relativity, deriving energy momentum tensor equation 02 p0337 A70-11776

Integral method for turbulent shear flow based on momentum and moment-of-momentum equations and Cole velocity profile family, determining shear stress integral 02 p0282 A70-12329

Modified Granville moment of momentum method used with integral equations in integral moment method for turbulent boundary layer flow, considering pressure gradient influence 02 p0282 A70-12334

Momentum integral method using auxiliary equation for two and three dimensional flow problems 02 p0284 A70-12344

Mean flow velocity distribution calculated from momentum deficit superposed behind single cylinders in finite array of arbitrarily spaced parallel cylinders [ASME PAPER 69-WA/FE-11] 04 p0614 A70-14781

Na abundance in terrestrial upper atmosphere, solving steady state continuity and momentum equations for Na atoms and ions 05 p0840 A70-16475

MOMENTUM TRANSFER

Suddenly started laminar flow in circular tube entrance region, obtaining integral momentum equation for boundary layer thickness, entrance length, velocity profile, etc

06 p1034 A70-17528

Momentum considerations in thunderstorm dissipation by disrupting organized cloud base updraft structure

06 p1100 A70-18570

Turbulent flow downstream from abrupt widening of circular jet, using flow and momentum equations

10 p1870 A70-24782

Momentum theory of small elastic-plastic deformations, proving minimum potential energy, simple loading and elastic unloading theorems

11 p2128 A70-25387

Energy and canonical momentum relationship in relativistic mechanics, discussing particle production and annihilation

13 p2453 A70-29721

Maximum impact accelerations of spherical and conical bodies landing on water, using momentum theorem

15 p2722 A70-32524

Fermi momentum upper limit for universe neutrinos in cosmic ray propagation, determining maximum proton energy

20 p3700 A70-39592

Momentum source interaction with viscous uniform stream, constructing perturbation solutions from nonlinear equations

24 p4327 A70-46040

MOMENTUM TRANSFER

Two phase flow in cylindrical channel, formulating maximum momentum flow variational principle for laminated adiabatic vapor- and gas-liquid flows

01 p0213 A70-10216

Wet vapor flow with/without inert diluent, assuming momentum and heat transfer between phases according to Stokes law and Nusselt number of unity

01 p0061 A70-10332

Prediction systems for turbulent boundary layers, noting momentum integral equation use in all integral methods

02 p0281 A70-12327

Method of weighted residuals /MWR/ for nonlinear partial differential equations applied to incompressible two dimensional turbulent boundary layer momentum and continuity equations

02 p0281 A70-12328

Heat and momentum transfer efficiency of thermal convection, calculating eddy coefficients for vertical transfer

05 p0831 A70-15876

Laminar sublayer resistance to momentum and heat transfer, noting effects of Prandtl number and surface roughness using mathematical model and experiments

06 p1034 A70-17680

Momentum transfer from neutral nitrogen molecules to solid surfaces measured for various incident beam molecule energies

06 p1112 A70-18272

Monte Carlo analysis of free and near free molecular flow through circular tubes for mass, momentum and energy transfer

06 p1051 A70-18367

Tropospheric and stratospheric turbulent horizontal heat and momentum transfer spectral density profiles calculations from radio launchings data

07 p1269 A70-19646

Correlation functions for resistance to heat and momentum transfer in viscous sublayer at rough walls defined for varied geometry flows [ASME PAPER 69-HT-2]

08 p1486 A70-21833

Heat, moisture and momentum fluxes measurement in atmospheric boundary layer, discussing instrumental accuracy necessary for various measuring techniques

09 p1717 A70-22379

Momentum transport bounds in turbulent shear flow using variational methods

11 p2039 A70-26535

Reynolds momentum and mass transport at velocity half radius of coaxial jet compared to eddy viscosity models

14 p2564 A70-30260

Sound propagation in atmospheric fog, considering mass, momentum and energy transfer mechanisms between particles and gas

15 p2769 A70-31443

Monograph on momentum, heat and mass transfer rates to vertical continuous cylinder moving through quiet fluid in forced and free convection

15 p2825 A70-31694

Optimal desaturation of angular momentum exchange controllers in spacecraft attitude control systems, using natural environmental torques

16 p2947 A70-33345

Gas-particle mixture cascade flow over turbine blades, considering momentum/heat transfer and particle trajectories

16 p2835 A70-33569

Stellar mass loss, considering radiation field momentum transfer or coronal heating as mechanisms

17 p3157 A70-34841

Energy and momentum exchange between gases in elastic collisions at different temperatures and velocities

19 p3551 A70-37538

Periodic thermal forcing role in Venus atmosphere dynamics, investigating momentum transport to support mean shear for channel flow

19 p3519 A70-38251

Meridional transport of angular momentum in various wavenumber-frequency domains, discussing linear and nonlinear contributions

19 p3462 A70-38258

Intercomponent momentum and energy exchange in weakly ionized gases, examining kinetic theory of subsonic and supersonic transport processes

19 p3482 A70-38945

Thin radiating shock layer about axisymmetric blunt bodies, investigating energy-momentum transport coupling

21 p3950 A70-41746

Structural configurations effect on momentum imparted to spacecraft by hypervelocity meteoroid impact

21 p3938 A70-41879

Energy deposition in solar corona associated with momentum transfer from heating wave in transition region, discussing wave pressures

21 p3925 A70-42190

Plasma sheath boundary in anisotropic plasma taking into account ionization rate, momentum transferring collisions and finite ion temperature

22 p4077 A70-42291

MONATOMIC GASES

Atomic O, H and D and molecular oxygen, deuterium and sulfur hexafluoride effects on nitrogen vibrational population distribution in nitrogen afterglow

01 p0148 A70-11356

Hydrodynamic equations and Grad transport coefficients for nonequilibrium rarefied monatomic gases developed for molecular collisions

01 p0068 A70-11567

Shock wave structure determination in simple monatomic gas, using statistical counting and successive approximation algorithm

01 p0068 A70-11601

D-2 experiments measuring atomic oxygen emission from terrestrial atmosphere and polarization rate and emission intensity from geocoronal hydrogen

03 p0559 A70-13828

Hydrogen molecule formation relation to galaxy formation, discussing cosmic plasma neutralization role

03 p0577 A70-14152

Monatomic gas steady expansion into cylindrical vacuum, considering Maxwell molecules with cylindrical symmetry

04 p0674 A70-15557

Time dependent expansions into vacuum of monatomic gases with spherical symmetry, obtaining moments expressions for Maxwellian molecules

05 p0831 A70-16015

Particle, momentum and energy flux spatial distributions of molecules scattered in collisions of low energy Ar atoms with mica and Ag surfaces

06 p1111 A70-18268

Monatomic gas flow past moderate curvature body, obtaining approximate solutions to Boltzmann equation under form of matched asymptotic expansions

06 p0979 A70-18316

Boltzmann equation fourth moment numerically solved to study distribution function characteristics during monatomic gases spherical expansions into vacuum

06 p1048 A70-18320

Normal shock wave structure in binary gas mixtures of chemically inert monatomic molecules, using kinetic theory moment method

06 p1051 A70-18343

Monatomic gas rarefaction wave structure in unsteady one dimensional flow from high to low pressure zones, describing numerical solution technique

09 p1604 A70-22449

Fast argon beam scattering by gas molecules measured to study atomic and molecular two body systems involving nitrogen and oxygen atoms

09 p1732 A70-22902

Coupled Boltzmann and rate equations for free electron distribution function and level populations in monatomic partially ionized gas including nonelastic collisions

10 p1918 A70-23958

Thermal conductivity of monatomic binary gas mixtures at moderately low temperatures and pressures, considering various Ar-He mixtures

11 p2147 A70-25755

Swirling and meridional flow induced by steady rotation of gravitating sphere in compressible monatomic gas, considering compressibility effects and surface layer

[ASTME PAPER MR-69-714]

11 p1978 A70-26690

Ionization kinetics of Ar, Xe and Hg monatomic gas behind shock wave front at high temperatures

12 p2210 A70-27319

Ionization and metastable excitation in low energy collisions of ground state argon atoms formed by charge transfer

14 p2618 A70-30121

Strong shock waves profiles in monatomic perfect gases by Monte Carlo simulation, obtaining maximum density slope thicknesses

14 p2567 A70-31031

Continuum radiative flux from nonisothermal stagnation shock layer of nongray atomic gases, employing ionization edges and bound free spectral forms [AIAA PAPER 70-837]

16 p3001 A70-33932

Axisymmetric detached shock preceding blunt body immersed in hypersonic monatomic gas flow, considering radiative ionization in cold precursor by differential approximation

16 p2839 A70-34252

Collisionless monatomic gas flow density and velocity distribution on axis of diffusely reflecting circular cone at zero attack angle with free stream

16 p2839 A70-34273

Fluidic oscillator molecular weight of flowing monatomic and polyatomic gases, discussing frequency dependence on pressure drop and temperature

17 p3081 A70-34515

Light gas atoms adsorption on solid surfaces, calculating wave function, energy, mobility, sticking coefficient, etc

18 p3225 A70-36186

Monatomic inert gas molecules interaction with continuous elastic solid of alkaline and nonalkaline metals, calculating energy exchange

19 p3373 A70-37816

Atomic hydrogen population distribution in far UV of comets

19 p3526 A70-38782

Plasma and neutral gas collisionless interactions in magnetic field based on Alfvén critical velocity hypothesis, discussing electron energy distribution

21 p3857 A70-41383

Axisymmetric detached shock before blunt body in hypersonic monatomic gas flow, obtaining radiative ionization patterns in cold precursor

21 p3950 A70-41731

Ionization kinetics of Ar, Xe and Hg monatomic gas behind shock wave front at high temperatures

21 p3854 A70-42061

Gravitating sphere high speed rotation in monatomic gas, discussing viscous and thermal boundary layers, velocity fields, temperature effects and fluid motion

23 p4131 A70-43944

Atomic or molecular gases excited state lifetime measurements, using time to amplitude conversion and multichannel analyzer

23 p4198 A70-44946

MONATOMIC MOLECULES

Thermal diffusion of isotropic, nonisotropic and multicomponent mixtures with monatomic and polyatomic molecules, considering kinetic theory and experimental results

17 p3197 A70-35537

MONAURAL SIGNALS

Monaural detection and filtering of sinusoidal signals in noise, using amplitude model

17 p3033 A70-35610

MONGE-AMPERE EQUATION

Sonic surface and Cauchy problem of Monge-Ampère equations in plane unsteady transonic channel flow solved by hodographic analysis

12 p2156 A70-27299

Monge equation in small perturbation method of characteristics applied to propagation phenomena in three dimensional supersonic gas flow

13 p2386 A70-28490

MONITORS

Monitoring behavior in three source visual task, studying selective attention by response observation method

03 p0435 A70-13770

Monitoring and recording of physiological parameters, discussing heart, muscle, brain potentials, blood pressure, respiration measurements and instrumentation

03 p0439 A70-14267

Physician-monitored central control facility communicating with remote site facilities staffed by paramedical personnel for public health care, based on aerospace experience

04 p0644 A70-15357

Monitor for linearizing nonlinear characteristics of thermistors used for temperature sensors in Apollo Telescop Mount, optimizing circuit values with FORTRAN IV computer program

05 p0851 A70-16692

Contamination control of spacecraft for planetary exploration missions emphasizing monitoring equipment and cleaning procedures

05 p0808 A70-16702

Weld quality monitor for production testing of welding strength in electronic circuitry

05 p0856 A70-16722

Frequency monitor design, analyzing relationships between time constants, gain, etc, emphasizing white noise filtration

07 p1227 A70-18991

- Divided attention utility for monitoring information processing during encoding, retention and recall of words
07 p1224 A70-20047
- TV system for satellite antenna boom position monitoring, describing camera system and programming, imaging techniques, position calibration, etc
10 p1891 A70-24898
- Spectral analysis of LF pulses from defects obtained by modulation method of monitoring using eddy currents with superposed converter
13 p2404 A70-28660
- Tiros solar proton monitor program, describing detector design, operational data processing and early warning network
17 p3180 A70-35304
- Remote sonic monitoring system for Saturn V noise measurement and recording
17 p3094 A70-35521
- High altitude neutron supermonitor investigation of cosmic ray microvariations
18 p3307 A70-36104
- Automatic sound monitoring system for measuring aircraft noise in airport vicinity
19 p3397 A70-37908
- Computer controlled aircraft noise monitoring system at Stuttgart airport
19 p3397 A70-37909
- SUREFIRE /system for utilization of remote equipment for failure investigation and reliability evaluation/ monitoring reliability in closed loop failure reporting and corrective action system
19 p3555 A70-38834
- Inertial platform with integral dynamic self test and fault monitoring scheme, describing design and operation
[AIAA PAPER 70-1013] 20 p3667 A70-39520
- Self calibrating TRIM gyromonitor inertial platform with gyroflex gyro, describing operation and performance
[AIAA PAPER 70-1012] 20 p3667 A70-39521
- Medical monitoring system onboard Soyuz spacecraft, describing equipment design, data acquisition and analysis, telemetric recordings, etc
20 p3581 A70-40193
- Communications satellite carrier instrumentation, using computer controlled frequency shift radiometer for power monitoring
21 p3826 A70-41345
- Multichannel monitor for repetitive short scan Auger electron spectroscopy for surface composition changes, using low energy electron diffraction
21 p3827 A70-41467
- Supervisor /monitor/ sampling frequency maximizing payoff function, using Bayesian preposterior information analysis
22 p4127 A70-43498
- Aircraft onboard radar system with landing monitor perspective display of runway operating independently of ground based electronic equipment
[AIAA PAPER 70-1336] 24 p4373 A70-45932
- MONKEYS**
- Photoperiod variation effects on ambulatory primate Cebus albifrons deep body temperature /DBT/, locomotor activity /LMA/ phase relationships and DBT waveform
01 p0011 A70-10035
- Male macaque monkey physiological deterioration in Biosatellite 3, noting falling brain temperature, lowered central venous pressure, fluid loss, blood redistribution into visceral pools, etc
01 p0022 A70-10822
- Renal hemodynamics and clearances alterations in owl monkey, using hemorrhagic shock procedure
02 p0234 A70-11732
- Visual half field central integration and monocular performance in split-brain monkeys after transection of chiasm, anterior commissure and corpus callosum
03 p0421 A70-13625
- Image memory in Papio hamadryas monkeys reacting to visual and flavor food stimuli
04 p0632 A70-15219
- Amphetamine effects on observing and monitoring performance in squirrel monkeys, investigating lever and key responses using food reinforcements
05 p0806 A70-16128
- Pre-space flight tests effects on Macaca nemestrina monkeys spermatogenesis, considering immobilization and exposure time effects
06 p0991 A70-17287
- Macaque monkey stereoscopic vision, obtaining behavioral evidence by random dot stereoscopic patterns and finding cells sensitive to binocular depth in cortex
07 p1205 A70-19276
- Macaque monkey stereoscopic vision demonstrated behaviorally by combining random dot patterns with standard operant conditioning
07 p1205 A70-19277
- Delayed trace reaction under stable and unstable pauses in apes and monkeys, noting independence of conditioned reflex
08 p1446 A70-21446
- Phase correlation of conditioned and electrophysiological postirradiation disturbances in central nervous system of monkeys
08 p1446 A70-21447
- Rhesus monkey active bone marrow distribution and volume studied by radioactive tracing techniques
09 p1616 A70-22301
- Urinary calcium phosphate and carbonate precipitates reduction by protein and carbohydrate diet change to casein and sucrose in Macaca nemestrina
09 p1621 A70-23456
- Macaca nemestrina total body water measurement by dilution technique
20 p3577 A70-40333
- Balloon-borne monkeys possible brain damage due to cosmic rays, discussing thindown tracks and acute vasculitis
21 p3764 A70-41476
- Rhesus monkeys PC02 tolerance in low pressure environments, observing hypothermia and heart and respiratory rates depression
21 p3765 A70-41486
- Biosatellite 3 experiment with male macaca nemestrina monkey, discussing cardiac rate, vascular data, water balance, weight loss and brain temperature
22 p3973 A70-43646
- MONOCHROMATIC RADIATION**
- Human eye integration of short monochromatic light flashes at TV frame frequencies
02 p0238 A70-12463
- Numerically stable solutions existence for one dimensional monochromatic radiative transfer, using linear algebra including vector and matrix norms, convergence, etc
02 p0340 A70-12643
- Electromagnetic field structure and interaction inside and outside of spherical shell of arbitrary linear media excited by monochromatic plane wave
03 p0443 A70-13151
- Relationship between 6300 A monochromatic auroral arc and visible aurora during magnetic storm, determining directional speeds
03 p0478 A70-14000
- Brightness distributions and widths determined from monochromatic radiation intensity at earth during lunar occultation of RF source
05 p0920 A70-16941
- Liquid fuel combustion luminous flame monochromatic radiation distribution, considering soot particle clouds effective emission thickness
06 p1172 A70-17142
- Monochromatic radiation emissivity temperature dependence of monocarbides of Ti, Nb and alloys in homogeneity region
08 p1516 A70-20994
- Plasma monochromatic wave propagation equilibrium state instability mechanisms, discussing stimulated scattering by thermal plasma particles and particle capture in wave potential well
08 p1551 A70-21422
- Fluorel spectral reflectance, transmittance and absorbance under monochromatic irradiation, considering thermal analysis and surface finish
09 p1710 A70-22794
- Structural detail in transparent object through holographic measurement of scattered monochromatic light, noting similarity to crystal structure reconstruction in X ray diffraction experiments
11 p2048 A70-25360
- Monochromatic light propagation in medium with large scale Markov nonuniformities of dielectric constant using parabolic equation approximation
12 p2272 A70-27359
- Mutual coherence functions for quasi-monochromatic illumination measured by image holography
12 p2237 A70-28124
- Quasi-monochromatic radiation field polarization representation and transformation of state, including instrumental effects
13 p2451 A70-28829
- Planar absorbing and emitting layer exposed to monochromatic collimated radiation, analyzing line or band shape effect on radiative transfer
13 p2451 A70-29135
- Electronic heterodyne astronomical spectroscopy, using lasers for absolute monochromatic flux and polarization measurements on star-like objects
13 p2408 A70-29473
- Elastohydrodynamic monochromatic wave coupling in liquid filled container as model for Alfvén and magnetoacoustic waves transmission in plasma
14 p2625 A70-31356
- Normally incident plane monochromatic electromagnetic wave reflection and scattering from expanding dielectric slab, using invariant imbedding concept
15 p2695 A70-31438
- Molecular velocity influence of optically active medium in gas dynamic quantum amplifier on monochromatic radiation transport, using corpuscular light model
15 p2721 A70-32356
- Solar prominences monochromatic images in He I D3 and He II 4686 lines allowing for contamination in 4686 images
15 p2803 A70-32614
- Monochromatic electromagnetic wave diffraction on moving ideally conducting half plane, deriving parameters and spectral composition after diffraction
16 p2863 A70-33216
- Spectrophotometric and visual observations of twilight glow from Soyuz 5, comparing vertical monochromatic brightness profiles with calculations for Elterman aerosol model
16 p2896 A70-33218
- Monochromatic radiation angular distribution surface reflectance measurement using photographic reflectometer
[AIAA PAPER 70-859] 16 p2912 A70-33904
- Optically excited homogeneous bulk semiconductor lasers, examining quantum mechanical rate equations and monochromatic light field pump source
18 p3270 A70-36741
- Monochromatic radiation from laser modulated electron beams
19 p3444 A70-37572
- Plane monochromatic EM wave diffraction by rectangular metal bar tapered grating, examining amplitude and polarization parameters
19 p3377 A70-37721
- Frequency shifted diffraction of monochromatic Gaussian light beam by reflection off ultrasonic surface wave
21 p3850 A70-41907
- Monochromatic acoustic wave interaction with turbulent jet fluctuating vorticity field, using Fourier analysis to extend spectral relations
[ASME PAPER 70-FLCS-6] 22 p4008 A70-42426
- Monochromatic radiant flux angular distribution reflected from water and carbon dioxide cryodeposits, discussing incidence, deposit thickness and wavelengths
[ASME PAPER 70-HT-34] 22 p4122 A70-42433
- Monochromatic light propagation in medium with large scale Markov nonuniformities of dielectric constant using parabolic equation approximation
22 p4075 A70-43600
- Unsteady radiating nongray gas diffuse boundary conditions, emphasizing monochromatic radiation slip and one dimensional radiant flux
23 p4282 A70-44593
- Quantum noise in narrow-band ring laser, noting mode amplification of weak monochromatic signals
23 p4202 A70-45056
- Spectrophotometric and visual observations of twilight glow from Soyuz 5, comparing vertical monochromatic brightness profiles with calculations for Elterman aerosol model
24 p4328 A70-45193
- Monochrome radiography for contrast strengthening to increase color images detectability by human eye
24 p4337 A70-45708
- MONOCHROMATIZATION**
- Methane IR filter for monochromatizing He-Ne laser
21 p3823 A70-40823
- MONOCHROMATORS**
- Emission flame spectrometer based on double diffraction monochromator, describing design features and operating characteristics
08 p1493 A70-20545
- Vacuum-UV monochromators polarization and effective transmittance measurements, comparing characteristics of parallel and pyramidal biotite polarizers
08 p1546 A70-21791
- Airborne monochromator and photoelectric filter radiometer for solar spectral irradiance measurements, estimating instrument errors
09 p1683 A70-23515
- Solar radiation energy distribution simulated using vacuum monochromator, discussing Ar-Kr-Xe-methane mixture
10 p1931 A70-24317
- Solar horizontal telescope performance improvement by adding birefringent monochromator and diffraction grating
11 p2057 A70-26590
- Monochromators dispersion and resolution increased by multiple passage of light through singly dispersive element, comparing optical schemes
12 p2237 A70-28160
- Monochromator design for UV and visible wavenumbers linear output, noting application to absorption coefficient measurement
24 p4336 A70-45669
- MONOCOQUE CYLINDERS**
- U CYLINDRICAL SHELLS**
- U MONOCOQUE STRUCTURES**
- MONOCOQUE STRUCTURES**
- Elastic and equilibrium matrices for semimonocoque membrane /plane stress/ elements using skin and reinforcing member transformations
17 p3185 A70-34921

MONOCULAR VISION

Superior recognition of right visual field of left eye with monocular viewing of letters as interaction of visual acuity and right superiority

02 p0239 A70-12623

Visual half field central integration and monocular performance in split-brain monkeys after transection of chiasm, anterior commissure and corpus callosum

03 p0421 A70-13625

Human eye contribution to visual evoked responses under different color stimuli during all possible monocular and binocular combinations

05 p0801 A70-16382

Binocular fusion and rivalry effects on cortically evoked human potential, obtaining pattern characteristic responses to monocular stimulation

07 p1215 A70-20214

Monocular and interocular threshold luminance changes during flicker stimulation, noting interflash duration effects

08 p1453 A70-21792

Choice reaction time task involving right or left hand button pressing in monocular and binocular visual response to directional commands by colored lights

11 p1990 A70-25830

Visually evoked responses in man to different light stimuli intensities, noting marked increase in binocular over monocular visual response

22 p3972 A70-43408

MONOLITHIC CIRCUITS

U INTEGRATED CIRCUITS

MONOMERS

Polymer optical properties in terms of interaction matrix coupling monomers, applying to polypeptide alpha helix, beta sheets and polyproline helices

14 p2544 A70-30118

Methyl methacrylate and other vinyl monomers polymerization activation by low sulfur dioxide concentrations, noting inert solvents effect

14 p2544 A70-30246

Physicochemical properties of monomer and associated aluminosilicates, determining heats of combustion

22 p4124 A70-42677

MONOMOLECULAR FILMS

Molecular interactions, surface pressures and potentials of mixed monolayers of stearic acid and stearyl alcohol with inorganic subolutions

15 p2695 A70-32547

MONOPLANES

NT A-7 AIRCRAFT
NT AVRO 707 AIRCRAFT

NT T-33 AIRCRAFT
NT TU-134 AIRCRAFT
NT XV-4 AIRCRAFT
NT XV-5 AIRCRAFT

MBB Bo-209 Monsun travel, commuter and acrobatics aircraft, discussing configurations, specifications, structure and handling characteristics

19 p3355 A70-37388

MONOPOLE ANTENNAS

Input impedance of monopole antenna in rectangular waveguide assuming sinusoidal current distribution, noting accuracy limitation to specific monopole lengths

03 p0457 A70-13698

Impedance and radiation pattern of quarter wave monopole and half wave dipole antennas in isotropic plasma, considering plasma density role

06 p1117 A70-17372

Induced electromotive force method for determining impedance changes of monopole on base of large cone

06 p1019 A70-17558

Radiation patterns from finite conducting cone excited by quarter wave monopole protruding from center of base computed on digital computer

06 p1020 A70-17559

Quasi-near zone electric field intensity and current distribution of monopole antenna on finite conductive earth

09 p1645 A70-22691

Dipole and monopole antenna radiation patterns, considering effects of soil conductivity and elevation above ground

12 p2129 A70-27979

Mutual and self admittances for array with two monopoles, solving integral equations for current distributions

16 p2860 A70-32957

Rod antenna radiation representation by instantaneous pictures of electric field lines, considering wave detachment mechanism

17 p3050 A70-34575

Complex impedance measurements for monopole antenna for electron densities in/out of OGO satellite wake in upper ionosphere

17 p3080 A70-35771

Dielectric filled tubular monopole antenna driven by coaxial line with TEM mode, calculating current distribution from integral equation

23 p4175 A70-44953

Broadside-endfire array of cylindrical dipoles and monopoles driven by interconnecting transmission lines, calculating admittance and field patterns

23 p4176 A70-44955

Two monopole antennas on perfectly conducting sphere, calculating radiation pattern by numerical technique

23 p4165 A70-44968

MONOPOLES

Hot universe model for determining magnitude constraints on Dirac monopole annihilation cross section and mass in cosmic rays

07 p1371 A70-20330

Relativistic magnetic monopoles detection in corpuscular primary cosmic rays, describing equipment and results

07 p1371 A70-20333

Monopole mass spectrometer mass range extension by voltage method, discussing sensitivity and mass scan time

08 p1497 A70-21537

Magnetic monopole flux limits in primary cosmic radiation derived from muon-poor shower data and inverse Compton scattering

16 p2972 A70-33050

Lunar magnetic monopole charge effects on nearby magnetic field configuration

18 p3316 A70-36898

Monopole trajectory in magnetic dipole field by numerical integration on computer and Liouville theorem, using resolved Stormer cone to investigate motion

20 p3672 A70-39301

Magnetic monopoles electromagnetism search in Apollo 11 rock samples

21 p3912 A70-41639

MONOPROPELLANTS

NT AEROZINE

Hydrazine monopropellant performance and characteristics, describing various catalysts and propulsion systems

02 p0352 A70-12265

Combustion characteristics of blended droplets composed of monopropellant and diluent, using theoretical model to predict life histories

06 p1180 A70-18141

Burning rates of monopropellant droplet evaluated by variable property models, discussing dimensionless mass flow rate

07 p1358 A70-18914

Quasi-steady adiabatic vaporization and exothermic decomposition of monopropellant spherical droplet in inert and reactive environments

07 p1359 A70-19580

Pilot chamber initiated thermal decomposition reactor concept for monopropellant thruster, discussing thrust levels and throttling ratios

13 p2473 A70-28507

First pulse vacuum startup measurements of monopropellant hydrazine thrust reactors with spontaneous catalyst, simulating spacecraft control dynamics

14 p2628 A70-30753

Monopropellant rocket combustion one dimensional theory with uniform velocity and size droplets injection, obtaining chamber length

14 p2629 A70-30773

Monopropellant hydrazine RCS rocket engine module, discussing operating conditions, development, thermal control and valve internal leakage

16 p2965 A70-33544

Small rocket engines tailoff impulse and tailoff repeatability, comparing monopropellant hydrazine and storable bipropellant engines impulse data

16 p2967 A70-33576

Chemical rocket propellant research covering composite liquid monopropellants, lateral thrust in solid propellant rockets, ELDO third stage, friction losses, etc

17 p3148 A70-35211

Burning rate theory applied to heat and mass transfer rates of monopropellant droplets in heat-up and steady burning at wet bulb temperature

18 p3348 A70-36696

MONOPULSE ANTENNAS

Transportable telemetry acquisition system (TTAS) as mobile tracker featuring pseudomonopulse method

01 p0045 A70-11120

Phased array monopulse autotracking, radio interferometer and Doppler frequency methods for radio tracking systems for artificial satellite orbits

15 p2697 A70-31836

Search radar antennas for monopulse direction finding with radiation pattern for sum and difference operation

15 p2704 A70-32674

Steerable C band waveguide arrays design for forming monopulse cluster of sum and difference beams

16 p2875 A70-33395

Dual mode log periodic spiral DF antenna system, using monopulse to provide azimuth and bearing elevation data

16 p2863 A70-33450

Parabolic antenna properties generated by dual band circularly polarized focused two channel monopulse feed system, discussing tracking data from helicopter, Apollo 8 and Cassiopeia A

20 p3589 A70-40323

Monopulse tracking antenna beam broadening by feed displacement defocusing in parabolic reflector

23 p4165 A70-44956

Phase and tracking errors due to mutual scattering in phase monopulse phase-scanned antenna

24 p4315 A70-46135

Dual channel circularly polarized feed of monopulse tracking antenna system, noting axial ratio and gain and open loop mode autotracking

24 p4321 A70-46259

MONOPULSE RADAR

Antenna far field noise effect on monopulse type and conical scanning radar angle meters performance

05 p0813 A70-16256

Monopulse radar signal detection efficiency with fully polarized reception taking into account target with fluctuating polarization

05 p0813 A70-16270

Three channel traveling wave maser with cryogenic superconducting magnet for C-band monopulse radar system, describing construction and electrical characteristics

10 p1900 A70-24894

Celestial radio source angle tracking techniques using monopulse antenna receiving system applied to angle tracking radar

22 p3991 A70-43582

Monopulse radar excited by Gaussian signal and thermal noise in multiple targets, calculating angle error output probability density function for predicting tracking performance

22 p3992 A70-43593

MONOSACCHARIDES

Temperature, solvent, catalyst and formaldehyde concentration effects on monosaccharide synthesis from formaldehyde condensation

13 p2362 A70-29327

MONOSCOPES

Pseudo three dimensional effect on monoscopic radar imagery for topographic relief differentiation, using offset superposition of transparencies

22 p4031 A70-42965

MONOSTABLE MULTIVIBRATORS

Pulse duration approximation in tunnel diode monostable multivibrator during low duty cycle operation

08 p1472 A70-20867

MONOTONE FUNCTIONS

Bounded region satisfying regularity necessary to Korn inequalities and Sobolev immersion theories, discussing plasticity theory operator monotony in Minty-Browder sense

02 p0387 A70-12109

Relaxation functions of one dimensional viscoelastic linear and nonlinear materials having monotone decreasing time properties

11 p2141 A70-26556

Monotonic difference schemes for parabolic differential equations with nonlinear boundary conditions, discussing convergence and stability

18 p3282 A70-36361

Linear algebraic system stability and monotony, investigating plane structures by finite element method

23 p4213 A70-44996

Stochastic boundary value problem involving differential equation with random forcing function, proving monotone property of solution covariance variation

24 p4426 A70-46039

MONOTONY

Performance in monotonous work situations, discussing various factors affecting efficiency

18 p3224 A70-36317

MONTE CARLO METHOD

Monte Carlo methods for calculating simple and multiple integrals and random variables characteristics, noting applications to Europa 2 booster

03 p0454 A70-13535

Nonlinear boltzmann equation for heat transfer in rarefied gases between parallel plates at different temperatures using Monte Carlo method
[ASME PAPER 69-WA/HT-23] 04 p0782 A70-14811

Fast neutron transport characteristics of helical ducts using Monte Carlo code FASTER, computing neutron fluxes and attenuation 05 p0884 A70-16163

Monte Carlo radiative transfer techniques applied to develop height dependent spicule model, computing contrast curves of model against chromospheric background 05 p0911 A70-16431

Monte Carlo calculations of nonequilibrium radiative transport, including weighting and biasing techniques 05 p0958 A70-17084

Chain pooling tests for two level factorial replication-free experiments using Monte Carlo methods 06 p1093 A70-17305

Probability distributions and error estimates for Monte Carlo solutions of radiation heat transfer problems, considering wavelength and direction of emitted photon bundles 06 p1175 A70-17683

Monte Carlo method for modeling gas flow by simulated molecules concurrently followed through collisions and boundary interactions in simulated physical space within computer 06 p1113 A70-18314

Monte Carlo method applied to Boltzmann collision integral in solving heat transfer between plates at different temperatures in elastic spheres gas 06 p1183 A70-18324

Monte Carlo simulation for shock wave formation by specularly reflecting piston, discussing reflection from specularly reflecting wall 06 p1049 A70-18334

Monte Carlo method applied to solving nonlinear Boltzmann equation for plane shock waves in elastic sphere gases 06 p1050 A70-18335

Moment methods for calculating modeled diffusion gas mixture shock waves using Monte Carlo method, discussing distribution function and flow pattern 06 p1050 A70-18336

Model sampling or Monte Carlo applied to normal shock, giving temperature and density profiles for Mach 10 shock 06 p1050 A70-18337

Monte Carlo analysis of free and near free molecular flow through circular tubes for mass, momentum and energy transfer 06 p1051 A70-18367

First collision Monte Carlo method for calculating aerodynamic drag on hard sphere and Maxwell molecular models in near-free molecular flow 06 p0983 A70-18379

Book on some methods of solving boundary value problems of mathematical physics covering linear operators, boundary conditions, perturbation and Monte Carlo methods 07 p1326 A70-19696

Electromagnetic component of extensive air showers to three dimensional Monte Carlo simulations of hadronic component using electromagnetic cascade theory 07 p1368 A70-19967

Reliability estimations precision evaluated by Monte Carlo simulation, analyzing causes of data inaccuracy 09 p1689 A70-22019

Thermally emitted photons of atmospheric molecules and aerosols and planetary surface followed by Monte Carlo method, using anisotropic single scattering functions 09 p1719 A70-23524

Ionospheric photoelectrons resulting from solar UV radiation interaction with atmospheric gases, obtaining escape fluxes using Monte Carlo method 09 p1747 A70-23667

Monte Carlo method research development covering techniques for variance reduction, linear equations solutions and use of various random sequences 10 p1910 A70-24844

Earth interior structure models using geophysical data in Monte Carlo inversion procedure 11 p2042 A70-25332

Flow near leading edge of sharp insulated and cooled flat plates, using Monte Carlo direct molecular simulation 11 p1975 A70-25968

Computerized Monte Carlo prediction of maintenance time distribution of complex system, concerning man hours, elapsed time and schedule meeting 13 p2524 A70-29566

Martian atmosphere modeling for obtaining Viking lander spacecraft design margins by Monte Carlo method 14 p2637 A70-30564

Monte Carlo model of V groove surface roughness effects on directional reflections in plane of incidence, employing energy localization circle [AIAA PAPER 70-820] 16 p3002 A70-33944

Pulsars spatial distribution, comparing actual distribution to Monte Carlo computations 17 p3173 A70-35755

Nonlinear stochastic discrete time processes prediction and filtering by Monte Carlo techniques 18 p3234 A70-36338

Luminous intensity profile of optically thick Sr artificial clouds in upper atmosphere, using Monte Carlo calculations 19 p3415 A70-38388

TSF-SNAP reactor neutron radiation leakage, comparing Monte Carlo calculations with experimental and analytical determinations 20 p3671 A70-39156

Three dimensional Monte Carlo simulation of extensive air shower processes, comparing with hadrons and electrons energy spectra 20 p3699 A70-39442

Prior distributions computer aided selection for generating Monte Carlo confidence bounds on system reliability 20 p3658 A70-39641

Design component size index as function of various system demands, using Monte Carlo method 21 p3846 A70-41870

Radiation shielding calculations using multidimensional Monte Carlo computer programs 23 p4217 A70-43809

Radiation shielding calculations, discussing Monte Carlo concepts for point fluxes with random sampling of source distributions 23 p4217 A70-43810

MOS transistor trigger circuit design parameters statistical calculation and optimization by Monte Carlo method using computer 23 p4171 A70-43957

Multidimensional integral Monte Carlo evaluation applying regression analysis to linear unbiased estimators 24 p4370 A70-46100

MOON

Low energy proton flux in neighborhood of Moon measured by Luna 12 satellite indicating magnetized plasma region effect on burst 01 p0172 A70-11493

Kinetics of solar wind interaction with moon and planetary bodies using perturbation scheme to obtain ion density distribution on antisolal side [AIAA PAPER 70-61] 06 p1136 A70-18192

Solar wind flow different interactions with earth, Venus and moon 06 p1136 A70-18284

Solar wind interaction with moon derived for model and compared with satellite data 06 p1147 A70-18291

Lunar science - NASA Conference, Houston, January 1970, covering moon rock composition, magnetic, electrical and physical properties, etc 08 p1565 A70-20587

Moon perigees and apogees for years 1-3000, tabulating parameters for calculations 08 p1568 A70-20635

Radiative heat transfer in lunar and Mercurian surfaces, discussing radiative heat transfer in powders 08 p1579 A70-21569

Computer program for generating tables to calculate lunar libration at any epoch 09 p1752 A70-22313

Textured gray-scale imagery by computer simulating lunar display 09 p1642 A70-23771

Seismology as tool for investigation of planets, discussing earth rigidity, tides and long period oscillations 11 p2111 A70-26040

Earth mechanical properties and composition compared with moon and other terrestrial planets 11 p2047 A70-26616

Computer techniques for determining physical libration of moon in longitude 13 p2488 A70-28765

Heliometric lunar libration series joined to obtain uniform equation 13 p2490 A70-28949

Solar wind interaction with moon, constructing mathematical model based on MHD equations and Explorer 35 data 14 p2630 A70-30356

Delaunay reduced Hamiltonian verification in lunar ephemeris theory based on Lie transforms 16 p2978 A70-33972

Moon origin, surface, exploration, Apollo 11 landing, subsidence/uplift crater formation and Transient Lunar Phenomena 20 p3701 A70-38977

Lunar ephemeris computerized analytical solution, considering literal expansions generation 20 p3705 A70-39479

MOON ILLUSION

Moon illusion on basis of perceived size relativity, discussing dependence on objective characteristics of visual field 09 p1752 A70-22248

MOON-EARTH TRAJECTORIES

Reentry trajectories from lunar surface and orbit obtained by computer with allowance for initial data spread 01 p0191 A70-11476

Earth-moon-earth flight characteristics, discussing spacecraft trajectory, velocity and corrections for close distance placement and return for soft landing 03 p0569 A70-13483

Apollo translunar and transearth orbit determination and navigation using ground and onboard systems [AIAA PAPER 70-27] 06 p1103 A70-18124

Hybrid patched conic technique as iterative procedure for generating translunar and transearth trajectories emphasizing computing time saving 06 p1152 A70-18495

Hybrid patched conic iterative technique for accurate moon-earth /transearth/ trajectory generation 09 p1760 A70-22929

Onboard moon-to-earth trajectory approach guidance with or without midcourse guidance using optical angular measurements 14 p2615 A70-30470

French photographic observations of Apollo 12 translunar trajectory 15 p2697 A70-31676

MOONMOBILES

U LUNAR SURFACE VEHICLES

MOORING

Automatic rendezvous and mooring-coupling of spin stabilized satellites, discussing configuration, guidance and dynamics model 13 p2499 A70-28397

MOORINGS

U MOORING

MOPS (PROPULSION SYSTEMS)

U MAN OPERATED PROPULSION SYSTEMS

MOREHOUSE COMET

Comet Morehouse /190811/ tail rays waviness interpreted in terms of fluctuations in solar wind direction 11 p2117 A70-26649

Comet Morehouse CO ions lifetime and density from photometric analysis 18 p3313 A70-36324

MORL

U MANNED ORBITAL RESEARCH LABORATORIES

MORPHINE

Pineal C14-indoles synthesis in rats noting no direct effect of morphine 11 p1988 A70-26299

MORPHOLOGY

NT GEOMORPHOLOGY

NT ISOMORPHISM

NT LUNG MORPHOLOGY

NT POLYMORPHISM

Noctilucent clouds morphological and kinematic characteristics based on photographs 03 p0476 A70-13885

Temperature and morphological changes of animals adipose tissue under various nutrition conditions, based on measurements by thermocouples implanted in fat deposits 04 p0640 A70-15514

Isomorphous beta type Ti-Mo alloy omega phase transformations and morphology by electron microscopy, relating hardness to aging 10 p1902 A70-23817

Microdissection morphology of vestibular apparatus sensory regions in guinea pig, rabbit, cat, squirrel, monkey and man 10 p1811 A70-24200

Coma cluster of galaxies morphological and statistical characteristics, determining major and minor axes 10 p1948 A70-25194

Centrifuging acceleration tolerance of various animals, relating physiological and morphological effects 12 p2174 A70-28361

Omega phase morphology in Ti alloy by electron microscope techniques, noting cubic structure 17 p3118 A70-34410

Spiral galaxies pattern statistics, examining morphological type of Milky Way galaxy 18 p3326 A70-37155

Lunar sinuous rilles morphological and distributional observations and implications on theories of origin concerning surface water erosion 19 p3521 A70-38442

Al-Be eutectic alloys structure, using laue X ray method and electron microscopy in studying fibrous morphology due to unidirectional solidification 24 p4356 A70-45143

MORPHOTROPISM

U ISOMORPHISM

MORSE POTENTIAL

Morse eigenfunctions for variational calculation of diatomic molecules vibrational-rotational energy level analysis, showing better convergence than harmonic oscillator basis 02 p0344 A70-12519

MORTALITY

Diurnal and seasonal variations of mortality due to cardiac and circulatory failure using model representing daylight regulation of human organism
05 p0802 A70-16663

Fatal ejections in USN, suggesting initiation delay as prime causal factor
07 p1191 A70-19006

Resistance to decompression sickness increased and mortality rate decreased in mice after adaptation to hypoxia at normal barometric pressure
07 p1206 A70-19469

Temperature effect on radiation tolerance of mice exposed to low dose rate gamma radiation, noting mortality delay in low temperature environment
23 p4148 A70-44789

MOS [SEMICONDUCTORS]

U METAL OXIDE SEMICONDUCTORS

MOSAICS

Pulse-biased phototransistor imaging mosaics behavior measurement showing significant photovoltaic mode at high light levels
10 p1846 A70-23880

MOSS [SPACE STATIONS]

U ORBITAL SPACE STATIONS

MOSSBAUER EFFECT

Mossbauer temperature dependent isomer shift, proposing electron density change at resonant nucleus site by lattice phonons
14 p2626 A70-30483

Isomer shift, Mossbauer recoil free fraction and nuclear quadrupole splitting for Fe57 in iron fluoride measured for lattice dynamics, fine and hyperfine structure
14 p2626 A70-30484

Fe 57 contaminant in Ni, studying Mossbauer effect as function of temperature
15 p2784 A70-32023

Low temperature anharmonicity in thorium dioxide with Co 57 impurities, using Mossbauer effect of Fe 57
21 p3862 A70-40975

High transmission Mylar window He cryostat for Mossbauer measurements
21 p3828 A70-41470

Mossbauer spectra of Apollo 11 lunar fines and microbreccia, showing iron oxidation, site symmetry and magnetic state
21 p3915 A70-41657

Mossbauer effect spectrometry application to Apollo 11 lunar rocks composition, using nuclear gamma resonance measurements for nuclide Fe 57
21 p3916 A70-41662

Apollo 11 lunar dust, breccia and igneous rocks, using Mossbauer spectroscopy and petrographic techniques
21 p3916 A70-41664

Temperature distribution measurement inside solid samples by Mossbauer effect, considering application to turbine blades
21 p3830 A70-42165

Magnetism in austenitic stainless steels, discussing Mossbauer measurements of temperature dependence of hyperfine field and single line width
22 p4055 A70-43012

Mossbauer spectrum of submolecular changes of oxyhemoglobin in animal blood exposed to microwave irradiation
23 p4144 A70-43788

Mossbauer effect analysis of Fe impurity atoms in n- and p-type semiconductor compounds with wide and narrow forbidden gaps
24 p4388 A70-45204

Fe-Cr and Fe-Cr-V system miscibility gap, using differential thermal analysis and Mossbauer effect measurements
24 p4362 A70-46190

Al substituted YIG crystal chemistry by cation distribution determination as function of Al concentration using Mossbauer spectroscopy
24 p4392 A70-46364

MOT [ORBITAL TELESCOPES]

U MANNED ORBITAL TELESCOPES

MOTHS

Circadian oscillations and photoperiodic time measurement in *Pectinophora gossypiella*
18 p3221 A70-36893

MOTILITY

U LOCOMOTION

MOTION

NT SPACECRAFT MOTION

Airborne simulator program for evaluation of motion and visual cue effects on pilot performance in roll, using compensatory tracking tasks
[AIAA PAPER 70-351] 10 p1857 A70-24202

Flight simulation data on motion cues effects in controlling compensatory tracking tasks
[AIAA PAPER 70-352] 10 p1859 A70-24211

Ground based moving-base aircraft flight simulator using computer program to establish motion requirements
[AIAA PAPER 70-348] 10 p1859 A70-24213

Size effects on velocity threshold for real movement during narrow stimulus object length increase
11 p1989 A70-26662

Motion cue requirements in one and two axis closed loop compensatory control tracking tasks, discussing error rates
14 p2540 A70-30247

Sphere slow motion in viscous fluid with solid particle suspension, considering Stokes flow pattern small relaxation time perturbation
16 p2896 A70-34272

MOTION AFTEREFFECTS

Motion coordination capacity of persons subjected to 40 days bed rest using dynamographic technique, discussing nature of slackening
03 p0425 A70-13896

Human motion coordination under acceleration followed by weightlessness during jet flights along Keplerian orbits, discussing initial disturbance and subsequent subsiding
03 p0425 A70-13897

Aerodynamic velocity field induced by plate in motion correlated with ideal gas flow at specific Reynolds number, discussing wake formation
03 p0410 A70-14270

MOTION EQUATIONS

U EQUATIONS OF MOTION

MOTION PERCEPTION

U SPACE PERCEPTION

MOTION PICTURES

Computer evaluation of photographic imagery of left ventricle volume obtained by cineangiography, including densitometric measurements
03 p0434 A70-13678

Variable anamorphic motion picture system to produce visual display for use with flight simulator [ASME PAPER 69-WA/BHF-8] 04 p0642 A70-14852

Solar photographs taken with motion picture cameras in integral light
05 p0920 A70-16974

Holographic 3D movie of front-lighted opaque objects, recording diffuse reflection with CW laser and high resolution film
09 p1684 A70-23533

Motion picture holography using continuously pumped ruby laser illumination system in repetitive Q switched mode
09 p1689 A70-23782

Heterogeneous combustion observation by motion picture holography, considering light source requirements and hologram separation at higher sampling rates
[WSCIP PAPER 70-10] 13 p2409 A70-29610

Cloud cover stationary pictures by spin-scan camera in synchronous orbit over Pacific converted into motion pictures showing cloud pattern changes and storm development
14 p2587 A70-31150

Galactic 21 cm line emission motion picture film, discussing contour maps on neutral hydrogen distribution
18 p3327 A70-37163

High speed pin registered intermittent camera, discussing film transport, magazines operating speed, motor drive and boresighting provisions
[SMPT PREPRINT 78] 22 p4036 A70-43066

High speed holographic methods for supersonic phase objects movement and replacement of conventional optical processes in shock tubes, firing tunnels, etc
[SMPT PREPRINT 77] 22 p4037 A70-43067

High speed X ray flash motion picture installation for ballistic photography
[SMPT PREPRINT 76] 22 p4037 A70-43068

Highspeed raster motion picture cameras with high aperture ratios
24 p4335 A70-45651

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set
24 p4335 A70-45653

Motion sickness among USAF flying personnel, examining organic and psychiatric factors
15 p2690 A70-31890

Airsickness frequency, pathogenesis and prevention, discussing cadet selection
17 p3037 A70-35129

Hypoglycemia role in air sickness, aggravating effects of hypoxia and acceleration
17 p3040 A70-35914

Soviet book on peripheral vestibular apparatus and higher nervous system roles in motion sickness covering Coriolis acceleration tests, pilot training and selection, drugs, etc
19 p3359 A70-37406

Reflex vestibular disturbances and motion sickness prevention in artificial gravity of rotating space base, by incremental adaptation tests and drugs
23 p4154 A70-44625

Sea sickness symptoms in relation to reduced minute blood volumes in human after Coriolis acceleration
23 p4149 A70-45079

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

- Spatial amplification criteria for hyperbolic wave equations extended to include parabolic equations, discussing convective and absolute instabilities
03 p0519 A70-13522
- Motion stability and time dependent deflections of thin flexible cylinder with zero bending rigidity in viscous stream
03 p0595 A70-13783
- Generalized Keplerian orbits for large cylindrical satellites noting orbit stability
03 p0578 A70-14252
- Time history of spin and forward motion accuracy of rocket launched from smoothbore, using analytical model and motion coupling through dynamic friction coefficient
03 p0582 A70-14311
- Heaving and pitching motion analysis of wave action-induced pressure gradients in captured air bubble /CAB/ ship bubble chamber, discussing fan system design
[ASME PAPER 69-WA/AV-6] 04 p0622 A70-14902
- Unsteady flows effects on aircraft longitudinal motion, flight stability and control, discussing horizontal and vertical effects of rough air
04 p0623 A70-15172
- Bottom topography effect on jets stability in baroclinic fluid, discussing two layer model
04 p0715 A70-15518
- Single degree of freedom nutation damper motion instability on dual spin stabilized spacecraft ascribed to parametric excitation by transverse angular rates
04 p0764 A70-15585
- Proportional controlled pneumatic servomechanisms analysis extended to include motion along stroke, considering position effect on stability
05 p0797 A70-15891
- Gravitational radiation damping effect on motion of two bodies, evaluating field components in approximation by Einstein-Infeld-Hoffman method
05 p0882 A70-16308
- Motion stability of ideally plastic medium flow in conical matrix, studying surface and velocity distribution for minimum plastic deformation energy
05 p0945 A70-16854
- Hydrodynamic coefficients of algebraic equations for boundary value problems in disturbed motion of body with rib-reinforced liquid filled cavity
05 p0836 A70-16956
- Steady three dimensional motions using classical differential geometry, considering Navier-Stokes and helical flows
05 p0884 A70-17100
- Helicopter dynamics structural model extended to LF longitudinal motions by including stabilizing feedback loop representing forward velocity influence on main rotor
06 p0987 A70-17910
- Dynamic instability of motion of rigid and elastic bodies with liquid filled cavities associated with practical problems of rocket technology
06 p1107 A70-18415
- Optimal guaranteeing control for single switching representable in form of two different successive stages in time, ensuring invariance with respect to motion perturbations
07 p1332 A70-18664
- Routh theorem and Chetaev method for construction of Liapunov function to investigate steady state motions, obtaining stability conditions
07 p1332 A70-18677
- Partial stabilization of given quantities on steady motions of nonlinear control systems with initial perturbations based on observation theory
07 p1333 A70-18686
- Nonlinear differential equations solution behavior near zero point of phase space examined in material system perturbed motion
07 p1333 A70-18772
- Anisotropically elastic rotor vibrations stability analysis allowing for damper mass and internal/external friction, determining regions of steady and unsteady motions
07 p1403 A70-19059
- Lagrange rotational motion stability of heavy symmetrical body attached at point to platform moving forward using Liapunov theorem
07 p1334 A70-19641
- Meteorological satellites motion parameters long term prediction, using final analytic relationships with allowance for zonal harmonics of gravitational field
07 p1329 A70-19650
- Stability criteria for systems of nonlinear stochastic differential equations on finite time interval, considering stable motion of physical processes
08 p1533 A70-20488
- Dynamic discrete systems unsteady motions stability, formulating theorem for finite characteristic numbers existence
08 p1543 A70-20493
- Soviet book on motion of guided rockets in space covering aerodynamic and structural aspects, stabilized and disturbed rocket motion, etc
08 p1582 A70-20756
- Elastic body with incompressible fluid filled cavities, studying motion and stability by deriving motion equations starting from principle of least action
08 p1544 A70-20951
- Fluid motion convective stability between vertical parallel planes with longitudinal temperature gradient, solving boundary value problem for amplitudes of normal perturbations
08 p1482 A70-20952
- Steady motions and stability of gravitating gyrostat and spheroid, considering dynamically asymmetrical and symmetrical conditions
08 p1544 A70-20965
- Stability in whole of motion determined by system of nonlinear third order differential equations, using Liapunov functions
08 p1545 A70-21003
- Stability of continuously differentiable functions representing approximate solution to system of differential equations of perturbed motion
08 p1545 A70-21167
- Minimization of motion deviation from prescribed motion as differential game of converging motions using equations of motion
08 p1546 A70-21626
- Steady state motion of sinusoidally excited primary system with impact damper solved analytically by piecewise linear technique
08 p1546 A70-21858
- Stable equilibrium of rotor in pressurized gas bearing, considering perturbed rotor motion equation together with Reynolds equations for pressures in lubricant layer
09 p1690 A70-22544
- Error analysis in calculating periodic limiting state of rotor motion
09 p1727 A70-22624
- Spherically symmetric galaxies dynamic evolution analysis, emphasizing irregular motions description using fluctuating gravitational field hypothesis to construct Markov process
09 p1758 A70-22747
- Stability characteristics of near periodic orbits using variational equations, with results applied to phase space and stability problems
09 p1760 A70-22917
- Motions stability about triangular points in elliptic restricted problem of three bodies, using perturbation scheme
09 p1728 A70-23205
- Missile oscillations in plane during pitching moment hysteresis, discussing test coefficients suitability for predicting motion
09 p1606 A70-23258
- Sphere motion in laminar flow, postulating absolute velocity as resultant of entrainment and fall velocities and stable position in tube with ascending flow
09 p1663 A70-23309
- Elongated rotating configuration evolution by gravitational radiation and secular instability using homogeneous figures of Maclaurin and Jacobi
10 p1916 A70-24404
- Small plane perturbations stability losses in uniform rectilinear motion of nonrigid deformable rocket, using slender bodies pressure theory
10 p1950 A70-24528
- Orbital stability of geostationary vehicle at arbitrary latitude, considering nonlinear equations and deducing stability conditions by Liapunov method
10 p1950 A70-24783
- Polynomial model of uniform target motion for smoothing and extrapolating coordinates and parameters using independent radar range and velocity readings
10 p1843 A70-25136
- Linearized equations of motion solved for stability of dual spin satellite with two dampers, comparing to Floquet analysis
[AIAA PAPER 70-431] 11 p2120 A70-25440
- Structural synthesis of automatic control systems for body motion along trajectory, using inverse method and nonlinear coordinate transformations
11 p2077 A70-25611
- Stability conditions of rotational motions of symmetrical solid body on vibrating base in potential force field
11 p2098 A70-25916
- Nonconservative problems motion stability analysis based on restricted admissible displacements, establishing two variational principles
11 p2138 A70-26172
- Motion stability of rapidly spinning satellite, discussing elastic booms effect
11 p2128 A70-26784
- Monograph on ambipolar diffusion and motion instability of satellite produced artificial barium ion clouds in ionosphere and magnetosphere
11 p2048 A70-26825
- Clamped beams steady state free and forced response and stability for large amplitude motion, discussing multimode analytical and numerical technique
12 p2327 A70-27821
- Satellite stationary motions stabilization using rotors with axes fixed inside spacecraft
13 p2499 A70-28389
- Cover plates unsteady motion during explosive welding of metals, discussing edge damage
13 p2416 A70-28484
- Stability of single periodic symmetrical solutions of plane circular restricted three body problem, using digital computer for numerical integration of equations of motion
13 p2490 A70-28950
- Numerical solution of satellite rotational damping by onboard motors using Euler equations, local variations and finite control time
13 p2505 A70-28963
- Motion stability of variable mass solid body with ideal liquid filled cavities about stationary point using Liapunov theorem
13 p2452 A70-29310
- Free and forced motion characteristics in absolutely stable nonstationary nonlinear system analysis by variational approach
13 p2453 A70-29716
- Material system equations of motion, determining programmed motion variable mass systems stability
13 p2453 A70-29717
- Third order dynamic relay control system, determining periodic motion and motion stability
13 p2507 A70-29719
- Satellite orientation control and stabilization by gyro with statically and dynamically balanced rotors, showing steady motions and stability region augmentation
13 p2507 A70-29769
- Steady motions stability of gyrostat satellite in central Newtonian gravitational field
14 p2653 A70-30718
- Vibration stability of particle in plane restrained by two nonidentical springs with initial stress using Floquet theory and perturbations
14 p2657 A70-30843
- Routh theorem and Chetaev method for construction of Liapunov function to investigate steady state motions, obtaining stability conditions
15 p2774 A70-31469
- Motion and small vibration frequency stability of correctable gyroscope with correction moment at arbitrary angle with mismatch plane
15 p2738 A70-32154
- Motion and stability characteristics of dual spin satellite system with pendulous type nutation dampers, noting mass unbalance effect
[AIAA PAPER 69-857] 15 p2812 A70-32508
- Asymptotic motion stability bound for non-holonomic nonlinear electrodynamic systems, using energy metric algorithm for Liapunov functions generation
15 p2768 A70-32556
- Perturbation complex potential and aerodynamic forces determined for rectilinear profile motion under free surface, using linear theory
16 p2837 A70-33848
- Lifting rotor blade motions stability computation using Floquet transition matrix
17 p3009 A70-34726
- Circular orbit stability in stationary axisymmetric space-times dependence on angular momentum per unit mass increases outward from symmetry axis
18 p3317 A70-37004
- Motion stability in periodic cubic force field, using nonlinear differential equation integration with time periodic square wave function and Jacobian table
18 p3284 A70-37065
- Dynamic systems stability in sense of Poisson, relating motions commutative and stable families
19 p3472 A70-38936
- Elastic body with incompressible fluid filled cavities, studying motion and stability by deriving motion equations starting from principle of least action
20 p3672 A70-39376
- Fluid motion convective stability between vertical parallel planes with longitudinal temperature gradient, solving boundary value problem for amplitudes of normal perturbations
20 p3608 A70-39377
- Steady motions and stability of gravitating gyrostat and spheroid, considering dynamically asymmetrical and symmetrical conditions
20 p3672 A70-39387
- Asymmetric boundary layer transition effects on slender reentry vehicle motion by changing static stability characteristics
[AIAA PAPER 70-987] 20 p3557 A70-39542
- Harmonic forced transverse vibrations effects on rectangular plates with cross braces, deriving motion stability equations
20 p3725 A70-39867
- Satellite steady state motion and relative equilibrium position optimal stabilization by additional forces application
21 p3849 A70-40606
- Elastic deformable satellite motion stability in central Newtonian force field
21 p3927 A70-40827

Automatically controlled motion of object with finite degrees of freedom under parametric periodic disturbances
22 p4005 A70-43561

MOTIVATION

Motivation changes in rabbits exposed to increasing hypoxia in pressure chamber altitude simulation
07 p1208 A70-19506

Numerical payoff influence on reaction time to second stimulus in subjects receiving successive signals at short intervals
10 p1818 A70-24715

Motivation changes in rabbits exposed to increasing hypoxia in pressure chamber altitude simulation
11 p1987 A70-26105

Stochastic automata as learning system models in random environments with penalty-nonpenalty expectations, demonstrating convergence
13 p2374 A70-29587

Hypothalamic motivation, presenting data supporting less anatomical specificity
13 p2355 A70-29794

Eating, drinking and gnawing motivation interchangeability under hypothalamic stimulation, noting role of neural substrate activation
13 p2356 A70-29814

MOTOR SYSTEMS (BIOLOGY)

U EFFERENT NERVOUS SYSTEMS

MOTORS

NT ELECTRIC MOTORS

NT MICROMOTORS

NT SERVOMOTORS

NT SYNCHRONOUS MOTORS

NT TORQUE MOTORS

Multiplying digital device for measuring motor speed, torque and power, discussing optional applications and design
02 p0297 A70-12076

Positive displacement low pressure air motors for Boeing 747 fan thrust reverser pneumatic actuators and controls
03 p0550 A70-12881

Hydraulic synchronizers for motors and actuators speed equalization, describing operation and technical specifications
21 p3756 A70-40800

MOUNTAIN INHABITANTS

Blood plasma and red cell volumes simultaneous measurement in native group living at high altitude
15 p2684 A70-32537

Lung diffusing capacity for CO in Caucasians native to 3100 m noting membrane diffusing capacity, lung capillary volume and age effects
17 p3031 A70-35427

Hemodynamic changes in Andean native after two years at sea level, measuring intravascular pressures, cardiac output, heart rate and stroke index
20 p3571 A70-39427

MOUNTAINS

High temperature effects on evolution of Venus upper lithosphere, considering magnetic differentiation, isostatic adjustments, surface relief, mountain building time and distance scales, etc
02 p0371 A70-12207

Disturbances of air flow originating from small scale mountains using numerical model
07 p1330 A70-19799

Air flow disturbances over mountains in terms of turbulent boundary layer separation dissolution
07 p1330 A70-19800

Lee wave flow disturbances due to mountains by midtroposphere balloon and aircraft observation, noting flow features nonstationarity
12 p2262 A70-26883

Mountain climbing and prolonged stays at high altitudes effects on blood composition
13 p2352 A70-29355

Lunar rotary motion predetermination for spacecraft landing in mountainous region
15 p2773 A70-32266

MOUNTING

Turbine rotor and stator blades twist inaccuracies in assembly due to shroud induced stresses and blade root mountings clearances
07 p1291 A70-18827

Square Van Atta reflector with/without conducting plate used for mounting antenna half wave dipoles, considering scattering cross sections
09 p1646 A70-22695

Disk elements perpendicular mounting by rotation on vibrating shaft, obtaining orientation by centrifugal force
15 p2733 A70-31580

Mechanical design and mounting technique of Apollo 11 fused silica laser ranging retroreflector array at Tranquility Base
17 p3082 A70-34763

Accelerometer installation resonant frequency, discussing mounting methods, structure material, geometry and total mass
17 p3089 A70-35174

Flush mounted lightweight antennas for rockets, discussing construction radiation patterns, input impedance, etc
17 p3053 A70-35273

MOUNTS

U SUPPORTS

MOUTH

Silicon strain gage transducer for measurement of pressure between tongue and teeth, developing two types of temperature compensated strain gages
02 p0242 A70-12054

Stomatologic diseases during prolonged space flights simulation, discussing gingivitis, stomatitis, dental caries, parodontitis and odontogenous inflammations
13 p2352 A70-29338

Antidiuresis associated with oral cavity stimulation during food ingestion by rats
13 p2355 A70-29813

MOVEMENT

U MOTION

MOVING TARGET INDICATORS

Moving targets automatic identification by radar signals digital processing, describing radar echoes properties, moving window detector system and circuits design
01 p0137 A70-10358

ATC surveillance radar for high density traffic, discussing optimum electronic scanning rates, 3D radar and MTI
02 p0330 A70-11958

Target velocity effects on resolution of synthetic aperture side-looking radar
02 p0268 A70-12582

Visual prediction accuracy in estimating point coincidence of two moving targets as function of viewing opportunity and length of period
03 p0428 A70-14084

Forward looking airborne radar (FLAR) moving target indicator for military helicopter mounting
08 p1462 A70-21358

Target velocity and approach angle effects on accuracy of moving targets intersection estimation tested on human subjects
09 p1628 A70-23578

Two frequency moving target indicator system overcoming clutter motion relative to radar
11 p2004 A70-25737

Pilot midair collision warning instrument based on optical radar MTI, discussing target cross section enhancement by passive retroreflector
12 p2234 A70-27646

Subclutter visibility (SCV), resolution and interclutter of MTI or Doppler search radars in land, sea and weather clutter
12 p2188 A70-27940

Digital range tracking, Doppler filtration and moving target selection in multichannel automatic surveillance radars
13 p2380 A70-29735

MTBF

Failure rate and MTBF in reliability engineering, clarifying ambiguous terminology
20 p3638 A70-40061

Reliability of redundant repairable systems with preventive maintenance, determining mean time between failures
20 p3638 A70-40181

MTI RADAR

U MOVING TARGET INDICATORS

MUBIS (SCANNERS)

U MULTIPLE BEAM INTERVAL SCANNERS

MUCOUS

Pesinogens A, C and D from stomach mucosae of smooth dogfish separated by chromatography on DEAE cellulose
11 p1987 A70-26007

MUFFLERS

Noise damping model for complex configuration mufflers operating under conditions prevailing in diffuse acoustic field
08 p1545 A70-21009

Acoustic and gas dynamic characteristics of jet noise muffler using adapters at outlet section of exhaust nozzle
12 p2160 A70-27295

MULTICHANNEL COMMUNICATION

Temporal position of pulse signals measured by multichannel storage devices, discussing interference immunity and required storage time
03 p0448 A70-13435

Broad beam Tracking Data Relay Satellite (TDRS) for manned and automated spacecraft using VHF bands
06 p1006 A70-17345

PCM time division satellite multiple access communication system to increase time slot utility, considering individual earth station control and common signaling circuit features
06 p1011 A70-18409

Acquisition system design and experimental results for time division multiple access satellite communication system
06 p1011 A70-18410

Multiple access channel control system operating in variable destination multiple access mode for application in PCM-TDMA satellite communication system
06 p1011 A70-18412

Multichannel sequential detection of stationary signal, deriving analytical expressions for probabilities of erroneous solutions and mean duration of tests
07 p1227 A70-18762

Multichannel correlator for turbulent signal processing in real time scale using natural delay
07 p1284 A70-19832

Injection lasers for multichannel optical communication using composite cavities to improve spectral output
09 p1698 A70-23359

TDMA system burst synchronizer with periodic channel slots reallocation feature
10 p1835 A70-24331

Multichannel PCM/TDMA INTELSAT network with time preassignment and time assignment speech interpolation features for field test
10 p1835 A70-24332

Three channel traveling wave maser with cryogenic superconducting magnet for C-band monopulse radar system, describing construction and electrical characteristics
10 p1900 A70-24894

Geostationary satellite communication bandwidth increase by reusing same frequency band in multiple independent earthward beams, discussing modulation and interference noise allocation effects
11 p1996 A70-25405

Multiple-access and demand-assignment techniques, discussing compatibility of PCM-FDMA/SPADE/, PCM-TDMA, ATIC and INTELSAT 4 systems
11 p1997 A70-25415

Multiple channel communication satellite interchannel interference including preamplifier intermodulation, direct interference, multipath amplification, crosstalk and multiplexer reflections considered for capacity maximization
11 p2002 A70-25483

Symphonic satellite telecommunication network for multiple access telephone, telegraph, data transmission, radio and TV dissemination
11 p2005 A70-26008

Multiple access to communication satellite by limiting repeater, considering model of n signals plus band limited white Gaussian noise in zero memory device
11 p2008 A70-26229

Controlled digital data relay satellite system to provide multiple access between central station and user terminals, noting computer time sharing operation
11 p2008 A70-26230

Passive and active satellite systems for point-to-point communication network with multiple access capacity, comparing technical and economic competitiveness
11 p2011 A70-26335

Nonlinear phase shift equation derived from TWT single carrier performance, predicting multicarrier performance of communications satellites
12 p2195 A70-27248

Frequency-time coded multichannel communication system error probability bounds to investigate frequency selective fading effect on performance
12 p2184 A70-27416

Modulation-demodulation system for multiple access tactical satellite communication
12 p2187 A70-27915

Multiple user satellite system for air navigation and traffic control, presenting comparative error analyses for position determination by spherical and hyperbolic ranging
12 p2270 A70-27925

Statistical output characteristics of harmonic cosine and sinusoidal inertialess phase periodic converters in two channel system with frequency multiplication
13 p2370 A70-29741

Demand assigned domestic satellite communications system with capability of single hierarchy switching and serving terrestrial common carriers and direct users
14 p2552 A70-31351

Compact integrated microwave antenna of composite structure involving slotted waveguide planar array capable of operating in three frequency bands
16 p2876 A70-33406

Multiple access discrete address system for satellite networks
16 p2865 A70-33729

Multichannel sequential detection of stationary signal, deriving analytical expressions for probabilities of erroneous solutions and mean duration of tests
18 p3229 A70-37106

Worldwide multichannel air communications system in 10 GHz to IR range by Quasi Laser Link modulation and satellites
19 p3378 A70-37855

Multipurpose microminiature multichannel biomedical telemetry system, discussing design
19 p3368 A70-37856

U.S. nationwide satellite network for multichannel community antenna TV (CATV) operated at 12 GHz band
19 p3382 A70-38891

Multichannel iterative servosystems operators for useful signals reproduction 20 p3603 A70-39836

Frequency division multiple access satellite communication system, calculating bandwidth variations effects on intermodulation distortion 21 p3787 A70-41328

Multicarrier FM communication system, calculating adjacent channel interference due to impulse noise 21 p3789 A70-41343

Multiple channel VHF testing on ATS 1 and 3, describing transponder intermodulation and compression corrections 21 p3791 A70-41366

Multiple access communication satellite systems providing reliable speech communication for low density use in remote areas [JPL-TR-32-1501] 21 p3791 A70-41368

Wideband detection of frequency uncertain M-ary frequency shift-keyed [MFSK] transmission in Gaussian noise, deriving symbol error rate for limiting SNR cases 21 p3792 A70-42177

Multichannel correlation filter devices for processing periodic fluctuating signals in noise background 22 p3987 A70-42557

Solid state IF or baseband switching elements design for high capacity multichannel microwave systems 23 p4172 A70-44014

MULTICHANNEL RECEIVERS
U MULTICHANNEL COMMUNICATION RECEIVERS

MULTICHANNEL TRANSMITTERS
U MULTICHANNEL COMMUNICATION TRANSMITTERS

MULTILAYER INSULATION
Multilayer insulation blankets with slits normal to energy transfer direction for thermal control of spacecraft and cryogenic tankage [AIAA PAPER 70-15] 06 p1156 A70-18076

Effective thermal conductivity parallel to laminations of multilayer insulation as function of temperature, layer density and length [AIAA PAPER 70-846] 16 p2999 A70-33913

Radiation and conduction of open joint multilayer insulation systems, analyzing dependence on contact area by numerical methods [AIAA PAPER 70-848] 16 p2939 A70-33915

Cryogenic multilayer insulation (MLI), comparing radiation magnitudes, gas conduction and contact solid conduction to calorimeter and tank data [AIAA PAPER 70-850] 16 p2939 A70-33917

Multilayer insulation thermal scale modeling, discussing surface control techniques 21 p3951 A70-41865

Guarded electrical cylindrical calorimeter measuring multilayer insulation thermal conductivity, discussing construction, test and error 23 p4195 A70-44366

Gas pressure differential across multilayer insulation blanket during rapid evacuation predicted, using one dimensional flow theory [AIAA PAPER 69-608] 23 p4282 A70-44522

MULTILAYER STRUCTURES
U LAMINATES

MULTILOOP SYSTEMS
U CASCADE CONTROL

MULTIMODE RESONATORS
Multimode excitation of large aperture horn antennas to produce electronic deflections of directional pattern 01 p0046 A70-11454

Sectorial and circular strip resonators natural oscillation modes and freely propagating waves of uniformly bent stripline 09 p1651 A70-23644

Free carriers mobility and concentration in microwave semiconductors measurable by two mode resonator over temperature ranges and magnetic fluxes 13 p2470 A70-28881

Mode intensity fluctuations in unlocked multiple mode He-Ne laser related to LF noise 21 p3837 A70-41918

Multifrequency autooscillatory systems, comparing reflex klystron with He-Ne laser 22 p3995 A70-42404

MULTIPATH TRANSMISSION
Multipath spectral and statistical characteristics in VHF satellite-aircraft link, discussing geometric considerations and reflection from Gaussian surfaces 02 p0259 A70-12565

Channel constraints on multiple access systems obtained from airborne propagation tests via satellites, studying disparities in received signal strength 02 p0260 A70-12569

Azimuth information transmission by PCM signals with equal repetition and scanning frequencies, investigating antenna characteristics 02 p0270 A70-12619

Recognition problem in multipositional symmetrical channel solved by special separation of observational

space with preference to signal arriving at reception point 03 p0446 A70-13197

Intrinsic noise of passive waveguide multipoint with losses, obtaining mean values and wave correlation functions using scattering matrix 04 p0655 A70-14402

HF oblique ionospheric soundings over long temperate latitude path, discussing measured angles of elevation and multipath time dispersion 05 p0847 A70-15998

Shielded multiconductor transmission line capacitance calculated by integral equations with Green function kernel 05 p0820 A70-16383

Field strength determination at reception point for long range short wave paths, taking into account multiple ray paths and antenna radiation patterns 07 p1237 A70-20435

Intermodulation noise performance of FM FDM trunk radio systems in two path fading situations, calculating noise/power ratio and baseband enhancements 09 p1632 A70-22237

Sensitivity of nondiffuse double exposure holographic interferometry with transparent medium increased via multiple beam passage through medium placed in optical cavity 09 p1682 A70-23360

Nonresonant multipath carbon dioxide laser amplifier small signal gain of 39 dB utilizing White optical reflector design 09 p1699 A70-23365

Amplifier properties and oscillator mode structure of multipath carbon dioxide laser 09 p1699 A70-23538

VHF satellite transponders for ranging and position fixing, studying ionospheric and multipath effects [AIAA PAPER 70-489] 11 p1999 A70-25433

System configuration requirements and detectability performance characteristics analysis for optimizing array reception of multipath 11 p2018 A70-26264

Multipath tolerant ranging and data acquisition for air-ground-air links in ATC based on mathematical scattering theory 12 p2268 A70-27642

Ladder networks total transmittance and voltage transfer ratio and impedance or admittance, investigating signal flow graph open paths and Fibonacci sequence 15 p2715 A70-32344

Group delay times criterion of multibeam propagation of ionospheric radio echoes for communications systems 19 p3375 A70-37332

Satellite communications performance improvement by use of multipath signal for channel models including noncoherent FSK 21 p3787 A70-41329

Microwave transmission over elevated line-of-sight path, measuring phase front distortion between pairs of paths 22 p3991 A70-43580

Multibeam communication channel identification from output signal autocorrelation function analysis 23 p4159 A70-43761

MULTIPHASE FLOW
NT TWO PHASE FLOW

Multiphase fluid continuum model and hydrothermodynamic equations under phase transformations, including dimensionless and similarity parameters 07 p1254 A70-19085

Viscid-inviscid equations solution, describing flows with coupled mixing, combustion and lateral pressure gradients [AIAA PAPER 69-166] 15 p2718 A70-32516

Nonequilibrium combustion products and condensables containing reactive multiphase rocket nozzle flows and exhaust plumes characterization using generalized kinetics streamtube program (MGKS) [AIAA PAPER 70-845] 16 p3001 A70-33928

MULTIPLE BEAM INTERVAL SCANNERS
Multiple beam earth station torus microwave antenna for satellite communication with nonplanar field of view over geostationary arc 21 p3798 A70-41357

MULTIPLE DEGREES OF FREEDOM
U DEGREES OF FREEDOM

MULTIPLETS
U FINE STRUCTURE

MULTIPLEX TRANSMISSION
U MULTIPLEXING

MULTIPLEXERS
U MULTIPLEXING

MULTIPLEXING
NT FREQUENCY DIVISION MULTIPLEXING
NT TIME DIVISION MULTIPLEXING

Communications subsystem configuration for orbital manned space station, describing data rates and processing, multiplexing and associated modulation methods [AIAA PAPER 69-1079] 01 p0043 A70-10627

Bandwidth reduction for interlacing two voice and three additional teletype subchannels in standard phone frequency range for use in VHF/UHF satellite link 03 p0450 A70-13623

Group delay characteristics curvature in radio relay systems, analyzing crosstalk in picture- sound and beamed multiplex signal transmission by nonlinear distortion method 05 p0815 A70-16774

Binary cyclic coding schemes for multiplex spectrometry in terms of linear least mean square unbiased estimate 06 p1013 A70-17217

Coding and signal selection for data relay satellite interrogation channel serving many low- powered unattended user terminals 06 p1006 A70-17347

Hologram spatial bandwidth reduction by space-time multiplexing 09 p1673 A70-22074

Gigahertz rate circuits requirements for high speed digital data communication from component and system viewpoint, emphasizing coding and multiplexing techniques 09 p1633 A70-22605

Channel separation in RF transponder for communication satellite achieved with RF multiplexers consisting of microwave filters and combiners with superior electrical performance [AIAA PAPER 70-509] 11 p2016 A70-25457

Large capacity long distance transmission by circular waveguides, describing artery frequency modulation and equipment for multiplexed telephone messages transmission 12 p2194 A70-27233

Multiplexer-interface system for digital nuclear and position control data transfer from high altitude balloons to earth monitoring instruments 12 p2233 A70-27407

Crosstalk effects on data transmission in multiplex TV systems for aerospace communications analyzed by signal and noise models 13 p2363 A70-28384

Wave front multiplexing on spatially distinct area of single piece hologram 15 p2738 A70-32054

Frame synchronization in biorthogonal coded multiplex communication system, describing PCM, pattern insertion and double encoding methods 17 p3045 A70-35266

Service multiplex for communications network via satellite, discussing reliability 18 p3229 A70-36667

Solid state multiplexed electrical power distribution system for future generation military and commercial airplanes [SAE PAPER 700301] 18 p3216 A70-36803

Aircraft electrical system multiplexing, discussing design features and advantages over conventional hard wired systems [SAE PAPER 700303] 18 p3216 A70-36811

Aircraft digital interior communication systems, combining multiplexing techniques with solid state integrated circuits technology and systems integration [SAE PAPER 700302] 18 p3216 A70-36813

Dispersive spectrometer multiplexing light in entrance and exit slit positions compared with Michelson interferometric spectrometers 21 p3823 A70-40848

FM transmission of multiplex telephone signals by communication satellites, deriving impulse noise due to adjacent channel interference 21 p3787 A70-41330

Multiple beam antenna system for regional communications satellite directing high radiated power toward specific earth areas 21 p3790 A70-41358

Boeing 747 aircraft passenger entertainment and service system controls electronics design and wire installation improvement by multiplexing techniques 23 p4174 A70-44543

Boeing 747 airliner passenger entertainment and service electronics multiplexing system, discussing cable and connectors selection and design 23 p4174 A70-44544

MULTIPLICATION
Multiplication theorem for Sbrauts characteristic functions of quasi-Hermitian operators, including open systems coupling 05 p0877 A70-16880

Trachtenberg rapid calculation methods for multiplication, describing triangular or double product method and general algebraic theory 07 p1327 A70-19785

Algorithm for Fast Two Dimensional Fourier Transform requiring logarithm additions and multiplication 11 p2073 A70-26250

Walsh functions electrical generation with small orthogonality error based on multiplication theory, presenting circuit diagram for 32 channel analyzer 13 p2364 A70-28900

Nondiverging filter with single additional multiplication by fixed scalar s at each observation time, proposing algorithm 16 p2887 A70-33872

MULTIPLIER PHOTOTUBES

U PHOTOMULTIPLIER TUBES

MULTIPLIERS

Feedback time sharing analog electronic multiplier for two quantities, noting linearity, accuracy and stability of measurements 02 p0268 A70-12422

Multiplier and gradient methods in computing variational and optimal control problems 07 p1325 A70-19267

Parallel multiplier design with carry-save scheme and constructed from series integrated circuits, discussing speed, complexity and cost 08 p1467 A70-21784

Theorem for highest statically admissible multiplier for plates and shells, noting association with stress field satisfying yield equality at all cross sections 08 p1595 A70-21977

Flexible channel multiplier for particle counting with electron conductive polymer composition, discussing secondary electron emission, gain distribution and degradation 17 p3054 A70-35279

Strain multiplier for fatigue sensor in moderate amplitude cyclic strain applications 20 p3628 A70-39159

Analog three dimensional electrical signal multiplier circuit based on Hall effect, considering division and square root extraction 24 p4319 A70-45484

MULTIPOLAR FIELDS

Multipole analysis for earth magnetic field allowing secular variation to be illustrated by time trends in multipole parameters 02 p0288 A70-11742

Plasma containment by spherical multipole magnetic trap, discussing injection and trapping of gun-produced plasma 08 p1553 A70-21609

Multipole analysis applied to 1965 International Geomagnetic Reference Field, separating secular variation field into drifting and nondrifting components 09 p1666 A70-22065

Multipolarized radar imagery for detecting high return linear cultural features in geographic areas including channel markers, bridges, railroad and power-line networks, etc 12 p2228 A70-26911

Pulsed multipole magnetic field shaping short plasma blobs 22 p4083 A70-43389

Earth quadrupole moment indirect effect on satellite gyroscope precession 23 p4217 A70-43799

MULTIPOLES

Multipole coupling circuits for wideband radio amplifiers 08 p1474 A70-21225

Asymptotic stability of multivariable autonomous control systems using Liapunov vector function method 11 p2083 A70-25606

Asymptotic stabilization of multivariable dynamic systems, using subsystem decomposition and Liapunov second method 11 p2023 A70-25607

Acoustic field scattering from multipole point sources by solid spherical surface 22 p4010 A70-42693

MULTIPROGRAMMING

IBM System/360 Operating System submodel simulator for multiprogramming, discussing language and structure 02 p0266 A70-12281

Airborne multiprocessor building blocks, discussing central processor, input/output controller and interface, memory unit and power supply 16 p2869 A70-33465

MULTIROPELLANTS

U ROCKET PROPELLANTS

MULTISPECTRAL BAND SCANNERS

Multispectral scanner technology for earth resources exploration from space 03 p0492 A70-13671

Multispectral scanner for Earth Resources Technology Satellite, discussing agriculture applications and advantages over return beam vidicon 03 p0493 A70-13957

Earth resources program data management system, discussing mission control, processing and distribution of data from satellite vidicon cameras and multispectral line sensors [AIAA PAPER 70-321] 09 p1792 A70-22854

Wheat fields recognition, mapping and acreage measurement by multispectral scanning with real time analog data processing, considering seasonal and observation altitude effects 12 p2219 A70-26930

Spectral discrimination technique for crops remote sensing, comparing statistical irradiance model with airborne multispectral scanner data 12 p2219 A70-26931

Collapse prone land detected by multispectral scanning and photography with analog data processing 12 p2220 A70-26933

Hydrobiological features mapping in Everglades by multispectral scanning and analog data processing 12 p2220 A70-26934

Preprocessing data transformations for multispectral recognition mapping, reducing difficulties due to variations in environmental, observational and sensor conditions 12 p2220 A70-26935

ERTS multispectral scanner with optimal sensitivity and resolution for agricultural scenes signature analysis 12 p2229 A70-26941

Airborne multispectral sensing, describing multichannel scanners, pattern recognition techniques and equipment, etc 17 p3083 A70-34874

Multispectral UV sky mapping and heavenly body intensity measurement onboard OAO 2 satellite 17 p3179 A70-35264

Remote multispectral sensing of environmental and vegetative gradients in Yellowstone National Park by intercomparison of thermal IR and visible band imagery 17 p3079 A70-35617

Earth resources satellite orbits and imaging sensors, discussing multispectral spin scanner design 20 p3626 A70-39053

Multispectral IR scanner system for earth resources survey programs 22 p4037 A70-43087

MULTISPECTRAL PHOTOGRAPHY

NT INFRARED PHOTOGRAPHY

NT RADAR PHOTOGRAPHY

Photographic and IR multiband spectral discrimination for rock and soil mapping from orbiting ERTS satellites [AIAA PAPER 70-303] 09 p1668 A70-22882

Multispectral imaging from lander for Martian surface constituents discrimination 11 p2051 A70-26000

Martian multispectral imaging from lander emphasizing spectral bands and gray levels number for discrimination of surface constituents 12 p2229 A70-26928

Engineering soils mapping by multispectral techniques, describing image interpretation by visual means, densitometric measurements and automatic spectral response classification 12 p2220 A70-26932

Collapse prone land detected by multispectral scanning and photography with analog data processing 12 p2220 A70-26933

Remote sensing techniques for earth resources inventory, describing image enhancement role in multiband space photography 12 p2220 A70-26936

Multispectral color aerial photography, describing instrumentation, oceanographic and agricultural applications, atmospheric effects on images, etc 12 p2220 A70-26937

Apollo 9 scientific multispectral photography mission, discussing meteorological support aspect of real time planning 14 p2610 A70-30614

Remote sensing experiment demonstrating utility of multispectral color aerial photography for detection of differences among vegetative species 17 p3095 A70-35615

Multispectral remote sensing for detection and mapping of ecological objects and energy budget parameters measurement 17 p3079 A70-35622

Multispectral photography in earth resources research, noting three return beam vidicons for technology satellites 20 p3628 A70-39128

Multispectral hydrometeorological environment monitoring in Earth Resources Survey Program 23 p4191 A70-44664

Optimum angle of attack control for multistage rocket as function of phase coordinates and time by solving functional equation with finite difference method 02 p0381 A70-12407

Shooting method for real time optimization of multiple burn rocket flights, presenting analysis, algorithm and test results 04 p0761 A70-14932

Multistage rocket optimum ascent regime obtained by height function of engine gas outlet velocity 06 p1155 A70-17585

Launch vehicle first stage cost reduction, considering weight factors, mass production, recoverability, etc 11 p2126 A70-26285

Two stage rocket booster-ram rocket launcher combination compared to single and two stage rockets 11 p2126 A70-26287

Cost optimal carrier rocket system for European satellite TV, communication, navigation and earth survey networks 13 p2502 A70-28448

Spin-stabilized rockets stage separation dynamics, considering guide shoe-guide rail lateral motion constraint system 13 p2503 A70-28508

Delta launch vehicle for scientific and application satellites, describing three stage liquid and solid propulsion systems 15 p2810 A70-31783

Europa 3 configurations for launching payloads into geostationary orbit using various rocket stage combinations 15 p2789 A70-32254

Two stage reusable space shuttle consisting of booster and orbiter 15 p2789 A70-32255

Multistage rocket weight optimization for payload and velocity at burnout, considering specific impulse, drag, etc 15 p2813 A70-32519

Modular launch vehicle system for European commercial satellites using Eldo-A/I Astris and French rocket stages 16 p2987 A70-34342

Black Arrow launch vehicle for inexpensive and reliable payload injection into low polar orbits 17 p3178 A70-35255

Europa 2 booster perigee stage engine design, discussing total and propellant masses, spin stabilization, materials, etc 23 p4234 A70-44672

MULTIVARIATE STATISTICAL ANALYSIS

NT CORRELATION

NT COVARIANCE

NT DISCRETE FUNCTIONS

NT ORTHOGONALITY

NT REGRESSION ANALYSIS

Multivariate analysis - Conference, Dayton, June 1968 07 p1323 A70-19026

Multivariate linear model and robust estimators of parameters based on rank tests 07 p1323 A70-19027

Multidimensional stochastic approximation theorems useful for infinite-dimensional Hilbert space or Banach space 07 p1324 A70-19029

Multidimensional Kiefer-Wolfowitz stochastic approximation algorithm modified to locate regression function minimum 07 p1247 A70-20028

Ballistocardiograms hypertensive observations multivariate analysis, discussing factors for various groups discrimination 21 p3763 A70-41230

Pattern recognition system design, discussing criteria and algorithm for grouping multivariate data without supervision 24 p4316 A70-45103

MULTIVIBRATORS

NT FLIP-FLOPS

NT MONOSTABLE MULTIVIBRATORS

Pneumatic fluidic oscillator consisting of bistable multivibrator, analyzing feedback loop operation based on electropneumatic analog system 02 p0229 A70-12673

Transistor bistable multivibrator design by graphic analytic method, considering effects of loading and supply voltages, temperature and component values on circuit performance 10 p1848 A70-23995

Interference free and frequency stable transistorized multivibrator circuits using High Level Logic /HLL/ units 14 p2561 A70-31163

Multivibrator designs incorporating distributed R-C-NR thin film structures 24 p4321 A70-46395

Multivibrators with improved stability and frequency-division capacity, using distributed R-C-NR structures 24 p4321 A70-46396

MUONS

Cosmic ray latitude survey in western U.S. and Hawaii in summer 1966 using neutron and muon monitors 01 p0167 A70-10228

High energy nuclear interactions defined by computerized determination of sea level lateral distribution of muons from primary cosmic ray air showers 01 p0171 A70-10667

Angular distribution of muon poor extensive air showers flatter than normal showers, discussing initiation by passive particles produced by cosmic ray-atmospheric nuclei 02 p0357 A70-12079

Inelastic muon-nucleon scattering implications on cosmic rays, studying equation validity for absorption cross section 02 p0359 A70-12702

Cosmic ray muon source implied from hadrons X pairs produced in primary cosmic ray collisions 02 p0360 A70-12845

High energy muon production and interaction, analyzing ionization burst spectra 03 p0555 A70-13037

Spatial distribution function calculation for muons in extensive air shower model and secondary particles mean transverse momentum estimation 03 p0556 A70-13039

Scintillation counters hodoscopic system for studying spatial distribution of muon and muon- number fluctuations in extensive air showers 03 p0482 A70-13042

Density spectrum exponent of penetrating muon component of extensive air showers determined for hodoscopic assembly of Geiger-Muller counters with lead absorber 03 p0556 A70-13043

Sidereal cosmic ray diurnal variations from underground muon telescopes in Northern and Southern Hemispheres, proposing model producing variations at earth vicinity 03 p0560 A70-13978

Muonic and hadronic component arrival time distribution in EAS measured under rock compared to Monte Carlo computation 03 p0562 A70-14187

Isothermal atmospheric temperature effects on extensive air shower characteristics and muon numbers computed at various temperature and observation levels 05 p0898 A70-15945

Angular distribution and production probability of secondary shower particles produced by high energy cosmic ray muons using scintillation counter facility 05 p0899 A70-15957

Muon-electron ratio measurements in extensive air showers, showing anomaly due to chemical composition change of primary cosmic radiation 05 p0901 A70-16274

Neutron formation multiplicity during capture of cosmic ray muons by Zn and Sb nuclei, noting agreement with one-third law 08 p1560 A70-20718

Extensive air shower simulation for determining inelasticity effect on electrons, hadrons and muons variation at sea level 08 p1563 A70-21674

K-mesons role in high energy cosmic ray muons angular distribution and nuclear interaction 09 p1748 A70-23731

Cosmic ray muons continuous recordings, describing design and performance of plastic scintillators with photomultipliers 10 p1889 A70-24489

Muon energy measurements using pair production, bremsstrahlung cross sections, burst sampling and Monte Carlo calculations 10 p1920 A70-24857

Sidereal time variations in cosmic ray intensity observed by inclined muon telescopes 10 p1933 A70-24858

Cosmic ray intensity fluctuations at geomagnetic equator using power spectrum analysis on mu meson records, discussing solar photosphere and interplanetary magnetic field 12 p2291 A70-27176

Muon intensity meter for cosmic ray muon flux underground using scintillation telescope consisting of two coincidence counters 12 p2295 A70-28176

Low momentum muon intensity dependence on geomagnetic latitude 13 p2476 A70-28919

Cosmic ray muon energy spectra at large zenith angles measured by optical spark chamber magnetic spectrometer 13 p2476 A70-28933

Cosmic ray muons energy spectra and zenith angle distributions by analyzing tracks recorded in high field heavy liquid bubble chamber 13 p2476 A70-28934

Cosmic ray vertical muon flux measurements at sea level using spectrometer 13 p2477 A70-29124

High energy cosmic ray muons, investigating arrival from both low and high galactic latitudes 13 p2478 A70-29482

Statistical accuracy of standard muon azimuthal semicubic telescope for solar cosmic rays, discussing rms error 18 p3256 A70-36103

Azimuthal muon telescope installation at cosmic ray station, noting photorecorder circuitry 18 p3256 A70-36108

Cosmic ray muon intensity deep underground vs depth measured with liquid scintillation detector hodoscope 18 p3308 A70-36897

High energy primary cosmic ray muons arrival directions examined for anisotropies underground 19 p3508 A70-38141

Sidereal daily variation in cosmic ray muon intensity at 60 mwe depth, indicating extragalactic origin 19 p3509 A70-38149

Sidereal cosmic ray diurnal variations using underground mu-meson telescopes in Northern and Southern Hemispheres 19 p3510 A70-38150

Muon deficient showers intensity distribution as function of sidereal time, obtaining anisotropy upper limit by statistical analysis and Monte Carlo method 19 p3511 A70-38483

Muonic atoms nuclear excitation in Zn 66 and 68 20 p3674 A70-39221

Primary cosmic rays spectrographic measurement, using hard muon component intensity variations data 20 p3629 A70-39320

Secondary cosmic ray muon inelasticity in high energy neutrino interactions for deep mine experiments, using lepton current 21 p3845 A70-41139

Cosmic ray signal anisotropy around 0900 h sidereal time and 30-60 degree declination, investigating muon events in liquid scintillator 21 p3882 A70-41994

Anomalous angular distribution and inelastic cross section of muon-nucleon interaction for penetrating underground cosmic ray particles 22 p4095 A70-43232

MUSCLES

NT MYOCARDIUM

Somatic motor unit spikes human biceps during posture holding, obtaining Markov chain and random variable behavior patterns 03 p0416 A70-13011

Plethysmographic investigation of myogenic load influencing sportsmen central nervous systems state, tabulating short and long distance running results 03 p0420 A70-13403

Pathologic findings of left ventricular papillary muscle related to electrocardiogram, discussing papillary muscle dysfunction syndrome 03 p0426 A70-13942

Hypokinesia effects on transversostriated muscle fibers of mice, noting changes in myofibrillar apparatus, mitochondria and sarcoplasm 04 p0629 A70-14569

Human skin temperature variations in supramuscular areas under physical activity and rest 04 p0638 A70-15505

Synchronous variations in skin and muscle temperatures of musculus gastrocnemius and flexor carpi in human subjects performing intermittent physical exercises 04 p0639 A70-15506

Muscle temperature variations and respiratory activity of athletes under various exercise regimens, outlining optimal weight lifting training programs 04 p0639 A70-15507

Skin-muscle temperatures ratio variations in dogs during periods of activity and rest 04 p0639 A70-15508

Orthostatic tolerance in humans increased by lower limb muscles electrostimulation, correlating subjective feelings with heart and pulse rate measurements 09 p1615 A70-22089

Vibration effects on receptors in frog toe muscles at various frequencies 12 p2179 A70-28344

Oxygen and carbon dioxide effects on airway smooth muscle following pulmonary vascular occlusion in dogs 13 p2356 A70-29943

Electrophysiological characteristics of rabbit eye muscles tonic fibers, measuring postsynaptic and membrane rest potentials 15 p2679 A70-31604

Portal vein smooth muscles electrical properties, using double saccharose bridge method 15 p2679 A70-31605

Orthostatic tolerance in humans increased by lower limb muscles electrostimulation, correlating subjective feelings with heart and pulse rate measurements 15 p2685 A70-32685

Skeletal muscle proteins fractional composition in white rats during hypokinesia, noting water content changes 17 p3030 A70-35356

Bone and muscle tissue morphological changes in caged and immobilized rodents and in myasthenic humans 17 p3030 A70-35357

Analog computer for continuous recording of oxygen consumption of muscular area in canine foot via blood flow rate and oxygen saturation 19 p3367 A70-37354

Senescent *Drosophila melanogaster* flight muscle electron microscopic examination showing mitochondria in stages of degeneration 20 p3574 A70-40075

MUSCOVITE

Neutrinos line patterns in Muscovite mica, refuting Russel assumption by analysis of multiple Coulomb scattering of charged particles and track comparison 03 p0556 A70-13047

MUSCULAR FATIGUE

Heart rate augmentation during constant performance in excess of endurance limit, considering muscle fatigue 03 p0431 A70-14292

Activity and rest alternation effect on fatigue and rehabilitation behavior of trained athletes, discussing muscle performance characteristics 04 p0639 A70-15510

Intraocular tension due to muscular fatigue in overheated albino rats, determining Na and K content in eye tissue 14 p2535 A70-30159

Signal processing methods application to myoelectric studies of muscular fatigue, employing surface electrodes 23 p4151 A70-44378

MUSCULAR FUNCTION

Rats decreased muscular work and denervation effects on alpha-aminoisobutyric acid uptake by skeletal muscle 02 p0232 A70-11712

Frog sartorius muscle heat production and work effect measured under isotonic and isometric conditions, using gradient layer calorimetry 02 p0232 A70-11715

Polarographic method for determining cat papillary muscle oxygen consumption used to investigate Fenn effect involving afterloaded and isometric contractions 02 p0234 A70-11726

Spinal cord and skin temperature effects on tension-extension diagrams in cats red and pale muscles 02 p0236 A70-12092

Sensory and muscular factors interaction in space perception via empirical test of summative hypothesis derived from sensory tonic field theory 02 p0239 A70-12626

Slow waves and spikes in intestinal muscle of cat noting dependence on intracellular iontophoresis of Na 03 p0416 A70-13014

Two loop control system model of human lens accommodative system derived on basis of muscle mechanics, optics and experiments 03 p0439 A70-14275

Lactate accumulation and anaerobic work threshold in subjects exercised on bicycle ergometer, considering muscle contraction effect on oxygen supply 03 p0431 A70-14293

Contralateral remote masking /CRM/ increase of LF tone burst produced by middle ear muscle contractions 04 p0632 A70-15082

Human unloading reflex, using experimental setup unloading muscle without tension increase 06 p1000 A70-17450

Oxygen tension change effects on rats smooth vascular muscles electrical and contractile properties 07 p1198 A70-18715

Surface and underwater swimming tests for statistical correlation to linear maximum accelerations effects 07 p1201 A70-18788

Acceleration and weightlessness effects on efficiency, reliability and capacity in pilots and astronauts muscular system 07 p1202 A70-18797

Human body turning /orienting/ in unsupported /weightless/ position by own muscular forces, determining inertia moments of body and parts relative to various axes 07 p1207 A70-19495

Veloergometric assembly using two bicycles for simultaneously measuring muscular motor activity of persons in competition 07 p1221 A70-19525

Electromyograms cross correlation analysis to study time relationships between motor unit discharges of human musculus biceps and triceps brachii during physical work 07 p1213 A70-19791

Human esophagus physiology, studying sphincter function from data on healthy and afflicted subjects 07 p1214 A70-19793

Step tracking in normal human subjects, studying muscle system around ankle joint 10 p1824 A70-23898

Initial period of muscular energy expenditure in athletes performing exercises on veloergometer, considering oxygen consumption

12 p2172 A70-28313

Human forearm motion control mechanism, examining mechanogram, instantaneous velocity, acceleration and biopotentials of biceps and triceps brachii

12 p2173 A70-28314

Myocardium potential working capacity in relation to diastola duration of ventricles

13 p2355 A70-29767

Heart rate elicitation and blood pressure increase, considering parasympathetic and sympathetic nervous outflows adjustments of initial cardiovascular response to muscular contraction

15 p2684 A70-32535

Human body turning /orienting/ in unsupported /weightless/ position by own muscular forces, determining inertia moments of body and parts relative to various axes

15 p2685 A70-32740

Muscular behavior analog simulation model from generalization of laws governing viscoelastic behavior of polymeric materials

15 p2693 A70-32820

Cardiac structure-functional relations, discussing muscle strand continuum, basal fibrous skeleton, epicardial, endocardial and myocardial layers

15 p2685 A70-32834

Human power output dependence on muscle mechanical properties and kinematics of input motion, describing ergometer

16 p2853 A70-33669

Human muscular function in conditioned and unconditioned thermoregulatory reflex changes of gaseous metabolism during repeated cooling

18 p3218 A70-36528

Thermoregulation of hedgehogs during muscular activity in cold environment, recording electrical activity, oxygen consumption and body temperature during work-rest cycles

18 p3219 A70-36542

Diaphragmatic muscle reactions and pneumogram changes in rats immediately after air passage obstruction

19 p3360 A70-37804

Myocardial contractile function in rats under acute overstrain, evaluating role of preliminary training to altitude hypoxia

19 p3360 A70-37805

Muscle function mechanics across knee joint in walking, relating tension to length, velocity and energy absorption

19 p3368 A70-37810

Perfusion peristaltic pump for determining smooth muscle reaction in vascular bed, discussing applications to physiological and pharmacological investigations

19 p3372 A70-38958

Skeletal muscle force generation stochastic model based on motor unit, discussing Poisson distribution and dynamic force response

21 p3769 A70-41199

Elastic bounce of body resulting from falling to ground with calf muscles in sustained contraction and without knee bending

21 p3765 A70-42151

Muscular group response to sinusoidal and trapezoidal force applied to forearm, discussing frequency dependent limb oscillations and neuromuscular effects

21 p3767 A70-42161

Motor activity and aging - Conference, Kiev, April 1968

22 p3967 A70-42893

Muscular activity in regulation of organism functions during aging, considering hypokinesia effects

22 p3968 A70-42894

Muscular activity influence on energetic processes and functions in aging organism, relating oxygen consumption to aerobic metabolism

22 p3968 A70-42895

Adaptation of cardiovascular system in aging and old individuals under muscular activity

22 p3968 A70-42896

Aged conditioned changes in muscular working capacity, relating developments in functionally labile nerve centers

22 p3969 A70-42898

Body oxygen control under muscular activity in aging individuals

22 p3969 A70-42899

Mathematical model of heart beat control during muscular activity in aging individuals, reflecting neural and hormonal control circuits

22 p3969 A70-42901

Physical training effects on blood circulation, respiratory and muscular functions in aging persons

22 p3970 A70-42905

Contractive function of myocardium in middle and advanced age individuals under high physical loads during prolonged periods

22 p3970 A70-42907

Vascular smooth muscle contraction regulation, discussing contractile protein, energy metabolism, ex-

citation-contraction coupling, spontaneous rhythmicity, response to stimulants, etc

24 p4299 A70-45807

Sympathetic-adrenal system activity of trained organism during muscular work and emotional excitation

24 p4300 A70-45841

Esophageal swallowing pattern of longitudinal and circular muscular layer contraction, using intraluminal pressure recordings

24 p4300 A70-45844

MUSCULAR STRENGTH

Muscle force and electromyogram behavior with alteration in blood flow and composition in anesthetized cats

02 p0231 A70-11708

Veloergometric assembly using two bicycles for simultaneously measuring muscular motor activity of persons in competition

07 p1221 A70-19525

Human muscular strength capacity relationship to maximal or submaximal dynamic work performance

16 p2853 A70-33668

Training effect on strength per unit cross sectional area of arm muscle, using ultrasonic measurement

17 p3024 A70-34592

Hand held device for finger /thumb/ strength measurements

24 p4309 A70-46121

MUSCULAR TONUS

NT HYPOTONIA

Polymethylene-bis-lepidine dibromides effect on blood pressure and peripheral vessel tonus in dogs, analyzing depressor reaction as function of binding chain

04 p0632 A70-15204

Blood pressure variations resulting in permanent irreversible hypertonia in air force pilots subjected to repeated stress situations and emotional irritations

09 p1626 A70-23011

Transmural stimulation elicited phasic and tonic contractile responses in circular and longitudinal axes of small intestine under nerve-blocking drugs

09 p1622 A70-23547

Physiological mechanisms of cold adaptation in terms of individual, type and population categories, examining thermoregulatory muscular reflex

18 p3218 A70-36527

Cerebrum electrical activity and myogenic tonus relation in subjects performing tasks in response to visual and acoustic stimuli

18 p3221 A70-37216

Muscular mechanics of intact heart contraction, discussing effects of altered fiber length, afterload and inotropic state

20 p3571 A70-39363

Fatigue effects on relationship between oxygen consumption, electromyographic activity and isometric contraction in human leg muscles

21 p3766 A70-42159

Skeletal status evaluation in space flight, describing instrumentation for bone mineral measurement and acoustic velocity method for bone elasticity

01 p0032 A70-10369

Cr 51 osteotropic properties for osseous system studies, discussing binding to bones, experiments on rats and rabbits, applications for human osseous system diagnosis, etc

01 p0029 A70-11403

Alpha-aminoisobutyric acid accumulation by soleus and plantaris muscles of rat in vivo during work induced growth, showing amino acid transport variation with work level

02 p0232 A70-11711

Rats decreased muscular work and denervation effects on alpha-aminoisobutyric acid uptake by skeletal muscle

02 p0232 A70-11712

Local contractures in K depolarized amphibian skeletal muscle fibers by intracellular injection or by microperfusion, discussing intracellular Ca ion concentration

02 p0234 A70-11728

Oxygen consumption, lactic acid production and mechanical performance of anesthetized dog gastrocnemius muscle with increased blood flow

02 p0235 A70-12090

Reactive forces and torques of musculoskeletal system during lifting and carrying materials, using computerized biomechanical models

02 p0247 A70-12549

Purification and properties of diphosphopyridine nucleotide-linked glycerol 3-phosphate dehydrogenases from chicken breast muscle and liver

03 p0442 A70-14047

Human nerve and muscle system changes under prolonged hypodynamia

10 p1815 A70-24681

Tissue oxygen partial pressure measurement in resting skeletal gracilis muscle of cat, using microelectrode

11 p1989 A70-26664

Repeated local spine cooling effect on gas exchange and electrical activity of white rats skeletal muscles

18 p3219 A70-36541

Respiratory activity of internal organs and skeletal muscles in rats exposed to long term heat and cold

18 p3220 A70-36546

Respiratory gas metabolism, tissue respiration and enzyme distribution in white rats skeletal muscles following long term cold acclimatization

18 p3220 A70-36548

White rats adaptation to multiple high temperature exposures, examining oxygen tension in skeletal muscles

18 p3220 A70-36549

Macroscopic architectural changes of cancellous and cortical bone in Rhesus monkey following long term immobilization and chemical removal of calcium

20 p3569 A70-38983

Plasma tocopherol concentrations and vitamin E deficiency in dogs, noting pathologic changes in smooth muscle, central nervous system, skeletal muscle and retina

20 p3569 A70-38991

Visceral blood flow during exercise in sled dogs, testing hypothetical compensatory decrease as cardiovascular reserve for skeletal muscle by biotelemetry

20 p3571 A70-39366

Ulnar resonant frequency reproducibility as objective measure of skeletal status, discussing forearm and hand positioning effect

20 p3579 A70-39432

Skeletal muscles static tension influence on dog respiratory center functional properties, showing increased frequency volume and sensitivity under stimulation

20 p3574 A70-40174

Skeletal muscle force generation stochastic model based on motor unit, discussing Poisson distribution and dynamic force response

21 p3769 A70-41199

Linear lumped parameter mechanical model of muscle spindle in postural control

22 p3979 A70-43496

Calcium metabolic balance reports discrepancies with radiologic indications of astronaut bone loss

23 p4148 A70-44838

Hypogravic skeletal atrophy model, considering bone maintenance as feedback control system

24 p4296 A70-45328

MUTATIONS

Chromosome of temperature-sensitive mutant of bacillus subtilis 168, observing multiforked replication at normal temperature and transfer of DNA

09 p1615 A70-22206

X ray effects on central nervous system noting mutations in rats, guinea pigs, chickens, dogs and rabbits

09 p1620 A70-22821

Spaceflight effects on dry crepis capillaris seeds in five day orbit, showing chromosome rearrangements and increased mutagenic sensitivity

10 p1811 A70-24323

MYELIN

Time course of end bulb material formation in vitro in rodent myelinated nerve fibers, confirming elastic capillary concept

02 p0233 A70-11725

MYLAR [TRADEMARK]

High transmission Mylar window He cryostat for Mossbauer measurements

21 p3828 A70-41470

MYOCARDIUM

P wave changes in serial ECG in patients with acute myocardial infarction

01 p0013 A70-10272

Serologic evidence of immune mechanisms, including heart muscle antibodies in patients with idiopathic cardiomyopathy, showing no autoimmune disease in majority

01 p0014 A70-10276

Atrial and ventricular gallops incidence during acute myocardial infarction by serial auscultation and phonocardiograms

01 p0014 A70-10277

Patients with/without coronary heart disease inhaled various gas mixtures to induce arterial hypoxemia and hyperoxia, noting O availability for myocardial metabolism

01 p0016 A70-10440

Myocardial infarct and other psychosomatic disturbances n Conference, Wiesbaden, West Germany, August 1967, Part 3
01 p0023 A70-10864

External environmental factors, life habits and personality structure effects on development of coronary artery disease, discussing psychosomatic aspects of myocardial infarction
01 p0023 A70-10866

Organic and psychological risk factors in myocardial infarction, presenting characteristic case history graphically
01 p0024 A70-10867

Physiological significance of myocardial fibers curvature in left ventricle wall determined by numerical solutions based on mathematical description
01 p0039 A70-11368

Left ventricular muscle time varying elastic properties, using dynamic model and Fourier series representations
01 p0040 A70-11371

Adrenal function in patients with acute myocardial infarction correlated with prognosis
01 p0029 A70-11405

Hyperbaric oxygenation /OHP/ effect on left ventricular function evaluated by measurement on anesthetized dogs of myocardial contractility
02 p0230 A70-11701

Cardiac relaxation mechanics from isolated preparation of cat papillary muscle, noting inotropic influences role
02 p0231 A70-11709

Heart rate change effect on myocardial oxygen consumption and nutritional circulation with constant coronary blood flow suggesting oxygen extraction independence of capillary surface
02 p0235 A70-11991

Frequency and postextrasystolic potentiations in guinea pig isolated auricles and dog heart in vitro and in situ, noting myocardial diagnostic use
02 p0235 A70-12088

Arterial counterpulsation effect on mechanics of left ventricular contraction and myocardial oxygen consumption in normal and abnormal animals
03 p0416 A70-13009

Myocardial changes in rabbits after general chronic ionizing irradiation attributed to lower cardiac activity, hypotrophy and dystrophy
03 p0425 A70-13888

External work and energy expenditure relations of heart, including myocardial oxygen consumption
03 p0426 A70-13940

Production mechanism of abnormal Q waves in obstructive cardiomyopathy
03 p0427 A70-13943

Acute myocardial infarction - Conference, Phoenix, March 1969
04 p0633 A70-15455

Pathological manifestations of acute myocardial ischemia without acute myocardial necrosis and myocardial infarction, discussing subjects with chronic occlusive coronary atherosclerosis
04 p0634 A70-15456

Primary and secondary pathological changes in small coronary arteries and role in acute myocardial infarction development, discussing coronary arteries distribution
04 p0635 A70-15457

Platelet function in coronary artery disease and myocardial infarction, considering thrombosis, atherosclerosis, emboli in microcirculation, etc
04 p0635 A70-15458

Clinicopathological studies of coronary artery occlusion and acute myocardial infarction, discussing coronary thrombosis
04 p0635 A70-15459

Psychosocial factors in myocardial infarction and sudden death, considering possible causes of fatal cardiac arrhythmia
04 p0635 A70-15462

Myocardial infarction therapeutic prevention possibilities on basis of epidemiologic and dietary studies involving hypercholesterolemia and hyperlipemia in coronary disease
04 p0635 A70-15463

Plasma lipids and lipoprotein changes following myocardial infarction, discussing rise and normal return times of free fatty acids, cholesterol and beta lipoproteins
04 p0636 A70-15464

Heparin role in anticoagulant therapy for myocardial infarction based on proved application to other venous thrombotic diseases, noting hemorrhagic complications controllability
04 p0636 A70-15465

Exercise relation to acute myocardial infarction, coronary thrombosis, stenosis and obstruction, discussing prevention value of physical reconditioning in heart patients
04 p0636 A70-15466

Familial aggregation for coronary artery disease and familial similarities in coronary anatomy, considering possible genetic analysis of myocardial infarction
04 p0636 A70-15467

Myocardial blood flow in patients with acute myocardial infarction determined from measuring effective capillary flow /ECF/ by direct counting of rubidium 86 uptake
04 p0636 A70-15468

Myocardial metabolism in ischemic heart disease using arterial and coronary sinus catheterization
04 p0636 A70-15469

Ventricular performance as function of infarcting myocardium, discussing dynamic characteristics
04 p0637 A70-15470

Acute myocardial infarction clinical features, discussing gallop rhythm, ventricular arrhythmias, ventricular tachycardia, bradycardia, etc
04 p0637 A70-15471

Sudden and early death in acute myocardial infarction, discussing prophylactic measures
04 p0637 A70-15472

Glucagon infusion effect on human coronary circulation, relating changes in cardiac dynamics to myocardial oxygen consumption and blood flow
05 p0800 A70-16101

Myocardial scarring sites localized in human subjects by HF ECG components
05 p0800 A70-16104

Acute myocardial ischemic injury and infarction in dogs related to changes in man using oxygraph tracings
06 p0997 A70-18405

Biochemical disturbances during early myocardial ischemia, examining coronary sinus lactate and K levels using electrocardiographic correlation
06 p0997 A70-18406

Ventricular ectopic beats and bradyarrhythmia associated with myocardial infarction, discussing enhanced automaticity, reentry activity, drugs and heart pacing
06 p0998 A70-18407

Bradycardic rhythms in acute myocardial infarction, investigating pathophysiologic, hemodynamic and electrophysiologic aspects and ECG interpretation
06 p0998 A70-18408

Perfusion pressure effect on myocardial oxygen consumption and coronary flow in stable nonworking rat heart
07 p1202 A70-18865

ECG changes attributed to reduction of blood supply to myocardium during orthostatic tests after prolonged hypokinesia
07 p1209 A70-19513

Left ventricular function myocardial infarction induced acute depression and subsequent recovery in intact conscious dogs
07 p1211 A70-19615

Physiological responses during exercise recorded in patients with healed myocardial infarction, considering work tolerance
07 p1212 A70-19693

Myocardium, endocardium and/or epicardium disease characteristics, discussing primary and secondary cardiomyopathy groups
09 p1616 A70-22277

Postinfectious noncoronary affections of myocardium in flight personnel, discussing clinical record, atherosclerotic differentiation and ECG variation
09 p1617 A70-22474

Cardiac muscle intercellular junctions ultrastructural appearance, considering macula adherens, fascia adherens and nexus junctional specializations
09 p1620 A70-23061

Idiopathic myocardial disease patients investigated for serological anomalies and markers of immunopathology
09 p1621 A70-23301

Wolff-Parkinson-White syndrome simulation of myocardial infarction, indicating false positive tests for exercise electrocardiograms
09 p1622 A70-23468

Hyperbaric oxygen effect on heart muscle contractions in mammals, considering cells enzymatic activity and substrate utilization
09 p1623 A70-23586

Body vibration effects in cats on myocardial ECG recordings, discussing electrodes implantation and tracings
10 p1810 A70-24007

Prolonged hypodynamia effect on heart size and myocardium function obtained from human chest X ray studies
10 p1814 A70-24673

Electrocardiac activity, myocardium and hemodynamic disorders in subjects after prolonged hypodynamia with or without physical exercises and during orthostatic test
10 p1817 A70-24692

Aerobic metabolism of heart muscle cells and oxygen utilization of coronary artery blood
10 p1821 A70-25081

ECG changes attributed to reduction of blood supply to myocardium during orthostatic tests after prolonged hypokinesia
11 p1988 A70-26112

Myocardial individual fibers length calculation based on ellipsoidal model of left ventricle and fibers helicoidal course, noting distension nonuniform effect
12 p2174 A70-27020

Metabolism in left ventricular myocardium of rabbits after asphyxiations and during postasphyxial recovery
12 p2168 A70-27624

Rats myocardial contractility depression by free fatty acids during hypoxia or anoxia, noting mechanical performance improvement by glucose
12 p2170 A70-27898

Microwave radiation effects on radar operators myocardium functions
12 p2180 A70-28358

Myocardium potential working capacity in relation to diastola duration of ventricles
13 p2355 A70-29767

Asymptomatic myocardial infarction in USAF flyers detected by annual electrocardiograms
15 p2690 A70-31889

Cardiac structure-functional relations, discussing muscle strand continuum, basal fibrous skeleton, epicardial, endocardial and myocardial layers
15 p2685 A70-32834

Contractile mechanics of cat papillary muscle during hypoxia and reoxygenation recovery
15 p2686 A70-32836

Autonomic drugs induced contractures of cardiac muscle of frogs, relating inotropic action with Ca influx during low membrane potential
15 p2686 A70-32837

Primary myocardial disease, describing hemodynamic and angiocardigraphic observation of left ventricular volume and wall changes
16 p2848 A70-33110

Coxsackie B virus as cause of myopericarditis in adults
17 p3025 A70-34860

Focal myocarditis associated with aircraft accidents, discussing difficulties in diagnosis and assessment
17 p3033 A70-35571

Calcium ion role in myocardial cell electrical and mechanical trace processes under normal content and manganese blocking
18 p3221 A70-36640

Myocardial contractile function in rats under acute overstrain, evaluating role of preliminary training to altitude hypoxia
19 p3360 A70-37805

Mathematical representation of heart muscle mechanical properties, examining tensile stress in parallel and series elements
19 p3368 A70-37809

Intracellular myocardium potentials under vagus inhibition by electrometric DC amplifiers with positive and negative feedback
19 p3370 A70-38213

Electrocardiogram vs vectorcardiogram for myocardial infarction diagnosis
19 p3371 A70-38362

Hemodynamic effect of lidocaine given by infusion and bolus injections in myocardial infarction, examining cardiac output, heart rate, systolic left ventricular and aortic pressures
19 p3366 A70-38575

Antigens immunological response during myocardial infarction
20 p3570 A70-39151

Mechanical analysis involving clamping apparatus for cardiac muscle contractile response
20 p3570 A70-39362

Muscular mechanics of intact heart contraction, discussing effects of altered fiber length, afterload and inotropic state
20 p3571 A70-39363

Determinants of human ventricular dimensions and myocardial free velocity relations during maximum and submaximum exercise levels
20 p3571 A70-39365

Myocardial Na and K content of rats exposed to high altitude, preparing isolated right ventricular strip
20 p3577 A70-40541

Myocardial blood flow response to cardioacceleration by right atrial pacing in normal subjects, using coincidence counting
21 p3760 A70-40576

Postexercise electrocardiogram detection of latent coronary heart disease in flyers prior to myocardial infarction
21 p3771 A70-41494

Serum enzymes lactate dehydrogenase, creatine phosphokinase and isoenzymes in conditioned male after marathon run, noting little myocardium damage
21 p3766 A70-42158

Contractive function of myocardium in middle and advanced age individuals under high physical loads during prolonged periods
22 p3970 A70-42907

Myocardium bioelectric activity electrocardiogram simulator, describing block diagram and operation
22 p3979 A70-43553

Indirect serial determination of left ventricular systolic ejection time changes in human patients with acute transmural and nontransmural myocardial infarctions
23 p4144 A70-43946

Hypercapnia effect on oxygen tension in ischemic myocardium in dogs using polarographic method
24 p4300 A70-45843

MYOELECTRIC POTENTIALS

Calcium ion role in myocardial cell electrical and mechanical trace processes under normal content and manganese blocking
18 p3221 A70-36640

MYOELECTRICITY

NT MYOELECTRIC POTENTIALS

Myocardium bioelectric activity electrocardiogram simulator, describing block diagram and operation
22 p3979 A70-43553

Signal processing methods application to myoelectric studies of muscular fatigue, employing surface electrodes
23 p4151 A70-44378

MYOPIA

Hypoxia effects on aviators visual accommodation, convergence and stereoacuity, noting myopia increase with altitude
20 p3569 A70-38996

N

N ELECTRONS

Tunable adjustable solid state bandwidth filter using N path system for low pass to bandpass filter transformation
02 p0270 A70-12666

N-N JUNCTIONS

HF admittance and noise in forward-biased majority carrier Ge-Si n-n heterojunctions and Schottky barrier
03 p0539 A70-13159

N-P JUNCTIONS

U P-N JUNCTIONS

Bipolar n-p-n transistors fabrication to increase driving capabilities of complementary MOS transistors while retaining low power dissipation
05 p0821 A70-16419

Hybrid ion implanted diffused emitter n-p-n transistor two dimensional doping profiles, considering emitter oxide window edge shape effect
22 p3997 A70-42924

N-TYPE SEMICONDUCTORS

Current carrier mobility in n-InSb calculated by Schwinger variational method over temperature range
01 p0154 A70-10098

Natural absorption band absorption coefficient frequency and temperature dependences in doped n-InSb
01 p0154 A70-10100

Hole mobility in n-type InSb semiconductors determined from solving kinetic equation for minority carriers allowing for scatterings
01 p0155 A70-10185

Plasma injection occurrence as function of temperature in n-InSb subjected to low electric field strengths and fitted with Ohmic contacts
01 p0159 A70-11176

Free carrier light absorption in n-type GaAs, InAs and Ge semiconductors with mechanically polished surfaces as function of thickness and crystal structure
03 p0538 A70-13057

N-GaAs pulsed Gunn effect oscillators for decimeter band, discussing synchronization by external sinusoidal current
03 p0499 A70-13204

GaAs n-type single crystals thermoreflectance spectra at various energies
03 p0541 A70-13721

Carrier concentration profiles and surface resistance of Ohmic contacts to solution epitaxial n-type GaAs wafers measured by Schottky barrier capacitance
03 p0543 A70-14213

Resistivity, temperature and injection level dependence of minority carrier lifetime in neutron irradiated p- and n-type Si
04 p0730 A70-14729

N-type layer formation with ion implanted nitrogen or Sb in p-type alpha-SiC, evaluating electrical characteristics, discussing junction devices formed
04 p0732 A70-15685

Doped n-type Ga-As electrophysical parameters determinable from IR reflection spectra
05 p0892 A70-16540

Field emission mechanism of hot electrons from semiconductors, discussing experiments with n-Si of high resistivity
06 p1126 A70-17749

Magnetoresistance effects in impurity conduction mode of n-type GaAs crystals below 6 K, giving electron concentration
07 p1356 A70-19796

Ohmic contacts to n- and p-type semiconductors obtained by ruby laser, noting linear current-voltage characteristics
07 p1299 A70-19797

N-type InAs single crystals optical properties with various carrier concentrations at 1-6 mu wavelengths and 300-78 K temperatures, studying absorption spectra
08 p1555 A70-20512

Gunn diode parallel combinations fabricated for X band with n-type GaAs crystals, discussing output power at CW operation
08 p1477 A70-21296

Al n-type Si Schottky barrier diode characteristics, discussing I-V, barrier height, temperature dependence, photoemission, LF noise, etc
09 p1644 A70-22210

Absorption spectra of n-type GaAs before and after proton irradiation, discussing dependence on wavelength
09 p1739 A70-22753

Frequency dependent negative resistance of n-type semiconductor doped at acceptor level near valence band top
10 p1927 A70-24273

Helicon wave dispersion in cold multicomponent plasma of n-type Si and Ge semiconductors in linear hydrodynamic approximation
10 p1928 A70-24832

Helical propagation in multivalley semiconductors of n-Ge type, obtaining polarization anisotropy
10 p1928 A70-24842

Thin n-type Ge film electrical conductivity effect on ferromagnetic barium titanate single crystals as function of magnitude and sign of polarizing field
11 p2097 A70-25383

GaAs-Au surface barrier n-type photodiode structure, electrical parameters and response characteristics
12 p2194 A70-26969

Electric field heating effect on edge photoluminescence of n-type GaAs, noting increase in electron energy
12 p2286 A70-27368

Cu doped GaAs n- to p-type transition after fast reactor neutron irradiation, measuring Hall effect and photoconductivity to determine Cu electrical activation
12 p2287 A70-27490

Thin plates finite length effects on thermal conductivity measurement by impulse method, verifying results with n-type silicon samples
12 p2332 A70-28047

Electric field distribution in rectangular waveguide loaded with magnetized n-InSb at room temperature obtained by solving boundary value problem by variational method
12 p2202 A70-28163

N-type GaAs carrier mobility and concentrations increased slow cooling after heat treatment
12 p2289 A70-28343

N-type Te-doped gallium antimonide conversion to p-type by electron irradiation, noting thermal conductivity variations
13 p2470 A70-29167

Metal-Ge n-type semiconductor tunnel junctions, discussing Sb and As doped units and conductance and barrier heights air cleavage effects
14 p2626 A70-30482

Bulk n-type InP single crystal transferred-electron oscillators, investigating current instabilities
14 p2556 A70-30686

Acceptor level formation kinetics from measuring Hall constant as function of temperature after diffusion of copper into n-type GaAs
15 p2782 A70-31633

Millimeter wave amplification by pumped n-type gallium arsenide oscillating in limited space charge accumulation mode
16 p2875 A70-33399

Transverse magnetic field influence on Gunn effect characteristics of n-type GaAs
17 p3142 A70-34622

Submillimeter lasers radiation measurement with n-InSb detectors at liquid He temperature
17 p3107 A70-35109

Wideband UHF amplification in bulk n-type GaAs during domain generation, comparing cut-off and Gunn frequency
17 p3143 A70-35684

Shallow acceptor level in Au-doped n-type GaAs, using photoconductivity temperature dependence
17 p3143 A70-35702

Photoconductivity relaxation kinetics of low resistivity n- and p-type GaAs, showing nonradiative recombination
17 p3143 A70-35703

Absorption coefficient of n-type indium arsenide single crystals with varying electron and doping concentrations, investigating spectral dependence
17 p3144 A70-35705

Electrical properties of n-type GaAs epitaxial films grown by gas transport method
17 p3144 A70-35706

Visible light-emitting p-n junctions formed in AlAs via Zn diffusion into single crystal n-type vapor grown AlAs layers
18 p3297 A70-36316

Electrical conductivity, Hall constant and differential thermal emf n-type GaAs-CdS solid solutions
18 p3298 A70-36596

Energy zone bending near surface of n-type semiconductor, discussing surface plasma level
18 p3298 A70-36619

Constant emf in bulk Ge and Si n-type semiconductors under multifrequency microwave electric field
21 p3861 A70-40636

Acoustoelectric domain spectra in n-GaAs by microwave emission, comparing results with parametric conversions theory
21 p3863 A70-42002

Fermi energy and bandtail parameters in heavily doped and degenerate n-type GaAs, calculating conduction band density of states by screened Coulomb potential
21 p3864 A70-42018

Holographic recording on n-type Si single crystal surface by photoanodic engraving
22 p4026 A70-42332

N-type GaAs samples doped with Ag, Se and Te respectively, measuring absorption coefficients spectral dependences at room temperature
23 p4229 A70-43928

N type GaAs doped with Si, conductivity anisotropy observed from measurement and explanation in terms of electron distribution
23 p4231 A70-44890

Tunneling electron and local mode phonon interaction in MIS n-type semiconductors
23 p4231 A70-44916

Mossbauer effect analysis of Fe impurity atoms in n- and p-type semiconductor compounds with wide and narrow forbidden gaps
24 p4388 A70-45204

Czochralski thermal probe for current carrier concentration in strip shaped area of n-type GaAs single crystals active growth
24 p4389 A70-45481

P- and n-channel MOS transistor instability during superbreakdown voltage application to drain electrode
24 p4319 A70-45811

N-156 AIRCRAFT

U F-5 AIRCRAFT

NA-300 AIRCRAFT

U OV-10 AIRCRAFT

NACELLES

Airframe flow field effects on propulsion system performance in transonic flight, studying case of underwing aft mounted turbojet engine nacelles
01 p0004 A70-10321

Boeing 747 nacelle development programs involving outdoor and ground test rigs, flying test bed, flight tests, etc
03 p0550 A70-12894

[SAE PAPER 690389] Pressure distribution about finite axisymmetric nacelle determined using Douglas Neumann program for cowl surfaces and inlet external surface
07 p1190 A70-20412

Thrust follower force stability in pod mounted jet engine and nacelle whirl using multiple degrees of freedom model
10 p1930 A70-25070

DC-10 aircraft wing engine calibration, isolated- and wing-nacelle testings using air-driven engine simulator [AIAA PAPER 70-590]
13 p2342 A70-29881

Powered nacelles simulating exhaust flow for propulsion and airframe problems in subsonic flow [AIAA PAPER 70-636]
16 p2888 A70-33594

NASA acoustically treated nacelle program reducing noise under commercial transport flight path near airports
22 p4089 A70-42529

Aerodynamic problems due to mixed subsonic and supersonic/ transonic flows on swept wings, nacelle lips and helicopter rotor blades [ICAS PAPER 70-14]
23 p4132 A70-44125

L-1011 aircraft optimum minimum noise pod design, describing technology, restraints and system requirements [SAE PAPER 700805]
24 p4393 A70-45877

NAMING

NT NORMS

NAPHTHALENE

Naphthalene rotating disk with confronting stationary disk, investigating heat and mass transfer dependence on shroud dimensions, measuring flow types
11 p2060 A70-26410

Surface erosion of sublimating graphite and naphthalene due to inequilibrium mass transfer in gas flows
13 p2437 A70-28580

NARCOTICS

NT MORPHINE

NASA PROGRAMS

NT APOLLO APPLICATIONS PROGRAM

NT APOLLO PROJECT

NT CENTAUR PROJECT

NT EARTH RESOURCES PROGRAM

NT GEMINI PROJECT

NT MARINER PROGRAM
 NT MARS 69 PROJECT
 NT MARS 71 PROJECT
 NT MERCURY PROJECT
 NT ROVER PROJECT
 NT SKYLAB PROGRAM
 NT SURVEYOR PROJECT
 NT SYNCHRONOUS COMMUNICATIONS
 SATELLITE PROJ
 NT TEKITE PROJECT
 NT TIROS PROJECT
 NT VIKING MARS PROGRAM
 NASA Technology Utilization Program extending space exploration and upper atmosphere R and D to X ray pictures, safer highways, TV cameras, etc
 01 p0220 A70-10282
 Space rescue techniques and equipment in NASA recovery programs, considering low earth orbit and water landing
 01 p0035 A70-10717
 Apollo spacecraft contamination control program, considering NASA role in management, contractor controls, criteria establishment and enforcement, etc
 01 p0220 A70-11076
 Meteorological spaceborne IR instruments associated with NASA satellites, discussing various Tiros and Nimbus instruments
 03 p0491 A70-13666
 NASA Source Evaluation Board process for major contractor selection, discussing procurement practices and management techniques
 03 p0610 A70-13962
 NASA research studies supporting tracked air cushion vehicle /TACV/ program illustrating aerospace technology application to ground transportation
 [AAS PAPER 69-565] 04 p0622 A70-14639
 Helium properties and utilization in NASA projects, discussing pressurization of fuel tanks cooling of superconducting magnets
 04 p0720 A70-15633
 NASA aerospace system safety program implementation and supporting organization with emphasis on background, concepts, constraints, methods and results
 [SAE PAPER 690710] 05 p0792 A70-15856
 Sterile access system using pilot assembly sterilizer system /PASS/ for NASA Planetary Quarantine Program
 05 p0808 A70-16708
 U.S. space research and technology applications in aviation, astronomy, weather information, intercontinental communication and space shuttle design
 05 p0921 A70-17091
 NASA solar particle alert network /SPAN/ operated by Manned Spacecraft Center giving 24 hr coverage of solar activity at optical and radio frequencies
 06 p1029 A70-18013
 Space flight candidate selection and physical training, comparing American and Soviet training programs for efficiency and physical requirements
 07 p1216 A70-18792
 Azur satellite program, describing NASA-German cooperative effort
 [DGLR-69-052] 07 p1391 A70-18815
 NASA three meter orbital telescope discussing configuration, optical geometry, launching, power supply, etc
 07 p1280 A70-19150
 Midwestern political economy and federal R and D funds distribution, surveying bidding practices and NASA contracts for five year period
 07 p1428 A70-19733
 Small Astronomy Satellite /SAS/ program providing Explorer class Scott launched satellite capability for astronomical observations
 08 p1581 A70-20608
 National Space Program relevance to human society, discussing solar system exploration, applications in meteorology, communication, etc
 09 p1792 A70-22041
 NASA earth-orbit shuttle /EOS/ for achieving routine arrival, conventional landing after orbital flight and reentry
 09 p1766 A70-22677
 Earth Resources Satellite Information Systems, discussing NASA Space Application Program relation to national goals, federal spending, cost effectiveness analysis, information sales, etc
 [AIAA PAPER 70-333] 09 p1793 A70-22860
 NASA Geodetic Satellite Program applications to long range navigation, spacecraft orbit prediction, navigation experiments calibration, etc
 09 p1724 A70-23048
 NASA future space programs, discussing space shuttle and station, nuclear propulsion, manned Mars landing, unmanned Venus-Mercury probes, etc
 09 p1762 A70-23065
 Photo-optical processes and optical measuring techniques in research programs at Ames Research Center for aerodynamics, life sciences and space sciences
 09 p1657 A70-23501

NASA operation of Convair 990 jet transport as airborne scientific research platform for optical observations
 09 p1682 A70-23504
 Optical equipment development at Jet Propulsion Laboratory, discussing flight TV systems and associated digital image processing laboratory, planetary spectroscopy, spacecraft guidance, etc
 09 p1657 A70-23505
 Optical research at NASA Electronics Research Center applied to air pollution measurement, pulse formation, pilot warning systems, star field mapper, etc
 09 p1657 A70-23513
 Marshall Space Flight Center optical research programs technology base for launch vehicle development support, discussing Apollo Telescope Mount
 09 p1657 A70-23518
 Lewis Research Center applications of optics to research in flight propulsion and space power generation, discussing gas density visualization, radiative heat transfer, etc
 09 p1657 A70-23522
 Materials and processing technology roles in NASA programs involving manned space stations, service spacecraft and unmanned space exploration
 10 p1902 A70-23855
 Environmental engineering at NASA MSC, surveying Lunar Receiving Laboratory, microbe incinerator, radon adsorption, Apollo Post-Landing Environmental Test Tank and vacuum chamber
 10 p1860 A70-24411
 Automatic Malfunction Analysis /AMA/ digital computer software system supporting checkout and testing, defining normal system status by computer simulation
 [AIAA PAPER 70-383] 10 p1861 A70-24922
 Space shuttle program, considering vehicle configurations mission capabilities and cost estimates with emphasis on ground and flight tests
 [AIAA PAPER 70-739] 10 p1953 A70-25074
 NASA-Lewis closed loop MHD low temperature power generator, describing systems performances during subsonic tests
 11 p1982 A70-25614
 Low cycle fatigue testing facility and methods used at NASA Lewis Research Center
 11 p2033 A70-26610
 Aerospace environment models development by NASA for engineering use in Space Vehicle Design Criteria program
 14 p2637 A70-30554
 Tropical storms and hurricanes critical winds forecasting accuracy by NASA Manned Spacecraft Center
 14 p2606 A70-30558
 European information retrieval network for interlocking NASA master file on space literature using computer terminals
 14 p2670 A70-31174
 Report to COSPAR on U.S. space science program, discussing NASA projects, stellar and solar astronomy, lunar and planetary research, cosmic particles, upper atmosphere, etc
 15 p2831 A70-31724
 Ten year NASA manned space station in low earth orbit, grouping experiments in functional program elements /FPE/
 [AAS PAPER 70-033] 17 p3156 A70-34802
 NASA ten year space station operational concepts, discussing mission planning, crew scheduling and management
 [AAS PAPER 70-031] 17 p3176 A70-34804
 NASA program for international cooperation in space involving developing and advanced nations, discussing television instruction for India, resource surveys, etc
 18 p3349 A70-36514
 Soviet and American lunar exploration by probes, manned surveillance flights and lunar landings, discussing NASA program
 18 p3238 A70-37079
 Integrated environmental control/life support resistojet systems, surveying NASA programs
 [AIAA PAPER 70-1130] 20 p3690 A70-40215
 NASA automatic checkout systems for Saturn 5 stages and instrument units
 21 p3803 A70-40770
 U.S. and Soviet space program administration and management
 21 p3956 A70-41893
 U.S. and European space program costs and resources with particular reference to telecommunication satellites
 22 p4126 A70-43247
 European participation in U.S. space projects, discussing economics, space shuttles and tugs and earth orbital space station
 22 p4126 A70-43407
 European-U.S. cooperation in shuttle and space station program, noting experience in unmanned systems
 22 p4127 A70-43508
 European cooperation possibilities in future NASA space programs
 22 p4127 A70-43510

European participation in small space shuttle development, discussing design, test vehicle program and European applications
 22 p4111 A70-43511
 Orbital laboratories and international cooperation, discussing national and foreign viewpoints
 22 p4128 A70-43631
 Space station development and missions, discussing general design philosophy, successive project lineage and applications programs
 22 p4108 A70-43653
 International space program cooperation, discussing NASA projects, Apollo 11 flight and European and Soviet programs
 22 p4129 A70-43655
 NASA research in turbojet aircraft propulsion noting inlet, compressor, combustor, turbine and nozzle component technology
 [ICAS PAPER 70-46] 23 p4233 A70-44144
 NASA design objectives for space transportation, discussing space shuttle, airlines-aerospace industry cooperation, computerization, etc
 23 p4257 A70-44173
 European space policy decisions regarding continuation of existing programs and participation in U.S. post-Apollo programs
 23 p4285 A70-44325
 NASA safety related research programs based on technology transfer involving information summarizing, indexing and storage from global aerospace research and development
 23 p4285 A70-44457
 NASA information fall-out, discussing Technology Utilization Program providing aerospace related data to civilian economy
 23 p4285 A70-44500
 Commercial transport aircraft fatigue loading data from NASA VGH /airspeed-acceleration-altitude/ program, discussing instrumentation, sample sizes, etc
 23 p4270 A70-44548
 NACA/NASA rotary wing aircraft research covering autogyro and helicopter development, noting flight safety
 23 p4142 A70-44851
 NACA/NASA rotating wing aircraft research history 1915-1970, Part 2, autogyro flight test experiences, rotor blade dynamics research, interest in helicopters, etc
 23 p4142 A70-44852
 NACA/NASA rotary wing aircraft research history 1915-1970, Part 3, covering rotor and helicopter theory, related flight and wind tunnel testing, etc
 23 p4142 A70-44853
 NACA/NASA rotating wing aircraft research history 1915-1970, Part 3, covering rotor dynamics and flying qualities, hovering tests, rotor flow, loads, etc
 23 p4142 A70-44856
 Systems and design requirements for NASA Manned Space Station, discussing projected experiment program for applications and science
 [AIAA PAPER 70-1298] 24 p4417 A70-45952
 Integrated electronics for NASA space shuttle program, discussing costs, configurations and technologies application
 [AIAA PAPER 70-1252] 24 p4418 A70-45966
 International participation in U.S. post-Apollo program involving reusable space transportation system and multipurpose space station
 24 p4431 A70-46123
NATIONAL AIRSPACE UTILIZATION SYSTEM
 General aviation requirements for national aviation system of 1970s including use of airspace and airports under all conditions
 [SAE PAPER 700296] 12 p2335 A70-27446
 Short range VOR/DME area navigation techniques in U.S. National Airspace System
 16 p2948 A70-33470
 Time-frequency national airspace system, using distributed sensors and closed loop control to meet safety and traffic handling requirements
 16 p2948 A70-33478
 National airspace system /NAS/, describing en route stage A automated air traffic control
 18 p3289 A70-36399
 National Airspace System air traffic control automation program for en route and terminal facilities
 19 p3464 A70-37914
 Area navigation system charting, discussing effect on flight information publications
 19 p3465 A70-38231
 Airline area navigation in national airspace system, emphasizing moving map display for navigation charting
 19 p3465 A70-38233
 ATC and general aviation growth, considering airport capacity, radars, navigation, National Airspace System, etc
 19 p3467 A70-38631
 ATC integration of SST, discussing en route and terminal projects of national airspace system, modular automation, instrument flight rules, etc
 19 p3467 A70-38633
 Air traffic control, future national airspace system improvements in view of air transportation growth, computerized automation technology, etc
 [AIAA PAPER 70-1263] 24 p4374 A70-45969

NATURAL FREQUENCIES

U RESONANT FREQUENCIES

NATURAL SATELLITES

- NT MOON
NT PHOBOS
Io and Europa mass and density anomalies, indicating asteroid capture by Jupiter as comet origin theory
01 p0182 A70-10671
Jupiter mass determined from observations of Jupiter fourth satellite right ascension and declination differences
02 p0370 A70-12087
Undiscovered satellites of solar system major planets, predicting Jupiter satellites
03 p0569 A70-13360
Jovian decametric radiation periodicities analysis refuting evidence of Bigg for new Jovian satellites
06 p1138 A70-17280
Eccentric and inclined motions of satellite of spherical planet in planet centered coordinate system, applying formulas to Jupiter motion
07 p1374 A70-18693
Photometric profiles of Jupiter shadows cast by large natural satellites used as upper atmosphere probes
08 p1579 A70-21571
Saturn globe, rings and satellites observations /1968-1969/
09 p1751 A70-22198
Bode law development from dynamical relaxation suggested from comparison of Jupiter, Saturn and Uranus inner satellite systems with planetary system
09 p1765 A70-23796
Jupiter decametric emission modulation by planetary rotation and Io position, suggesting role of magnetic tail diurnal swings
10 p1940 A70-24434
Motion of negligible mass body near large mass body affected by larger third body applied to Phoebe-Saturn-sun system
10 p1945 A70-24960
Observational data for distributions of physical and optical companions to spiral galactic systems and number of satellites as function of central galaxy size
10 p1948 A70-25247
Asteroid vs planet for manned landing site, considering Martian moons mission
11 p2108 A70-25660
Undiscovered satellites of solar system major planets, predicting Jupiter satellites
11 p2118 A70-26725
Light pressure induced secular effect contributing to planetary satellites and lunar orbits evolution calculated by numerical integration
11 p2118 A70-26777
Fuel savings by Jupiter moon gravity assisted transfer trajectories from earth, considering initial energy, mass ratio, approach angle, timing and aiming errors
14 p2640 A70-30761
Perturbative effects of Jupiter moons on spacecraft flyby and postencounter heliocentric trajectories, noting precision targeting
[AIAA PAPER 70-932]
18 p3316 A70-36680
Jupiter decametric radio emission modulation by Io simulated by DC circuit model
18 p3321 A70-37120
Uranus and Mars satellite relative measures, tabulating observations
19 p3516 A70-37932
Galilean satellites touring by Jupiter spacecraft, discussing orbit calculation and encounter geometry
[AIAA PAPER 70-1070]
19 p3530 A70-38883
Navigation instrument geometrical calibration by natural satellites and reference stars during interplanetary flight
[AIAA PAPER 70-1023]
20 p3669 A70-39586
Spacecraft-based navigation instruments for outer planet missions using celestial directions to outer planet natural satellites
[AIAA PAPER 69-902]
20 p3669 A70-39681
Initial water content on moon implied from hypothetical falling temperature lunar accretion as original earth satellite
22 p4102 A70-42954
Minor planets, comets and natural satellites positions and motions, discussing orbit and ephemerides calculation, Icarus asteroid, etc
23 p4256 A70-45038
Albedo and thermal emission of Jovian satellites I-IV at 3 to 12 micron wavelengths
24 p4413 A70-46171

NAVIER-STOKES EQUATION

- Navier-Stokes equation generalized solutions to initial boundary value problems, considering uniqueness theorem and smoothness
01 p0132 A70-11068
Navier-Stokes hypersonic weak interaction theory for viscous heat conducting compressible fluid flow past slender axisymmetric body
01 p0003 A70-11097
Navier-Stokes equations for compressible gas, generalizing viscous channel flow of heat conducting gas to slip flow of rarefied gas
01 p0068 A70-11579

Turbulent fluid flow analysis described by Navier-Stokes equations, introducing asymmetric tensors for anisotropic cases
01 p0068 A70-11605

Navier-Stokes difference equations numerically integrated by computer for viscous fluid flow along parallel flat plate at low Reynolds number
02 p0277 A70-11909

Computer application to Navier-Stokes equations numerical integration for incompressible viscous fluid deflected flow with large Reynolds number
02 p0287 A70-12376

Interstellar media under action of supernova or nova, solving Navier-Stokes equations of hydrogen plasma for motion during shock wave formation
03 p0564 A70-13221

Viscous incompressible laminar two dimensional flows using Navier-Stokes equations, emphasizing near wake and flow around leading edge
[ONERA-TP-757]
03 p0467 A70-13640

Viscous supersonic flow near wall with large local curvature, using asymptotic solutions to Navier-Stokes equations
03 p0468 A70-13867

Navier-Stokes boundary value problem describing viscous incompressible fluid flow between coaxial fixed and rotating cylinders, emphasizing stability analysis
03 p0470 A70-14242

Asymptotic form of axisymmetric solution with Dirichlet integral for Navier-Stokes equations applied to flow past bodies of revolution with smooth surfaces
03 p0471 A70-14303

Incompressible two dimensional time dependent Navier-Stokes equations for oscillating body with rectangular boundaries
[AIAA PAPER 69-185]
04 p0779 A70-15616

Non-Newtonian fluids in continuum mechanics, classical Navier-Stokes theory limitations and theory of incompressible fluids for viscometric flows
06 p1037 A70-17926

Navier-Stokes equations numerical integration in Eulerian coordinates, applying results to compressible and incompressible fluids steady flow
[AIAA PAPER 70-2]
06 p1040 A70-18113

Finite difference solution of time dependent Navier-Stokes equations for two and three dimensional laminar incompressible flow, discussing results for flat plates
[AIAA PAPER 70-46]
06 p1041 A70-18170

Transition regime gas flows using Navier-Stokes equations and boundary conditions set, considering heat transfer, torque and drag in spherical geometry
06 p1049 A70-18331

Finite difference analysis of partial differential equations derived from Navier-Stokes equations in hypersonic leading edge problem in merged gas flow-layer regime
06 p0980 A70-18349

Trailing edge region of flat plate in laminar incompressible flow examined for high Reynolds numbers limit using Navier-Stokes reduced equations
07 p1255 A70-19213

Navier-Stokes equations solved for unsteady incompressible three dimensional stagnation point flow, noting reduction to two dimensional and axisymmetric cases
07 p1188 A70-19343

Book on mathematical theory of viscous incompressible flow covering stationary and nonstationary boundary value problems for linearized and nonlinear Navier-Stokes equations
07 p1258 A70-19697

Oscillations of highly viscous incompressible fluid in partially filled cavity of body moving about fixed point, solving Navier-Stokes equations by asymptotic method
08 p1485 A70-21632

Navier-Stokes equations exact solutions for two dimensional steady flow of compressible viscous heat conducting perfect gas
08 p1485 A70-21638

Interstellar media under action of supernova or nova, solving Navier-Stokes equations of hydrogen plasma for motion during shock wave formation
08 p1580 A70-21654

Cauchy problem solution for linearized Navier-Stokes equations of incompressible rotating viscous fluid, discussing velocity and angular momentum effect on asymptotic behavior
09 p1659 A70-22326

Navier-Stokes equation for plane unsteady axisymmetric rotation of viscous fluid in steady radial flow from source or sink
09 p1660 A70-22437

Navier-Stokes equation approximation for non-homogeneous case obtained by relating Burgers equation to Riccati equation through similarity transformation
09 p1711 A70-22613

Navier-Stokes equations for laminar near wake of blunt based body, obtaining numerical solutions for adiabatic and constant wall temperatures
09 p1605 A70-23176

Shock wave structure nonequilibrium kinetic model using Boltzmann and Navier-Stokes equations
09 p1662 A70-23306

Laminar viscous flow past semiinfinite flat plate parallel to uniform stream, solving Navier-Stokes equation to determine local skin friction coefficient
09 p1663 A70-23581

Nonlinear stability problem posed by Navier-Stokes equations in case of laminar flows stability using semigroups theory
[ONERA-TP-755]
10 p1863 A70-24094

One dimensional Navier-Stokes equations solution for viscous heat conducting gas flow involving spherical sink for finite pressure at infinity
10 p1865 A70-24104

Finite difference methods stability for time dependent Navier-Stokes equations coupled to energy equation with quadratic terms in velocity gradients
10 p1866 A70-24106

Cascade theory of turbulence, applying cascade decomposition resulting from Navier-Stokes application to hydrodynamic turbulence to Riemann equation for atmospheric and plasma turbulence
10 p1868 A70-24167

Navier-Stokes solution to laminar flow past semiinfinite flat plate valid for any Reynolds number, discussing skin friction, displacement thickness, etc
10 p1869 A70-24415

Navier-Stokes-Maxwell equations solutions for conducting fluid flow in azimuthal magnetic field, noting jet acceleration near symmetry axis
10 p1924 A70-24574

Nonlinear disturbance decay in unbounded viscous fluid calculated by iterative solution of Navier-Stokes equations
10 p1871 A70-24854

Stability analysis using energy method applied to Navier-Stokes equations for unsteady viscous flow
11 p2042 A70-26849

Boundary value problem for Navier-Stokes equations to obtain stationary flows as limits of nonstationary solutions
14 p2600 A70-31347

Navier-Stokes equations derivation for multicomponent gas with internal nonrotary degrees of freedom, using moment equations
15 p2672 A70-31649

Series expansions convergence of solutions to boundary value problem for Navier-Stokes equations, introducing small parameter in boundary conditions
16 p2890 A70-33243

Exact and normal solutions of Boltzmann equation linearized around total equilibrium, yielding Navier-Stokes and Burnett transport coefficients
17 p3128 A70-34628

Turbulence theory from Liouville equation for Navier-Stokes velocity field distribution
17 p3073 A70-35629

Fluid turbulence unified heuristic model, defining determinate solutions for Navier-Stokes equations numerical integration at high Reynolds numbers
17 p3074 A70-35884

Multistage solution algorithm for solving Navier-Stokes equations stationary problem, considering plane motion of incompressible fluid
18 p3239 A70-36216

Similarity equations for rotating flow near disk, using Navier-Stokes equations for case of complicated boundary conditions
18 p3239 A70-36223

Boundary value problem for Navier-Stokes equations of viscous incompressible fluid flow, discussing convergence of iterative solution
18 p3241 A70-36290

Nonlinearized exact solution of Navier-Stokes equations for fluid motion between two coaxial circular disks rotating at equal velocity
18 p3241 A70-36381

Unsteady laminar incompressible fluid flow in parallel plate channels and circular tubes, solving Navier-Stokes equations for prescribed discharge
19 p3405 A70-38347

Round laminar jet with swirl, reducing Navier-Stokes equations to ordinary differential equations by similarity transformations
19 p3405 A70-38349

Compressible and incompressible Stokesian fluids motion described by finite element analog of Navier-Stokes equation
20 p3607 A70-38999

Unsteady flow in rectangular cavity with moving wall, using iterative solution of Navier-Stokes equations
21 p3807 A70-41317

Navier-stokes equations solutions in two way flows of Newtonian fluids with constant kinematic viscosity
21 p3810 A70-41961

Thermoelasticity theory concerning Navier-Stokes-Fourier type fluid universal motion characterization in absence of body forces and external heat supply
22 p4010 A70-42637

Navier-Stokes equations for discrete flows of viscous fluids, using grid cell representation
23 p4181 A70-44220

Channel vs deflection flow in boundary layer theory, considering Navier-Stokes equations 23 p4183 A70-44736

Incompressible laminar swirling jet flow, obtaining similarity solution for Navier-Stokes equations 23 p4184 A70-44982

Viscous heat conducting compressible fluid flow past slender axisymmetric body, presenting Navier-Stokes hypersonic strong interaction theory 24 p4289 A70-46020

Nonlinear parabolic initial value problems, including Navier-Stokes equations 24 p4370 A70-46414

Airborne DME minimum operational characteristics for air traffic control navigation and communication systems including equipment specifications, environmental conditions, accuracy and range 01 p0138 A70-11050 [DO-141]

Computerized navigation system for controlling aircraft movement on airports under zero visibility conditions 02 p0274 A70-1978

Aircraft navigation systems performance, discussing navigation aid integration by digital management computer coupling navigation sensors to display and control devices 02 p0334 A70-11984

Airborne computer civil navigation system designed for output coordination from navigation sensors 02 p0334 A70-11986

Navigation system with twin gyro platform and Doppler sensor, discussing performance and cost advantage over inertial systems 02 p0334 A70-11987

Nonlinear gyroscopic navigation system intrinsic error derived as function of linear operator 03 p0522 A70-13373

Apollo program navigation processing using Kalman optimal linear computer, emphasizing position vector and error matrix and command and lunar landing extrapolation module navigation 03 p0522 A70-13604

Optimum estimation equations as simple averaging extension, considering application to Kalman filtering in integrated space navigation system 03 p0522 A70-13608

V/STOL Flight Profile Indicator display system development to present pilot situation information in vertical plane [SAE PAPER 690694] 05 p0792 A70-15861

Polar diagrams control for distributed radiating systems, generating localizer planes for high flying aircraft navigation aids 05 p0812 A70-16150

Onboard computer requirements for inertial navigation of spinning and maneuvering vehicle, determining design parameters [AIAA PAPER 68-839] 06 p1013 A70-17161

Commercial navigation systems for long range subsonic transports, discussing accuracy, avionics hardware and crew responsibility optimization 06 p1102 A70-17638

Optimal timing of measurements to minimize dispersion of navigational observation parameters by least squares method applied to Keplerian orbit elements 06 p1103 A70-17878

Solid state VHF omnirange navigation system operation, principle, equipment, applications, advantages, etc 07 p1241 A70-19622

Navigational techniques - NATO/AGARD Conference, Milan, September 1967 09 p1721 A70-23026

Long range navigational aids requirements for airlines, discussing self contained navigation systems capabilities 09 p1722 A70-23028

Hybrid long range en route navigation system extended to short range role meeting ATC and terrain problems 09 p1722 A70-23032

Doppler VOR offering increased course accuracy and allowing precise area coverage in conjunction with DME ground station 09 p1723 A70-23036

Sequential collation of range /SECOR/ satellite tracking system using electronic phase comparison for measuring ground station-satellite distance 09 p1724 A70-23047

NASA Geodetic Satellite Program applications to long range navigation, spacecraft orbit prediction, navigation experiments calibration, etc 09 p1724 A70-23048

French geodetic satellites Diademe I and II experiments in navigation, noting laser and Doppler devices 09 p1725 A70-23049

Harrier navigation/attack system to provide successful single pass attack for close support and strike roles, noting target finding optimization 10 p1914 A70-24847

Inertial navigation systems, describing platform servos, computer, measurement devices, etc 10 p1914 A70-24861

North-finding gyroscope applicability for directional gyros and stabilized platforms 10 p1891 A70-24865

Area navigation system advantages for pilots, flight control systems and improved accuracy through rejection of VOR course scalloping [SAE PAPER 700214] 11 p2079 A70-25885

Soviet book on air navigation covering position determination methods, wind measurement, equipment design and use, etc 12 p2266 A70-26875

Area navigation for reducing cockpit navigation workload, permitting aircraft operations on desired course and enhancing pilot response to ATC instructions [SAE PAPER 700283] 12 p2266 A70-27426

Airborne computer design for short range attack missile /SRAM/ to perform aircraft navigation and missile fire control 12 p2192 A70-27800

Course deviation indicator /CDI/ display applicability to tracking Omega lines of position, providing reduction in weight, volume, cost and complexity 12 p2269 A70-27920

Spacecraft based data processing stages to perform navigation during outer planet missions 13 p2448 A70-28704

Soviet book on theory and practice of maps application in aviation, covering coordinates for objects positions determination on ground error estimation, etc 13 p2448 A70-28725

Meteorological data acquisition by navigational aids, satellites and surface based indirect sensors for computer forecasting 13 p2405 A70-28773

Pictorial display area navigation system for air traffic control in terms of cockpit utilization, interface with ground navigation aids, parallel multiple routes, etc [AIAA PAPER 69-798] 13 p2449 A70-29171

Low cost VHF and UHF navigation aids IFR procedures for low density airports [SAE PAPER 700230] 13 p2385 A70-29607

Gyroscopic navigation systems errors as function of sensor errors in terms of arbitrary operators requiring optimization 15 p2773 A70-32155

Airborne pulse Doppler radar for tactical aircraft velocity vector measurement, improving navigation system performance 16 p2840 A70-33448

Fifty percent coverage problem /Circular Error Probable/ of general bivariate Gaussian distribution from viewpoint of navigation systems error analysis 16 p2948 A70-33451

Blinking warning lights for air navigation, signaling of obstacles and glider onboard marker lights 16 p2889 A70-34302

Air traffic control, discussing precision instrument landing, approach lighting, collision avoidance, navigation aids, etc 17 p3133 A70-35185

Navigation aids evolution and trends, noting ground stations, Intelsat 3 and navigation satellites 17 p3048 A70-35879

STOL navigation systems, evaluating Vector Analog Computer, Decca Omnitrac IIB and inertial system 18 p3289 A70-36513

SATRAM, multiple trajectory landing system for aircraft position indication within large airspace 18 p3289 A70-36948

Area navigation system charting, discussing effect on flight information publications 19 p3465 A70-38231

Pictorial display methods for pilot error reduction in area navigation via guidance control and capability beyond visual field 19 p3465 A70-38234

Eurocontrol evaluation of navigational aid systems air traffic control, examining HARCO and VORDAC systems 19 p3468 A70-38641

Aircraft navigation light visibility, discussing visual threshold, source intensity, atmospheric transmissivity, color, background luminance, etc 20 p3564 A70-39719

Apollo program navigation processing using Kalman optimal linear computer, emphasizing position vector and error matrix and command and lunar landing extrapolation module navigation 21 p3848 A70-41127

Integrated air navigation by least square adjustment, analyzing Doppler navigation errors 22 p4067 A70-42655

Kalman filters for data mixing in optimally aided inertial navigation systems 22 p4067 A70-42661

Automatic ship navigation system using Transit satellites and onboard digital computer for routine tasks of dead reckoning 22 p4068 A70-42666

NAVIGATION INSTRUMENTS

NT GYROCOMPASSES

Two axis spherical gage bearing gyro for accurate measurements of space vehicle position and attitude rates while maintaining compatibility with exotic environments 01 p0086 A70-10308

Inertial navigation systems, discussing role as flight control sensor with advent of all digital interface automatic flight control systems and cost and reliability 02 p0334 A70-11988

Lateral separations using navigation error analysis, showing values for aircraft with or without Discreurs and inertial control under North Atlantic conditions 02 p0336 A70-12607

Readjustment of aircraft navigation systems based on inertial platforms, discussing errors, corrections and damping stressing single platform 02 p0336 A70-12608

Self contained and ground referenced radio systems combination for tactical air navigation, including Loran D and hybrid Loran /HYLO/ 04 p0716 A70-14628

Tacan navigation system developments for accuracy and reliability improvements, data transmission, tie-in with airborne computers, etc 07 p1331 A70-19621

Solid state VHF omnirange navigation system operation, principle, equipment, applications, advantages, etc 07 p1241 A70-19622

Apollo space vehicles guidance and navigation using data obtained onboard, discussing inertial platforms, accelerometers and trajectory calculations 08 p1541 A70-21023

Sector Tactical Air Navigation System to supply on-board information on bearings, slant range and elevation and computer input signals
09 p1720 A70-22491

Doppler radar aircraft navigation system with gyroscopic reference platform and computer, showing error propagation dependence on velocity and latitude
13 p2449 A70-29621

Operational and environmental factors constraining onboard navigation system design for outer planet flyby missions
14 p2614 A70-30467

Apollo navigation methods and data analysis covering inertial guidance with gyro-stabilized platforms, acceleration sensors, sextants and telescopes, ergodicity, filtering, etc
15 p2772 A70-31549

Tactical aircraft performance, discussing electro-optical devices, weaponry, communication and navigational networks, information displays and real time remotely manned control systems
17 p3013 A70-34672

Loran C principles, ground station operation and navigation equipment
17 p3135 A70-35881

Manned lunar roving vehicle (MLRV) navigation scheme based on dead reckoning concept, discussing instruments effectiveness for vehicle velocity and orientation measurements
19 p3396 A70-37849

Military Airlift Command jet aircraft computerized area navigation system operational procedures
19 p3465 A70-38232

Airborne navigation systems operational aspects in ATC, discussing sensors, digital computer, cockpit displays, etc
19 p3468 A70-38640

Navigation errors and time delays in prediction techniques for air traffic control
19 p3468 A70-38642

Navigation instrument geometrical calibration by natural satellites and reference stars during interplanetary flight
[AIAA PAPER 70-1023] 20 p3669 A70-39586

Spacecraft-based navigation instruments for outer planet missions using celestial directions to outer planet natural satellites
[AIAA PAPER 69-902] 20 p3669 A70-39681

Aircraft navigation control system by digital computer combined with inertial platform, considering emergency backup, slow drift and system malfunctions
24 p4374 A70-46092

NAVIGATION SATELLITES
NT EXPLORER 22 SATELLITE
NT TRANSIT SATELLITES

Aeronautical satellites for monitoring positions of many commercial aircraft simultaneously crossing North Atlantic, discussing navigational error correction and atmospheres
01 p0178 A70-10454

Continuous and pulsed parameter stabilization for circular orbits of navigation and communication satellites under perturbing effects of oblateness and atmospheric drag
02 p0374 A70-12402

Earth space signal propagation characteristics obtained by satellite-borne radio interferometer provide phase information in addition to amplitude for improving navigation accuracy
02 p0260 A70-12567

Airplane navigation based on VHF ranging between aircraft and geostationary satellite, examining errors by unknown propagation characteristics of signal in ionosphere
02 p0262 A70-12594

Aeronautical satellite system for civil flight safety, discussing operational, technical and economic aspects
03 p0522 A70-13610

Navy navigation satellite passes predicted by equations for rise and set times, elevation and azimuth in plane circular polar orbit about spherical earth
04 p0764 A70-15431

Aeronautical satellites application to supersonic air transportation economy, discussing navigational information relay between aircraft and control center
07 p1191 A70-18988

Book on navigation and communication satellites for military uses, considering design, operation, computers role, etc
08 p1582 A70-21298

Satellite potential for long range air traffic control, discussing airline navigation requirements and ATC requirements for position determination
09 p1722 A70-23027

Navy Navigation Satellite System program development and present status, discussing satellite design and system accuracy-geodesy connection
09 p1723 A70-23039

Aeronautical satellite system for North Atlantic air traffic position monitoring, discussing simultaneous position display
09 p1723 A70-23040

SPOT navigation satellite system for near instantaneous fixes or continuous tracks providing height, velocity and automatic guidance and control signals
09 p1723 A70-23041

Navigation satellite system with 10-meter accuracy, continuous coverage, rapid position determination, simultaneous service and interference immunity achieved by synchronous satellites
09 p1723 A70-23042

VHF aerosat antenna design and system interactions, analyzing impact of spacecraft dynamics, control system, power supply and propulsion
[AIAA PAPER 70-486] 11 p2120 A70-25439

Navigation-traffic control satellite system application to transoceanic traffic surveillance
[AIAA PAPER 70-487] 11 p2000 A70-25462

Satellite Integrated Communications, Navigation and Identification System for implementing worldwide command-control system and equipment and signal integration
[AIAA PAPER 70-503] 11 p2000 A70-25466

Navigation satellite communication experimental design emphasizing mobile, ship or aircraft station technical characteristics
[AIAA PAPER 70-407] 11 p2001 A70-25469

Air traffic control surveillance and data system using synchronous satellites in inclined elliptical orbits for communications and aircraft position determination
12 p2268 A70-27644

North Atlantic air traffic control system using aeronautical satellites, discussing flight levels, surveillance and positioning, terminals, etc
12 p2268 A70-27645

Low altitude satellite system for aircraft navigation, considering cost factors, military applications, traffic control capabilities, etc
12 p2270 A70-27922

Midaltitude satellite system for continuous three dimensional navigation, considering elevation angles, constellations and orbits
12 p2270 A70-27923

Navigation systems using 24-hour orbit satellites, discussing system concept options for U.S., Western Hemisphere and global coverage
12 p2270 A70-27924

Hard wired modular multipurpose global navigation system using cluster noncoplanar synchronous satellites
13 p2446 A70-28385

Low altitude operational meteorological and navigation spacecraft, discussing need for orbit adjustment by dynamic control
13 p2500 A70-28404

Navigation satellite systems, analyzing error sources in signal processing and propagation developing computer programs
13 p2447 A70-28429

Aircraft and ship navigation using precision time measurement signals transmitted between vehicles and earth satellites
13 p2448 A70-28748

Synchronous navigation satellite system for ships and aircraft applicable to earth orbital and lunar operations
14 p2614 A70-30463

Satellite communication/navigation/surveillance systems for domestic and transoceanic ATC
16 p2949 A70-33479

Aircraft/ship navigation system using three synchronous satellites positioned over equator for Pacific applications
17 p3134 A70-35302

Navigation aids evolution and trends, noting ground stations, Intelsat 3 and navigation satellites
17 p3048 A70-35879

Ground and cockpit initiated collision avoidance commands system based on satellites surveillance of aircraft position and velocity data
19 p3466 A70-38242

Telecommunication, ATC and navigation satellite systems, examining economic bases for aeronautical and maritime space systems
20 p3740 A70-39407

Optimum altitudes for passive ranging satellite navigation systems, using electronic clocks in satellite and navigator receiver
21 p3883 A70-40724

Sea and air navigation in U.S. with satellites, considering cost estimates
21 p3848 A70-41130

Aeronautical satellite system for civil flight safety, discussing operational, technical and economic aspects
21 p3848 A70-41131

Global digital navigation and traffic control system via satellites, discussing position determination, surveillance and communication requirements
21 p3848 A70-41133

Diocures project for ATC over Atlantic Ocean, describing distance measurement by simultaneous use of two geostationary satellites
21 p3848 A70-41258

Air navigation Diocures project satellites, discussing spin or three axis stabilization, system replenishment strategies and subsystem reliability
21 p3929 A70-41259

Air traffic safety problems, discussing satellite radiobeacons applications to aerial navigation
22 p4066 A70-42652

Position experiments for navigation satellite system parameters determination, using satellite ATS-3 distance measurements
22 p4066 A70-42653

Radio navigation system using multiple satellite beacons (NAVSTAR) for large area air and sea coverage
22 p4067 A70-42662

Position fixing by distance measuring to geostationary satellites, discussing ATS-3 and ship experiment accuracy and orbit interference
23 p4215 A70-44232

Worldwide common satellite network for sea and air navigation, discussing cost estimate and economics
23 p4216 A70-44608

Satellite technology applications to ATC, including communications, navigation, surveillance over water and data acquisition
[AIAA PAPER 70-1301] 24 p4373 A70-45922

Satellite based navigation/air traffic control information systems for short range STOL air carrier aircraft
[AIAA PAPER 70-1338] 24 p4373 A70-45930

Position experiments for navigation satellite parameters system using ATS-3 distance measurements
24 p4374 A70-46201

NAVIGATORS
Soviet book on air navigation covering civil navigator training, geographic concepts, navigation means, flight and meteorological conditions, instrument errors, etc
06 p1103 A70-17642

NAVY
Material Acquisition Division of Naval Air Systems Command, discussing engineering and testing functions in providing air weapons systems to operating forces
06 p1185 A70-17973

Oxygen equipment design for USN patrol and attack aircraft, considering masks, regulators, helmets and hoses
07 p1191 A70-19005

Fatal ejections in USN, suggesting initiation delay as prime causal factor
07 p1191 A70-19006

Fire resistant protective flight clothing program for USN aircrewmembers, presenting accident case histories
07 p1218 A70-19013

Navy Navigation Satellite System program development and present status, discussing satellite design and system accuracy-geodesy connection
09 p1723 A70-23039

Predicting retention rate of naval pilots and flight officers beyond initial obligated duty tour based on training performance
15 p2690 A70-31888

NEAR INFRARED RADIATION
Atlas of near IR spectra of Venus, Mars, Jupiter and Saturn obtained by Fourier spectroscopy, discussing observational procedures, data recording and processing
01 p0173 A70-10078

Jupiter and Saturn near IR spectra for relative abundances of atmospheric constituents and distribution with altitude, noting rough solar composition
01 p0179 A70-10526

Near IR reflection spectra of artificial cumulus clouds with progressive droplet sizes
01 p0076 A70-10911

Angular distribution measurements of visible and near IR radiation reflected from carbon dioxide cryodeposits formed on liquid nitrogen cooled surface in vacuum
[AIAA PAPER 69-63] 04 p0720 A70-15538

Dispersive resonator for near IR frequency control of neodymium-silicate glass laser
08 p1512 A70-20850

Noncontact thermometer designed around YIG modulator to demonstrate usefulness of optical component in near IR systems
09 p1676 A70-22788

High resolution Fourier interference near IR spectrometer for aircraft, balloon and spacecraft remote sensing applications
09 p1683 A70-23508

Water depth determination by remote measurement of near IR reflectance of underwater plants, discussing effects of water path length changes
10 p1878 A70-24741

Near IR radiation diurnal variations in corn canopy accounted for by Duntley equations for unidirectionally incident light propagation through diffusing medium
11 p2082 A70-25364

Terrestrial clouds near IR light scattering compared to reflectivity of water and ice particles, discussing Mie and multiple scattering 11 p2045 A70-25649

Star HBV 475 emission spectra in near IR due to H, He I, OI and Ca II, confirming symbiotic character 13 p2495 A70-29641

Reflectivity measurement in near IR using black bodies near room temperature for light sources 14 p2588 A70-31210

Lasers and GaAs diode emitters near IR radiation intensity distributions, using IR films and IR display phosphors 15 p2753 A70-32607

Broadband image pick-up tube with high near IR sensitivity, comparing performance with other vidicons 16 p2907 A70-33186

Near IR electronic emission spectrum of positive column in flowing oxygen electric discharge, noting vibrational temperature 16 p2955 A70-33981

Airborne illumination using argon vortex-stabilized arc lamp, noting applicability in near IR spectral range 17 p3023 A70-35152

Semiconductor luminescence and photodetector diodes near IR region transmission, describing frequency response measurements 22 p4087 A70-43445

NEAR ULTRAVIOLET RADIATION

Nimbus 3 satellite observations of near UV solar flux intensity and variability, describing instrumentation and measurement of radiation producing molecular oxygen photodissociation 02 p0291 A70-12295

Stratospheric balloon measurement of near UV from early type stars, discussing gondola, observation method, telescope and photographic recordings analysis 04 p0750 A70-14704

Stellar observations in near UV by camera having two color photometric slides, discussing atmospheric models 13 p2498 A70-30013

Spectral classification of relatively bright stars in near UV based on moderate and low dispersion spectra including F, G and K stars 15 p2797 A70-31614

Spectral classification and continuous spectrum photometry of weak late stars in visual and near UV regions, noting anomalous C star in CH Cyg 15 p2797 A70-31615

NEBULAE

NT CASSIOPEIA A

NT CRAB NEBULA

NT PLANETARY NEBULAE

Stellar emission line spectra from comet-like nebulae, discussing stellar position instability and shell movements 01 p0174 A70-10198

Nebular variables and flare stars in Orion aggregate 03 p0567 A70-13319

H alpha line for emission nebulae analyzed by Fabry-Perot etalon, noting Doppler profile 05 p0917 A70-16907

Nonstellar 5 micron source in Orion nebula, noting intensity nonvariance and energy distribution calculation of temperature 08 p1575 A70-21375

Internal radial velocities of diffuse emission nebulae in H II region, using photographic Fabry-Perot interferometer 08 p1581 A70-21952

Bright rims in North America Nebula, measuring electron temperature to derive profile characteristics 10 p1944 A70-24956

Orion Nebula region search, giving characteristics and locations of flare type variable stars 10 p1949 A70-25249

Stars of galactic nebulae - Conference, Biurakan, Armenian SSR, September 1968 12 p2304 A70-27851

Comet-like nebulae, describing brightness and spectral characteristics of variable stars in nebulae 12 p2307 A70-27863

Stellar and nebular magnetic fields formation, considering role of high temperature plasma random charge and current fluctuations 12 p2307 A70-27864

Merope /IC 349/ nebula, noting luminescence and continuous spectrum fine structure 12 p2307 A70-27867

Forbidden Ne iv lines intensity in high excitation gaseous nebulae based on upper level-j populations 12 p2277 A70-28215

Galactic continuum surveys at 8000 MHz by radio telescope, noting North American nebula and Cyg X region 13 p2491 A70-29096

Gaseous nebulae electron densities based on interpretation of forbidden CI III lines using collisional strengths and transition probabilities 15 p2798 A70-31746

Cygnus loop nebula H alpha line halfwidths and radial velocities 15 p2802 A70-32482

Orion Nebula photographed at H alpha line with half angstrom filter 15 p2807 A70-32805

Wolf-Rayet associated nebulae, presenting radio observations and mass determinations 16 p2980 A70-34193

Luminous nebulae near Sco X-1 indicating H beta emission 17 p3156 A70-34829

Lyman alpha radiation from gaseous hydrogen nebula model, taking into account absorption by dust and interstellar neutral hydrogen 17 p3163 A70-34904

Orion nebula core radio recombination line intensities, showing variations in mean electron temperatures and physical conditions 18 p3313 A70-36329

Nebula K3-50 IR radiation source observation, noting energy distribution resembling NGC 7027 and W51-IRS2 20 p3701 A70-39003

Carina nebula NGC 3372 continuum map at 5 GHz compared to optical photographs, discussing H alpha lines 21 p3887 A70-41109

Reflection nebulae dust density, noting lower limit dependence on absolute magnitude of illuminating star 21 p3889 A70-41149

Preferential galactic orientation based on inclination statistics of predominantly elliptical clustered nebula 22 p4099 A70-42627

Orion nebula H alpha/forbidden N II ratio measurement using wide field multislit spectrograph 22 p4101 A70-42857

B-V and U-B colors and B and V polarization calculation in single scattering for slab model reflection nebulae with dielectric or graphite grains 22 p4103 A70-42984

Electron impact induced transitions in ions with configurations 3p/q responsible for forbidden lines in gaseous nebulae 22 p4105 A70-43234

Solar nebula rings and planet formation by sedimentation of solid particles in mechanical equilibrium, including Jupiter and Saturn protoplanets 23 p4239 A70-43867

H II region dust grains thermal emission, examining effect on diffuse nebulae 24 p4413 A70-46158

NEEDLE BEARINGS

Load rating methods for cage-type and full complement needle bearings dynamic capacity [ASLE PREPRINT 70AM 3D-2] 19 p3438 A70-38802

NEEL TEMPERATURE

Shift in nuclear paramagnetic resonance frequency of ligand nuclei in ferromagnets above Neel temperature 10 p1928 A70-24826

Shift in nuclear magnetic resonance, investigating transferred hyperfine coupling near Neel temperature for magnetic and nonmagnetic systems 10 p1928 A70-24827

Magnetic phase diagram of hydrated cesium-copper carbide at 1.625 Neel temperature in external magnetic fields, giving equation for spin flop field temperature dependence 16 p2961 A70-33688

Neel temperature of thermally stable garnet orthoferrites of YFeAlMn composition 19 p3484 A70-37623

NEGATIVE CONDUCTANCE

Negative resistance mechanism model with larger electron accumulation in conduction band than free holes 03 p0539 A70-13212

GaAs nonlinear I-V characteristics and negative differential conductivity associated with electron heating by electric field 03 p0540 A70-13720

Semiconductor electronic devices applications in microelectronics, optical/dielectric electronics and photography and electron-acoustical phenomena and negative differential conductivity 05 p0822 A70-16863

Semiinsulating GaAs doped with Cr, discussing negative resistance segment in current-voltage curves of S diodes 07 p1242 A70-19798

Negative differential conductivity effects in Gunn domain GaAs semiconductors, discussing physical properties and microwave applications 08 p1556 A70-21303

Parallel and perpendicular negative magnetoresistance measurements as function of magnetic field in p-type GaAs at 77 K 13 p2471 A70-29374

He-Ne laser focused beam effect on negative Si diodes base I-V characteristics 13 p2378 A70-29517

Microwave avalanche diode emission frequency dependence on charge transfer across drift region, considering varactor diode output, negative resistance and noise factor 14 p2555 A70-30354

Gunn oscillator external negative differential /END/ conductance broadband measurement noting effect of cavity control 16 p2875 A70-33398

Frequency dependence of Gunn oscillator maximum negative conductance 23 p4172 A70-44198

NEGATIVE FEEDBACK

NT SENSORY FEEDBACK

Differential equations of optimal degenerate problem reduced to autonomous form with multiple control, noting D-stationarity application for optimal motions 01 p0053 A70-11022

Respiratory center functional organization established as automatism with negative feedback, based on experimental data of dogs and cats artificial respiration and hypocapnic apnea 03 p0417 A70-13069

Response characteristics of negative feedback galvanometer amplifier with inductive source impedance for geomagnetic micropulsation detection 07 p1242 A70-19998

Transient response analysis of nanosecond pulsed transistor amplifier having common-emitter configuration with negative feedback 08 p1474 A70-21229

Ruby laser spatial and temporal characteristics improvement with bleachable dye filter, using local negative feedback 15 p2754 A70-32865

Voltage-to-frequency transducers with negative feedback, analyzing errors and conversion transconductance 20 p3601 A70-39789

NEGATIVE RESISTANCE CIRCUITS

Rotator and symmetrizer negative resistance circuits application in electronic function generator 05 p0824 A70-15991

Instability of semiconductor circuit with nonlinear current-voltage characteristics, showing potential negative differential conductivity effect 07 p1240 A70-19274

Terminal negative resistance of X band Gunn diodes, discussing frequency conditions for modulation and parametric amplification 16 p2877 A70-33417

Microwave oscillator design using Y-parameters from measured scattering parameter data at desired frequencies, applying negative resistance circuit theory 24 p4320 A70-46235

Multivibrator designs incorporating distributed R-C-NR thin film structures 24 p4321 A70-46395

Multivibrators with improved stability and frequency-division capacity, using distributed R-C-NR structures 24 p4321 A70-46396

NEGATIVE RESISTANCE DEVICES

Negative resistance light emitting lateral GaAs diode, analyzing oscillation frequency, I-V characteristics, temperature and magnetic effects 01 p0050 A70-10565

Frequency dependent negative resistance of n-type semiconductor doped at acceptor level near valence band top 10 p1927 A70-24273

Negative resistance and cut-off voltage of doped Si p-i-n diodes subject to deep acceptor levels 10 p1849 A70-24274

Avalanche diodes microwave properties in utilization circuit, discussing negative conductance, nonlinear impedance and intrinsic noise current 10 p1850 A70-24623

Phase control of locked negative resistance /Gunn/ oscillator under operational conditions, noting coupled varactor diode use 17 p3055 A70-35630

Bulk negative resistance microwave oscillators efficiency calculation by graphical method 17 p3056 A70-35876

Negative resistance and conductivity segments in I-V curves of diode structures, taking into account injection junction imperfections 18 p3231 A70-36413

Carbon resistors negative magnetoresistance measurement near absolute zero temperature by helium cryostat, noting anisotropy 20 p3687 A70-40168

Wave instabilities in avalanche diode bulk semiconductors with negative field dependent drift velocity and carrier temperature, noting validity for gas plasma 21 p3863 A70-41915

Microwave output power and impedance for InP and GaAs bulk negative resistance oscillators, using velocity/field characteristics 21 p3800 A70-42049

NEGATRONS

Thermally induced oscillations and negative resistance in seminsulating oxygen-doped GaAs double injection devices via heating beyond critical temperature

22 p4084 A70-42326

Current-controlled negative resistance and conductivity memory state in Si-doped single crystal YIG wafers

22 p4085 A70-42331

Current twisting in double injection ohmic contact long p-n diodes with S-shaped current-voltage curve, showing unstable density at negative resistance segment

23 p4176 A70-45061

High cutoff negative resistance silicon carbide diodes, noting temperature independent current-voltage curve

23 p4176 A70-45067

NEGATRONS

Cosmic ray positrons and negatrons differential energy spectra and solar modulation, using balloon-borne magnetic spectrometer

19 p3503 A70-38100

Energy spectrum of primary cosmic ray electrons /negatron and positron/ in interstellar region observed near 1965 solar minimum

19 p3503 A70-38101

Cosmic ray positrons and negatrons differential intensities near north geomagnetic pole from balloon flight measurements, noting solar modulation effects

19 p3503 A70-38102

NEODYMIUM

Reduced Nd ion absorption in matrices of fluorides, fluoride mixtures or oxygen-containing compounds with various ion concentrations, analyzing optical centers statistical properties

01 p0107 A70-10210

Oscillation and doubling of 0.946 micron line in Nd ion doped YAG, calculating optimum nonlinear coupling to internal Q switched laser

01 p0113 A70-11169

Amplification cross section of 1.06 micron transition of trivalent Nd ion in alkaline silicate glass host material, based on three level energy level diagram

02 p0312 A70-12111

Laser gain investigated for amplifications of short emission pulses in neodymium glass, discussing line broadening nonuniform mechanism

04 p0702 A70-15226

Nd glass laser emission spectral width reproducibility as function of flash intervals and pump energy

07 p1297 A70-18869

Neodymium-yttrium fluoride crystal laser free and Q switched operating characteristics

08 p1511 A70-20523

Neodymium laser frequency doubling based on nonlinear functional relation between polarization and electric vector in matter

08 p1512 A70-20677

Holographic recording of Q switched neodymium laser beam achieved through lens testing on reconstructed beam

09 p1697 A70-22845

Neodymium/YAG laser emission characteristics, studying spectral selection at various excitation energy levels and output-pumping power relationship

10 p1899 A70-24261

Neodymium spectral line widths in various glasses, studying role of inhomogeneous broadening

10 p1900 A70-24266

Thermo-optical constant of laser neodymium glasses measured with interferometer

13 p2430 A70-29761

Temporal structure and spectral evolution of Nd laser emission with self locking axial modes, noting gain saturation effects

13 p2430 A70-29776

Lasing characteristics of Nd glass, measuring efficiency, pump threshold energy and absorption under test conditions instability

13 p2431 A70-29873

Optical resonator thermal deformations during pumping of circular cylindrical interferometer rods in illuminators, measuring thermo-optical constants of neodymium glass

15 p2754 A70-32863

Crystal and glass lasers activated by Nd ions, examining stimulated emission temperature dependence by high temperature spectroscopy

17 p3106 A70-35105

Energy levels and spectral broadening of neodymium ions in laser glass from fluorescence and absorption spectra

19 p3445 A70-37760

Giant pulse neodymium glass laser emission spectrum structure, showing cavity geometry effect on fine structure

20 p3641 A70-39450

YAG-Nd laser volume limits condition for high power fundamental mode operation

21 p3836 A70-40808

Laser characteristics of Nd doped lithium germanate and silicate glasses, discussing spectroscopic properties

21 p3838 A70-42010

Giant pulses by actively and passively Q-switched inorganic neodymium-liquid lasers with varying modulation due to mode coupling

23 p4202 A70-44937

NEODYMIUM ALLOYS

Phase diagram of Nd-Rh system determined by powder X ray diffraction, metallography and differential thermal analysis methods

08 p1522 A70-21711

NEODYMIUM COMPOUNDS

Inorganic liquid lasers, discussing Nd salts solution preparation and handling methods

23 p4201 A70-44929

NEON

NT NEON ISOTOPES

Electron temperature dependence of molecular neon ions recombination with electrons using microwave afterglow/mass spectrometer, obtaining recombination coefficient

05 p0885 A70-16468

Neutral Ne emission line in visible solar spectrum during bright events in inner corona, noting 1958 outburst of RS Oph

05 p0920 A70-16944

Inelastic scattering of He ions by Ne as function of angle, initial energy and energy loss using collision spectroscopy

07 p1346 A70-20243

Line strength and radiative lifetimes for Ne II determined from spontaneous emission data obtained from CW neon laser discharge

09 p1730 A70-22070

Acoustic perturbations in stationary weakly ionized pulsed neon plasma

11 p2096 A70-26842

Forbidden Ne iv lines intensity in high excitation gaseous nebulae based on upper level-j populations

12 p2277 A70-28215

Stepwise ionization effect on electron distribution, transport and balance coefficients in low voltage low pressure neon plasma

19 p3476 A70-37555

Transition probabilities of visible and near-IR neon lines, using gas-driven shock tube spectroscopy

20 p3674 A70-39134

Gaseous neon plasma positive column electrons density and drift velocities measurements by Langmuir probe technique

20 p3683 A70-40163

Methane IR filter for monochromatizing He-Ne laser

21 p3823 A70-40823

Optimum tube diameter for maximum radiation output of single and multimode He-Ne lasers

21 p3836 A70-40916

He-Ne gas laser, construction, operation and characteristic mode patterns

22 p4049 A70-42959

NEON ISOTOPES

Elastic and inelastic scattering of proton beam from Ne 20 measured for cross sections to interpret polarization data

04 p0723 A70-15636

Carbonaceous chondrites primordial He and Ne isotopes variations

07 p1388 A70-20037

Induced nuclear processes role in radiogenic Ne-21 production in earth atmosphere

12 p2227 A70-28367

Coupled channel calculation of inelastic proton scattering from Ne 20 using Hartree-Fock wave functions

17 p3137 A70-34517

NEON 19

U NEON ISOTOPES

NEOPENTANE

Initial pyrolysis kinetics of neopentane, showing decomposition rate tendency to equal formation rate at high temperature

01 p0215 A70-10706

Acetone formation mechanisms during neopentane oxidation when added to slowly reacting molecular hydrogen and oxygen

11 p1995 A70-26379

NEOPLASMS

NT CANCER

NEOPRENES

U CHLOROPRENE RESINS

NEPHELOMETERS

Prototype cloud physics laser nephelometer design and performance, determining droplet concentration and size from scattered light pulse count and amplitudes

20 p3626 A70-39081

NEPTUNE (PLANET)

Rotation, diameter, mass, atmosphere and constitution of planet Neptune, with emphasis on visual observations

05 p0913 A70-16552

Meridian circle observations before and after occultation of ZC 2232 by Neptune on 7 April 1968, correcting ephemeris for star and Neptune

06 p1151 A70-18489

Neptune and Pluto oblateness inferred from analogous similarities of mass, diameter and mean density with Uranus and Mars planets

09 p1750 A70-22096

Gravitational disturbance by exterior planets, considering Brown transformation of longitudinal perturbation problem in relation to planet Neptune discovery

11 p2117 A70-26658

Neptune data from photoelectric observations of 7 April 1968 occultation of BD-17 deg 4388, determining hydrogen dominance and molecular density

14 p2642 A70-30890

Neptune position errors by meridian observations compared with photoelectric observation of stellar occultation

19 p3518 A70-38008

Neptune orbit residual, discussing recently discarded Lalande prediscovers

21 p3922 A70-41986

Travel time for trips to Neptune, calculating earth gravitational field escape hyperbola and waiting time before return

23 p4245 A70-44653

Uranus and Neptune millimeter wave observations, showing brightness temperatures in excess of black body equilibrium temperatures derived from solar heating

24 p4403 A70-45398

NERVA [ENGINE]

U NUCLEAR ENGINE FOR ROCKET VEHICLES

NERVES

Simulated responses of depressed and hyperpolarized single-modulated nerve fibers, using Frankenhaeuser-Huxley equations

02 p0231 A70-11706

Time course of end bulb material formation in vitro in rodent myelinated nerve fibers, confirming elastic capillary concept

02 p0233 A70-11725

Electrical polarization effects on discharges in individual auditory nerve fibers following current application to cochlear partition

17 p3033 A70-35609

Continuous functions transformation by artificial neuron networks, investigating electrophysiological data for nerve tissues excitability

18 p3223 A70-36081

Vagus nerve blockage effect on arterial carbon dioxide tension and breathing regulation in dogs

24 p4303 A70-46112

Posture and motion control for functional organizations of nervous systems, emphasizing reflexes and relation between suprasegmental structures and controlling organs

01 p0017 A70-10499

Electrochemical mechanisms of nervous tension generation and expansion based on neural impulse expansion theory, noting ion transport

01 p0020 A70-10518

Corticovisceral interrelations concept, summarizing contributions in form of diagram showing interactions between cortical and nervous activity of organs

01 p0029 A70-11463

Vasomotor activity of neurons located in spinal cord lateral crescent in curarized decerebrated and intact cats

01 p0030 A70-11471

Phasic phrenic nerve electrical activity relation to systemic blood pressure oscillations produced in paralyzed dogs by ventilation arrest or hemorrhage

03 p0416 A70-13010

Degenerate retinal fibers in duck photoreceptor path connecting to supraoptical hypothalamic region detected following optic nerve dissection

03 p0427 A70-13955

Nervous system influence on erythema radiation reactions from soft X ray irradiation, discussing blood supply effect

06 p0993 A70-17430

Vasomotor center neuron responses to vertical rocking movement stimulus of vestibular apparatus in cats

06 p0995 A70-17805

Hypothermia effect at various temperatures and durations on nervous activity and vegetative functions of rats, discussing pulse and respiratory rates
07 p1197 A70-18696

Ciliary nerve stimulation and lens motion data to identify open-loop plant dynamics of lens accommodation
07 p1216 A70-18858

Gamma radiation effects on higher mammals nerve activity after chronic total body exposure
09 p1619 A70-22790

Soviet book on nervous stress and cardiac activity covering hypothalamus and cardiovascular reactions and cardiac component of complex conditioned reflexes and emotional reactions
10 p1809 A70-23873

Human nerve and muscle system changes under prolonged hypodynamia
10 p1815 A70-24681

Hypodynamia aftereffects on nervous system, investigating organic microsymptoms, asthenia, vegetative-vascular instability and skin muscle akinetic hypotrophy
10 p1825 A70-24691

Pattern recognition with time interval modulation information coding (TIMIC), considering channel capacity of switching device, similarity with nervous system, etc
11 p2010 A70-26267

Short duration high workload effects in pilot rr interval and finger tremor during Boeing 747 aircraft let-down, approach and landing
11 p1993 A70-26521

Hippocampus nerve cells protein fractions synthesis in rats, noting relation to learning process during transfer of handedness
12 p2172 A70-28217

Nervous system response fluctuation measurement during perceptual and learning tasks in terms of signal to noise ratio of electrical and tactile stimuli
13 p2354 A70-29595

Speech signals reflection in nervous system, constructing functional perception model for signals conversion into phonetic patterns
15 p2687 A70-32870

Soviet book on peripheral vestibular apparatus and higher nervous system roles in motion sickness covering Coriolis acceleration tests, pilot training and selection, drugs, etc
19 p3359 A70-37406

Oxidative enzymes histochemistry in nervous system, liver and kidney of rats in immediate and remote periods after 24-hr artificial hypobiosis
21 p3764 A70-41478

Aged conditioned changes in muscular working capacity, relating developments in functionally labile nerve centers
22 p3969 A70-42898

Sinus and diaphragmatic nerves impulse activity during hypoxia compared with normal respiration in cats
23 p4145 A70-44312

NETHERLANDS

Fighter pilot selection and training in Royal Netherlands Air Force
12 p2176 A70-27029

Report to COSPAR on Netherlands space research /1969/ including solar and stellar X radiation and UV spectrophotometry, cosmic ray measurements, satellite geodesy, etc
15 p2830 A70-31719

NETS

NT NEURAL NETS

NETWORK ANALYSIS

NT CRITICAL PATH METHOD

Trigger scaling circuits with pulsed and blanking feedback analysis for minimizing number of couplings
01 p0047 A70-10984

Time sharing computer systems to perform circuit design and analysis, discussing effectiveness in terms of immediate access, accuracy and cost
02 p0265 A70-12187

Pneumatic fluidic oscillator consisting of bistable multivibrator, analyzing feedback loop operation based on electropneumatic analog system
02 p0229 A70-12673

Book on microwave theory and applications covering transmission line theory, microwave measurement, signal sources and analysis, network analysis, etc
03 p0455 A70-13001

Optimal selection of centralized communication network of combined radial and linear structures minimizing disconnected peripheral points
03 p0446 A70-13238

Microwave circuits automatic analysis and design using digital computer in batch mode, describing analysis-optimization program
03 p0457 A70-13562

Analytic solutions for focal plane electric field components in parabolic reflector antennas
03 p0457 A70-13697

Resistance, capacitance and inductance in passive hydraulic circuits considered in analogy with electric circuits to determine dynamic characteristics
03 p0415 A70-13931

Device modeling for computer aided design and analysis of integrated circuits, discussing list of desirable properties and applications to transistor design
03 p0454 A70-14026

Reduced multiport equivalent scattering parameters derivation by matrix method, determining load reflection coefficients effect on signal attenuation and phase shift
03 p0458 A70-14038

Tunnel diode studied for oscillations initiation resulting in hysteresis involving supply voltage and load conductance variations
03 p0459 A70-14284

Silicon bipolar transistors primary photocurrent calculation using manufacturers data
04 p0657 A70-14736

Mathematical model based on equivalent electrical circuit for transient radiation analysis by computer /TRAC/ family of circuit analysis programs, simulating semiconductor devices
04 p0657 A70-14737

Digital computers for calculating coefficients of electronic circuit functions polynomials, developing algorithm
04 p0659 A70-15205

Bifurcation frequency and nonlinear distortions determined in nonlinear semiconductor circuit with series-opposed connections of p-n junctions operating in forced oscillation mode
04 p0659 A70-15206

Amplitude and phase frequency characteristics relations established by analyzing forced resonant oscillations in nonlinear circuit operating at power source frequency
04 p0662 A70-15207

Nonlinear networks computer analysis by recursive decomposition, discussing network graphs construction rules
04 p0662 A70-15451

Sensitivity functions of nonlinear circuits obtained by calculation of dependent linear model responses, topologically equivalent to original circuit
05 p0824 A70-16125

Fluidics background, operational principles, constituent elements, system assemblies and applications, discussing integrated and multiple function circuits, cost and reliability advantages, etc
05 p0798 A70-16146

Ferroelectric control circuits controlling electroluminescent cells in matrix, pointer, bargraph, alphanumeric and other displays
05 p0827 A70-16187

VHF field effect transistors thermal noise characteristics and effects of feedback and parasitic impedance
05 p0814 A70-16420

MTRAC program for transient analysis of circuits with square loop magnetic cores based on linearization of nonlinear circuit elements and Kirchhoff current law
05 p0825 A70-16999

Waveform-shaping transfer function rational polynomial approximation method with application to network problem in PCM communications
06 p1007 A70-17459

Linear circuit output waveform calculation without first resolving transfer functions on complex frequency plane, applied to current switching circuit analysis
06 p1018 A70-17460

Microwave acoustic transducer and delay line properties determination from mathematical analysis
06 p1062 A70-17481

Klystron amplifier output circuit large signal frequency response, showing dependence on distance between cavities
06 p1021 A70-17672

Oscillator discharge properties of capacitance power storage circuit used for pumping pulse lasers
06 p1081 A70-17668

Black box modeling of linear integrated circuits for computer analysis in frequency domain
06 p1026 A70-18416

Network analysis for systems application program /NASAP/ computer-aided circuit design program for network analysis, discussing application in education
06 p1015 A70-18418

Computer aided network design course using FORTRAN 4 emphasizing modeling of semiconductor devices
06 p1015 A70-18419

Signal flow graph, obtaining numeric and symbolic expressions for network function in terms of component parameters and sensitivity coefficients
06 p1026 A70-18420

NASAP program FORTRAN subroutine LOOPS for loop detection in circuit analysis, discussing automatic instrumentation process for computation time reduction
06 p1015 A70-18421

Hybrid NASAP program module for direct design of linear dynamic circuits using simple optimization without sophisticated computer programming
06 p1015 A70-18422

Computerized FORTRAN equations simulation of linear and nonlinear circuits for symbolic analysis and transient response
06 p1026 A70-18424

Self adaptive servosystems operating with incomplete input signal information, proposing schemes for parameter adjustment by employing differential circuit containing frequency filters
07 p1239 A70-18734

Frequency monitor design, analyzing relationships between time constants, gain, etc, emphasizing white noise filtration
07 p1227 A70-18991

Rectangular waveguides broad wall longitudinal slot equivalent networks, noting series/parallel function dependence on slot length
07 p1240 A70-19221

Energy transfer from pulse network to mass associated with propagating current sheet in linear pinch discharge, discussing pulsed plasma accelerator efficiency
07 p1348 A70-19323

Fourth order polynomial RC-RL decomposition conditions
07 p1326 A70-19686

Linear control circuits transfer function analysis, revising Nyquist criterion
07 p1328 A70-20212

Frequency characteristics optimization of symmetrical octupole bridge networks based on relationships between electrical parameters functions and impedance matrices eigenvalues
08 p1468 A70-20572

Impedance behavior of inductive posts with small capacitive gap in waveguide
08 p1468 A70-20644

Circuit analysis of pulse integrator and square-law receiver used as optimal filter during incoherent radio pulse reception on background fluctuating noise
08 p1461 A70-20865

Electronic equipment complexity estimation based on information-recognition characteristics and ease of utilization
08 p1474 A70-21222

Transient response analysis of nanosecond pulsed transistor amplifier having common-emitter configuration with negative feedback
08 p1474 A70-21229

TRAPATT oscillator circuit characteristics determined from measurements and equivalent circuit calculations
08 p1475 A70-21277

Photolithographically produced thin film lumped element circulator, assuring physical and electrical symmetry by interweaving junction conductors
08 p1476 A70-21293

Circuit allowing direct combining of power from several avalanche diodes, discussing CW power output, single and multiple diode oscillators, etc
08 p1477 A70-21295

Reticular formation of central nervous system in vertebrates described as behavior controlling circuit of interconnected modules, proposing hybrid computer method for operational scheme
08 p1447 A70-21461

Algorithm for evaluating nth order partial derivatives of network functions and corresponding sensitivity functions
08 p1467 A70-21643

MOS transistor amplifier circuits, analyzing circuit parameters for common-source, common-drain and common-gate configurations
09 p1643 A70-22126

LC circuit with time dependent resistance containing wire explosion physics, solving differential equation of discharge circuit
09 p1726 A70-22492

Distributed RC notch filter normalized constants for dominant and nondominant transmission zero
09 p1654 A70-23025

Optimal decomposition of nth order filter into cascaded second order sections
09 p1650 A70-23367

Pulse-shaping transistor circuit analysis, considering circuit elements roles and temperature, pulse duration and leading and trailing edges durations effects
09 p1650 A70-23628

Integrated image sensor matrix array derived from equivalent circuit to minimize sneak path effects
10 p1854 A70-23879

Component tolerances effect on transfer function of networks, calculating sum variance for two terminal networks
10 p1833 A70-24223

Iterative solution for balanced diode modulator performance, obtaining output spectrum using Fourier transformation
10 p1849 A70-24232

DICAP system to analyze digital sequential switching circuits, studying simulation technique range and limitations of applicability
10 p1845 A70-24236

PCM-TDMA satellite communication systems operation modes and applicability, considering efficient circuit utility, equipment cost and control complexity
10 p1837 A70-24352

Traffic simulation in telephone network via communication satellite with presassigned and demand assigned circuits
10 p1838 A70-24356

Integrated circuits involving long-strip heat source surrounded by multiple layers, expressing temperature distribution by Fourier transformation obtained integrals
10 p1850 A70-24620

Computer-aided circuit design by imbedding singular elements to transform network synthesis into analysis problem
10 p1855 A70-24762

Coupled systems stability and oscillatory behavior analysis using Liapunov theory
10 p1855 A70-24763

Error propagation in rectangular grid leveling networks assuming fixed height of center of mass
11 p2045 A70-25798

Test pattern generation algorithm and program for failure detection in asynchronous sequential logic circuits, using combinational method
11 p2024 A70-26205

Optimal directed circuit and cycle elimination in weighted diagraphs by edge reversal orientation
11 p2072 A70-26219

Topological symbolic analysis of circuits defined by topological constraints, utilizing digital computers
11 p2029 A70-26330

Circuitry for phase modulated synchrotronized electronic oscillators for measuring minor reactance changes during remote sensing
11 p2052 A70-26373

Analog fluidic elements/operational amplifiers/with beam deflector proportional amplifiers incorporated into close coupled circuit
12 p2164 A70-27072

Computer programmed automatic circuit analyzers, discussing unit adaptation, wire data processing and analyzer programming [SME PAPER MS-70-727]
12 p2241 A70-27084

Amplitude stabilization transient processes at output of four terminal network with arbitrary phase and amplitude characteristics by representing pulse transfer function in series
12 p2184 A70-27537

Distributed-lumped-active network to produce transfer function with pair of high Q zero real part sensitivity poles
12 p2196 A70-27652

Sinusoidal signal harmonics measurement to determine nonlinear resistance junction I-V equation, discussing applications to circuit analysis
12 p2204 A70-28132

Diode coil suppression effect on two coil magnetic latching relays, showing operating time increment due to transformer action
13 p2378 A70-29348

Similarity theory in design of isofunctional electric converters, relating input-output criteria
14 p2533 A70-30374

SCAMP 1 DC statistical circuit analysis program for linear and nonlinear circuits, describing program structure
14 p2560 A70-30664

SCAMP 2 program for statistical analysis of electronic circuit sensitivity to variations in parameters and DC input values
14 p2560 A70-30665

SCAMP 3 program for calculation of electronic circuit DC performances statistical distribution as function of component parameters variation
14 p2560 A70-30666

SCAMP 4 program for electronic circuits statistical analysis in frequency domain, obtaining mathematical models and transfer functions
14 p2561 A70-30667

IMPATT microwave diodes small signal characterization by equivalent circuit using iterative computer procedure
15 p2708 A70-31971

Ladder networks total transmittance and voltage transfer ratio and impedance or admittance, investigating signal flow graph open paths and Fibonacci sequence
15 p2715 A70-32344

Feedback in electrical networks, discussing transient processes within cybernetics framework
15 p2716 A70-32362

Solid state UHF and microwave device testing by computer automated network analyzers, measuring scatter parameters
15 p2742 A70-32590

Large signal junction FET model involving piecewise linear approximation for ECAP circuit analysis program
15 p2711 A70-32596

Circuits and systems - Conference, Pacific Grove, California, December 1969
16 p2881 A70-33031

Optimal linear filter analysis from singular optimal control viewpoint, considering white and correlated measurement noise
16 p2885 A70-33320

Fluid amplifiers equivalent circuit with stagnation pressure source in series with orifice and load, discussing applications to small signal circuit analysis
16 p2844 A70-33446

High speed MOS circuitry design with application to digital equipment, noting low power and high packaging density
16 p2887 A70-33456

Nonlinear circuits with linear gain relations, examining input-output relations of two ports for analysis, synthesis and design
18 p3230 A70-36000

Phase plane method for Hill equation in problems involving EM wave expansion in elliptical waveguides or single circuit parametric systems analysis
18 p3227 A70-36424

Inverse Laplace transform of network function with allowance for initial differential equation solution, determining circuit temporal characteristics
19 p3456 A70-37269

Network function sensitivity to parameter variations, describing indirect calculation method
19 p3394 A70-37966

Frequency multipliers with charge storage diode, analyzing turn-off transient effect on performance by charge control model
19 p3391 A70-38748

Second order automatic phase control system with proportionately integrating filter, calculating transient response by harmonic linearization method
20 p3584 A70-39253

Soviet book on radio transmitting equipment, covering vacuum tube and transistorized devices, amplifier stages, AM transmitters, oscillator circuits, etc
20 p3597 A70-39599

Real time network support simulation allowing network configuration for nominal or perturbed trajectory for Saturn vehicles, applicable to any flight azimuth [AIAA PAPER 69-936]
20 p3591 A70-39684

Multiphase relaxation oscillator with inductive coupling and common base resistor in feedback loop, determining circuit parameters effect on pulse length
20 p3598 A70-39791

Ga-as Gunn diodes small signal admittance in dipole oscillation mode, analyzing RC model
20 p3598 A70-40062

Ideal limiter with polyharmonic signal input, calculating output spectral composition by Fourier series expansion
20 p3587 A70-40143

Diode mixer analysis for arbitrary I-V characteristics and commensurate levels of converted signals, using modulation characteristics method
20 p3588 A70-40147

Satellite networks queueing analysis, examining graph-theoretic model based on stochastic inputs and time delay factors
20 p3589 A70-40338

DC transistorized Nor logic gates design based on graphic analytic method permitting influence of circuit parameters variations for reliability improvement
21 p3793 A70-40765

Book on pulse and switching circuits covering remote control, TV, computers, radar, telemetry and automation devices
21 p3798 A70-41324

Frequency multipliers with charge controlled junction diode model, predicting operational behavior
22 p3998 A70-43421

Transistor circuit analysis at high frequencies and large signals, considering collector current, inertia and conductance conditioned by diffusion and recombination
23 p4161 A70-43779

Stripline and microstrip junction circulators analysis for microwave integrated circuits, based on clockwise and counterclockwise rotation modes
23 p4169 A70-43787

Electroacoustic circuits transient behavior, examining loudspeaker effectiveness
24 p4321 A70-45374

Modified time-domain reflectometer method for waveguide system evaluation, detecting and displaying radar echoes as function of time
24 p4315 A70-46234

Failure analysis methods for connectors and interconnections, discussing visual inspection, X ray vidicon analysis, electrical evaluation, etc
24 p4320 A70-46249

NETWORK SYNTHESIS

Flip chip and beam lead methods for microcircuit assembling, discussing heat removal using heat

spreader and temperature cycling effects on tensile strength

01 p0050 A70-10330

Digital adaptive-element building blocks in monolithic Si structures for MOS large scale integration, considering serial/parallel multiplier and shift register chips
01 p0047 A70-10458

Wide range pulse height discriminator with milliwatt power drain for use in nuclear experiments on scientific satellites
01 p0088 A70-10749

Microwave circuit for increasing Gunn oscillators injection locking capabilities and reducing FM resulting from bias-voltage fluctuations
01 p0050 A70-10783

Miniaturized components in microstrips on low loss dielectric or magnetic substrates, noting suitability for microwave systems integration
01 p0052 A70-11313

Message switching techniques in digital telecommunication networks, discussing automatic routing, operational and control facilities, etc
02 p0256 A70-11973

Functionally integrated superheterodyne receivers design by applying microwave IC technology, providing weight reduction, interconnecting cables elimination and circuit interface problems minimization
02 p0267 A70-12055

Time sharing computer systems to perform circuit design and analysis, discussing effectiveness in terms of immediate access, accuracy and cost
02 p0265 A70-12187

Multistop time-to-pulse-height conversion unit to extend capability of pulse height analyzer for multichannel time analysis with narrow channel widths
02 p0271 A70-12749

Design methods for self steerable antenna arrays in unidirectional and two directional radio links
03 p0456 A70-13196

Unstable problems stabilization in antenna synthesis from Fredholm equations solution, using least squares method and Chebyshev polynomials
03 p0456 A70-13452

Microwave circuits automatic analysis and design using digital computer in batch mode, describing analysis-optimization program
03 p0457 A70-13562

Optimal synthesis and design of distributed parameter system for waveguides using gradient technique with devised algorithm to overcome convergence problem
03 p0449 A70-13563

Wideband parametric and tunnel diode amplifiers synthesizing method for obtaining maximum flat amplitude frequency response
03 p0457 A70-13727

Variable RF signals in pulsed radar, examining circuits design for required functions
03 p0452 A70-14281

Quasi-optical design methods applied to mm microwave resonators characterized by high Q and low spectral densities
04 p0655 A70-14623

Radiation hardening of electronic systems for nuclear weapons using shielding, circuit design techniques and hardened components
04 p0657 A70-14738

Circuit parameter equations for effective circuit synthesis taking into account ratios between coefficients of polynomials in numerator and denominator
04 p0659 A70-15208

Microwave Si transistors with overlay and interdigital geometries and integrated circuit design considerations for power amplifiers, power oscillators and frequency multipliers
05 p0819 A70-16149

Transistorized wideband amplifiers synthesis by combining dynamic parameters method with poles and zeros method
05 p0819 A70-16249

Adjustable pulse delay circuit design utilizing slow switching action of storage diodes emphasizing thermal stability
05 p0820 A70-16343

Transistor circuit design with junction compensation techniques to reduce transient gamma radiation effects
05 p0821 A70-16418

Broadband two way switch obtained by p-n diodes deposited on alumina substrate
05 p0821 A70-16526

Transversal filters with continuously tapped delay lines, emphasizing synthesis of low pass filter and phase shifter
05 p0822 A70-16652

N-port resistive networks synthesis from terminal conductance matrices with two-tree port structures
06 p1023 A70-17426

Guided elastic waves propagation on layered media, considering elastic wave circuitry design for true microminiaturization
06 p1018 A70-17476

- Surface acoustic wave components for performing transduction, amplification and coupling functions, considering compatible component configurations
06 p1018 A70-17477
- Soviet book on microwave devices employing semiconductor diodes design and synthesis covering electric field effects, optimality criteria, tabular data, etc
06 p1019 A70-17536
- Complex control follow-up systems in transient modes, suggesting synthesis for transfer function of control signal coupling
06 p1023 A70-17775
- Circular antenna arrays synthesis, minimizing peak sidelobe level by dynamic programming
06 p1022 A70-18021
- On-line computer programs allowing for man machine interactions in linear circuits design
06 p1015 A70-18417
- Computer aided network design course using FORTRAN 4 emphasizing modeling of semiconductor devices
06 p1015 A70-18419
- Size reduction and low noise temperature in receiving antennas obtained by transistor integration and resonance frequency modulation
07 p1241 A70-19353
- AC to DC converter design for transforming average AC values into DC voltage
08 p1438 A70-20601
- Galvanoplasty process for parts for UHF circuits, discussing cost, safety and quality
08 p1468 A70-20611
- Monolithic, thick film, thin film and multichip integrated circuit techniques applied to communication equipment design
08 p1471 A70-20785
- Equivalent transformations method for minimizing electronic equipment sensitivity to circuit components value variations during operation
08 p1474 A70-21221
- Microstrip oscillator circuit design for operating with high power/efficiency avalanche diodes, describing low pass filter tuning section role
08 p1475 A70-21278
- Five resonator broadband frequency doubler design using charge storage diodes
08 p1475 A70-21280
- Half wave stepped digital elliptic filter design showing improvements over microwave TEM line narrow band bandpass filter
08 p1476 A70-21284
- Circuit development for realizing narrow bandwidth elliptic function filters at microwave frequencies
08 p1476 A70-21285
- Commensurate transmission line circuits design approximating periodic frequency characteristics on digital computer
08 p1476 A70-21286
- Low pass filter structure of focusing reflectors designed for quasi-optical system, noting energy absorption
08 p1476 A70-21287
- UHF and VHF stacked ferrite loaded junction circulators construction, improving cost to power performance
08 p1476 A70-21292
- Parallel multiplier design with carry-save scheme and constructed from series integrated circuits, discussing speed, complexity and cost
08 p1467 A70-21784
- Adaptive equalizer consisting of canonical link structure with minimum number of delay elements applied to fast data transmission
09 p1640 A70-22039
- Nonlinear circuits reducing nonlinear distortions in amplifiers, discussing wideband nonlinear distortion compensating circuits
09 p1643 A70-22131
- Hybrid microwave integrated circuits technology and design, discussing distributed and lumped-element structures and component properties
09 p1644 A70-22225
- Current distribution determination necessary for given directional characteristic of antennas in nonlinear synthesis problem
09 p1644 A70-22403
- Linear antenna array synthesis by variational calculus, minimizing sidelobe level for fixed input powers and field strengths
09 p1644 A70-22404
- Antenna arrays phase synthesis method based on properties of fast fluctuating phase distribution
09 p1645 A70-22414
- One dimensional discrete time nonlinear filters synthesis using Bayes theorem and digital techniques
09 p1654 A70-22934
- Photoemission energy distribution curves measuring circuit using AC retarding potential method, offering improved noise performance
09 p1679 A70-22996
- Optimal construction of microwave filters with TWT and ferrite direct gain receivers
09 p1648 A70-23166
- Roundoff noise output-dynamic range interaction in digital filters, discussing filter synthesis with transpose configurations concept
09 p1649 A70-23366
- Reactance filters for matching circuits design with optimum transforming performance
09 p1650 A70-23404
- Curvilinear horn antennas synthesis having smoothly changing cross sections, studying methods for solving Fourier integral equation
09 p1652 A70-23660
- Transistor bistable multivibrator design by graphic analytic method, considering effects of loading and supply voltages, temperature and component values on circuit performance
10 p1848 A70-23995
- Directional broadband couplers with lumped elements obtained by insertion of LC networks between sum and difference ports of equal hybrids
10 p1848 A70-24221
- Demand assignment signaling and switching subsystems /DASSS/ design for communication satellite, examining voice channels modulation
10 p1837 A70-24348
- Integrated TDMA switching/transmission system implementation into existing network
10 p1837 A70-24354
- Computer-aided class C amplifier design, discussing algorithm and computer program
10 p1849 A70-24447
- Control synthesis method using optimization technique to design controllers making closed loop system behave as ideal system or model
10 p1855 A70-24450
- Computer-aided circuit design by imbedding singular elements to transform network synthesis into analysis problem
10 p1855 A70-24762
- Phased array radar system synthesis, discussing small aperture systems, effects of solid state technology and role of data processing
10 p1842 A70-24877
- Integrated circuit microwave phased array radar antenna systems for multiple frequency bands and multifunction operations to save cost and space
10 p1851 A70-24878
- Book on integrated electronic systems covering integrated circuit design, device and material properties, quality control, applications, etc
10 p1853 A70-25049
- Single bit latching reciprocal ferrite phase shifter design, operation and performance, noting linear phase response and low phase nonreciprocity
10 p1853 A70-25243
- Thyratron based fast pulse generator circuits noting applications
11 p2017 A70-25570
- Low sensitivity optimal controls synthesis for gyro stabilizer stabilization circuit using variable structure systems theory
11 p2048 A70-25580
- Circuit for analog computing system to determine function extremum of many variables in presence of constraints
11 p2023 A70-25927
- Time correlation telemetering systems design, describing structural scheme
11 p2004 A70-25929
- Microwave acoustic delay lines design and fabrication for UHF to X band frequency ranges
11 p2005 A70-26163
- Constrained complex optimization method for synthesizing distributed-lumped-active networks
11 p2024 A70-26204
- Permanent memory faults effects on sequential machines finite-state behavior, considering masking role in synthesis of fault-tolerant sequential networks
11 p2072 A70-26220
- Computerized design of microwave circuits with S matrix
11 p2019 A70-26714
- Broadband 2 GHz transhorizon radio relay system design and performance for transmission on four channel pairs
11 p2034 A70-26820
- T2L logic circuits design and coherent noise immunity
11 p2021 A70-26833
- Distributed-lumped-active network to produce transfer function with pair of high Q zero real part sensitivity poles
12 p2196 A70-27652
- Computer aided electronic circuit design, describing calculations, graph and table generation, data storage, etc
12 p2192 A70-27769
- Photodetector-electronic circuit matching channels for optical communication system, using minimum risk design criterion
12 p2237 A70-28153
- Computer-aided MOS/LSI four phase logic circuit design, discussing software, design cycles and testing
13 p2380 A70-28375
- Gauss-Newton nonlinear programming algorithm applications to optimization of optimal control law parameters and closed loop control system synthesis
13 p2381 A70-28435
- MELVIN compact inexpensive multipurpose automatic test system, utilizing MSI single printed circuits to work optimally with computer
13 p2374 A70-29683
- Redundant threshold logic elements synthesis based on von Neumann multiplexing principle for automatic error correction
13 p2376 A70-29940
- Similarity theory in design of isofunctional electric converters, relating input-output criteria
14 p2533 A70-30374
- State-space synthesis of multiport passive reciprocal networks with minimum number of resistors, using Gauss factorization procedure
14 p2556 A70-30516
- Linear control systems identification and synthesis from data containing modulus and phase information as frequency functions
14 p2559 A70-30520
- Integrated circuits design by combined automatic and manual system
14 p2554 A70-30670
- Root locus of active distributed RC circuit for synthesis of magnitude response of parabolic filters
14 p2562 A70-31323
- Axisymmetric multibeam annular antenna array with interacting radiating elements synthesized by partial radiation patterns
15 p2707 A70-31513
- Transistorized amplifiers synthesis with multiloop feedback
15 p2707 A70-31518
- Lossless pulse-shaping active line for unipolar transmission, considering construction by loading two terminal Esaki diode to coaxial cable
15 p2697 A70-31827
- Synthesis of vertically polarized omnidirectional pattern with cascade dipole antennas on conducting cylinder
15 p2697 A70-31832
- Low pass filter synthesis with transfer function having frequency response boost in pass band
15 p2708 A70-31833
- Cascade synthesis of multistage logical network with multiple outputs capable of realizing arbitrary logical function from algebraic viewpoint
15 p2715 A70-31840
- Multiple wiring algorithm for automatic pattern design for AI interconnections and printed wiring in integrated circuits
15 p2715 A70-31842
- Microwave power transistors design and packaging
15 p2711 A70-32589
- Topology and component values in computerized design of distributed lumped active networks
15 p2711 A70-32595
- Combinational logic cells cellular arrays synthesis, considering truth table and transition matrix
15 p2712 A70-32606
- Circuit design characteristics and reliability relationship in electronic power supplies for performance requirements
15 p2712 A70-32644
- Practical electronic components criteria accommodating reliability engineer and circuit designer
15 p2832 A70-32653
- Real time variable range digital filter design in suitable form for LSI realization, satisfying reduced deadband requirement for input interface element
16 p2882 A70-33040
- Control strategy for linear system performance based on synthesis of optimal closed loop controller with both sensitivity and state feedback
16 p2882 A70-33042
- Microwave IC methods applied to solid state signal sources design, using varactor tuned transistor oscillators, resistive isolation pads, amplifiers and frequency multipliers
16 p2872 A70-33069
- Suboptimal nonlinear feedback control synthesis for linear time-invariant system with convex cost functional
16 p2886 A70-33334
- High Q reactance network realization for integrated microwave systems employing evanescent mode waveguide components
16 p2875 A70-33402
- High speed MOS circuitry design with application to digital equipment, noting low power and high packaging density
16 p2887 A70-33456
- MOS transistor associative memory cell design utilizing LSI technology
16 p2869 A70-33464
- Nonlinear lumped system synthesis by inverse delta method
16 p2943 A70-34278
- Kinetic synthesis for multivariable system by asymptotic equivalence method
16 p2944 A70-34279

Multibandswitch AC Wheatstone bridge design with large circuit factor

17 p3051 A70-34616

Book on design of resonant piezoelectric devices covering linear piezoelectric materials, Green function, variational methods for dimensional motions and modes, etc

17 p3143 A70-35188

Adaptive system synthesized to compensate stochastic feedback or external disturbance, obtaining quasi-optimal compensation algorithms

17 p3056 A70-35368

Observation space transforming for synthesis of automatic optimization systems with memory tracking randomly walking extremum

18 p3234 A70-36073

Multichannel time marker network synthesis device for physiological data assembly, transformation and processing, generating pulses

18 p3223 A70-36083

Electronic circuits design by discrete equivalent transformations for selecting components parameters within given limits

18 p3231 A70-36239

Microwave devices with harmonized electron beam constructed from klystrons, TWT, backward wave tubes, magnetrons

18 p3231 A70-36414

Funnel shaped vector radiation pattern realized by synthesizing axisymmetric distribution of elliptically polarized currents on body of revolution

19 p3392 A70-37277

Low pass linear phase active feedback circuit synthesis using distributed RC networks to realize flat magnitude response

19 p3392 A70-37707

Automatic control systems synthesis based on root locus trajectories theory

19 p3392 A70-37808

Digital filter synthesis, discussing transfer function determination based on prescriptions for frequency or time response properties

19 p3391 A70-38746

Pulse shaper circuits with tunnel diodes and transistors, describing recovery time decrease

20 p3596 A70-38972

Optimal synthesis of linear active RC filters with controlled source, using feedforward and feedback weighted signals

20 p3596 A70-39163

Two dynamic systems synthesis achieving limited influence on each other by coordinates invariance criteria method involving determinant

20 p3604 A70-39841

Low noise requirements of DC current sources used in circuit design

21 p3797 A70-40854

Power IC fabrication methods covering monolithic chip, monobrid chips and IC driver with external power transistors

21 p3797 A70-41212

High power IC technical limits involving packaging, bonding wires, interconnect metal, power transistors

21 p3797 A70-41213

Coherent receiver as hybrid carrier tracking loop consisting of standard phase locked and modified Costas loop

21 p3802 A70-41351

Fluid logic sequential circuits with optional input signals, describing synthesis procedure

[ASME PAPER 70-FLCS-19] 22 p3963 A70-42408

Fluid logic circuits with combined feedback input signals, describing synthesis procedure

[ASME PAPER 70-FLCS-18] 22 p3963 A70-42409

RLC networks and microwave components design by applying optimization technique

22 p3997 A70-43175

Stripline bandstop filter design method, discussing response shape and resonator number determination, reactance calculation, etc

22 p3999 A70-43488

Gyrostabilizer design based on composite optimal controls with respect to different regional criteria

22 p4040 A70-43559

Algorithm for communication network synthesis from limited elements selection, considering fixed reliability requirements

23 p4160 A70-43763

Design tolerances and compensating networks for microwave transistor amplifier, using synthesis search and trial calculation by computer

23 p4168 A70-43780

Optimal design of electronic circuits, using mathematical methods for solving nonlinear multivariable function extremum

23 p4171 A70-43951

Graphical link between operator and digital computer using CRT display and light-pen input system during automatic electronic circuit design

23 p4150 A70-43952

Digital computer algorithm for automatic electronic circuit design using design engineer experience

23 p4171 A70-43953

Radio electronic circuits precision, deriving relationship between frequency response and component variations solvable by linear programming

23 p4171 A70-43958

Transistorized LF RC filter circuit design for desired frequency response characteristics

23 p4171 A70-43962

Computerized algorithm facilitating automatic synthesis of time invariant linear compensation for highly complex multiloop control systems

[AIAA PAPER 69-941] 23 p4177 A70-44561

General Optimization Software Package for Electrical network and system design, noting application to engineering problems and education

23 p4177 A70-44750

Sequential logic circuit synthesis using truth table, minimizing by Quine-McCluskey method

23 p4167 A70-44861

Microwave oscillator design using Y-parameters from measured scattering parameter data at desired frequencies, applying negative resistance circuit theory

24 p4320 A70-46235

NETWORKS

Soviet monograph on gas dynamics one dimensional problems in variable networks, discussing difference schemes, boundary conditions and discontinuities

19 p3407 A70-38930

NEUMANN PROBLEM

Shells with holes using Neumann method, obtaining Fredholm alternative for singular integral equations

03 p0589 A70-13347

Neumann problem reformulation for regions having boundaries with limited rotation

07 p1325 A70-19538

Scalar plane wave LF scattering by prolate spheroid of revolution, obtaining iterative solution for Neumann problem

11 p2085 A70-26622

Shells with holes using Neumann method, obtaining Fredholm alternative for singular integral equations

14 p2657 A70-30721

Saint Venant principle treating Neumann problem with nonthin two dimensional domain

15 p2767 A70-31855

NEURAL NETS

Neural information processing taking into account differences between living brain and artificial processor

09 p1617 A70-22496

Hypothalamic electric stimulation intensity effects on elicited behavior, considering possible neural circuit threshold reduction

13 p2355 A70-29807

Eating, drinking and gnawing motivation interchangeability under hypothalamic stimulation, noting role of neural substrate activation

13 p2356 A70-29814

Neural pulse frequency modulation system stability, using feedback control model

17 p3056 A70-35553

Brightness contrast by human observer binocular matching, discussing neural networks models

19 p3366 A70-38924

NEUROLOGY

Cortex functional interrelationships with hypothalamus and formatio reticularis, studying role of corticofugal effects in anesthetized cats

01 p0012 A70-10051

Electrochemical mechanisms of nervous tension generation and expansion based on neural impulse expansion theory, noting ion transport

01 p0020 A70-10518

Neuroregulatory agents instrumentation based on compounds brain level, enzymatic formation and radio labeling

14 p2536 A70-30347

Otoneurology - Conference, Basel, 1969

14 p2538 A70-30908

Auditory perception by neuroelectrical tests based on logic coincidence among several detectors, discussing bullfrog inner ear

21 p3765 A70-41991

NEUROMUSCULAR TRANSMISSION

Respiratory muscles neuromotor units activity as function of volley from electric discharge features study on dogs and cats

03 p0417 A70-13068

Mg ion metabolism in neuromuscular excitability maintenance, discussing quantity requirements, detection and electromyographic recording

12 p2172 A70-28045

Excitation conduction velocity maximum along motor fibers of peripheral nerves as function of age in healthy subjects

15 p2679 A70-31602

Muscular group response to sinusoidal and trapezoidal force applied to forearm, discussing frequency dependent limb oscillations and neuromuscular effects

21 p3767 A70-42161

Sympathetic transmission model, discussing transmitter liberation capacity under various stresses by mobilization of stores, acceleration of synthesis, etc

24 p4299 A70-45804

NEURON TRANSMISSION

U BIOELECTRICITY

NEURONS

Corticofugal effects of various cortical regions on neuron activity in hypothalamus posterior lateral sections in cats

01 p0012 A70-10053

Microelectrophysiological study of cerebellar neuron responses to stimulation of vestibular apparatus by vertical rocking performed on anesthetized adult cats

01 p0012 A70-10124

Neurons and perineuronal glial cells quantitative relations in visual cortex from anesthetized dogs

01 p0025 A70-11030

Temporary interneuron connections mechanisms during conditioned reflexes development

01 p0025 A70-11040

Human and cat visual neuron properties, discussing encoding orientation and dimensions of retinal images

01 p0028 A70-11360

Neurons tracing activity and cellular memory mechanisms in cortical projection region of cutaneous analyzer of immobilized rats following electric acoustic stimuli

01 p0030 A70-11468

Rabbits and cats cortical neurons responses to light and acoustic signals, using microelectrodes inserted at different depths into cortex

01 p0030 A70-11469

Neuron activity in somatosensory cortex region of guinea pigs and rats with intracortical connections severed by circular incision

01 p0030 A70-11470

Vasomotor activity of neurons located in spinal cord lateral crescent in curarized decerebrated and intact cats

01 p0030 A70-11471

Direct links existence between rabbit temporal cortex neurons and neurons in each division of hippocampus, discussing topographic arrangement and axons quantity

03 p0417 A70-13071

Tegmental nucleus neurons of cats cerebellum, considering responses to acceleration changes and natural stimulation of vestibular apparatus

03 p0421 A70-13510

Early and late response component of associative cortical area in cerebral hemispheres of cats connected with mono and polysensory neuron activity

03 p0421 A70-13688

Origin and functional designation of associative evoked potentials in orbital cortex of cats, showing phases connected with neuron activity and excitation

03 p0422 A70-13689

Aplysia periodic spontaneous gill movements controlled by central neuron activity in abdominal ganglion

04 p0629 A70-14425

Mathematical model for computer simulation of homogeneous neuron nets with recurrent inhibition control, considering activated and inactivated states

04 p0640 A70-14553

High altitude environmental effects on adrenal glands and hypothalamic neurosecretion in rats

04 p0629 A70-14568

Small amplitude discharges and neuron activity in dorsal hippocampus of cats recorded simultaneously with pyramid cell activity

04 p0632 A70-15221

Nonspecific influences on rabbits neurons reaction to nonvisual stimuli in central visual pathway using microelectrodes implantation in visual cortex

05 p0802 A70-16624

Vasomotor center neuron responses to vertical rocking movement stimulus of vestibular apparatus in cats

06 p0995 A70-17805

Connection character of rubrospinal tract fibers with various neuron groups of spinal cord on basis of electrophysiological and morphological investigations

07 p1206 A70-19468

Respiratory neurons pulsating activity in medulla oblongata of anesthetized cats during imposed rhythm

07 p1213 A70-19774

Respiratory neurons activity in respiratory center of medulla oblongata during suspension and forced recovery of respiratory motions

07 p1213 A70-19775

Guinea pigs visual analyzer during stimulations by diffuse light, nonspecific thalamic nuclei and microelectrodes polarization, determining A- neuron activity

07 p1213 A70-19788

Midbrain reticular neurons activity in cats during response to individual and coincident cortical and hypothalamic stimulations

07 p1213 A70-19789

Pulse neurons random homogeneous networks macroscopic description, considering operation modes in terms of input frequencies and output pulse sequences

08 p1451 A70-21000

- Neuron processing of retinal activity in estimating distances and sizes of objects in field of vision
12 p2172 A70-28312
- Neuron activity of cortical motor and visual regions and corpus geniculatum laterale in cats during diffuse thalamic electrostimulation combined with light signals
12 p2173 A70-28355
- Electronic simulation of neuron membrane demonstrating nervous impulses generation and propagation behavior
14 p2542 A70-30387
- Pulse activity records to investigate neuron functioning dynamics based on construction of frequency graph
15 p2679 A70-31601
- Lemniscus neurons in switching nucleus of thalamus, showing switching cells with direct cortical projections into somatosensory cortical zones
16 p2848 A70-33262
- Arterial blood carbon dioxide tension effects on rhythmic volley activity of respiratory medulla oblongata neurons in cats
17 p3030 A70-35354
- Continuous functions transformation by artificial neuron networks, investigating electrophysiological data for nerve tissues excitability
18 p3223 A70-36081
- Posterior ventral thalamic nucleus neuron reactions converging lemniscus and spinothalamic signals in cats
18 p3221 A70-36639
- Extracellular spontaneous sequences of action potentials of thalamic neurons during asphyxia in rats under artificial respiration
19 p3361 A70-38306
- Acetylcholinesterase and simple esterases distribution in squirrel monkey brain, examining activity in neuropil and postrema area neurons
20 p3569 A70-38993
- Rat neuron impulsive reactions and frequency response differences to varying sound signals, discussing time constant, signal intensity and frequencies
20 p3574 A70-40172
- Spatial summation of retinal neurons receptive field centers excitation from single optic tract fibers action potential in light-adapted cats
22 p3971 A70-43403
- Bioelectric activity changes in rats lumbar neurons, membrane and postsynaptic potential and discharge frequency during and after asphyxiation
22 p3971 A70-43404
- Time analysis of pulsed activity of neurons, using amplitude analyzer with programmable control unit
22 p3972 A70-43551
- Visual system recording neuron pulse potential spatial and temporal responses to sinusoidal stimuli
23 p4144 A70-43922
- Peripheral stimulations of various modalities effect on neurons impulse activity in hippocamp dorsal area of rabbits, noting excitation and latent periods
23 p4145 A70-44311
- Forebrain participation in motor response suppression reaction during stimulation of caudate nucleus in rats and cats, noting brain damage effects
24 p4299 A70-45836
- Neurophysiology of membrane and synaptic mechanisms of prolonged trace changes in neuron activity concerning memory and cellular learning analogs
24 p4305 A70-46393
- NEUROPHYSIOLOGY**
- Neurophysiological vertical and horizontal visual coordinates localization in man
06 p0998 A70-18484
- Corneal stroma transparency analysis based on refractive index and lattice theories
09 p1618 A70-22675
- Vestibular analyzer and otolithic apparatus disturbances and normalization under prolonged hypodynamia, noting pathological effects of repeated caloric testing
10 p1816 A70-24686
- Neurophysiological mechanism of motor activity during simple reaction time situation performance
10 p1818 A70-24724
- Psychovegetative and neurovegetative stress syndroms in flying personnel removed prematurely from active service as result of psychophysiological complementary diagnostics [DFVLR-SONDDR-31]
12 p2177 A70-27041
- Motor reactions and neural negative induction duration in male and female human subjects of different ages
12 p2174 A70-28356
- Neurological differences in spinal projections of animals subjected to cordotomies compared with human material, using selective silver impregnation technique
13 p2350 A70-28998
- Electrode placement ancillary technique for obtaining stereotaxic atlas of infant rat hypothalamus
13 p2350 A70-29322
- Electronic simulation of neuron membrane demonstrating nervous impulses generation and propagation behavior
14 p2542 A70-30387
- Neurophysiological framework for binocular single vision and depth discrimination, concerning construction of horopter for cat
14 p2539 A70-31348
- Enhanced evoked potentials sited by auditory stimuli in complex task, considering EEG and neurophysiological basis of selective attention
19 p3363 A70-38318
- Prolonged transverse acceleration effects on rats kidney and posterior hypophysis neurosecretions
20 p3575 A70-40188
- Peripheral stimulations of various modalities effect on neurons impulse activity in hippocamp dorsal area of rabbits, noting excitation and latent periods
23 p4145 A70-44311
- Neurogenically maintained blood pressure component, discussing autonomic nervous system activity in hypertension and normotension, sympatholytic agents effectiveness in hypertensive treatment, etc
24 p4299 A70-45805
- NEUROPSYCHIATRY**
- Soviet book on higher cortical functions of man and disorders due to local brain injuries, describing methods for neuropsychological studies of motor functions
01 p0017 A70-10503
- NEUROSCIENCE**
- U NEUROLOGY**
- NEUROSES**
- Psychic state changes during prolonged bed rest, discussing effects of physical exercise and medicine
10 p1816 A70-24684
- Student pilot case diagnosis of hysterical neurosis with syncopal and epileptiform symptoms
21 p3771 A70-41493
- NEUROTIC DEPRESSION**
- Neurotic syndromes in aviation medicine, discussing acute reactions, anxiety, depressions, structured syndromes and psychosomatic disorders
21 p3771 A70-41490
- NEUTRAL BEAMS**
- NT MOLECULAR BEAMS**
- NT NEUTRON BEAMS**
- NEUTRAL PARTICLES**
- NT FAST NEUTRONS**
- NT NEUTRONS**
- NT PHOTONEUTRONS**
- NT THERMAL NEUTRONS**
- Ionospheric ion and neutral constituents composition from D region to magnetopause, noting ion-chemical reaction rates
01 p0074 A70-10588
- Charged particles motion in isotropic weakly ionized plasma acoustic wave associated with difference in electrons and ions entrainment by neutral particles
03 p0530 A70-13087
- Electron density and temperature in ionized gas created by thermal collisions between neutral particles, analyzing chemical ionization and inelastic collisions influence [ONERA-TP-752]
03 p0532 A70-13631
- Neutral particle flux measurements in plasma wind tunnel using BeCu detector, discussing role in collisionless flow dissipation processes
04 p0727 A70-14994
- Axial neutral gas pressure gradient calculated in cylindrical positive column of DC discharge due to driving volume force
04 p0671 A70-15003
- Chapman-Ferraro two dimensional problem with neutral sheet, investigating magnetospheric flows and time dependence
04 p0679 A70-15109
- Ion-neutral coupling in plasma acceleration revealed by velocity disparities determined spectroscopically [ALAA PAPER 70-166]
06 p1133 A70-18219
- Electron density, excited state density and neutral particle temperature in Ar and Ne nonequilibrium laminar plasma jets
08 p1550 A70-20596
- Fast neutral particles produced in electron-ion oscillation discharge as function of gas pressure and magnetic field
09 p1736 A70-23190
- Boltzmann equations for distribution functions of gas, analyzing neutral or ionized components by linearization method
11 p2090 A70-25946
- Upper atmospheric ion and neutral composition from rocketborne mass spectrometry, allowing for rocket velocity and analyzers orientation with respect to velocity vector
14 p2568 A70-30140
- Neutral particle temperature, pressure and velocity measurements in argon plasma jet, using refraction index
14 p2625 A70-31350
- Scalar-tensor theory in canonical form, discussing neutral particle and electron self energy problem
15 p2773 A70-31439
- Ionospheric spacecraft flight conditions simulation in vacuum chamber, discussing low energy ion sources
15 p2717 A70-31814
- Neutral particle and electron density measurements by Explorer 32 proving thermospheric gravity waves association with wave-like structure in F region electron density
15 p2727 A70-31907
- Rocket and satellite data on upper atmospheric neutral/charged particles, short wave solar radiation, temperature and photochemical reactions
15 p2730 A70-32089
- Metal surface ionization measurements for upper atmosphere and interplanetary space energetic neutral hydrogen analyzer design
17 p3138 A70-35309
- Upper atmosphere neutral component temperature measurement from thermal spread of charged particles beam
18 p3247 A70-36182
- Elastic energy transfer cross sections calculation of H-H scattering to estimate neutralized solar wind particles thermalization
18 p3309 A70-36951
- Upper atmospheric neutral components temperature determination by rocket-borne mass spectrometers
18 p3252 A70-36983
- Upper atmospheric layers neutral composition by rocket-borne mass spectrometers, indicating gravitational separation of argon from molecular nitrogen
18 p3252 A70-36984
- Magnetolectric electromotive force in media of ions and neutral molecules, using Boltzmann transport equation
21 p3855 A70-40909
- Plasma and neutral gas collisionless interactions in magnetic field based on Alfvén critical velocity hypothesis, discussing electron energy distribution
21 p3857 A70-41383
- Quadrupole mass spectrometer design for lower thermosphere neutral composition measurement, discussing atmospheric physics, installation on rockets, etc
21 p3830 A70-41990
- NEUTRALIZERS**
- Wire dischargers at helicopter propeller blade tips reducing electrostatic RF interference, substituting stainless steel wire tufts for nichrome wire
05 p0848 A70-16320
- Parameters influence on mercury hollow cathode neutralizers for Kaufman ion thruster [ALAA PAPER 70-1090]
20 p3693 A70-40245
- NEUTRINOS**
- High luminosity white dwarfs possible evolution from planetary nebulae, discussing plasma neutrino processes
01 p0189 A70-11342
- Neutrino in nonquantum and quantum gravitation theories, neutrino sea, etc, discussing classical neutrino dynamics
02 p0341 A70-11669
- Neutrinos line patterns in Muscovite mica, refuting Russel assumption by analysis of multiple Coulomb scattering of charged particles and track comparison
03 p0556 A70-13047
- Solar structure models for neutrino flux prediction compared with solar structure, suggesting modification in solar and stellar evolution calculations
05 p0906 A70-15895
- Solar neutrino spectroscopy using various radiochemical detectors for Be 7, N 13, O 15 and B 8 neutrino fluxes, noting Li 7 suitability for determining CNO cycle
05 p0898 A70-15949
- Assessing background magnitude caused by earth natural radiation sources during underground detection of solar neutrinos by radiochemical methods
05 p0899 A70-15950
- Solar interior temperature measurement by Cl, Ga and Li isotopic detectors of solar neutrinos, discussing effectiveness and upper temperature bound
05 p0899 A70-15951
- Time variation of gravitational constant on structure of central solar region and neutrino luminosity
05 p0899 A70-15952
- Solar neutrino detectors calibration with artificial neutrino sources produced by reactors, electron and proton accelerators
05 p0846 A70-15953
- Deuteron splitting by solar neutrinos for neutrino detection, describing deuterium scintillation detector characteristics
05 p0899 A70-15954
- Gallium trichloride and aqueous solution of lithium chloride as solar neutrino detectors
05 p0899 A70-15956
- Neutrinos production by primary cosmic rays in rarefied and dense media, calculating spectra
05 p0899 A70-15963
- Solar neutrinos detection from recording high-energy electrons in reactions, using Li 7, Be 9 and B 11 as detectors
05 p0899 A70-15964

Experimental determination of solar neutrino activity from interaction cross section between neutrinos and target nuclei

05 p0900 A70-15965

Experimental observations of neutrino in collapsing stars in Galaxy, showing detector capability of recording positrons or electrons from antineutrino-neutrino flux induced reactions

05 p0900 A70-15966

Nonequilibrium processes and initial conditions in early universe, discussing neutrino viscosity efficiency at removing shear anisotropy and Misner model

05 p0907 A70-16002

Solar core opacity influence on revised photospheric iron abundances, discussing neutrino flux prediction doubling in solar models

05 p0905 A70-16985

Neutrino emission, mass loss and giant branch termination in young clusters with giants originating from intermediate mass main sequence stars

06 p1138 A70-17277

Observational extragalactic densities obtained within framework of Friedman universe model with matter and neutrino background

07 p1383 A70-19407

Lepton charge and neutrino astrophysics, discussing oscillations role in solar neutrino detection difficulties

07 p1371 A70-20329

Earth observations of collapsing star neutrinos and neutrino oscillations in Milky Way galaxy

07 p1371 A70-20331

Relativistic gravitational stellar collapse calculations for stars exceeding neutron star limit, discussing results in terms of supernovae or neutrinos

09 p1749 A70-21991

Supernovae hydrodynamics, discussing early light curves energy requirements and shock wave dynamics in terms of neutrino diffusion

09 p1749 A70-21992

Neutrinos kinetic theory for anisotropic cosmological models

09 p1753 A70-22453

Electron-neutrino weak interaction and beat decay coupling constants found nearly equal, describing astrophysical tests based on white dwarf stars luminosity intervals

09 p1733 A70-23451

Neutrino emission effect on collapse of supermassive stars, estimating energy radiated, discussing envelope explosion

10 p1938 A70-24022

Universe neutrino energy density estimation based on photon-neutrino weak interaction coupling theory

10 p1920 A70-24567

Stellar plasma neutrino pair emission, comparing photon neutrino coupling with current current coupling theory and white dwarf evolution

12 p2297 A70-26976

Solar neutrino flux measurement based on neutrino capture by large chlorine mass and subsequent Ar 37 decay in low noise environment

12 p2293 A70-27389

Cosmic neutrinos detection, using inverse beta decay and elastic scattering by electrons to overcome solar neutrino problem

12 p2293 A70-27390

Dissipation mechanism and period rate increase in neutron star pulsar model with neutrino emission for damping

12 p2312 A70-28368

Neutrino astronomy for processes in stellar interiors, emphasizing thermonuclear reactions in sun and main sequence stars

13 p2490 A70-28947

Thermonuclear reactions in interior of sun, discussing models for He isotope concentration and flow to interpret solar neutrino generation

13 p2494 A70-29573

Low energy neutrino cosmic background, discussing energy density, black body radiation, beta decay, scattering process and origin

13 p2479 A70-30001

Nucleosynthesis in supernova models based on neutrino energy transport

17 p3153 A70-34529

Solar neutrino fluxes, calculating capture rates and primordial helium abundance

17 p3151 A70-34847

Plasmon decay by neutrinos emission in strong magnetic field, examining parallel and perpendicular propagation

18 p3305 A70-35936

Electron correlations and solar neutrino counts, correcting frequency independent Thomson cross section

18 p3308 A70-36485

Critique of metagalactic origin of high energy cosmic rays, reviewing neutrino hypothesis

19 p3500 A70-38082

Energy spectrum distortion of ultrahigh energy cosmic rays due to interactions with photons and neutrinos in universe

19 p3510 A70-38155

Solar neutrinos flux upper limit determination, describing detection equipment and procedures

19 p3511 A70-38486

Neutrino production by synchrotron process /magnetic bremsstrahlung/ in relativistic electron gas under intense magnetic field

20 p3695 A70-39050

Solar B8-Be8 decay neutrinos energy spectrum and absorption cross sections calculation

20 p3698 A70-39307

Inverse beta decay thermonuclear reactions induced by neutrinos proposed for neutrino detection from solar interior

20 p3704 A70-39471

Fermi momentum upper limit for universe neutrinos in cosmic ray propagation, determining maximum proton energy

20 p3700 A70-39592

Cosmic ray superhigh energy electrons and neutrinos propagation in degenerate neutrino gas universe, considering gas density in cosmological models

20 p3700 A70-39593

Secondary cosmic ray muon inelasticity in high energy neutrino interactions for deep mine experiments, using lepton current

21 p3845 A70-41139

High energy neutrinos generated by cosmic ray interactions with earth atmosphere, discussing detection, plotted energy spectrum and underground muons

22 p4093 A70-42310

Scale invariance models correlation with cosmic ray data, comparing neutrino- and antineutrino- nucleon scattering

23 p4210 A70-43800

Neutrino processes in lepton era as primordial fireball relic, discussing coupling constant for muon-electron neutrinos interactions

23 p4253 A70-44849

Red supergiants location in H-R diagram, discussing significance of mass loss, rotational mixing and neutrino emission as stellar model mechanisms

24 p4403 A70-45393

NEUTRON ACTIVATION ANALYSIS

Stony meteorite trace elements groups neutron activation analysis with computer reduction of Ge/Li spectra

02 p0249 A70-11680

Neutron activation analysis for U and Th in various tectites, discussing evolution and extraterrestrial origin

03 p0576 A70-14090

Bismuth concentrations in various carbonaceous and equilibrated chondrites determination by neutron activation technique

07 p1388 A70-20036

High energy neutron activation method for remote extraterrestrial in situ rock surface constituents analysis

10 p1932 A70-24614

Chondrites and terrestrial rocks trace elements by neutron activation analysis, discussing radiochemical separation and computer analysis of gamma ray spectra

20 p3582 A70-38980

Apollo 11 lunar dust examination by neutron activation analysis, determining spallogenic manganese 53

21 p3908 A70-41579

Neutron activation analysis for Re and Os in Apollo 11 volcanic rocks, discussing possible meteorite contamination of secondary rocks and fines

21 p3775 A70-41589

Apollo 11 lunar rocks and soil chemical elements analysis by neutron activation scheme

21 p3777 A70-41612

Apollo 11 fines and rocks major and trace elements data obtained by combined instrumental and neutron activation analysis

21 p3910 A70-41615

Chondrites Ti content by neutron activation analysis

21 p3921 A70-41941

Neutron activation determined concentrations of Ni, Ga, Ge and Ir in iron meteorites with silicate inclusions

24 p4401 A70-45376

Nonweldable internal flaws detection containing oxides in steel slabs by neutron activation analysis

24 p4376 A70-45750

Murchison and Lost City chondrites element abundance analysis by thermal neutron activation and wet chemical techniques, noting low oxygen content

24 p4411 A70-45790

Radiochemical neutron activation analysis of In, Cd, Y and rare earth elements in rocks

24 p4310 A70-46375

NEUTRON BEAMS

Neutron radiography for visual nondestructive failure analysis and production inspection of ordnance components compared with X ray radiography

03 p0494 A70-14122

Neutron radiography in cold, resonance or epithermal, and fast neutron energy ranges, discussing converter materials for direct exposure or transfer method

22 p4028 A70-42590

Image contrast enhancement on neutron radiograph by energy tailored beams

24 p4376 A70-45748

NEUTRON COUNTERS

NT NEUTRON SPECTROMETERS

Cosmic ray latitude survey in western U.S. and Hawaii in summer 1966 using neutron and muon monitors

01 p0167 A70-10228

Geographically smoothed geomagnetic cut-offs for eliminating discontinuity in neutron monitor latitude variation in Mexico City vicinity

01 p0167 A70-10229

Cosmic ray neutron monitors data comparison for various stations using one factor model, considering atmospheric effects and cut-off rigidities

01 p0087 A70-10460

Geomagnetic latitude survey by neutron multiplicity monitor covering threshold rigidity ranges at various elevations, relating data to primary cosmic ray rigidity spectrum

04 p0741 A70-15125

High energy neutron counter designed for recording slow neutrons produced in lead detector

05 p0845 A70-15935

Diurnal cosmic ray intensity variations first and second harmonics amplitudes during sudden phase variations diagrammed from neutron monitor data during IGY

05 p0898 A70-15936

Neutron monitor calibration method to eliminate natural cosmic ray background, decreasing errors due to ray intensity variation

05 p0846 A70-15938

High energy solar flare data from neutron monitor stations supplemented by low energy data from interplanetary space probes Pioneer 6 and 7

05 p0902 A70-16443

Satellite mounted device for detecting and recording 20-110 Mev solar neutrons

10 p1889 A70-24488

Neutron monitor air pressure attenuation coefficient dependent on neutron energy being recorded

10 p1889 A70-24491

Multiplicity recorder for cosmic rays neutron component studies, reducing star redistribution errors by coincidence effect compensation

11 p2103 A70-25527

First harmonic of diurnal variation in pressure corrected cosmic ray neutron monitor rate, discussing amplitude variation with height and observed time dependence

12 p2291 A70-27177

Statistical analysis of cosmic radiation neutron component monitor error, taking into account generation multiplicity

18 p3307 A70-36097

High altitude neutron supermonitor investigation of cosmic ray microvariations

18 p3307 A70-36104

Neutron monitor NM-64 design and operation, using Setun digital computer for around clock processing

20 p3629 A70-39310

Diurnal anisotropy variations of cosmic ray intensity, taking into account neutron monitors data

20 p3699 A70-39346

Barometric coefficient altitude dependence of cosmic ray neutron monitor for vertical flux

20 p3699 A70-39347

Multiplicity recorder for cosmic rays neutron component studies, reducing star redistribution errors by coincidence effect compensation

21 p3882 A70-41277

Fast neutron radiography, considering sources and transfer and scintillator-film detectors

24 p4376 A70-45749

NEUTRON DECAY

Neutron beta decay in strong quantizing magnetic field using Dirac wave function for electron, noting lifetime dependence on field strength

08 p1549 A70-21744

Proton injection into radiation belt, comparing solar neutron decay /SND/ and cosmic ray albedo neutron decay /CRAND/ as proton sources

09 p1746 A70-23489

Proton distribution in radiation belt inner zone from radial diffusion addition to cosmic ray produced albedo-neutron decay and atmospheric collision loss

17 p3150 A70-34644

NEUTRON DETECTORS

U NEUTRON COUNTERS

NEUTRON DIFFRACTION

Long range order formation in Ni-Cr alloys analyzed by direct neutron diffraction, considering disorder-order transition temperature and chemical composition

01 p0124 A70-11600

Order-disorder transition temperatures for Ni-Cr alloys determined by neutron diffraction, discussing homogeneous ordering of atoms

09 p1707 A70-23196

Chromium lattice vibrational properties based on fourth-nearest-neighbor tensor force model, obtaining

agreement with inelastic neutron diffraction data and elastic constants 14 p2626 A70-30480

Neutron diffraction of ordered atomic oxygen structures in titanium suboxides, noting compositional dependence of physical properties 22 p4053 A70-42735

NEUTRON DISTRIBUTION

Cosmic ray neutrons energy spectrum and angular distribution at sea level based on measurement results 03 p0556 A70-13046

Geomagnetic latitude survey by neutron multiplicity monitor covering threshold rigidity ranges at various elevations, relating data to primary cosmic ray rigidity spectrum 04 p0741 A70-15125

Neutron and proton distributions rms radii in nuclei by optical model analysis of low energy pion-nucleus interactions 07 p1337 A70-19360

NEUTRON EMISSION

Time dependent telegrapher equation solution for studying transient neutron waves propagation 01 p0130 A70-10086

Focused deuterium plasma discharge neutrons and X rays energy spectra, flux and time resolved collimation measurement with nuclear emulsions and scintillation detectors 02 p0348 A70-12241

Nuclear fusion reactions by focused Q switched Nd doped laser beam on deuterium target, discussing neutrons from flowing plasma, electron temperature and counter experiments 03 p0501 A70-13684

Lunar neutron flux due to cosmic radiation interaction with lunar surface layer, determining angular distribution and energy spectrum 04 p0738 A70-14442

Gamma radiation integral fluxes and production rate evaluation from ground and neutron production in Plexiglas and Fe to calculate optimum recoil electron threshold 05 p0899 A70-15955

Solar cosmic ray flare /28 January 1967/ observed by neutron monitors, determining emission and particle spectrum at atmosphere boundary 05 p0903 A70-16752

Neutron flux due to cosmic radiation interaction with lunar surface layer, determining angular distribution and energy spectrum 13 p2475 A70-28467

TSF-SNAP reactor neutron radiation leakage, comparing Monte Carlo calculations with experimental and analytical determinations 20 p3671 A70-39156

NEUTRON FLUX

U FLUX (RATE)

NEUTRON FLUX DENSITY

Correlation between atmospheric meteor entry and gamma and neutron radiation intensity verifying micrometeor antimatter hypothesis 03 p0454 A70-13528

Large amplitude wave trains in cosmic ray neutron intensity compared with diurnal variations, determining interplanetary space directional distribution from monitor data 03 p0559 A70-13912

Forbush effect on intensity of neutron component of cosmic rays during quiet sun period 05 p0897 A70-15795

Fast neutron transport characteristics of helical ducts using Monte Carlo code FASTER, computing neutron fluxes and attenuation 05 p0884 A70-16163

Neutron flux measurements on Cosmos 53, equipment and calculation of secondary neutrons due to bombardment of satellite components 05 p0905 A70-17112

High energy neutrons searched for during solar flares by balloon flights, giving upper limits for gamma ray and neutron fluxes 06 p1136 A70-18008

Barometric and atmospheric temperature corrections of cosmic ray neutron component intensity fluctuations obtained statistically from monitor recording 07 p1366 A70-19430

Cosmic rays effect on atmospheric temperature and wind, discussing planetary distribution of neutron component of radiation intensity 07 p1373 A70-20346

Altitude dependence of low latitude cosmic ray diurnal variations from cosmic ray neutron data 13 p2479 A70-29792

High altitude neutron supermonitor investigation of cosmic ray microvariations 18 p3307 A70-36104

Barometric and atmospheric temperature corrections of cosmic ray neutron component intensity fluctuations obtained statistically from monitor recording 18 p3309 A70-36904

Neutron flux measurement in nuclear reactors based on logarithmic techniques and digital approach, discussing temperature effects compensation 19 p3427 A70-37939

Midlatitude atmospheric neutron density height dependence during minimum solar activity 20 p3697 A70-39285

Cosmic ray neutron semidiurnal variations day and night components with respect to geomagnetic and solar activity 20 p3698 A70-39298

Earth atmosphere cosmic ray neutron albedo from balloon measurement of flux vertical distribution 20 p3698 A70-39298

Cosmic ray albedo neutron flux latitude and altitude dependence, using OGO-6 polar orbiting satellite 20 p3698 A70-39326

Barometric coefficient altitude dependence of cosmic ray neutron monitor for vertical flux 20 p3699 A70-39347

Atmospheric neutron flux increase during solar proton event, measuring flux and energy spectrum of particles by balloon sounding 21 p3881 A70-41076

High energy solar neutron flux via balloon measurement of flux difference from solar direction and from symmetrical direction about zenith 23 p4236 A70-43881

Solar neutron flux density relation to solar flare of 28 September 1968, using high altitude balloon-borne neutron detector 23 p4238 A70-44925

NEUTRON IRRADIATION

X ray topography of postannealing substructure of neutron irradiated W and Mo single crystals, indicating increase in disorientation 01 p0115 A70-10065

High temperature ductility improvement in stainless steels containing He, analyzing lattice damage and interphase cavities after fast neutron irradiation 01 p0123 A70-11246

Silicon solar cells I-V characteristics, spectral response and diffusion length measured after neutron irradiation 03 p0537 A70-13025

DNA penetration into normal and fast neutron irradiated yeast cells, using immunofluorescent microscopy 03 p0417 A70-13072

Neutron bombardment effect on ordering and disordering state of alloys phase diagrams, noting temperature dependence 03 p0506 A70-13107

Superconducting properties of polycrystalline disordered cold worked Nb-Ti-V alloys showing unexpected sensitivity to fast neutron irradiation 03 p0508 A70-13144

Brittle fracture in neutron irradiated and nonirradiated Mo specimens tested in tension and compression at low temperature 03 p0513 A70-14013

Neutron induced defect clusters in high field space charge region of Si p-n junctions, noting rate of volume damage dependence on electric field strength 04 p0730 A70-14728

Resistivity, temperature and injection level dependence of minority carrier lifetime in neutron irradiated p- and n-type Si 04 p0730 A70-14729

Neutron irradiation effect on space charge limited current of electrons in high purity silicon, noting SCLC sensitivity in detecting traps and changes 04 p0731 A70-14730

Structural materials mechanical properties tests during neutron bombardment, discussing atomic reactors optimal parameters calculation 04 p0775 A70-15259

Specific heat and thermal EMF increase due to radiation damage in lattice of fast neutron bombarded Cu, Mo and W specimens 05 p0863 A70-16292

Neutron irradiation and annealing effects on lattice constants of titanium and chromium carbides analyzed for X ray diffractions 07 p1303 A70-18702

Antiradiation chemical substances for modifying radiation damage in peas during seed irradiation with fast neutrons 07 p1208 A70-19510

Neutron irradiation damage in W, observing consistency of activation energy for self diffusion with vacancy mechanism 07 p1314 A70-20012

Gamma-neutron irradiation effect on miniature pig, observing incapacitation with severe convulsions and performance decrement 09 p1622 A70-23461

Thermal conductivity of neutron irradiated copper at low temperature noting lattice defects 11 p2148 A70-25757

Antiradiation chemical substances for modifying radiation damage in peas during seed irradiation with fast neutrons 11 p1988 A70-26109

Cu doped GaAs n- to p-type transition after fast reactor neutron irradiation, measuring Hall effect and photoconductivity to determine Cu electrical activation 12 p2287 A70-27490

Combined neutron and gamma ray irradiation effects on piezoresistive accelerometers 13 p2405 A70-28814

Electromotive force appearance in fissionable material semiconductor during thermal neutrons irradiation 13 p2469 A70-28879

Neutron irradiation effect on n-channel GaAs junction FET performance, considering transconductance, drain current, pinch-off voltage and cut-off frequency 13 p2376 A70-28932

Dimensional measurements of nuclear fuel cylindrical specimens by scanning neutron radiographic negative with microdensitometer, taking into account specimen geometry and neutron cross section 15 p2735 A70-31769

Void formation and creep during fast neutron irradiation of austenitic stainless steel based on thermodynamic approach, calculating nucleation and growth rates 17 p3123 A70-34626

Neutron irradiation effects on stress corrosion susceptibility of Al alloy 17 p3124 A70-34822

Microelectronic systems radiation resistance, examining logic IC gates for reactor neutron irradiation 18 p3233 A70-36783

Neutron irradiation effect on unijunction transistors and SCRs, developing damage prediction technique 19 p3388 A70-37848

Flexible shallow shell with plastic inhomogeneity due to yield point-fast neutron flux relation, examining stability under uniform load 20 p3734 A70-40437

Neutron irradiation effect on elevated temperature fracture of various fcc alloys 22 p4054 A70-42957

NEUTRON SCATTERING

Lunar and planetary surface chemical composition analysis using neutron inelastic scattering as optimum for unmanned missions 10 p1942 A70-24613

Polarized Co59 target using He3-He4 dilution refrigerator, analyzing fast neutron scattering 14 p2584 A70-30508

Initial value transport of monoenergetic neutrons migrating in slab with infinite reflectors for isotropic scattering as function of material properties 21 p3854 A70-41999

Neutron-electron collision damping and displacing of space echo in plasmas, indicating use for density measurement 22 p4082 A70-43244

Transverse and longitudinal current correlations in fluids from modeled kinetic equations, noting inelastic neutron scattering from liquids 24 p4378 A70-45261

NEUTRON SOURCES

Nondestructive testing of Apollo CSM /Command and Service Module/ spacecraft ordnance explosive devices by indirect and direct neutron radiography 03 p0494 A70-14123

Neutron formation multiplicity during capture of cosmic ray muons by Zn and Sb nuclei, noting agreement with one-third law 08 p1560 A70-20718

High speed shock wave propagation in deuterium gas, observing neutron production 21 p3806 A70-40744

Reactor, isotropic and accelerator neutron sources for thermal neutron radiography 24 p4375 A70-45746

Equipment, sources and safety in neutron radiography for industrial quality control 24 p4376 A70-45747

Scintillator-film neutron radiography converter combinations efficiency gain for small sources by cooling 24 p4376 A70-45751

NEUTRON SPECTRA

Fast neutron spectrum produced by galactic cosmic ray protons in atmosphere, presenting Monte Carlo transport calculation results 04 p0742 A70-15130

Solar cosmic rays diffusion enclosure in interplanetary space magnetic boundary suggested from balloon, satellite and ground observations of solar flare neutron component 05 p0904 A70-16753

Threshold rigidity decrease during 23-24 March 1969 magnetic storm, analyzing neutron multiplicity spectrum 23 p4186 A70-43846

NEUTRON SPECTROMETERS

Liquid scintillator neutron spectrometer using pulse shape discrimination and two parameter analyzer 18 p3290 A70-36563

NEUTRON STARS

Final state of matter resulting from star contraction, white dwarfs development and neutron stars problem, explaining hydrostatic equilibrium

02 p0370 A70-12085

Neutron star atmospheric composition as function of time, including effects of diffusion, cooling and nucleosynthesis

02 p0378 A70-12698

Hyperon and resonance particle effects on neutron star vibration, discussing vibrational energy storage and atmospheric electromagnetic generation

02 p0379 A70-12699

Electric fields in rotating magnetic relativistic neutron stars, analyzing static fields in corotating frame and pulsar emission

02 p0379 A70-12726

Neutron star X synchrotron radiation from gas accretion producing strong magnetic field with high electron temperature

03 p0557 A70-13220

Rotational properties of neutron star models for Crab Nebula energy source, using expressions for angular momentum and rotational kinetic energy

03 p0571 A70-13817

Pulsars observed properties and interpretation based on oblique rotator model for neutron stars

03 p0577 A70-14099

Superfluid states of matter in interior of neutron stars, discussing strong interaction forces role

03 p0578 A70-14219

Neutron star electrical conductivity, discussing stellar flux and magnetic field decay times

03 p0578 A70-14220

Pulsars pulse duration and shape as key to neutron stars linkage with supernova explosions

04 p0750 A70-14749

Neutron star vulcanism and seismicity, discussing neutron star volcano size and shape possibilities

04 p0753 A70-15070

Hydrostatic equilibrium solutions of internal structure of neutron stars using Brueckner equation

06 p1139 A70-17541

Angular velocities and equilibrium of rotating neutron stars compared with white dwarfs

07 p1376 A70-18911

Landau Orbital Ferromagnetism in electron gas as magnetic field source for neutron stars

07 p1380 A70-19279

Neutron stars equation of state derived, suggesting three body forces inclusion at high densities

07 p1388 A70-19924

Pulsar magnetorelativistic model assuming neutron star with magnetic field

08 p1563 A70-20478

Neutron star X synchrotron radiation from gas accretion producing strong magnetic field with high electron temperature

08 p1563 A70-21653

Supernovae and remnants - Conference, New York, November 1967

09 p1748 A70-21987

Supernovae and remnants, data concerning radio brightness distribution of Tycho supernova remnant and Cassiopeia and Crab Nebula origin

09 p1748 A70-21989

Supernovae remnants evolution, properties and galactic distribution, discussing criteria for catalog listing and remnants as X ray sources

09 p1749 A70-21990

Relativistic gravitational stellar collapse calculations for stars exceeding neutron star limit, discussing results in terms of supernovae or neutrinos

09 p1749 A70-21991

Neutron stars properties, using static cold stellar model to examine relation between central density and mass, and cool hyperonic matter composition

09 p1749 A70-21995

Gravitational radiation detection from pulsating neutron star, considering asymmetries in gravitational collapse of massive stars as origin

09 p1749 A70-21996

Supernovae remnants X ray emission associated with explosion process generating relativistic particles, indicating Crab Nebula as X ray object

09 p1749 A70-21998

Crab Nebula continuing energetic activity study indicating origin in nebula center and association with supernova remnant

09 p1750 A70-22000

Magnetic moment associated with Landau levels in magnetic induction in electron gas and magnetic fields of white dwarfs and neutron stars

09 p1752 A70-22306

Pulsar model assuming magnetic dipole radiation by spinning neutron star interacting with nearby plasma

09 p1756 A70-22517

Pulsars period distribution not related to decay of magnetic field in rotating neutron star

09 p1756 A70-22518

Pulsars as tiny superdense neutron stars with spin to explain galactic cosmic rays and radiation from supernova remnants

09 p1756 A70-22631

Equation of state for cold matter at neutron star densities, deriving equilibrium equations for nuclear interactions among hadrons

09 p1764 A70-23606

Neutron star models based on equation of state for cold degenerate matter, taking into account nuclear forces and clustering

09 p1764 A70-23607

Magnetic funneling model proposed for accretion of matter onto neutron star to study X ray production during motion through interstellar cloud

10 p1931 A70-23902

Pulsars in supernova remnants emitting X rays

10 p1933 A70-24627

Longitudinal electrical conductivity of relativistic gas in intense magnetic field

10 p1924 A70-24634

Milky Way expansion, explaining Weber gravitation signals by collisions between neutron and normal star

10 p1943 A70-24698

State equations of matter at high density and zero temperature, considering neutron stars relationship to supernova explosions and collapse

12 p2298 A70-27059

Pulsar properties association with neutron star rotation energy, discussing alternate pulsar theories

12 p2301 A70-27579

Pulsar theory of rotating and precessing neutron stars, rejecting relevance of forced precession to behavior

12 p2308 A70-27884

Dwarf and neutron stars as pulsar energy sources, considering Crab Nebula X ray emission and gravitational collapse

12 p2310 A70-27990

Dissipation mechanism and period rate increase in neutron star pulsar model with neutrino emission for damping

12 p2312 A70-28368

Crab pulsar /neutron star NP 0532/ possible spherical asymmetry indicated by pulse arrival time anomalies

13 p2486 A70-28618

Cosmic rays emission by dipole magnetosphere, applying model to neutron star particle belts

13 p2476 A70-28893

Superfluidity and superconductivity under cosmic conditions, discussing Bose-Einstein condensation, neutron stars, white dwarfs, etc

15 p2795 A70-31454

Pulsar formation mechanism, showing core collapse to neutron star state

15 p2806 A70-32773

Neutron stars gamma and radio emission in gas accretion state, determining surface gravitational potential

15 p2808 A70-32883

Hot small mass neutron stars cooling time and internal characteristics, discussing evolution based on H-R diagram

15 p2808 A70-32886

Frequency spectra of gravitational waves radiated from celestial phenomena, suggesting mass exchange in binary containing neutron star

17 p3067 A70-34619

Neutron core star models based on realistic nuclear matter calculations and hyperons equation of state

17 p3157 A70-34844

Pulsars theories review, discussing geometrical model picturing pulsar as rotating neutron star with high magnetic field

17 p3164 A70-35117

Superheavy nuclei origin in primary cosmic rays, proposing neutron stars /pulsars/ as sources

18 p3308 A70-36403

Pulsars pulsation mechanism, using neutron star model with oblique rotation axis

18 p3319 A70-37048

Electrical and thermal conductivities in white dwarf stars cores and neutron stars outer layers, calculating electron-photon collisions transition probability

20 p3702 A70-39016

Collapsing or neutronizing stars detection by recording neutrino and antineutrino flux, calculating antineutrino-deuteron interaction cross section and positron energy and angular distribution

20 p3698 A70-39302

Equilibrium theory of white dwarfs, neutron and hyperon stars, deriving equations for nonrotating objects composed of degenerate cold electron or neutron gas

20 p3704 A70-39472

Neutron stars, discussing equations of state and stellar interiors, models, atmosphere, cooling, vibration, rotation and magnetic fields

20 p3706 A70-39932

Neutron star superfluid turbulent state, applying dynamic model to conditions in pulsars

20 p3713 A70-40429

Proper motion evidence for existence of X ray stars associated with Sco X-1 and Cen X-2, indicating formation by neutron stars

21 p3873 A70-40673

Rotating neutron stars, pulsars and cosmic X ray sources relationship, discussing stellar model with mass loss in presence of magnetic field

21 p3874 A70-40678

Pulsar research review, discussing characteristics, neutron star theory and galactic origin

21 p3886 A70-41072

Pulsars and neutron stars origin and properties, discussing superdense star angular velocity, blackholes, supernovae remnants, rotation, etc

21 p3923 A70-42171

Neutron star crust conductivity, obtaining electrical conductivity formula for outer kilometer

24 p4403 A70-45394

Neutron star or defunct pulsar accretion of interstellar matter, discussing effects on total luminosity and radiation spectrum

24 p4403 A70-45397

Pulsar distributions without magnetic decay, concerning age dependence of surface field and radio luminosity of neutron stars

24 p4413 A70-46138

NEUTRON THERMALIZATION

Nuclear rocket engine core thermal and neutronic transient and steady state dynamics digital simulation, showing advantages over lump model analysis

[ASME PAPER 69-WA/NE-3] 04 p0717 A70-14757

NEUTRON TRANSMUTATION

U NUCLEAR REACTIONS

NEUTRONS

NT FAST NEUTRONS

NT PHOTONEUTRONS

NT THERMAL NEUTRONS

Cosmic rays neutron component solar-diurnal variations as function of solar activity using magnetically quiet data

05 p0898 A70-15941

Intensity variations of cosmic ray neutrons and mesons analyzed to isolate lunar day period

07 p1368 A70-20033

Magnetic storms effect on cosmic ray neutron component diurnal variation, determining amplitudes and phases of harmonics by harmonic analysis

07 p1372 A70-20341

Diurnal variations of cosmic ray neutrons following solar proton flares, proposing anisotropic diffusion model for phase and amplitude

07 p1372 A70-20342

Boundary value problems in one speed transport theory, applying Green function technique to neutrons with spherical symmetry

08 p1542 A70-21253

Neutron capture effects in Gd from Norton County meteorite by isotopic composition analysis

12 p2300 A70-27524

Cosmic ray neutron component differential and integral barometric coefficients, showing dependence on geomagnetic cutoff rigidity and atmospheric depth

20 p3697 A70-39290

Cosmic ray beta neutron component barometric coefficients planetary distribution during IQSY, establishing latitude dependence for mountain and sea level equations

20 p3697 A70-39292

Extremely high temperature deuterium examination, using coaxial plasma accelerators to determine neutron production and vorticity

23 p4227 A70-44452

X ray and neutron propagation in multilayer film composite, discussing boundary conditions in interferential systems

24 p4380 A70-46095

NEW MEXICO

New Mexico Bandera lava tube systems, noting similarities with lunar surface sinuous rilles

23 p4254 A70-44884

NEWTON SECOND LAW

Energy derivation for mechanics and thermodynamics with generalization to systems of more than two dynamic variables, considering transformations and Newton and Kepler laws

12 p2164 A70-27070

NEWTON THEORY

Human rectal temperature cooling rate during refrigeration in mortuary, applying Newton law

01 p0017 A70-10471

Kharlamova solution for solid body motion in Newtonian force field represented as rolling, without slipping, of mobile hodograph of angular velocity vector

01 p0145 A70-11431

Translational-rotational motion of long dumbbell in Newtonian central force field, analyzing plane center of mass trajectory with perpendicular kinetic moment vector

04 p0744 A70-14427

Stellar configurations of cold static neutral plasma consisting of nuclei and degenerate electron gas, calculating integral parameters by Newton gravitation theory

07 p1376 A70-18912

Mass point motion in celestial mechanics, investigating two and three body problems without equal counteraction assumption

08 p1565 A70-20562

- Mathematical model for finite-density non-homogeneous Newtonian cosmologies, approximating solutions using coupled Vlasov- Poisson equations
08 p1581 A70-21740
- Particle escape from Newtonian gravitational system of positive energy
10 p1938 A70-24183
- Different gravitational force fields effecting optimal rocket trajectories and queried validity of Newtonian law
10 p1943 A70-24820
- Kantorovich theorem application as weak Newton method used in boundary value problems containing Euler-Lagrange equation for variational problems and ordinary differential equations
12 p2260 A70-27002
- Translational-rotational motion of long dumbbell in Newtonian central force field, analyzing plane center of mass trajectory with perpendicular kinetic moment vector
13 p2485 A70-28452
- Mass point motion in celestial mechanics, investigating two and three body problems without equal counteraction assumption
15 p2805 A70-32717
- Newtonian gravity law in light of relativistic theories, considering deviations of quasars and red shift deviations from Newton theory
16 p2976 A70-33722
- Newtonian hypersonic aerodynamic theory for arbitrary bodies, discussing computational difficulty for shadowed areas
21 p3747 A70-41866
- Newton and Einstein gravitation theories applied to light velocity in gravitational field
24 p4379 A70-45487
- Earth-moon laser distance measurements, examining relationship between Newtonian and relativistic field coordinates
24 p4413 A70-46160
- NEWTON-BUSEMANN LAW**
Slender axisymmetric power-law missile bodies with minimum ballistic factor, using Newton-Busemann centrifugal theory with skin friction
21 p3746 A70-41756
- NEWTON-RAPHSON METHOD**
Differential equations in two point boundary value problems solved by combining Newton-Raphson iterative method with parameter variation extrapolation
12 p2260 A70-27003
- Inverse boundary value problems involving elliptic equations solved by Newton method and discrete invariant imbedding
13 p2440 A70-28650
- Newton-Raphson method analog accelerating convergence of multidimensional stochastic approximation algorithm to local minimum for attitude controller design
13 p2382 A70-29069
- Quasi-linearization /generalized Newton-Raphson process/ in orbit determination, comparing with differential correction method
17 p3168 A70-35235
- Normalized multidimensional Newton-Raphson method eliminating initial guess, using two-transformation technique
19 p3457 A70-37822
- Newton regularized method for nonlinear boundary value problems in combination with conjugate gradients
22 p4064 A70-43480
- NEWTONIAN FLUIDS**
Film-vapor interface shape for thin liquid lubricating film, analyzing two dimensional Newtonian flow including gravity, inertia and surface tension effects [ASME PAPER 69-LUB-3]
01 p0103 A70-10399
- Newtonian liquid lubricated spiral groove bearing load capacity and power loss dependence on viscosity variations with temperature
02 p0309 A70-12533
- Critical thermal regimes in Couette flow, investigating temperature and velocity profiles of nonisothermal steady state Newtonian flow between two parallel plates
03 p0466 A70-13388
- Laminar steady radial flow of simple fluid of short memory between two parallel disks, demonstrating relation to Newtonian fluid
06 p1037 A70-17915
- Shape of minimum drag slender body of revolution in Newtonian flow for given volume, length and maximum cross section determined by stochastic optimality principle
10 p1802 A70-24278
- Newtonian fluid laminar throughflow between coaxial corotating cones, applying solution for flow between disks
11 p2038 A70-26491
- Newtonian fluid laminar boundary layer flow over flat plate with nonNewtonian fluid injection
12 p2209 A70-27212
- Wave propagation through Newtonian fluid in compressible thick walled viscoelastic tube, considering blood flow in arteries
15 p2691 A70-31938
- Post-Newtonian equations of hydrodynamics and radiation reaction in general relativity
17 p3156 A70-34828
- Unsteady state Newtonian liquid diffusion in laminar flow in circular tube, using mathematical model
17 p3072 A70-35544
- Film-vapor interface shape for thin liquid lubricating film, analyzing two dimensional Newtonian flow including gravity, inertia and surface tension effects [ASME PAPER 69-LUB-3]
19 p3435 A70-37610
- NonNewtonian boundary layer flow having arbitrary potential velocities from methods for Newtonian fluids
19 p3407 A70-38932
- Navier-stokes equations solutions in two way flows of Newtonian fluids with constant kinematic viscosity
21 p3810 A70-41961
- Incompressible Newtonian fluid laminar radial flow between parallel stationary disks, obtaining integral solution for Navier-Stokes equation
22 p4007 A70-42302
- Newtonian fluid turbulent flow development characteristics in inlet region of smooth concentric annulus from momentum integral equations
22 p3957 A70-42304
- Newtonian hydrodynamic analogies for homogeneous anisotropic models in general relativity
22 p4075 A70-43472
- Incompressible Newtonian fluid flow between closely spaced corotating disks, showing radial pressure distribution similar to laminar flow
24 p4324 A70-45293
- Constitutive equations in fluid dynamics, discussing Newtonian, Oldroyd and Walter, Reiner-Rivlin, Rivlin-Ericksen, Noll, Bingham and oriented fluids
24 p4327 A70-46149
- Inertia effects and suspension rheology for incompressible Newtonian fluid shear flow around neutrally buoyant rigid sphere
24 p4327 A70-46243
- NICHROME [TRADEMARK]**
Strengthening mechanisms in dispersion hardened Nichrome /TDNiC/ analyzed in 70-2000 F range, discussing solid solution, dislocation substructure and grain refinement
08 p1525 A70-21961
- NICKEL**
NT NICKEL ISOTOPES
Coherent precipitates effect on explosive shock hardening of pure nickel and Inconel alloy sandwich assemblies determined from simultaneous shock loading at specific pressures
01 p0116 A70-10107
- Crack propagation mode in laminated steel-Ni composites, analyzing softer layer effect using impact tests and C replica fractographs
01 p0120 A70-10743
- Tensile strength of flat specimens of Ni reinforced by W wire gauze
02 p0315 A70-11661
- Impurity diffusion in Ni using diffusion theory, considering activation energies for Mo and W
02 p0317 A70-12396
- Hydrogen, oxygen and nitrogen effects on gas shielded arc weld porosity of Ni, comparing MIG and TIG processes
02 p0310 A70-12543
- Polycrystalline Ni steady state creep characteristics measurement emphasizing temperature dependence of creep rate
03 p0504 A70-13022
- Mechanical properties, optimum deformation and rupture of W wire reinforced Ni and Ti metal composites obtained by hot rolling in vacuum
03 p0508 A70-13245
- Ni dispersion-strengthened composites from ultrafine comminuted powders, describing forming techniques and test results
04 p0709 A70-15629
- Nickel IV forbidden lines suggested from spectrum study of slow nova RR Telescopii
05 p0905 A70-15758
- High purity Ni fatigue in reversed bending as function of oxygen pressure and temperature
06 p1086 A70-17454
- Ni effect on nitrogen activity in Fe-Ni-N austenite between 600-1200 C using Strohlein analysis
06 p1088 A70-17612
- Inert gases scattering from Ni /111/ plane as function of beam temperature and angle of incidence compared to Au and Ag
06 p1110 A70-18263
- Ionization energies and oscillator strengths for Fe XVI, Co XVII and Ni XVIII by frozen core approximation, noting applications to solar corona
06 p1150 A70-18465
- Heat transfer in Ni wires in laminar air flow from wind tunnel investigation
07 p1420 A70-19064
- Crystal structure imperfections and elastic anisotropy of crystallites in condensed Ni films by X ray analysis
07 p1309 A70-19636
- Nickel boronizing in high temperature vacuum, studying mechanical properties and layer thickness time dependence
08 p1517 A70-21148
- Weld porosity in TIG welding of technical Ni in ternary mixtures of Ar with H, O and N
08 p1518 A70-21345
- Hydrogenated Ni activation energy difference for lower and higher critical temperatures due to hydride dislocations binding energy
08 p1522 A70-21705
- Ni L alpha X ray emission line shape and position as function of bombarding electron energy, observing differential self absorption in anode
09 p1731 A70-22777
- D-pattern changes of helium ions irradiated polycrystalline Mo and Ni specimens, observing line splitting
09 p1707 A70-23197
- Epitaxy of Ag deposited on Ni, observing irreversible crystallographic order transition from metastable nominal orientation by LEED
10 p1927 A70-24076
- Intensity vs voltage curves for LEED beams from clean Ni surface, calculating Bragg spectrum with energy diagram method
10 p1927 A70-24077
- Raney alloy catalyst activity and stability in fuel cell anodes, noting properties of ternary phases of nickel, aluminum and iron, molybdenum or titanium
10 p1831 A70-24466
- Raney catalyst preparation and continuous operation in molecular hydrogen and oxygen electrodes noting improved voltage, manipulation and energy yield
10 p1831 A70-24467
- Electrochemically optimal structure for Raney alloy catalysts based on molecular hydrogen polarization temperature, noting beta and gamma phases and particle size influence
10 p1831 A70-24468
- Heat transfer in Ni wires in laminar air flow from wind tunnel investigation
10 p1970 A70-25215
- Fatigue life of Ni vibrated in reversed bending at 300 C in oxygen and in water vapor at various pressures
11 p2067 A70-26098
- Anomalous grain growth kinetics and recrystallization in electron beam annealed nickel determined by microstructural and radiographic study, noting annealing time dependence
11 p2068 A70-26596
- Selective optical coatings of alternate Ni and silicon dioxide layers, describing optical and spectral characteristics of black mirror
12 p2272 A70-27307
- Stress-strain state effects on Cu and Ni tubular samples plasticity and strength using polarization-optical technique
12 p2323 A70-27341
- Contaminated Ni crystal /100/ surface photoelectric yield as function of temperature, considering effects of Ar ion bombardment and annealing
12 p2288 A70-27680
- Collection of papers on nickel and nickel alloys covering thermal and mechanical properties during annealing and precipitation hardening behavior
13 p2432 A70-28758
- Ni and Ni alloys thermal properties, discussing expansion and conductivity, melting and boiling points, vapor pressure, specific heat, entropy, etc
13 p2432 A70-28759
- Ni and Ni alloys elastic properties relationship with ferromagnetic and magnetostriction effects, determining modulus of elasticity for wide temperatures and heat treatment
13 p2432 A70-28760
- Deformation, mechanical properties and processes during recrystallization annealing of nickel and alloys single crystals
13 p2433 A70-28761
- Zirconium additions effect on Ni internal friction behavior and relaxation spectrum
13 p2435 A70-29498
- Ferromagnetic Ni band structure and Fermi surface including spin-orbit and exchange interactions obtained by Mueller interpolation scheme
14 p2626 A70-30479
- Ionization equilibria and ionization and recombination rates for Fe and Ni ions, discussing dielectronic recombination
14 p2631 A70-30727
- Fe 57 contaminant in Ni, studying Mossbauer effect as function of temperature
15 p2784 A70-32023
- Work hardening properties of Ni single crystals of various orientations during intermittent and continuous plastic deformation
15 p2762 A70-32394
- Ni-S melts thermodynamic properties in 700-1100 C range by continuous thermal balance method, calculating S vapor pressure
18 p3271 A70-36029
- Gas bubbles thermal rejection and formation in Ni electrodeposit during annealing over 200-1000 C range
18 p3272 A70-36039

Lunar anorthosites Ni-Fe grains from Mare Tranquillitatis, discussing contamination by meteoritic metal, magnetic fractionation and fractional crystallization
19 p3519 A70-38032

Tensile strength of flat specimens of Ni reinforced by W wire gauze
19 p3452 A70-38435

Mechanical properties, optimum deformation and rupture of W wire reinforced Ni and Ti metal composites obtained by hot rolling in vacuum
19 p3453 A70-38463

Solar photospheric spectrum Ni II forbidden lines analysis, determining abundance of Ni for comparison with coronal and meteoritic data
20 p3711 A70-40405

Pure Ni plastic flow threshold measurement under combined ultrasonic and static loadings, noting annealing
22 p4053 A70-42644

Nickel surface layer fine structure changes in super-sonic air flows at various temperatures and times
22 p4056 A70-43341

Fe meteorites with high Ge content, tabulating concentrations of Ni, Ga, Ge and Ir
23 p4241 A70-44259

Oxygen pressure effects on Ni oxidation kinetics at high temperatures
23 p4208 A70-44920

Hydrogenated Ni elastic limit discontinuity, discussing Portevin-Le Chatelier effect
23 p4208 A70-44921

Cu and Ni doped n-p and p-n silicon solar cells, examining radiation damage and isochronal annealing properties
24 p4294 A70-45810

Pure Ni recrystallization, noting stacking faults and parallel sided and thin annealed twins formation during boundary migration
24 p4363 A70-46192

Ni/sulfuric acid AC voltage polarization curves for anodic dissolution region
24 p4364 A70-46220

Hydrogen effect on deformation and fracture of polycrystalline nickel
24 p4365 A70-46372

NICKEL ALLOYS
NT HASTELLOY [TRADEMARK]
NT INCONEL [TRADEMARK]
NT KAMACITE
NT NICHROME [TRADEMARK]

Chemistry variations effects on mechanical properties, phase stability and microstructure of alloy Unitemp 718 /Ni-Fe-Cr alloy/ via microscopy and X ray analysis
01 p0116 A70-10092

Rolled bimetallic Ni-Mo mechanical properties produced by powder metallurgy methods
01 p0116 A70-10157

Creep deformation modes of Ni-base austenitic superrefractory alloy as function of test temperature
01 p0118 A70-10704

Transmission electron microscope study of deformation mode during rapid tensile testing of Ni-base superalloy, discussing twinning and stacking fault modes
01 p0118 A70-10705

Tungsten effect on phase transformations and carbide reactions to attain equilibrium at 850 C in Ni-base superalloys
01 p0118 A70-10727

Hot corrosion reactions in Ni, Co and NiAl-base alloys exposed to salt-sulfur containing simulated gas turbine combustion atmospheres
01 p0118 A70-10728

Precipitation in Ni-base superalloy analysis with dark field electron microscopy and electron and X ray diffraction
01 p0119 A70-10730

Intrinsic/extrinsic stacking fault pairs observed during creep of single crystals of gamma prime precipitation hardened Ni-base alloy, developing viscous slip model
01 p0119 A70-10731

Offset yield strengths of TD-Ni and Al-aluminum oxide SAP type two phase alloys in tension and compression
01 p0119 A70-10736

Martensite structure, discussing intensity anomalies in X ray diffraction pattern of intermetallic Ni-Nb
01 p0121 A70-10900

Phase changes in Ni/Ti alloys with equiatomic composition, resolving discrepancy on non-Martensitic eutectoidal decomposition of B2 structure and intermediate precipitate
01 p0121 A70-11232

Vapor pressures of cobalt over pure cobalt and over Ni-Co alloys determined as function of temperature by isotope exchange method
01 p0121 A70-11233

High temperature internal friction measurements on miniature torsional pendulum specimens from TD

nickel bar, showing damping differences due to microstructural anisotropy
01 p0122 A70-11237

TD-Ni low cycle fatigue properties at high temperature, discussing grain morphology, theta particles role and oxidation resistant coating effect
01 p0123 A70-11245

Semicoherent interface dislocations in directionally solidified Ni-Al-Cr eutectic, discussing lattice mismatch
01 p0123 A70-11247

Ni-based superalloys microstructure, describing composition, formation and characteristics of various phases
01 p0124 A70-11448

Long range order formation in Ni-Cr alloys analyzed by direct neutron diffraction, considering disorder-order transition temperature and chemical composition
01 p0124 A70-11600

Vacuum deposition of Cr-Al film on Ni-Mo alloys, describing operating pressure, temperature and film thickness
01 p0124 A70-11617

Size distribution of Ni-Si particles precipitated from Si solid solution in Ni measured as function of concentration, aging time and temperature
02 p0317 A70-12320

Potential lubricants in friction and cup forming tests of stainless steel, Ti- and Ni-base alloys, considering boron nitride, graphitic materials and Mo oxides
02 p0309 A70-12540

Heat and creep resistant Ni- and Fe-base alloys application in gas turbines, superheaters, steam pipes, chemical and petrochemical plants and heat treatment equipment
02 p0319 A70-12711

Strain hardening on single crystals of aging Ni-based alloys with ordered separated phase
03 p0505 A70-13104

Mechanical properties of ordered Ni-Cr alloys, establishing hardening effect of annealing
03 p0505 A70-13105

Microdeformation resistance in Ni alloys with ordered phase diagrams related to strain level, analyzing Bauschinger effect
03 p0505 A70-13106

Phase alteration quenching effects in Ni-Mo alloys, discussing high temperature alpha region, isothermal annealing below peritectoid temperature and metastable nickel molybdenide phase
03 p0508 A70-13143

Grain size, forging parameter and microstructure effect on stress-rupture properties of wrought Ni-base alloy
03 p0511 A70-13567

Ni-Nb intermetallic compound precipitation effect on various phase formations in strained samples of Alloy 718 /wrought Ni base alloy/
03 p0511 A70-13568

Al and Ti single additions effects on recrystallization of Ni-Cr alloys, noting phase transformation and hardness variations
03 p0513 A70-14300

Ni-Cr alloy oxidation resistance dependence on small amount of Al at high temperatures, noting role of protective oxide layer
03 p0514 A70-14315

Extension characteristics of delta and sigma related phases in Mo-Ni ternary systems and evaluation of unit cell dimension variations on alloying
04 p0704 A70-14392

Prealloyed powders of Ni base alloys, made by inert gas atomization for improved strength and ductility
04 p0706 A70-14951

Nickel base alloy, WAZ-20 with improved strength in 2000-2200 F range for application to gas turbine engine stator vanes
04 p0706 A70-15097

Ni addition effects on Mg-Nd and Mg-Nd-Mn alloys structure and heat resistance
04 p0706 A70-15189

Fatigue tests results parametric representation for nickel base alloys tested at various temperatures and times to failure
04 p0707 A70-15264

Ni-V alloys precipitation behavior with 15.4/16.5 wt percent V content, observing tetragonal equilibrium theta phase precipitation
04 p0708 A70-15368

High temperature properties mechanisms in aluminum coated vacuum cast nickel base superalloys
04 p0711 A70-15705

Thin film transmission electron microscopy study of precipitation in Fe-Ni-Cr-Mo alloy with added Be and specific thermoelastic properties
05 p0862 A70-16022

Alloy EI 602 ingots low ductility during forging ascribed to nonferrous metal atoms, decreasing iron diffusion and forming brittle nitride and carbide compounds
05 p0863 A70-16545

Refractory Ni alloys defects accumulation under creep and cyclic temperature variations assessed by relative lifetime additive method
05 p0866 A70-17032

Nickel-based alloys small cycle thermal and mechanical fatigue limit during tensile stresses and operational temperatures, analyzing fatigue curves
05 p0867 A70-17046

Heat resistant steel and nickel alloys stress rupture strength at operating temperatures, discussing endurance diagrams under cyclic bending loads
05 p0868 A70-17047

Soviet monograph on nickel and Ni vacuum melted alloys, studying physicomechanical, operational characteristics and gas content
06 p1085 A70-17411

Ni-Cr alloys oxidation dependence on temperature and Cr concentration
06 p1087 A70-17609

Ni-Cr alloys effects of grain size and surface deformation on oxidation properties at high temperature
06 p1088 A70-17610

Ni-Fe alloys texture formation, studying strong deoxidizers role in secondary recrystallization
06 p1088 A70-17614

Aluminosilicate coatings for increased Ni-Cr alloys heat resistance due to silicon properties
06 p1089 A70-17743

Isothermal sections in Ti-Ni-B, Mo-Ni-B and W-Ni-B at 800 C determined by X ray analysis
06 p1090 A70-17846

Roll diffusion bonding applicability to Ti, Ni and Fe alloys, discussing fabrication temperatures and tooling [AIME PAPER F-69-3]
07 p1290 A70-18813

Ni influence in high temperature oxidation of austenitic Fe-Cr-Ni alloys investigated thermogravimetrically, metallographically and by electron probe microanalysis
07 p1305 A70-18965

Solution treating temperature and microstructure effects on hot rolled Ni base alloy properties
07 p1306 A70-18995

Microfissuring of Ni base alloy weldments as function of grain size produced by solution temperature
07 p1306 A70-18996

Cobalt effects on Ni-W alloys mechanical and metallurgical properties including thermal stability, fabrication response, weldability and impact resistance
07 p1306 A70-19070

Phase equilibrium and homogeneity regions of solid solutions system Ni-Nb-O at elevated temperature
07 p1315 A70-20313

Ce-Ni-Si system X ray and microstructural analysis, constructing phase diagram for Ce contents of 0-33.3 wt percent
08 p1555 A70-21115

Nickel alloy based metal fiber reinforced composites long-time structural stability at high temperatures
08 p1517 A70-21150

Quadratic precipitate transformation into orthorhombic phase with conservation of maximal atomic density planes in Ni-Cr-Nb and Ni-Cr-Ta alloys during prolonged reheating
08 p1518 A70-21240

Matrix stiffened nickel-chromium welding products featuring high tensile strength at room and elevated temperatures and high impact strength at cryogenic temperatures
08 p1508 A70-21488

Iron base and nickel base alloys susceptibilities to internal hydrogen and hydrogen environment embrittlements, studying crack initiation inside and at metal surface
08 p1520 A70-21515

Ni-Mo surface alloys investigated by low energy electron diffraction, using tabulated symmetry and extinction properties of space groups and phase diagrams
08 p1557 A70-21603

Gamma-gamma prime mismatch effects on stress rupture of Ni and Fe-Ni based alloys with Al and Ti hardeners
08 p1521 A70-21701

Serrated yielding in hydrogenated nickel alloys, noting hydride stability role in Portevin-Le Chatelier effect
08 p1522 A70-21706

Tungsten alloy fiber reinforced Ni-base superalloy composites evaluated for high temperature turbojet engine applications, considering stress-rupture strength, oxidation and impact resistance
08 p1523 A70-21907

Yield strength of cold worked MP Co-Ni alloys during aging at elevated temperatures, noting behavior in overaged condition
08 p1525 A70-21960

Sigma and mu phase formations in Ni heat resistant alloys x ray analysis using phase isolation by anodic dissolution
09 p1700 A70-22079

Powder metallurgy all-inert processing method for producing nickel base superalloys forgings, discussing

- microstructure, reproducibility, mechanical properties, etc
09 p1701 A70-22553
- Time, temperature and composition dependent regularities in Ni-Al and Ni-Nb alloys oxidation processes, discussing Oxygen ion migration and Ni ion diffusion
09 p1704 A70-22752
- Work strengthening and microstructure of Co-Ni base alloys containing Cr and Mo, discussing deformation induced martensitic transformation
09 p1705 A70-22806
- Ordered Ni₈Ta phase in nickel-rich binary alloy using electron microscopy and diffraction analysis
09 p1705 A70-22808
- Creep deformation in single crystals of gamma prime precipitation hardened nickel base alloys at intermediate temperatures
09 p1705 A70-22809
- Growth kinetics of gamma prime precipitate in Ni-Ti alloy noting Ti content variation as function of aging
09 p1706 A70-22812
- Ni-Cr superalloys hot corrosion, studying sulfidation-oxidation in various synthetic controlled gas mixtures
09 p1706 A70-22944
- Electrical resistivity of TiNi and TiCo compounds and alloys measured at various temperatures after quenching or annealing
09 p1707 A70-23194
- Gamma prime phase structure ordering effect on critical shear stresses of aging Ni-Al alloys and mimonin
09 p1707 A70-23195
- Order-disorder transition temperatures for Ni-Cr alloys determined by neutron diffraction, discussing homogeneous ordering of atoms
09 p1707 A70-23196
- Ni alloys with Ir and Rh using X ray diffraction and microscopy, exhibiting continuous solid solutions
09 p1708 A70-23423
- Adiabatic elastic stiffness of single crystals of Ni-Co alloys, determining bulk modulus dependence on chemical composition
10 p1904 A70-24699
- Ni-Cr alloys hardened by complex alloying with Ti-Al or Ti-Zr-C additions, improving strength at elevated temperatures in oxidizing atmosphere
10 p1904 A70-24836
- Binary Ni-Cr alloys tensile mechanical properties at 25 C after water quenching and heat treatments
10 p1905 A70-25172
- Stacking faults developed in double hexagonal closed-packed phase of Ni-Ti alloy in cold worked and annealed conditions, using X ray line broadening
10 p1906 A70-25228
- Precipitation hardened nickel-base alloy microcracking during gas tungsten arc and electron beam welding, studying heat affected zone hardness, phases and grain size
10 p1897 A70-25311
- Nickel base alloy as die material for creep forming titanium
11 p2060 A70-26424
- Iron-nickel alloy phase and diffusion relationships, composition gradients and hardness variations involving long time metallic meteorite anneals
12 p2252 A70-26964
- Ni-Nb-O system state diagram by reduction equilibria and X ray analysis, discussing oxidation resistance based on metal surface protective layers makeup
12 p2253 A70-27158
- Resistivity anomalies of nickel-chromium alloy with Al additions subjected to deformation and heating, studying K-state
12 p2254 A70-27496
- Dispersion strengthened Ni-Cr alloys elastic and plastic properties at room temperature, studying preferred crystallographic orientation effect
12 p2255 A70-27609
- Short time tensile properties of thermomechanically treated astrolloy showing improvement due to refined gamma precipitate and grain boundary carbides
12 p2256 A70-27610
- Ferritic and martensitic Fe-Ni alloys lattice parameter determined by standard X-ray techniques
12 p2256 A70-27613
- Superplastic nickel superalloys fabrication by controlled densification during direct extrusion
12 p2257 A70-28020
- Ni-Fe alloy sheets magnetic shielding effectiveness correlated with DC magnetic properties at various frequencies
12 p2201 A70-28127
- Ni-Mo-Fe magnetic alloy for EM pulse shielding, verifying saturated regions diffusion theory
12 p2201 A70-28128
- Collection of papers on nickel and nickel alloys covering thermal and mechanical properties during annealing and precipitation hardening behavior
13 p2432 A70-28758
- Ni and Ni alloys thermal properties, discussing expansion and conductivity, melting and boiling points, vapor pressure, specific heat, entropy, etc
13 p2432 A70-28759
- Ni and Ni alloys elastic properties relationship with ferromagnetic and magnetostriction effects, determining modulus of elasticity for wide temperatures and heat treatment
13 p2432 A70-28760
- Deformation, mechanical properties and processes during recrystallization annealing of nickel and alloys single crystals
13 p2433 A70-28761
- Ni alloys hardening by solid solution precipitation and insoluble particles dispersion, emphasizing heat resistant alloys and mechanical properties
13 p2433 A70-28762
- Phase transformations in TiNi with equiatomic composition, using internal friction, electrical resistivity and dilatometry
13 p2435 A70-29499
- Ni-Fe base superalloy notch and rupture properties as function of thermal and chemical changes, using electron microscopy
13 p2437 A70-29829
- Short term creep of Ni in vacuum, stationary air and high speed air flow at various temperatures and loads
14 p1594 A70-30167
- Fine grained structure effect on steels and Ni alloys short term heat resistance at high temperatures
14 p1594 A70-30168
- Growth kinetics of strengthening phase during aging of Ni-Cr-W-Mo-Al-Ti alloys, considering gamma prime particles at different Al/Ti ratios
14 p1594 A70-30169
- Metallic thermoelectric materials, measuring electrical resistivities and Seebeck coefficients of binary Ni alloys
14 p2533 A70-30530
- Carrier distillation DC arc emission spectrography, determining lead, bismuth and tin traces in nickel base alloys after conversion to oxides
14 p2546 A70-30957
- Hydrogen embrittlement of martensitic Fe-Ni alloys as function of temperature via slow strain rate tensile tests
15 p2755 A70-31559
- Portevin-Le Chatelier effect in carburized nickel and Ni-Co alloys, discussing carbide stability and carbon diffusion roles
15 p2756 A70-31562
- High temperature oxidation of Ni-Cr alloys and stainless steels in molten salt, observing grain boundary corrosion with electron probe
15 p2757 A70-31875
- Superalloys commercial development, investigating strength, heat resistance and weldability of Fe- and Ni-based alloys
15 p2760 A70-32335
- Glass bead blast induced residual stress and surface cold work effects on Ni base superalloy fatigue crack initiation and propagation
15 p2761 A70-32381
- Cellular precipitation in laminar eutectic and cast Ni-Cr alloys
15 p2761 A70-32383
- Fe-Ni-P phase diagrams for high temperatures, providing phase equilibria data for Widmanstatten pattern in iron meteorites
15 p2762 A70-32391
- Composition and heat treatment effects on Fe-Ni alloys structure, using micrographic, autoradiographic and potentiokinetic methods
16 p2916 A70-33080
- Quench hardening and Ni content relationship in Ti-Ni intermetallic compounds, investigating heat treatment effect on mechanical properties
16 p2930 A70-33084
- Physical properties and structure of Cr-Ni austenitic stainless steels with high Mn and N content as function of temperature
17 p3125 A70-35143
- Two-component metal coatings on Ni alloys for gaseous corrosion resistance increase, comparing microstructure and properties
17 p3125 A70-35393
- Ni alloys with protective coatings for gas turbine blades, testing corrosion resistance in diesel fuel combustion products with intermittent salt water sprays
17 p3125 A70-35394
- Martensitic phase change effects in TiNi on ultrasound waves propagation in transition region, using pulse echo measurements
17 p3126 A70-35603
- Microstructural changes of Ni-Cr lamellar eutectic alloy during creep deformation at 625 and 760 C
18 p3272 A70-36034
- Sodium sulfate induced accelerated oxidation of Ni and superalloys, investigating thermodynamics and reaction mechanism
18 p3272 A70-36037
- Cr-Ni system activities and phase boundaries determined by solid electrolyte technique
18 p3273 A70-36040
- Ni-Al-Nb superalloy, determining temperature effect on phase relationships in Ni-rich portion of phase diagram
18 p3273 A70-36041
- Mechanical properties of binary Ti-Ni and ternary Ti-Mo-Ni alloys
18 p3275 A70-36122
- Magnetometric, dilatometric, pyrometric and X ray studies of phase transformations in Fe-Ni alloys, considering magnetic characteristics and formation of superstructures
18 p3276 A70-36207
- Fe diffusion in equiatomic Ni-Co alloy, using thin radioactive deposit method with tagged element Fe 59
18 p3277 A70-36440
- Papers on cracking during postweld heat treatment of Ni alloys covering Rene 41 mechanical properties and resistance to strain age cracking
18 p3277 A70-36522
- Oxygen role in crack initiation and growth in Ni alloys postwelding heat treatment
18 p3277 A70-36525
- Ni superalloys for gas turbine engines, discussing chemical composition, microstructure, strength, solidification, etc
18 p3278 A70-36831
- Superlattice stacking faults in plastically deformed nickel aluminate /gamma prime phase/ due to interaction of antiphase boundary /APB/ type dislocation pairs
19 p3451 A70-37704
- High vacuum effects on creep properties of single crystal low carbon nickel base superalloy
19 p3451 A70-37705
- Plastic deformation in Ni-Cr-Nb alloy precipitation hardened at different long terms of high temperature
19 p3451 A70-37706
- Dispersion strengthened Ni-Cr alloys creep properties, investigating temperature, applied stress and thorium dioxide particles effects
20 p3644 A70-38984
- Ni-Cr heat resistant alloys structural transformation kinetics under aging, creep and operational conditions, discussing solid solution decomposition, hardening phases coagulation and dissolution, etc
20 p3645 A70-39037
- Solidification and composition model of macroscopic freckles in nickel base superalloys single crystals
20 p3646 A70-39101
- Duplex eutectic with Ni-Be fibers embedded in Ni-Cr solid solution matrix, discussing solidification conditions, optimum composition, heat treatment, mechanical properties and oxidation
20 p3647 A70-39107
- Hot corrosive environment effect on stress rupture and fatigue strength of Ni heat resistant alloy used in gas turbine rotating blade
20 p3647 A70-39241
- High temperature Ni base superalloy stress-rupture life dependence on casting variables and section size
20 p3648 A70-39413
- Creep resistant Ni-base superalloys ductility and thermal shock resistance improvement by precision casting technique, producing columnar grain and single crystal structures
20 p3648 A70-39415
- Ni base alloys sulfidation kinetics, examining roles of sodium/sulfur compounds-substrate interactions in accelerated oxidation
20 p3651 A70-40072
- Solid state butt and lap joint welding of TD-nickel bar, evaluating performance by stress rupture and shear tests
21 p3832 A70-40790
- Ni-Nb-Mo, Ni-Nb and Ni-Mo alloys phase equilibrium
21 p3840 A70-41898
- Ni-Cu-C solid solutions, measuring temperature dependence of graphite solubility by vapor transport method
21 p3841 A70-42149
- Stacking faults in gamma prime precipitation hardened high temperature Ni base alloys, relating fault energy to strength
22 p4053 A70-42728
- Grain boundary damping characteristics of Cu-Ni alloys solid solutions, discussing height, temperature and activation energy of solute peak
22 p4053 A70-42729
- Ni base superalloy for gas turbines, describing heat treatment for precipitation hardening
22 p4055 A70-43099
- Electro-thermal-mechanical switches based on shape-memory effect in Ti-Ni alloys
22 p3965 A70-43330
- Fatigue of turbine blade stainless steels and nickel alloys as function of temperature, stress and surface layers
23 p4205 A70-44135
- ICAS PAPER 70-38]
23 p4207 A70-44423
- Ni base superalloys gamma prime phase long range order parameter measured by X ray diffraction
23 p4207 A70-44423
- Columnar grain and Ni alloy single crystal gas turbine engine components resistant to high temperatures

NICKEL CADMIUM BATTERIES

produced by precision casting, using directional solidification 23 p4207 A70-44857

Ni-Fe-Cr-Nb alloy, investigating precipitation hardening of Ni3Nb phases by transmission electron microscopy 24 p4357 A70-45226

Fe-Ni alloy plastic flow behavior during reversible austenite-martensite transformation under constant load 24 p4357 A70-45228

Eutectic NiAl-Cr alloys, investigating quaternary additions effect on rod-plate transition to faceted microstructure 24 p4359 A70-45244

Prestraining effect on cellular precipitation in Ni-Cr lamellar eutectic during creep testing 24 p4359 A70-45247

Stress dependent creep rate in nickel based superalloy single crystals 24 p4359 A70-45289

Ni-Nb-W and Ni-W alloys phase equilibrium, obtaining diagrams from analysis of liquid and solid phases separated electromagnetically before tempering 24 p4359 A70-45372

Notch sensitivity dependence on plastic strain in Al alloy, heat resistant steels and Ni alloys under tensile tests at room temperature 24 p4360 A70-45827

High purity Cr-Ni heat resisting steels, investigating phase transformations with microhardness measurements magnetic analysis, X ray diffraction and microstructure examination 24 p4362 A70-46181

Fe-Ni-Co martensitic alloys isothermal age hardening, comparing bcc phase energy parameters of binary systems 24 p4362 A70-46182

NICKEL CADMIUM BATTERIES

Sealed Ni-Cd aerospace battery design, discussing recombination of gases produced during prolonged overcharging at low temperature, separator material, plate balance, etc 05 p0798 A70-16096

Nickel-cadmium batteries rapid deterioration due to destructive demand pulse charging methods 08 p1439 A70-20706

Flexible nickel cadmium secondary battery as nocturnal power supply for meteorological balloons transceiver and measuring instruments 08 p1440 A70-20711

Lead-acid and vented nickel cadmium batteries compared in redesign of military aircraft battery for cells reduction, low current density, etc 08 p1440 A70-20712

Nickel cadmium battery for aircraft jet engine starting, discussing selection for optimum service life and reliability under maintenance and environmental conditions [SAE PAPER 700211] 11 p1980 A70-25883

Generator regulator for Ni-Cd batteries capable of sensing temperature, reducing charge rate and limiting output to increase batteries life [SAE PAPER 700212] 11 p1983 A70-25884

Nickel cadmium battery construction capabilities and limitations from design engineer and aircraft operator viewpoint [SAE PAPER 700227] 11 p1983 A70-25898

Large capacity sealed nickel cadmium battery for spacecraft, describing mechanical and electrical characteristics 16 p2844 A70-33473

Ni-Co aerospace batteries thermal and mechanical design for orbiting space vehicles 21 p3757 A70-41012

Ni-Cd cell plates screening and selection by weight for reliability and uniformity improvement 21 p3760 A70-42147

Sealed Ni-Cd cells, investigating carbonate effect on performance 22 p3965 A70-43535

Military sealed thin sintered plate Ni-Cd rechargeable batteries, comparing performance with other systems 22 p3966 A70-43538

NICKEL COATINGS

Residual stress of electroless nickel deposits on beryllium from bow deformation measurements, noting role of phosphorus content 19 p3451 A70-37708

NICKEL COMPOUNDS

NT NICKEL OXIDES

NT SCHREIBERSITE

Quantitative method developed for photometric determination of B in nickel or titanium borides, using magnezon I reagent in alkaline solutions at various pH 03 p0504 A70-12983

Nickel chromite structural changes, thermal conductivity and dilatation during tetragonal-cubic transition, noting phonon-lattice effect 13 p2437 A70-28855

Weak itinerant ferromagnetism theory for Ni-Ga and Ni-Al intermetallics, allowing for molecular field parameter magnetization dependence 22 p4087 A70-43197

Electrochemical properties of sintered and film nickel hydroxide electrodes 22 p3966 A70-43542

NICKEL ISOTOPES

Pionic transition in Ni isotopes to measure nuclear interaction effects, observing level shift and broadening 05 p0885 A70-16682

NICKEL OXIDES

High temperature scaling of Ni, investigating role of oxide microstructure and growth stresses 15 p2762 A70-32388

NICKEL PLATE

Cu, W and oxidized W adhesion to Ni surface, examining before and after adhesion contact with low energy electron diffraction [ASLE PREPRINT 69-LC-13] 02 p0318 A70-12535

NICKEL STEELS

Dimensional stability of nickel maraging steel at ambient temperature measured for applications as gage block materials 01 p0120 A70-10742

Chromium-nickel steel fatigue strength under repeated thermal cycles, showing dependence on long term fatigue buildup and single cycle fatigue damage effects 02 p0383 A70-11653

Fe-Cr-Mn-Ni system studied to obtain high Mn austenite and establish boundaries in quaternary system 03 p0509 A70-13278

Niobium addition effect on alpha-gamma transformation temperature during continuous cooling of low carbon Ni-Cu steel 04 p0706 A70-15134

Initial oxide film on Cr-Ni steel at high temperatures observed by electron microscope, noting Ni role 04 p0708 A70-15311

Mechanical properties of nickel steels with carbon after suitable heat treatment found similar to high strength nickel steels properties without carbon 05 p0865 A70-16875

Energy dissipation in heat resistant Ni steels under cyclic tension and compression at room temperature 08 p1516 A70-20981

Ultrahigh strength Ni steels fracture toughness analysis, studying effects of chemical composition, yield strength, air melting, vacuum melting, etc 09 p1701 A70-22552

Thermal treatment function of austenitic grain size and mechanical properties of 18 pct Ni maraging steels 09 p1704 A70-22803

Phenomenological properties of stress relief embrittlement in nickel steel, noting toughness recovery via retempering 11 p2059 A70-25665

Low carbon Ni steels isothermal transformation characteristics, observing equiaxed ferrite and Widmanstätten and bainitic structures at various temperatures 12 p2256 A70-27615

Charpy V notch and dynamic tear tests compared for fracture toughness characterization of Ni-Cr-Mo-V steel 14 p2596 A70-30931

Hot rolling and warm working effects on microstructure and mechanical properties of Ni-Cu-Cb steel, noting optimum austenite plus ferrite phase field 15 p2756 A70-31566

Structure and chemical composition of high Cr diffusion coating on Cr-Ni austenitic steels 15 p2756 A70-31634

Preprecipitation and reversion stages in Ni-Co-Mo steel, observing dislocation nucleated phase growth initiation by aging 16 p2929 A70-33047

Structural hardening of nickel maraging steels related to Portevin-Le Chatelier effect in necking zone of stress-strain curves 17 p3124 A70-35141

Impact transition behavior and strength-toughness relation of high purity Ni maraging steels, noting intergranular fracture at grain boundaries 18 p3273 A70-36043

Chromium-nickel steel fatigue strength under repeated thermal cycles, showing dependence on long term fatigue buildup and single cycle fatigue damage effects 19 p3547 A70-38426

High strength high Ni maraging steels crystal structure, alloying elements effects on mechanical properties, applications, etc 22 p4055 A70-43121

NICKEL ZINC BATTERIES

Nickel zinc secondary battery low cost and high performance in military applications, discussing maintenance and rapid recharge requirements 08 p1440 A70-20710

Ni-Zn high energy secondary battery cycle life and discharge capability 22 p3966 A70-43540

NICOTINAMIDE

Nicotinamide adenine dinucleotide (NAD)/deamination and role of nicotinamide hypoxanthine dinucleotide (deamino-NAD) in forming ammonia from amino acids in rats/rabbits brain and liver tissue 01 p0018 A70-10505

Nicotinamide adenine dinucleotide phosphate (NADP)/specific isocitrate dehydrogenase (ICDH)/inactivation from obligate halophile at low NaCl levels 15 p2685 A70-32671

NIGHT

Positive ion concentration profiles in lower nighttime midlatitude ionosphere calculated from corpuscular radiation measurements and ion recombination constants 04 p0738 A70-14436

Nighttime radio wave absorption in ionosphere during moderate solar activity based on echo observations 06 p1056 A70-17840

Nighttime recombination model of O ion plasma in upper ionosphere, showing temporal behavior and variation of electron concentration 07 p1265 A70-19432

Geomagnetic field orientation effects on VLF nighttime propagation, checking computer program predictions 09 p1639 A70-23664

Positive ion concentration profiles in lower nighttime midlatitude ionosphere calculated from corpuscular radiation measurements and ion recombination constants 13 p2475 A70-28461

Electro-optical sensor night time capabilities with laser illuminator, determining current per unit area from photocathode 16 p2907 A70-33183

Nighttime recombination model of O ion plasma in upper ionosphere, showing temporal behavior and variation of electron concentration 18 p3249 A70-36906

Intermode coupling processes in nighttime D and E regions, using thin film optical method for propagation phenomena at LF and VLF 19 p3413 A70-38003

Aircraft nighttime and daytime accident rate comparison, considering darkness, flight phase, etc 21 p3751 A70-41489

NIGHT AIRGLOW

U AIRGLOW

U NIGHT SKY

NIGHT E LAYER

U E REGION

U NIGHT SKY

NIGHT F LAYER

U F REGION

U NIGHT SKY

NIGHT SKY

Far IR night sky emission above 120 km over millimeter range, using rocket-borne telescope 01 p0069 A70-10040

Nighttime F layer thickness relations to atmospheric temperature 01 p0078 A70-11211

Quasi-trapped particle currents having discontinuities on daytime and nighttime side of earth 01 p0171 A70-11487

Pc 1 range geomagnetic pulsation sweepers (MHD waves)/event in evening sector, considering delay time between sweepers appearance and polar magnetic storms onset 02 p0290 A70-12121

Night airglow emission intensities during IQSY concerning Na, OH and H alpha lines compared with intensities during IGY 02 p0292 A70-12433

Stellar X ray effect on nighttime lower ionosphere wave reflection suggested from VLF propagation data 03 p0562 A70-14224

Excitation of H-alpha and H-beta lines in night sky, calculating solar L radiations variation with altitude 04 p0679 A70-15075

Evening time latitudinal distribution of polar magnetic field perturbations compared with nighttime distribution, indicating evening electrojets 04 p0684 A70-15751

Compact and fully automatic fixed photometer for zenith measurements of night airglow intensities, calibrating sky observation through filter by constant intensity light source 05 p0845 A70-15821

Night airglow variations observed during Cosmos satellite orbits, determining atmospheric albedo wavelength dependence for solid and medium cloudiness and clear skies 05 p0841 A70-16728

D region electron density distribution during night and presunrise period, using full wave integration method for propagation parameters for waves reflected from electron density model 06 p1054 A70-17587

Ray tracing techniques applied to night sky wave medium frequency propagation, modifying program for absorption and polarization coupling losses 07 p1230 A70-19164

Ionospheric reflection coefficients from vertical and oblique incidence pulse amplitude data, discussing night conditions effect on Ottawa pulse transmissions 07 p1232 A70-19176

Nighttime ionospheric F region velocity component and recombination coefficient computer calculation 07 p1277 A70-20449

Spectral intensity distribution of night airglow noting visual spectra distribution difference from G2 stars 07 p1277 A70-20457

Excessive absorption in night E layer with and without geomagnetic disturbances for almost complete solar cycle, discussing winter increases/anomalies/ 09 p1669 A70-23170

Astronomic observation balloon Thisbe, discussing telescope, stabilization, basket control, data processing and objectives including zodiacal light and night sky brightness measurements 10 p1804 A70-23915

Nighttime concentration profiles of O, NO and molecular oxygen ions in ionosphere calculated from daytime values 10 p1874 A70-24428

Night time upper atmosphere light phenomena and Tungusk meteorite observed on 30 June 1908 10 p1876 A70-24499

Field-aligned plasma velocity dependence on plasma diffusion and wind velocity illustrated with model of night F 2 layer 10 p1881 A70-24814

Nocturnal E layer electron density profile dependence on solar activity 10 p1885 A70-25265

Nocturnal F layer electron density profile and temperature dependence on solar activity 10 p1885 A70-25266

Night sky X ray sources at low galactic latitudes, describing rocket survey experiment 12 p2292 A70-27386

Topside ionosphere nighttime structure over Japan deduced from Alouette 2 satellite plasma frequency measurements 12 p2226 A70-28063

Terrestrial ELF waves F layer nighttime reflections, discussing effects of electron density, geomagnetic field radial component and absorption by ions 13 p2365 A70-29190

Earth-ionosphere waveguide electric field strength calculation based on nighttime ionospheric models, comparing results to measurements 14 p2574 A70-30748

Lower ionospheric drift motions observed from VHF radio signal, relating to three paths near auroral zone during dark hours 14 p2574 A70-30749

Evening time latitudinal distribution of polar magnetic field perturbations compared with nighttime distribution, indicating evening electrojets 14 p2576 A70-30835

Night airglow space and time variations from jet aircraft observations, measuring conjugate enhancements 14 p2580 A70-31266

Night sky atmospheric continuum, zodiacal light and OI line observations with photoelectric color telescope 14 p2581 A70-31268

Hydrogen UV geocorona photoionizing effect on nighttime E region electron density in low and midlatitudes, comparing with ionosonde data 14 p2581 A70-31270

Night sky visible brightness at minus 19 degrees declination from July 1965-June 1966 in Tsumeb, South West Africa 14 p2581 A70-31390

Earth-ionosphere cavity resonances diurnal variations by considering different propagation characteristics at day and night hemispheres 15 p2728 A70-31910

Night sky brightness in UV and visible region by photoelectric photometers on Cosmos 51 and 213 satellites 17 p3163 A70-34901

Night F 2 layer underside morphology for magnetically quiet period at sunspot minimum 17 p3076 A70-34937

Nighttime E region structure variations observed by Wallops Island rocket flights, obtaining electron density profiles by Langmuir probe during ascent 17 p3076 A70-34941

Nighttime E region molecular ion production rate estimation, taking into account windshear effect 18 p3245 A70-36022

Submillimeter wavelength night sky radiation background, observing effects on various cosmic ray phenomena 18 p3308 A70-36330

Night airglow hydroxyl rotational brightness temperature determined from emission spectra 19 p3412 A70-37777

Night airglow oxygen red lines predawn enhancement calculations, confirming role of photoelectrons from magnetic conjugate ionospheric

Seasonally biased electron density enhancements in nighttime response of topside ionosphere to magnetic storms 20 p3621 A70-39342

Nighttime lightning activity observations by orbiting solar satellite OSO-B, determining thunderstorms positions by optical radiation detection 20 p3623 A70-39978

Anomalous nighttime ionospheric total electron content increases seasonal and solar cycle dependences attributed to ionization sources due to electrodynamic drifts 21 p3815 A70-41061

F 2 layer nighttime ionization at mid-latitudes, investigating conjugate point effects on observation point 23 p4188 A70-44055

E region ion composition nighttime variations, examining nitrogen monoxide and O ion nonequilibrium concentrations by ionic-molecular reactions 23 p4189 A70-44074

NIGHT VISION

RF holographic vision through rain, fog or darkness, discussing cholesterol ester-coated Mylar sheets and pyroelectric hot plates detectors and antenna sensory matrix 02 p0305 A70-12843

Landing performance of BLEU static cockpit simulator compared with flight data for night conditions in clear and limited visibility 10 p1859 A70-24215

Night vision systems with integrated pulse gated viewing and laser ranging, analyzing transmitter and viewer 12 p2236 A70-27902

Oxygen effect on night vision tested in men at 5,000 ft above sea level, obtaining threshold curves of dark adaptation 13 p2359 A70-29443

Imaging type electro-optical detection systems design for passive night surveillance, building camera system and testing in helicopters and fixed wing aircraft 16 p2903 A70-33127

Illumination level and contrast loss distribution in atmosphere to evaluate passive night vision equipment with image intensifier tubes 16 p2907 A70-33184

Aircraft pilot and nonpilot night vision adaptation comparison, using Goldmann-Weekers adaptometer 17 p3038 A70-35138

Scotopic responses conditions, using stimulus alternation method to elicit electroretinogram 17 p3034 A70-35897

NIGHTGLOW

Oxygen collisional quenching rate in F region determined by comparing nightglow intensities with intensities calculated from electron density profiles 01 p0070 A70-10403

Twilight and nightglow measurements with stratospheric balloons, discussing use for upper atmosphere exploration, meteoric influence and French network 01 p0079 A70-11217

Predawn enhancement of emission rate of 6300 A forbidden O I line in nightglow spectrum, discussing onset time 07 p1275 A70-20286

Excitation and layers heights for 5577 A and O2 bands of atmospheric and Herzberg systems in night airglow estimated, suggesting Chapman reaction for emission 08 p1492 A70-21755

Summertime midnight airglow enhancement of 6300 A line by sensitive continuum compensating photometer, suggesting F 2 region electron density increase for emission 12 p2225 A70-27895

F region nightglow emissions rocket data, discussing rate coefficient for oxygen atoms quenching by molecular nitrogen 13 p2398 A70-29200

Nightglow OI lambda 6300 line width measurements during magnetic storm, discussing temperatures and intensity variations 14 p2579 A70-31250

Tropical UV nightglow, considering oxygen ion-ion neutralization reaction as primary source 18 p3244 A70-36015

Lyman alpha geocoronal emission rate as function of altitude at midnight during solar minimum, solving radiative transfer equations 20 p3619 A70-39329

Tropical UV nightglow measurement by Ogo-4 spectrometer, considering ionospheric recombination excitation mechanism 20 p3620 A70-39338

UV oxygen nightglow observation by OGO-4, examining ion-ion neutralization and radiative recombination production mechanisms 20 p3621 A70-39344

Nightglow Na D line excitation rate in winter and summer 21 p3814 A70-40934

Auroral UV night airglow radiation distribution over latitude range, using scanning spectrometer onboard Convair 990 aircraft 21 p3818 A70-41106

Nighttime equatorial E region small scale irregularities detected by rocket-borne Langmuir and plasma noise probes, discussing generation mechanism 22 p4018 A70-43108

Nightglow Na-D lines excitation, attributing emission to Chapman mechanism 22 p4023 A70-43294

F region night airglow in equatorial and midlatitudes, discussing red and blue emission origins 23 p4185 A70-43839

NIMBOSTRATUS CLOUDS

Refractive index complex part effect on polarization and radiance of reflected and transmitted light for continental haze and nimbostratus cloud models 21 p3847 A70-41724

NIMBUS CLOUDS

U NIMBOSTRATUS CLOUDS

NIMBUS SATELLITES

NT NIMBUS 2 SATELLITE

NT NIMBUS 3 SATELLITE

NT NIMBUS 4 SATELLITE

TIROS, Nimbus, ESSA and ATS weather satellites configurations, onboard equipment and cloud photographs 09 p1765 A70-22227

Nimbus high resolution IR radiometer (HRIR) data processed by color display enhancement system, demonstrating meteorological, oceanographic and geomorphological applications 11 p2049 A70-25636

Nimbus weather satellite as laboratory for sensors collecting data for global weather system, describing launching, attitude control systems and cameras 14 p2654 A70-31149

Solid lubricated contacts performance in Nimbus and OAO spacecraft, discussing slip ring assembly and noise problems in Ag-graphite brushes 16 p2920 A70-33810

Nimbus weather satellites mechanical devices and subsystems, including solar array drive, fluid thermal control sensors, horizon scanners and hydraulic dampers 16 p2921 A70-34105

Tracking and data relay satellite system performance by ATS and Nimbus spacecraft for range and range rate tracking and command and data transmission [ALAA PAPER 70-1306] 24 p4374 A70-45949

NIMBUS 2 SATELLITE

Ocean currents and sea surface temperature remote sensing by Nimbus 2 High Resolution IR Radiometer 24 p4332 A70-46400

NIMBUS 3 SATELLITE

Nimbus 3 satellite carrying IR spectrometer to measure spectral radiances and retrieve atmospheric temperature profiles 04 p0675 A70-14393

SNAP 19 radioisotope fueled thermoelectric power supply orbital performance on Nimbus 3, ascribing power output decrease to decreasing generator output currents [ALAA PAPER 70-480] 11 p2120 A70-25435

Meteorological Nimbus 3 satellite and aircraft observations of thermal radiation for vertical atmospheric temperature profile measurement 11 p2075 A70-25921

Michelson IR interferometer spectrometer /IRIS/ design calibration and performance onboard Nimbus 3 satellite, demonstrating data reduction and inflight calibration 20 p3626 A70-39078

Temperature and height data for synoptic stratospheric evaluation, using Nimbus 3 satellite IR spectrometer 22 p4064 A70-42618

Thermal emission spectra of earth and atmosphere from IR Michelson interferometer onboard Nimbus 3 satellite 24 p4330 A70-45977

NIMBUS 4 SATELLITE

Atmospheric temperature profiles using Nimbus 4 selective chopper radiometer 23 p4192 A70-44865

Earth and atmosphere thermal emission spectra via Nimbus 4 Michelson interferometer, obtaining atmospheric temperature, humidity and ozone profiles 23 p4192 A70-44866

NIMONIC ALLOYS

Nimonic Ni-Cr based alloys fracture characteristics used to determine temperature and time effects on equicohesive points positions 01 p0116 A70-10073

Gamma prime phase structure ordering effect on critical shear stresses of aging Ni-Al alloys and nimonic 09 p1707 A70-23195

Massive eutectic and fine gamma phases precipitation in cast nimonic 100 alloy at 900 C aging 16 p2930 A70-33083

NIMPHE [ENGINE]

Wrought Nimonic alloy, measuring stress redistribution due to creep under variable load and temperature

23 p4274 A70-44911

NIMPHE [ENGINE]

U HYDRAZINE ENGINES

NIOBATES

Nonlinear optical properties of lithium niobate single crystals, considering optically induced index inhomogeneity and second harmonic generation

01 p0157 A70-10422

Birefringences and phase retardations in lithium niobate crystals for light propagation directions near optical axis, considering electro-optic modulation

02 p0313 A70-12451

Alkali-alkaline earth niobates phase equilibrium study revealing tetragonal tungsten bronze-type solid solutions existence range

09 p1740 A70-22983

Intense light effect on refractive index of potassium niobate crystals

09 p1698 A70-23317

Optical parametric noise from barium sodium niobate crystal pumped at 4358 Å by compact source mercury lamp

22 p4074 A70-34022

Far field diffraction spreading of surface acoustic waves on cut Li-niobate in two directions

23 p4230 A70-44199

NIOBUM

Disk-shaped Mo and Nb specimens solar radiation reflection and absorption characteristics observed for temperature effect

01 p0117 A70-10176

Ti, Zr and Nb characteristics, processing procedures and applications in corrosive environments, nuclear reactors and aerospace structures

02 p0319 A70-12710

Carbon effect on high temperature elasticity modulus and long term hardness of Nb, indicating diffusion enhancement and counteractive Zr addition

03 p0509 A70-13252

Residual stress distribution in butt joints during welding of sheet Nb measured by extensometer, noting annealing temperature effect on stress relieving

03 p0513 A70-14072

Niobium powder hot pressing compaction in terms of porous body volume viscous flow, determining viscosity shift time dependence

04 p0696 A70-14461

Niobium addition effect on alpha-gamma transformation temperature during continuous cooling of low carbon Ni-Cu steel

04 p0706 A70-15134

Creep in single crystal and polycrystalline Nb between 1300-1900 C under stresses, showing stress independent activation energy

05 p0862 A70-16202

Recrystallization annealing third stage of cold worked polycrystalline niobium by measuring electrical resistance at liquid nitrogen temperature

05 p0863 A70-16204

Strength and plasticity of Mo and Nb sheet in oxidizing medium at high temperatures and pressure range

05 p0865 A70-17029

Structure and interstitial impurities effects on Nb modulus of elasticity at normal and high temperatures, noting rolling

05 p0866 A70-17040

Niobium single crystals annealed in ultrahigh vacuum, studying stress-strain behavior, secondary slip geometry and slip line morphology

06 p1090 A70-18493

Oxide transformation during oxidation of Nb in terms of O diffusion

07 p1305 A70-18967

Interstitial atoms effect on dislocation relaxation and aging of Mo and Nb single crystals

07 p1309 A70-19638

Dislocation velocity-stress exponent for Nb single crystals calculated from strain rate sensitivity measurements of effective flow stress

07 p1314 A70-20011

Transverse and longitudinal resistive critical fields of Nb wires, discussing superconductivity in dislocation cell walls created by drawing or swaging

09 p1704 A70-22802

Tensile strain rate and oxygen concentration effects on peaks of niobium hardening zones involving interstitial atoms

12 p2252 A70-27001

Residual gas effects on critical load and brittleness of pure and molybdenum-coated niobium bars after annealing in vacuum

12 p2258 A70-28324

Sintering processes using boundary porosity in welded Nb bicrystal for model of final stages

13 p2434 A70-29081

Hydrogen impurities anelastic relaxation effect on internal friction alpha peak in cold worked tantalum and niobium

13 p2435 A70-29350

Upper critical field dependence on s- and p-wave scattering of Frenkel effects in electron irradiated niobium

13 p2471 A70-29535

Nb single crystal faces electron work functions and comparison of thermionic emission patterns with Ba-Nb system

14 p2625 A70-30162

Twinned lamella formation in Nb single crystals, examining slip and shear roles in surface tilt formation

15 p2761 A70-32382

Carbon effect on high temperature elasticity modulus and long term hardness of Nb, indicating diffusion enhancement and counteractive Zr addition

19 p3453 A70-38470

Nb effects on steel susceptibility to brittle fracture at various temperatures, discussing impact strength and nucleation energy of crack formation

19 p3453 A70-38709

Alumina effects on Nb creep activation energy at elevated temperatures, noting independence from chemical composition and creep stresses

19 p3453 A70-38710

Niobium yield stress at room temperature for various nitrogen and oxygen concentrations

19 p3454 A70-38814

Nb single and polycrystalline thermal properties at high temperatures

20 p3648 A70-39639

Orientation and applied stress effects on pure Nb-6W bcc single crystals yield stress, discussing thermal activation strengthening and crystal dislocations

22 p4052 A70-42318

Thermal decomposition of freeze dried Ta and mixed lithium-niobium oxalate, using surface area and electron micrographs

24 p4363 A70-46212

NIOBUM ALLOYS

Tensile tests of polycrystalline Nb-H alloys at low temperatures, noting cooling rate effect on ductility in terms of microstructure

01 p0122 A70-11240

Nb-Mo alloys in various proportions prepared by vacuum casting, showing embrittlement under hydrogen atmosphere

02 p0318 A70-12671

Nb-NbH solid solutions thermodynamic properties at various temperatures described by formulas

02 p0320 A70-12819

Superconducting properties of polycrystalline disordered cold worked Nb-Ti-V alloys showing unexpected sensitivity to fast neutron irradiation

03 p0508 A70-13144

Nb binary and tertiary alloys density changes found proportional to alloying element content

03 p0511 A70-13489

Niobium ditelluride single crystals production with purity dependent on initial materials, discussing X ray structural and chemical analysis and electrical properties

03 p0542 A70-13753

Nb-Mo alloy interstitial oxygen concentration determined by measuring internal friction /Snoek/ peak

03 p0512 A70-13763

Stress rupture tests with Nb-based alloys in 1273-1673 K temperature range

05 p0952 A70-17039

Refractory Nb alloy low cycle fatigue characteristics in vacuum at high temperatures, describing testing machine

06 p1086 A70-17453

Book on optimization by variational methods covering use of differential equations, Pontryagin minimum principle, optimal and feedback control, dynamic programming, etc

06 p1093 A70-17650

Deformation pattern, interstitial impurities and alloying elements effects on temperature dependence of elasticity modulus of Nb and alloys

06 p1088 A70-17659

Structure, phase composition and heat resistance of diffusion layers obtained by surface alloying of Nb alloy with Cr, Ti and Si

06 p1089 A70-17744

High melting point oxides effects on niobium alloys recrystallization temperature and grain growth

07 p1303 A70-18741

Oxygen content influence on Nb-Mo alloy mechanical properties at ambient temperature in air and hydrogen

07 p1307 A70-19374

Silicide-coated columbium alloys reuse capabilities under flight conditions, considering coating local damage and emittance

[AIAA PAPER 70-279]

07 p1315 A70-20388

Interstitial sinks effect on structure and creep behavior of dispersion-strengthened Nb base alloy

08 p1521 A70-21703

Recrystallization in austenite phases of vanadium and columbium HSLA steel alloys determined in high temperature deformation tests

08 p1521 A70-21704

Vacuum rolling of high strength hard-workable dispersion-hardened Nb base alloys excluding recrystallization

09 p1692 A70-22756

Phase equilibrium diagram and heat resistance of Ti-Al-Nb alloys along radial section by thermal and microstructural analysis

09 p1709 A70-23789

Nb and Nb alloys activation in polarized light by etching technique, observing grain contrast improvement

10 p1906 A70-25229

Ni-Nb-O system state diagram by reduction equilibria and X ray analysis, discussing oxidation resistance based on metal surface protective layers makeup

12 p2253 A70-27158

Superconducting thin films of beta-tungsten structure Nb-Al-Ge compound, discussing high purity sputtering preparation techniques and properties in magnetic fields

12 p2285 A70-27259

Nitrogen solubility in Nb-Mo solid solutions, determining relationship between N partial pressure, temperature and concentration

14 p2598 A70-31285

Yield strength of Nb-O single crystal solid solutions as function of temperature

15 p2763 A70-32808

Optical properties of electropolished cubic Nb-Ti alloys at cryogenic and room temperatures in visible and near IR spectral range

16 p2930 A70-33205

Working fluid /Ar/ purity and stability effects on fatigue life and creep of Nb and Mo alloys using gas analysis, microstructure and microhardness data

17 p3126 A70-35715

Omega transformation in Hf-Nb alloys, investigating aging at various temperatures

18 p3273 A70-36044

Cross sectional phase diagram of Nb-Ti-Mo-V, discussing continuous crystallization and composition dependent hardness and resistance

18 p3275 A70-36125

Nb-based Ti-Zr alloy surface phase recrystallization characteristics, using field emission microscope

18 p3276 A70-36309

Superconducting Nb-Ti-Zr alloy, investigating structure and decomposition at high temperatures by X ray and electron microscopy

18 p3276 A70-36310

Nb-Sn superconductors multiphase structure with three intermetallic phase, constructing diagram based on phase stability and composition

18 p3299 A70-37221

Age hardening of Nb-Hf-C alloys investigated by metallography and X ray diffraction, discussing tests in various temperature ranges

19 p3452 A70-37826

Oxygen solubility in Nb-Hf alloys at elevated temperatures, using isothermal sections for Nb-rich part

19 p3453 A70-38708

Ti-Nb-Zr alloys strength and plasticity at various temperatures, noting compositional effects on tensile and yield strength

19 p3453 A70-38712

Binary Nb vapor systems mutual diffusion coefficients concentration and temperature dependences, discussing interatomic bonds and melting point of alloys

19 p3454 A70-38715

Yield stress in electron beam-refined Nb-N solid solution at room temperature and specific strain rate range

19 p3454 A70-38813

Mo alloying additions effects on carbide phases in Nb-C alloys

20 p3646 A70-39104

Nb-Ta and Nb-Mo alloys single crystal solid solution strengthening as function of composition, temperature and strain rate

20 p3646 A70-39105

Ni-Nb-Mo, Ni-Nb and Ni-Mo alloys phase equilibrium

21 p3840 A70-41898

Nb-Zr thin films superconducting properties dependence on deposition temperature and rate and substrate material

22 p4085 A70-42623

Nb-Zr alloy and yttria corrosion by high velocity Li flow, discussing material removal depth

22 p4055 A70-43100

Solid solutions properties in Nb-oxygen system, examining atomic bond nature by elastic modulus measurement

22 p4056 A70-43345

Nb-Ru equiatomic alloys reversible phase transformations, using electrical resistivity, hot stage optical metallography, X ray diffraction and magnetic susceptibility measurements

23 p4208 A70-44858

Zr-Nb alloys athermal omega transformation studied by transmission electron microscopy

24 p4358 A70-45234

Heat treatment effects on dispersion strengthening of Ni alloys, showing enhanced long term creep strength at 1100 C

24 p4360 A70-45828
Simplex lattice mathematical models of solidus volume for quaternary Nb-W-Ti-Zr system
24 p4361 A70-45833
Heat resistant surface diffusion alloying of Ni alloys with Cr, Ti and Si saturation

24 p4361 A70-45834
Anions and cations diffusion during oxidation of Ni-V-Ti alloys, using chemical and electron microprobe analyses

24 p4364 A70-46335
NIOBUM CARBIDES
Parameters effect on radius of dispersion during plasma and detonation spray coating process of niobium and zirconium carbides

06 p1076 A70-17849
Monochromatic radiation emissivity temperature dependence of monocarbides of Ti, Nb and alloys in homogeneity region
08 p1516 A70-20994
Congruent vaporization rates of niobium monocarbide phase at high temperatures in vacuum, using method of least squares

12 p2254 A70-27320
WC as densification aid for NbC-C composites, examining fabrication temperature, mechanical properties, solid solution composition, etc
15 p2757 A70-31797

Niobium carbides formation in Nb containing steels during gamma-alpha transformation, establishing relationship between brittleness and carbide distribution characteristics

15 p2758 A70-32123
Carburizing spherical powders of Nb, Mo and W to obtain carbides, noting agreement between theoretical and experimental data

17 p3125 A70-35410
NIOBUM COMPOUNDS
NT NIOBATES
NT NIOBIUM CARBIDES
NT NIOBIUM OXIDES
Nb metal-like compounds energy band structures using X ray fluorescence technique

04 p0707 A70-15213
Mechanical and physical properties of Nb-Ti binary annealed alloys as function of compound NbTi using microscopical and X ray phase analysis

09 p1704 A70-22755
HF electrodeless plasma discharge synthesis of niobium and vanadium intermetallic compounds

11 p2061 A70-26746
Niobium oxychloride conversion to niobium pentachloride by vapor phase chlorination with phosgene, examining reaction kinetics

18 p3272 A70-36031
Superconductivity and crystalline structure of laminar solid solutions of niobium-selenide-niobium-telluride single crystals

22 p4088 A70-43464
Niobium nitride precipitation associated with stacking faults in Cr-Ni-Nb austenitic stainless steels, using electron microscopy

24 p4365 A70-46369
NIOBUM OXIDES
Oxide transformation during oxidation of Nb in terms of O diffusion

07 p1305 A70-18967
Stoichiometric compositions of niobium dioxide to pentoxide range, investigating X ray characteristics and thermal stability

07 p1315 A70-20312
Phase equilibrium and homogeneity regions of solid solutions system Ni-Nb-O at elevated temperature

07 p1315 A70-20313
Niobium suboxide formation in Nb-O system from supersaturated solution of oxygen in niobium after annealing

20 p3648 A70-39630
NITRATES
NT AMMONIUM NITRATES
NT CELLULOSE NITRATE
NT HYDRAZINE NITRATE
NT ORGANIC NITRATES
NT SILVER NITRATES

Ethyl nitrate positive and negative ion-molecule chemistry investigated by ion cyclotron single/ double resonance techniques

16 p2855 A70-33090
NITRATION
Nitrification reactions in soil with constant ammonium solution entry rate and nitrifying organisms, considering ion concentrations as functions of time and distance

02 p0252 A70-12518
High temperature kinetics of pyrolytic silicon carbide oxidation and nitridation in dissociated gases

13 p2361 A70-29077
NITRIC ACID
Passive film on stainless steels in boiling nitric medium studied by recording constant potential on sample subjected to polarizations

09 p1700 A70-22010

Ignition delay-reducing catalyst for furfuryl alcohol-red fuming nitric acid hypergolic bipropellant

13 p2473 A70-29992
NITRIC OXIDE
NO ion dissociative recombination rate coefficient determined in high temperature air plasma from electron temperature and number density measurements

04 p0675 A70-15583
Molecular fluorescence emission rate factors for strong bands of nitric oxide gamma systems, noting day airglow temperature dependence

05 p0886 A70-17085
Jet aircraft air pollutant production and dispersion of nitric oxide and soot, discussing mixing process [AIAA PAPER 70-115]

06 p1131 A70-18070
Nitric oxide free jet expansion, studying molecular cluster formation, inhibition and chemiluminescence

06 p1044 A70-18281
Stationary nitric oxide afterglow, studying molecular ionic species by time resolved mass spectrometry

06 p1114 A70-18635
Production rate constants for hydrated positive ions in photoionized nitric oxide-water afterglows

07 p1346 A70-20245
Gas turbine engines contribution to air pollution, using model combustor to study burned gas composition, emphasizing nitric oxide concentration

08 p1559 A70-21481
Ar and nitric oxide free jets dimmer and cluster abundance dependence on nozzle diameter and reservoir temperature and pressure

09 p1733 A70-22907
Chemiluminescence from NO adiabatically expanded against supersonic H atoms stream in inert carrier

10 p1831 A70-24566
Nitric oxide gas IR radiation properties at high temperatures, determining spectral mean fine structure and total band absorbance correlations

16 p3003 A70-34253
NO in earth atmosphere, describing theory of formation for explaining observed density distribution

18 p3245 A70-36019
Nitric oxide and atomic nitrogen in mesosphere and stratosphere, discussing photochemical equilibrium

19 p3415 A70-38389
Nitrogen and nitric oxide production and diffusion, examining photochemistry and transport at high altitudes

20 p3620 A70-39339
Collision induced dissociation of nitric oxide and molecular oxygen ions at low kinetic energies, noting internal ionic excitation effects

21 p3773 A70-41398
F I region positive nitric oxide and oxygen ions concentrations ratio and conversion rates from rocket data and theoretical formulas

23 p4189 A70-44075

NITRIDES
NT ALUMINUM NITRIDES
NT BERYLLIUM NITRIDES
NT BORON NITRIDES
NT SILICON NITRIDES
NT TITANIUM NITRIDES

Vapor deposited GaN single crystals tested for electrical and optical properties, determining band gap energy, electron concentration, etc

04 p0732 A70-15688
Superconducting properties of Nb-Ti-N thin films prepared by reactive sputtering process, obtaining transition temperature maximums

04 p0732 A70-15689
Strontium nitride hydrolysis, investigating hydrazine presence among products

23 p4158 A70-44598
Vanadium subnitride crystal structure with ordered array of nitrogen atoms in V sublattice

24 p4360 A70-45519
Niobium nitride precipitation associated with stacking faults in Cr-Ni-Nb austenitic stainless steels, using electron microscopy

24 p4365 A70-46369

NITRIDING
Internal nitriding kinetics of W-base alloys containing Hf, investigating morphology of resulting Hf nitride dispersion

02 p0317 A70-12319
Mo-nitrogen interaction, studying nitriding influence at various temperatures on Mo alloys properties

06 p1089 A70-17741
Chromium stainless steels nitrided cases formation and phase composition, studying temperature effects

07 p1304 A70-18744
High chromium stainless steels nitriding and carburizing processes stabilized by nickel galvanic coating, enhancing nitrogen or carbon diffusion into steel

07 p1291 A70-18832
Austenitic Fe-Cr-Ni-Ti alloys at high temperature to determine activation energy for nitrogen diffusion, noting oxygen role

08 p1522 A70-21707
Internal nitridation temperature effect on dispersion hardening of austenitic stainless Fe-Cr-Ni-Ti steels,

investigating interparticle spacing and layer thickness effects

09 p1705 A70-22810
Tensile strength of nitrided boron-aluminum alloy composite modules, noting effect of Ti cladding on panel surfaces

11 p2066 A70-26085
Titanium effect on iron and steels nitriding at high temperature, obtaining high surface hardness

13 p2423 A70-29773
Phase formation and mass transport during iodine-refined Ti reaction with nitrogen at various elevated temperatures

19 p3452 A70-38364

NITRILES
Replicating molecules on primordial earth, suggesting chemical evolution on Jupiter via demonstrable alpha-aminonitriles synthesis

14 p2536 A70-30364
Lattice resolution of layer planes in polyacrylonitrile based carbon fibers ground and dispersed by ultrasonic irradiation

14 p2598 A70-30793

NITRITES
Ferroelectric sodium nitrite single crystals LF linear electro-optical coefficients as function of temperature

01 p0154 A70-10104

NITRO COMPOUNDS
NT NITROBENZENES
NT NITROMETHANE
NT TRINITROTOLUENE

Agents for deoxygenation of nitro and nitroso groups

17 p3042 A70-35329
Microgram 2-nitro-1-butyl pyridinium sulfate /NBPS/ inhibition of growth of *Bacillus subtilis* by blocking thymidylate synthetase

23 p4158 A70-44998

NITROBACTER
Nitrification reactions in soil with constant ammonium solution entry rate and nitrifying organisms, considering ion concentrations as functions of time and distance

02 p0252 A70-12518

NITROBENZENES
NT TRINITROTOLUENE
Isolation and structural characterization of adduct formed from propionaldehyde, sym-trinitrobenzene and triethylamine

02 p0251 A70-12275
Red bicyclic condensation product from reaction of acetone with sym-trinitrobenzene and diethylamine

02 p0251 A70-12278
Turbulent charge diffusion during unipolar injection in nitrobenzene between plane-parallel electrodes, discussing liquid motion at high voltages

22 p4080 A70-42719

NITROCELLULOSE
U CELLULOSE NITRATE
NITROGEN
NT LIQUID NITROGEN
NT NITROGEN ATOMS
NT NITROGEN IONS
NT NITROGEN ISOTOPES

Primary cosmic ray nitrogen nuclei intensity and spectrum measured by balloons and Pioneer 8 space probe, obtaining abundance difference from solar atmosphere

01 p0169 A70-10319
Nitrogen abundances measured in enstatite chondrites by inert carrier gas fusion extraction technique, noting agglomeration of chondrules

01 p0179 A70-10475
Sulfur compound effects on carbon monoxide-nitrogen laser emission stability, obtaining continuous operation independently of tube quality

01 p0111 A70-10660
Rotational temperature of molecular nitrogen Vegard-Kaplan bands determined from auroral spectra, including variations in vibrational levels populations

01 p0076 A70-10873
Biochemical characteristics, nitrogenase activity and nitrogen fixation in heterocysts of blue green algae

01 p0024 A70-10894
Atomic O, H and D and molecular oxygen, deuterium and sulfur hexafluoride effects on nitrogen vibrational population distribution in nitrogen afterglow

01 p0148 A70-11356
Physiological equivalents of air with rare gases and H substitutes for nitrogen in inhaled gas mixtures providing normal oxygen intake

02 p0249 A70-12798
Microstructure and impact strength of welds of Cr-Mn steel containing nitrogen, observing grain growth dependence on nitrogen content

03 p0509 A70-13277
Electron spectrometer for nitrogen energy loss spectrum in 12-14 eV region, detailing relative intensities of transition bands

03 p0528 A70-13577
Static breakdown voltage of air and nitrogen measured under uniform field conditions for specific gas number densities, comparing results with Paschen law

03 p0528 A70-14086

Ionization spatial growth similarity with Paschen law in air and nitrogen for specific electric field/gas number density values, discussing ionization coefficients

03 p0528 A70-14087

Laser action observation on IR bands of first positive system of molecular nitrogen using pulsed excitation

04 p0704 A70-15625

Nitrogen ionization rate increase by admixing neutral molecules of electronically excited nitrogen, noting nitrogen decay controlled by spontaneous radiation and wall collisions

05 p0884 A70-15918

Intramolecular formation of azo-linkage accompanying N elimination from bis-azide

05 p0810 A70-16052

Absolute values of emission cross sections for vibrational Meinel bands of molecular nitrogen ions excited by electron impact

05 p0901 A70-16279

Electrically discharged O effect on N first positive band emission in surface catalyzed excitation

06 p1109 A70-17489

Nonequilibrium excitation in recombining N plasma nozzle flows

[AIAA PAPER 70-44]

06 p1122 A70-18061

Momentum transfer from neutral nitrogen molecules to solid surfaces measured for various incident beam molecule energies

06 p1112 A70-18272

Metastable diatomic N beam scattering from Teflon and Cu surfaces measured for velocity and angular distributions

06 p1112 A70-18273

Excitation emission of diatomic nitrogen molecule for first negative band broadening, considering high energy primary beam with secondary electrons

06 p1124 A70-18305

Density effects on rotational temperature measurements in nitrogen by electron beam excitation, discussing emission intensity distribution

06 p1067 A70-18306

Slip flow of nitrogen gas through long circular tubes, measuring mass flow, pressure drop and cross sectional velocity profiles

06 p1051 A70-18368

Fat embolism and decompression sickness similarities, studying lipid stability changes resulting from liver tissue injury by nitrogen bubbles

07 p1222 A70-19936

Photodissociation of diatomic O and N molecules in far UV

07 p1338 A70-20052

Nitrogen IR emission spectra from atomic and molecular excited electronic states transitions, studying DC discharges at various pressures

07 p1339 A70-20092

Molecular N rotational temperature effect on rare gases scattering cross section

07 p1344 A70-20134

Nitrogen molecules pulsed high energy beams transit time measurement by gated time of flight procedure and by multichannel analyzer

07 p1345 A70-20136

Omegatron mass spectrometer for rocket measurements of molecular nitrogen density and temperature in middle thermosphere

07 p1289 A70-20308

Nitrogen molecule photoabsorption and photoionization cross sections determination, discussing ionization probability variations and radiationless transitions

07 p1347 A70-20358

Inert gases and nitrogen determined at high temperature, discussing revision of existing functions representing intermolecular energy

08 p1598 A70-21525

Ionization of rare gases /H and N/ by nitrogen ions, determining cross sections of formation of slow ions and electrons

08 p1549 A70-21801

Lyman-Birge-Hopfield nitrogen bands high resolution emission spectrum, giving energy values of particular states together with corresponding rotational constants and band origins

09 p1730 A70-22067

Fixed low pressures of nitrogen generated by chemical dissociation in system at equilibrium at constant temperature, applying results to vacuum measurement device calibration

09 p1630 A70-22954

Fast electrons spatial distribution for multiple scattering in nitrogen and argon, noting target thickness and incident energy

09 p1735 A70-23179

Acoustic velocity in rarefied argon and nitrogen using Brillouin scatter and Burnett equations

09 p1698 A70-23314

Thermospheric molecular nitrogen vibrational temperature, studying various chemical reactions and collisions as energy sources

10 p1872 A70-23827

High energy oxygen positive-ion reaction with molecular nitrogen, presenting semiempirical model with assumed crossing of potential energy surfaces

10 p1920 A70-25146

Nitrogen content effect on proportional limit and work hardening rate of austenitic stainless steel at 302 F

10 p1905 A70-25169

Thermal conductivity of nitrogen in 350-1500 K range using hot-wire diffusion columns

11 p2147 A70-25756

Threshold photoionization cross sections for homonuclear diatomic N molecules calculated from Slater orbitals and Coulomb waves

11 p2086 A70-25833

Electrical conductivity of impact-ionized nitrogen across magnetic field, deriving electron collision frequency

11 p2091 A70-26461

Nitrogen transport properties to 26,000 degrees K, measuring current-field intensity properties and radial temperature distributions in molecular nitrogen cascade

11 p2151 A70-26841

Spectral absorption characteristics for C atom radiative processes in carbon dioxide-nitrogen mixtures at high temperatures corresponding to Venusian atmosphere

12 p2275 A70-27317

Nitrogen respiratory elimination by human lung, analyzing expired air by mass spectrometry and volume displacement in closed systems

13 p2351 A70-29325

Compression effects in air-oxygen mixture on male mice, observing no adversity on mortality, growth and nitrogen content

13 p2353 A70-29436

Total nitrogen content determination in silicate samples of rocks, synthetic silicate standards, NBS steels and meteorites using inert carrier-gas extraction-gas chromatography

13 p2362 A70-29497

Electron beam measurement of rotational and high vibrational temperature in molecular nitrogen

13 p2412 A70-29980

Low pressure nitrogen and air spectra excitation by low energy proton bombardment, using spectroscopic, photometric and microphotometric analyses

14 p2619 A70-30653

V-N and V-O solid solutions magnetic, electrical, crystallographic and mechanical properties as function of gas concentration

14 p2596 A70-30842

Molecular nitrogen excitation under electron bombardment at auroral and airglow impact levels, using computerized Monte Carlo method

14 p2620 A70-31269

Nitrogen solubility in Nb-Mo solid solutions, determining relationship between N partial pressure, temperature and concentration

14 p2598 A70-31285

Pressurization system for nitrogen generation based on hydrazine catalytic decomposition, describing metal membrane configuration, fuel additives, etc [AIAA PAPER 70-682]

16 p2962 A70-33583

Diatomic nitrogen ions branch overlapping, discussing rotational line structure in first negative system vibrational bands

16 p2956 A70-34254

Cr-Ni stainless steels room temperature yield and tensile strengths improvement by nitrogen addition

17 p3122 A70-34553

NTWO Fortran IV family of subroutines for thermodynamic and transport properties of nitrogen

17 p3195 A70-34746

Aniline and o-anisidine production by photoelimination of nitrogen from fused ring triazoles

17 p3042 A70-34821

High temperature plasmas of mixtures of nitrogen with rare gases, calculating equilibrium thermodynamic properties

17 p3195 A70-34932

Nitrogen deactivation by ground state atomic oxygen resulting in metastable oxygen atom as auroral green line source

17 p3080 A70-35770

Nitrogen solubility calculation in transition metals liquid binary systems, using quasi-chemical model

18 p3273 A70-36045

Total cross sections for production of free electrons in collisions of low energy negative atomic oxygen ions with molecular nitrogen

18 p3292 A70-36188

Compressibility factors and virial coefficients for He-N mixture, He and nitrogen at low temperatures and high pressures

18 p3290 A70-36250

Physiosorption isotherms for nitrogen on stainless steel at various temperatures and very low pressures

18 p3226 A70-36322

Interstellar hot low density intercloud medium in H I region, estimating diffuse emission in forbidden lines O I at 6300 A and N I at 5200 A

18 p3310 A70-37020

Relaxation time for nitrogen molecule vibration temperature in ionosphere due to thermal electron collisions

19 p3409 A70-37324

Nitrogen diffusion coefficient in Mo and W using degassing method

19 p3452 A70-37828

Niobium yield stress at room temperature for various nitrogen and oxygen concentrations

19 p3454 A70-38814

Nitrogen and nitric oxide production and diffusion, examining photochemistry and transport at high altitudes

20 p3620 A70-39339

Capture coefficients and reflected flux measurements for gaseous nitrogen molecular beams impinging on solid nitrogen cryodeposit surface

20 p3675 A70-39390

Emission cross sections of nitrogen in vacuum UV by electron impact

20 p3675 A70-39617

Nitrogen viscosity coefficient at high pressure, describing viscosimeter operation and kinetic theory calculations

20 p3738 A70-40140

Oxygen-nitrogen generation for long manned space flight based on liquid center dual matrix electrolysis cell

21 p3768 A70-40992

Nitrogen photoelectron excitation in dayglow, examining 3371 A band intensity, energy spectrum and flux in ionosphere

21 p3882 A70-41093

Carbon and nitrogen abundances in Apollo 11 rocks, basaltic achondrites and terrestrial basalts, using meteorite analytical techniques

21 p3776 A70-41592

Carbon monoxide-nitrogen laser mechanism vibrational populations, discussing operational characteristics and walls condition and nature

21 p3837 A70-41716

Carbon monoxide-nitrogen laser luminescent phenomena by electronic spectroscopy

21 p3837 A70-41717

Carbon monoxide-nitrogen system vibrational distribution of populations and kinetics in fundamental and harmonic regions, investigating vibroluminescence

21 p3837 A70-41718

Carbon dioxide-He-nitrogen gas mixture pulsed discharge system afterglow gain measurements up to one atmosphere, using CW laser

21 p3837 A70-41719

Helium and nitrogen role in carbon dioxide laser excitation, discussing optimum gas mixture

21 p3837 A70-41919

Nitrogen content of Odessa and Canyon Diablo iron meteorites from thermal neutron activation, Kjeldahl distillation and alkali fusion methods

21 p3921 A70-41942

Spectral absorption characteristics for c atom radiative processes in carbon dioxide-nitrogen mixtures at high temperatures corresponding to Venusian atmosphere

21 p3854 A70-42058

Mars atmospheric nitrogen abundance relative to carbon from spacecraft UV spectrometer data

23 p4238 A70-43805

Auroral spectrophotometer measurements from 1968 NASA airborne expedition, discussing oxygen and nitrogen spectral lines

23 p4186 A70-43855

Auroral molecular nitrogen bands tentative identification based on rocket-borne spectrometer results

23 p4186 A70-43856

Three body recombination and dissociation rate coefficients of nitrogen in Ar atoms heat bath, using modified phase-space theory

23 p4221 A70-44008

Cryogenic fluids nitrogen, argon and carbon monoxide nucleate boiling from atmospheric to near critical pressure

23 p4279 A70-44359

Saturated nitrogen vapors condensing coefficients measurement by cryostat, comparing results with theoretical prediction

23 p4218 A70-44364

Molecular oxygen ions 1Ng band and molecular nitrogen 1Pg band relative intensities in normal and type B auroras

23 p4191 A70-44408

Nitrogen deficient algae nitrification, showing cellular N compounds oxidized to nitrate and nitrite followed by nitrate reductase

24 p4297 A70-45407

Nitrogen abundance of subgiant nu Indi from observed and computed stellar spectra of CN violet bands

24 p4404 A70-45411

Energy loss spectra and collision cross sections for positive ion impact on molecular nitrogen, noting Lyman-Birge-Hopfield system excitation

24 p4381 A70-45599

TROGEN ATOMS

- N atom recombination rate coefficient in static system pressure dependent at low pressure
01 p0147 A70-10450
- Kinetics of attack of SiC in monoatomic mixtures of N and O generated by microwave discharge dissociation
07 p1421 A70-19332
- Vacuum UV atomic nitrogen and oxygen lines contribution to energy transfer in high density plasma, noting f values and Stark half widths
09 p1730 A70-22229
- Electron density reduction in plasma surrounding reentry vehicle due to N atom removal by water droplets injection
09 p1737 A70-23237
- Upper atmospheric atomic nitrogen reaction with carbon tetrachloride, estimating radiation intensity and brightness of artificial luminescent cloud
18 p3252 A70-36989
- Emission spectral distribution of atomic nitrogen reaction with carbon tetrachloride for artificial luminescent clouds
18 p3293 A70-36990
- Nitric oxide and atomic nitrogen in mesosphere and stratosphere, discussing photochemical equilibrium
19 p3415 A70-38389
- Ionization rates in auroras detected by atomic oxygen and nitrogen lines
22 p4024 A70-43308
- Vanadium subnitride crystal structure with ordered array of nitrogen atoms in V sublattice
24 p4360 A70-45519

TROGEN COMPOUNDS

- ALUMINUM NITRIDES
- AMIDES
- AMMONIA
- AMMONIUM NITRATES
- ATROPINE
- AZIDES [INORGANIC]
- AZIDES [ORGANIC]
- AZO COMPOUNDS
- BERYLLIUM NITRIDES
- BORON NITRIDES
- CAFFEINE
- CELLULOSE NITRATE
- CYANO COMPOUNDS
- FOLIC ACID
- HYDRAZINE NITRATE
- HYDROGEN CYANIDES
- IMIDES
- IMINES
- ISOCYANATES
- LIQUID AMMONIA
- MORPHINE
- NICOTINAMIDE
- NITRATES
- NITRIC ACID
- NITRIC OXIDE
- NITRIDES
- NITRITES
- NITRO COMPOUNDS
- NITROBENZENES
- NITROGEN DIOXIDE
- NITROGEN OXIDES
- NITROGEN TETROXIDE
- NITROMETHANE
- NITROSO COMPOUNDS
- NITROSYL CHLORIDES
- NITROUS OXIDES
- ORGANIC NITRATES
- POLYIMIDES
- RDX
- SILICON NITRIDES
- SILVER NITRATES
- THYMIN
- TITANIUM NITRIDES
- TRINITROTOLUENE
- TRYPTOPHAN
- UREAS
- URIC ACID
- XANTHINES
- Ionic polymers, investigating cyclic and linear compounds and reaction products from tetramethyldiaminoalkanes and dibromoalkanes using NMR, IR and mass spectroscopy
06 p1004 A70-17511

- Nitrogenous compounds from Colorado Green River Formation oil shale using high resolution mass spectrometry
11 p2047 A70-26620

- Ketene and diazomethane flash photolytic measurement of reaction rates of singlet-triplet methylene deactivation
15 p2694 A70-31729

- Product distribution of organic nitrogen compounds plasma sources computed by assuming high temperature limited thermodynamic equilibrium
18 p3226 A70-36764

TROGEN DIOXIDE

- Flowfield and chemical kinetics model to calculate nitrogen dioxide chemiluminescence wake emission [AIAA PAPER 68-702]
04 p0620 A70-15535

- Nitrogen dioxide presence in solar atmosphere from balloon-borne spectrometer observations, presenting graph of sunset solar spectrum
08 p1575 A70-21262

- Kinetics of homogeneous nitrogen dioxide-carbon monoxide atom transfer reaction in single pulse shock tube, carrying out product analysis by vapor phase chromatography
08 p1455 A70-21263

- Nitrogen dioxide continuum in green-white afterglow of molecular oxygen and nitrogen, using spectrometry and photometry
14 p2579 A70-31254

- Heat transfer coefficient of chemically reacting gas mixture as function of Lewis-Semenov number, discussing nitrogen dioxide decomposition
19 p3550 A70-37251

- Thermal decomposition of nitrogen tetroxide and nitrogen dioxide induced by shock waves, examining temperature effects
19 p3373 A70-38265

- Nitrogen dioxide continuous visible emission under thermal and recombination excitation, examining spectral characteristics
19 p3374 A70-38267

- Air polluting sulfur dioxide and nitrogen dioxide remote sensing based on radiation molecular absorption using long line correlation spectrometer
20 p3633 A70-39793

NITROGEN IONS

- Lifetimes of upper levels of N II and N III UV multiplets determined from radiative deexcitation of excited ions
03 p0527 A70-13074

- Ionization of rare gases /H and N/ by nitrogen ions, determining cross sections of formation of slow ions and electrons
08 p1549 A70-21801

- Stark broadening of singly ionized nitrogen lines measured in dense high temperature plasma behind reflected shock wave in T tube
09 p1731 A70-22776

- N and O ions electron impact ionization rates calculated from approximate cross sections
12 p2275 A70-27173

- Electron impact excitation cross section of /O,0/ first negative band of nitrogen ion from threshold to 3 keV, using photon counting techniques
12 p2276 A70-27880

- Nitrogen and air bombardment by relativistic electrons, determining absolute fluorescence intensity of nitrogen molecular ion first negative band
16 p2954 A70-33279

- Orion nebula H alpha/forbidden N II ratio measurement using wide field multislit spectrograph
22 p4101 A70-42857

NITROGEN ISOTOPES

- IR spectra of N isotopes adsorbed on nickel-on-Aerosil catalysts, investigating effects of intermolecular interaction and isotopic substitution
03 p0440 A70-13099

- Carbon dioxide-nitrogen and nitrous oxide-nitrogen laser systems, substituting diatomic N 15 for N 14 to investigate radiation intensity
15 p2750 A70-31761

- Carbon-nitrogen-oxygen isotope bi-cycle function in solar evolution, noting first cycle role in solar energy release and neutrino production
20 p3698 A70-39306

- Apollo 11 lunar matter rare gas, H and N concentrations and isotopic abundances, discussing solar wind, gas diffusion loss from silicates and spallation component
21 p3908 A70-41583

- IR microwave double resonance signals in systems of ammonia with nitrogen isotopes, using nitrous oxide laser
21 p3836 A70-41707

NITROGEN OXIDES

- NITRIC OXIDE
- NITROGEN DIOXIDE
- NITROGEN TETROXIDE
- NITROUS OXIDES

- Ozone formation in presence of nitrogen oxides and hydrocarbons during long wave UV irradiation, noting energy yield
09 p1629 A70-22328

- Nitrogen oxide ions mobility in air calculated at high plasma temperatures
12 p2276 A70-27845

- NO and nitrogen dioxide influence on ozone concentration and production rate in stratosphere
14 p2568 A70-30125

- Air pollution by turbojets and gas turbines, discussing control of carbon particles and nitrogen oxides
16 p2963 A70-32922

- Reactive stream separation high speed color photography for impinging streams of nitrogen tetroxide and hydrazine [AIAA PAPER 70-608]
16 p2998 A70-33605

NITROGEN PLASMA

- Heat transfer rates to stagnation point of hemisphere in supersonic high enthalpy low density nitrogen plasma flow [ASME PAPER 69-WA/HT-49]
04 p0614 A70-14799

- Continuum radiation of nitrogen plasma at atmospheric pressure at high temperatures
10 p1923 A70-24472

- Interference holograms of low temperature nitrogen plasma jet using fundamental and second harmonic ruby laser emissions
13 p2464 A70-29384

- Electric field intensity and extension of space charge sheath for ion extraction from nitrogen plasma
14 p2652 A70-30661

- Oxygen, nitrogen and argon plasma total radiation measurement at various wavelengths and temperatures
17 p3139 A70-34547

- Microwave diagnostics of plasma temperature and conductivity in streaming nitrogen arc with skin effect under atmospheric pressure
19 p3476 A70-37554

- Equilibrium compositions of helium-nitrogen, argon-nitrogen and xenon-nitrogen plasmas at atmospheric pressure between 5000 and 35,000 K
19 p3552 A70-37831

- Collisionless nitrogen plasma drift velocity measurement by ion acoustic wave method
21 p3859 A70-41760

- Spatial energy loss and ionization deposition distributions of fluorescent radiation emission induced by electron beam in nitrogen gas
21 p3853 A70-41913

- Nitrogen transport coefficients as function of high temperature in stationary plasma produced in cascade arc chamber
22 p4082 A70-43373

- Nitrogen plasma viscosity measurements as function of velocity and axial static pressure gradient
23 p4226 A70-44439

NITROGEN TETROXIDE

- Liquid nitrogen tetroxide enthalpy measured by indirect heating techniques, obtaining data at supercritical temperatures
06 p1005 A70-18560

- Caloric data determining saturated vapor pressure of nitrogen tetroxide and heat of sublimation for sublimation curve
07 p1358 A70-19206

- Enthalpy of nitrogen tetroxide in liquid phase using direct heating of test substance in calorimeter
07 p1358 A70-19207

- Optimum penetration and separation mixing of unlike doublet injector element with hypergolic hydrazine and nitrogen tetroxide propellants [JPL-TR-32-1487]
11 p2099 A70-25995

- Combustion stability effects of additives on hydrazine/nitrogen tetroxide propellant combination by measuring droplet burning rates
11 p2100 A70-26283

- Nitrogen tetroxide thermodynamic properties calculation from pressure-volume-temperature equation of state in gas and liquid phases
12 p2332 A70-27975

- Stress corrosion cracking of Ti and Ti-Al-V alloy in liquid dinitrogen tetroxide
15 p2755 A70-31475

- Odor threshold levels for unsymmetrical dimethylhydrazine /UDMH/ and nitrogen tetroxides
18 p3224 A70-36227

- Thermal decomposition of nitrogen tetroxide and nitrogen dioxide induced by shock waves, examining temperature effects
19 p3373 A70-38265

NITROMETHANE

- Critical diameter and detonation parameters of nitromethane and tetranitromethane as function of powder content
01 p0217 A70-11004

NITROSO COMPOUNDS

- Methylating agents and nitrosoguanidine actions on polynucleotides, including ribonucleic acid
03 p0440 A70-13550

- Agents for deoxygenation of nitro and nitroso groups
17 p3042 A70-35329

- Gaseous and liquid fluorine exposure effects on nitroso rubbers at ambient and cryogenic temperatures, using impact tests and IR spectroscopy
21 p3844 A70-42140

NITROSYL CHLORIDES

- Nitrosyl chloride reagent effects on phenylalanine peptides
12 p2181 A70-27471

NITROUS OXIDES

- Dissociative attachment of low energy electrons in nitrous oxide as function of gas temperature
03 p0441 A70-14006

- Potential energy surface shapes for lowest states of temporary negative ions of nitrous oxide and carbon dioxide
03 p0441 A70-14008

Nitrous oxide molecular beam reflection and dissociation on tungsten surface at high temperatures from angular distribution measurements

06 p1004 A70-17493

Tunable nitrous oxide laser cavity losses and absorption by carbon dioxide determined spectroscopically

11 p2061 A70-25361

Cyanogen-nitrous oxide flame temperature determination for different concentrations of mixture in flat stainless steel diffusion flame burner

11 p2101 A70-26386

Nitrous oxide chemisorption by rhodium filament at low pressures at various temperatures, determining sticking probability

12 p2181 A70-27678

Nitrous oxide and carbon dioxide laser Q switching by ammonia Stark effect

13 p2431 A70-29835

Thermal energy negative ion-molecule reactions in photoionized NO-water vapor mixtures, determining rate constants by stationary afterglow system

16 p2954 A70-33280

Q switching of nitrous oxide laser with Freon 12 and sulfurhexafluoride absorbers, comparing wavelengths with carbon dioxide laser outputs

21 p3834 A70-40567

NO molecule gamma system in emission spectra of polar auroras in far UV by monochromator aboard Skylark rocket

21 p3821 A70-42261

NOBLE GASES

U RARE GASES

NOBLE METALS

NT GOLD

NT RUTHENIUM

NT SILVER

Noble metals band structure effects on shielding cloud around impurity and alloys electronic properties in weak scattering limit

09 p1740 A70-22953

Superconductivity in noble metal rich hexagonal close packed phases and fcc solid solutions ascribed to Fermi surface-Brillouin zone interaction

15 p2785 A70-32398

Precious metals, measuring tension, grinding and polishing induced surface plastic deformation effects on electron work function and exoemission

23 p4204 A70-43927

NOCTILUCES

U LUMINESCENCE

NOCTILUCENT CLOUDS

Noctiluculent cloud observation stations and international cooperation in exchanging climatological data concerning annual variations, height distribution and latitude dependence

01 p0072 A70-10579

Atmospheric density in meteor region and atmospheric wind conditions determined from meteor trail drifting and artificial noctiluculent clouds

03 p0563 A70-13178

Noctiluculent clouds morphological and kinematic characteristics based on photographs

03 p0476 A70-13885

Nacreous and noctiluculent cloud physics, discussing earth-impacting meteor dust accumulation and mesopause water vapor

07 p1273 A70-20265

Rocket-borne sampler for collecting noctiluculent cloud particles in mesopause, describing collection and analysis methods and protection against tropospheric contamination

07 p1273 A70-20266

Noctiluculent clouds in mesopause over North America, discussing ground stations network, intensity variations, structure and time distribution

07 p1273 A70-20267

Lower thermosphere dust particle layers correlated with polarization anomaly twilight fluctuations and noctiluculent clouds frequency distribution

10 p1944 A70-24949

Auroras and noctiluculent clouds simultaneous occurrence in middle latitudes, discussing mesopause temperature variations and mesosphere heating

20 p3621 A70-39402

Noctiluculent cloud kinematics, examining wave structure and lengths, velocities and general motion

20 p3622 A70-39403

Noctiluculent clouds blue color and rocket sounding results explained by ozone model of mesospheric clouds formation

23 p4188 A70-44048

NOCTURNAL VARIATIONS

Cosmic radio absorption nightly variations, considering ionospheric structure and composition and various scattering mechanisms

07 p1367 A70-19456

Nighttime D region ionization irregularities deduced from vertically incident VLF radio wave

09 p1671 A70-23663

Sodium night airglow analyzed by Chapman mechanism, considering nocturnal intensity seasonal behavior and location in upper atmosphere

10 p1873 A70-23829

Cosmic radio absorption nightly variations, considering ionospheric structure and composition and various scattering mechanisms

18 p3309 A70-36930

Total ionospheric electron content nocturnal and latitudinal variations in winter at midlatitudes

20 p3624 A70-40480

Scintillation LF observations with synchronous satellite radio signals at low latitude station, noting magnetic activity effects on night and day scintillations

20 p3590 A70-40488

Sodium D lines airglow nocturnal and seasonal variations in upper atmosphere

22 p4023 A70-43295

NODES [STANDING WAVES]

Clamped skew plates influence coefficients, natural vibration frequencies and nodal patterns measurement, comparing to Galerkin method results

16 p2988 A70-33124

Mechanical models of single speed gears for torsional vibrations, taking into account nodes of first free vibration mode

16 p2995 A70-34289

Nodal patterns on thin elastic circular plate vibrating in flexure, considering natural and compounded modes

19 p3543 A70-38245

Lunar theory literal solution for average node and perigee movements compared with Delaunay results, using Lie transforms for Hamiltonian function

24 p4399 A70-45141

NOISE [SOUND]

NT AERODYNAMIC NOISE

NT AIRCRAFT NOISE

NT ENGINE NOISE

NT JET AIRCRAFT NOISE

NT ROCKET ENGINE NOISE

NT SONIC BOOMS

NT THERMAL NOISE

Intermittent vs continuous noise effects on signal detection measures during audio visual checking task performance

01 p0039 A70-11167

Noise generation in turbulent premixed flames, turbulent diffusion flames and liquid-spray combustion of hydrocarbon fuels, using optical method

02 p0399 A70-12040

Pulsed noise biological effects on human organism, showing stimulation of auditory duct and baric and mechanical reception system causing neural functional shift

03 p0433 A70-13476

Near noise fields of choked axisymmetric air jet, discussing sound pressure levels surrounding jet

05 p0834 A70-16783

Ionic noise during plasma turbulent heating in toroidal facility, discussing oscillation spectrum

07 p1349 A70-19552

Human complex responses to noise, considering individual variations, social and psychological factors, adaptation, etc

09 p1617 A70-22392

Acoustic noise control on Boeing aircraft electromagnetic components, noting iron-core magnetostatic demanding transformer redesign

09 p1647 A70-22764

Noise-flutter interrelation in flight vehicle flexible plate and shell configurations immersed in fluid flow

11 p2132 A70-25726

Ionic noise during plasma turbulent heating in toroidal facility, discussing oscillation spectrum

15 p2777 A70-31459

Noise effects on arousal level in auditory vigilance from EEG parameters

19 p3364 A70-38325

NOISE ATTENUATION

U NOISE REDUCTION

NOISE ELIMINATION

U NOISE REDUCTION

NOISE HAZARDS

U HAZARDS

U NOISE [SOUND]

NOISE INJURIES

Audiograms for aviators unexposed and exposed to high intensity LF noise of maritime patrol aircraft indicating no permanent effects

01 p0032 A70-10365

Guinea pig cochlear hair cell damage after exposure to impulse noise

02 p0236 A70-12322

Ship engineers cardiovascular system functional changes during HF internal combustion engine noise, investigating EKG recordings and arterial pressure

20 p3582 A70-40292

NOISE INTENSITY

Signal discrimination from sequence of interference and noise by determining parameter value probability density using random process

01 p0044 A70-11024

He-Ne laser using K-activated alumina cold cathode and coaxial construction, discussing output, low noise applications, construction and testing

03 p0501 A70-13583

Schottky barrier diodes design for wideband radiometer mixers to obtain optimum noise performance and broadband operation by DC bias application

03 p0457 A70-1396

Plume-induced X band radar attenuation, AM and PM noise measured in aluminized solid propellant motor firings

04 p0736 A70-1540

Aircraft noise suppression, discussing community aspects of jet and fan noise and physical mechanism of jet noise

05 p0795 A70-1677

Acoustic intensity determined from time, length and velocity scales in mixing region of jet from nozzle with turbulent boundary layers

05 p0834 A70-1677

Subsonic circular jet noise radiation intensity and directional distribution, based on effects of refraction and Lighthill quadrupole model for aerodynamic noise

05 p0834 A70-1678

Antenna noise temperature of large aperture reflectors from feed system RF characteristics, discussing spillover and blockage factors

06 p1008 A70-1750

Acoustic power output from supersonic jets, considering aerodynamic and acoustic characteristics for supersonic exhaust velocities

06 p1132 A70-18115

Acoustic characteristics of high subsonic model cold jet using imaging technique and measurements of energy flux of flow, calculating energy flux from flow-field measurements

06 p1040 A70-18125

Perceived aircraft noise level based on objective acoustic measurements related to subjective response, tabulating noys as function of sound pressure

07 p1190 A70-18803

Signal strength of sky waves and noise levels near LUF, suggesting importance of changing mode structure

07 p1229 A70-19158

HF radio noise environment, discussing local storm effects, noise power estimation, noise measurement methods, etc

07 p1231 A70-19172

HF ion-acoustic noise /whistlers/ during turbulent heating of plasma, using matched magnetic probe

07 p1348 A70-19551

Acoustic turbulence generated noise intensity and spectrum using statistical thermodynamics

07 p1194 A70-19618

Temporary and permanent threshold shifts in hearing of guinea pigs exposed to intense rocket booster engine noise

07 p1214 A70-19931

Random synchronization errors in PN and PSK systems reduce input signal power and introduce additional self noise

07 p1236 A70-20069

Roundoff noise output-dynamic range interaction in digital filters, discussing filter synthesis with transpose configurations concept

09 p1649 A70-23366

Pure-tone air conduction audiogram for diagnosis of patients exposed to intense noise indicating conductive or sensorineural origin of loss

09 p1621 A70-23457

Microwave devices excess AM and FM noise levels measurement by carrier suppression methods

10 p1841 A70-24579

Optimal stochastic control investigated for linear systems with driving noise intensity proportional to control input

10 p1856 A70-25234

Aerial and ground UHF noise measurement in Phoenix area, correlating air and ground data

11 p2001 A70-25480

Takeoff noise minimization by prescribing optimum takeoff trajectories, considering aircraft parameters influencing noise intensity at takeoff

11 p1979 A70-25814

THEMIS source encoding systems research program to investigate inherent quantizing noise and degradation of analog to digital conversion

11 p2014 A70-26255

Commercial aircraft peak cockpit noise level during cruise and high speed descent, discussing damage risk criteria and interplot speech interference

11 p1991 A70-26275

Pro- and anticoagulants dynamics in rats blood during early phases of prolonged sound effect

12 p2168 A70-27347

STOL aircraft noise level certification based on aircraft type, landing and takeoff paths and airports

12 p2161 A70-27459

Aircraft noise reduction effects on airport capacity and community exposure levels

12 p2207 A70-27628

MOS-FET HF noise quantities computed in terms of substrate doping, angular frequency and gain-bandwidth product

12 p2196 A70-27672

High intensity noise effects on auditory thresholds, blood pressure and time response to light stimuli, showing permissible levels during space flights
13 p2358 A70-29334

Noise level influence on optimal recognition of non-stationary random processes in white noise
13 p2369 A70-29729

HF ion-acoustic noise /whistlers/ during turbulent heating of plasma, using matched magnetic probe
15 p2777 A70-31458

Noise effect on modulation transfer function of visual channel by threshold measurements
15 p2698 A70-32013

Intensity correlations in optical parametric noise and second harmonic generation measured by two photon delayed coincidence counting
15 p2753 A70-32603

Helicopter rotors noise intensity prediction for high tip Mach number, including compressibility and thickness effects
17 p3015 A70-34729

Vibrating structure mathematical model for predicting radiated noise level
17 p3187 A70-35169

High intensity noise enveloping space vehicle as distributed excitation, examining correlation effects on structural response
17 p3059 A70-35170

High intensity noise testing of missile and spacecraft structures, simulating acoustically induced vibrations due to aerodynamic turbulence
19 p3531 A70-37697

Temporal and spectra combination effects on aircraft sound judged noisiness, using human subjects in anechoic chamber
20 p3580 A70-39712

Frequency synchronization channel pulse fluctuations effect on noise stability of binary signal reception
20 p3587 A70-40145

Aircraft noise reduction, discussing generation sources in propulsion system, noise levels and subjective responses
23 p4140 A70-44395

Intense white pulsed jet engine noise effects on cochlea biocurrents in cats
23 p4157 A70-45076

NOISE MEASUREMENT

U ACOUSTIC MEASUREMENTS

NOISE METERS

Remote sonic monitoring system for Saturn V noise measurement and recording
17 p3094 A70-35521

Sound measurement, discussing impulse level meters, noise exposure index, sound level recorder and classification, frequency analysis and filters
17 p3097 A70-35925

NOISE PROPAGATION

Discrete noise generation and propagation due to fan engine rotor forcing excitation and interaction with downstream stator
05 p0896 A70-16791

Far field directionality and acoustic power of noise radiated by axial flow fans and compressors using fluctuating forces model
08 p1547 A70-21860

Ground reflection effect on plane uniform sound source distribution applicable to compressor and fan noise under far field conditions
09 p1726 A70-22240

Collection of papers on aerodynamic noise covering noise generation, solid boundaries effect, strength distribution, jet noise, perturbation theory, etc
17 p3071 A70-35448

Buzz-saw noise of transonic compressor due to rotating pressure field at supersonic blade tip speeds [ASME PAPER 70-GT-54]
18 p3303 A70-36838

Triboelectric noise in mechanically flexed low level signal cables for piezoelectric transducers with high gain amplifiers
21 p3825 A70-40866

Microplasma and burst noise measurements on discrete silicon planar transistors indicating origin at emitter-base junction
22 p3998 A70-43331

Jet engine noise propagation near porous surface, predicting anomalous LF dip from direct and reflected waves interference with phase delay
24 p3395 A70-46068

Axial flow compressor fan discrete tone noise radiation directivity pattern measurement and theoretical explanation for cut-off effect, power and harmonics
24 p4380 A70-46069

NOISE REDUCTION

Noise reduction for V/STOL aircraft operation by introducing quiet propellers, discussing variable camber propellers, propeller aerodynamics, etc [AIAA PAPER 69-1038]
01 p0005 A70-10646

Jet engine noise sources and design of noise suppressors used during airport runway engine tests
02 p0275 A70-12222

Touring aircraft, discussing vibration and noise reduction, instrumentation, STOL aircraft, etc
02 p0227 A70-12663

Multimirror illumination system for radio telescope antenna with reduced noise temperature, narrow radiation pattern and optimal specular cross section, noting sensitivity
03 p0455 A70-13082

Phase lock loop circuit for spacecraft communication noise filtration, describing linear study of first-four-order loops
03 p0448 A70-13537

Fan rotors aerodynamic noise tonal annoyance reduction by blade unequal circumferential spacing, noting sound-pressure wave shape determination [ASME PAPER 69-WA/FE-23]
04 p0614 A70-14776

Turbine noise significance in civil aircraft noise problem
04 p0734 A70-14884

Optimum low speed ducted fan design for minimum noise generation
04 p0734 A70-14891

Ar laser as suitable source for LF heterodyne anemometer experiments through noise spectrum suppression under optimum conditions
04 p0702 A70-15569

Noise suppressor research for jet engine components, describing test equipment and facilities for models work
05 p0825 A70-15808

Rotor noise reduction in helicopter design for increased blade loadings and higher tip speed [SAE PAPER 690684]
05 p0792 A70-15865

Airport noise silencers for aircraft engines, discussing design, operation and damping efficiency
05 p0829 A70-16353

First order pressure gradient microphone design based on electrostatic principle, using foil electrets to discriminate against airborne and solid-borne noises
05 p0821 A70-16402

Aircraft noise suppression, discussing community aspects of jet and fan noise and physical mechanisms of jet noise
05 p0795 A70-16777

Engineering methods developed for controlling boundary layer, jet and compressor noise, discussing theoretical formulations usefulness
05 p0896 A70-16778

Propeller noise research for achieving noise reductions in future propeller design
05 p0796 A70-16793

Aircraft configurations designed for eliminating sonic boom due to lift
05 p0791 A70-16798

Jet noise theory application in noise prediction and reduction at source for subsonic and supersonic jets
06 p1038 A70-18066

Interacting coaxial supersonic jet flows noise reduction based on noise distribution characteristics measurement in anechoic chamber [AIAA PAPER 70-236]
06 p1040 A70-18112

Magnetic, electrostatic and RF fields noise reduced for strain gage data acquisition
06 p1069 A70-18435

Aircraft noise reduction certifications program by tripartite draft plan
07 p1426 A70-18876

Frequency monitor design, analyzing relationships between time constants, gain, etc, emphasizing white noise filtration
07 p1227 A70-18991

V/STOL intercity airliner potential and development noting benefits of noise reduction, ground space economy, etc
08 p1434 A70-20619

Threshold extension techniques using impulse noise detection and elimination implemented at phase lock loop demodulator output
08 p1460 A70-20811

Noise damping model for complex configuration mufflers operating under conditions prevailing in diffuse acoustic field
08 p1545 A70-21009

SHF avalanche transit time oscillator with FM noise reduction by injection phase locking
08 p1462 A70-21594

Mean flow and turbulent velocity over noise-producing regions of subsonic jet nozzle with and without delta wings
09 p1610 A70-22239

Jet aircraft engine noise control, discussing noise sources and built-in acoustic absorbers
09 p1743 A70-22759

Acoustic noise control on Boeing aircraft electromagnetic components, noting iron-core magnetostatic demanding transformer redesign
09 p1647 A70-22764

Microwave sources power stabilization, control and noise reduction using feedback techniques
09 p1649 A70-23275

Takeoff noise minimization by prescribing optimum takeoff trajectories, considering aircraft parameters influencing noise intensity at takeoff
11 p1979 A70-25814

Fourier and Hadamard transformation codings for multidimensional data channel noise immunity and bandwidth reduction
11 p2011 A70-26329

Pilot helmets, discussing sound attenuation, noise protection and speech intelligibility
12 p2177 A70-27040

Proportional fluid amplifiers noise and instability sources related to geometry and power jet flow, considering noise reduction methods
12 p2164 A70-27071

Aircraft noise reduction effects on airport capacity and community exposure levels
12 p2207 A70-27628

Transportation vehicle noise control measures and acceptability, discussing physical and operational source modifications using aircraft noise examples
12 p2336 A70-27849

Binary-valued digital pictures noise cleaning by propagation processes
12 p2188 A70-27937

Noise reduction design of Enstrom F-28A helicopter, noting operation at lower tip speeds and blade loading
12 p2162 A70-28096

Spurious output from C band radar magnetrons, discussing measurement procedures and noise reduction by waffle-iron waveguide filters
12 p2201 A70-28141

Noise characteristics and measurement, discussing aircraft noise generation and reduction
13 p2473 A70-28443

VTOL and STOL design and operation, discussing noise and vibration reduction
13 p2344 A70-28544

Jet engines for civil and military aircraft, discussing turbine designs and noise reduction
13 p2474 A70-28546

Noise rejection during synchronous quasi-coherent radio signal reception with binary narrow band linear filter used for voltage shaping
13 p2369 A70-29737

Quartz floating component design, discussing magnetic sensitivity temperature dependence and microseismic noise rejection properties
14 p2582 A70-30245

Climatology of safe threshold Mach number and airplane ground speed for boomless supersonic cruise, considering San Francisco-New York route
14 p2530 A70-30606

Noise of large commercial V/STOL aircraft and effect on design and operation, predicting acoustic signatures
14 p2531 A70-30854

Sonic boom minimization methods involving mass or energy addition
14 p2531 A70-30868

Commercial jet aircraft engine noise evaluation, discussing noise reduction and effects on airport neighbors
14 p2630 A70-31335

TWT noise level minimization in 8 mm band with circular spiral slow wave structure and five electrode gun
15 p2707 A70-31519

Combined radio and physical navigation systems, considering noise rejection and corrections of position and speed
15 p2772 A70-31623

He-Cd laser with cathaphoretic transport and diffusion return path, noting condenser critical temperature for radiation noise reduction
15 p2751 A70-31987

Aircraft fan and turbine noise reduction, discussing blade wake interaction, jet mixing and duct acoustic linings
16 p2963 A70-32946

Solid state spectrum centered receiver for eliminating externally generated pulse type interference between radar sets
16 p2862 A70-33066

Phase modulated holography for inherent noise reduction using thicker recording media, increasing signal beamwidth or beam ratio
16 p2904 A70-33137

Curved porous wall channels for noise suppression in power plants, ventilation systems, etc
18 p3216 A70-36302

Optimal incoherent signal reception in discrete information transmission systems with fluctuation and concentration noise, including Rayleigh fading
18 p3228 A70-36600

Sound transmission and suppression in turbomachinery fans and compressor ducts, using three dimensional wave equation [ASME PAPER 70-GT-58]
18 p3304 A70-36873

Noise rejection characteristics of ionospheric radiosondes via phase-code modulated signals, noting nonoptimal filter role in power loss
18 p3229 A70-37042

Ferrite reactive modulation amplifier design, using yttrium garnet for noise reduction
19 p3386 A70-37629

RF communication signal to noise improvement by time variant tracking filter with high Q superconductive resonant cavity
19 p3391 A70-38892

- FM demodulation threshold extension by correlation detection implemented in impulse noise cancellation system 19 p3382 A70-38893
- Traveling wave antenna arrays with resistance elements for coupling, measuring noise elimination capabilities 20 p3598 A70-40146
- Objective and subjective laser speckle noises in holography, discussing causes and methods of elimination 21 p3835 A70-40716
- Electro-optical modulation lock-in techniques for minimizing statistical fluctuations and eliminating internal noise in sampling of light signals 21 p3827 A70-41462
- Information transmission techniques by discrete amplitudes and increments, comparing effectiveness for noise rejection 22 p3986 A70-42495
- NASA acoustically treated nacelle program reducing noise under commercial transport flight path near airports 22 p4089 A70-42529
- Structural and environmental design criteria for acoustical duct-lining materials in turbofan noise suppression 22 p4089 A70-42531
- Duct lining parameters effects on engine inlet and fan discharge noise reduction during fan jet landing 22 p4090 A70-42532
- Test rig vehicle design for noise research on single stage high bypass ratio fans for quieter turbofan power plants [ALAA PAPER 69-492] 22 p4090 A70-42708
- Turbojet engines noise-suppressing nozzles flow rate and thrust characteristics calculation 22 p4092 A70-43371
- VHF omnidirectional range (VOR) receiver, considering noise reduction problem and active filter importance to signal improvement and system accuracy 22 p3992 A70-43586
- Coherent radar backscatter, calculating autocorrelation and power spectrum of spuri noise from periodic random phase injections for filter design to eliminate noise 22 p3992 A70-43591
- Picture transmitting systems noise rejection enhancement via redundancy, discussing video coding and decoding and signal filtration 23 p4159 A70-43760
- Phased locked AFC circuit, calculating internal harmonic noise reduction by proportionately integrating filter 23 p4161 A70-43960
- Multiplicative noise reduction during transmission of analog signals over tropospheric microwave relay links 23 p4162 A70-44090
- Jet aircraft noise reduction devices directed at turbulence fluctuation noise sources, noting effects on flight characteristics [ICAS PAPER 70-21] 23 p4233 A70-44112
- Aircraft noise reduction, discussing generation sources in propulsion system, noise levels and subjective responses 23 p4140 A70-44395
- Noise reduction regulations effects on subsonic transport design and configuration [SAE PAPER 700806] 24 p4290 A70-45876
- L-1011 aircraft optimum minimum noise pod design, describing technology, restraints and system requirements [SAE PAPER 700805] 24 p4393 A70-45877
- Noise suppression for high-bypass ratio CF6 turbofan engine in DC-10 airplane, considering effect on engine design [SAE PAPER 700804] 24 p4393 A70-45878
- STOL aircraft augmentor wing concept, examining noise suppression, flight research vehicle program and application to turbofan production aircraft [SAE PAPER 700812] 24 p4290 A70-45903
- Boeing 2707 SST design for low community noise, discussing engine-airframe matching effect [SAE PAPER 700808] 24 p4290 A70-45906
- Noise reduction design for subsonic transport turbofan engines [SAE PAPER 700807] 24 p4395 A70-45907
- SST sonic boom noise level reduction by thermal simulation of long body aircraft, considering thermal spike or keel [AIAA PAPER 70-1323] 24 p4291 A70-45942
- ### NOISE SPECTRA
- Absorbed RF plasma wave noise spectrum in region of anomalous dispersion, noting peak in far IR region 01 p0150 A70-10286
- Noise power spectrum characteristics for He-Ne laser as function of discharge characteristics, measuring effect of cold vs hot cathodes 01 p0111 A70-10745
- Correlation between sunspot number index and solar radio noise index relative to ionospheric propagation, noting computer analysis program and hysteresis effect 02 p0289 A70-12107
- Noise source model of Si planar diffused bipolar IC transistors in operational amplifiers, noting base-emitter junction burst noise 02 p0257 A70-12192
- Rate distortion function for class of sources, proving positive and negative sides of Shannon encoding theorem for noisy channels 02 p0266 A70-12611
- Sealed-off He-Cd laser construction, describing life test, noise, Cd transport characteristics and transverse magnetic field effect 03 p0501 A70-13582
- Discrete frequency noise generation from axial flow compressor blade row, using experiments in small scale Freon loop [ASME PAPER 69-WA/FE-22] 04 p0733 A70-14777
- Discrete frequency noise generation associated with wakes due to fluid flow over turbomachine blades, supporting spokes, flat plates, etc [ASME PAPER 69-WA/GT-13] 04 p0733 A70-14883
- Residential structures vibration response to aircraft flyover noise, discussing noise transmission, rattle phenomenon, spectra, etc [ASME PAPER 69-WA/GT-8] 04 p0770 A70-14887
- Discrete components in noise spectrum of heated and unheated supersonic air jets, using axisymmetric and conical nozzles 04 p0618 A70-15247
- Sound levels and frequency spectra of noises measured in AN-24 and IL-18 turboprop aircraft cockpits 05 p0796 A70-16925
- Two port isotropic antenna excited by independent noise sources for uniform power radiation in all directions and polarizations 06 p1021 A70-17574
- Noise field from ground testing of nuclear rocket engines operated at various reactor power levels 06 p1133 A70-18234
- Acoustic turbulence generated noise intensity and spectrum using statistical thermodynamics 07 p1194 A70-19618
- Spectral amplitude distribution of lightning spherics predicted over VLF-SHF range using theoretical analysis of lightning streamers 07 p1272 A70-20215
- Noise mean duration in surface communications links due to communications satellites interference, discussing irradiation emission and termination 08 p1456 A70-20570
- Noise variance extreme value estimator for biorthogonally block coded high rate telemetry system for Mariner missions 08 p1459 A70-20799
- Optimal satellite communication system design concerning station spectrum and interference limits 08 p1459 A70-20805
- Noise and gain formulas for wideband distributed-gain amplifiers using quadrupole elements and transmission line configurations 08 p1472 A70-20863
- Noise effects on joint operation of signal follow-up system with search device using semi-Markov random technique 08 p1461 A70-20864
- Effective noise temperature of planar aperture antennas in lossy inhomogeneous plasma slabs calculated by computer 09 p1646 A70-22704
- Quantizing noise measured for single integration delta modulation coders using unequal positive and negative integrator step sizes 09 p1638 A70-23368
- Broad band power amplification with Gunn effect diodes, describing frequency response and saturation characteristics and FM/AM noise spectrum measurements for reflection amplifier in X band 10 p1847 A70-23886
- Observation noise model for human controller remnant 10 p1823 A70-23893
- Human operator remnant data normalization noting observation noise spectral characteristics for compensatory tracking 10 p1824 A70-23899
- GaAs light amplifier p-n junction gain and output noise determination for wide photon energy ranges, studying input noise levels effects on sensitivity 10 p1928 A70-25167
- Differential Pulse Code Modulation (DPCM) system with quantizer separating slope overload and granular noise, using Fokker-Planck-Kolmogorov equation 10 p1844 A70-25204
- Nomograms simplifying noise and natural loop bandwidths calculation for phase locked loop receiver, determining limiter suppression factor 10 p1844 A70-25244
- Narrow band FM noise suggested for masking studies application, discussing noise properties 11 p2011 A70-26496
- Thermal plasma devices with discrete modes, describing periodic pulling and transition to continuous noise spectrum characteristic of turbulence 11 p2094 A70-26754
- Anomalous LF noise in receiving devices with traveling wave quantum paramagnetic amplifier 11 p2020 A70-26817
- Broadband and highpass LF noise in distant magnetosphere detected by VLF/LF experiment on OGO 1 satellite 12 p2222 A70-27183
- Liquid He temperature fluctuation effects on cryogenic superconducting bolometer noise spectrum, deriving transfer functions 12 p2237 A70-28156
- In-flight shock cell noise generation by static jets, discussing frequency prediction formula 13 p2347 A70-29078
- Noise rejection and spurious reception probability in optimal channel for continuous sequenced signal with undetermined arrival and overlapping spectra 15 p2696 A70-31509
- Frequency locked noise effect on beat frequency measurement of angular velocity with ring laser, comparing gyroscope and phase methods 15 p2749 A70-31551
- Noise sources and identification in low noise RF amplifiers via noise temperature or factors 15 p2708 A70-31952
- Radiometer employing frequency domain coding of noise-like signal spectrum, comparing with Dicke system 16 p2871 A70-32926
- Recording instrumental noise resolution of standard algorithm for cosmic ray stations 18 p3307 A70-36100
- High field noise emission from indium antimonide, suggesting electron-hole plasma as source 19 p3486 A70-37767
- Flow noise mechanisms, considering discharge, propeller, ventilator, jet engine, boundary layer, water pipe and supersonic aircraft sources 19 p3406 A70-38474
- Discrete components formation in noise spectra of axial turbocompressor intake, considering relationship between blades and rotor disk 19 p3353 A70-38652
- Rod surface roughness effect on eddying sound frequency and intensity and on aerodynamic resistance 19 p3353 A70-38654
- Supersonic air jet noise spectrum analysis at various pressures 19 p3354 A70-38659
- Supersonic jets noise spectra, using linear equations of moving medium acoustics 19 p3354 A70-38660
- Discrete components of noise frequency spectrum of free supersonic jet 19 p3354 A70-38661
- Noise spectra of two dimensional jet flowing from nozzle ejector, using dispersion equation 19 p3354 A70-38662
- Sound level vs duration evaluated for noise exposure using different exchange rates [ASA PAPER FF2] 20 p3578 A70-39125
- Noise field from ground testing of nuclear rocket engines operated at various reactor power levels 20 p3689 A70-39688
- Temporal and spectra combination effects on aircraft sound judged noisiness, using human subjects in anechoic chamber 20 p3580 A70-39712
- Photographic emulsions and photosensitive materials for holography, measuring noise spectral power density at high spatial frequencies by scattered light method 21 p3822 A70-40812
- Superconducting Sn bolometer under isothermal and nonisothermal conditions, measuring noise spectra dependence on displacement current and resistance 22 p4026 A70-42397
- Acoustic lining technology and materials for turbofan engine ducts, considering environmental factors and noise spectra 22 p4089 A70-42530
- Global thunderstorm activity experiment by Ariel 3 satellite, investigating lightning discharge number and noise power 22 p4015 A70-42778
- Silicon MOSTs LF noise model, discussing noise and gate voltages and trapping efficiency of surface states 22 p3996 A70-42916
- P-n junction dependent FM noise spectrum of UHF transistor power oscillator at transit frequency 23 p4161 A70-43789
- Aircraft noise sources, examining compressors with dynamic pressure devices and jets with turbulence investigations [ICAS PAPER 70-22] 23 p4232 A70-44111
- Anomalous LF noise in receiving devices with traveling wave quantum paramagnetic amplifier 24 p4351 A70-45189
- ### NOISE STORMS
- Metric type I and decametric type III bursts relationship, suggesting common generation by high energy electron outward streams from photosphere or low chromosphere 06 p1150 A70-18466

- Jupiter decametric noise storm commencement time defining constant planetary rotation period
08 p1580 A70-21572
- Two dimensional structure of 20 May 1966 noise storm from solar eclipse data obtained at ground stations
13 p2493 A70-29390
- Circularly polarized emission from types I and 4 bursts and noise storms, considering mode coupling in warm plasma, gyroradiation and Cerenkov radiation
13 p2479 A70-29851
- Type I solar radio burst chains during noise storms, determining lifetime, bandwidth, frequency drift and fine structure
13 p2479 A70-30002
- NOISE SUPPRESSORS**
U NOISE REDUCTION
- NOISE THRESHOLD**
Threshold extension techniques using impulse noise detection and elimination implemented at phase lock loop demodulator output
08 p1460 A70-20811
- Multichannel performance measurement of threshold extension FM demodulators using click suppression techniques
08 p1460 A70-20812
- FM noise threshold reduction achieved through narrow bandwidth of self synchronized N-path filter tracking incoming FM carrier
10 p1833 A70-24233
- Noise threshold performance of suboptimum PPM telemetry receivers using slicer for detector
11 p2010 A70-26273
- Automatic threshold regulation for radar applications, using feedback control device based on noise peak probabilities
11 p2012 A70-26717
- FM threshold extension for system performance improvement, comparing impulse noise elimination, correlation detection and delta modulation signal processing techniques implemented at demodulator output
21 p3787 A70-41334
- Threshold output characteristic of FM signals, generalizing Gaussian baseband modulation solution to obtain autocorrelation function of output signal plus FM discriminator noise
24 p4313 A70-46063
- NOISE TOLERANCE**
Residential structures vibration response to aircraft flyover noise, discussing noise transmission, rattle phenomenon, spectra, etc
[ASME PAPER 69-WA/GT-8] 04 p0770 A70-14887
- Noise effects on tracking performance, electroencephalography /EEG/ and galvanic skin resistance /GSR/
04 p0643 A70-14977
- T2L logic circuits design and coherent noise immunity
11 p2021 A70-26833
- Geomagnetic noise constraints on weak field measurements in upper magnetosphere
13 p2401 A70-30056
- Jet engine noise technology evaluation, noting effects on airport neighbor
16 p2971 A70-34262
- Annoyance assessment for sonic boom series exposure near airport
16 p2843 A70-34325
- Ear protection for persons exposed to various jet aircraft noise environments
24 p4306 A70-45121
- NOMINAL VALUES**
U APPROXIMATION
- NOMOGRAMS**
U NOMOGRAPHS
- NOMOGRAPHS**
Solid bodies unsteady thermal conductivity in presence of quasi-steady heat transfer under combined radiant and thermal fluxes, presenting thermodynamic nomograms
01 p0213 A70-10215
- Transistor behavior prediction at threshold of large signal conditions, using nomograms to evaluate maximum drive levels before distortion onset
03 p0452 A70-13966
- Nomographical solution of electroexplosive device firing time equation permitting firing data prediction from blueprint data
03 p0548 A70-14117
- Nomograms for spectral transparency of atmosphere at 2.8-5.6 microns
06 p1053 A70-17208
- Nomograms for ultrasonic shadow defectoscope acoustic channel parameters calculation
06 p1065 A70-17921
- Specifications nomographs for earth resources IR radiometers, considering ground resolution, aperture diameters, detector arrays, etc
[AIAA PAPER 70-317] 09 p1677 A70-22870
- Lebedev nomogram determination of climatic parameters dependability, considering underlying theory and temperature sums
09 p1718 A70-23171
- Nomogram selecting dimensions of steel or Al alloy cantilever beams for transducer design using strain gages
10 p1890 A70-24593
- Nomograms simplifying noise and natural loop bandwidths calculation for phase locked loop receiver, determining limiter suppression factor
10 p1844 A70-25244
- Nomograms for thermoelastic stress in plate determined as function of dimensions and heat transfer
10 p1965 A70-25300
- Nomographic Richardson-Dushman equation solutions for thermionic electron emission devices, giving current density for various work functions and electrode temperatures
12 p2271 A70-26894
- Nomogram construction for graphical solution of two body problem using radius-vector and velocity components applied to solar system
12 p2311 A70-28310
- Nomogram for true and apparent radiometric temperatures of remote graybodies in presence of atmosphere
14 p2577 A70-31231
- Radiation planning nomogram to display radiobiological effects of dose, onset time and shielding factors for manned space vehicles
15 p2690 A70-31894
- Nomograms for meteor geocentric velocity and trajectory with correction for zenith attraction and radiant
18 p3315 A70-36605
- Traveling wave antenna array single lobe design using mode charts to reduce errors
19 p3376 A70-37688
- Safety factor estimation by nomographic techniques for eye protection against direct viewing of laser beam
21 p3768 A70-40761
- Effective pressure ratio nomographs for mechanical energy conversion and heat transfer of closed regenerative Stirling engines, using isothermal theory
22 p4091 A70-42757
- Gas turbine design by nomograms with minimal preliminary calculations
22 p3960 A70-43368
- Tunnel diode amplifier design, using gain-bandwidth nomograph
22 p3999 A70-43487
- Corrected geomagnetic midnight local time calculations, using nomogram
23 p4187 A70-43862
- NONADIABATIC CONDITIONS**
U ADIABATIC CONDITIONS
- NONADIABATIC THEORY**
Length calculation method for nonadiabatic imaginary tip extension of heat exchanger fins, predicting heat conduction rate
01 p0215 A70-10842
- Thermal imbalance effect on stellar pulsational stability using linear quasi-adiabatic pulsation theory
10 p1946 A70-24980
- NONAXISYMMETRY**
U ASYMMETRY
- NONCONDUCTORS**
U ELECTRICAL INSULATION
- NONCONSERVATIVE FORCES**
Thermomechanical coupling effect on stability of elastic continuous systems subjected to nonconservative forces, reducing flutter load by thermal damping
08 p1589 A70-21245
- Nonconservative problems motion stability analysis based on restricted admissible displacements, establishing two variational principles
11 p2138 A70-26172
- Linear dynamic systems under nonconservative and harmonic forces, examining stability conditions
16 p2952 A70-33896
- Mass distribution role in stability theory of rods under nonconservative buckling load
18 p3335 A70-35961
- Group variational procedure for first integrals of nonconservative dynamical systems
19 p3458 A70-38060
- Mechanical destabilizing model of nonlinear damping in nonconservative systems with follower forces, using Liapunov method
19 p3542 A70-38065
- Continuous one dimensional nonconservative elastic systems under complex forces, examining stability theory
19 p3546 A70-38341
- Elastic bodies stability criteria, investigating loss under nonconservative forces influence
20 p3722 A70-39785
- Undamped elastic cantilever column with concentrated masses, considering transition from stability to divergence under nonconservative forces
24 p4421 A70-45286
- NONDESTRUCTIVE TESTS**
NT PRELAUNCH TESTS
- NT STATIC FIRING**
Nondestructive evaluation of components and materials in aerospace, weapons systems and nuclear applications - Conference, San Antonio, April 1969
01 p0095 A70-10001
- Inspection penetrant systems reliability and performance predictability for nondestructive flaw detection
01 p0096 A70-10005
- Metal surface microscopic defects detection and display using diffused radioactive Kr-85 gaseous penetrant for anodized flaws, bearing porosity and turbine blade cracks
01 p0096 A70-10006
- Contact thermographic materials application to nondestructive materials testing based on heat capacity, costs, removal time, equipment, personnel skill and training, etc
01 p0097 A70-10007
- Eddy current inspection method for detecting fatigue cracks location and depth in fastener holes
01 p0097 A70-10008
- S/N fatigue life gage for nondestructive evaluation of cumulative damage, discussing calibration and two step, block and random tests
01 p0053 A70-10009
- Nondestructive testing and fatigue life analysis of cyclically loaded mechanism, determining dynamic responses to velocity shocks by computer techniques
01 p0053 A70-10010
- Transient magnetic resonance technique for nondestructive testing of elements with nuclei having magnetic moment, considering cereal grains, propellants, metal powder and plastics
01 p0097 A70-10014
- Acoustic emission to monitor metal structures, pipes, pressure vessels and graphite shapes to detect structural deterioration before failure, emphasizing nuclear reactor pressure systems
01 p0054 A70-10015
- Ultrasonics inspection applied to reentry vehicle heat shields and composite materials, verifying anomalies by microscopic area examination
01 p0097 A70-10016
- Bolted joints inspection using mechanical impedance algorithm method involving bolt head mechanical shock pulse response in adjacent structure
01 p0098 A70-10017
- Cessna single engine aircraft tubular and flat steel landing gear springs, describing quality control through nondestructive testing
01 p0098 A70-10018
- Lamb wave techniques using guided ultrasonic waves for solid cylindrical objects nondestructive testing
01 p0098 A70-10019
- Nondestructive X ray stress measurement equipment for large specimen, using diffractometer focusing
01 p0085 A70-10022
- Electronic materials nondestructive evaluation techniques, describing analytic tests for chemical, structural, electrical and optical characteristics determination
01 p0085 A70-10023
- Nondestructive testing for Apollo Command and Service Module, describing requirements added to quality control scope
01 p0098 A70-10026
- NDT used in airline and aircraft maintenance emphasizing practicability, reliability and costs
01 p0098 A70-10027
- NDT peculiar to airline maintenance, emphasizing inspection of complex parts hidden within assembly
01 p0099 A70-10028
- Laser processing applied to optical nondestructive materials tests for surface flaws
01 p0086 A70-10416
- Ultrasonic imaging system for flaw detection, analyzing welds
01 p0104 A70-10881
- Ultrasonic holography in nondestructive testing, discussing metal block with simulated defects
01 p0089 A70-10882
- Aircraft nondestructive testing, discussing radiography requirements, ultrasonic bond testing technique, etc
01 p0104 A70-11319
- Nondestructive inspection program for DC 10 aircraft maintenance
02 p0308 A70-12273
- Sandwich structures nondestructive testing by holographic interferometry, discussing system operation, specimen stressing, acoustic vibration, etc
02 p0309 A70-12274
- Spherical conducting body effect on induction coil impedance and EMF in nondestructive testing using eddy current probes
02 p0300 A70-12478
- Steel objects microstructure and hardness tested by continuous magnetic technique, describing experimental apparatus model
02 p0300 A70-12479
- Ultrasonic tracking type transducers for testing ribbed and smooth walled pipes using shadow and two probe echo methods
02 p0300 A70-12480
- Piezoprobe parameters calculation for controlling angular welded connections of boiler assembly elements
02 p0300 A70-12481

Electrodynamic contactless method for ultrasonic nondestructive testing of materials based on natural frequencies shift with and without defects
02 p0301 A70-12483

PKR portable xeroradiographic defectoscope for nondestructive testing of steel and Al alloys
02 p0301 A70-12486

Programming device for positioning samples under X ray beam in testing welded seams and parts
02 p0301 A70-12488

Ferroprobe coercimeter with attached electromagnets for nondestructive hardness testing, describing components and mounting
02 p0301 A70-12489

Sheath-enclosed steel cable inspection using induction coil transducer in conical sleeve
02 p0301 A70-12490

Acoustic emission analysis for material evaluation and polymorphic phase transformations characterization for metals and alloys, discussing electronic instrumentation and experimental techniques
02 p0276 A70-12551

Lamb waves behavior applied to defect evaluation in nondestructive tests of solid elongated cylindrical objects
02 p0276 A70-12552

Holographic interferometry applications in experimental mechanics, illustrating nondestructive testing by flaw detection in bonded honeycomb
03 p0481 A70-12959

Honeycomb structure fracture initiation flaw detection method using liquid crystal determination of stress concentration sites, noting absence of external heat source
03 p0515 A70-13121

Neutron radiography for visual nondestructive failure analysis and production inspection of ordnance components compared with X ray radiography
03 p0494 A70-14122

Nondestructive testing of Apollo CSM/Command and Service Module/ spacecraft ordnance explosive devices by indirect and direct neutron radiography
03 p0494 A70-14123

Nondestructive test procedures for maintaining and determining serviceability of penetrant inspection materials during use
05 p0844 A70-15780

Reinforced plastics destructive and nondestructive testing including standard methods, equipment and procedures applicable to materials and parts
05 p0874 A70-16621

Composite materials properties test methods, discussing nondestructive method for shear or rigidity modulus of square plates
05 p0874 A70-16622

Correlations between 100 percent inspection by automatic equipment and quality control acceptance sampling in vacuum tube industry
06 p1077 A70-17986

Acoustic impedance method for nondestructive testing exploiting phase defect of signal from piezoelectric transducer
06 p1074 A70-18629

Metal adhesive joints nondestructive tests involving acoustic and superasonic, X ray and heat flow characteristics methods
08 p1503 A70-20885

Nondestructive process control analyzer for spot welds in aircraft structural components, monitoring expansion, current and spotweld properties
08 p1507 A70-21486

Liquid oxygen usage inspection penetrant systems combining nonreactivity with flaw detection sensitivity
08 p1508 A70-21745

Nondestructive betatron radiographic testing techniques for Ti billets, evaluating various lead screen, film and geometry combinations
08 p1508 A70-21746

Nondestructive testing and inspection by acoustic emission from stressed materials, discussing microstructure effect and crack initiation detection
08 p1508 A70-21747

Nondestructive testing of small metal tubing, discussing eddy current, ultrasonic and electromagnetic inspection and dye penetrants
08 p1509 A70-21748

Thermomechanical tests effectiveness and determination of stress level defining boundary between destructive and nondestructive testing
09 p1689 A70-22004

Destructive and nondestructive tests optimum procedure for quality control based on information theory, decision statistics and cost optimization
09 p1691 A70-22573

Nondestructive tests for diffusion-formed refractory alloy coatings used as oxidation protection for hypervelocity spacecraft and reusable systems
09 p1692 A70-22679

Nondestructive test procedures development and implementation for bond strength of honeycomb sandwich and metal-metal adhesive bonded structures of F-5 and T-38 aircraft
09 p1692 A70-22798

Reliability testing of waveguide ferrite devices based on quantitative technique using circular charts with filled in endurance test results
09 p1652 A70-23661

Silicon high resistivity surface barrier detectors fabrication for nondestructive tests, discussing long term sensitivity and calibration
10 p1893 A70-24169

Ultrasonic traveling waves for nondestructive testing, discussing scattering and velocity anisotropy in polycrystalline metals, propagation in glass, epoxy resins shear moduli, etc
10 p1894 A70-24171

Thermal transducer for rapid nondestructive testing, discussing imaging of specimen bond defects and thermal property differences
10 p1894 A70-24173

Acoustic emission monitoring methods to detect crack formation and growth in ceramics
10 p1894 A70-24174

Acoustic impact technique /AIT/ for aerospace structures nondestructive testing, describing theory, instrumentation and applications
10 p1894 A70-24175

X ray laminography for nondestructive testing based on synchronous rotation of source, sample and image forming planes
10 p1895 A70-24577

Cost and deadline planning for system development, suggesting theoretical methods tests regarding applicability
10 p1971 A70-24597

C-5A airframe composite materials fabrication, tooling, processing, quality assurance and nondestructive test methods
11 p2058 A70-25572

Heat flow comparator for nondestructive testing of resin-impregnated fiber glass, detecting nonuniformities leading to thermal properties variation
11 p2059 A70-25764

NDT methods for fiberglass, graphite and boron fiber composites for aircraft structures
12 p2243 A70-27465

Eddy currents magnetic field structure over surface defects in conducting objects, noting NDT applications
13 p2404 A70-28661

NDT techniques in manufacturing of Apollo command and service modules
13 p2420 A70-29243

High speed thermal transducer for imaging bond defects and thermal property differences within test specimens during nondestructive tests
13 p2420 A70-29244

Radio Influence Voltage /RIV/ nondestructive test method for detecting voids in neoprene-steel structures or other elastomers bonded to metal
13 p2420 A70-29245

Nondestructive noncontacting microwave depth measurement of thin slits and cracks in metal surfaces
14 p2584 A70-30507

Nondestructive bond inspection by interferometric holography of ultrasonically excited plates
14 p2588 A70-31166

Nondestructive screen test efficiency, determining potential failures of electric components by Bayes theorem
15 p2748 A70-32659

Collection of papers on nondestructive testing covering automatic profile recording, holography, radiography, leak detection, etc
15 p2742 A70-32776

Holography for nondestructive testing, describing theory, equipment and applications
15 p2742 A70-32779

Leak detection techniques, describing back pressurizing and calibrating methods
15 p2743 A70-32781

NDT for structural corrosion evaluation, including ultrasonics, X rays, penetrating liquids and induced currents
16 p2929 A70-32924

Electrical, electronic, electromechanical, pneumatic and hydraulic subsystems failure pattern determination, discussing sensing techniques in signature analysis
16 p2917 A70-33505

[ASME PAPER 70-DE-34] Metal matrix composite resistance spot welding, discussing value of nondestructive tests
17 p3100 A70-34636

Fiberglass reinforced plastics fatigue properties, describing electric model and nondestructive testing
17 p3183 A70-34658

Fatigue and surface crack detection using holographic techniques
17 p3086 A70-35015

IR NDT bond inspection system for helicopter rotor blade honeycomb box assemblies, using closed circuit slow scan video system to detect bondline voids
17 p3101 A70-35184

Magnetic methods of flaw detection, discussing theory and application to welded butt joints
18 p3263 A70-36521

Pulsed laser holographic nondestructive testing optimization technique, monitoring honeycomb panel surface temperature during thermal stressing
18 p3259 A70-36754

Acoustical holography forming optical wavefield analog for nondestructive testing, medical diagnosis, underwater and seismic imaging
19 p3425 A70-37887

Nondestructive testing of diffusion bonded metals for quality assurance
19 p3437 A70-38423

Microjoining in electronics industry, discussing technologies and nondestructive testing
19 p3437 A70-38424

Gaseous radioactive penetrant inspections for early low cycle fatigue in aircraft engine materials, discussing impact on maintainability
19 p3441 A70-38828

Holographic ultrasonic imager using liquid surface detector for real time imaging of test objects moving through viewfield, discussing nondestructive test applications
19 p3433 A70-38829

Condition Monitored Maintenance program for turbine engines eliminating total overhauls at specified time, using NDT
19 p3441 A70-38830

Semiconductor silicon power diodes nondestructive quality control, discussing optimal sampling procedures
20 p3595 A70-38969

Composite materials physical properties measurement and defect locations detection by NDT techniques
20 p3636 A70-39210

Unidirectional and multidirectional carbon/carbon composites quality and performance evaluation by NDT methods, including X ray radiography, ultrasonic test, pulse echo mapping, etc
20 p3654 A70-39211

Laser holography for nondestructive testing of C composite structures, reducing fringe patterns to radial deformation and surface strain for cylinders and cones
20 p3718 A70-39212

Carbon/carbon composites thermal and mechanical properties measurements by NDT including image transducer, IR scanning and ultrasonic methods
20 p3636 A70-39213

Surface adsorbed and absorbed radioactive Kr 85 gas for displaying surface microdefects in materials
20 p3638 A70-39950

Optical thermal testing by IR radiation, reviewing thermistor bolometer, various detectors, radiometric microscopes, NDT equipment, etc
21 p3831 A70-40747

Nondestructive ultrasonic measurements of crack depth in high strength steel plate weldments, studying low cycle fatigue
21 p3834 A70-41943

Carbon fiber reinforced polymer /CFRP/ failure mechanism, discussing nondestructive testing, destructive and cyclic loads
22 p4058 A70-42476

Papers on research techniques in nondestructive testing covering acoustic emission, ultrasonic spectroscopy, imaging systems angle reflectivity and holography, optical methods, etc
22 p4026 A70-42581

Acoustic emissions method for monitoring structural stability of solid materials assemblies via crack formation and movement detection
22 p4027 A70-42582

Ultrasonic spectroscopy in nondestructive materials tests, discussing electronic equipment design, FM, pulse and pulsed FM methods
22 p4027 A70-42583

Ultrasonic imaging systems of nondestructive testing, discussing photographic and chemical systems, thermal, optical and mechanical methods and electronic systems
22 p4027 A70-42584

Ultrasonic Rayleigh critical angle reflectivity of liquid-solid interface energy, detecting near-surface properties changes
22 p4027 A70-42585

Ultrasonic holography for nondestructive testing, discussing reference beams and analogies to optical and electronic methods
22 p4028 A70-42586

Laser application to nondestructive testing via holography and hologram interferometry
22 p4028 A70-42587

Data handling and processing methods for non-destructive test data translation and interpretation, using scanning test model
22 p3993 A70-42588

Communication network approach to submillimeter wave applications in nondestructive testing, deriving transport equations for EM wave propagation
22 p4028 A70-42591

Multiparameter eddy current test methods, describing test coil output signal amplification, demodulation and recombination
22 p4028 A70-42592

Pulsed eddy currents in metals nondestructive testing, discussing masked probes, reflection systems, correlation and filtering methods, etc

22 p4028 A70-42593

Microwave propagation, instrumentation and use in nondestructive testing, discussing components, methods and wave propagation equations

22 p4029 A70-42594

IR radiation, transmission and detection in non-destructive testing, discussing atmospheric transmission, thermal and photon-type detectors, etc

22 p4029 A70-42595

Aircraft engine diagnostics and defectoscopy, considering radioactive isotopes testing for component wear and performance

22 p4046 A70-43083

Nondestructive testing by ultrasonic acousto-optical imaging in opaque objects

22 p4047 A70-43518

Ultrasonic wave velocity measurements for flow detection and modulus of elasticity of carbon-carbon composites

22 p4047 A70-43519

Modulation transfer function applied to optimal holographic nondestructive testing systems, using edge gradient analysis

22 p4039 A70-43520

Nondestructive measurement of elastic and plastic deformation in soldered joints and printed circuit boards by holographic interferometry

22 p4047 A70-43521

Nondestructive testing of adhesively bonded metal assemblies

22 p4047 A70-43523

Nondestructive tests for flaw detection during various aircraft production and operation phases

22 p4047 A70-43531

Nondestructive tests and controls in metallurgy and nuclear technology - Conference, Saclay, France, June 1968

22 p4040 A70-43617

Acoustic and scanned holography for nondestructive testing, showing defects in metal samples

22 p4041 A70-43620

Fatigue crack growth detection by acoustic emission techniques

23 p4194 A70-44214

Photochromic paint nondestructive testing for survival equipment, detecting bond defects and sandwich water

23 p4197 A70-44490

Thermal IR nondestructive testing of adhesively bonded boron composite/Al honeycomb structures, discussing surface, cross section and instrumentation sensitivity effects

24 p4341 A70-45570

Ultrasonic delta technique inspection method for flaw detection in weldments or wrought materials

24 p4335 A70-45572

Reflector materials flow size and orientation using ultrasonic spectral frequency analysis

24 p4335 A70-45573

X ray attenuation factor calculation as function of radiation energy and test material nature and thickness for nondestructive defectoscopy

24 p4341 A70-45581

Nondestructive testing - Conference, Hanover, June 1970, General problems

24 p4342 A70-45676

Nondestructive testing for aircraft maintenance, considering economics

24 p4342 A70-45677

Nondestructive testing technology impact on military aircraft maintenance, discussing training, applications and advantages

24 p4342 A70-45678

Nondestructive testing technology, emphasizing component designer role in facilitating inspection of surface defects

24 p4342 A70-45679

Nondestructive testing - Conference, Hanover, June 1970, Ultrasound, Part I, Instruments, methods and defect evaluation

24 p4342 A70-45680

Nondestructive testing - Conference, Hanover, June 1970, Electric and magnetic methods

24 p4343 A70-45693

Nondestructive defectoscopic diagnostics, applying cybernetics to materials testing

24 p4344 A70-45694

Finite thickness metal plate eddy current response to pulsed field from aperture probe

24 p4344 A70-45696

Eddy current nondestructive tests for surface defects detection, determining optimum test parameters based on calculation

24 p4344 A70-45697

Eddy current magnetic probe with frequency scanning for signal-noise discrimination in nondestructive testing of tubes

24 p4336 A70-45698

Metal sheets thickness measurement and monitoring by through-transmission eddy current nondestructive testing, using phase locked amplifier

24 p4344 A70-45699

Encasing and welded pipes flaws detection with high resolution by nondestructive testing, using eddy current method

24 p4345 A70-45702

Nondestructive tests of work-hardening Al alloy structural deterioration due to overheating, using eddy current conductivity techniques

24 p4345 A70-45703

Metallic rods and tubes permeability and resistivity nondestructive measurement by AC apparatus with self balancing sensing coil, using computer program for data reduction

24 p4345 A70-45704

Nonmetallic nonconductive composite materials physical properties by swept microwave frequency nondestructive testing

24 p4345 A70-45705

Nondestructive testing - Conference, Hanover, June 1970, Radiography

24 p4345 A70-45706

Radiography for nondestructive tests, considering image quality specification and choice of geometric progression for determining visibility

24 p4337 A70-45709

Gamma ray nondestructive tests for materials defects, discussing cinematic, geometric and radiological factors effects on detection

24 p4337 A70-45711

Industrial radiography for nondestructive control of products quality, discussing exposure time determination method

24 p4337 A70-45712

Nondestructive testing - Conference, Hanover, June 1970, Material properties determination

24 p4345 A70-45717

NDT for aircraft service life extension, discussing fatigue tests and crack detection

24 p4346 A70-45719

Nondestructive examination for plastics, discussing transmission, microwave and ultrasonic tests

24 p4346 A70-45720

Nondestructive thermal and thermochemical treatment penetration depth measurement in metal, examining magnetic test and ultrasonic techniques

24 p4346 A70-45721

Radiography and stray flux methods in nondestructive testing - Conference, Hanover, June 1970

24 p4346 A70-45722

Automatic TV radioscopic X ray control for mass NDT of refractories and grinding wheels

24 p4368 A70-45723

Remanence and saturation methods for magnetic-particle flaw detection

24 p4346 A70-45726

Defect detection by measurement of magnetic field leakage around flaw

24 p4346 A70-45727

Nondestructive testing - Conference, Hanover, June 1970, Materials properties determination, Stress measurements

24 p4347 A70-45728

Residual stress measurement using programmed horizontal X ray diffractometer

24 p4425 A70-45729

Nondestructive inspection methods for welded structures affected by stress corrosion

24 p4347 A70-45730

Nondestructive testing - conference, Hanover, June 1970, Material properties determination, covering electric, magnetic, liquid penetrant and thermal methods

24 p4347 A70-45735

Nondestructive tests for performance levels, discussing signature analysis as methodology

24 p4338 A70-45736

Oscillating pendulum equipment for nondestructive material tests, determining longitudinal and transverse elastic moduli of specimen

24 p4338 A70-45738

Potentiometer application to nondestructive tests of materials, operation principles, methodology and advantages

24 p4338 A70-45739

DC potentiometer for nondestructive tests of structural components, obtaining crack detection, depths and angles and wall thicknesses

24 p4338 A70-45740

Inspection penetrant development for flaw detection, considering entrapment efficiency and dimensional sensitivity

24 p4348 A70-45743

Metal and nonmetal thermal nondestructive tests based on surface temperature distribution produced by heat treatment

24 p4348 A70-45744

Nondestructive testing - Conference, Hanover, June 1970, Neutron radiography and holography

24 p4375 A70-45745

Nonweldable internal flaws detection containing oxides in steel slabs by neutron activation analysis

24 p4376 A70-45750

Holographic interferometry for NDT inspection of adhesive bonded honeycomb sandwich aerospace structures

24 p4338 A70-45754

Holographic nondestructive testing of laminate structures, honeycomb-sandwich panels and rubber-to-metal bonds

24 p4338 A70-45755

Radiative flaw detection problems, calculating gamma radiation scattering

24 p4348 A70-45848

Liquid compensators for gamma ray flow detection of complex metal product configurations, considering radiation source energy spectrum and specimen density

24 p4348 A70-45849

Betatron monoenergetic electron beams in radiometric, spectrometric and radiographic testing of composite materials

24 p4339 A70-45850

Fast neutrons for radiogenic defectoscopy performance, sensitivity and cost efficiency

24 p4377 A70-45851

NONEQUILIBRIUM CONDITIONS

Nonequilibrium and equilibrium schemes studies of nuclear symmetry energy of finite nuclei, discussing binding energy of nuclei with neutron excess

01 p0148 A70-11106

Nonequilibrium initial condition combustion effects on propellant performance for hydrazine/ chlorine pentafluoride and hydrogen/fluorine with equilibrium, kinetic and frozen nozzle flow

04 p0732 A70-15423

Ballistic range measurements of vibrational nonequilibrium effects on leading edge shock wave shape for cone-cylinders fired through chlorine atmosphere at supersonic speeds

04 p0621 A70-15601

Nonequilibrium processes and initial conditions in early universe, discussing neutrino viscosity efficiency at removing shear anisotropy and Misner model

05 p0907 A70-16002

Nonequilibrium models describing two phase critical discharge of initially saturated or subcooled liquid through sharp edged and smooth inlet geometries

05 p0956 A70-16162

Monte Carlo calculations of nonequilibrium radiative transport, including weighting and biasing techniques

05 p0958 A70-17084

Witham radiative acoustics, analyzing nonequilibrium waves propagating in nongray radiating and absorbing gas

06 p1173 A70-17514

Nonequilibrium processes behind shock wave in shock tube supersonic air and nitrogen flow, using photoelectrical shadow method

06 p1053 A70-18562

BBGKY hierarchy state functional formalism in nonequilibrium statistical mechanics for many particle system using Fourier transformation

11 p2087 A70-26548

Nonequilibrium self gravitating medium unified thermodynamics theory based on propagators, describing spatial and temporal fluctuations and coupling for galactic formation

12 p2310 A70-27978

Collision coefficients of reaction and inverse reaction for nonequilibrium processes with variable distribution functions and cross sections

13 p2461 A70-28920

Plane electromagnetic waves propagation in isotropic medium in electromagnetic nonequilibrium conditions

15 p2790 A70-32275

Rotational relaxation of diatomic molecular excited electronic state at high temperatures, discussing nonequilibrium region behind shock wave front in nitrogen

21 p3854 A70-42060

NONEQUILIBRIUM DRAG

U FRICTION DRAG

NONEQUILIBRIUM FLOW

Nonequilibrium flows covering small disturbance theories, steady one dimensional flow, gas particle flow relaxation and expansion flow gas dynamics

01 p0062 A70-10802

Linear small disturbance theories applied to two component gas mixture with fluid motion accompanied by nonequilibrium effects, discussing linear convection and reaction processes

01 p0062 A70-10803

Nonequilibrium effect of expanding water vapor condensation on supersonic nozzle flows with or without inert carrier gas

01 p0063 A70-10806

Integral theory for two dimensional incompressible turbulent boundary layer in nonequilibrium flows, describing velocity profile in momentum and energy equations

02 p0283 A70-12335

Dissipation integral method for turbulent boundary layer problem based on nonequilibrium flow, analyzing inner and outer regions

02 p0283 A70-12338

Nonequilibrium two phase forced convection flow, describing pressure, temperature and void fraction measurement techniques

02 p0305 A70-12838

Supersonic nonequilibrium two phase flow in Laval nozzle from numerical solution of quasi-linear hyperbolic equations

04 p0617 A70-15229

Classical Couette flow for emitting and conducting gas media, discussing velocity distribution and temperature effects at LTE and non-LTE

04 p0787 A70-15675

Radiating gas flows during hypersonic planetary reentry, discussing atmospheric composition, shock layer characteristics, nonequilibrium flows, etc

06 p0985 A70-18558

Frozen flow effect in hypersonic wind tunnel nozzle on parameters of nonequilibrium incident flow past wedge

09 p1604 A70-22446

Time dependent analysis for quasi one dimensional, vibrational and chemical nonequilibrium nozzle flows approaching steady state solution by finite difference technique

11 p1976 A70-25974

Population inversions in rapidly expanded flows of nonequilibrium gases, discussing kinetic processes in cooled mixtures of shock heated nitrogen and carbon dioxide

11 p2041 A70-26572

Pressure distribution over lateral surface of truncated cones in nonequilibrium flow, analyzing physicochemical transformations effect

12 p2159 A70-28246

Pseudo one dimensional dissociational nonequilibrium nozzle flows, obtaining equilibrium and nonequilibrium solution through similar transformation of governing equations

14 p2527 A70-30264

Linearized gas mixture nonequilibrium flow fields, analyzing consequences of multiplicity of principal relaxation frequencies

14 p2566 A70-30474

Supersonic nonequilibrium gas mixture flow past segmental bodies nose areas to simulate Venusian atmosphere, determining temperature, pressure and concentration distributions

15 p2796 A70-31483

Maximum thrust nozzles design for rotational or nonequilibrium simple dissociating gas flows, including boundary layer effects

[ALAA PAPER 70-707]

16 p2891 A70-33567

Experimental and numerical nonequilibrium shock layer around cones in hypersonic pure oxygen flows with simultaneous rotational, vibrational and dissociation relaxation

[ALAA PAPER 69-136]

16 p2894 A70-33858

Inviscid air nonequilibrium shock layer properties correlation based on plenum entropy, predicting composition of downstream converging-diverging nozzle expanding air flow

[ALAA PAPER 70-866]

16 p2838 A70-33909

Vibrational nonequilibrium nozzle flow problems, obtaining similar solutions for various initial conditions and nozzle geometries

[ALAA PAPER 70-804]

17 p3065 A70-34459

Collection of papers on nonequilibrium flows, Part 2, covering relaxation gas dynamics, nozzle flow, method of characteristics, etc

17 p3071 A70-35466

Weak nonlinear one dimensional wave propagation in nonequilibrium flow, using governing system characteristics for reference coordinates

17 p3071 A70-35468

Nonequilibrium nozzle flows involving molecular vibrational energy relaxation and composition changes from gas phase chemical reactions respectively

17 p3071 A70-35469

Method of characteristics for nonequilibrium flow fields analysis, reviewing theory, numerical methods and examples

17 p3071 A70-35470

Isotropic fluid systems in nonequilibrium, investigating thermodynamic characteristics of transport phenomena

17 p3072 A70-35529

Nonequilibrium fluid system with two subsystems in local equilibrium, investigating thermodynamic properties including entropy creation

17 p3196 A70-35530

Time correlation functions approach to calculation of properties of nonequilibrium ensembles in fluid molecular motions

17 p3197 A70-35535

Dilute gas transport expressions experimental substantiation, emphasizing nonequilibrium thermodynamics as macroscopic theory rather than empirical postulate

17 p3072 A70-35536

Nonequilibrium gas states evolution in detached wave front of hypersonic blunt body, comparing vibrational relaxation in free flight and wind tunnel flow

18 p3335 A70-35962

Nonequilibrium ionized hypersonic flow over blunt body at low Reynolds number, using thin shock layer assumption in analysis

18 p3208 A70-36689

Multicomponent chemically unstable nonequilibrium gas flow past body, taking into account boundary layer behavior

19 p3373 A70-38182

Solid body nonelastic deformation in terms of thermodynamic principles of nonequilibrium processes

20 p3718 A70-39246

Nonequilibrium processes and body geometry as stagnation point conditions in blunt body inviscid flow

20 p3557 A70-39355

Convergent-divergent nonequilibrium nozzle flow numerical solution by time dependent technique, investigating rapid vibrational nonequilibrium super-sonic expansion of gas mixture with population inversion

20 p3609 A70-39655

Compressible hypersonic turbulent boundary layers solution by finite difference method, relating mixing length to velocity profile shape factor

20 p3684 A70-40269

Nonequilibrium flow adjacent to cooling tube wall confining cascade arc plasma electrical discharge

21 p3805 A70-41763

Equations for unsteady frozen nonequilibrium flow of dissociating and relaxing gas, using Lighthill ideal dissociating diatomic gas for thermochemical model

22 p4124 A70-42754

Computerized nonequilibrium thermochemical gas dynamic solutions for nozzle, shock tube and stream tube flow with arbitrary species and kinetic reactions numbers

22 p3982 A70-42762

Dissociative nonequilibrium hypersonic flow of low density gas mixtures over flat plate in free stream, noting catalytic wall effect on flow field

23 p4135 A70-44604

Non-LTE radiative gas flow conservation equations

24 p4325 A70-45610

NONEQUILIBRIUM IONIZATION

Disturbances effect in Langmuir layer at cathode on ionization rate in arc discharge, estimating ion density and width of nonequilibrium ionization region

01 p0150 A70-10171

Gas dynamics theory with nonequilibrium radiative and collisional ionization applied to strong normal shock wave structure

05 p0831 A70-15870

Disturbances effect in Langmuir layer at cathode on ionization rate in arc discharge, estimating ion density and width of nonequilibrium ionization region

10 p1925 A70-25017

Small parameter structure and propagation velocity of ionization front in gas, applying nonequilibrium plasma model and electron equation

10 p1926 A70-25191

Gas mixture plasma ionized and heated by discharge and ejected into vacuum, considering nonequilibrium ionization calculation with gap between electron and heavy particle temperatures

11 p2092 A70-26732

Nonequilibrium air ionization in hypersonic viscous shock layers in flow about axisymmetric blunt bodies

17 p3008 A70-34501

Low voltage arc nonequilibrium ionization rate, taking into account atom-electron collisions

20 p3684 A70-40389

MHD generators nonequilibrium ionization improvement by blowing low work function particles into cold working gas to obtain required conductivity

21 p3855 A70-40794

Nonequilibrium ionization during plasma flow into magnetic field, examining electrons selective heating

22 p4083 A70-43384

Normal shock waves structured by nonequilibrium radiative and electron-atom collisional ionization, using generalized radiation model

24 p4324 A70-45290

Carbon ionization equilibrium in dense interstellar clouds, discussing grains and neutral atoms attenuation effects

24 p4402 A70-45387

NONEQUILIBRIUM PLASMAS

Particle distribution and plasma nonequilibrium field evolution with turbulence generation by microwave field, considering plasma kinetic instability

01 p0150 A70-10212

Nonequilibrium potassium seeded Ar plasma electrical conductivity at atmospheric pressure, noting current density role

02 p0347 A70-12232

Plasma optical transparency criterion, estimating nonequilibrium plasma layer optical density limit

03 p0531 A70-13255

Nonequilibrium cesium plasma of low voltage arc discharge, measuring electron temperature and distribution function and diffuse-series excited level populations

03 p0532 A70-13740

Photon absorption and emissivity of nonequilibrium cylindrical plasma in Doppler broadened lines and hemisphere approximation

04 p0724 A70-14411

Electron heat transfer to spherical body in nonequilibrium quiescent plasma by asymptotic solution

[ASME PAPER 69-WA/HT-56] 04 p0727 A70-14793

Nonequilibrium Cs plasma electron density, temperature and sustaining field using theoretical analysis and probe measurements

05 p0887 A70-16108

Visible light emission from nonequilibrium Cs plasma measured for spectral intensity distribution, suggesting excitation mechanism in terms of collision-radiation model

05 p0887 A70-16109

Thermal conductivity and diffusion-thermal coefficients analysis for nonequilibrium and highly ionized plasmas based on particle velocities

06 p1120 A70-17698

Nonequilibrium excitation in recombining N plasma nozzle flows

[ALAA PAPER 70-44]

06 p1122 A70-18061

Critical Hall parameter indicating instability in alkali-seeded noble gases in nonequilibrium MHD generators

[ALAA PAPER 70-40]

06 p1122 A70-18107

Electron energy equation for nonequilibrium plasmas, assuming large electron diffusion velocity and current density and enhanceable electron temperature

06 p1123 A70-18299

Electron density, excited state density and neutral particle temperature in Ar and Ne nonequilibrium laminar plasma jets

08 p1550 A70-20596

Scalar potential nonlinear fluctuations in quasi-stationary plasma, deriving expressions for potential spectral function and Langmuir and ion-acoustic fluctuations spectral densities

08 p1550 A70-20844

Correlation functions of fluctuations in electrical characteristics of nonequilibrium electron gas during scattering, determining spectral densities and populations by kinetic equation Green function

08 p1554 A70-21806

Nonequilibrium plasma MHD generator critical pressures determination, applying electron energy balance equation and relation between plasma conductivity and Hall parameters

10 p1809 A70-25142

Small parameter structure and propagation velocity of ionization front in gas, applying nonequilibrium plasma model and electron equation

10 p1926 A70-25191

Unsteady plasma oscillation stabilization by envelope controller with spatial and temporal dispersion

11 p2087 A70-25604

Pulsed and CW microwave discharge plasmotrons design calculation, providing electrodeless plasma in metallic chamber and nonequilibrium plasma

11 p1984 A70-26741

Impurities and electrothermal instabilities effect on conductivity of two temperature nonequilibrium plasma

12 p2281 A70-27846

Nonequilibrium solid state electronic plasma instabilities due to interactions with strong electric and magnetic fields

12 p2289 A70-28363

Langmuir probe characteristics and field response in low pressure nonstationary plasma diagnostics in weak magnetic field

14 p2623 A70-30785

Energy bands shape effect on fluctuations in nonequilibrium low resistance semiconductor plasma

15 p2784 A70-32192

Electrothermal instability in nonequilibrium plasma interpreted in terms of generalized instability in gas discharge

17 p3139 A70-34550

Energy transfer processes of electron gas for pipe flow of weakly ionized nonequilibrium plasmas, noting electron temperature decrease exponentially along tube axis

17 p3142 A70-35438

Nonequilibrium plasma from pulsed discharge in crossed electric and magnetic fields

17 p3142 A70-35727

Relaxation properties of nonequilibrium electronic solid state plasma during nonlinear interaction with external fields, using kinetic equation

18 p3297 A70-36423

Inhomogeneous nonequilibrium plasma stratification in magnetic field, investigating electrical conductivity

19 p3481 A70-38191

Charged particle interaction with fluctuation fields in nonequilibrium magnetoactive plasma

20 p3678 A70-39596

Electrothermal mode wave propagation in nonequilibrium partially ionized gas, using model with finite ionization

20 p3680 A70-39984

Preionization in Cs seeded Ar nonequilibrium plasma for MHD generators, examining discharge characteristics, recombination reactions, etc

20 p3680 A70-39991

Large scale nonequilibrium linear MHD generator performance with rare gases under strong EM-gas dynamic interactions 20 p3681 A70-39993

Insulator wall temperature effect on supersonic nonequilibrium MHD generator channel under open and short circuit conditions 20 p3681 A70-39994

Nonequilibrium plasma stability, conductivity and Hall parameter influenced by current flow parallel to magnetic field, discussing Ar-Cs and He-Cs plasma data 20 p3682 A70-40019

Charge separated and quasi-neutral solutions of electron heat transfer to spherical body in quiescent nonequilibrium plasma, noting diagnostic applications 21 p3860 A70-42080

Critical Hall parameter for linear development of MHD electrothermal instability in bounded nonequilibrium plasma 23 p4227 A70-44555

NONEQUILIBRIUM RADIATION

Nonequilibrium zone radiation intensity profiles behind strong shock waves in air determined for specific wavelengths and shock velocities 03 p0535 A70-14364

Gas dynamics theory with nonequilibrium radiative and collisional ionization applied to strong normal shock wave structure 05 p0831 A70-15870

Cepheids nonequilibrium continuous emission at maximum brightness, considering phase shift between radiation intensity and stellar contraction 15 p2802 A70-32483

Nonequilibrium radiation from stagnation region of high velocity spherical gas cap traveling through air 22 p4124 A70-42758

Cepheids nonequilibrium continuous emission at maximum brightness, considering phase shift between radiation intensity and stellar contraction 23 p4240 A70-43907

NONEUCLIDIAN GEOMETRY

U DIFFERENTIAL GEOMETRY

NONFLAMMABLE MATERIALS

Tetrabromophthalic anhydride /TBPA/ in polyester and epoxy resins, studying fire retardant capabilities by comparative combustion tests 05 p0811 A70-16584

Nonflammable coatings for polycarbonate to meet NASA safety standards, discussing alkali silicate and arc plasma deposition of glass and ceramic oxide [WSCI PAPER 69-34] 06 p1092 A70-17977

Hyperbaric environment combustion, discussing burning rate data and fire resistance scale 14 p2665 A70-30626

Flame resistant nonmetallic materials for manned spacecraft and aircraft interiors, considering fibers, polymers, paper and composites 22 p4058 A70-42295

Nonflammable fibrous textile materials for injury and personnel loss prevention in fires by aircraft accidents 23 p4153 A70-44481

Fireproof nonmetallic materials for spacecraft and aircraft, discussing functional utility, durability and aesthetic requirements relative to environmental conditions 23 p4210 A70-44610

NONGRAY ATMOSPHERES

Nongray and constant radiative flux model atmosphere for K dwarf stars with 4000 K effective temperature and 4.5 log surface gravity 01 p0191 A70-11350

Radiative transfer in nongray gas between parallel walls, solving heat flux and temperature distribution 02 p0392 A70-11907

Convective nongray stellar atmospheres construction for stellar stability studies, accounting for convective flow nonlocality and nongray radiative transfer 04 p0745 A70-14472

Witham radiative acoustics, analyzing nonequilibrium waves propagating in nongray radiating and absorbing gas 06 p1173 A70-17514

Radiatively driven plane acoustic wave in nongray radiating and absorbing gas assuming local molecular equilibrium 06 p1173 A70-17515

Radiative transport in nongray cylindrical medium using total band absorbance 09 p1790 A70-23553

Nongray surfaces radiative interchange calculation, considering surface radiative properties 09 p1790 A70-23561

Band or line shape effect on radiative transfer in nongray medium between parallel walls, discussing temperature distribution and radiative flux 13 p2521 A70-29136

Continuum radiative flux from nonisothermal stagnation shock layer of nongray atomic gases, employing ionization edges and bound free spectral forms [AIAA PAPER 70-837] 16 p3001 A70-33932

Nongray radiant heat transfer corrections to thermal conductivity measurements for water vapor at atmospheric pressure 16 p3003 A70-34200

Unsteady radiating nongray gas diffuse boundary conditions, emphasizing monochromatic radiation slip and one dimensional radiant flux 23 p4282 A70-44593

NONHOMOGENEITY

U INHOMOGENEITY

NONISENTROPICITY

Perturbation theory of supersonic steady anisentropic flow with radiative heat transfer using hyperbolic characteristic coordinates 12 p2334 A70-28203

Plane shock wave decay by interaction with simple wave, solving nonisentropic equations of gas dynamics 23 p4179 A70-43969

Nonlinear electrodynamic equations solutions for electromagnetic media with one dimensional unsteady electromagnetic field based on wave functions determined from boundary conditions 01 p0149 A70-10165

Atmospheric dynamics nonlinear equations reduction to spectral form using generalized spherical functions series 01 p0135 A70-10203

Asymptotic and approximate wave construction for system of first order quasi-linear partial differential equations 01 p0131 A70-10800

Nonlinear stress-strain equations for incompressible hyperelastic media developed for undeformed and deformed continuum states 01 p0201 A70-10892

Nonlinear equations solvability for elastic cylindrical shells found existing for arbitrary load and clamping conditions 01 p0212 A70-11572

Algorithm for solving Dirichlet problem of nonlinear elliptical differential equations representing atmospheric dynamics balance equation 01 p0134 A70-11609

Nonlinear waves in parallel shear flows, discussing laminar flow breakdown due to free stream disturbances 02 p0277 A70-11876

Quasi-linear stress-strain deviators relations in viscoelastic theory, indicating kernels and functions determinable from creep relaxation loading and deformation tests 02 p0390 A70-12804

Stability criteria for first approximation solutions of nonlinear ordinary differential equations of motion 03 p0524 A70-13431

Averaging over finite and infinite intervals derived for nonlinear integrodifferential equations with varying variables 03 p0594 A70-13507

Nonlinear differential equations for determining radiation density of three level pulsed gas laser as function of power losses, active medium parameters and time 03 p0502 A70-13745

Wave propagation in inhomogeneous media, reducing quasi-linear hyperbolic partial differential equations to single nonlinear equation integratable by method of characteristics 03 p0525 A70-14184

Nonlinear solid applied mechanics, emphasizing nonlinear constitutive equations and related subjects, cyclic loading effect on solid materials, etc 03 p0610 A70-14230

Nonlinear stochastic differential equations formulated during random loading processes generation, designing testing devices with stable performance parameters 03 p0598 A70-14236

Plasma turbulence theory formulated using averaging operators, obtaining nonlinear dispersion relation for turbulent diffusion coefficients 03 p0537 A70-14377

Initial value method for solution of nonlinear two point boundary value problems in fluid mechanics, considering Blasius equation and unsteady gas flow [ASME PAPER 69-WA/FE-8] 04 p0667 A70-14782

Numerical analysis of nonlinear boundary value problems for ordinary differential equations, considering patch bases and monotone methods 04 p0714 A70-15046

Nonlinear equations for TWT derived allowing for electron beam defocusing and slow wave structure deposition current 05 p0823 A70-16887

Existence and uniqueness, stability and asymptotic stability of nonlinear operator differential equation 05 p0878 A70-17098

Existence and stability problems of nonlinear operator differential equations containing linear operator with domain and range contained in real Hilbert space 05 p0878 A70-17099

Nonlinear equation solution based on local mapping relations and global implicit function theorems for Banach space problems 06 p1092 A70-17224

Numerical solution of nonlinear hyperbolic systems of differential equations using methods of differences, applying results to invariant cross section gas flow 06 p0964 A70-17236

Soviet monograph on branching theory of nonlinear equations, covering solutions with analytical operators dependent on numerical or functional parameters 06 p1093 A70-17412

Matric Computer equisolution matrices for nonlinear algebraic and integrodifferential equation systems solution 06 p1014 A70-17427

Nonlinear differential equations variational formulation, giving practical applications 06 p1093 A70-17635

Discrete ordinate technique for nonlinear Boltzmann equation tuned for computing collision integrals to instantaneous nature of distribution function 06 p1047 A70-18319

Monte Carlo method applied to solving nonlinear Boltzmann equation for plane shock waves in elastic sphere gases 06 p1050 A70-18335

Asymptotic behavior of approximate solutions of nonlinear differential equations 07 p1322 A70-18891

Nonlinear spinning shallow spherical shell equations solved for equilibrium stress and displacement distributions, discussing inertia loading 07 p1406 A70-19342

Isotropic plate stress-strain state weakened by doubly periodic curvilinear holes using nonlinear theory 07 p1408 A70-19544

Short term weather forecast hydrodynamic equations reduced to solving nonlinear differential equations by introducing dependent variables 07 p1329 A70-19647

Asymptotically periodic solution of nonlinear differential equations, discussing digital or analog computer utilization 07 p1326 A70-19782

Ritz method applied to second order nonlinear differential-difference equations subjected to sinusoidal driving functions, studying stability criteria and resonance properties 07 p1327 A70-20023

Parameters identification in nonlinear boundary value problems by successive approximations technique, using Lagrange multipliers and Newton-Raphson method 07 p1327 A70-20025

Nonlinear integral equations for inhomogeneous atmospheres derived from radiative transfer equations global form, noting relations to Ueno and Chandrasekhar equations 07 p1336 A70-20059

Temperature renormalization for improving velocity distribution function representation in solving nonlinear Vlasov equation, transforming Hermite polynomials 07 p1328 A70-20201

Nonlinear computational stability of partial difference approximations to meteorological equations 08 p1534 A70-21024

Nonlinear transport equations linearization by hodograph and inversion techniques 08 p1597 A70-21125

Nonlinear equations for large fluid oscillations in axisymmetric rotating cavities with radial partitions 09 p1660 A70-22438

Vortex and potential motions interactions in relativistic hydrodynamics, noting effects of gravitation equations nonlinearity 09 p1754 A70-22461

Nonlinear stability theory for applying perturbed equations to dynamical system based on Liapunov stability theorem 09 p1727 A70-22612

Nonlinear differential equations approximate periodic solutions generation by finding equivalent system in sense of minimum mean square difference 09 p1712 A70-22666

Nonlinear partial differential inequalities treated by comparison function μ associated with continuity and growth conditions 10 p1908 A70-23836

Analytic systems theory using Volterra calculus of functionals applied to nonlinear differential equations 10 p1908 A70-23845

Numerical method for linear differential equations extended to nonlinear ordinary differential equations, liquidating residuals by setting integrals equal to zero 10 p1909 A70-24419

Nonlinear operational equation iteration solution error estimation, discussing Banach space nonlinear operator equation

10 p1909 A70-24508

Existence theorem for periodic solutions of nonlinear differential equations with deviating arguments

10 p1910 A70-24605

Orbital stability of geostationary vehicle at arbitrary latitude, considering nonlinear equations and deducing stability conditions by Liapunov method

10 p1950 A70-24783

Nonlinear electrodynamic equations solutions for electromagnetic media with one dimensional unsteady electromagnetic field based on wave functions determined from boundary conditions

10 p1925 A70-25013

Equilibrium properties of nearly normal turbulence assuming near-Gaussian nonlinear model equations and real turbulence

11 p2039 A70-26533

Nonlinear thin shell theory equations reduced to equations in unknowns with boundary conditions

11 p2143 A70-26653

Nonlinear equations systems iterative solution convergence by extending classical algorithm with optimization process

11 p2074 A70-26850

Nonlinear integral equations of radiation transfer of stellar and planetary atmospheres

12 p2305 A70-27852

Nonlinear Vlasov equation treatment by Fourier-Hermite expansion techniques for plasma problems

13 p2457 A70-28556

Averaging over finite and infinite intervals derived for nonlinear integrodifferential equations with varying variables

13 p2440 A70-28656

Nonlinear differential equations systems, deriving periodic solutions existence conditions

13 p2440 A70-29049

Finite difference methods for approximating first order nonlinear hyperbolic differential equations, considering convergence

13 p2441 A70-29098

Nonlinear integrodifferential equations of radiative transfer solved by invariant imbedding approach, discussing Rayleigh phase matrix

13 p2451 A70-29130

Nonlinear equations boundary value problem solution by Galerkin method in integrodifferential equations form, determining Lipschitz conditions constant and proving existence and uniqueness

13 p2442 A70-29513

Nonlinear branching point problems in fluid mechanics using perturbation technique

14 p2565 A70-30471

Canonical representation for nonlinear differential equations periodic solutions

14 p2658 A70-30846

Monograph on nonlinear oscillation equations resonance solutions and solution stability, considering Green matrix, differential equations reduction to integrodifferential equations, etc

14 p2618 A70-31417

Nonlinear higher order canonical time lag equations initial and boundary value problems solutions by approximate iterative two way integration

15 p2767 A70-32171

Nonlinear differential equations for smoothing density function and smoothed expectation of arbitrary function of state

16 p2941 A70-33057

Nonlinear elasticity equations in displacements by Green and Hencky deformation tensors, discussing stress-strain of body with spherical cavity

16 p2988 A70-33251

Parameter identification algorithm for nonlinear equations describing VTOL aircraft longitudinal response

16 p2942 A70-33327

Particular solutions for nonlinear two point boundary differential equations with initial and final conditions

16 p2942 A70-33692

Nonlinear partial differential equations initial value problems asymptotic solution using two time method

16 p2943 A70-34245

Nonlinear wave equations model for human torso under impulsive stress, obtaining asymptotic solution

16 p2854 A70-34247

Existence and uniqueness theorem for boundary value problem solutions to nonlinear canonical ordinary differential equations

17 p3131 A70-35339

Power series solutions to linear and nonlinear differential equations in region of asymptotic stability

18 p3279 A70-36155

Mathieu equation with nonlinear terms for damping and restoring forces, investigating first order instability region

18 p3337 A70-36224

Nonlinear second order differential equations with periodic coefficients and solutions, examining stability by phase and amplitude plots by marginal range diagrams

18 p3282 A70-36356

Nonlinear approximation under auxiliary conditions in normed space involving minimum solution

18 p3282 A70-36363

Nonlinearized exact solution of Navier-Stokes equations for fluid motion between two coaxial circular disks rotating at equal velocity

18 p3241 A70-36381

Nonlinear two point boundary value problem, examining quadrature error effects in approximate numerical solutions by variational techniques

19 p3458 A70-37979

Nonlinear integral equations formal solution method, noting relationship to Fredholm solutions of linear integral equations

19 p3458 A70-38063

Numerical integration of finite difference analogs of nonlinear partial differential equations, investigating data smoothing, filtering and boundary effects on computational instability

19 p3459 A70-38417

Planetary scale unsteady atmospheric motions nonlinear problem, considering two level solenoidal model

20 p3662 A70-39177

Elastic membrane axisymmetric deformations, reducing nonlinear equations system to quadratures

20 p3718 A70-39230

Nonlinear differential equations solutions in power series with indefinite coefficients, determining type of singular points

20 p3658 A70-39766

Iterative solutions for systems of nonlinear equations and discretization of elliptic differential equations

21 p3845 A70-40736

Numerical procedure for second order nonlinear differential equations, discussing temperature distribution in semiinfinite solid homogeneous medium

21 p3950 A70-41449

Quasi-linear higher order differential equations, examining periodic solutions existence and stability

22 p4062 A70-42698

Numerical solution of nonlinear master equation for diatomic molecule dissociation and recombination from uncoupled differential equations

22 p4062 A70-42746

Wave front arbitrary curvature, examining integration of weak discontinuities growth equation in quasi-linear hyperbolic system

22 p4062 A70-42953

Nonlinear differential equations system under small perturbation, considering uniqueness for autonomous unperturbed system

22 p4062 A70-42969

Polynomial approximation process for scalar nonlinear equation solution, applying to Cauchy problem

22 p4064 A70-43482

Nonlinear elasticity equations in displacements by Green and Hencky deformation tensors, discussing stress-strain of body with spherical cavity

23 p4268 A70-44287

Computer program for nonlinear differential equations related to nonlinear boundary value problems based on Newtonian iteration process difference analog of linearization method

23 p4212 A70-44338

Nonlinear free boundary value problems involving region bounded by curvilinear ring consisting of smooth curves, reducing problem to nonlinear equations in Banach space

23 p4212 A70-44342

Nonlinear properties of first order differential equations for axisymmetric velocity vector fields of ideal incompressible fluid, using nonlinear singular integral equation

23 p4181 A70-44343

Nonlinear equations of motion approximate solution, determining ordnance weapons aerodynamic stability coefficients from angle of attack

23 p4133 A70-44515

German monograph on Hamilton principle and Hermetian polynomials for solving linear and nonlinear differential equations via computer method

24 p4369 A70-45091

Fifth-order pseudo-Runge-Kutta methods for numerical solution of ordinary differential equations, determining optimal parameters

24 p4369 A70-45163

Eigenvalue problem in elasticity theory, treating nonlinear equations solutions multiplicity by topological methods

24 p4420 A70-45273

Virtual work equations steady state subharmonic solutions by Newton-Raphson method, developing generalized iterative procedure for nonlinear differential equations

24 p4423 A70-45577

Nonlinear second order differential equation periodic solutions, describing water column oscillation in U-tube

24 p4369 A70-46021

Perturbation effects on nonlinear first order wave equations discontinuous solutions decay, discussing boundary value problem for stress wave propagation in rod with viscous damping

24 p4426 A70-46026

Boundedness theorem for nonlinear Mathieu equation describing motion of parametrically excited system

24 p4380 A70-46042

NONLINEAR FEEDBACK

Optimal servocontrol via nonquadratic performance index and linear plant dynamics obtainable as nonlinear function of error between controllable states and input vector

02 p0273 A70-12732

Popov criterion generalization for asymptotic stability of nonlinear feedback systems

14 p2658 A70-30849

Distributed sampled-data control systems with memoryless nonlinear feedback element, deriving frequency domain stability criterion

16 p2884 A70-33308

Suboptimal nonlinear feedback control synthesis for linear time-invariant system with convex cost functional

16 p2886 A70-33334

NONLINEAR FILTERS

Generalized approach for optimal corrector in mean squared sense for predictor-corrector filter structure, illustrating signal modes with nonlinear and linear dynamics

03 p0520 A70-14170

Optimal nonlinear filtering for nonlinear dynamic system subjected to additive white Gaussian noise with corrupted observations, using successive linearization scheme

03 p0461 A70-14340

Stochastic differential equations for approximate continuous nonlinear minimal variance filtering, discussing existence and uniqueness conditions

07 p1245 A70-19092

Matched filter rectangular pulse compression nonlinear FM waveform design with low time sidelobes and zero mismatch loss due to spectral weighting

07 p1242 A70-20065

PSK demodulation by optimal carrier and bit synchronization methods based on nonlinear filter theory, relating error probability to signal to noise ratios

08 p1458 A70-20795

Quasi-linear estimator algorithms to achieve both optimal nonlinear filtration and signal interpolation resulting in significant gain of estimate accuracy

09 p1633 A70-22408

Optimal inertialess nonlinear filters synthesis with various optimality criteria for signal distributions differing from normal

09 p1654 A70-22543

One dimensional discrete time nonlinear filters synthesis using Bayes theorem and digital techniques

09 p1654 A70-22934

Maximum principle least squares (MPLS) nonlinear filter scheme simplified, using digital simulation for stability and tracking performance

11 p2028 A70-26315

Markov nonlinear optimal filtration theory exact equations replaced by finite system of approximate differential equations

11 p2012 A70-26805

Nonlinear filtering methods for attitude computation in strapdown inertial navigation system

13 p2382 A70-29067

Book on stochastic processes and filtering theory covering probability theory, Markov processes, linear and nonlinear filters, etc

13 p2442 A70-29575

Nonlinear optimal filtration and adaptive quasi-coherent reception of Markov signals on white noise background

13 p2369 A70-29731

Dynamic nonlinear estimation, deriving general algorithms for filtering, smoothing and prediction for continuous and discrete systems

14 p2562 A70-31366

Homomorphic filters, discussing nonlinear filters for generalized linear system

15 p2710 A70-32580

Stochastic linearization approximation to solve nonlinear dynamical systems filtering problems in Markovian framework

17 p3056 A70-34953

Continuous time nonlinear filter for space vehicle attitude determination, using estimation theory

17 p3130 A70-35291

Nonlinear stochastic discrete time processes prediction and filtering by Monte Carlo techniques

18 p3234 A70-36338

Optimal nonlinear filtration for continuous automatic data transmission with radio signal under white, narrow band and Markov noise

22 p4004 A70-42891

Nonlinear filtering for linear parabolic distributed parameter systems with white noise, considering stochastic boundary value problem

23 p4177 A70-44905

Laser operation instability with nonlinear filter, deriving electrons differential velocity distribution functions on inhomogeneous emitter

24 p4352 A70-45469

NONLINEAR PROGRAMMING

Dual type method solving discrete optimal control problems with linear plants, convex cost and constraint taking into account dynamic structure

03 p0461 A70-14274

Unconstrained minimization techniques efficiency in mathematical nonlinear programming, discussing gradient and variable metric types

06 p1094 A70-17968

Second order necessary conditions of optimality with straightforward application to nonlinear programming of optimal control problems

07 p1322 A70-18850

Numerical solution of optimal control with dimensionality not exceeding phase space, using nonlinear programming and traveling wave method

10 p1911 A70-25185

Gauss-Newton nonlinear programming algorithm applications to optimization of optimal control law parameters and closed loop control system synthesis

13 p2381 A70-28435

Penalty function algorithm for linear/nonlinear programming optimization problems subject to equality/inequality constraints, discussing feasibility determination capability

13 p2373 A70-29462

Nonlinear digital programming techniques for air-plane stability augmentation systems design

16 p2840 A70-33343

Buckling problem numerical analysis by nonlinear programming and minimum energy formulation

18 p3339 A70-36495

Minimum weight design for structures with stability constraint by nonlinear programming

18 p3344 A70-37068

Highly constrained optimal control problems, using nonlinear programming in mathematical model for trajectory optimization

20 p3600 A70-39565

Nonlinear programming for minimizing inertial guidance systems costs via optimal subsystem selection

20 p3740 A70-39645

Book on theory of optimal control and mathematical programming covering linear, nonlinear, quadratic programmings, etc

21 p3845 A70-40891

Real functions and sets representation theorems derivation and application to nonlinear programming, using Bellman quasi-linearization technique

24 p4370 A70-46099

NONLINEAR SYSTEMS

Nonlinear closed-loop automatic control systems steady state characteristics calculation by graphic method

01 p0052 A70-10194

Book on nonlinear stress waves propagation in elastic solids covering adiabatic shocks, isentropic plane waves, Lagrange equation, spherical waves, heat conduction effect, etc

01 p0202 A70-10966

Algebraic criteria for absolute stability and equilibrium position in nonlinear continuous automatic control systems, using complex gain amplifier substitution

01 p0053 A70-11041

Nonlinear system under random excitation, discussing analytic solution method and statistical properties

01 p0206 A70-11149

Wave propagation in nonlinear viscoplastic medium, deriving first order system of coupled equations in stress and particle velocity components

01 p0207 A70-11154

Stressed state of isotropic nonlinear multiply connected media with large deformations, using nonlinear elasticity theory

01 p0212 A70-11446

Second order dynamic systems stability, analyzing nonlinear and self excited oscillations by using two differential equations

01 p0146 A70-11604

Popov type nonlinear control systems from synthesis viewpoint, using state variable feedback results to insure absolute stability

02 p0271 A70-12194

Harmonic vibration testing of aircraft structural nonlinearities caused by dry friction, describing pitch control system

02 p0387 A70-12215

Automatic control nonlinear systems with random inputs, determining phase coordinates probability densities

02 p0272 A70-12414

Soviet book on oscillations of quasi-linear time lag systems, emphasizing asymptotic methods in nonlinear oscillation theory

02 p0340 A70-12826

Frozen stress techniques for photoelastic analysis of orthotropic plate on nonlinear foundation, providing results to compare with future finite element analysis

03 p0480 A70-12952

Nonlinear gyroscopic navigation system intrinsic error derived as function of linear operator

03 p0522 A70-13373

Method of characteristic calculation of field amplitude of electromagnetic waves propagating in inhomogeneous nonlinear medium applicable for computer

03 p0448 A70-13461

Nonlinear feedback control system analysis and synthesis by parametric plane method, investigating frequency response by describing functions

03 p0460 A70-13970

Generation-recombination noise theory extension to nonlinear devices applied to double injection diode in various operation modes

03 p0458 A70-14028

Closed loop nonlinear optimal control systems sensitivity to small parameter variations noting influence of feedback

03 p0461 A70-14171

Linear system theory in abstract algebraic framework applied to nonlinear machines in automata theory, discussing Ho algorithm, convolution and Kalman module theory

03 p0520 A70-14273

Optimal nonlinear filtering for nonlinear dynamic system subjected to additive white Gaussian noise with corrupted observations, using successive linearization scheme

03 p0461 A70-14340

Nonlinear control systems with linear controls appearance defined for controllability concepts and sufficient conditions to reduce to lower dimensional problem

04 p0660 A70-14524

Optimal control of multidimensional distributed parameters plants described by linear or nonlinear partial differential equations, considering boundary conditions

04 p0660 A70-14551

Modified harmonic balance method applied to critical values determination of nonlinear automatic control system parameters

04 p0661 A70-14555

Recursive nonlinear system state estimation for arbitrary path magnetic navigation tested on simplified model by Monte Carlo simulation, considering derived error expression

04 p0715 A70-14627

Light pulses propagation in nonlinear laser medium, obtaining equations of motion for density matrix

04 p0700 A70-14687

Transient heat conduction solution by finite element methods application to nonlinear boundary condition problems

[ASME PAPER 69-WA/HT-36] 04 p0781 A70-14804

Coupled nonlinear systems with two degrees of freedom using transformation techniques

04 p0714 A70-15084

Bifurcation frequency and nonlinear distortions determined in nonlinear semiconductor circuit with series-opposed connections of p-n junctions operating in forced oscillation mode

04 p0659 A70-15206

Amplitude and phase frequency characteristics relations established by analyzing forced resonant oscillations in nonlinear circuit operating at power source frequency

04 p0662 A70-15207

Nonlinear systems periodic oscillations with resonance from differential equations solutions

04 p0720 A70-15258

Nonlinear networks computer analysis by recursive decomposition, discussing network graphs construction rules

04 p0662 A70-15451

Book on theory of nonlinear control systems covering nonlinear oscillations, Liapunov stability, control systems stability and theory, differential equations, etc

04 p0663 A70-15500

Barium titanate ceramics with nonlinear electrical conduction, noting I-V relationship dependence on temperature, impurities and electrodes

05 p0891 A70-15990

Heated isotropic shallow shells results extended to solving nonlinear problem in bending theory of orthotropic shallow shells clamped, heated and under pressure

05 p0927 A70-15993

Hybrid computer simulation of small nonlinearities effects in human arterial system, using perturbation techniques

05 p0805 A70-16045

Sensitivity functions of nonlinear circuits obtained by calculation of dependent linear model responses, topologically equivalent to original circuit

05 p0824 A70-16125

Averaging analysis of oscillations attenuation of relaxing one dimensional linear viscoelastic systems under external force at resonance applied to nonlinear multidimensional systems

05 p0933 A70-16208

Mathematical problem of stability of nonlinear automatic control systems solved using linear criteria

05 p0825 A70-16866

Inertial parameters and functions of dissipative and restoring forces in quasi-linear oscillatory system determined from free motion characteristics

05 p0884 A70-16951

N-port resistive networks synthesis from terminal conductance matrices with two-tree port structures

06 p1023 A70-17426

Time optimal control of nonlinear systems with distributed parameters, proposing approximate algorithm

06 p1024 A70-17814

Suboptimal control to minimize quadratic cost functional for nonlinear systems, using Taylor series representation for feedback gain matrix

06 p1025 A70-17961

Signal stabilization and performance of nonlinear sampled data systems, suggesting oscillations injection at input

06 p1026 A70-17970

Nonlinear control systems stability with stochastic coefficients, applying Liapunov function

06 p1026 A70-17971

Nonlinear feedback control systems frequency domain stability criterion obtained using gain-phase plot

06 p1026 A70-17972

Iterative solution of nonlinear optimal control delineated for sufficient conditions for convergence

06 p1027 A70-18507

Nonlinear system theory for optimal linearization in holography, discussing generalized method for photographic emulsion and first order amplitude transmittance

06 p1072 A70-18521

Partial stabilization of given quantities on steady motions of nonlinear control systems with initial perturbations based on observation theory

07 p1333 A70-18686

Approximate linearization of nonlinear automatic control systems with two frequency forced oscillations

07 p1243 A70-18687

Absolute stability ranges of forced motions and damping in nonlinear systems determined by Sturm theorem

07 p1243 A70-18688

Periodic motions and dynamic stability of nonlinear distributed sampled data system of closed loop of pulsed element governed by heat conduction equation

07 p1226 A70-18749

Electromagnetic waves phase modulation index during propagation in nonlinear media found dependent on mismatch between interacting waves group velocities, relaxation time and losses

07 p1227 A70-18763

Control system composed of linear and nonlinear components and distributed parameters, deriving stability criterion for simple critical case

07 p1246 A70-19539

Steady oscillations under random forces of nonlinear system described by stochastic partial differential difference equations with distributed parameters and delayed argument

08 p1542 A70-20486

Stability criteria for systems of nonlinear stochastic differential equations on finite time interval, considering stable motion of physical processes

08 p1533 A70-20488

Nonlinear quasi-harmonic systems forced vibrations using one degree of freedom system as example

08 p1543 A70-20700

Book on solution of nonlinear systems covering stability theory, differential equations analysis, analog and digital simulation, etc

08 p1533 A70-20755

Periodic and almost periodic solutions to vibrations of quasi-linear nonautonomous systems in presence of resonance, determining principal amplitudes

08 p1544 A70-20966

Conditionally optimal control coefficients for nonlinear plant obtained from weighting functions derivatives of conjugate linear model for plant

08 p1479 A70-20995

Stability in whole of motion determined by system of nonlinear third order differential equations, using Liapunov functions

08 p1545 A70-21003

Spectral densities of phase coordinates of nonlinear automatic systems in steady states at random disturbances determined by statistic linearization

08 p1480 A70-21016

Pairs existence of symmetrical equilibrium forms in nonlinear shallow shell under load applicable to nonshallow shells equilibrium

08 p1591 A70-21416

Nonlinear system oscillations analysis based on small parameter method and difference equations, including resonant case and stability criterion for periodic solutions

08 p1546 A70-21629

Nonlinearity of human eye movement control system in two dimensional tracking tasks, explaining visual axis lags as time delays dependent on target motion

08 p1447 A70-21724

Nonlinear circuits reducing nonlinear distortions in amplifiers, discussing wideband nonlinear distortion compensating circuits

09 p1643 A70-22131

Combination resonance in two degree of freedom dissipative nonlinear system using small parameter and Ritz-Galerkin methods

09 p1727 A70-22667

Nonlinear periodic oscillations problem solved by solving nonlinear operator equations, discussing iterative methods based on equations linearization

09 p1728 A70-22668

Statistical linearization technique for nonlinear control systems with feedback and zero memory under random input excitation evaluated for output signal characteristics

09 p1654 A70-22960

Inertialess nonlinear quadrupole output of oscillations modulated by normal noise, analyzing correlation functions

09 p1637 A70-23159

Vibration decrement of nonlinear elastic system from resonance peak width of displacement amplitude curve of perturbing force

09 p1782 A70-23295

Soviet monograph on accelerated convergence method in nonlinear mechanics, discussing quasi-periodic differential equations solutions, smoothing techniques, etc

09 p1729 A70-23726

Nonlinear many degrees of freedom systems steady state forced vibrations analysis, expressing response in nonlinear normal coordinates

10 p1954 A70-24010

Hodograph or Riemann invariants method generalization for nonelliptic systems, discussing three dimensional potential supersonic flows

10 p1863 A70-24087

Electrohydraulic fast response servosystem design and operation, describing nonlinear model based on component limitations

10 p1807 A70-24578

One dimensional wave processes in distributed nonlinear systems, surveying mathematical methods

10 p1843 A70-25151

Maximum principle optimality for nonlinear two group parameter control applicable to plants described by integrodifferential and delay equations

10 p1911 A70-25184

Slowly varying parameters as engineering problem in nonlinear lumped systems

10 p1856 A70-25239

Nonlinear system with piecewise linear spring characteristic response to stochastic excitation of white noise type process, discussing technical stability

10 p1918 A70-25323

Necessary and sufficient conditions for absolute stability of nonstationary nonlinear system, showing equivalency to asymptotic instability in small position equilibrium piecewise linear systems

11 p2021 A70-25337

Stability of multiconnected nonlinear controlled systems with nonsingle equilibrium position, representing lumped parameter system with characteristic equation having complex roots

11 p2021 A70-25338

Maximum principle condition of optimal control of monodimensional system described by nonlinear hyperbolic equations with time delay

11 p2021 A70-25340

Correlation functions of nonlinear auto-oscillatory system under nonstationary conditions determined by statistic linearization

11 p2022 A70-25341

Control theory, Volume 1, covering linear, nonlinear, stochastic, optimal, adaptive and learning systems, sensitivity analysis, etc

11 p2023 A70-25771

Coupled nonlinear systems analysis based on reducing coupled differential equations to equivalent uncoupled equations amenable to existing techniques

11 p2072 A70-25956

Sequential filter equations for nonlinear system dynamics and observational model with linear estimator, comparing difference between white and colored noise filter results

11 p2024 A70-26126

Kalman-Bucy filtering for nonlinear system consisting of missile in flight, discussing state variables values selected by estimator

11 p2025 A70-26221

Nonlinear control systems on-off oscillations with instants of commutation determined by simultaneous equations, noting feedback control

11 p2027 A70-26254

Suboptimal nonlinear state estimation from noise corrupted measurements in ballistic trajectory, using simplified extended Kalman filter

11 p2028 A70-26303

Time optimal control for nonlinear second order system containing positive parameter and measurable control function

11 p2028 A70-26308

Optimum damping and stiffness in nonlinear single degree of freedom systems, discussing protection from ground and velocity shock during landing impact

11 p2145 A70-26695

Nonlinear time-varying multivariable adaptive control system design using signal synthesis technique

12 p2203 A70-27415

IR image conversion into visible using nonlinear KDP crystal

12 p2248 A70-27543

Nonlinear phase locked loops compared with linear loops in communication and navigation, considering interference vulnerability

12 p2187 A70-27909

Statistical analysis of control system with nonlinear zero-memory element evaluated for error using Fokker-Planck equation

12 p2204 A70-27985

Nonlinear discrete time sampled systems optimal control by dynamic programming, with application to stochastic systems

12 p2204 A70-28068

Nonlinear rotating systems optimal control problems approximation by modified Krylov-Bogoliubov averaging technique

12 p2273 A70-28192

Quasi-linear autonomous systems of second order equations, considering periodic solutions asymptotic stability

12 p2273 A70-28193

Quasi-linear elastic gyroscopic systems with distributed and lumped parameters, studying periodic solutions stability

12 p2238 A70-28194

Output signal spectrum analysis for nonlinear active element in presence of distorted modulating voltage

12 p2191 A70-28342

Soviet book on theory of oscillations of linear and nonlinear time lag systems

13 p2450 A70-28699

Nonlinear servo system stability criteria based on plus or minus controlled data theory

13 p2381 A70-28939

Random-input describing function as linear approximation to instantaneous nonlinearity in terms of minimum mean-squared error

13 p2382 A70-29070

Nonlinear control systems optimization applied to asymmetrical spacecraft

13 p2382 A70-29071

Multistep formulations of optimized Lax-Wendroff method for nonlinear hyperbolic systems in space variables

13 p2440 A70-29086

Computer modeling of nonlinear phase automatic frequency control systems under noise and oscillating disturbance

13 p2383 A70-29303

Free and forced motion characteristics in absolutely stable nonstationary nonlinear system analysis by variational approach

13 p2453 A70-29716

Multiple period oscillations in nonlinear systems, using nonautonomous differential equations and Hammerstein operator

13 p2443 A70-29745

Unsteady nonlinear aerodynamic loads measurements in wind tunnel, using linearized mathematical analog

[AIAA PAPER 70-573]

13 p2343 A70-29896

Controllability test for second order differential systems, noting applicability to linear first order time dependent systems

13 p2443 A70-29972

Statistical linearization synthesis of nonlinear self adjusting systems with frequency filters and input signal under white noise

14 p2559 A70-30156

Nonlinear sampled data system transportation lag effect on limit cycle nature

14 p2560 A70-30623

Limit cycle and stability analysis of multivariable nonlinear systems using function decomposition

14 p2560 A70-30624

First harmonic precision improvement of dual input describing function, applying to self oscillation of nonlinear systems

14 p2560 A70-30625

SCAMP I DC statistical circuit analysis program for linear and nonlinear circuits, describing program structure

14 p2560 A70-30664

Off-axis nonlinear holograms, defining spurious distortion and SNR

14 p2588 A70-31206

Dynamic nonlinear estimation, deriving general algorithms for filtering, smoothing and prediction for continuous and discrete systems

14 p2562 A70-31366

Stochastic terminal optimal control for nonlinear dynamical systems with state independent noise

14 p2600 A70-31420

Nonlinear effects in microwave resonators containing thin superconducting films and low values of microwave power

15 p2782 A70-31525

Computer control of nonlinear systems with varying performance specifications, using Popov stability and nonlinear programming

15 p2715 A70-31973

Nonlinear systems absolute stability by graphic methods, noting use of Nichol chart and analog computer

15 p2715 A70-31974

Stochastic linearized state estimator for nonlinear dynamic systems with Markovian noise, using digital simulation

15 p2715 A70-31975

Soviet book on mathematical theory of linear and nonlinear control systems covering differential and difference equations, calculus variations, etc

15 p2715 A70-32200

Nonlinear feedback control systems forced asymptotic stability, using linear transformation of circle criterion

15 p2716 A70-32554

Asymptotic motion stability bound for non-holonomic nonlinear electrodynamic systems, using energy metric algorithm for Liapunov functions generation

15 p2768 A70-32556

Nonlinear time-invariant lumped parameter dynamic systems, determining mathematical model by piecewise continuous power series expansions

15 p2768 A70-32576

Augmented state variable method of nonlinear discrete system identification with noise corrupted input observations

15 p2704 A70-32592

Parameter plane method of stability analysis applied to spacecraft attitude control system with two nonlinearities related by nonlinear differential equation

16 p2881 A70-33032

Nonlinear systems stabilization with linear system estimator output state to provide feedback for asymptotic stability of overall system

16 p2881 A70-33033

Nonlinear discrete systems absolute stability exponential property proved by modified frequency condition, applying analog transformation to Szego-Kalman equations

16 p2882 A70-33044

One dimensional controlled plants structure identification with mathematical model composed of aperiodic nonlinear and delay components connected in series

16 p2883 A70-33235

Oscillatory and wave processes in nonlinear distributed systems by asymptotic method analogous to Bogoliubov concentrated systems

16 p2951 A70-33252

State estimation for nonlinear discrete time systems with quantized measurements, obtaining recursive algorithm through boundary value problem linearization

16 p2867 A70-33305

Popov and circle criteria for stability of nonlinear feedback control systems, using parameter plane representation

16 p2884 A70-33314

Controllability of nonlinear dynamic feedback systems based on Liapunov-like stability approach and optimal control theory

16 p2885 A70-33321

Optimal control in nonlinear systems, discussing conditions for analytical solutions for Hamilton-Jacobi equations

16 p2886 A70-33335

Recurrence scheme for parameter estimation by quasi-linear equations of motion method and Kalman filtering for nonlinear dynamical systems

16 p2887 A70-33349

Geometrically nonlinear theory for sandwich type plates symmetrically built of three elastically and thermally anisotropic layers, considering nonuniform temperature field

16 p2990 A70-33744

Solutions behavior of nonlinear system of linear Volterra integral equations, discussing applicability of standard fixed point theorems

16 p2943 A70-34000

Potential stability theory for linear and nonlinear systems trajectory

16 p2943 A70-34042

Linear, nonlinear and random vibrations - Conference, Poznan, Poland, April 1968

16 p2994 A70-34276

Nonlinear lumped system synthesis by inverse delta method

16 p2943 A70-34278

Nonlinear dynamic systems described by matrix equation, formulating asymptotically stable conditions, discussing motion equations of two degree of freedom system

16 p2995 A70-34281

Nonlinear mechanical systems transient motion analysis based on phase trajectories

16 p2944 A70-34283

- Linear and nonlinear systems natural frequency and stability determination, using theorems for degenerate systems 16 p2944 A70-34284
- Nonlinear mechanical lumped dynamic systems trajectory analysis in terms of P and G sets 16 p2944 A70-34285
- Nonlinear systems excitation by two harmonic forces, analyzing vibration by linearization of differential equation of motion 16 p2995 A70-34286
- Arterial wall nonlinear distensibility effects on blood flow velocity profiles, considering various mathematical and physical artery models 17 p3035 A70-34468
- Automatic stabilization and control of computerized nonlinear processes, proposing algorithm for stability criteria 17 p3049 A70-34640
- Continuous time nonlinear feedback control systems, using modified gradient procedure for parameters adaptation 17 p3056 A70-34952
- Stochastic linearization approximation to solve nonlinear dynamical systems filtering problems in Markovian framework 17 p3056 A70-34953
- Imperfect solid deformation, presenting formalism for elastic theory nonlinear aspects of continuous distributions of dislocations and point defects 17 p3190 A70-35456
- Perturbation method for finite elastodynamic deformation of nonlinear systems 17 p3191 A70-35590
- Third order accuracy for nonlinear hyperbolic system of partial differential equations extended to equations with independent variables 17 p3131 A70-35891
- Nonlinear circuits with linear gain relations, examining input-output relations of two ports for analysis, synthesis and design 18 p3230 A70-36000
- Optimum spectral control of nonlinear plant, using Newton iteration and linear programming 18 p3234 A70-36075
- Frequency filters in nonlinear self adaptive system design for noncorrelated input and noise signals 18 p3234 A70-36119
- Stability conditions for control system third-order differential equations with double nonlinearity, using Liapunov function 18 p3280 A70-36157
- Nonlinear stochastic discrete time processes prediction and filtering by Monte Carlo techniques 18 p3234 A70-36338
- Asymptotic, averaging and Ritz methods for steady state periodic vibrations of nonlinear systems with many degrees of freedom 18 p3338 A70-36437
- Computerized Pontryagin stability analysis of nonlinear multiple delay systems 18 p3235 A70-36477
- Discrete automatic control theories, including linear, nonlinear, feedback, optimal and adaptive systems and bibliographies 18 p3235 A70-36626
- Creep bending of rectangular plates with stress-strain and strain displacement nonlinearities 18 p3343 A70-36703
- Electromagnetic waves phase modulation index during propagation in nonlinear media found dependent on mismatch between interacting waves group velocities, relaxation time and losses 18 p3229 A70-37107
- Spiral structure gravitational theory, discussing separation between linear and nonlinear effects 18 p3330 A70-37189
- Tightly wound spiral nonlinear density waves in pressureless self gravitating disk with external gravitational field, examining solid body and differential rotation 18 p3331 A70-37192
- Soviet book on vibrations in flight vehicle engines covering linear and nonlinear systems, computer methods, etc 18 p3305 A70-37229
- Soviet book on statistical calculation methods for linear and nonlinear automatic aircraft control systems design, using correlation theory of stochastic processes 19 p3463 A70-37403
- Traveling wave tube with two mixed different velocity electron beams, analyzing nonlinear operation by integro-differential equations 19 p3387 A70-37742
- Modified differential equation for stability of oscillating nonlinear system 19 p3458 A70-37823
- Stress relaxation interpretation at wave fronts in one dimensional media by nonlinear viscoelastic models, giving constitutive equations 19 p3542 A70-38057
- Periodic solutions of nonlinear second order differential systems containing symmetries, noting Marlin criteria 19 p3458 A70-38064
- Mechanical destabilizing model of nonlinear damping in nonconservative systems with follower forces, using Liapunov method 19 p3542 A70-38065
- Multivariable nonlinear systems absolute stability criteria, emphasizing nonzero entry functions 19 p3394 A70-38171
- Undamped forced two degree of freedom system with one linear and one nonlinear spring, analyzing subharmonic vibrations by Ritz averaging method 19 p3544 A70-38329
- Sufficient condition for optimal control with continuous nonlinearities, using Pontryagin maximum principle 19 p3394 A70-38717
- Oscillations of nearly nonlinear systems with conditions for main amplitude equations 19 p3472 A70-38726
- Optimal control time for second order nonlinear system with motion subject to specified conditions, determining switching line points 19 p3460 A70-38939
- Nonlinear LC circuit with p-n junction capacitance, examining relaxation vibrations during automatic biasing 20 p3596 A70-38970
- Two dimensional detonations structure by nonlinear theory for systems with hydrodynamically unstable steady state solutions, imposing periodic boundary conditions 20 p3609 A70-39658
- Perturbation theory for nonlinear systems of differential equations 20 p3658 A70-40104
- Nonlinear closed loop systems frequency response determination by graphical method 20 p3605 A70-40122
- Nonlinear dynamic systems phase coordinate variations statistical characteristics, describing data reduction method 20 p3674 A70-40183
- Quasi-linearization relationship with Kalman filtering for nonlinear systems parameter estimation in process noise absence 21 p3845 A70-41749
- Nonlinear coupling in systems with two degrees of freedom, deriving transformation laws for uncoupling 21 p3940 A70-42054
- Hollow spheres and hemispheres nonlinear axisymmetric deformation, using shell theory reduced to two point boundary value problem for differential equations 22 p4112 A70-42288
- Periodic motions of arbitrarily long periods for idealized nonlinear spring-mass systems with two or more degrees of freedom 22 p4073 A70-42699
- Soviet papers on harmonic linearization method in design of nonlinear automatic control systems 22 p3999 A70-42826
- Harmonic linearization method for nonlinear automatic control systems, describing theoretical fundamentals 22 p4000 A70-42827
- Harmonic linearization of nonlinear hysteretic elements in automatic control systems 22 p4000 A70-42828
- Harmonic linearization method for periodic regimes in nonlinear control systems based on periodic solution sensitivity to higher harmonics and small parameters 22 p4000 A70-42829
- Amplitude and phase frequency characteristics of open and closed multiloop nonlinear automatic control systems by graphical methods 22 p4000 A70-42830
- Nonlinear automatic control systems transient response by frequency response curves of amplitude and phase characteristics 22 p4001 A70-42831
- Harmonic linearization equations for frequency and amplitude of self oscillations in nonlinear automatic control systems 22 p4001 A70-42832
- Harmonic linearization method for periodic regimes in discrete nonlinear automatic control systems performing signal quantization with respect to level or time 22 p4001 A70-42833
- Asymptotic method for nonlinear automatic control systems involving differential equations in Cauchy form with nonlinearities 22 p4001 A70-42834
- Harmonic linearization for nonsearching self adaptive automatic control systems described by nonlinear differential equations 22 p4001 A70-42835
- Harmonic linearization method for nonlinear automatic control systems with finite automata, discussing self oscillating modes of operation 22 p4001 A70-42836
- Periodic solutions to complex nonlinear automatic control systems with initial deviations, considering system stability and self oscillation conditions 22 p4002 A70-42839
- Harmonic linearization method application to automatic phase control system with periodic nonlinearities 22 p4002 A70-42840
- Harmonic linearization method for automatic control systems having hydraulic or pneumatic actuating device with two nonlinear elements 22 p4002 A70-42841
- Soviet papers on statistical methods in nonlinear automatic control systems design 22 p4002 A70-42881
- Statistical methods for nonlinear automatic control systems, including Monte Carlo method, equivalent perturbations, linearization and analytical techniques 22 p4002 A70-42882
- Signal accuracy prediction in nonlinear steady or unsteady continuous and discrete automatic control systems in random noise, using statistical linearization 22 p4003 A70-42883
- Dynamic characteristics of autooscillatory nonlinear self adaptive systems under random noise, using statistical and harmonic linearization 22 p4003 A70-42884
- Output probability of nonlinear systems from coupling moments for input random parameters, using equivalent perturbations method 22 p4003 A70-42885
- Interpolation method for nonlinear automatic control systems accuracy, discussing numerical integration optimal step and node number selection 22 p4003 A70-42886
- Quantitative reduction of statistical nodes for nonlinear automatic control system with random noise, using minimal approximating polynomials 22 p4003 A70-42887
- Output coordinates probability distribution density of nonlinear automatic control systems at fixed time, using multiple integrals 22 p4003 A70-42888
- Statistically optimal nonlinear automatic control systems synthesis in presence of random perturbations, using gradient or steepest descent methods 22 p4003 A70-42889
- Digital statistical modeling of nonlinear automatic control systems including accuracy analysis, generation of random perturbations and parameter optimization 22 p4004 A70-42892
- Conjunctors and traditors circuit realizations, discussing resistive and dynamic nonlinear networks 22 p3996 A70-42919
- Nonlinear rotating systems optimal control problems approximation by modified Krylov-Bogoliubov averaging technique 22 p4004 A70-43317
- Quasi-linear autonomous systems of second order equations, considering periodic solutions asymptotic stability 22 p4075 A70-43318
- Quasi-linear elastic gyroscopic systems with distributed and lumped parameters, studying periodic solutions stability 22 p4038 A70-43319
- Nonlinear heat transport in structural elements due to radiative transfer, analyzing temperature field dynamics 22 p4125 A70-43360
- Nonlinear control systems described by linear equations, discussing quasi and local controllability as functions of time and stationary state 22 p4063 A70-43427
- Criterion for global asymptotic stability of system with power-law nonlinearity, reducing to Nyquist criterion for linear system cases 22 p4063 A70-43428
- Stochastic optimal control for nonlinear dynamical systems under noisy observations, designing suboptimal state estimates and feedback controls 22 p4063 A70-43429
- Newton regularized method for nonlinear boundary value problems in combination with conjugate gradients 22 p4064 A70-43480
- Free motion of second order nonlinear automatic control device with vibration damping 22 p4075 A70-43554
- Nonlinear automatic optimal control for discrete system with delay 22 p4005 A70-43563
- Flexural vibrations of clamped circular plate with nonlinear elasticity for small strains and displacements, using variational principle 22 p4120 A70-43719
- MHD flow universal stability, investigating nonlinear system by energy methods 23 p4223 A70-43967
- Hamilton-Jacobi theorem for nonlinear dynamic system moving with holonomic Cetaev constraints, investigating necessary and sufficient conditions 23 p4210 A70-44024
- Krylov-Bogoliubov virtual work principal, investigating nonlinear vibrations, extending to heteronomous vibrations 23 p4266 A70-44028

NONLINEARITY

- Nonlinear differential equation systems overall stability, using qualitative methods 23 p4211 A70-44092
- Nonlinear elasticity theory, deriving geometrical relations applicable to small deformation tensor components 23 p4267 A70-44167
- Fluidic networks nonlinear component AC and DC behavior, discussing Bernoulli equation, nonlinear resistances, transmission lines and various flows 23 p4142 A70-44296
- Single-frequency oscillations mode in nonlinear catenary systems, considering factors promoting stabilization and uniformity 23 p4218 A70-44344
- Spectral and real time computation for acoustic absorbers with nonlinear material characteristics 23 p4219 A70-44393
- Nonlinear material and geometric behavior of shell structures studied by Eulerian and Lagrangian approaches 23 p4273 A70-44718
- Nonlinear shell analysis by finite difference energy method, using BOSOR3 and STAGS computer programs 23 p4273 A70-44723
- Pendulum dynamic stability under parametric excitation, presenting transient and steady state solutions by linear and nonlinear theory applications 24 p4379 A70-45587
- Nonlinear systems subharmonic oscillations under polyharmonic disturbance and viscous damping 24 p4427 A70-46378

NONLINEARITY

- Nonlinearity sources in elastic structures under large displacements, developing general matrix formulation 04 p0768 A70-14748
- Perturbation technique for numerically sensitive nonlinear two point boundary value problems 04 p0713 A70-15045
- Transmission channel nonlinearity effect on signal detector performance for signal received by synthesized antenna indicating SNR change 04 p0659 A70-15287
- Sonic boom theory of geometric acoustics with nonlinear effects modification, emphasizing horizontally stratified atmospheric propagation, discussing failure near caustic 05 p0796 A70-16794
- Light beam intensity variations during propagation in nonlinear medium taking into account combination scattering, solving equations by difference method 08 p1461 A70-20858
- Automatic control system stability with restricted nonlinearity, investigating lumped and distributed parameter systems and unique and nonunique equilibrium positions 08 p1479 A70-20996
- Weakly nonlinear dispersive cold plasma waves propagation by two time scale expansion, taking into account amplitude dispersion and coupling 08 p1553 A70-21613
- Second harmonic generation and frequency conversion efficiencies for laser beam shaping in nonlinear medium 08 p1514 A70-21984
- Photographic emulsion nonlinear response effect on image quality, discussing holography for multiple exposures 09 p1676 A70-22718
- Nonlinear effects related to plane electromagnetic wave propagation in weakly ionized plasma 09 p1735 A70-22842
- Spectral criteria for approximating tunnel diode nonlinear characteristics obtained by minimizing deviations of moduli of harmonic amplitudes 09 p1649 A70-23340
- Hamilton modified principal applied to nonlinear control problems including time delay, servosystem with ideal relay and liquid level control 09 p1614 A70-23693
- Nonlinear wave interactions in quiescent plasma column with external disturbance creating broadened frequency spectrum and weakly turbulent plasma 10 p1922 A70-24146
- LF ion-acoustic wave nonlinear interaction with HF Langmuir waves in nonisothermal plasma, establishing criteria for ion plasma turbulence 10 p1925 A70-25103
- Electromagnetic waves propagation in nonlinear medium, investigating polarized plane wave incident on vacuum-plasma interface in magnetic field 10 p1844 A70-25156
- Recording nonlinearities effect on image reconstruction from hologram of diffuse object 11 p2050 A70-25641
- Book on quasi-linearization and nonlinear fluid and orbital mechanics covering ablating wall, electrostatic probe, laminar boundary stability, pipe flow and optimum bang-bang transfer 11 p2072 A70-26225

Asymptotics of linear diffusion processes altered by weak nonlinear effects, discussing deterministic and statistical initial value problems 11 p2074 A70-26686

Electron beam-plasma interaction nonlinear development in time and space using computer simulation 11 p2095 A70-26758

Nonlinear optical effects in solids, gases and liquids with light from laser sources, discussing self focusing and absorption of light, transclucidity, harmonics, etc 12 p2245 A70-27277

Drift wave instabilities nonlinearities, discussing plasma growth rate and saturation coefficients, damping rate as function of amplitude and lower mode modification 12 p2280 A70-27786

Liapunov functions construction through conversion of differential equation with polynomial nonlinearities into auxiliary exact differential equation using algorithm 12 p2262 A70-28070

Nonlinear effects of oscillatory disturbances produced by viscous excitations in rotating fluid inside of cylindrical tank 13 p2386 A70-28819

Asymmetric missile nonlinear angular motion, describing quasi-linear relations for frequencies, damping rates and swerving motion amplitude [AIAA PAPER 70-534] 13 p2506 A70-29002

Finned configurations with nonlinear aerodynamic properties, obtaining solutions for angular motion at and near resonance [AIAA PAPER 70-535] 13 p2506 A70-29026

Random-input describing function as linear approximation to instantaneous nonlinearity in terms of minimum mean-squared error 13 p2382 A70-29070

Output correlation function of nonlinearity: filter system and phase modulated oscillations influence on system 13 p2366 A70-29411

Finite element method applications to structural analysis problems involving geometric and material nonlinearities 14 p2660 A70-31134

Human postural motor control systems nonlinearities, describing physiological experiments and mathematical models 15 p2693 A70-32568

Waves nonlinear propagation in fluids due to convection, reviewing various solution methods 17 p3068 A70-34666

Stress concentration near holes in plate in plane problem of thermoelasticity, taking into account physical and geometrical nonlinearities 18 p3336 A70-36133

Nonlinear elasticity law for elastic moduli of plastics 18 p3344 A70-36947

CdTe nonlinear electro-optical susceptibility predicted by mathematical model using two coupled anharmonic oscillators 19 p3485 A70-37668

Physically nonlinear elastic solid three dimensional and generalized plane strain problem, discussing application to composite materials 19 p3538 A70-37798

Boundary value problem solution in nonlinear viscoelasticity by constitutive equations 19 p3544 A70-38330

Elastic body steady forced oscillations under monoharmonic excitation, investigating hereditary nonlinearity effects on systems dynamic characteristics 20 p3733 A70-40395

Nonlinear heaving motion of plenum-chamber air cushion vehicles induced by sinusoidal ground irregularity 22 p3961 A70-42280

Image holography nonlinearities analysis, using photographic film characteristics for phase deviation enhancement 22 p4031 A70-42951

Nonlinear shell theory formulated in Lagrangian stress and moment resultants, deriving equilibrium equations 22 p4118 A70-43545

Wheel force and roll moment nonlinearities effect on light STOL aircraft handling qualities during approach [ICAS PAPER 70-55] 23 p4139 A70-44151

NONNEWTONIAN FLOW

Incompressible slow viscous nonNewtonian flow with free surface solved by finite element method, showing computerized results for squeezed fluid between two plates 01 p0066 A70-11131

NonNewtonian boundary layer flow having arbitrary potential velocities from methods for Newtonian fluids 19 p3407 A70-38932

NonNewtonian fluids flow and heat transfer characteristics past flat plate, determining velocity and temperature distributions 21 p3806 A70-40900

NONNEWTONIAN FLUIDS

Non-Newtonian fluids in continuum mechanics, classical Navier-Stokes theory limitations and theory of incompressible fluids for viscometric flows 06 p1037 A70-17926

Dissolved macromolecules effect on flow resistance due to turbulent friction in nonNewtonian liquids, considering physical parameters and hydrodynamic conditions 08 p1483 A70-21228

Sliding bearings with nonNewtonian lubricants, noting pressure gradient change effect caused by speed fluctuation and material constants 10 p1893 A70-24015

Newtonian fluid laminar boundary layer flow over flat plate with nonNewtonian fluid injection 12 p2209 A70-27212

Dimensionless heat transfer and resistance coefficients during stabilized nonNewtonian fluid flow in circular pipe 20 p3613 A70-40176

Integral transforms applied to convective heat transfer during nonNewtonian fluid flow with power rheology in pipes and channels 20 p3613 A70-40177

Flow past streamlined obstacles under nonNewtonian fluid injection into hydrodynamic laminar and turbulent boundary layer 21 p3812 A70-42266

NonNewtonian fluids variational problems, discussing generalized solutions existence and uniqueness 23 p4179 A70-43987

Ladyzhenskaja-type fluids linear flow stability criteria for two dimensional case 23 p4218 A70-44238

NonNewtonian fluids injection into boundary layer, comparing flow and pressure effects with water injection 24 p4324 A70-45364

Colloidal alumina nonNewtonian suspension in propylene glycol, examining thixotropic behavior at various structural levels 24 p4310 A70-45625

Constitutive equations in fluid dynamics, discussing Newtonian, Oldroyd and Walter, Reiner-Rivlin, Rivlin-Ericksen, Noll, Bingham and oriented fluids 24 p4327 A70-46149

NONOHMIC EFFECT

Hazards due to nonohmic materials responsible for electrostatic failures in missile and space programs and ground equipment 01 p0141 A70-10088

NONPARAMETRIC STATISTICS

Nonparametric statistical pattern recognition conditions of finite probability distribution mixtures in non-supervised adaptive detection 03 p0454 A70-14078

Nonparametric rank tests detection performance for signals in Gaussian noise, considering radar application 14 p2551 A70-31119

Nonparametric reliability application to numerical data involving failure distribution, using mathematical model 15 p2748 A70-32669

Light signals detection on noise background, comparing algorithms based on nonparametric statistics 22 p3989 A70-42569

NONREFLECTION

U ENERGY ABSORPTION

NONRELATIVISTIC MECHANICS

Incompressible homogeneous fluid model in non-relativistic generalized gravitation theory using analytical solution 09 p1762 A70-23118

Relativistic and nonrelativistic fluid dynamic equations, deriving limiting procedure leading to fluid magnetodynamic Lundquist equations 19 p3478 A70-37590

Nonrelativistic electron bremsstrahlung in dense plasma with strong magnetic field 21 p3855 A70-40721

Relativistic and nonrelativistic generalizations of classical approach in quantum mechanics applied to equations of motion in electromagnetic field 24 p4378 A70-45275

Relativistic gas bulk motion nonrelativistic equations, demonstrating spatially random fluctuations damp suprathermal hydromagnetic perpendicular propagation mode to interstellar magnetic field 24 p4397 A70-45761

NONRESONANCE

Optically pumped He 4 magnetometers, investigating magnetic resonance signal dependence on orientation for nonresonance technique construction 13 p2414 A70-30036

NONRIGIDITY

U FLEXIBILITY

NONSTABILIZED OSCILLATION

Energy analysis of unstable gravitational oscillations in galaxies, using two component model for normal spiral galaxies

03 p0570 A70-13532

NONUNIFORM FLOW

Turbine blade tip clearance effect on aerodynamic characteristics in nonuniform flow

07 p1187 A70-18980

Real gas behavior effect on shock tube temperature and pressure flow nonuniformity for range of Mach numbers

07 p1257 A70-19337

Supersonic wind tunnel flow discontinuities effect on oscillatory pressures

07 p1257 A70-19338

Stepwise averaged parameters of nonuniform three dimensional flow through turbine blade cascade determined from conservation conditions

09 p1606 A70-23611

Shock wave initiated two dimensional time dependent ducted flows in nonuniform regions using fluid-in-cell method, discussing density, pressure and energy distributions

09 p1665 A70-23740

Implantable EM blood flowmeter errors due to nonsymmetrical blood flow velocity distribution and nonuniform magnetic flux density

14 p2542 A70-30797

Viscometric Poiseuille or Couette flow kinematics, considering nonuniform shear rate

14 p2567 A70-31282

Flow nonuniformity effects on heat exchangers efficiency

15 p2827 A70-32140

Kinetic energy correction factor for nonuniform flow at Vena Contracta, using experimental data and modified Bernoulli equation

[ASME PAPER 70-FE-34] 16 p2892 A70-33639

Nonuniform external flow near blunt body stagnation point in diverging hypersonic thin shock layer

18 p3206 A70-36267

Nonuniform one dimensional flow of slightly ionized gas in infinitely segmented MHD generator with imperfect walls

19 p3478 A70-37588

Book on nonuniform gas theory covering viscosity, thermal conduction, diffusion, Maxwell-Boltzmann equations, density, quantum theory, transport phenomena, mixtures, electric fields, etc

20 p3673 A70-40135

Turbulent boundary layers produced by nonuniform shock tube flow, considering effects on chemical kinetic measurements

21 p3807 A70-41315

Nonuniform free stream supersonic flow past aerodynamic decelerators, calculating inviscid flow fields by method of characteristics

[AIAA PAPER 70-1176] 21 p3746 A70-41837

Centrifugal compressor losses as function of suction chamber exit nonuniform flow field delivered to impeller

21 p3747 A70-41954

Nonuniform radiation heat transfer between two coaxial cylinders, obtaining temperature distribution by Fourier series expansion

21 p3952 A70-42082

Nonuniform flow parameters for maximum thrust in nozzle, discussing specific impulse determination

22 p3960 A70-43366

Optimal load circuits number for maximum power extraction from Hall MHD generator with nonuniform gas flow along channel

23 p4143 A70-44900

NONUNIFORM MAGNETIC FIELDS

Contactless asynchronous flowmeter for measuring liquid metal coolant small flow rates, describing design and characteristics

03 p0483 A70-13211

Nutational NMR nonuniform magnetic field stabilizer for beta spectrometer, structural details and circuit schematics

03 p0485 A70-13467

Resonance frequency shift in motional field-averaging system due to nonuniformities in static magnetic or electric field may cause unexpected systematic errors

04 p0721 A70-14665

Whistler mode wave propagation in collisionless Vlasov plasma along nonuniform magnetic field

05 p0889 A70-16533

HF drift instabilities of plasma with nonuniform magnetic field, studying anomalous ion heating and resistance in Zeta installations

06 p1119 A70-17502

Plasma ion cyclotron resonance acceleration in nonuniform magnetic field by RF field

07 p1353 A70-20229

Diamagnetic plasma in nonuniform magnetic fields, determining equilibrium plasma configurations in and near neutral point for low and high pressure

09 p1734 A70-22478

Rotating plasma in nonuniform magnetic field analyzed for interchange instability based on MHD fluid and charged particle treatments

10 p1924 A70-24800

Alfven waves wavelengths dependence on inhomogeneous magnetic field geometry in stationary plasma, using conformal transformations

13 p2462 A70-28984

Free nuclear precession sensor with rotating sample for performing measurements in nonuniform magnetic field

14 p2582 A70-30218

Natural convection problem solution along nonuniformly heated vertical plate with variable transverse magnetic field

20 p3735 A70-39144

LF electrostatic ion cyclotron wave energy resonant power absorption in plasma in axially nonuniform magnetic field

24 p4386 A70-45608

Free nuclear precession sensor with rotating sample for performing measurements in nonuniform magnetic field

24 p4339 A70-46293

NONUNIFORM PLASMAS

Nonpotential waves propagating at slow phase velocity in inhomogeneous plasma, determining flute instability oscillation frequency

01 p0149 A70-10163

Thermal emission of inhomogeneous plasma sphere having dielectric constant as function of radius

01 p0149 A70-10164

Quasar 3C 273 scintillation intensity, considering role of interplanetary plasma inhomogeneities

01 p0174 A70-10199

Quasi-linear relaxation of electron beam in plasma with concentration nonuniformities, noting electron velocity role

01 p0150 A70-10213

Inhomogeneous plasma containing weak electron beam using Vlasov equation, noting wave-wave coupling effect

02 p0345 A70-11882

Permittivity tensor calculations of weakly inhomogeneous plasma with monoenergetic component, using distribution function of particles produced by thermonuclear reactions

03 p0529 A70-13055

Interplanetary plasma inhomogeneity size, shape and spatial orientation and drift velocity and direction determined from radio telescope data

03 p0565 A70-13231

Dispersive compression of plane frequency modulated waves in inhomogeneous plasma based on generalizing geometric optics approximation to unsteady quasi-harmonic processes

03 p0447 A70-13287

Nonlinear drift wave buildup in inhomogeneous plasma faster than in linear approximation

03 p0531 A70-13509

Electrical conductivity calculation for plasma in spatially inhomogeneous magnetic field using small-gyroradius approximation to kinetic equation

05 p0889 A70-16491

Polarization transfer equations for electromagnetic waves propagating in inhomogeneous magnetized plasma solved analytically for homogeneous magnetized plasma

05 p0890 A70-16570

Monograph on MHD waves covering theories for weak discontinuities, wave propagation in inhomogeneous media and behavior in magnetic fields

06 p1114 A70-17275

Ionospheric resonances observed by swept frequency Alouette topside sounders, discussing plasma nonlinearity

06 p1115 A70-17362
